INCANTATION BOWLS FROM BABYLON AND BORSIPPA IN THE BRITISH MUSEUM*

Erica C.D. Hunter**
University of Cambridge

The origins of the British Museum collection of incantation bowls are inextricably connected with the upsurge of interest in Mesopotamian antiquities that arose during the mid-nineteenth century. The first accessions took place as early as 1841, following the purchase of B.M. 91739 and B.M. 91712 from Claude Scott Stewart[1]. Austen Henry Layard published the latter, a superbly decorated specimen, written in the Syriac Estrangelo script in his epic tome, *Discoveries in the Ruins of Nineveh and Babylon*, which presented incantation bowls to the European public for the first time[2]. Discussing incantation bowls, Layard noted that "[t]wo from the collection of the late Mr. Stewart had been deposited in the British Museum"[3].

In 1851 the first incantation bowls from Babylon, B.M. 91766 and B.M. 91710, were registered by the British Museum[4]. Layard published these two bowls, which may have been discovered during his excavations at Amran, where he mentions "five cups or bowls of earthenware, and fragments of others, covered on the inner surface with letters written in a kind of ink"[5]. B.M. 91766 commenced with מזמנה קמיעה דנן מן שמיא [mzmnh qmy'h dnn mn šmy'] "designated is this amulet from heaven"[6]. In doing so, the copyist combined two common introductory formulæ לאסותא מזמן הנא כסא/קמיעא [mzmn hn' k's'/qmy'' l'swt'] "this bowl/amulet is designated for the salvation of ... " and אסותא מן שמיא ['swt' mn šmy'] "salvation from heaven"[7].

B.M. 91710 is specifically termed גיטא [gyṭ'] "a bill of divorce" against demons, including Bagdana who is named as מלכיהון דשידי ודדיוי ושליטא רבה דליליתה [mlkyhwn dšydy wddywy wšlyṭ' rbh dlylyth] "the king of the demons and of devils and great ruler of

liliths"[8]. It was written for clients, presumably husband-wife, who bore Iranian names: BHRNDWK daughter of NYWNDWK and MHDD son of YŞPNDRMYD[9]. The incantation text was widely known in Sassanid Mesopotamia and is partially duplicated by five other extant Aramaic incantation bowls, including three from Nippur[10]. It also crossed linguistic boundaries, as shown by the three parallel texts that were written in Mandaic[11]. Both the Aramaic and Mandaic versions refer, in their closing stages, to the "signet-ring" of Solomon, which was, of course, famed for its control over demons.

More incantation bowls from Babylon were acquired by the British Museum acquired in 1851 when eight specimens were purchased from Col. Henry Rawlinson. One was written in Mandaic[12]. The seven remaining incantation bowls, all written in Aramaic, were found "in a tomb at Babylon", but there are no further details about this unusual find-spot[13]. Layard published three of the "Rawlinson" texts: B.M. 91716, B.M. 91720 and B.M. 91726 in his aforementioned book. However he appears to have been mistaken about their provenance since he claimed that they were "obtained at Baghdad, where they are sometimes offered for sale by the Arabs; but it is not known from what sites they were brought"[14].

The seven Aramaic incantation bowls were a very important acquisition since they were written for the client, MHPRWZ son of HNDW, whose names combine Semitic and Iranian elements[15]. MHPRWZ, incorporating an epithet that was sported by several Sasanian monarchs, points to the infiltration of Persian nomenclature amongst the Aramaic-speaking citizens of Babylon[16]. All seven bowls (henceforth called "Rawlinson") have a common physical typology; being hemispherical with simple rims measuring 0.6 cm thick and shaved bases, that suggest their manufacture as a batch at the same workshop, probably in the city of Babylon itself. The palaeography of the incantations, in a typical Aramaic script, confirms that they were the product of the same copyist.

Four of the "Rawlinson" bowls, B.M. 91716, B.M. 91720, B.M. 91721 and B.M. 91727 were inscribed with an incantation that was very widely known in Sassanid Mesopotamia[17]. To date, fourteen parallel incantation bowls written with this text have

---

8 British Museum accession date is 1851-9-3, 2. See also S. Shaked, "Bagdana, king of the demons and other Iranian terms in Babylonian-Aramaic magic", *Acta Iranica* 25, 2nd série xi (1985) 511 - 25.

9 BHRNDWK = "Daughter of BHRN", NYWNDWK = "daughter of good/strong ones", MHDD may be read "given by the moon" or, if DD is a Semitic element, "beloved by the moon". See F. Justi, *Iranisches Namenbuch* (Marburg 1895) 75 for names commencing with the element DD.

10 Erica C.D. Hunter, "Combat and Conflict in Incantation Bowls: Studies on Two Aramaic Specimens from Nippur" in M.J. Geller, J.C. Greenfield and M.P. Weizman (eds.), *Studia Aramaica: New Sources and New Approaches* (*Journal of Semitic Studies* Supplement 4) (Oxford: 1995) 67 *sqq.* for discussion and collation of the duplicate texts.

11 Specifically, M. Lidzbarski, *Ephemeris für semitische Epigraphik*, 2 vols. (Giessen: 1902), vol. I, Text V, to which B.M. 91769 and B.M. 103358 can be added.

12 This bowl appears to have been mislaid, since its whereabouts are unknown today. It apparently came from a site called Teeb, that has remained unidentified.

13 British Museum, Trustees Minutes 1848-52, 362-3.

14 Layard, *op. cit.*, 509 and 509-514 for Texts II, III and IV.

15 B.M.91716, B.M.91719, B.M.91720, B.M.91726, B.M.91727 and B.M.91756.

16 Justi, *op. cit.*, 247 - 51 for lisings of the name PRWZ.

17 B.M.91727 has been translated three times. In 1890 it was re-edited by Moïse Schwab, "Les coupes magiques et l'hydromancie dan l'antiquité orientale", *Proceedings of the Society for Biblical Archaeology*, April 1890, 306-10 [Text B], secondly by Isak Jeruzalmi in his unpublished doctoral thesis, *Les coupes*

come to light and undoubtedly more discoveries will made of this popular text[18]. The incantation, which J. B. Segal has termed 'Refrain A', commences with a distinctive call for the overthrow of the world and heavenly *viz*: בשום הפכה הפכה שמיה הפיכי [bšwm hpkh hpkh hpykh šmyh hpyky ...] "in the name of, the Overturning, overturning. Overturned be the heavens, overturned ...". Despite being written for the same client, the "Rawlinson" texts and even their layout are not identical, but may be described as "variations on a theme".

All four bowls cite the distinctive invocation הפיכיה hpykyh "overturned" that is directed to the earth and heavenly elements and which may express why incantation bowls were buried "downturned"[19]. The command הפיכיה begins the texts of B.M. 91720, B.M. 91721 and B.M. 91727 which are written in concentric spirals. In B.M. 91716 it only occurs mid-way through the text which has been arranged, quite atypically, in four wedges or segments. הפיכיה occurs in l. 39 of the third segment, that consists of ll. 29 - 43, which have been written from the rim to the centre of the incantation bowl. The placement of hykyph undoubtedly highlighting the cardinal role of the "overturning" element in the incantation, indicates the scribe's manipulation of the text, possibly to fulfill a ritual pre-requisite.

To achieve their aim of "overturning'" the earth and the heavenly elements, B.M. 91716, B.M. 91720, B.M. 91721 and B.M. 91727 call upon the auspices of a great angel who is named as יטבא yṭb', and to whom a further eleven names are appended[20]. The listings commence with סכבך ssbk[21], although the process of orthographic corruption has garbled once intelligible epithets. Some sense can occasionally be salvaged with the final two names כביבי בנורא kbyby bnwr' being read as "scorched by fire".

TABLE 2: Names of "the great angel"

BM 91716: ss krb' ...b sydryh ḥydryh ...yh btqp' 'wqp' 'nsps kbyby bnwry'

magiques araméennes de Mésopotamie (University of Paris: 1963) 52- 63 and finally by Charles Isbell, *Corpus of the Aramaic Incantation Bowls* (Missoula: 1975) 131-2 [Text 58].

18 Other parallel texts are (i) B.M. 91745, (ii) Iraq Museum 9726, (iii) Hebrew University of Jerusalem. Institute of Archaeology No. 1401 published by Joseph Naveh and Shaul Shaked, *Amulets and Magic Bowls: Aramaic Incantations from Late Antiquity* (Leiden: 1985) 134-45 [Bowl B] (iv) a specimen in a private collection published by Edwin Yamauchi, "Aramaic magic bowls", *Journal of the American Oriental Society* 85 (1965) 511 - 23 and (v) a specimen in a private collection published by Markham Geller, "Eight incantation bowls", *Orientalia Lovaniensia Periodica* 17 (1986) 101 - 5. Six more examples of Refrain A have been identified and are included in the forthcoming volume by J.B. Segal, with a contribution by Erica C.D. Hunter, *Aramaic and Mandaic Incantation Bowls in the British Museum* (London: 2000). These incantation bowls are: B.M. 91713, B.M. 91718, B.M. 91721, B.M. 91764, B.M. 108819 and finally B.M. 117883.

19 Cyrus H. Gordon, "The Aramaic Incantation Bowls in Historic Perspective" in M. Brettler and M. Fishbane (eds.), *Minhah le-Nahum: biblical and other studies presented to Nahum M. Sarna in honour of his 70th birthday* (Sheffield: c1993) 142. The author wishes to thank Prof. Gordon for sending her an offprint of this article.

20 The name is not present in B.M. 91716 and B.M. 91721 since their texts are deteriorated at this point.

21 Naveh and Shaked, *op. cit.*, 140 postulate that YṬB' is a corruption of the term YY RB' "the great YY" which in other incantation bowls written with Refrain A is sometimes written as YRB', the Mandaean divinity Yorba. See E. Yamauchi, "Aramaic magic bowls", *Journal American Oriental Society* 85 (1965) 519.

BM 91721[22]: sskb'
BM 91727: sskb' syrh kbb' krbk' sydryh ḥydryh 'znyh btwqp' 'wqp' 'nsps kbyby bnwry'

As well as differences in the sequence of names, the actual number of names which are cited varies. B.M. 91716 and B.M. 91720 have nine, B.M. 91727 has ten. Such discrepancies, suggesting that the practitioner was unconcerned to list the exact number, do not appear to have hindered the efficacy of the text, in the same way as bowls that were selected upon which to write incantations often have physical flaws.

After the acquisition of the "Rawlinson" collection in 1851, twenty-nine years elapsed until the British Museum acquired more incantation bowls. In 1880 two Aramaic specimens from Borsippa were received from Hormuzd Rassam, a Christian from Mesopotamia, who conducted excavations on behalf of the British Museum at Babylon, as well as at nearby Borsippa (Birs Nimrud)[23]. The registration date, on the 12th of November, indicates that the two incantation bowls were found early in Rassam's two year season at Borsippa (July 1880 - July 1882)[24]. No precise information is available about the find-spot of the two incantation bowls, although a discovery at the city mound of Borsippa would be more likely than at the Nabu Temple area which Rassam also investigated[25].

B.M. 127395 and B.M. 127396 are flat-based bowls with simple rims and convex walls, their physical typology pointing to their selection from the same pottery workshop. The decoration of these two incantation bowls is highly individualistic: the interior centre has a circle subdivided into four segments, each with a crescent. In a particularly distinctive decorative touch, scalloped underlining highlights listings of eight angels' names אנניאל ברקיאל נבריאל טסדיאל זייאל טנניאל אתריאל קנאיאל qn'y'l 'nngy'l brqy'l gbry'l ḥsdy'l zyy'l ḥnny'l 'try'l which occur in the texts[26]. The palaeography confirms that the incantations were written by the same hand for the client 'B'N son of DDY whose name combines, in a pattern reminiscent of the 'Rawlinson' bowls, an Iranian appellation with a Semitic patronym[27].

The Aramaic text commences with a distinct clause: קל קלה שמעית בשמיא ql ql' šm'yt bšmy' "Hark. The voice which I heard in the heavens" which is reminiscent of phraseology which commonly opens Mandaic incantation bowls[28]. In their aim לפנסא ולסיעא lpns' wlsy''

[22] B.M. 91721 commences with ssbk' but the text has deteriorated at this point.

[23] The registration date for both incantation bowls was the twelfth of November, 1880. See J Reade, "Hormuzd Rassam and his discoveries", *Iraq* LV (1993), pp. 39-62 for a vivid discussion of the life and career of this remarkable man.

[24] See J. Reade, "Rassam's excavations at Borsippa and Kutha, 1879 - 1882", *Iraq* XLVIII (1986), p. 112 for further details.

[25] *Idem.* Rassam's inventories report the findings of miscellaneous Neo-Babylonian, Achaemenid and Hellenistic objects, as well as a hoard of Parthian coins, but do not specifically mention incantation bowls.

[26] See *Plate II*: Aramaic incantation bowl (B.M. 127396) from Borsippa.

[27] 'B'N may be 'B "water" with the patronymic suffix ān. Cf. J. Montgomery, *Aramaic Incantation texts from Nippur* (Philadelphia: 1913) Text 5:1 [Abanduk] . DDY "friend" was a very popular Semitic appellation and occurs in many Aramaic and Mandaic incantation bowls, including Montgomery, *op. cit.*, Text 15.2.

[28] For the occurrence of קל קלה שמעית וקאל הלשיא דמיתבריא ql ql' šm'yt wq'l hlšy' dmytbry' "Hark, the Voice I have heard, the voice of the weak that are broken" see B.M. 91714 l. 2; B.M. 91736 l.4; B.M. 91728 l.1;

"to provide and help" the client, the two incantation bowls, in a rare divulgence of socio-economic detail call upon כל עינא בישתא kl 'yn' byšt' "every evil eye" to desist from לביתיה ולטנותיה lbytyh wlḥnwtyh "his house and his shop", indicating that 'B'N son of DDY was a merchant or trader in Borsippa. Moreover, the opening word of the incantation, לכינפא lkynp' "for the edge" sheds light onto praxis, in giving instructions for the bowl's placement at the corners of a room or a courtyard.

Two other incantation bowls in the British Museum that are also connected with Rassam's activities at Babylon or Borsippa could have been surface finds or even bought from locals. B.M. 117873, a fragmentary specimen in a "pseudo-script" together with three fragments: B.M. 117876 and B.M. 117869 – 70 were registered on twenty-seventh of March, 1881. The fragments all came from a single large ledge-rim bowl that was written for a client called חנישׁ ḥnyš who seems to have been Jewish[29]. The text is badly deteriorated, but the legible excerpts include Hebrew quotations from Isaiah XL.12 and Genesis XLIX.22. The circumstances of their registration do not clarify their exact find-spots, but these specimens were the last incantation bowls to be acquired by the British Museum to come from Babylon and Borsippa.

CONCLUDING COMMENTS

The acquisition of incantation bowls by the British Museum was marginal in the wider scope of archaeological activities in Mesopotamia. Between 1851-1881 the British Museum received thirteen incantation bowls from Babylon or Borsippa. Nine Aramaic incantation bowls came from Babylon and two from Borsippa. Two fragmentary bowls, one in Aramaic and the other in "pseudo-script" may have come from either city. This small group represents less than 10% of the total collection of 142 incantation bowls held by the British Museum but, because their provenance has been recorded, these incantation bowls from Babylon and Borsippa are extremely valuable, not the least for the glimpses which they supply about their communities during Late Antiquity.

A Mandaic counterpart to B.M. 91710, and parallel Aramaic texts from Nippur, confirm the transmission of incantations between different locations and communities in Mesopotamia. More evidence of the inter-change between the two major language groups emerges from the inclusion of common Mandaic incantation formulae in B.M. 127396 and B.M. 127395. These two Aramaic bowls also reproduce the nomenclature that is found in the seven "Rawlinson" incantation bowls where the clients sport an Iranian name and Semitic patronym. The prevalence of this pattern in the British Museum's small collection of incantation bowls from Babylon and Borsippa suggests a trend towards Iranicization

B.M. 91740 l.3 - all of which are written in Mandaic. The phrase also occurs midway in another Mandaic text, B.M. 135438 (l.17) and a figure drawing on the outside wall of this bowl is captioned קאלא האזין דמוחא דקאל h'zyn dmwt' ḏq'l q'l' šwmy' "This is the portrait of 'Hark, a Voice". For further examples of this phrase see, E. Yamauchi, *Mandaic Incantation Texts* (New Haven: 1967) Texts 7 l.3-4, 8 l.1-2, 9 l. 1-3, 18 l.4-5, 19 l.3-4, 26 l.4-5. Also Iraq Museum 60494 which was published by Erica C.D. Hunter, "Who are the Demons? The iconography of incantation bowls", *Studi Epigrafici e Linguistici* 15 (1998). The only other known usage of this phrase in an Aramaic incantation text occurs in Montgomery, *op. cit.*, Text 13.9.

[29] The patronym cannnot be read due to the deterioration of the text at this point.

amongst the Aramaic communities. Possibly this was a response to the Sassanid dynasty at Seleucia-Ctesiphon.

§1 In P.Lond. 3, Papyrus 868 of the British Museum (now in the British Library) was described as follows:

§2 > Letter on private affairs, to the brother of the writer, whose name is not given. 7th cent. Perfect; written across the fibres, in a very straggling cursive hand.[1]

§3 The descriptum also gives the date of acquisition by the British Museum as 1900; the papyrus was later transferred to the British Library. On inspection there, the light brown sheet proves indeed complete, but not without some surface damage and abrasion. The writing is transversa charta on the front, with a kollesis visible running horizontally c. 8 cm from top and a protocol join c. 0.5 cm from the bottom. The letter was part of a lot of papyri eventually assigned the shelfmarks 835-878, described in the Catalogue of Additions as, "Miscellaneous documents, mostly official and legal,"[2] ranging in date from the first to seventh centuries CE, which were presented by the executors of the will of the antiquarian William Joseph Myers, in whose collection they had lain until his death the previous year.[3] The papyrus may have been acquired during the years in which Myers was stationed on military service in Egypt (1882-1887), or on later visits there as a private citizen. Myers is known to have had advice and assistance from Emile Brugsch and to have purchased directly from villagers in addition to antiquities dealers. More could perhaps someday be gleaned from the 36 volumes of the diaries of Myers, still unpublished, kept in the library of Eton College.

§4 The name of the brother of the writer probably was in fact given, but it lies beyond recovery in the damaged state of the text. Some progress towards contextualization can nevertheless be made. First there is the conjunction of the reading of a toponym Migtolis (6) and the presence of meizones (6), which point to an Arsinoite provenance,[4] despite the position of 868 among a group of shelfmarks (863, 865-869) that might otherwise point to the Hermopolite. Papyri in the Myers lot that have secure internal indication of provenance (see Table 1) come nearly exclusively from the Hermopolite and Arsinoite, including for the latter at least two from the seventh century (P.Lond. 3 871 of 603, P.Lond. 3 872 of ca. 619-629, both from Arsinoe; the shelfmarks might have been assigned on chronological (that is, palaeographic) grounds, not circumstances of acquisition in Egypt.

§5 Table 1: Papyri from the Myers lot (P.Lond. 835-878) with definite internal indications of provenance. (Unless otherwise noted, the publication of reference is P.Lond. 3.)

8 A transcription in Bell's notebook (as cited in n. 1 , here p. 8) establishes the residences of both parties to this lease as ἡ Ἀρσινοϊτῶν πόλις and gives a dating formula that places it in the Sasanian period; the text will be published by S. Kovarik in BASP 60 (2023).

9 See now Benaissa 2021: 188-191 no. 8.

	P.Lond. 877 (SB 22 15495): Hermopolite (Sinarchebis) (6th c.)

§6 The writer of the present letter addresses himself to a man whom he calls "brother."[10] Neither of their names can be gleaned from the damaged address on the back, but some family and associates are mentioned by name in the body. The chief matters of business, as far as can be gained from the letter's clumsy Greek, are three: acknowledgment of a shipment of fish received with a previous letter; a call to further action, or at least to further correspondence, in relation to conflict with some local officials; congratulations on a safe return. The last shades into the customary closing greetings, probably in the context of an extended family, as a "household" (ὁσπίτιον) is mentioned (9); the sender greets a woman, Thalet, and asks that the addressee greet another, Maria, and "her little child." If the brotherhood of the correspondents was of the flesh, one could speculate that Maria and Thalet might have been the wives of addressee and sender respectively, with Thalet perhaps remaining near the brothers' family home during the sender's travel in connection with the shipment of goods.

§7 The headmen (meizones) of Migtolis are presented (5-7) as causing considerable "bother" (πολλὰ σιαίνονσοι (for σιαίνουσι)). The background is unknown, but it is tempting to think of a context, established by the contemporary Senouthios archive, of complaints about perceived abuses and irregularities in requisitions for the newly installed Muslim administration, in particular for the capital at Babylon-Fusṭāṭ.[11] Some such adversarial relationship with the heads of Migtolis might also explain why the addressee is said to have returned to, and was hence presumably absent or even displaced from, his χωρίον (8-9), which could in the Islamic period mean "village"[12] more specifically than "land" as it is rendered here.

§8 The syntax of the new London papyrus is irregular but not without parallels of its time (e.g. P.Oxy. 16 1831: "very illiterate" according to the editorial introduction; P.Oxy. 16 1866: "very ungrammatical"). In fact the adverb μ̣ά̣την (5), if correctly read, adds a rather literary effect, as might the locution ἐχάρη ἡ ψυχή μου (9: see the commentary to both places). Bilingual interference from Coptic in particular might explain the most characteristic feature, the so far unparalleled density of the conjunction ἐπειδή (see also the commentary to line 3), which could have rendered a string of verbs in the circumstantial conjugation somewhat more naturally in the sender's mother tongue. Something similar has been proposed for an otherwise unusual epistolary formula in Greek, introducing the sender's name in the nominative with ἐγώ followed by the verb γράφω.[13]

§9 The main hand can be assigned to the middle of the seventh century: some general parallels in considerably more skilled hands are P.Oxy. 1 153 (618); CPR 30 3, 4, and 5 (c. 643/644), 21-22 (second half of 7th c.) The address on the back is in a chancellery style, probably by the same writer.

§10 The width of the sheet would accord with roughly half of the height of an original bookroll of 36 cm in height. Trema is used once (5), as is punctuation by colon (3, possibly also 2). The copyist has made several corrections; two of them involve the incomplete washing out of text before overwriting, which might otherwise suggest the presence of an earlier, unrelated text, if the remaining traces did not align closely with the lines of the finalized text. In three more cases the last word of a line is entirely (1) or partly (9, 11) above the line, probably an expedient for reasons of space rather than as corrections: the end of ἐδεξάμην, the second-last word in 1, is already especially compressed. Nearly double the usual space has been left above the last line on the front, probably simply to avoid a rough area on the surface.

10 On contemporary letters see in general Fournet 2009.

I have received the letter of my brother, and I have received the articles, the eight koriaxos-fish and four (fresh) catches (of fish?). Since you know the friendship between us, you did not (?) ...: write a letter, so that they may not be roused in vain (?), since you know that, as for you and me, regarding the headmen (meizones) from Migtolis—since I know that they are causing considerable bother. Since I heard that you (?) have gone back to your land again, my soul rejoiced greatly, and (so did those of) all from the house. I embrace Thalet. Embrace lady Maria and her little child. Lord Georgios, who has written this, gives you very many greetings in the Lord. Embrace warmly Apa Gerontios.

To my brother, with God, ...

§11 1 τὰ γράμμα. The plural of this noun is far more common in self-referential use in letters, and the article is certainly written τά, so the writer probably intended τὰ γράμματα (such a mistake, probably by haplography, is found in P.Kell. 1 24.16, [μὴ εἰδότ]ωϙ γράμμα), although a phonetic spelling τά for τὸ γράμμα cannot be entirely excluded (cf. Gignac, Gram.: 287-288 for the spelling, and for the singular number e.g. P.Berl.Zill. 14.1-2, ἐδεξάμ[ην] νῦν τὸ τίμιον γράμμα τῆς ὑμετέρας πατρικῆς καὶ ὁσίας δεσποτίας καὶ τῆς ἐ[ντί]μας καὶ γ[ν]ησίας [ἀ]δελφικῆς θεοφιλίας).

§12 2 εἴτη (l. εἴδη). For the spelling cf. Gignac, Gram.: 82; for the term to denote wares in the course of shipment see e.g. CPR 30 7.5.

§13 κτοριάξους (l. κοριάξους). The insertion of /t/ may be a purely graphic error under the influence of the preceding ὀκτώ, but κγο- is also a possible reading, in which one might consider the adventitious /g/ the result of a phonetic development better known through the omission of expected /g/ (Gignac, Gram.: 74). The word appears three times in the medical author Alexander of Tralles (1:501, 2:263 and 289 Puschmann; whence LSJ “a kind of fish”), for an as-yet unidentified species apparently native to the Nile, as it is found a few times in Byzantine texts as the object of shipment: P.Naqlun 1 10.3 (with Gonis 2008: 228 no. 592), P.Naqlun 2 27.8, P.Prag. 2 197, SPP 20 224.1. The fish may also appear, under the by-form κόραξος, in an iatromagical prescription to cure disorders of the spleen: P.Utrecht

Copt. Ms. B3.8 (ed. van den Broek 2017), 7 (see the commentary ad loc. for two further attestations in documentary papyri).

§14 3 ἀγρέμια. LSJ give a single instance of ἀγρέμιον from the Greek Anthology and book the term as a synonym of ἄγρα, which can in turn be applied to fish (s.v. II), here perhaps by metonymy, "(freshly-)caught (fish)," which would fit with the other item in the shipment (see the previous note). There is one other papyrological witness: the Byzantine account of provisions SB 1 5301 (twice, and once more with the spelling ἀκρε-), for which see now DGE s.v., but there the rest of the items in the list are fowl, not fish.

§15 ἐπειδή. The conjunction is used three more times in quick succession. A search of papyri.info reveals nothing closely comparable to this construction, which may constitute an idiolectal feature of the sender, possibly influenced by interference from Coptic (see further the introduction; for ἐπειδή in turn as common loanword in Coptic, Förster, WB 275-276; it became part of a common formulaic transition between the preamble and the body of Coptic letters: Biedenkopf-Ziehner 1983: 33-34, 215-216, but one that should only appear once per letter). The closest parallel is SB 5 7655, five times but more generously spaced over at least 34 lines; cf. also CPR 25 8 (twice in eight lines); CPR 30 9 (three times in 15); P.Eirene 2 24 verso, where ἐπειδή itself is copied as writing practice.

§16 4 ουκα̣.[.]ου. A negated verb form seems most likely, expressing the action taken by the addressee in consequence of knowing the 'friendship' between the correspondents; οὐ κατ̣ᾰ́[σ]χου might be considered ("you did not hold back" or "delay" from some unexpressed, praiseworthy action: cf. P.Brem. 16.13-14, μὴ κατέχου), or οὐκ ἀπ̣[έσ]χου (cf. the imperative ἀπόσχου in a request for a cessation of ὄχλησις in P.Poethke 36.4), in both cases assuming an enlarged χ; the traces of the latter could also suit λ, which has not yet led to a plausible supplement.

§17 5 ἐπαρθῶσιν `μᾰ́τ̣ην´. The reading of the verb follows a suggestion of Lajos Berkes; the τ that Bell saw in place of θ (επαρτωσιν in his notebook as cited in n. 1) may be the original writing before a correction by the copyist (for the underlying phonetic conflation in that case cf. Gignac, Gram.: 91). The reading of the supralinear insertion is hindered by some fading of the ink, but a continuation of the purpose clause seems certain in light of the following ἐπειδή, and the only other viable possibility, the pronoun αὐτ̣ήν, is a poorer fit for the sense. No parallels for the expression ἐπαίρομαι μάτην have yet been found in the papyri, but there is something relevant in John Chrysostom, In epistulam ad Romanos, ed. PG 60:469: Christians cannot have their hopes proven false, ὡς εἰκῇ καὶ μάτην καὶ ἐπὶ σαθραῖς ἐπαρθέντας ἐλπίσιν; and in the words of Adam to Hades in Romanus the Melode 44.3.3, μὴ μάτην ἐπαίρου. The adverb lends a literary ring to a documentary context: compare the simile ο̣ἶ̣[ο]ν̣ ἐπὶ γῆν ὕδωρ ἐκχύσῃ τις τολμηρώτατος μάτην in the petition P.Cair.Masp. 1 67002.15-16. If the subject is taken proleptically to be the meizones (see the following note), the meaning may be more specifically that these hostile parties should not be allowed to be "falsely elated" by a sense of victory: that is, the latter should be forestalled by the addressee's prompt action, cf. in general the wish of the petitioner in P.Hamb. 3 230.23-25 to clear himself of false accusations, ὅπως δυνηθῶ (...) ἀνεύθυνον ἐμαυτὸν ἀποδεῖξαι πάντων τῶν μάτην κατ' ἐμοῦ κατηγορημένων παρὰ τῶν συκοφαντεῖν με ἐθελόντων; and the reference in the letter SB 5 7655.23-24 to an adversary's "letter suiting his vain way of seeing and thinking" (ἐπιστολὴν πρέπουσα τῇ ὄψει αὐτοῦ καὶ τῇ φρονήσει τῇ ματαίᾳ).

§18 ἐγὼ καὶ σύ̣. The pendant nominative seems inevitable: taking σύ̣[ν] with the following noun ("I am among greater ones," perhaps i.e. "outmatched," but leaving an even more perilously pendant nominative in οἱ ἀπὸ κτλ. in 6), or the latter two together as a verbal συ̣|μείζωσιν or συ̣|μείξωσιν (but orphaning ἐγώ), gives nothing sensible. The sender will have perhaps originally intended to implicate himself in the trouble with the meizones (see the following note), but as the construction unfolded, he stressed the "bother" caused to his correspondent instead. A general parallel for the prolepsis is

the authentication-token given in P.Euphr. 17.23-25, ἐγὼ κ[α]ὶ σὺ καὶ̣ Σαδαλλαθος, σημῖον ἔχις [ὅ]τι ἐφάγαμεν λοκανικὰ ϛ.

§19 6 μείζωσιν οἱ ἀπό. The most sensible, if still not optimal division (cf. the previous note) requires this phrase to be taken with the following toponym (see the following note) as an unsyntactical whole (for μείζονες οἱ ἀπό); punctuation before οἱ, otherwise appealing in view of the common locution οἱ ἀπό for residents of a particular place, would create two nonsensical clauses, and a clausular division is signalled by the following ἐπειδή. At least the expression of multiple meizones in connection to a village is known: οἱ μείζονες Φερετνουεως in P.Oxy. 16 1937.7; for the meizon in general, chief official of a village with broad responsibilities for taxation and other matters, see Berkes 2017: esp. 75 and 82 for multiples in office in the same place.

§20 Μιχτ̣ολεως. Read by Nick Gonis (Μιττο- by assimilation is also possible, and Bell's transcript [see n. 1] gives . . ττ . λ̣εως,); probably the same as the Arsinoite Μικτολις (gen. κώμ(ης) Μικτολεως, PSI 1 63.14), ultimately derived from a Semitic word for "tower" (Aramaic magdal; cf. Hebrew migdal), as probably also Μεγτωλις (gen. Μεγτωλεως), a Hermopolite κώμη in P.Athen.Xyla 4.5 (541 CE), corrected to Μεγγωλις (gen. Μεγγωλεως) by J. Gascou (BL 10.251), but Μιγγ- is less attractive here. The toponym was compared to Μαγδωλα by Mandilaras in P.Athen.Xyla, but Gascou preferred Μιχωλις.

§21 7 σιαίνονσοι (l. σιαίνουσι). The unusual spelling could be regarded as a result of interchange of ου with ο (Gignac, Gram.: 212) followed by insertion of medial nasal (Gignac, Gram.: 118), cf. ὑπαρχὸνσα in P.Ryl. 2 160c col. 1.4; for /i/ represented by οι, Gignac, Gram.: 272. Also possible is a suggestion of Lajos Berkes: divide σιαίνον σοι, for which understand σιαίνων (σιαίνοντες) σε "are bothering you," removing some of the phonological oddity but adding unusual syntax. The verb is used for vexation probably in connection to a burden imposed by the caliph (ὁ ἀμιρᾶς τῶν πιστῶν) in the letter P.Apoll. 37.12, διότι οὐκ ἐσιάνθη ποτὲ οὔτε ἐθλίβην εἰ μὴ ἐπὶ τοῦ παρόντος; for more general annoyance in P.Oxy. 16 1837.2, ἵνα μὴ ὁ ἀναγινόσκον σιανθῇ καὶ μὴ ἀναγνώσι τὴν ἐπιστολήν; P.Oxy. 16 1849.2, ἐπειδὴ τὸ λάχανον ὅδε σαπρόν ἐστι καὶ σιαίνομε; and for ill health in CPR 5 25.5-6, τὴν δὲ ὑγίειαν Θεοδοσίου γράψῃ μοι, ἐπειδὴ ἤκουσα ὡς σιαίνεται καὶ πάνυ ἐμερίμνησα.

§22 καί. Read by Lajos Berkes.

§23 8 ἀπῆλθεν. In the absence of any other named person preceding (τοῦ ἐμοῦ ἀδελφοῦ in 1 should be the addressee, in view of the address in 15), and as σου is applied to the destination of this travel, the correction to ἀπῆλθες seems inevitable; one could think of ἀπῆλθαν (for ἀπῆλθον), but the return of the only conceivable subject of a third-person plural, the meizones once again, to the addressee's χωρίον would be no cause for rejoicing (see the following note). There may be a conceptual error, such as conflation of the second person with the polite use of a third person (e.g. ἡ σὴ ἀδελφότης), or an interchange of quiescent final letters (Gignac, Gram.: 131-132; cf. the following note).

§24 8-9 πάνυ ἐχάρην ἡ ψυχήν μου (l. ἐχάρη, ψυχή?). The false addition of two final nus (cf. the previous note) seems likelier than that ἐχάρη τὴν ψυχήν or τῇ ψυχῇ was intended. The phrase, so far not yet precisely paralleled in papyrus letters (but the opposite emotional response is referenced in μὴ λυπίσθω δὲ ἡ [ψυ]χή σου, P.Abinn. 19.10-11), has a biblical ring. Although not actually found in the Greek versions of scripture, it seems to approximate the same in Just. Dial. 58.7, εἶδον γὰρ θεὸν πρόσωπον πρὸς πρόσωπον, καὶ ἐχάρη ἡ ψυχή μου. Cf. also χαρᾷ ἐχά̣ρ[η]ν̣ in the Byzantine letter P.Lond. 2233 (ed. Zellmann-Rohrer 2017: 166-170 no. 5), 2 (with further parallels in the note at p. 168).

§25 9 The second half of the line has been washed or rubbed out and overwritten, with some traces still visible especially above and below the line; nothing connected can be made out from the original

writing, but there was perhaps an aorist participle in -ξας, the ξ written on the line, the ας above it in the same space-constrained style that motivated the writing of ὀσπιτίου.

§26 πάντα ἐκ τοῦ ὀσπιτίου. The nexus is presumably a later development from formulae such as ἀσπάζομαι πάντες τὰ [ἐ]ν τῇ οἰκίᾳ in P.Abinn. 6.23-24, with a similar confusion of gender (perhaps under the influence of expressions with ὄνομα or πρόσωπον). In the familial context of this letter, the loanword ὀσπίτιον probably has the general sense of "house" (rather than specifically "poor-house") as already in Greek of Late Antiquity (Lampe 976b s.v. 3; cf. 1249b s.v. σπίτι) and common in later Greek (LBG s.vv. ὀσπίτι(ν), σπίτι(ο)ν).

§27 10 ⟦τ̣.λ̣..⟧. The following word has been written directly over the erasure, of which some traces especially below the line are still visible; did the writer simply misspell the personal name (see the following note), e.g. as Ταλητ, and prefer to start afresh?

§28 Θαλητ. Bell's reading (see n. 1) θε\α/λητ̣ suggests a correction, which now seems to have been on a larger scale than the second letter (see the previous note); a small α at the top of λ is clear, but for the high and low traces between θ and the body of λ at midline ε is just one possibility. The name is not precisely paralleled but probably female and related to Coptic ϑⲁⲗⲏⲧ (ⲧ-ϩⲁⲗⲏⲧ) "the bird," cf. ϩⲁⲗⲏⲧ in O.Vind.Copt. 335 and SB Kopt. 2 1046 (on other Coptic names from birds, see Heuser 1929: 73-74). In Greek script cf. the genitive Θαλητ̣(ος) in the metronym in O.Ont.Mus. 2 197.4, and Ταλης, genitive Ταλητος, in P.Cair.Isid. 77.29 and 2 respectively.

§29 προ̣σκ(υνῶ) (προσκ/ pap.). The abbreviation is so far unattested for this form of the verb, but προσκ/ is found for προσκ(υνῆσαι) in CPR 25 35.12 and for προσκ(ύνει) and προσκ(υνεῖν) in P.Oxy. 16 1837.15-16. The subject of προσκ(υνῶ) is taken to be the sender of the letter rather than the adjacent personal name in the absence of another expressed object for the verb, but it could be allowed that the latter is an unexpressed σε ("I, Thalet, embrace (you)").

§30 11-14 As the reference to κύρι Γεωργίου cannot be matched to anything in the address on the back, it is taken here as the name of the amanuensis (for κύριος Γεώργιος). A vocative would otherwise be possible; formulaic greetings with ταῦτα γράψας ἀσπάζομαι are found elsewhere (e.g. P.Oxy. 1 158.4-5; 16 1855.16-17; 1860.14-15; 59 4006.7; P.Ross.Georg. 3 21.2-3; SB 5 7655.33-34), but not so far preceded by personal names in either nominative or vocative; the closest parallel so far found tends to favor the interpretation advanced here: the closing greetings in the letter P.Herm. 13.13-16, in which the copyist Nilammon adds his salutations to those of the sender Papnoutheios, ἀσπάζο[μαί] σοι ἐγὼ Νιλάμμων ὁ γρ[άψα]ς τὴν ἐπισ̣τολὴν κ̣αὶ [πάντ]α̣ς τοὺς ἀδελφοὺς κατ᾽ ὄνομα. More generally, the intrusion of a named amanuensis is occasionally found elsewhere in contemporary epistolography. In the letter PSI 14 1429 (6th c.?), a similar greeting is probably to be recognized: punctuate after υἱός in 7 and read continuously into the following line, ὁ κύριος Μαριανὸς ταῦτα γράφω, πλεῖστα ὑμᾶς ἀσπάζομαι ἐν κυρίῳ; cf. also CPR 25 35.12, ἐξ ἐμοῦ δὲ παρακαλῶ προσκ(υνῆσαι); P.Lond. 2233 (ed. Zellmann-Rohrer 2017: 166-170 no. 5), 7, ἐγὼ δὲ Βίκτωρ ὁ ὑμέτερος οἰκεῖος πολλὰ τὰ σεβάσμια ἴχνη τοῦ ἐμοῦ δεσπ(ότου) προσκυνῶ (for further parallels see p. 166 there). The apparently self-referential honorific κύριος might be due to dictation by the sender.

§31 12-13 πλεῖστα ὑμᾶς ἀσπάζομαι ἐν κυρίῳ. This form of the greeting, under the influence of the Pauline ἀσπάζομαι ἐν κυρίῳ πολλά (1 Cor. 16:19), is relatively rare: cf. CPR 30 21.11, PSI 14 1429.8, which shows other similarities of formulary with the present text (see the previous note), and SB 24 15898.2.

§32 14 Καιρ⟦.⟧όντιος (l. Γερόντιον). The spelling with /g/ for /k/ is paralleled in the Hermopolite toponym ἐποίκιον Κεροντίου in SB 26 16737.3, cf. in general Gignac, Gram.: 77.

§33 15 σὺν θ(εῷ). The ink is faded, with further losses perhaps connected to the removal of the sealing, but the conjunction of the final two uprights with a round letter above the line is assured by microscopy, and this common Christian formula is the most credible solution.

§34 The end is very obscure and still partially obscured by dirt; one expects the name of the addressee in the dative, perhaps followed by a title or the name of the sender in the nominative, but the latter would have had to have been quite short.

Ma'aseh Merkabah Literature
SH'IR QOMA
"The Measure of the Divine Body"

From the
Sefer Raziel HaGadol
Book of (the Angelic Secrets of) Raziel the Great One

1. RABBI YISMAEL SAID: "Metatron the Great Lord said to me: I bear this testimony on behalf of the Lord YHVH, *Elohim* of Israel, the Living and Enduring El, our Lord and Master:
- That His height, from His Seat of Glory and up (is) 118 ten thousands parasangs (*rebaboth*),
- From His Seat of Glory down (is) 118 ten thousands parasangs (*rebaboth*),
- His total height 236 ten thousand thousands parasangs.
- From His Right Arm to His Left Arm (is) 77 ten thousand (parasangs).
- From His Right Eye to (His) Left Eye (is) 30 ten thousands (parasangs).
- The Skull on His Head (is) three and one third ten thousand (parasangs).
- The Crowns on His Head (amount to) 60 ten thousands (parasangs) equaling the 60 ten thousands of the tribes of Israel.

Therefore is He called the Great, the Mighty and the Awesome *El* : *KLYTYH YDYDVT EL CHY KLTA 'AVVTA HMQVQ TQTF HQTF HQTM QTF B'ABVR MSVS*
"Blessed be the Name of the Glory of His Kingdom for ever."

2. It is said that he who knows this mystery is assured of his portion in the world to come (is assured to be a son (daughter) of the world to come), and will be saved from the punishment of *Gehinnom* (Hell), and from all kind of punishments and evil decrees about to befall the world, and will be saved from all kind of witchcraft, for He saves us, protects us, redeems us, and rescues me _____ from all evil things, from all harsh decrees, and from all kinds of punishments for the sake of His Great Name.

3. (A long hymn follows in alphabetical order, the alphabet being repeated several times, the hymn concludes with the verse:)
"**Lord of Hosts, happy is the man that trusts in You**." (**Psalms** 84:13)

4. RABBI YISHMAEL SAID: "I have seen the King of Kings sitting on a high and exalted throne. His hosts stand before Him on His right and on His left, with the Lord of the Presence (Sar Hapanim) whose name is Metatron: *RVH, PYSQVNY"H, PSQY"N, ATM"VN, HYGR"VN, SYGR"VN, SRT"VN, SNYGR"VN, MYQ"VN, HSKV"M, STY"M, HSK"M, HQYR"YN, N"A, DVQYR"YN, ZYN"A, RB"A, NNTV"S, ZNTV"F, HKYQ"M.*

5. RABBI YISHMAEL SAID: "What is the measure of the Holy One, Blessed be He, who is hidden from all creatures? The soles of His feet fill the whole world, as it is said (Isaiah 66:1): "The heaven is my throne, and the earth is my foot-stool."
The height of each sole is three ten thousand thousands of parasangs.
The sole of His right foot is called *PRSYMYA, ATRQTT* and His left sole (is called) *AGTMN*.
From the sole of His feet to His ankles (the height is) one thousand ten thousands and five hundred parasangs, and the same for His left (ankle).
The name of the right ankle (is) *TZNMTNYH, TSSQM*, and the name of His left ankle is *ASTMN*.
From His ankles to His knees the height (is) nineteen thousand ten thousands and four parasangs, both right and left.
The name of His left leg (is) *QNGGY, MHRYH, TSSQVM*, and of the right (leg) (is) *MMGA, VZVYA*.
The height from His knees to His thighs (is) twelve thousand ten thousands and fourteen hundred parasangs, both right and left. His name: *MMGA, VZVYA*.
The right thigh is called *SSPVST, PRSB*, and the left (thigh) is called *TFGT, HZYZA*.
From His thighs to His neck (the height is) twenty-four thousand ten thousands of parasangs.
The name of His loin of loins (is) *MVTNYHV, ATSGH, YDYDYH*.
On His Heart are inscribed seventy names:
(list of Hebrew Names not available in HTML)
"*Baruch Shem Kavod Malkuto L'Olam Va'ed*."
(Blessed be the Name of the glory of His kingdom forever.)
His neck: Thirteen thousand ten thousands and eight hundred parasangs (is) the height of His neck, its name: *SNNYHV, VBHTYQN*.
The roundness of His head (circumference) (is) three hundred thousand ten thousands and thirty-three and one third parasangs, which the mouth cannot express and the ear cannot hear, its name: *ATR, HVDRYH, ATSYH, ATTYH*.
His beard (is) eleven thousand five hundred (one ten thousand and one thousand and five hundred) parasangs, its name: *HDRRQ, SMYA*.
The appearance of the countenance as the appearance of the cheeks, (as well as the appearance of the cheeks) is like unto the likeness of the *Ruach* [i.e. *Ruach HaQodesh*] and in the form of the Divine Soul (*Neshamah*) (which) no creature is able to mention or describe.
His Astral Shell (*geviyah*) like chrysolite (*tarsis*).
His splendor (*ziv*) glitters awesomely from out of the midst of the darkness (**Psalms** 18:12 and **2 Samuel** 22:12).
Clouds and thick darkness (*anan v'arafe*l) surround Him (**Psalms** 97:2).
All Lords of the Presence (*Sare He'anim*) stand before Him as ordained (*k'tikun*).
(For the nose and the tongue) we do not have a measure, only names are revealed to us.
The name of the nose: *LGBTYYA*, and also *ABRGG, TTPYYH*.
His tongue (reaches) from one end of the World to the other, for it is said (**Psalms** 147:19): "**He declares His Word unto Jacob, His statutes and His ordinances unto Israel**." He who knows not (how) to conclude this verse is in error for it is said: "**He declares**" its (the tongue) name *ASSGYYHV, VAYYA*.

His forehead is called *MSSGYYHV, YNAYYA, NGM*.
On His forehead is inscribed:
(Hebrew font not available in HTML)
YYHV HY HV YH
HH HY VYHV YH YHV
YVH HA HH YA YHVH
VYH HH YH HV HA
AH VVH AY HV HYH
HY YYY HH YYHYY VYH
The black of His eye (is) 11,500 parasangs, similarly His left eye.
The right (eye) is named: *AZRYYH, ATTYTVS*.
The Lord (of the eye?) is called *RHBEL* (*RHBYEL* or *RHBEL*).
The left (eye) is called *MTT, GRVFMTzYA*, and the sparks that issue (emanate) from them (from it) give light to all creatures.
The white of His right eye (measures) twenty-two ten thousand and two parasangs, similarly (that of) His left (eye), and is named: *BZQVHA*.
From His right shoulder to His left shoulder (is) sixteen thousand ten thousands parasangs,
The right shoulder is named: *MTTGRYAA*, '*ANGN*.
The left (shoulder) is called TTMHYNTA, it also has another name *SLMH YNNYEL* (alternate reading: and it has one name, meaning that the two shoulders have one name in common).
From His right arm to His left arm (is) twelve thousand ten thousands parasangs.
His arm (are) double [The meaning is, perhaps, that the two arms together are double the size mentioned before, namely twenty-four thousand ten thousands parasangs].
The name of the right arm (is) *GBRHZZYA, AKBVY*,
and of the left (arm) *MTTGHTzTzYVH*.
The (size of) the fingers of His hands: each finger (is) fifteen thousand ten thousands parasangs, both of the right and of the left.
(The name of the fingers or of each finger) of the right (hand): *TTMTzMTz, GGMVT, GGSMS*, and of the left (hand) *TTz, MF, TTMT, AGGMZ, AGGMT, SVSNYM* (the last name is *Shoshanim*, roses). This way, you count beginning with the thumb.
The palms of His hands (are) four thousand ten thousands parasangs, both the right and the left (hands).
The right (hand) is named: *HZZYA, ATGRYYA*, and the left (hand) is named: *ASHVZYH*.
The fingers (toes) of His feet (are) ten thousand ten thousands parasangs, each finger (toe) on both right and left (feet).
The name of the right (toes): *ATRMTz, ADRMT, BRMNM, BRTHMYM, VAHVZ*; and (the names of the) left (toes): *ZKYYN, KZKYYN, HTMT, AHVZ*. You count the way you count those of the hand (namely beginning with the big toe).
Therefore, is He called: the Great, the Mighty, the Awesome *El*, for it is said (***Torah Doverim*** 10:17): "***For the Lord YHVH your Elohim, HE is Elohim of Elohim, Lord of Lords, the great El, the Mighty and the Awesome***."

6. HE SAID TO ME: "The size of the parasangs, what they measure: each parasang consists of three mils, each mil contains ten thousand cubits, each cubit two spans

(Zereth), and His span fills the whole world (*olam*, also universe). As it is written (**Isaiah** 40:12): "**Who has measured in the hollow of His hand the waters, and meted out the Heavens with His span**."

7. RABBI NATHAN, THE PUPIL OF R. YISHMAEL SAID: He also gave me the measure of the nose right and left, as well as that of the lips and cheeks. Also he gave me the measure of the forehead, he also set down rules for every cubit.
The width of the forehead is equal to the height of the neck, and so is the shoulder.
The length of the nose (is) like the length of the small finger.
The height of the cheek is equal to half the roundness of the head.
These measures are also found in human beings.
(In size of) His lips: seventy-seven parasangs.
His upper lip is called *GBRH, TYA*, and the lower one *HZRGYA*.
His mouth is fire consuming fire.
When He speaks its name (is) *ASDRA*.
-(the next five words are not translatable) The crown on His head (is) five hundred thousand by found hundred thousand (parasangs); its name is *VYS*.
The precious stone between its horns [rays?] is called *YS AMV ALY YS AMI ALY* is engraved upon it.
My friend is white and ruddy, distinguished among ten thousand.
His head is bright as the finest gold,
His locks are like waving foliage and black as a raven.
His eyes are doves by streamlets of water.
His cheeks are like a bed of roses...
Two thousand ten thousands parasangs.
And whoever does not conclude with this verse (**Shir HaShirim** 5:10-16) is in error:
"**His cheeks are like a bed of roses,**
As banks of sweet herbs;
His lips are as lilies,
Dropping with flowing myrrh.
His hands are as rods of gold, set with beryl.
His body is as polished ivory, overlaid with sapphires.
His legs are as pillars of marble,
Set upon sockets of fine gold.
His aspect is like Lebanon,
Excellent as the cedars.
His mouth is most sweet.
Yea, He is altogether lovely.
This is my beloved, and this is my friend,
O daughters of Jerusalem."
AGTYH, THVN, YHVN, TVB, THVR, YVD, YVD, YHYH, HSYN, HSYN
"**Holy Holy Holy is the Lord YHVH of Hosts, the whole earth is full of His Glory**."
(**Isaiah** 6:3)
(The measure of) His eyelids, like the measure of His eyes…
The right (eye) is named *HDR, VVLD*; the left (eye is named) *APDH*
(in Lemberg *APRH*), *TzTzYHV*.

The height of His ears (is) like the height of His forehead.
The right (ear) is called *ATzTHYYA*; the left (ear is called) *MNVGHV*.
Hence, the total measure [of the Divine Stature] is ten thousand of ten thousands ten thousand thousand parasangs in height, and one thousand thousand ten thousands of parasangs in width.

8. RABBI YISHMAEL TOLD THIS (THING) TO RABBI AQIBA. HE SAID TO ME: "He who knows this measure of our Creator, and the praise of the Holy One, blessed be He, Who is hidden from the creatures, is assured that he is the son of the world to come. (He will inherit the world to come), and will have in this world the good of the other world, and will live long in this world.

9. RABBI YISHMAEL SAID TO ME (the above mentioned Rabbi Nathan?) in the presence of his pupils. I and Rabbi Aqiba vouch for this, that whoever knows this measure of our Creator, and the praise of the Holy One, blessed be He, he will surely be a son of the world to come, provided he learns it regularly every day:
His body fills the Throne of Fire of the ***Torah***.
His name: *BG, BG, GB, HVMG*.
His locks (of) His body are named: *DBR, BRYR, DVBG*.
They have half of a nickname called: *GL, SRB*.
One of His eyes with which He sees from one end of the world to the other is named: *AKSST*, the sparks issuing from it give light to all creatures; the other one, which sees backwards (with which He sees in advance), what is going to happen in the future, is named *ATNVGST*.
His body is like unto a bow, the bow is like unto its name: *LQSSYS*, half of it is named *MN, KMTz*.
His sword is called *MTzMTzYT, MTzYA*.
His Throne of Glory is named *LVRKZ, PYRVTA*.
The place of His seat is called *DVRPZ, PRVRPZ* this is also His nickname.
The feet of His glory are the Chayot.
The Chayot standing under Him.
The first foot of the Throne, which is a Chayah, is called *AGLYV, HTzBYYH*.
The second foot of the Throne, which is a Chayah, is called *BBBK, PLBYYPTY*.
The third foot of the Throne, which is a Chayah, by name *KBBB, ALGYY*.
The fourth foot, which is a Chayah, is called *ATzBYYA, BZBZ*.
The likeness of their faces... the nature of a lion, the stamp of an eagle, the image of an ox, and the blank face of a man.
Each has four faces, four faces, and four faces on each corner (of a face), sixty-four faces for each Chayah.
Each Chayah has four faces and (four) wings, each wing consists of four wings; four wings to a face, four wings to a wing...sixty four wings to each Chayah.
The Lord of the human face is *ALYH, AMTzB, AMTz, AMT, KMTz*.
The names of the Lord of the lion-face (are) *HVDV, DYH, HYDVAH, AL, AVRYA, HVD, HVYH, TMGMTz*.
The Lord of the ox-face is called [SVR in both texts] *HLYH, TzMTzMMKA, MSKYA*.
And the name of the Lord of the eagle-face (is) *'APPY, ALYH, MMTzYT, TzHVRYRYAL*.

When Israel sinned, the ox-face was hidden away, and was replaced with a Kerub.
The name of the Lord of the Kerub-face (is): *TMTMNY, ALYH, KRRVBYH, KRBH, PSPSYH, PTzPTzYH, HNQNQYA.*
They (the Chayot) are the ones who say "**Holy Holy Holy**..." (**Isaiah** 6:3), it is they who say, "**Blessed be the glory**..." (**Ekekiel** 3:12) as it is written (**Psalms** 146:19): "**He declares His Word unto Ya'aqov**."
And he who does not conclude with ***Torah B'reshith***, with the order of the Creation, errs in the Glory of the Holy One, blessed be He. His glory fills everything, hosts of thunder rage on His right. Bands of people rage on His left, and colors (Simanim) rage in front of Him.
Within the colors, splendor, and darkness, cloud, thick cloud ('*arafel*) and mire of clay (*tithyaven*).
In front of Him (is) a field of sown seed (*zeroo'yin*).
Between one star and another (is) the source of lightning.
Between one lightning and another (is) the door of Hashmal.
And above: winds, roaring, thunder and lightning, and the holy palms, and ropes of seals, used for ascending and descending.
On the Holy One, blessed be He, (are) Grace (*Chen*), Love (*Chesed*), Glory (*Kavod*), Mercy (*Rachamim*), Splendor (*Hod*), Crown ('*Atehreth*), Adornment (*Hadar*), Beauty (*Tifareth*), and Majesty (*Ge'ooth*).
The Hand of the Holy One, blessed be He, (is named) Metatron.
They say: Mighty and Strong...
They say: Holy and Blessed...
And they appear before Him with a great sound (as in **Ezekiel** 1:24): "**As they went, a noise like the sound of a host**." They stand before Him.
The Youth (*Na'ar*) Metatron appears and prostrates himself before the Holy One, blessed be He, His name AHH...
He praises and glorifies and says:
"Blessed be the glory of the Lord YHVH from His place."
YHVH, HV, HV, YVHY, YHYYH
"Blessed be the glory of the Lord YHVH from His place."
And they repeat after him: "Blessed be the glory of the Lord YHVH from His place," and "Blessed be the Name of the glory for ever."
He (Metatron) enters in front under the Throne of Glory.
He is accompanied by stones of fire and hailstones and a wall of roaring (*z'aaf*) on his right.
On his left, wings of storm and strength of tempest accompany him.
When Metatron enters before the Holy One, blessed be He, under the Throne of Glory, he holds (the Throne) with a multitude of wings, and all the ministering angels come before the Holy One, blessed be He, and say: "the great, the mighty, and awesome *El*."
They praise the Holy One, blessed be He, thrice daily through Metatron.
The Holy One, blessed be He, bestowed His splendor and His beauty on the ministering Angel Metatron, the Lord of the Presence, who has been appointed grand master over all the Lords and ministering angels.
They stand before him, and he stands higher and higher upwards, and ministers before Adam; a fire consuming fire throne (*kise*) is its name.

This is the seat of Metatron, the Lord of the Presence, which is written with One-Letter (Alef, the Unity) with which Heaven and Earth have been created, and sealed with the ring "I WILL BE THAT I WILL BE" (*Ehyeh Asher Ehyeh*). And is written with seven letters, and seven letters, and twenty-four letters, and seventy-two names, and seven Holinesses (*Kedushoth*). And it is placed on six of their names, and is engraved on twelve stones, and is written on seven sounds (voices) on a height of six by six (see **Book of THAT Which is Concealed**...***Zohar* II**: 186b).

It was given to our teacher Mosheh (Rabbenu) in innermost chambers, in hidden hiddenness, in wonder of wonders.

The Holy One, blessed be He, permitted neither Adam nor Shem, the son of Noah, nor Abraham, Yitza'aq, or Ya'aqov to use it. Only to Mosheh did He give permission to use it, as it is written (*Torah Doverim* 23:20): "***Behold I send an angel before you***," and the Holy One, blessed be He, warned Mosheh to beware of Him, as it says (***Torah Shmoth*** 23:21): "***Beware of Him, and obey His voice, disobey Him not, for He will not pardon your transgressions because My Name is in Him***." And Mosheh said to the Holy One, blessed be He (***Torah Shmoth*** 33:15): "***If Your NOT (Lo)-Presence go with me; carry us (into the) NOT (Lo), up from here***."

The angels that are with him (Metatron) come and surround the Throne of Glory, they on one side, Chayot on the other, and the *Shekhinah* upon the *Shekhinah* of Glory is in the middle. A Chayah ascends on the Serafim and descends on the dwelling place of Metatron, and announces in a loud voice, in the sound of a soft whisper [still small voice]: "This is the Throne of Glory."

Immediately the Ofanim become silent, the angels become quiet, the *Irin Kadishin* make haste and rush into the River of Fire (*Nehr Dinur*), and the Chayot turn their faces down to the ground. Metatron brings the deafening fire and puts it in the ears of the Chayot, that they hear not the voice of the glory of the Holy One, blessed be He, and the explicit "Name of Brilliant Fire" (*Shem Ha Meforesh,* YHVH) that Metatron is pronouncing at that time.

Thus is He calling the Holy One, blessed be He, by His living, pure, holy, powerful, majestic, strong, beloved, mighty, glorified and awesome Name:

vhyrda yhh hvh hh
ykrha avy vhv yhyhy
HHYY HKH HH YH
YHVH HH HYA YHYH
AHYH ASR AHYH VH HVA YHVH

"***He who lives for ever, this is my name for ever, and this is my memorial unto all generations***." (***Torah Shmoth*** 3:15).

"Blessed be the Name of the glory of His Kingdom for ever."

Its interpretation in the language of purity (Metatron pronounces the *Shem Ha Meforesh*, Brilliant Name of Fire, in the language of purity):

YHV YH HHY HYY HY
HHYV HVHY VYHH HV YHVH
HYH HYH YHY YHVH
HY VYHYV HY YHV
YH YHV HHYV HYHV

Blessed be the Name of the glory of His Kingdom for ever.

10. Here follows in the text a hymn, and **Psalms** 93, 29, and 24.

End of "Meaure of the Divine Body"

SH'IR QOMA

RECONSTRUCTION OF THE TEXT ACCORDING TO BEST EVIDENCE

The "**Meaure of the Divine Body**" text is known to be corrupt, as all current texts come from a single corrupt text published in the 1701 Amsterdam edition (Eleazar of Worms). Consequently, the dimensions taken as directly translated will not lead to a reasonable image of the *Yosher* (upright form of the Lord YHVH). However, if the following changes are made, the *Yosher* image that is yielded (see Figure) can be shown to be self-consistent with the text. Seventeen dimensions were left unchanged, eleven dimensions were changed as follows, and the last two dimensions, dealing with the total measure, were not used.

SECTION DIMENSION READ (x107 Parasangs) change made
HEIGHT (Seat of Glory) 118 add *alafim*
HEIGHT (Seat of Glory) 118 add *alafim*, Seat of Glory is located in single Eye of Vast Face in center of Small Face's head.
TOTAL HEIGHT 236 no change
Right Arm to Left Arm 77 add *alafim*, this is completely around two arms
Right Eye to Left Eye 30 add *alafim*
Skull (Galgaltha) on Head 30 add *alafim*
Crowns on Head 60 add *alafim*
Sole to Ankles 1.5 no change
Ankles to Knees 23 add *rebaboth*
Knees to Thighs 13.4 no change
Thigh to Neck 24 no change
Height of Neck 13.8 no change
Roundness (circumference) of Head 333 1/3 no change
Beard 15 multiply by 10 (change *alafim* to *rebaboth*)
Black of Right Eye 1.15 no change
White of Right Eye 24 add *alafim*
Right Shoulder to Left 16 multiply by 10
Right Arm to Left Arm 12 x 2 (no change) dimension given must be doubled as shown in text, and taken across body.
Finger 15 no change
Palms 4 no change
Toes 10 no change
Width of Forehead 13.8 no change, however this must be taken across Vast Face Skull
Width of Shoulder 13.8 no change, checks with dimension in 5
Length of Nose 15 no change
Height of Cheek 53 no change, however, this must be taken as half the diameter of the head, otherwise human dimensions will not hold, as claimed in next sentence
Lips, Height 7.7 multiply x 106
Crown 50 x 50 square add *alafim*, then dimensions in 1 check
Eyelids, like Eyes 24 unchanged

Height of Ears = Height of Forehead unchanged
TOTAL MEASURE OF DIVINE STATURE, probably entire Chariot:
Height 10,000 x 107 parasangs
Width 1,000 x 107 parasangs
(both of these dimensions are omitted as being essentially beyond the image presented in the rest of the dimensions

Ma'aseh Merkabah Literature
SH'IR QOMA
"The Measure of the Divine Body"

From the
Sefer Raziel HaGadol
Book of (the Angelic Secrets of) Raziel the Great One

1. RABBI YISMAEL SAID: "Metatron the Great Lord said to me: I bear this testimony on behalf of the Lord YHVH, *Elohim* of Israel, the Living and Enduring El, our Lord and Master:
- That His height, from His Seat of Glory and up (is) 118 ten thousands parasangs (*rebaboth*),
- From His Seat of Glory down (is) 118 ten thousands parasangs (*rebaboth*),
- His total height 236 ten thousand thousands parasangs.
- From His Right Arm to His Left Arm (is) 77 ten thousand (parasangs).
- From His Right Eye to (His) Left Eye (is) 30 ten thousands (parasangs).
- The Skull on His Head (is) three and one third ten thousand (parasangs).
- The Crowns on His Head (amount to) 60 ten thousands (parasangs) equaling the 60 ten thousands of the tribes of Israel.

Therefore is He called the Great, the Mighty and the Awesome *El* : *KLYTYH YDYDVT EL CHY KLTA 'AVVTA HMQVQ TQTF HQTF HQTM QTF B'ABVR MSVS*
"Blessed be the Name of the Glory of His Kingdom for ever."

2. It is said that he who knows this mystery is assured of his portion in the world to come (is assured to be a son (daughter) of the world to come), and will be saved from the punishment of *Gehinnom* (Hell), and from all kind of punishments and evil decrees about to befall the world, and will be saved from all kind of witchcraft, for He saves us, protects us, redeems us, and rescues me _____ from all evil things, from all harsh decrees, and from all kinds of punishments for the sake of His Great Name.

3. (A long hymn follows in alphabetical order, the alphabet being repeated several times, the hymn concludes with the verse:)
"**Lord of Hosts, happy is the man that trusts in You**." (**Psalms** 84:13)

4. RABBI YISHMAEL SAID: "I have seen the King of Kings sitting on a high and exalted throne. His hosts stand before Him on His right and on His left, with the Lord of the Presence (Sar Hapanim) whose name is Metatron: *RVH, PYSQVNY"H, PSQY"N, ATM"VN, HYGR"VN, SYGR"VN, SRT"VN, SNYGR"VN, MYQ"VN, HSKV"M, STY"M, HSK"M, HQYR"YN, N"A, DVQYR"YN, ZYN"A, RB"A, NNTV"S, ZNTV"F, HKYQ"M.*

5. RABBI YISHMAEL SAID: "What is the measure of the Holy One, Blessed be He, who is hidden from all creatures? The soles of His feet fill the whole world, as it is said (Isaiah 66:1): "The heaven is my throne, and the earth is my foot-stool."
The height of each sole is three ten thousand thousands of parasangs.
The sole of His right foot is called *PRSYMYA, ATRQTT* and His left sole (is called) *AGTMN*.
From the sole of His feet to His ankles (the height is) one thousand ten thousands and five hundred parasangs, and the same for His left (ankle).
The name of the right ankle (is) *TZNMTNYH, TSSQM*, and the name of His left ankle is *ASTMN*.
From His ankles to His knees the height (is) nineteen thousand ten thousands and four parasangs, both right and left.
The name of His left leg (is) *QNGGY, MHRYH, TSSQVM*, and of the right (leg) (is) *MMGA, VZVYA*.
The height from His knees to His thighs (is) twelve thousand ten thousands and fourteen hundred parasangs, both right and left. His name: *MMGA, VZVYA*.
The right thigh is called *SSPVST, PRSB*, and the left (thigh) is called *TFGT, HZYZA*.
From His thighs to His neck (the height is) twenty-four thousand ten thousands of parasangs.
The name of His loin of loins (is) *MVTNYHV, ATSGH, YDYDYH*.
On His Heart are inscribed seventy names:
(list of Hebrew Names not available in HTML)
"*Baruch Shem Kavod Malkuto L'Olam Va'ed*."
(Blessed be the Name of the glory of His kingdom forever.)
His neck: Thirteen thousand ten thousands and eight hundred parasangs (is) the height of His neck, its name: *SNNYHV, VBHTYQN*.
The roundness of His head (circumference) (is) three hundred thousand ten thousands and thirty-three and one third parasangs, which the mouth cannot express and the ear cannot hear, its name: *ATR, HVDRYH, ATSYH, ATTYH*.
His beard (is) eleven thousand five hundred (one ten thousand and one thousand and five hundred) parasangs, its name: *HDRRQ, SMYA*.
The appearance of the countenance as the appearance of the cheeks, (as well as the appearance of the cheeks) is like unto the likeness of the *Ruach* [i.e. *Ruach HaQodesh*] and in the form of the Divine Soul (*Neshamah*) (which) no creature is able to mention or describe.
His Astral Shell (*geviyah*) like chrysolite (*tarsis*).
His splendor (*ziv*) glitters awesomely from out of the midst of the darkness (**Psalms** 18:12 and **2 Samuel** 22:12).
Clouds and thick darkness (*anan v'arafe*l) surround Him (**Psalms** 97:2).
All Lords of the Presence (*Sare He'anim*) stand before Him as ordained (*k'tikun*).
(For the nose and the tongue) we do not have a measure, only names are revealed to us.
The name of the nose: *LGBTYYA*, and also *ABRGG, TTPYYH*.
His tongue (reaches) from one end of the World to the other, for it is said (**Psalms** 147:19): "**He declares His Word unto Jacob, His statutes and His ordinances unto Israel**." He who knows not (how) to conclude this verse is in error for it is said: "**He declares**" its (the tongue) name *ASSGYYHV, VAYYA*.

His forehead is called *MSSGYYHV, YNAYYA, NGM*.
On His forehead is inscribed:
(Hebrew font not available in HTML)
YYHV HY HV YH
HH HY VYHV YH YHV
YVH HA HH YA YHVH
VYH HH YH HV HA
AH VVH AY HV HYH
HY YYY HH YYHYY VYH
The black of His eye (is) 11,500 parasangs, similarly His left eye.
The right (eye) is named: *AZRYYH, ATTYTVS*.
The Lord (of the eye?) is called *RHBEL* (*RHBYEL* or *RHBEL*).
The left (eye) is called *MTT, GRVFMTzYA*, and the sparks that issue (emanate) from them (from it) give light to all creatures.
The white of His right eye (measures) twenty-two ten thousand and two parasangs, similarly (that of) His left (eye), and is named: *BZQVHA*.
From His right shoulder to His left shoulder (is) sixteen thousand ten thousands parasangs,
The right shoulder is named: *MTTGRYAA*, '*ANGN*.
The left (shoulder) is called TTMHYNTA, it also has another name *SLMH YNNYEL* (alternate reading: and it has one name, meaning that the two shoulders have one name in common).
From His right arm to His left arm (is) twelve thousand ten thousands parasangs.
His arm (are) double [The meaning is, perhaps, that the two arms together are double the size mentioned before, namely twenty-four thousand ten thousands parasangs].
The name of the right arm (is) *GBRHZZYA, AKBVY*,
and of the left (arm) *MTTGHTzTzYVH*.
The (size of) the fingers of His hands: each finger (is) fifteen thousand ten thousands parasangs, both of the right and of the left.
(The name of the fingers or of each finger) of the right (hand): *TTMTzMTz, GGMVT, GGSMS*, and of the left (hand) *TTz, MF, TTMT, AGGMZ, AGGMT, SVSNYM* (the last name is *Shoshanim*, roses). This way, you count beginning with the thumb.
The palms of His hands (are) four thousand ten thousands parasangs, both the right and the left (hands).
The right (hand) is named: *HZZYA, ATGRYYA*, and the left (hand) is named: *ASHVZYH*.
The fingers (toes) of His feet (are) ten thousand ten thousands parasangs, each finger (toe) on both right and left (feet).
The name of the right (toes): *ATRMTz, ADRMT, BRMNM, BRTHMYM, VAHVZ*; and (the names of the) left (toes): *ZKYYN, KZKYYN, HTMT, AHVZ*. You count the way you count those of the hand (namely beginning with the big toe).
Therefore, is He called: the Great, the Mighty, the Awesome *El*, for it is said (***Torah Doverim*** 10:17): "***For the Lord YHVH your Elohim, HE is Elohim of Elohim, Lord of Lords, the great El, the Mighty and the Awesome***."

6. HE SAID TO ME: "The size of the parasangs, what they measure: each parasang consists of three mils, each mil contains ten thousand cubits, each cubit two spans

(Zereth), and His span fills the whole world (*olam*, also universe). As it is written (**Isaiah** 40:12): "**Who has measured in the hollow of His hand the waters, and meted out the Heavens with His span**."

7. RABBI NATHAN, THE PUPIL OF R. YISHMAEL SAID: He also gave me the measure of the nose right and left, as well as that of the lips and cheeks. Also he gave me the measure of the forehead, he also set down rules for every cubit.
The width of the forehead is equal to the height of the neck, and so is the shoulder.
The length of the nose (is) like the length of the small finger.
The height of the cheek is equal to half the roundness of the head.
These measures are also found in human beings.
(In size of) His lips: seventy-seven parasangs.
His upper lip is called *GBRH, TYA*, and the lower one *HZRGYA*.
His mouth is fire consuming fire.
When He speaks its name (is) *ASDRA*.
-(the next five words are not translatable) The crown on His head (is) five hundred thousand by found hundred thousand (parasangs); its name is *VYS*.
The precious stone between its horns [rays?] is called *YS AMV ALY YS AMI ALY* is engraved upon it.
My friend is white and ruddy, distinguished among ten thousand.
His head is bright as the finest gold,
His locks are like waving foliage and black as a raven.
His eyes are doves by streamlets of water.
His cheeks are like a bed of roses...
Two thousand ten thousands parasangs.
And whoever does not conclude with this verse (**Shir HaShirim** 5:10-16) is in error:
"**His cheeks are like a bed of roses,**
As banks of sweet herbs;
His lips are as lilies,
Dropping with flowing myrrh.
His hands are as rods of gold, set with beryl.
His body is as polished ivory, overlaid with sapphires.
His legs are as pillars of marble,
Set upon sockets of fine gold.
His aspect is like Lebanon,
Excellent as the cedars.
His mouth is most sweet.
Yea, He is altogether lovely.
This is my beloved, and this is my friend,
O daughters of Jerusalem."
AGTYH, THVN, YHVN, TVB, THVR, YVD, YVD, YHYH, HSYN, HSYN
"**Holy Holy Holy is the Lord YHVH of Hosts, the whole earth is full of His Glory**."
(**Isaiah** 6:3)
(The measure of) His eyelids, like the measure of His eyes…
The right (eye) is named *HDR, VVLD*; the left (eye is named) *APDH*
(in Lemberg *APRH*), *TzTzYHV*.

The height of His ears (is) like the height of His forehead.
The right (ear) is called *ATzTHYYA*; the left (ear is called) *MNVGHV*.
Hence, the total measure [of the Divine Stature] is ten thousand of ten thousands ten thousand thousand parasangs in height, and one thousand thousand ten thousands of parasangs in width.

8. RABBI YISHMAEL TOLD THIS (THING) TO RABBI AQIBA. HE SAID TO ME: "He who knows this measure of our Creator, and the praise of the Holy One, blessed be He, Who is hidden from the creatures, is assured that he is the son of the world to come. (He will inherit the world to come), and will have in this world the good of the other world, and will live long in this world.

9. RABBI YISHMAEL SAID TO ME (the above mentioned Rabbi Nathan?) in the presence of his pupils. I and Rabbi Aqiba vouch for this, that whoever knows this measure of our Creator, and the praise of the Holy One, blessed be He, he will surely be a son of the world to come, provided he learns it regularly every day:
His body fills the Throne of Fire of the ***Torah***.
His name: *BG, BG, GB, HVMG*.
His locks (of) His body are named: *DBR, BRYR, DVBG*.
They have half of a nickname called: *GL, SRB*.
One of His eyes with which He sees from one end of the world to the other is named: *AKSST*, the sparks issuing from it give light to all creatures; the other one, which sees backwards (with which He sees in advance), what is going to happen in the future, is named *ATNVGST*.
His body is like unto a bow, the bow is like unto its name: *LQSSYS*, half of it is named *MN, KMTz*.
His sword is called *MTzMTzYT, MTzYA*.
His Throne of Glory is named *LVRKZ, PYRVTA*.
The place of His seat is called *DVRPZ, PRVRPZ* this is also His nickname.
The feet of His glory are the Chayot.
The Chayot standing under Him.
The first foot of the Throne, which is a Chayah, is called *AGLYV, HTzBYYH*.
The second foot of the Throne, which is a Chayah, is called *BBBK, PLBYYPTY*.
The third foot of the Throne, which is a Chayah, by name *KBBB, ALGYY*.
The fourth foot, which is a Chayah, is called *ATzBYYA, BZBZ*.
The likeness of their faces... the nature of a lion, the stamp of an eagle, the image of an ox, and the blank face of a man.
Each has four faces, four faces, and four faces on each corner (of a face), sixty-four faces for each Chayah.
Each Chayah has four faces and (four) wings, each wing consists of four wings; four wings to a face, four wings to a wing...sixty four wings to each Chayah.
The Lord of the human face is *ALYH, AMTzB, AMTz, AMT, KMTz*.
The names of the Lord of the lion-face (are) *HVDV, DYH, HYDVAH, AL, AVRYA, HVD, HVYH, TMGMTz*.
The Lord of the ox-face is called [SVR in both texts] *HLYH, TzMTzMMKA, MSKYA*.
And the name of the Lord of the eagle-face (is) *'APPY, ALYH, MMTzYT, TzHVRYRYAL*.

When Israel sinned, the ox-face was hidden away, and was replaced with a Kerub.
The name of the Lord of the Kerub-face (is): *TMTMNY, ALYH, KRRVBYH, KRBH, PSPSYH, PTzPTzYH, HNQNQYA.*
They (the Chayot) are the ones who say "**Holy Holy Holy**..." (**Isaiah** 6:3), it is they who say, "**Blessed be the glory**..." (**Ekekiel** 3:12) as it is written (**Psalms** 146:19): "**He declares His Word unto Ya'aqov**."
And he who does not conclude with ***Torah B'reshith***, with the order of the Creation, errs in the Glory of the Holy One, blessed be He. His glory fills everything, hosts of thunder rage on His right. Bands of people rage on His left, and colors (Simanim) rage in front of Him.
Within the colors, splendor, and darkness, cloud, thick cloud ('*arafel*) and mire of clay (*tithyaven*).
In front of Him (is) a field of sown seed (*zeroo'yin*).
Between one star and another (is) the source of lightning.
Between one lightning and another (is) the door of Hashmal.
And above: winds, roaring, thunder and lightning, and the holy palms, and ropes of seals, used for ascending and descending.
On the Holy One, blessed be He, (are) Grace (*Chen*), Love (*Chesed*), Glory (*Kavod*), Mercy (*Rachamim*), Splendor (*Hod*), Crown ('*Atehreth*), Adornment (*Hadar*), Beauty (*Tifareth*), and Majesty (*Ge'ooth*).
The Hand of the Holy One, blessed be He, (is named) Metatron.
They say: Mighty and Strong...
They say: Holy and Blessed...
And they appear before Him with a great sound (as in **Ezekiel** 1:24): "**As they went, a noise like the sound of a host**." They stand before Him.
The Youth (*Na'ar*) Metatron appears and prostrates himself before the Holy One, blessed be He, His name AHH...
He praises and glorifies and says:
"Blessed be the glory of the Lord YHVH from His place."
YHVH, HV, HV, YVHY, YHYYH
"Blessed be the glory of the Lord YHVH from His place."
And they repeat after him: "Blessed be the glory of the Lord YHVH from His place," and "Blessed be the Name of the glory for ever."
He (Metatron) enters in front under the Throne of Glory.
He is accompanied by stones of fire and hailstones and a wall of roaring (*z'aaf*) on his right.
On his left, wings of storm and strength of tempest accompany him.
When Metatron enters before the Holy One, blessed be He, under the Throne of Glory, he holds (the Throne) with a multitude of wings, and all the ministering angels come before the Holy One, blessed be He, and say: "the great, the mighty, and awesome *El*."
They praise the Holy One, blessed be He, thrice daily through Metatron.
The Holy One, blessed be He, bestowed His splendor and His beauty on the ministering Angel Metatron, the Lord of the Presence, who has been appointed grand master over all the Lords and ministering angels.
They stand before him, and he stands higher and higher upwards, and ministers before Adam; a fire consuming fire throne (*kise*) is its name.

This is the seat of Metatron, the Lord of the Presence, which is written with One-Letter (Alef, the Unity) with which Heaven and Earth have been created, and sealed with the ring "I WILL BE THAT I WILL BE" (*Ehyeh Asher Ehyeh*). And is written with seven letters, and seven letters, and twenty-four letters, and seventy-two names, and seven Holinesses (*Kedushoth*). And it is placed on six of their names, and is engraved on twelve stones, and is written on seven sounds (voices) on a height of six by six (see **Book of THAT Which is Concealed**...***Zohar* II**: 186b).

It was given to our teacher Mosheh (Rabbenu) in innermost chambers, in hidden hiddenness, in wonder of wonders.

The Holy One, blessed be He, permitted neither Adam nor Shem, the son of Noah, nor Abraham, Yitza'aq, or Ya'aqov to use it. Only to Mosheh did He give permission to use it, as it is written (*Torah Doverim* 23:20): "***Behold I send an angel before you***," and the Holy One, blessed be He, warned Mosheh to beware of Him, as it says (***Torah Shmoth*** 23:21): "***Beware of Him, and obey His voice, disobey Him not, for He will not pardon your transgressions because My Name is in Him***." And Mosheh said to the Holy One, blessed be He (***Torah Shmoth*** 33:15): "***If Your NOT (Lo)-Presence go with me; carry us (into the) NOT (Lo), up from here***."

The angels that are with him (Metatron) come and surround the Throne of Glory, they on one side, Chayot on the other, and the *Shekhinah* upon the *Shekhinah* of Glory is in the middle. A Chayah ascends on the Serafim and descends on the dwelling place of Metatron, and announces in a loud voice, in the sound of a soft whisper [still small voice]: "This is the Throne of Glory."

Immediately the Ofanim become silent, the angels become quiet, the *Irin Kadishin* make haste and rush into the River of Fire (*Nehr Dinur*), and the Chayot turn their faces down to the ground. Metatron brings the deafening fire and puts it in the ears of the Chayot, that they hear not the voice of the glory of the Holy One, blessed be He, and the explicit "Name of Brilliant Fire" (*Shem Ha Meforesh,* YHVH) that Metatron is pronouncing at that time.

Thus is He calling the Holy One, blessed be He, by His living, pure, holy, powerful, majestic, strong, beloved, mighty, glorified and awesome Name:

vhyrda yhh hvh hh
ykrha avy vhv yhyhy
HHYY HKH HH YH
YHVH HH HYA YHYH
AHYH ASR AHYH VH HVA YHVH

"***He who lives for ever, this is my name for ever, and this is my memorial unto all generations***." (***Torah Shmoth*** 3:15).

"Blessed be the Name of the glory of His Kingdom for ever."

Its interpretation in the language of purity (Metatron pronounces the *Shem Ha Meforesh*, Brilliant Name of Fire, in the language of purity):

YHV YH HHY HYY HY
HHYV HVHY VYHH HV YHVH
HYH HYH YHY YHVH
HY VYHYV HY YHV
YH YHV HHYV HYHV

Blessed be the Name of the glory of His Kingdom for ever.

10. Here follows in the text a hymn, and **Psalms** 93, 29, and 24.

End of "Meaure of the Divine Body"

SH'IR QOMA

RECONSTRUCTION OF THE TEXT ACCORDING TO BEST EVIDENCE

The "**Meaure of the Divine Body**" text is known to be corrupt, as all current texts come from a single corrupt text published in the 1701 Amsterdam edition (Eleazar of Worms). Consequently, the dimensions taken as directly translated will not lead to a reasonable image of the *Yosher* (upright form of the Lord YHVH). However, if the following changes are made, the *Yosher* image that is yielded (see Figure) can be shown to be self-consistent with the text. Seventeen dimensions were left unchanged, eleven dimensions were changed as follows, and the last two dimensions, dealing with the total measure, were not used.

SECTION DIMENSION READ (x107 Parasangs) change made
HEIGHT (Seat of Glory) 118 add *alafim*
HEIGHT (Seat of Glory) 118 add *alafim*, Seat of Glory is located in single Eye of Vast Face in center of Small Face's head.
TOTAL HEIGHT 236 no change
Right Arm to Left Arm 77 add *alafim*, this is completely around two arms
Right Eye to Left Eye 30 add *alafim*
Skull (Galgaltha) on Head 30 add *alafim*
Crowns on Head 60 add *alafim*
Sole to Ankles 1.5 no change
Ankles to Knees 23 add *rebaboth*
Knees to Thighs 13.4 no change
Thigh to Neck 24 no change
Height of Neck 13.8 no change
Roundness (circumference) of Head 333 1/3 no change
Beard 15 multiply by 10 (change *alafim* to *rebaboth*)
Black of Right Eye 1.15 no change
White of Right Eye 24 add *alafim*
Right Shoulder to Left 16 multiply by 10
Right Arm to Left Arm 12 x 2 (no change) dimension given must be doubled as shown in text, and taken across body.
Finger 15 no change
Palms 4 no change
Toes 10 no change
Width of Forehead 13.8 no change, however this must be taken across Vast Face Skull
Width of Shoulder 13.8 no change, checks with dimension in 5
Length of Nose 15 no change
Height of Cheek 53 no change, however, this must be taken as half the diameter of the head, otherwise human dimensions will not hold, as claimed in next sentence
Lips, Height 7.7 multiply x 106
Crown 50 x 50 square add *alafim*, then dimensions in 1 check
Eyelids, like Eyes 24 unchanged

Height of Ears = Height of Forehead unchanged
TOTAL MEASURE OF DIVINE STATURE, probably entire Chariot:
Height 10,000 x 107 parasangs
Width 1,000 x 107 parasangs
(both of these dimensions are omitted as being essentially beyond the image presented in the rest of the dimensions

WHO ARE THE DEMONS ?
THE ICONOGRAPHY OF INCANTATION BOWLS

Erica C.D. Hunter

Ancient man lived amongst a host of frightening, negative, demonic forces which he attempted to control or coerce in order to ensure a harmonious and benevolent world-order. A vast array of magico-religious mechanisms evolved to cope with this problem including incantation bowls which were produced in vast quantities in Mesopotamia during Late Antiquity. Their texts have a miscellaneous heritage, being essentially an amalgam of various components including «Biblical imagery, popular Jewish beliefs, remnants of Mesopotamian religions and echoes of Hellenistic esoteric traditions»[1]. This complex situation arose from magico-religious traditions being simultaneously conservative and syncretistic, absorbing as it were the «best of all worlds» in order to ensure efficacy against the demonic hosts.

All incantation bowls, whether written in Aramaic, Syriac or Mandaic, expressly aimed to bind and fetter demons[2], whose appellations were repeatedly cited throughout the texts in concatenations or strings as can be seen in this listing from an Aramaic incantation bowl, now housed in the Iraq Museum (I.M. 49972):

> *whršy wmʿbdy wptkry dykry wʾystrtʾ nyqbtʾ wṭʿwtʾ wḥwmry*
> *zydntʾ wnydry wšbʿttʾ wlwṭtʾ wmšqwpytʾ wʾšlmtʾ wʾnqtʾ*
> *whṭytʾ wkwsy wmllytʾ wškytʾ dkl byt knyštʾ bmhystl byty*
> *wmn klhyn wkl ptkry dymqblyn nydry wkl ʿystrtʾ dymqbln*
> *nydry bʾlhy*
>
> «sorcerers, magical works, male image-spirits, female goddesses, the false deity, impious amulet-spirits, vows, the oath, the curse, the affliction, the spell, necklace-charms, the sin, bowls, the word, *wškytʾ* of every synagogue, *bmhystl* houses and from all these things. Also from all image spirits which receive vows and and all goddesses which receive vows».

---

1 L. Van Rompay, *Some Remarks on the Language of Syriac Incantation Texts, Orientalia Christiana Analecta* 236, 1990, 369.

2 L. Schiffman and M.D. Swartz, *Hebrew and Aramaic Incantation Texts from the Cairo Genizah*, Sheffield 1992, 27 mention the dominant passive performatives: «bound and sealed» (*ʿasir ve-ḥatim*), «overturned» (*hafikhah*).

Some of the terms are general, embracing wide categories *viz*: *dywyn* «devils», *šydyn* «demons» and *rwhyn* «spirits». More specific are the *hwmryn* «amulet-spirits»[3] *ʿykwryn* «temple-spirits» and *ptkryn* «idol-spirits». Other demons, such as the *ʾstrt* «goddesses» and *lylyt* «liliths» are notable for their counterparts in the Babylonian pantheon from which they ultimately descended[4].

As well as being the subject of texts, demons are portrayed on incantation bowls, usually as single anthropomorphic figures that are drawn in the interior centre of the vessels. In Mandaic specimens the drawings may also be found on the interior or exterior walls. As the citation of the demons' epithets rendered their forces impotent, safeguarding the people for whom incantation bowls were written, so the portraits of their images may have also reduced their efficacy, rendering them subject to the demands of the incantation text. The figure-drawings may have functioned as simulacra, a rôle which James Montgomery already suggested in 1913[5]. The image portrayed may have been general and comprehensive, representing all demons cited in the incantation text. Alternatively, it may have been particular, depicting certain demons that were both familiar and feared who, like the gods of yesteryear, had assumed the full range of human characteristics, both physical and behavioural.

This paper concentrates on the «rude figures ... which can hardly be said to adorn the bowls»[6]. It commences by asking, «What iconography characterises the drawings?», isolating those attributes or features which transcend the boundaries of script and are found in both Aramaic and Mandaic specimens. Recourse is then made to «duplicate» incantation bowls to ascertain whether any correlation exists between text and illustration, i.e. whether specific texts are accompanied by particular figure drawings. In its final part, the paper harks back to the Mesopotamian heritage of the incantation texts in divulging that the anthropomorphic images with their distinctive regalia were Ištar-Lilith, categories of female demons who were still remembered and feared in Late Antiquity.

Defining the iconography of incantation bowls[7]

A survey of the figure drawings indicates traditions broadly corresponding to script. Aramaic bowls favour a figurative, realistic style, whereas the Mandaic specimens are generally executed in a more impressionistic fashion. In Aramaic incantation

6 *Idem*.

7 For discussion of the iconography of incantation bowls, see J.B. Segal, with a contribution by Erica C.D. Hunter, *Catalogue of Aramaic and Mandaic Incantation Bowls in the British Museum*, London, British Museum Publications (in press).

bowls a single anthropomorphic figure is rendered full-frontal, although occasionally profiles are shown[8]. In Mandaic incantation bowls two figures are sometimes drawn[9]. Amidst this disparity, certain features are constant. The figures have out-stretched arms with fingers clearly drawn. They stand splayed with out-turned feet and have dishevelled hair, of varying lengths, which is rendered by a series of strokes[10]. The figures wear, in the Aramaic incantation bowls, denticulated head-dresses, which have been styled as head-bands in the Mandaic bowls[11]. The demons are frequently fettered at the ankles[12], a double shackle on the left leg connected to the left breast being favoured in the Mandaic tradition[13]. In some of the Aramaic specimens, the figures have wings and talons or pincer feet, traits that do not occur in the Mandaic incantation bowls[14].

The iconography of the figure drawings divides into primary and secondary elements. The former are fundamental and can be termed «supra-cultural» since they appear in both Aramaic and Mandaic incantation bowls. The secondary elements interpret the primary elements within the context of the community in which the incantation bowls circulated and in doing so, may be termed «intra-cultural». This dichotomy can be illustrated as follows. Incantation bowls often show demons bound and fettered, this fundamental element in the iconography reflecting a major textual theme. The different types of fetters which are depicted in the Aramaic and Mandaic incantation bowls may be classified as secondary elements, perhaps reflecting items in use amongst the communities. Similarly, the denticulated head-dresses and the head-bands (often segmented or scalloped) which are sported by figures in the Aramaic and Mandaic incantation bowls respectively may represent artistic convention.

The visual perceptions of the communities within which the incantation texts circulated are encapsulated by the figure drawings but, as incantation texts are marked by their flexiblity and variation, so these are not executed according to rigid conventions. Instead the medium is fluid, with each scribe offering his/her individual interpretation, a process that is exemplified by five «duplicate» Aramaic incantation

13 B.M. 91714, B.M. 91728 and B.M. 91736.

14 I.M. (Iraq Museum) 55672 shows a figure, with a human face and body, but winged with taloned feet.

bowls which have come, in differing circumstances, from Nippur[15]. They were written for a variety of clients, but the core texts only exhibit minimal variants[16]. That the incantation bowls were the product of the same scribe is confirmed by their typology and palaeography, as well as by the distinctive figure which has been drawn within a circle at the interior centre of the hemispherical vessels. A bust, described as that of a woman, whose hands are folded, possibly in prayer, wears a denticulated head-dress[17]. Only the detail, such as the number of scallops of the head-dress, differentiates the drawings making it clear that the scribe has coupled text and portrait.

That the association between text, its arrangement and the figure-drawings was not fixed but was determined by the scribes can be investigated *via* another set of twelve «duplicate» texts, all of which belong to a well-known genre that is exclusive to Mandaic. Three of the incantation bowls, B.M. 91714, B.M. 91728 and B.M. 91736 are now housed in the British Museum. Six other texts coming from Khouabir were published by Henri Pognon, *Inscriptions Mandaïtes des Coupes de Khouabir*, Paris 1898 (Pognon Texts 15 - 20). To this collection may be added Harvard Semitic Museum 1931.1.1; Text II in M. Lidzbarski, *Ephemeris für Semitische Epigraphik*, 2 vols, Gießen 1902, vol. 1, pp. 89-106 and finally a bowl in the Iraq Museum, I.M. 60494[18]. In four of the specimens, the text has the tripartite arrangement that is characteristic of Mandaic, the remaining eight being written in concentric spirals of text[19]. Figure drawings also appear in five of the incantation bowls; three being placed at the end of the tripartite arrangement of text and two being associated with concentric spirals[20].

18 H.S.M. (Harvard Semitic Museum) 1931.1.1 was published by C.H. Gordon, *Aramaic and Mandaic Magical Bowls*, ArOr 9, 1937, 95-100 and has been republished by E. Yamauchi, *Mandaic Incantation Texts*, New Haven 1967, Text 26. Yamauchi, *op. cit.*, has also republished Pognon Texts 15, 16 and 18 respectively as Texts 7-9 as well as Lidzbarski's Text II which is numbered Text 19. I.M. 60494 has not been previously published. Its transcription and translation appear as Appendix A at the end of this article.

19 B.M. 91714, B.M. 91728 and B.M. 91736, Pognon Text 16 (tripartite arrangement), Pognon Texts 15, 17, 18, 19, 20; Lidzbarski Text II; H.S.M 1931.1.1 and I.M. 60494 (concentric spirals).

20 B.M. 91714, B.M. 91728, B.M. 91736 (tripartite arrangment) Pognon Texts 15 and H.S.M. 931.1.1 (concentric spirals).

The impressionistic, highly stylised figures which are featured in B.M. 91714, B.M. 91728, B.M. 91736, Pognon Text 15 and H.S.M. 1931.1.1 can be accommodated within the iconographic conventions that have been previously outlined[21]. All have raised arms, with the open palms and fingers being clearly demarcated. They stand splayed, with the feet out-turned and fetters attached to the left leg. The figures have flowing tresses and wear a type of cap, that appears to be segmented. Within this overall stylistic conformity there is much variation in detail:

Fetters: In H.S.M. 1931.1.1 the figure is not shackled. B.M. 91714 and B.M. 91728 show a three-part fetter linking the left nipple to the left ankle, whilst a double fetter is shown in B.M. 91736 and Pognon Text 15. In B.M. 91736 there is no connection with the fetter despite the breasts being defined.

Hair: The figures of B.M. 91728 and H.S.M. 1931.1.1 have no hair. By contrast B.M. 91736 has six wavy tresses sprouting from the crown of the head, while in B.M. 91714 four wavy strands emerge from the side. Pognon Text 15 minimises the hair to two straight strands.

Head-dress: B.M. 91728 has a head-dress that is simply defined by two parallel lines. H.S.M. 1931.1.1 has a segmented head-dress similar to those featured in B.M. 91714, B.M. 91736 and Pognon Text 15.

Facial and body features: In B.M. 91714, B.M. 91736 and Pognon Text 15 the figures have no mouths. B.M. 91714 shows protrusions from the side of the head that could be interpreted as either ears or horns. No breasts are indicated for the figure of B.M. 91714, which like H.S.M. 1931.1.1 may be clothed. B.M. 91714 has three protrusions, possibly genitalia or tails, hanging from the lower part of the torso.

Apparel: H.S.M. 931.1.1 wears a spotted tunic (?) with long sleeves as well as spotted leggings. The figure of B.M. 91714 might be clothed, but in B.M. 91728, B.M. 91736 and Pognon Text 15 appears naked.

The iconographic differences that have arisen between the figures, like the variants in the incantation texts, may be attributed to scribal interpretation, portraying the demons in an individualistic light! Yet representing a particular genre.

Recalling the Mesopotamian matrix

The images on the incantation bowls would have been familiar and well-known, but occasionally are accompanied by a caption. *qʾl qʾlʾ* «Hark, my voice» is inscribed on the exterior wall of B.M. 91714. The connection between caption and

---

21 See PLATES I - V for photographs or line reproductions of the figure drawings in these incantation bowls.

figure drawing is made explicit in another incantation bowl that can be added to the aforementioned list of «duplicates». B.M. 135438, written in Mandaic, in concentric spirals, commences midway (l.17) with the typical formula *q'l q'l'*. On the vessel's exterior wall is a drawing that is defined by its iconographic attributes[22]: upraised arms with fingers clearly defined, flowing tresses of wavy hair, as well as what appears to be a segmented head-band. The right foot has the expected outward-turned position, but its left leg does not appear to be shackled. A cross at the neck may indicate some type of fetter. Patterned markings on its legs suggest leggings, and the figure wears curious apparel: a bodice with 6 spots connected by thin strips to a skirt with 9 spots. Written in a shield at its right-side is the caption, *h'zyn dmwt' ḏq'l q'l' šwmy'* ... «This is the portrait of 'Hark. A Voice'. Hear and ....».

The opening stanzas of the «duplicate» incantation texts evocatively describe the «Voice», in its various manifestations:

q' q'l' ḏš'm'n' wq'l h'lšy' ḏmyt'bry' wm' gwbry' ḏn'ṣyn
wn'htyn bqr'b' wq'l ʿnšy' z'dny't' dl'ṭ' wmykdš'n
wm'yk'šypyn wm'kyb'n bh'zyn pgr'

«This is the Voice.
The Voice of the weak that are broken and of men who fight and
go into battle. Also, the Voice of raging women who curse,
afflict, bewitch and pain this body ...».

The «Voice of raging women who curse ... » is not that of mere mortals, the «human agents» as Edwin Yamauchi suggests, but the Ištar-Lilith demons, a connection which is explicit in Pognon Texts 13 and 14[23]:

hw' šgš' b'ny' ʿstyr't' wlyly't' ql'yhyn d'nšy' z'dny't'

«There has been a commotion among the Istars and the liliths!
Voices of raging women».

A highly stylised figure-drawing accompanying Pognon Text 14 exhibits the standard iconographic attributes: upraised arms, with palms and fingers defined, outturned feet, strands of hair from the crown and possibly a head-band. Like H.M.S. 1931.1.1, the figure is not fettered.

Commenting on H.M.S. 1931.1.1, Cyrus Gordon noted that on the exterior was «a crude representation of the magician with uplifted arms to scare away the demons»[24]. Rather, the anthropomorphic attributes suggest a demon - whose identity is spelt out

22 See PLATE VI.

23 E. Yamauchi, *op. cit.*, 22.

24 C. H. Gordon, ArOr 9, 1937, 98.

by the caption which has been written at the feet of the figure's shackled legs in Pognon Text 15. *hu' l'byt* was read by Pognon and later by Kurt Rudolph as a corruption of *lby't* the Mandaic expression for «la planète Venus»[25]. On the other hand, Yamauchi has tentatively translated the phrase as, «this is for the house (?)», although he also juxtaposes the reading «[or for Venus (?)]»[26], suggesting the burial-spot of the incantation bowl. Since incantation bowls were exclusively used in domestic circumstances, the prescription, «this is for the house (?)» determining the place of burial is, at best, enigmatic[27]. If Yamauchi's reading can be accepted, *hu' l'byt* may be formulaic, like the introductory sequence *lh'zyn byth dwrh hyklh wbny'nh* «for the house, dwelling, homestead and building» which frequently commences Mandaic incantation texts[28].

The caption *db'b' dn'ws'* «at the gate of the temple», accompanying the figure drawing in H.M.S. 1931.1.1 and which has also been written on the exterior of I.M. 60494, adds further comment[29]. Rather than being the place where the bowl was depositedh as Gordon posits[30], several Mandaic texts from Khouabir stipulate that a similar phrase, *db'b' d'kwr'* «at the gate of the temple» was the place where those incantations, which were to be repulsed, were written[31]. The same texts continue, citing their authority in the «name of Adonai Snubit, in the name of Ištar, the queen», and in doing so highlight the royal status of the demons, where «Ištar, the queen» can be equated with Ruha-Ištra, the queen of darkness in Mandaean mythology[32]. Rather than being the deposit-spot as Yamauchi proposes, Pognon's interpretation of *hu'*

26 E. Yamauchi, *op. cit.*, 173.

27 For a chart of the burial of Aramaic and Mandaic incantation bowls in a courtyard at Nippur, see Erica C.D. Hunter, *op. cit.*, 606. F. Franco, *Five Aramaic Incantation Bowls from Tell Baruda (Choche), Mesopotamia* 13-14, 1978-79, 233 notes that the specimens were «found behind the southwestern threshold of a room belonging to the excavated buildings» and «behind the northwestern threshold of the same room». R. Venco-Ricciardi, *Trial Trench at Tell Baruda, Mesopotamia* 8-9, 1973-74, 19 details the excavation of area 21 where four incantation bowls were found under «the new thresholds», suggesting that incantation bowls continue a heritage which harks back to the protective rituals of the Neo-Assyrian and Babylonian periods when apotropaic figurines were buried at various points in both private and public buildings.

28 Erica C.D. Hunter, *Two Mandaic Incantation Bowls from Nippur*, BaM 25, 1994, 611 for discussion of this phrase. Occasionally incantation texts mention parts of the house, see J. Naveh - S. Shaked, *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity*, Jerusalem 1993, 138 [Bowl 25, l. 11].

29 C.H. Gordon, *loc. cit.* See PLATES VI and VII for the phrase on the exterior of H.M.S. 1931.1.1 and I.M. 60494.

30 C.H. Gordon, *op. cit.*, 100.

32 *Idem.*

l'byt as «Venus» exposes the identity of the figure-drawings – as the Ištar-Lilith genres of demons to which incantation texts and amulets made frequent recourse[33].

Conclusion

Venus was, of course, the Hellenistic counterpart to the astral connotations of the Mesopotamian goddess Astarte, the Ishtar of Akkadian whose title had, by Late Antiquity, degenerated into a generic term. Yet the drawings on the incantation bowls depicting the erstwhile «goddesses» recall through their iconography their origins within the Mesopotamian matrix. These attributes, coupled with the distinctive spotted apparel sported in H.S.M 1931.1.1 and B.M. 135438, are echoed by an Akkadian incantation text which was written against the Labartu who, like the *lilitu* had the same vile reputation as the slayers of infants and whose identities eventually synthesized: «she is furious, she is impetuous, she is divine, she is terrible and she is like a leopard, the daughter of Anu ... her hair is in disorder, her breasts are uncovered»[34].

Discussing incantation texts, Montgomery states, «the religion of yesterday becomes the superstition of today»[35]. He brilliantly portrays the situation where the decaying pantheistic world-order had been largely superceded by dualistic or monotheistic faiths. Many deities had become depopularised and to quote Baudelaire were «betrayed by fate, deprived of praise»[36]. But their reputation lingered, their legacy continuing, in the form of the malevolent forces which were still greatly feared. Thus Ishtar was still called in Mandaic texts, *'sytr' ml'kt'* «Ishtar the queen», echoing her erstwhile status in Assyro-Babylonian cultus[37]. Her image as the Queen of the «goddesses», complete with her crown, portrays the visual perceptions of the magico-religious traditions of the communities in Sasanid Mesopotamia in which incantation bowls circulated. And simultaneously illuminates their integral connection with the blueprint of ancient Mesopotamia.

Appendix

I.M. 60494[38]

Extract from the Iraq Museum register: (Registered 11.x.1957)[39]

«Incantation bowl, hemispheroid, inside covered with Aramaic (?) inscription in concentric circles. Further little inscription on outside. d 175 [mm] h 35 [mm] No. other register, P.O. 688. Said to come from Tell Assafa near Yousifiyah intake».

Physical Description:

FORM: A complete (unbroken) hemispherical bowl, 17.3 x 4.8 cm, with a simple rim. Profile width at rim: 0.7 cm, centre base: 1.2 cm.

FABRIC: Very pale brown (MUNSELL 10YR 7/4) clay, with part of the exterior red (MUNSELL 2.5 YR 5/6). Medium-coarse texture with a dense and evenly distributed black grit inclusion and also a common and evenly distributed mica inclusion. No slip or glaze.

MANUFACTURE: Wheel thrown, with paring marks covering 9.0 cm diameter of the exterior base. The hand-finishing appears to have been executed with a blunt instrument, possibly a shell.

Decoration: Single hand-drawn line enclosing the text which has been drawn on the external wall.

Palæography: Mandaic.

Arrangement of Text: 23 lines written in a spiral pattern, commencing at the centre and ending at the rim edge of the vessel. 3 words are on the exterior surface.

(1) Curses are averted and driven away (2) from M'H'Y'Z'WD GWŠN'ṢP (3) BR M'K'Š. Hark! The Voice which I hear (4) is the Voice of the weak that are broken and ... of men who fight and go into battle. Also, the Voice of (5) raging women who curse, afflict, bewitch and pain (6) this body of M'H'Y'Z'WD GWŠN'ṢP. Gone down against them: (7) Azdai, Yazrun, Yaqrun, Præl, Raphæl and Saḥtæl, who seized (8) and took them by the tufts of the hair of their heads and by the tresses of their pates. He has broken (9) their horns that were on high and he has bound them by the tufts of the hair of their heads and by the (10) tresses of their pates. Then he said to them, «Avert the curse against M'H'Y'Z'WD GWŠN'ṢP». They said to him, «From (11) the anguish of our heart we have cursed and we have resolved to curse from the bitterness of our palate». Then I said to them, «I have made you swear and I adjure you (12) in the name of the dæva Azdai and the dæva Azrun and Aqrun and the great Præl and Raphæl and Saḥtæl that you should release and free (13) M'H'Y'Z'WD GWŠN'ṢP from all the curses and incantations which you have cursed. Also, from the curses which the father and mother curse.(14) Also, from the curse of the harlot and singer, from the curse of the mistress and maidservant, from the curse of the employer and the emplyee who stole wages from him. Also, from the curse (15) of the brothers who have not divided the portions fairly amongst themselves. And from the curse of all who curse and invoke in the name of the temple-spirits and the image-spirits and their requisitions». (16) You are the healer who heals all maladies with a word. Heal the maladies and the curses which (she) curses and which anyone curses against M'H'Y'Z'WD (17) GWŠN'ṢP BR M'K'Š. You, seize and (take) all thoses curses which are cursed against M'H'Y'Z'WD GWŠN'ṢP and his wife K'Š'Z'G and his sons and daughters. (18) Heal in the name of Azdai, Yazrun, Yakrun, great Præl and Raphæl and Saḥtæl. Seize and take the curses which are cursed against M'H'Y'Z'WD GWŠN'ṢP and his wife, sons and daughters. May he heal the curses that are cursed against M'H'Y'Z'WD GWŠN'ṢP and his wife, sons and daughters and send them back

against their original owners (20) (that they should) release, free and bless (them). Upon that unsplit rock I sat and wrote all the curses which they cursed against M'H'Y'Z'WD GWŠN'ŞP upon a new bowl that cannot be dissolved. (21) I have sent away and thrown the curses which they cursed against M'H'Y'Z'WD GWŠN'ŞP back against their original owners until they release, free and bless (them). By the name (22) of the angel Šariel and the angel Barkiel, you angels, loosen and bless all the curses that they have cursed against M'H'Y'Z'WD GWŠN'ŞP. And loosen them from M'H'Y'Z'WD GWŠN'ŞP and from (23) his wife, sons and daughters as a man is released from prison and from a stockade. Amen. Amen. Amen. Selah.

Exterior: The gate of that temple.

Notes and Commentary:

l.2 M'H'Y'Z'WD GWŠN'ŞP is the name of the client for whom the incantation bowl was written. The Iranian name GWŠN'ŞP occurs in several Syriac specimens, while Ferdinand Justi mentions a seal wuth the name māhāzād gūšn (aspān)[40].

l.4 *wm'yk'šypyn* «and bewitch». Absent in Pognon Texts 15, 16.

l.7 *wy'zrwn wy'qrwn* «Yazrun and Yakrun». These angels' names are variously spelt, attesting to the lack of uniformity in Mandaean orthography. Cf. *y'z'rwn wy'q'rwn* (H.M.S. 1931.1.1) and *yzrwn wyqrwn* (Lidzbarski Text II).

l.7 *pr'yl* «Prael». Qualified by *rb'* «great» in other «duplicate» texts.

l.7 *wrp''yl* «Raphael». Cf. *rp'yl* H.M.S. 1931.1.1, Lidzbarski Text II, Pognon Text 16; *rp'yyl* Pognon Text 15, *rwp''yl* Pognon Text 17.

l.7 *wsh'ṭ'yl* «Sahṭiel». Consistently spelt in «duplicate» texts as *sht'yl*, deriving from √SḤṬ «press out, wring out», with a specific connotation in incantation texts «seize»[41].

40 See T. Harvaianen, *A Syriac Incantation Bowl in the Finnish National Museum, Helsinki. A Specimen of Eastern Aramaic «Koiné»*, StOr 51, 1978, 1-28 for the publication of a Syriac bowl, I.M. 78630 (not I.M. 7863 as in the publication) which was donated by the Iraqi government to the President of Finland. J. Naveh - S. Shaked, *op. cit.*, (1987) 183 also propose this name for a Syriac incantation bowl which is now housed in the Jewish Historical Museum, Belgrade [No. 243]. Cf. also F. Justi, *IranischesNamenbuch*, Marburg 1895, 185 referring to the publication of the seal in *Revue Archéologique* 15, 1874, pt. V n. 443.

41 E. Drower - R. Macuch, *A Mandaic Dictionary*, Oxford 1963, 319.

l.8 *bʿdqyʾ* «by the tufts». Cf. *uʿdqḫ mn riš nisbat* «she took bunches of hair from her head» Ginza yamina 247:8[42].

ll.8/9 *wtbʾr qʾrnʾyyn ḏrʾmʾ* «he has broken their horns that were on high». Cf. I Samuel II[10], Jeremiah XLVIII[25] and Psalm LXXV[11] for the metaphorical use of the horn to denote power and strength[43].

l.10 *krwk* «avert». Cf. *šrʾy* «dissolve» in Pognon Texts 15, 16, 17.

l.10/11 *mn kybʾ ḏlʿbʾn lʾṭnyn wmn mrʾrʾ ḏhynkʾn* «from the anguish of our heart we have cursed and from the bitterness of our palate». See Ginza yamina 115:16 where the palate is equated with the voice.

l.12 *ʾzdʾy dywʾ wyʾzrwn dywʾ* «the *daeva* Azdai and the *daeva* Yazrun». *dywʾ* «daeva», used in the original sense of the word as a beneficient rather than maleficient being, is also found in H.M.S. 1931.1.1, but is absent from Lidzbarski Text II and also from Pognon Texts 15, 16 and 17.

l.13 *ḏmn ʾbʾ wʿmʾ ḏlʾwṭyʾ* «from the father and the mother who curse». Cf. the comprehensive lists of bans (*māmītu*) in the Šurpu series of incantation texts. Cf. also the lists of relations: mother, daughter, mother-in-law and daughter-in-law, also men and women who curse mentioned by an Aramaic specimen now housed in the Institute of Archaeology, The Hebrew University of Jerusalem [no. 1401][44].

l.14 *lwṭtʾ ḏrʾbtʾ wšlytʾ* «of the mistress and maidservant». Discussing this phrase in H.M.S. 1931.1.1 which he has tentatively translated as «of grand(mother?) and foetus (?)», Gordon traces the history of its interpretation[45]. The reading «maidservant» is derived from √Šʾl «request»[46].

l.15 *mn hdʾdyʾ wmn* «from among themselves and from». At this point H.S.M. 1931.1.1 (ll. 15-16) includes the proper names Yʾhbwyʾ and Bʾnʾdwyʾ which Gordon claims to belong to « pair of ill-tempered fellows given to cursing»[47]. This combination, which is also absent from Lidzbarski Text II and also Pognon Texts 15, 16 and 17, may be interpreted as a corruption of *ʾhy* «brothers» and *bnyʾ* «sons».

WHO ARE THE DEMONS ?
THE ICONOGRAPHY OF INCANTATION BOWLS

Erica C.D. Hunter

Ancient man lived amongst a host of frightening, negative, demonic forces which he attempted to control or coerce in order to ensure a harmonious and benevolent world-order. A vast array of magico-religious mechanisms evolved to cope with this problem including incantation bowls which were produced in vast quantities in Mesopotamia during Late Antiquity. Their texts have a miscellaneous heritage, being essentially an amalgam of various components including «Biblical imagery, popular Jewish beliefs, remnants of Mesopotamian religions and echoes of Hellenistic esoteric traditions»[1]. This complex situation arose from magico-religious traditions being simultaneously conservative and syncretistic, absorbing as it were the «best of all worlds» in order to ensure efficacy against the demonic hosts.

All incantation bowls, whether written in Aramaic, Syriac or Mandaic, expressly aimed to bind and fetter demons[2], whose appellations were repeatedly cited throughout the texts in concatenations or strings as can be seen in this listing from an Aramaic incantation bowl, now housed in the Iraq Museum (I.M. 49972):

> *whršy wmʿbdy wptkry dykry wʾystrtʾ nyqbtʾ wṭʿwtʾ wḥwmry*

1 L. Van Rompay, *Some Remarks on the Language of Syriac Incantation Texts, Orientalia Christiana Analecta* 236, 1990, 369.

2 L. Schiffman and M.D. Swartz, *Hebrew and Aramaic Incantation Texts from the Cairo Genizah*, Sheffield 1992, 27 mention the dominant passive performatives: «bound and sealed» (*ʿasir ve-ḥatim*), «overturned» (*hafikhah*).

Some of the terms are general, embracing wide categories *viz*: *dywyn* «devils», *šydyn* «demons» and *rwhyn* «spirits». More specific are the *hwmryn* «amulet-spirits»[3] *ʿykwryn* «temple-spirits» and *ptkryn* «idol-spirits». Other demons, such as the *ʾstrt* «goddesses» and *lylyt* «liliths» are notable for their counterparts in the Babylonian pantheon from which they ultimately descended[4].

As well as being the subject of texts, demons are portrayed on incantation bowls, usually as single anthropomorphic figures that are drawn in the interior centre of the vessels. In Mandaic specimens the drawings may also be found on the interior or exterior walls. As the citation of the demons' epithets rendered their forces impotent, safeguarding the people for whom incantation bowls were written, so the portraits of their images may have also reduced their efficacy, rendering them subject to the demands of the incantation text. The figure-drawings may have functioned as simulacra, a rôle which James Montgomery already suggested in 1913[5]. The image portrayed may have been general and comprehensive, representing all demons cited in the incantation text. Alternatively, it may have been particular, depicting certain demons that were both familiar and feared who, like the gods of yesteryear, had assumed the full range of human characteristics, both physical and behavioural.

This paper concentrates on the «rude figures ... which can hardly be said to adorn the bowls»[6]. It commences by asking, «What iconography characterises the drawings?», isolating those attributes or features which transcend the boundaries of script and are found in both Aramaic and Mandaic specimens. Recourse is then made to «duplicate» incantation bowls to ascertain whether any correlation exists between text and illustration, i.e. whether specific texts are accompanied by particular figure drawings. In its final part, the paper harks back to the Mesopotamian heritage of the incantation texts in divulging that the anthropomorphic images with their distinctive regalia were Ištar-Lilith, categories of female demons who were still remembered and feared in Late Antiquity.

Defining the iconography of incantation bowls[7]

A survey of the figure drawings indicates traditions broadly corresponding to script. Aramaic bowls favour a figurative, realistic style, whereas the Mandaic specimens are generally executed in a more impressionistic fashion. In Aramaic incantation

7 For discussion of the iconography of incantation bowls, see J.B. Segal, with a contribution by Erica C.D. Hunter, *Catalogue of Aramaic and Mandaic Incantation Bowls in the British Museum*, London, British Museum Publications (in press).

bowls a single anthropomorphic figure is rendered full-frontal, although occasionally profiles are shown[8]. In Mandaic incantation bowls two figures are sometimes drawn[9]. Amidst this disparity, certain features are constant. The figures have out-stretched arms with fingers clearly drawn. They stand splayed with out-turned feet and have dishevelled hair, of varying lengths, which is rendered by a series of strokes[10]. The figures wear, in the Aramaic incantation bowls, denticulated head-dresses, which have been styled as head-bands in the Mandaic bowls[11]. The demons are frequently fettered at the ankles[12], a double shackle on the left leg connected to the left breast being favoured in the Mandaic tradition[13]. In some of the Aramaic specimens, the figures have wings and talons or pincer feet, traits that do not occur in the Mandaic incantation bowls[14].

The iconography of the figure drawings divides into primary and secondary elements. The former are fundamental and can be termed «supra-cultural» since they appear in both Aramaic and Mandaic incantation bowls. The secondary elements interpret the primary elements within the context of the community in which the incantation bowls circulated and in doing so, may be termed «intra-cultural». This dichotomy can be illustrated as follows. Incantation bowls often show demons bound and fettered, this fundamental element in the iconography reflecting a major textual theme. The different types of fetters which are depicted in the Aramaic and Mandaic incantation bowls may be classified as secondary elements, perhaps reflecting items in use amongst the communities. Similarly, the denticulated head-dresses and the head-bands (often segmented or scalloped) which are sported by figures in the Aramaic and Mandaic incantation bowls respectively may represent artistic convention.

The visual perceptions of the communities within which the incantation texts circulated are encapsulated by the figure drawings but, as incantation texts are marked by their flexiblity and variation, so these are not executed according to rigid conventions. Instead the medium is fluid, with each scribe offering his/her individual interpretation, a process that is exemplified by five «duplicate» Aramaic incantation

12 B.M. 91770, B.M. 117826 and B.M. 136204.

13 B.M. 91714, B.M. 91728 and B.M. 91736.

14 I.M. (Iraq Museum) 55672 shows a figure, with a human face and body, but winged with taloned feet.

bowls which have come, in differing circumstances, from Nippur[15]. They were written for a variety of clients, but the core texts only exhibit minimal variants[16]. That the incantation bowls were the product of the same scribe is confirmed by their typology and palaeography, as well as by the distinctive figure which has been drawn within a circle at the interior centre of the hemispherical vessels. A bust, described as that of a woman, whose hands are folded, possibly in prayer, wears a denticulated head-dress[17]. Only the detail, such as the number of scallops of the head-dress, differentiates the drawings making it clear that the scribe has coupled text and portrait.

That the association between text, its arrangement and the figure-drawings was not fixed but was determined by the scribes can be investigated *via* another set of twelve «duplicate» texts, all of which belong to a well-known genre that is exclusive to Mandaic. Three of the incantation bowls, B.M. 91714, B.M. 91728 and B.M. 91736 are now housed in the British Museum. Six other texts coming from Khouabir were published by Henri Pognon, *Inscriptions Mandaïtes des Coupes de Khouabir*, Paris 1898 (Pognon Texts 15 - 20). To this collection may be added Harvard Semitic Museum 1931.1.1; Text II in M. Lidzbarski, *Ephemeris für Semitische Epigraphik*, 2 vols, Gießen 1902, vol. 1, pp. 89-106 and finally a bowl in the Iraq Museum, I.M. 60494[18]. In four of the specimens, the text has the tripartite arrangement that is characteristic of Mandaic, the remaining eight being written in concentric spirals of text[19]. Figure drawings also appear in five of the incantation bowls; three being placed at the end of the tripartite arrangement of text and two being associated with concentric spirals[20].

17 C. Müller-Kessler, *Eine aramäische Zauberschale im Museum für Vor- und Frühgeschichte zu Berlin*, OrNS 63, 1994, 5. Plates I - III accompanying Müller-Kessler's article show three of the illustrated bowls.

18 H.S.M. (Harvard Semitic Museum) 1931.1.1 was published by C.H. Gordon, *Aramaic and Mandaic Magical Bowls*, ArOr 9, 1937, 95-100 and has been republished by E. Yamauchi, *Mandaic Incantation Texts*, New Haven 1967, Text 26. Yamauchi, *op. cit.*, has also republished Pognon Texts 15, 16 and 18 respectively as Texts 7-9 as well as Lidzbarski's Text II which is numbered Text 19. I.M. 60494 has not been previously published. Its transcription and translation appear as Appendix A at the end of this article.

19 B.M. 91714, B.M. 91728 and B.M. 91736, Pognon Text 16 (tripartite arrangement), Pognon Texts 15, 17, 18, 19, 20; Lidzbarski Text II; H.S.M 1931.1.1 and I.M. 60494 (concentric spirals).

20 B.M. 91714, B.M. 91728, B.M. 91736 (tripartite arrangment) Pognon Texts 15 and H.S.M. 931.1.1 (concentric spirals).

The impressionistic, highly stylised figures which are featured in B.M. 91714, B.M. 91728, B.M. 91736, Pognon Text 15 and H.S.M. 1931.1.1 can be accommodated within the iconographic conventions that have been previously outlined[21]. All have raised arms, with the open palms and fingers being clearly demarcated. They stand splayed, with the feet out-turned and fetters attached to the left leg. The figures have flowing tresses and wear a type of cap, that appears to be segmented. Within this overall stylistic conformity there is much variation in detail:

Fetters: In H.S.M. 1931.1.1 the figure is not shackled. B.M. 91714 and B.M. 91728 show a three-part fetter linking the left nipple to the left ankle, whilst a double fetter is shown in B.M. 91736 and Pognon Text 15. In B.M. 91736 there is no connection with the fetter despite the breasts being defined.

Hair: The figures of B.M. 91728 and H.S.M. 1931.1.1 have no hair. By contrast B.M. 91736 has six wavy tresses sprouting from the crown of the head, while in B.M. 91714 four wavy strands emerge from the side. Pognon Text 15 minimises the hair to two straight strands.

Head-dress: B.M. 91728 has a head-dress that is simply defined by two parallel lines. H.S.M. 1931.1.1 has a segmented head-dress similar to those featured in B.M. 91714, B.M. 91736 and Pognon Text 15.

Facial and body features: In B.M. 91714, B.M. 91736 and Pognon Text 15 the figures have no mouths. B.M. 91714 shows protrusions from the side of the head that could be interpreted as either ears or horns. No breasts are indicated for the figure of B.M. 91714, which like H.S.M. 1931.1.1 may be clothed. B.M. 91714 has three protrusions, possibly genitalia or tails, hanging from the lower part of the torso.

Apparel: H.S.M. 931.1.1 wears a spotted tunic (?) with long sleeves as well as spotted leggings. The figure of B.M. 91714 might be clothed, but in B.M. 91728, B.M. 91736 and Pognon Text 15 appears naked.

The iconographic differences that have arisen between the figures, like the variants in the incantation texts, may be attributed to scribal interpretation, portraying the demons in an individualistic light! Yet representing a particular genre.

Recalling the Mesopotamian matrix

The images on the incantation bowls would have been familiar and well-known, but occasionally are accompanied by a caption. *qʾl qʾlʾ* «Hark, my voice» is inscribed on the exterior wall of B.M. 91714. The connection between caption and

---

21 See PLATES I - V for photographs or line reproductions of the figure drawings in these incantation bowls.

figure drawing is made explicit in another incantation bowl that can be added to the aforementioned list of «duplicates». B.M. 135438, written in Mandaic, in concentric spirals, commences midway (l.17) with the typical formula *q'l q'l'*. On the vessel's exterior wall is a drawing that is defined by its iconographic attributes[22]: upraised arms with fingers clearly defined, flowing tresses of wavy hair, as well as what appears to be a segmented head-band. The right foot has the expected outward-turned position, but its left leg does not appear to be shackled. A cross at the neck may indicate some type of fetter. Patterned markings on its legs suggest leggings, and the figure wears curious apparel: a bodice with 6 spots connected by thin strips to a skirt with 9 spots. Written in a shield at its right-side is the caption, *h'zyn dmwt' ḏq'l q'l' šwmy'* ... «This is the portrait of 'Hark. A Voice'. Hear and ....».

The opening stanzas of the «duplicate» incantation texts evocatively describe the «Voice», in its various manifestations:

q' q'l' ḏš'm'n' wq'l h'lšy' ḏmyt'bry' wm' gwbry' ḏn'ṣyn
wn'htyn bqr'b' wq'l ʿnšy' z'dny't' dl'ṭ' wmykdš'n
wm'yk'šypyn wm'kyb'n bh'zyn pgr'

«This is the Voice.
The Voice of the weak that are broken and of men who fight and
go into battle. Also, the Voice of raging women who curse,
afflict, bewitch and pain this body ...».

The «Voice of raging women who curse ... » is not that of mere mortals, the «human agents» as Edwin Yamauchi suggests, but the Ištar-Lilith demons, a connection which is explicit in Pognon Texts 13 and 14[23]:

hw' šgš' b'ny' ʿstyr't' wlyly't' ql'yhyn d'nšy' z'dny't'

«There has been a commotion among the Istars and the liliths!
Voices of raging women».

A highly stylised figure-drawing accompanying Pognon Text 14 exhibits the standard iconographic attributes: upraised arms, with palms and fingers defined, outturned feet, strands of hair from the crown and possibly a head-band. Like H.M.S. 1931.1.1, the figure is not fettered.

Commenting on H.M.S. 1931.1.1, Cyrus Gordon noted that on the exterior was «a crude representation of the magician with uplifted arms to scare away the demons»[24]. Rather, the anthropomorphic attributes suggest a demon - whose identity is spelt out

22 See PLATE VI.

23 E. Yamauchi, *op. cit.*, 22.

24 C. H. Gordon, ArOr 9, 1937, 98.

by the caption which has been written at the feet of the figure's shackled legs in Pognon Text 15. *hu' l'byt* was read by Pognon and later by Kurt Rudolph as a corruption of *lby't* the Mandaic expression for «la planète Venus»[25]. On the other hand, Yamauchi has tentatively translated the phrase as, «this is for the house (?)», although he also juxtaposes the reading «[or for Venus (?)]»[26], suggesting the burial-spot of the incantation bowl. Since incantation bowls were exclusively used in domestic circumstances, the prescription, «this is for the house (?)» determining the place of burial is, at best, enigmatic[27]. If Yamauchi's reading can be accepted, *hu' l'byt* may be formulaic, like the introductory sequence *lh'zyn byth dwrh hyklh wbny'nh* «for the house, dwelling, homestead and building» which frequently commences Mandaic incantation texts[28].

The caption *db'b' dn'ws'* «at the gate of the temple», accompanying the figure drawing in H.M.S. 1931.1.1 and which has also been written on the exterior of I.M. 60494, adds further comment[29]. Rather than being the place where the bowl was depositedh as Gordon posits[30], several Mandaic texts from Khouabir stipulate that a similar phrase, *db'b' d'kwr'* «at the gate of the temple» was the place where those incantations, which were to be repulsed, were written[31]. The same texts continue, citing their authority in the «name of Adonai Snubit, in the name of Ištar, the queen», and in doing so highlight the royal status of the demons, where «Ištar, the queen» can be equated with Ruha-Ištra, the queen of darkness in Mandaean mythology[32]. Rather than being the deposit-spot as Yamauchi proposes, Pognon's interpretation of *hu'*

26 E. Yamauchi, *op. cit.*, 173.

27 For a chart of the burial of Aramaic and Mandaic incantation bowls in a courtyard at Nippur, see Erica C.D. Hunter, *op. cit.*, 606. F. Franco, *Five Aramaic Incantation Bowls from Tell Baruda (Choche), Mesopotamia* 13-14, 1978-79, 233 notes that the specimens were «found behind the southwestern threshold of a room belonging to the excavated buildings» and «behind the northwestern threshold of the same room». R. Venco-Ricciardi, *Trial Trench at Tell Baruda, Mesopotamia* 8-9, 1973-74, 19 details the excavation of area 21 where four incantation bowls were found under «the new thresholds», suggesting that incantation bowls continue a heritage which harks back to the protective rituals of the Neo-Assyrian and Babylonian periods when apotropaic figurines were buried at various points in both private and public buildings.

28 Erica C.D. Hunter, *Two Mandaic Incantation Bowls from Nippur*, BaM 25, 1994, 611 for discussion of this phrase. Occasionally incantation texts mention parts of the house, see J. Naveh - S. Shaked, *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity*, Jerusalem 1993, 138 [Bowl 25, l. 11].

29 C.H. Gordon, *loc. cit.* See PLATES VI and VII for the phrase on the exterior of H.M.S. 1931.1.1 and I.M. 60494.

l'byt as «Venus» exposes the identity of the figure-drawings – as the Ištar-Lilith genres of demons to which incantation texts and amulets made frequent recourse[33].

Conclusion

Venus was, of course, the Hellenistic counterpart to the astral connotations of the Mesopotamian goddess Astarte, the Ishtar of Akkadian whose title had, by Late Antiquity, degenerated into a generic term. Yet the drawings on the incantation bowls depicting the erstwhile «goddesses» recall through their iconography their origins within the Mesopotamian matrix. These attributes, coupled with the distinctive spotted apparel sported in H.S.M 1931.1.1 and B.M. 135438, are echoed by an Akkadian incantation text which was written against the Labartu who, like the *lilitu* had the same vile reputation as the slayers of infants and whose identities eventually synthesized: «she is furious, she is impetuous, she is divine, she is terrible and she is like a leopard, the daughter of Anu ... her hair is in disorder, her breasts are uncovered»[34].

Discussing incantation texts, Montgomery states, «the religion of yesterday becomes the superstition of today»[35]. He brilliantly portrays the situation where the decaying pantheistic world-order had been largely superceded by dualistic or monotheistic faiths. Many deities had become depopularised and to quote Baudelaire were «betrayed by fate, deprived of praise»[36]. But their reputation lingered, their legacy continuing, in the form of the malevolent forces which were still greatly feared. Thus Ishtar was still called in Mandaic texts, *'sytr' ml'kt'* «Ishtar the queen», echoing her erstwhile status in Assyro-Babylonian cultus[37]. Her image as the Queen of the «goddesses», complete with her crown, portrays the visual perceptions of the magico-religious traditions of the communities in Sasanid Mesopotamia in which incantation bowls circulated. And simultaneously illuminates their integral connection with the blueprint of ancient Mesopotamia.

Appendix

I.M. 60494[38]

Extract from the Iraq Museum register: (Registered 11.x.1957)[39]

«Incantation bowl, hemispheroid, inside covered with Aramaic (?) inscription in concentric circles. Further little inscription on outside. d 175 [mm] h 35 [mm] No. other register, P.O. 688. Said to come from Tell Assafa near Yousifiyah intake».

Physical Description:

FORM: A complete (unbroken) hemispherical bowl, 17.3 x 4.8 cm, with a simple rim. Profile width at rim: 0.7 cm, centre base: 1.2 cm.

FABRIC: Very pale brown (MUNSELL 10YR 7/4) clay, with part of the exterior red (MUNSELL 2.5 YR 5/6). Medium-coarse texture with a dense and evenly distributed black grit inclusion and also a common and evenly distributed mica inclusion. No slip or glaze.

MANUFACTURE: Wheel thrown, with paring marks covering 9.0 cm diameter of the exterior base. The hand-finishing appears to have been executed with a blunt instrument, possibly a shell.

Decoration: Single hand-drawn line enclosing the text which has been drawn on the external wall.

Palæography: Mandaic.

Arrangement of Text: 23 lines written in a spiral pattern, commencing at the centre and ending at the rim edge of the vessel. 3 words are on the exterior surface.

(23) *z'wḫ wmn bnḫ wmn bn'tḫ myšry' gbr' mn byt 's[yr'] wmn byt z'yn' 'myn 'myn 'myn s'lh*

(1) Curses are averted and driven away (2) from M'H'Y'Z'WD GWŠN'ṢP (3) BR M'K'Š. Hark! The Voice which I hear (4) is the Voice of the weak that are broken and ... of men who fight and go into battle. Also, the Voice of (5) raging women who curse, afflict, bewitch and pain (6) this body of M'H'Y'Z'WD GWŠN'ṢP. Gone down against them: (7) Azdai, Yazrun, Yaqrun, Præl, Raphæl and Saḥtæl, who seized (8) and took them by the tufts of the hair of their heads and by the tresses of their pates. He has broken (9) their horns that were on high and he has bound them by the tufts of the hair of their heads and by the (10) tresses of their pates. Then he said to them, «Avert the curse against M'H'Y'Z'WD GWŠN'ṢP». They said to him, «From (11) the anguish of our heart we have cursed and we have resolved to curse from the bitterness of our palate». Then I said to them, «I have made you swear and I adjure you (12) in the name of the dæva Azdai and the dæva Azrun and Aqrun and the great Præl and Raphæl and Saḥtæl that you should release and free (13) M'H'Y'Z'WD GWŠN'ṢP from all the curses and incantations which you have cursed. Also, from the curses which the father and mother curse.(14) Also, from the curse of the harlot and singer, from the curse of the mistress and maidservant, from the curse of the employer and the emplyee who stole wages from him. Also, from the curse (15) of the brothers who have not divided the portions fairly amongst themselves. And from the curse of all who curse and invoke in the name of the temple-spirits and the image-spirits and their requisitions». (16) You are the healer who heals all maladies with a word. Heal the maladies and the curses which (she) curses and which anyone curses against M'H'Y'Z'WD (17) GWŠN'ṢP BR M'K'Š. You, seize and (take) all thoses curses which are cursed against M'H'Y'Z'WD GWŠN'ṢP and his wife K'Š'Z'G and his sons and daughters. (18) Heal in the name of Azdai, Yazrun, Yakrun, great Præl and Raphæl and Saḥtæl. Seize and take the curses which are cursed against M'H'Y'Z'WD GWŠN'ṢP and his wife, sons and daughters. May he heal the curses that are cursed against M'H'Y'Z'WD GWŠN'ṢP and his wife, sons and daughters and send them back

against their original owners (20) (that they should) release, free and bless (them). Upon that unsplit rock I sat and wrote all the curses which they cursed against M'H'Y'Z'WD GWŠN'ŞP upon a new bowl that cannot be dissolved. (21) I have sent away and thrown the curses which they cursed against M'H'Y'Z'WD GWŠN'ŞP back against their original owners until they release, free and bless (them). By the name (22) of the angel Šariel and the angel Barkiel, you angels, loosen and bless all the curses that they have cursed against M'H'Y'Z'WD GWŠN'ŞP. And loosen them from M'H'Y'Z'WD GWŠN'ŞP and from (23) his wife, sons and daughters as a man is released from prison and from a stockade. Amen. Amen. Amen. Selah.

Exterior: The gate of that temple.

Notes and Commentary:

l.2 M'H'Y'Z'WD GWŠN'ŞP is the name of the client for whom the incantation bowl was written. The Iranian name GWŠN'ŞP occurs in several Syriac specimens, while Ferdinand Justi mentions a seal wuth the name māhāzād gūšn (aspān)[40].

l.4 *wm'yk'šypyn* «and bewitch». Absent in Pognon Texts 15, 16.

l.7 *wy'zrwn wy'qrwn* «Yazrun and Yakrun». These angels' names are variously spelt, attesting to the lack of uniformity in Mandaean orthography. Cf. *y'z'rwn wy'q'rwn* (H.M.S. 1931.1.1) and *yzrwn wyqrwn* (Lidzbarski Text II).

l.7 *pr'yl* «Prael». Qualified by *rb'* «great» in other «duplicate» texts.

l.7 *wrp''yl* «Raphael». Cf. *rp'yl* H.M.S. 1931.1.1, Lidzbarski Text II, Pognon Text 16; *rp'yyl* Pognon Text 15, *rwp''yl* Pognon Text 17.

l.7 *wsh'ṭ'yl* «Sahṭiel». Consistently spelt in «duplicate» texts as *sht'yl*, deriving from √SḤṬ «press out, wring out», with a specific connotation in incantation texts «seize»[41].

---

40 See T. Harvaianen, *A Syriac Incantation Bowl in the Finnish National Museum, Helsinki. A Specimen of Eastern Aramaic «Koiné»*, StOr 51, 1978, 1-28 for the publication of a Syriac bowl, I.M. 78630 (not I.M. 7863 as in the publication) which was donated by the Iraqi government to the President of Finland. J. Naveh - S. Shaked, *op. cit.*, (1987) 183 also propose this name for a Syriac incantation bowl which is now housed in the Jewish Historical Museum, Belgrade [No. 243]. Cf. also F. Justi, *IranischesNamenbuch*, Marburg 1895, 185 referring to the publication of the seal in *Revue Archéologique* 15, 1874, pt. V n. 443.

41 E. Drower - R. Macuch, *A Mandaic Dictionary*, Oxford 1963, 319.

l.8 *bʿdqyʾ* «by the tufts». Cf. *uʿdqḫ mn riš nisbat* «she took bunches of hair from her head» Ginza yamina 247:8[42].

ll.8/9 *wtbʾr qʾrnʾyyn ḏrʾmʾ* «he has broken their horns that were on high». Cf. I Samuel II[10], Jeremiah XLVIII[25] and Psalm LXXV[11] for the metaphorical use of the horn to denote power and strength[43].

l.10 *krwk* «avert». Cf. *šrʾy* «dissolve» in Pognon Texts 15, 16, 17.

l.10/11 *mn kybʾ ḏlʿbʾn lʾṭnyn wmn mrʾrʾ ḏhynkʾn* «from the anguish of our heart we have cursed and from the bitterness of our palate». See Ginza yamina 115:16 where the palate is equated with the voice.

l.12 *ʾzdʾy dywʾ wyʾzrwn dywʾ* «the *daeva* Azdai and the *daeva* Yazrun». *dywʾ* «daeva», used in the original sense of the word as a beneficient rather than maleficient being, is also found in H.M.S. 1931.1.1, but is absent from Lidzbarski Text II and also from Pognon Texts 15, 16 and 17.

l.13 *ḏmn ʾbʾ wʿmʾ ḏlʾwṭyʾ* «from the father and the mother who curse». Cf. the comprehensive lists of bans (*māmītu*) in the Šurpu series of incantation texts. Cf. also the lists of relations: mother, daughter, mother-in-law and daughter-in-law, also men and women who curse mentioned by an Aramaic specimen now housed in the Institute of Archaeology, The Hebrew University of Jerusalem [no. 1401][44].

l.14 *lwṭtʾ ḏrʾbtʾ wšlytʾ* «of the mistress and maidservant». Discussing this phrase in H.M.S. 1931.1.1 which he has tentatively translated as «of grand(mother?) and foetus (?)», Gordon traces the history of its interpretation[45]. The reading «maidservant» is derived from √Šʾl «request»[46].

l.15 *mn hdʾdyʾ wmn* «from among themselves and from». At this point H.S.M. 1931.1.1 (ll. 15-16) includes the proper names Yʾhbwyʾ and Bʾnʾdwyʾ which Gordon claims to belong to « pair of ill-tempered fellows given to cursing»[47]. This combination, which is also absent from Lidzbarski Text II and also Pognon Texts 15, 16 and 17, may be interpreted as a corruption of *ʾhy* «brothers» and *bnyʾ* «sons».

Raza’ Rabba’

A secret book from the geonic period, known by both its Aramaic title, Raza’ Rabba’ (Great Secret), and its equivalent Hebrew title Sod ha-Gadol. It is mentioned in lists of mystical and magical works by the ge’onim, and it is probably the work mentioned by Petrus Alfonsi in the eleventh century as a Hebrew work on the Tetragrammaton, the Secreta secretorum (see God, Names of). Many quotations from Raza’ Rabba’ are included in the commentary on the Shiʿur Qomah by R. Mosheh ben Eliʿezer ha-Darshan, an Ashkenazi Hasidic writer, who was familiar with the Kabbalah and wrote at the end of the thirteenth century. Gershom Scholem, who discovered and analyzed these quotations, demonstrated that the Raza’ Rabba’
was one of the main sources of the Sefer ha-Bakir, the earliest work of the Kabbalah. The work appears to have contained speculations concerning the structure of the Tetragrammaton, the names of archangels, and some magical material. The work may have been used by the thirteenth-century esoteric writer R. Elhanan ben Yaqar of London, in his treatise Sod ha-Sodot.

ART. VI.—*The Sword of Moses. An ancient book of Magic, published for the first time, from an unique Manuscript (Cod. Heb., Gaster 178), with Introduction and Translation.* By M. GASTER, Ph.D.

I. *Introduction.*

MAGIC has exercised the deepest influence upon mankind from remote antiquity unto our own days. It either formed part of the religion of the country, as it was the case in ancient Egypt and Babylon and as it is now in some forms of Buddhism (Tibet), or lived an independent life side by side with the recognized religion. In some instances it was tolerated, or rendered less obnoxious, by a peculiar subdivision into white or beneficial and black or evil magic, or was downright persecuted. Wherever we go, however, and especially if we turn to the popular beliefs that rule the so-called civilized nations, we shall always and everywhere find a complete system of magical formulas and incantations. The belief in the witch and wizard, and their powerful filters and charms, holds still stronger sway upon human imagination than appears at first sight.

It is remarkable that we do not possess a good work, or exhaustive study, on the history and development of Magic. It is true that we find allusions to it, and sometimes special chapters devoted to the charms and incantations and other superstitious customs prevailing among various nations in books dealing with such nations. But a comprehensive study of Magic is still a pious (or impious) wish. One cannot gainsay that such an undertaking would present extreme difficulties. The material is far too vast, and is scattered over numberless nations and numerous literatures. Besides, much of ancient

Digitized by Google

times has disappeared; in fact, there is a profound gap between antiquity and modern times which is not by any means bridged over by the literature of the Middle Ages. In these times magical art and practice were ruthlessly persecuted by the Church, and the Councils teem with denunciations against the work of the Evil One. Moreover, it was connected in a certain degree with the teachings and practices of the various heretical sects, and the pursuit was anything but harmless. Thus it comes about that an exhaustive study of the origin and development of Magic is still a wish for the future, and the full influence which it has exercised upon mankind cannot be investigated in such a manner as to have a scientific value until at least a portion of the ancient literature will again have come to light.

The syncretistic character of the Gnostic teachings shows itself also in the adoption of Magic, and in the spiritual interpretation with which they invested the forms and formulas of Magic. The adherents of the various teachings of the Gnostics, and especially those that lived in Egypt and Palestine, adopted all the ideas that were floating about and transferred them into their system of superior Gnosis.

If anything of the teachings of the Gnostics has survived, it is the thaumaturgical portion of it. This has always been popular with the masses, as it afforded them those means which they wanted to defend themselves against the attacks of unseen evil spirits, and to the more speculative minds it afforded a clue to the mystery of the universe. It gave them the means to subdue and to put to their service the unknown forces of nature. This lies at the root of the general acceptance of magic formulas and enchantments, and gives to this practice the popularity which it still retains.

Being the most formidable sects that assumed an anti-Christian character, although some are anterior to Christianity, the Gnostics were the first to be attacked by the Fathers of the Church. Most of the ancient writings of the Fathers are filled with polemics against heretics, of

Digitized by Google

which these are the foremost. The result of this campaign, which lasted for centuries, has been the absolute destruction of all the writings of the Gnostics. Sparse and incoherent fragments only have come down to us, and we are now compelled to study their systems and superstitions, if we may call them so, from the writings of their antagonists, Irenæus and Hippolytus, Tertullian and Epiphanius. A single exception is the work known as "Pistis Sophia," the date of whose composition is variously assigned to the second or fourth century. It certainly seems to belong to a later stage in the development of the Gnosis, as it contains some of the later ideas. It has come down to us in a very bad state of preservation.

Within the last few years the soil of Egypt has rendered some more fragments of this kind of literature, and magic Papyri have now enriched our hitherto very scanty stock of genuine ancient literature. These belong to the second and third century, and, being exclusively of Egyptian origin, throw an unexpected light upon the form which Magic assumed under the influence of the new order of ideas. It is a fact that nothing is so stable and constant than this kind of mystical literature. The very nature of a mystic formula prevents it from ever being radically changed. As there is no other reason for its efficacy than the form in which it is pretended to have been fixed or revealed to the Select by the Divinity itself, any change of *that* form would immediately destroy its efficacy. Dread preserved the form intact, at least as long as the practitioner stood under the influence of those divinities whose power he invoked for protection, or as long as he believed in the power of those demons whose malignant influence he tried to avert by means of that form of enchantment. This explains the uniformity of a number of such charms in whatever language we find them and almost to whatever time they may belong; as long as they are the outcome of one and the same set of religious ideas, which is the determining factor. But with the change of religion the charms also undergo changes, not in the *form* but

Digitized by Google

in the *names* of the divinities invoked, and these bring other changes with them. To take a modern example, the charm against the Evil Eye will contain the name of Christ or of a Saint in a Christian charm, the name of Muhammed in the Muhammedan, and that of an angel or a mysterious name of God in the Jewish formula, though all the rest would be identical. The same process happened also in ancient times, and the Papyri mentioned above assist us in tracing the change which the new order of ideas had introduced in the magical formulas of the Christian era.

If we trace the first impulse of these changes to the Gnostics, we must at once associate it with the sects of Essenes and Theraupeuts that swarmed in Egypt and Palestine, and with the most important sect of Gnostics which produced the greatest impression, *i.e.* that represented by Valentin. His is the one against whom most of the polemics of the Fathers of the Church were directed. He is the author of the most profound and luxuriant, as well as the most influential and the best known, of the Gnostic systems. He was probably of Egyptian-Jewish descent; and he derived his material from his own fertile imagination, from Oriental and Greek speculations, and from Christian ideas.[1] In his system entered also the mystical combinations of letters and signs known under the name of cabbalistic formulas, and he moreover favoured the permutations and combinations of letters to express divine names and attributes. To him we owe the theory of Æons and the Syzygies, or divine creative pairs, of which the two first form together the sacred "Tetraktys." I believe this to be the Gnostic counterpart of the sacred "Tetragrammaton," and not, as has hitherto been assumed by others, the Tetraktys of the Pythagoreans. For one can see in his system, and more so in the mystical part of it, the direct influence of the Jewish mystical speculations of the time. Valentin lived, moreover, in Palestine, and nothing would suit him better than to

[1] P. Schaff, "Anti-Nicene Christianity," ii, Edinburgh, p. 472 ff.

Digitized by Google

manipulate that mystical, Ineffable Name of God, round which a whole system had been evolved in the service of the Temple. Angelology and mysterious names of God and His angels are, moreover, intimately connected with the above-mentioned sects.

The mysterious Ineffable Name of the divinity which is invoked seems to be the centre of most of the ancient and even modern Magic. By knowing that Name, which is assumed to be the name by means of which the world was created, the man or exorciser in Egypt pretended to constrain the god to obey his wishes and to give effect to his invocation if called by his true name; whilst in Chaldea the mysterious Name was considered a real and divine being, who had a personal existence, and therefore exclusive power over the other gods of a less elevated rank, over nature, and the world of spirits. In Egyptian magic, even if the exorcisers did not understand the language from which the Name was borrowed, they considered it necessary to retain it in its primitive form, as another word would not have the same virtue. The author of the treatise on the Egyptian mysteries attributed to Jamblichus maintains that the barbarous names taken from the dialects of Egypt and Assyria have a mysterious and ineffable virtue on account of the great antiquity of these languages. The use of such unintelligible words can be traced in Egypt to a very great antiquity.[1]

It is necessary to point out these things in order to understand the character of the new formulas which take now the place of the old. To the old and in time utterly unintelligible names, new names were either added or substituted, and the common source of many of these names is Jewish mystical speculation. The Ineffable Name of God and the fear of pronouncing it can be traced to a comparatively remote antiquity. We find in those ancient writings that have retained the traditions of the centuries before the common era, the idea of a form of the

Digitized by Google

Ineffable Name composed of 22, 42, or 72 parts, or words, or letters, of which that consisting of 72 was the most sacred. It is still doubtful what those 22, 42, and 72 were — either different *words* expressing the various attributes of God, or *letters* in a mystical combination; but whatever these may have been they took the place of the Ineffable mystical name and were credited with the selfsame astounding powers. By means of these every miracle could be done and everything could be achieved. All the powers of nature, all the spirits and demons could be subdued, and in fact there was no barrier to human aspiration. The heavens were moreover peopled at a very early age with numberless angels arranged in a hierarchical order and each endowed with a special Name, the knowledge of which was no less desirable for working miracles. I need only allude to Dionysius Areopagita to have mentioned a complete treatise of such a divine economy recognized by the Church, but we can go much higher up and find these divisions and subdivisions of the celestial hosts recorded in books that belong to the second era before Christ. In the Book of Enoch (ch. vi) we have a long list of such names of angels, and in a book, the date of which has been differently put, the names of angels are still more numerous, to which there are added also various names of God. The book in question pretends to be a vision of the High Priest Ismael, and is a description of the heavenly Halls. Modern scholars who knew nothing of the Gnostic and other heretic literature put it as late as the ninth century, simply and solely because they could not find early traces of it in the old literature, and because it seemed to appear first in those times. A comparison of it with the Ascensio Iesaiae, and still more with a chapter in the "Pistis Sophia," easily convinces us, however, of the fact that absolutely similar treatises were known as early as the first centuries after Christ, if they were not, in fact, later remakings of still more ancient texts. The Greek Papyri already alluded to have also this peculiarity in common with these texts, that they abound in similar

Digitized by Google

lists of names of angels and demons borrowed from Egyptian, Christian, and Jewish sources. Among these we find also numerous forms of the *Name* of God consisting also of a number of letters, 7, 27, and others,[1] and also most curious combinations of letters.

The Jewish idea of a mystical Name of God rests thus upon the interpretation of the Tetragrammaton, or the word *JHVH*, that stands for God in the Hebrew text, which from very ancient times the priests first and then the whole people refrained from pronouncing in the way it was written. A substitute was found for it, so as to avoid a possible profanation of the sacred Name. But it is an object of millenary speculation what that substitute really was. As already remarked, it is represented by a changing number of elements, letters or words. The original miraculous, powerful Name, however, was the Tetragrammaton known as the "Shem ha-meforash." This word has presented great difficulties to the following generations. It can be translated either as meaning *explicit*, the "explicit" Name of God, whilst the others are merely substitutes, or *separate*, the name which is used exclusively for the designation of the Divinity. These two are the best known and most widely accepted interpretations of the "Shem ha-meforash." In the light, however, of our study it will appear that another translation will henceforth be found to be the only true one, at any rate for ancient times. Later on the true meaning of this expression was lost, and one or the other of the first-mentioned philological translations was adopted. So we find in the Testament of Solomon, *e.g.*, "the angel *called* Aphoph, which is *interpreted* as Rafael." [This expression proves that it is based upon a Hebrew original, and that the word "perush" was taken to mean "interpretation."] Considering that this name was believed to be the only *true* Name of God, the all-powerful name which was never pronounced, "Shem ha-meforash" can only mean the *Ineffable*, as we find it also in the "Pistis Sophia," and all

[1] A. Dieterich, "Abraxas," p. 185 (Papyrus Leyden,.

Digitized by Google

throughout the ancient tradition. It is an euphemism; instead of saying: it is the "Ineffable" unutterable name, they used the word which meant: it is the "explicit" name, just as they said for a "blind" man—he is "full of light"; other examples can be easily adduced. In this way an ancient mystery and a stumbling-block for the translator of such texts disappears.

As the Tetragrammaton, or "Shem ha-meforash," was the Ineffable Name, and could by no means ever be uttered, others were substituted and were used by the priest when blessing the people. These also were endowed with a special sanctity, and were revealed only to the initiated. These substitutes were considered to be no less effective for miracles, and the knowledge of these mysterious Names was no less desirable than that of the true Tetragrammaton, for they were believed to represent the exact pronunciation of the forbidden word, and thus to contain part, if not the whole, of the power with which the Tetragrammaton itself was invested. Rab, a scholar who had studied in Palestine towards the end of the second century, says of these substituted names, and more especially of that of forty-two elements (Tr. Kiddushin, fol. 71*a*): "That this Name is to be revealed only to a man who stands in the middle of his life, who is pious and modest, who never gives way to anger and to drink, who is not obstinate. Whoever knows that Name and preserves it in purity is beloved in heaven and beloved upon earth; is well considered by man and inherits both worlds."[1] What these forty-two may have been has thus far been the object of speculation. When comparing the ancient tradition with the new texts in the Papyri, and in the mystical texts of Hebrew literature, there can no longer be any doubt that the Name of forty-two, or more or less, elements could not have been originally anything else but *words* consisting of that *number of letters*, which were substituted in the public pronunciation for the Ineffable Name consisting of one *word* and only *four letters*—the Tetragrammaton! In time these

[1] *Cf.* Bacher, "Agada d. Babylonischen Amoraeer," pp. 17, 18.

Digitized by Google

substitutes were also forgotten, or not divulged, and thus arose a series of new substitutes and variations for the divine Name. There was also the fear of profaning the name of God when writing it down in the way it occurred in the Bible, and therefore they resorted to manifold devices on the one hand to avoid a possible profanation, and on the other to obtain sacred or mysterious substitutes for the Ineffable Name.

Another element that came within the purview of this activity of coining new names was the new and greatly developed angelology that flourished at that time in Palestine and Egypt. The angels had to be provided with appropriate and powerful names, and the authors resorted to the same devices, of which I mention the most prominent, and which are the cause of many of the barbarous forms and names that abound in the magical rites and formulas and in the so-called practical Cabbalah. The biblical names of Michael, Gabriel, and others with the termination *-el*=God, served as a model for some of the new angels, such as in the Book of Enoch and in other similar writings. The first part was, as a rule, taken from the characteristic attribute connected with the activity of that new angel: so *Raphael*=the healing angel, in the Book of Tobit; *Raziel* =the angel of the mysteries; and in the same manner a host of similar names. Then came into requisition the system of permutation of the letters of the divine name: one standing first was placed at the end, and so on. Much more extensively were the change in the order or the substitution of other letters resorted to. In the Alphabet of R. Akiba no less than five different systems of this kind of substitutions are enumerated; either the last letter of the alphabet stands for the first (A-t; b-š, א"ת ב"ש, etc.), or one letter stands for the one immediately preceding such, as *b* for *a*; or the eighth and fifteenth stand for the first, and so on (A-h-s; b-t'-a, אחס בטע), or first and twelfth are interchangeable (A-l; b-m, א"ל ב"מ). One can easily see how differently the same name could be written and employed in the same amulet, and all these

Digitized by Google

various forms representing only *one* and the same name. The Tetragrammaton appears, therefore, either as מצפ"ץ, or בוזו, or בקרק, or שעפע, etc. The number of such permutations and substitutions is not limited, however, to these four systems enumerated; they are innumerable, and it is almost impossible to find the key for all met with in these mystical writings, and especially on the amulets.

Other means employed for the purpose of devising new variations and protections for the sacred name, belonging to the very oldest times, were the combination of *two* words into *one*, of which one is a sacred name and the other an attribute, but the letters of these two words are intermingled in such a manner that it is not always easy to decipher them. An example, which has hitherto not been understood, we have already in the Talmud. The High Priest Ismael is said to have seen Iah אכתריאל *Aktriel* in the Temple. This word, which stands for the mysterious name of God, is nothing else than the combination of the two words כתר *Ktr*=Crown and *Ariel*, from Isaiah xxix, 1. In the text, which I publish here, we have the name שקרחזי *Ṣḳṛḥzi*=שדי *Ṣaddai* and חזק *Hzk*=mighty, powerful. Names were further formed by leaving out one or two letters from the Tetragrammaton or from other sacred names of the Bible, the primary reason always being to avoid the possibility of profanation, as the profane utterance of the divine name brought heavy penalty upon the culprit. In this manner is the obscure exclamation in the Temple to be understood, אני והו *Ani vhu*, instead of the usual "O Lord" (help us): in each of these two words *one* letter has been left out—the *d* in the first, A*d*ni, and the second *h* in the second word. On other occasions strange letters were inserted between those of the divine name, and thus we get the puzzling form (Tr. Synhedrin, 56*a*=vii, 5) which is mentioned when the blasphemer who had blasphemed God was brought before the judges. The judges ask the witnesses to repeat the

Digitized by Google

blasphemy uttered by the accused, and they say, instead of mentioning the Divine Name, the words יוסי יוסהאת יכה, which may have obtained this form in our printed texts through popular etymology, meaning "Jose beat Jose!" But originally we have here clearly the Tetragrammaton יהוה, and a strange letter inserted after each letter of that word, viz. כ, י, ם, and א.

This process continues still unto our very days, but from the thirteenth or fourteenth century onwards a change has taken place in the system of the formation of these mysterious words, considered to be so efficacious in amulets. The initials of the words of a biblical verse are combined into a new word without any meaning, or the letters of a verse are so arranged as to form uniform words of three letters without meaning, the commencement of each of these words being the letters of the Hebrew words arranged consecutively. The most celebrated example is the use to which Exodus xiv, 19–21 has been put for many a century. But these are a mark of more recent origin, and not a trace is to be found throughout the whole ancient mystical literature, and also not in our text.

If we should apply these principles to the Greek Papyri, there is no doubt that a key might be found for the innumerable curious names which crowd these fragments of a literature that at one time must have been very rich. Traces of it we find also in the "Pistis Sophia," where special stress is laid upon that Ineffable Name, communicated only to the initiated. The knowledge which a man acquires through the "Nomen Ineffabile" is described at some length (pp. 131–153). In another place we read that Jesus spoke the Great Name over the disciples whilst preaching to them, and blew afterwards into their eyes, by which they were made to see a great light (p. 233). The mysterious names of God and of the Powers are enumerated on pp. 223 and 234–5, whilst the following passage explains the power of that Name:—"There is no greater mystery than this. It leads your soul to the light of lights, to the places of truth and goodness, to the region of the most holy, to

Digitized by Google

the place where there is neither man nor woman nor any definite shape, but a constant and inexpressible light. Nothing higher exists than these mysteries after which ye seek. These are the mysteries of the seven voices, and their forty-nine Powers, and their numbers, and no name is superior to that Name in which all the other names are contained, and all the Lights, and all the Powers. If anyone knows that Name when he goes out of the material body, neither smoke nor darkness, neither Archon, angel, or archangel, would be able to hurt the soul which knows that Name. And if it be spoken by anyone going out from the world and said to the fire, it will be extinguished; and to the darkness, and it will disappear; and if it be said to the demons and to the satellites of the external darkness, to its Archons, and to its lords and powers, they will all perish, and their flame will burn them so that they exclaim: 'Thou art holy, Thou art holy, the Holy of all the Holy.' And if that Name is said to the judges of the wicked, and to their lords and all their powers, and to Barbelo and the invisible God, and to the three Gods of triple power, as soon as that Name is uttered in those regions they will fall one upon the other, so that being destroyed they perish and exclaim: 'Light of all the Lights, who art in the infinite lights, have mercy upon us and purify us.'"[1] This is almost identical with the saying of Rab, with the difference that in the "Pistis Sophia" the Egyptian influence is not yet wholly obliterated. These examples suffice to show the character of the central point in the new Magic adopted by the Gnostics, viz., the mysterious Divine Name and its substitutes derived from the mystical speculations of Palestine, and also the general tendency of syncretism and absorption of various forms and invocations in that form of Magic which henceforth will have the deepest influence upon the imagination and belief of the nations of the West.

From that period, then, up to the twelfth or thirteenth century there is a gap which neither Psellus nor the Testament of Solomon fill sufficiently. All those ancient

[1] "Pistis Sophia," ed. Schwartze, p. 236.

Digitized by Google

magical books, being declared the work of the evil spirit, were successfully hunted up and destroyed. The link which binds the literature of the second half of the Middle Ages with the past is missing, and we find ourselves often face to face with the problem whether a book that appears after that period is of recent origin, or is an ancient book more or less modified? Such a book is, for instance, the so-called Sefer Raziel, or the book delivered to Adam by the angel Raziel shortly after he had left Paradise. It is of a composite character, but there is no criterion for the age of the component parts. The result of this uncertainty is that it has been ascribed to R. Eleazar, of Worms, who lived about the middle of the thirteenth century. One cannot, however, say which portion is due to his own ingenuity and which may be due to ancient texts utilized by him. I am speaking more particularly of this book as it seems to be the primary source for many a magical or, as it is called now, a cabbalistical book of the Middle Ages. Trithemius, the author of "Faust's Hoellenzwang," Agrippa, and many more, are deeply indebted to this book for many of their invocations and conjurations, although they must have had besides similar books at their disposal, probably also the Clavicula Solomonis, the Great Grimoyre, etc.

I must still mention one more fragmentary relic of that literature, viz. the inscribed cups and bowls from ancient Babylon with Aramaic inscriptions. These belong partly to the Lecanomantia, and are another example of the constancy of these formulas; for centuries these remain almost unchanged, and even in their latest form have retained a good number of elements from the ancient prototype.

It so happened, then, that some inquisitive men living in Kairouan, in the north of Africa, should address a letter to the then head of the great school in Babylon, Haya Gaon (d. 1037), asking him for information on various topics connected with magic rites and the miraculous powers ascribed to the Ineffable Name. I give here the gist of some of their questions, which date therefore from the second half of the tenth or the commencement of the

Digitized by Google

eleventh century. They ask first, what it is about that Ineffable Name and other similar mysterious Names of angels through the means of which people can make themselves invisible, or tie the hand of robbers, as they had heard from pious men from Palestine and Byzantium that if written upon leaves of reeds (Papyri!) or of olive trees and thrown in the face of robbers would produce that effect; and if written on a potsherd and thrown into the sea, calms it; or placed upon a corpse, quickens it to life; and, further, that it shortens the way so that man can travel immense distances in no time. They have also books with these terrible, awe-inspiring Names, and with the *seals* of those celestial powers of which they are terrified; as they know that the use of these mysterious Names, without due and careful preparation, brings with it calamity and premature death. To these and other questions the Gaon gives a sensible and philosophic reply, warning them, in the first instance, not to place too much credence on the statements of people who pretend to have seen, but to try and see with their own eyes. Then he goes on to tell them that such books with mystical names are also to be found in his college, and that one of his predecessors was known to have been addicted to these studies, and to the writing of amulets and the knowledge of incantations, but, he adds, "only a fool believes everything." As for the books with formulas, he goes on to say: "We have a number of them, such as the book called 'Sefer ha-Yashar,' and the book called '*The Sword of Moses*,' which commences with the words, 'Four angels are appointed to the Sword,' and there are in it exalted and miraculous things; there is, further, the book called 'The Great Mystery,' besides the minor treatises, which are innumerable. And many have laboured in vain to find out the truth of these things." In the course of his reply Haya touches also upon the Ineffable Name and the name of seventy-two (elements), which, according to him, was the result of the combination of three biblical verses (*cf.* above, p. 159, where reference is made to Exodus xiv, 19–21), but he neither knows which

Digitized by Google

they are nor how they were uttered; as to the other of forty-two, he says that it consisted of forty-two *letters*, the pronunciation of which was, however, doubtful, resting merely upon tradition. This name commenced, according to him, with the letters אבגיתץ *Abgiṭṣ*, and finished with שקוצית *Ṣkuṣit*. He mentions further the books—"The Great and the Small Heavenly Halls" and "The Lord of the Law," full of such terrifying names and *seals* which have had that dreaded effect upon the uncalled, and from the use of which those before them had shrunk, lest they be punished for incautious use.[1]

These abstracts suffice to show that the mystical literature had not come to an end with the third or fourth century, but had continued to grow and to exercise its influence throughout the whole intervening period. The reasons why so little is mentioned in the contemporary literature is, that each period has its own predilections, subjects which absorb almost exclusively the general interest, and are therefore prominently represented by the literature of the time, whilst other things, though in existence, are relegated to an obscure place. The best example we have is the modern folklore literature, that has assumed such large proportions, no one pretending that the subject did not exist throughout the centuries, although neglected by scholars. It must also not be forgotten that we have only *fragments* of the literature that flourished in Palestine and among the Jews in the Byzantine empire, to which countries this mystical literature belongs. Christian literature leaves us also in the dark for this period, for the reasons stated above; only Syriac might assist us somehow to fill up that gap, but as far as I am aware very little is to be expected from that quarter, as in the whole magnificent collection of the British Museum I have not found a single MS. of charms or magical recipes, except one single, rather modern, Mandaic text. Two very small, and also rather modern, Syriac MSS. of charms are in the possession of the Rev. H. Gollancz.

Of those books now mentioned by Haya Gaon in his

[1] Ṭaam Zeḳenim, f. 54*b* ff.

Digitized by Google

reply—all of which, by the way, seem to have been irretrievably lost—I have had the good fortune to discover one, viz. that called "*The Sword of Moses*," of which he gives us the first words. From the answer of Haya it is evident that he considered this book to be old and to be the most important, for he is not satisfied with merely giving the title as he does with the other books, but he makes an exception for this to indicate the commencement and to add that it contained "exalted and wonderful things." A glance at the contents of the newly-discovered text will justify the judgment of Haya, for it is a complete encyclopædia of mystical names, of eschatological teachings, and of magical recipes.

Before stating the contents I must first give a short description of this MS., now Cod. Hebr., Gaster, 178. This text has come to me with a mass of other leaves full of magical formulas, all in a very bad state of preservation and apparently hopelessly mixed up. Happily there were custodes at the ends of the leaves, and by their means I was enabled, after a long toil and careful handling of leaves falling to pieces on account of old age and decayed through dampness, to recover a good portion of the original MS. and the whole of this text, which occupies twelve small quarto leaves. The number of lines varies. The writing belongs to the thirteenth or fourteenth century, and is in Syrian Rabbinical characters. It is evidently a copy from a more ancient text, and the copyist has not been very careful in the transcript he made. Many a letter is written wrongly, having been mistaken for another similar, such as ד (*D*) for ר (*R*) and ם (*M*) for ס (*S*). In many a place there are evident lacunæ, and the copyist has often not understood the text. The language is a mixture of Hebrew and Aramaic, Hebrew prevailing in the first part, which I call the Introductory or historical, as it gives the explanation of the heavenly origin of this text, and deals with all the preliminary incidents connected with the mode of using the text in a proper and efficacious manner. In the last, which I call the theurgical or magical

Digitized by Google

part, Aramaic prevails. All the diseases are mentioned in the language of the *vulgus*, and so also all the plants and herbs, and the other directions are also in the same language. To no language, if I may say so, belongs the middle part, which is the real text of the "Sword." This consists of a number of divine and mysterious Names, a good number of which are the outcome of all those modes of manipulations with the letters briefly indicated above. It would be a hopeless task to try and decipher these names, and to transliterate them into the original forms of which they are the transformations and mystical equivalents. In this section we can recognize besides the unchangeable character of some of the magic formulas. What I said before of the Egyptians, who would not change any sacred Name, however barbarous it may sound, for fear of destroying its efficacy, holds good also for another number of Names found here in a bewildering variety. Almost every religion must have contributed to the list that makes up the "Sword." Eclecticism would be a mild word for this process of general absorption, that has made the "Sword" thus far the most complete text of magical mysterious Names which has come down to us. A small encyclopædia of a similar character is the Greek Papyrus of the British Museum, No. cxxi, and the Leyden Papyrus (J. 395), with which our text shows great similarity, but these Papyri mark as it were the first stages of this process of growth by the assimilation of various elements and combination into one single complete *vade-mecum* for the magician or conjurer. In the "Sword" we have the full development of that process, which must have run its course at a very early period.

Nothing is more fallacious than to try etymologies of proper names. The omission or addition of one letter by a careless copyist suffices to lead us completely astray. It is, therefore, difficult to advance any interpretation of even a few of the names found in this text that have a familiar appearance. If we were sure of the reading, we might recognize among those in No. 6, Isis (Apraxia,

Digitized by Google

Veronica), Osiris, Abraxas, and others; but, as already remarked, such an identification might easily lead us astray, and the coincidences might only be the result of mere chance. No doubt can, however, be entertained as to the complex character of this text, and to the astounding form of many of the names which it contains. It is a systematically arranged collection; in the apparent disorder there is order; and the names are placed according to certain leading features which they have in common. Thus we have a long string of names that are composed with the word Sabaoth (Nos. 24–37); others that are the components of the divine *-el* (Nos. 102–34). More startling still is a list of supposed names of heavenly powers that are represented as *sons of* other powers. These are undoubtedly derived from many sources, the author welding smaller texts and lists into one comprehensive list. The third part contains the directions for the application of these various Names. These are also arranged according to a certain system. The diseases follow, at any rate in the first portion, the order of the members in the human body, commencing with the head and its parts, then descending to the lower members; after which follow recipes for ailments of a different nature, to be followed by the directions for performing miracles and other remarkable feats.

Each of these 136 items (numbered by me) corresponds with a certain portion of Part II, the words or the mystical Names of those portions in Part II being the mysterious words that alone were the proper to have the expected magical result. In order to facilitate research, I have subdivided Part II into such corresponding portions to which I give the same number. There is thus an absolute parallelism between the two parts—one the text and the other its magical application. We see that the book has been very methodically arranged by one who intended to prepare as complete a magical book as possible. By this parallelism, and by the partial repetition of the mysterious words in Part III, we have the means to satisfy ourselves as to the accuracy of the copyist, who does not

Digitized by Google

come out very satisfactorily from this test. It may be that the original from which he copied was already partly corrupt, and the fear which such books inspired prevented him from attempting to correct what are obvious mistakes in the spelling of those Names. It not seldom happens that the same Name is written in two or three different forms in one and the same recipe. I have also not attempted any correction, as we have no means to decide which of these *variæ lectiones* is the true and which the corrupt. Another reason why the copyist may be exonerated from at least some of these inconsistencies, is the fact that he gives in many places what are intended to be different readings. He starts his copy with the marginal note, unfortunately half gone, the paper being destroyed in that place, that "there are differences of opinion as to the readings of the text and of the Names," or, as I would interpret this mutilated glosse, "the marginal readings are *variæ lectiones*." For, in fact, there are a good number of marginal glosses throughout Parts I and II.

There also are some in Part III, but these are of a totally different character. They are purely philological, and furnish one powerful proof more both for the antiquity of the text with which we are dealing and for the country where the MS. has been copied. Most, if not all, these glosses are, namely, *Arabic* translations of the Aramaic words of the original. By the mistakes that have crept into these Arabic glosses, it is evident that they have not been added by the copyist, who surely would have known how to write his own translation, but who would make mistakes when copying another MS., especially if it were in any way badly written or had suffered in consequence of age. The translation further proves that the original was written at a time when Aramaic was the language of the people, and that at a certain time when the copy was made from which this MS. is a transcript the language of the original had begun to be forgotten and required a translation, which, by the way, is not always exact. The Aramaic of this text is, in fact, not easy to understand; there occur in it many words

Digitized by Google

of plants and diseases which I have not found in any dictionary in existence, and many of the grammatical forms present peculiar dialectical variations, which point to Palestine as the original home of our text, and deserve a special study. Here again we have to lament the fact that we deal with an unique manuscript and have no means to test the accuracy of the text. But even as it is, this text will prove an extremely valuable contribution to Semitic philology, and would enrich even Löw's book on Aramaic names of plants, where I have in vain searched for the names and words occurring in our text. I have therefore added a translation, which, however, in some places, does not pretend to be more than an attempt to grapple with a very recalcitrant text.

The title of the book seems to be derived from the last words spoken by Moses before his death. He concludes his blessing of the Children of Israel with these words (Deuter. xxxiii, 29): "Who is like unto thee, a people saved by the Lord, the shield of thy help, and that is the Sword of thy excellency," or "thy excellent Sword." The figurative "Sword" spoken of here must have been taken at a later time to signify more than a figure of speech. Under the influence of the mystical interpretation of Scripture flourishing at a very early period, it was taken to denote a peculiar form of the divine Name, excellent and all-powerful, which served as a shield and protection. It therefore could be made to serve this purpose in magical incantations, which did not appeal to the assistance of demons but to the heavenly hosts obeying the command of the Master of that "Sword." There is no wonder, then, that it came to be connected with the name of Moses, the very man who spoke of it, and whose last words were of that "Sword." In the Greek Papyri, Moses is mentioned as one who keeps divine mysteries (Brit. Mus., Pap. xlvi, of the fourth century, lines 109 ff., ed. Kenyon, in Catalogue, 1893, p. 68, and note to it); and again, in another Papyrus, cxxi, of the third century (*ibid.* p. 104, l. 619 and note), a reference to one of the magical books ascribed to Moses, called "The Crown of Moses." But what is

Digitized by Google

more important still, the Leyden Papyrus calls itself the eighth Book of Moses. It resembles very much our text, which has thus preserved the old name by which many of these magical books went. Dieterich, who published the Leyden Papyrus (Abraxas, Leipzig, 1891), looks to Orphic origins for that magical composition and lays too great stress on the Cosmogony in it. In the light of our text it will become evident that these go all back to one common source, viz. to the mystical speculations of those sects, which he himself enumerates (pp. 136 ff.); and the "Logos ebraikos" quoted by him from the Paris Papyrus (*ibid* pp. 138–141) shows more clearly still the same sources for all these compositions. The overwhelming importance assigned in these texts to the "holy Name" consisting of a number of *letters*, and the book calling itself "The Work of Moses on the Holy Name," justify us in seeing in it an exact parallel to the Hebrew text, recovered now by me. There is much internal similarity between the Hebrew "Sword" and the Greek Papyri. The order of subjects is similar; all commence with an eschatological part, which in the Greek is more in the nature of a Cosmogony, in the Hebrew that of the description of the heavenly hierarchy. In both follows the "Name," and after that a list of magical recipes which refer back to that Name. The constant refrain of the Leyden Papyrus after each recipe is: "Say the Name!" Here the Name is still simple; in the Hebrew text it is represented by the rich variety which I have pointed out, but an intimate connection between these various texts cannot be doubted.

There exists besides another small treatise (B), also unique, that goes under the same name as "The Sword of Moses" (Cod. Oxford, 1531, 6). It is a short fragment of a different recension, and has only a remote resemblance with the first text (A). It consists of a list of mystic Names, different in their form from the other text, and has only sixteen recipes, which do not correspond with *portions* only of the first part, but, as in the Leyden Papyrus, the *whole* of this was to be repeated

Digitized by Google

after each recipe. Immediately upon this short text follows an invocation of the heavenly Chiefs, attributed to Ismael, the High Priest, the reputed author of the "Heavenly Halls." This addition corresponds to a certain extent with the first part of the "Sword" (A). In none, but very few exceptions, of B is there any trace of Aramaic, and a totally different spirit pervades the whole text. It is in the first place doubtful whether we have here the whole of it or merely a fragment. In two places we find the letters נג (NG) and נד (ND), which taken as numerals mean 53 and 54. If they stand for such, then we have here only the last two or three portions of a long text, of which the preceding *52* are missing. Again, on the other hand, as it is regularly recommended to repeat the *whole* of the "Name" after each recipe, an operation that would be well-nigh impossible for the inordinate length of that text, those NG and ND may not stand as numbers of paragraphs. This text presents besides many more peculiar traits that make it rather remarkable. We find here thus far the only trace in Hebrew literature of the "Twins" or "Didymoi" which appear in the Gnostic hymns of the apocryphal Acts of the Apostle Thomas,[1] and are brought into connection with the system of Bardesanes. The heavenly Powers mentioned in the "Sword" (A) under the form of *sons* of other Powers, point also to the same system of Bardesanes, of whom Ephraem Syrus said: "He invented male and female beings, gods and their children."[2] He may have taken these ideas from older sources. However it may be, this coincidence is none the less remarkable. We find further angels with double names, the one of which I translated "Kunya," *i.e.* the proper name, and the other the *explicit*, i.e. *Ineffable* unutterable name, corresponding entirely with that of the Testament of Solomon, where we find "the angel called Apharoph interpreted Raphael" (*τῷ καλουμένῳ Ἀφαρὼφ, ὅ ἑρμηνέυεται Ῥαφαὴλ*.—Orient, 1844, col. 747).

In the Gnostic prayer from the Acts of the Apostle Thomas, the Sophia is spoken of as the one "who knows the mysteries of the Chosen," or, according to the Syriac version, "revealer of the mysteries of the Chosen among the Prophets." With this the passage in the Hebrew text (B) may be compared, where the same idea is enunciated; and one feels almost tempted to see in the inexplicable word קינן ("Kinn") the Greek "Koinôn," the companion or partaker of the mystery; although it seems rather strange to find the very word in the Hebrew text. But there are many words that have a peculiar appearance in this text, and they look like transliterations of Greek words in Hebrew characters, such as "Chartis Hieratikon," etc. I have added, therefore, this second text also, making thus the publication of the "Sword" as complete as possible.

As a second Appendix I have added two conjurations found in the MS. of the "Sword" (A), both in Aramaic, and extremely interesting also for their similarity with the inscriptions inside the bowls brought from Assyria and Babylon. A detailed study of some of these magic bowls and their inscriptions has been published by M. Schwab.[1]

I have reproduced all these texts as closely and accurately as possible, without attempting any corrections or emendations, except in the case of obvious mistakes, which are pointed out by me as corrections. The glosses are given as notes, and the few corrections of obvious mistakes. I have refrained from referring to inscriptions on Gnostic gems and amulets, where we find "Ephesia grammata" similar to those of Part II of the "Sword" (A) and to some of Appendix I, and to the magical formulas in the terra-cotta bowls, which present a striking similarity with some portions of "The Sword." One cannot exhaust a subject of this kind, and the utmost one can attempt to do is to place as ample a material as possible at the disposal of those who make the study of Magic and theurgy and of the so-called practical Cabbalah the object of special enquiry. I have limited myself to

[1] Proc. Bibl. Archæology, 1890, pp. 292–342.

Digitized by Google

draw attention to the relation that exists between these, the Greek Papyri, and the Hebrew texts which I publish here for the first time, and to point out the important fact that we have now at least one fixed date from which to start in the enquiry of a subject in which dates and times have thus far been very doubtful. It is, moreover, a contribution to Semitic philology, and by the addition of a facsimile of the first page a contribution to Semitic palæography.

The origin of the "Sword" is none the less somewhat difficult to fix. From the letter of Haya Gaon it is evident that it must have been at least a few centuries older than his time (tenth century). But it must be much older still. As the Leyden Papyrus belongs at the latest to the third century, and those of the British Museum to the third or fourth century, we are justified in assigning to the first four centuries of the Christian era the origin of our Hebrew text, which throws so vivid a light upon those remnants of Greek Magic buried hitherto in the soil of Egypt. Herein lies also one side of the importance of our text, that it shows how the connection between antiquity and the later ages was maintained. The Greek texts had become inaccessible and practically lost to the world, whilst the Hebrew text, written in a language which was considered sacred, the knowledge of which was never allowed to be extinguished, preserved the ancient magical texts, with their curious mystical names and formulas, and carried them across the centuries, keeping up the old tradition, and affording us now a glimpse into a peculiar state of the popular mind of those remarkable times. The careful study of those Greek fragments side by side with the Hebrew will assist very materially in the understanding also of those often very obscure texts, and lift the study from the narrow groove in which it has hitherto been kept by the classical scholars who have devoted their attention recently to them. It will also help us in laying bare the fountains from which flowed the whole of the magical arts of the Middle Ages.

II. Translation.

I. *The Sword of Moses.*

In the name of the mighty and holy God!

Four angels are appointed to the "Sword" given by the Lord, the Master of mysteries, and they are appointed to the Law, and they see with penetration the mysteries from above and below; and these are their names—SKD HUZI, MRGIOIAL, VHDRZIOLO, TOTRISI. And over these are five others, holy and mighty, who meditate on the mysteries of God in the world for seven hours every day, and they are appointed to thousands of thousands, and to myriads of thousands of Chariots, ready to do the will of their Creator, X,[1] the Lord of Lords and the honoured God; these are their names—X. And the Master of each Chariot upon which they are appointed wonders and says: "Is there any number of his armies?" And the least of these Chariots is lord and master over those (above) four. And over these are three chiefs of the hosts of the Lord, who make every day tremble and shake His eight halls, and they have the power over every creature. Under them stand a double number of Chariots, and the least of them is lord and master over all the above Chiefs (rulers); and these are their names—X. And the name of the Lord and king is X, who sits, and all the heavenly hosts kneel, and prostrate themselves before Him daily before leaving X, who is the Lord over all.

And when thou conjure him he will attach himself to thee, and cause the other five Chiefs and their Chariots, and the lords that stand under them, to attach themselves to thee just as they were ordered to attach themselves to Moses, son of Amram, and to attach to him all the lords that stand under them; and they will not tarry in their obeisance, and will not withhold from giving authority to

[1] X stands for the mysterious names, which have not been transliterated. N for the name of the person who conjures.

Digitized by Google

the man who utters the conjuration over this "Sword," its mysteries and hidden powers, its glory and might, and they will not refuse to do it, as it is the command of God X saying: "Ye shall not refuse to obey a mortal who conjures you, nor should you be different to him from what you were to Moses, son of Amram, when you were commanded to do so, for he is conjuring you with My Ineffable names, and you render honour to My name and not to him. If you should refuse I will burn you, for you have not honoured Me."

Each of these angels had communicated to him (Moses) a propitious thing for the proper time. These things (words) are all words of the living God and King of the Universe, and they said to him:—

"If thou wishest to use this 'Sword' and to transmit it to the following generations, (then know) that the man who decides to use it must first free himself three days previously from accidental pollution and from everything unclean, eat and drink once every evening, and must eat the bread from a pure man or wash his hands first in salt (?), and drink only water; and no one is to know that he intends using this 'Sword,' as therein are the mysteries of the Universe, and they are practised only in secret, and are not communicated but to the chaste and pure. On the first day when you retire from (the world) bathe once and no more, and pray three times daily, and after each prayer recite the following Blessing:—

"'Blessed art thou, O Lord our God, King of the Universe, who openest the gates of the East and cleavest the windows of the firmament of the Orient, and givest light to the whole world and its inhabitants, with the multitude of His mercies, with His mysteries and secrets, and teachest Thy people Israel Thy secrets and mysteries, and hast revealed unto them the "Sword" used by the world; and Thou sayest unto them: "If anyone is desirous of using this 'Sword,' by which every wish is fulfilled and every secret revealed, and every miracle, marvel, and prodigy are performed, then speak to Me in the following manner, read before Me this

Digitized by Google

and that, and conjure in such and such a wise, and I will instantly be prevailed upon and be well disposed towards you, and I will give you authority over this Sword, by which to fulfil all that you desire, and the Chiefs will be prevailed upon by you, and my holy ones will be well disposed towards you and they will fulfil instantly your wishes, and will deliver to you my secrets and reveal to you my mysteries, and my words they will teach you and my wonders they will manifest to you, and they will listen and serve you as a pupil his master, and your eyes will be illuminated and your heart will see and behold all that is hidden, and your size will be increased." Unto Thee I call, X, Lord of the Universe. Thou art He who is called X, King of the Universe. Thou art called X, merciful king. Thou art called X, gracious king. Thou art called X, living king. Thou art called X, humble king. Thou art called X, righteous king. Thou art called X, lofty king. Thou art called X, perfect king. Thou art called X, upright king. Thou art called X, glorious king. Thou art called X, youthful king. Thou art called X, pleasant king. Thou art called X, and thou listenest to my prayer, for Thou hearkenest unto prayer; and attach unto me Thy servants the lords of the "Sword," for Thou art their king, and fulfil my desire, for everything is in Thy hands, as it is written: "Thou openest thine hand and satisfiest every living being with favour."

"'I conjure you, Azliel called X; I conjure you, Arel called X, Ta'aniel called X, Tafel called X, and the most glorious of these Yofiel Mittron called X, the glory from above. With the permission of my king (I conjure) Yadiel called X, Ra'asiel called X, Ḥaniel called X, Haniel called X, Asrael called X, Yisriel called X, A'shael called X, Amuhael called X, and Aṣrael called X, that you attach yourselves to me and surrender the "Sword" to me, so that I may use it according to my desire, and that I find shelter under the shadow of our Lord in heaven in the glorious Name, the mighty and awe-inspiring X, the twenty-four letters from the Crown; that you deliver unto me with this

Digitized by Google

"Sword" the secrets from above and below, the mysteries from above and below, and my wish be fulfilled and my words hearkened unto, and my prayer (supplication) received through the conjuration with the Ineffable name of God which is glorified in the world, through which all the heavenly hosts are tied and bound; and this is the Ineffable Name—X, blessed be he! (I conjure you) that you shall not refuse me nor hurt me, nor frighten and alarm me, in the tremendous Name of your king, the terror of whom rests upon you, and who is called X. Fulfil for me everything that I have been conjuring you for, and serve me, for I have conjured you not with the name of one who is great among you but with that of the Lord over all, whose name ties and binds and keeps and fastens all the heavenly hosts. And if you should refuse me, I will hand you over to the Lord God and to his Ineffable name, whose wrath and anger and fire are kindled, who honours his creatures with one letter of his name, and is called X; so that if you refuse he will destroy you, and you will not be found when searched after. And you preserve me from shortness of spirit and weakness of body in the name of X, the guardian of Israel. Blessed art Thou, who understandest the secrets and revealest the mysteries, and art king of the Universe.'"

A voice was heard in the heavens, the voice of the Lord of heavens, saying: "I want a light (swift) messenger (to go) to man, and if he fulfils my message my sons will become proud of the 'Sword' which I hand over to them, which is the head of all the mysteries of which also my seers have spoken, that thus will my word be, as it is said: 'Is not my word like as fire? saith the Lord'" (Jer. xxiii, 29). Thus spoke X, the lord of heaven and earth; and I, Assi Asisih and Apragsih, the light (swift) messenger, who am pleased with my messages and delighted with my sending, ascended before Him, and the Lord over all commanded me: "Go and make this known to men who are pious and good and pure and righteous and faithful, whose heart is not divided and in whose mouth is no duplicity, who do not lie with their tongues and do not deceive with

Digitized by Google

their lips, who do not grasp with their hands and are not lustful with their eyes, who do not run after evil, keep aloof from every uncleanness, depart from every defilement, keep themselves holy from contamination, and do not approach woman." When the Lord over all commanded me thus, I, X, the swift messenger, went down to earth, and I said on my way: "Where is the man who possesses all these that I should go to him and place this with him?" And I asked myself, and thought in my heart that there is no man who would do all this that I wished; and I found none, and it was heavy unto me. And the Lord over all conjured me by His mighty right arm, and by the lustre of His glory and His glorious crown, with an oath of His mighty right arm, and He conjured me, and the Lord over all strengthened me and I did not fall. I thus stood up, I, X, to put NN in the possession of the desired covenant, in the name of X."

"This is the great and glorious Name which has been given as a tradition to man—X, holy, glorious, glorious, Selah. Recite it after thy prayers.—And these are the names of the angels that minister to the son of man—Mittron, Sgrdtsih, Mqttro, Sngotiqtel, etc., etc., etc. (28 names)." "In a similar manner shall you serve me NN; and receive my prayer and my orisons, and bring them to God X, blessed be He! for I adjure you in His name, and I extol you (to ascend), like unto the bird that flies from its nest, and remember my meritorious deeds before Him and (make Him) forgive now my sins on account of my words of supplication, and you may not refuse me in the name of X, blessed be He! Sabaoth, Sabaoth, Selah. His servants sanctify Him and praise Him with sweet melody, and say: "Holy, holy, holy is the Lord of holy name; the whole earth is full of His glory"; and do not refuse me, in the name of X, who lives for ever, and in the name of Ditimon, etc., X, and in the name X of the great One from whom nothing is hidden, who sees and is not seen, and in the name of Him who is the chief over the heavens and is called X. And the King of the

Digitized by Google

Universe utters (this name) also in a different manner, thus—X. You swift messenger, do not tarry and do not frighten me, but come and do all my wants in the name of X, the great One, who sees and is not seen, AHVH, whose Ineffable Name is revealed to the heavenly hosts; and I conjure you by this Ineffable Name, such as it was revealed to Moses by the mouth of the Lord over all, X, the Lord Sabaoth is His name. Blessed art thou, O God, lord of mighty acts, who knowest all the mysteries."

And which are the letters which X communicated to Moses? He said to him: "If thou wishest to get wise and to use the 'Sword,' call me, and conjure me, and strengthen me, and fortify me, and say: 'X, with the great, holy, wonderful, pure, precious, glorious, and awe-inspiring secret Name X, with these letters I conjure thee to surrender to me and make me wise and attach to me the angels which minister to the "Sword," in the name of the Revealer of mysteries. Amen.'"

Write with ink on leather and carry about with you during those three days of purification, and invoke before and after prayer the following Names communicated to Moses by Mrgiiel, X, by Trotrosi, X, etc. (the 13 Chiefs mentioned at the beginning, and a long string of other mysterious names which are said to have been communicated to Moses). "And they have not hidden from him any of these sacred Ineffable names or letters, and have not given him instead the Substitutes of any of these sacred letters, for thus were they ordered by the Lord of all mysteries to communicate to him this 'Sword,' with these Names which constitute the mysteries of this 'Sword'; and they said to him: 'Command the generations which will come after thee to say the following blessing prior to their prayer, lest they be swept away by the fire': 'Blessed art Thou, X, who wast with Moses; be also with me, Thou, whose name is X. Send me X, who is the cover of the Cherubim, to help me. Blessed art Thou, Lord of the Sword.'"

Whoever is desirous of using this 'Sword' must recite his

Digitized by Google

usual prayers, and at the passage "Thou hearkenest to prayer" say: "I conjure you four princes, X, servants of Hadirion, X, that you receive my invocation before I pray, and my supplication before I entreat, and fulfil all my wishes through this 'Sword,' as you have done to Moses, in the glorious and wonderful name of the Lord of wonders, which is interpreted thus—X." He must then call the five superior Chiefs and say: "I conjure you, X, that you accept my conjuration as soon as I conjure you, and you attach to me those four princes and all the hosts of Chariots over which you preside, to fulfil all my wishes through this 'Sword' by this beloved name X." He must then call the three angels that are superior to these, and say: "I conjure you, X, the beloved of X, who is Hadiririon, that you attach yourselves to me and attach to me X, who are standing under your rule, to fulfil all my wishes through this 'Sword' by this unique name X." And then he must lay hold of the highest Chief over all and say: "I conjure thee, X, strong and powerful Chief over all the heavenly hosts, that thou attachest thyself to me, thou and not thy messenger, and attach to me all the Chiefs that are with thee, to fulfil my wishes through this 'Sword,' by the name X, which has no substitute, for thou art beloved and he is beloved, and I am from the seed of Abraham called the beloved. Blessed art thou, King of the mysteries, Lord of the secrets, who hearkenest unto prayer."

And he is not to touch this "Sword" ere he has done all these things; afterwards he will be able to do whatever he likes, everything being written here following in its proper order.

II. *This is the "Sword."*

[It consists of a series of mysterious names of God or angels, to which the recipes in Part III refer. The first list commences with Tobat, Tsbr, etc. (1–5). These numbers are added by me to make the formulas run parallel with their magical applications in Part III, as already explained in the Introduction. I refer to them as they break up this

Digitized by Google

part in convenient smaller portions, and are easily discernible. After these follow the words]: "With these your Names, and with the powers you possess, to which there is nowhere anything like (I conjure you) to show me and to search for me, and to bring me X to do all my bidding in the name of X," and, again, a list of names, that have no special characteristic in common. Nos. 20–24 are all names commencing with *JJ*; some of these finish with *JH*. 24–36 all these names have the word *Sabaoth* attached to them. To 41–47 *HVH* is added. From Nos. 51–93 all the names are composite; they appear as names of *sons*, the name of the father being added to each of these, close upon 160 names, *e.g.*: Ssgnis, son of Srngia; Ssgn, son of 'Arggis; Atumi, son of Batumi; Ahsuti, son of Kkthus; Agupi, son of Abkmi, etc. Every name from 102 on to the end of this part finishes with *-el*, after which follow varying syllables and words: some are only *JH* or *JV* (Nos. 102–105), or a word commencing with *'A-* and finishing with *-JH* (Nos. 106–111). Nos. 112–121 are followed by AHVH, whilst 122–127=JHVHH, and Nos. 128–134= HVJH. They conclude with the following words: "Ye sacred angels, princes of the hosts of X, who stand upon the thrones prepared for them before Him to watch over and to minister to the 'Sword,' to fulfil by it all the wants by the name of the Master over all; you Chiefs of all the angels in the world, X, in the name of X the seal of heaven and earth, ministers of X the most high God; through you I see X in the world; you are lording over me in all the place of the Master over all: I pray of you to do everything that I am asking of you, as you have the power to do everything in heaven and upon earth in the name of X, as it is written in the Law, 'I am the Lord, this is My name!'"

III.

1. If at full moon (?) a man wishes to unite a woman with a man that they should be as one to one another,

Digitized by Google

to destroy winds (spirits), demons, and satans, and to stop a ship, and to free a man from prison, and for every other thing, write on a red bowl from Tobar, etc. (No. 1).—2. To break mountains and hills, to pass dryshod through the water, to enter the fire, to appoint and to depose kings, to blind the eyes, to stop the mouth, and to speak to the dead, and to kill the living, to bring down and to send up and to conjure angels to hearken unto thee, and to see all the mysteries of the world, write Nos. 1 and 2 upon the saucer of a cup and put in it the root of genip-tree (*genipa*). —3. Against a spirit that moves in the body write on a plate No. 3.—4. Against a spirit that burns write No. 4. —5. Against a spirit in the whole body write No. 5.—6. Against a demon (*shidda*) write No. 6.—7. Against shingles write No. 7.—8. Against quinsy (erysipelas ?) say the words of No. 8 over oil of roses and put it over his face.—9. For pains in the ear whisper in the painful ear No. 9.—10. For aches in the eye say the words No. 10 over water three days running in the morning, and wash the eye with it.—11. For cataract say the words of No. 11 over oil of sesame, and anoint the eye with it during seven mornings. —12. For grit in the eye say over Ḳohl No. 12, and fill the eye with it for three mornings.—13. For blood that runs from the head whisper No. 13 over the head early in the morning for three days, when you wash your hands before getting out of bed.—14. For paralysis say seven times over a vessel full of water and seven times over sesame-oil the words No. 14, "that it should move away and leave NN, Amen, Amen, Selah"; and throw the pail of water over his head and anoint him with the oil, and do this for three days; then write an amulet with the words from, "I conjure you" till "Amen, Selah," and hang it round his neck. —15. For pains in one half of the head (neuralgia?) and for bad singing in the ear, write No. 15 and hang it round the neck.—16. For the bad deafening (of the ear) write No. 16 and hang it round the neck.—17. For pains in the ear say into the left ear the words No. 17 backwards.—18. For deafness say over hemp water, whilst mixing it

Digitized by Google

with oil of "Idi" (sesame?), the words of No. 18, and put it into his ear as soon as it has become a little dissolved (or warm).—19. For scabs, ulcers, itches, mange, shingles, etc., that befall mankind, say over olive oil No. 19 and anoint with the left hand.—20. For jaundice say the words No. 20 over water in which radish has been soaked, and let him drink it.—21. For pains in the nose and for the spirit in the nose say No. 21 over oil of "Idi" (sesame?) and put it into his nostrils.—22. For pains in the stomach (*lit.* heart) and in the bowels say No. 22 over water, and drink it.—23. For hot fever say No. 23 over water in which rose-laurels are soaked, and he is to bathe in it.—24. For tumors, etc., say No. 24 once over them and once over olive oil, and anoint them for three days, but do not let any water come near them—25. For an evil occurrence (?) say No. 25 over seven white cups of water, filled from the river, and throw them over the head.—26. For ulcer (diphtheria?) spit out before him, and say over his mouth, and over a cup of strong drink, No. 26, and make him drink, and watch what is coming out of his mouth.—27. For a man bitten by a snake or by another (!) poisonous insect, he must say over the place of the bite or over the painful spot No. 27 and drink it; the same he is to do whenever hurt by any creeping thing.—28. For a woman who has seen blood before the time say No. 28 over an ostrich egg, then burn it, and she be smoked with it.—29. For pains in the mouth say No. 29 over risen flour, and put it upon his mouth.—30. For quinsy (croup) and for pains in the shoulder, say No. 30 over wine and drink.—31. For a painful nerve write No. 31 on a scroll and speak these words over olive oil, and rub some of it on the scroll and smear it over the painful spot and hang the amulet round his neck.—32. For stone say over a cup of wine No. 32, and drink it.—33. For hemorrhoids take tow and put salt on it and mix it with oil, saying over it No. 33, and sit on it.—34. For a man who suffers from swelling and from venereal disease (?), he is to say No. 34 over water in which radishes are soaked, and drink.—35. For sprains, either

Digitized by Google

you take a plate and write upon it No. 35 and put it upon the place, and all around it will be healed; or you take a ball of wool and dip it in oil of (sesame?), and say those words upon it and put it upon the sprain.—36. When injured or hurt by iron, and for every blow that it should not fester, say No. 36 over white naphtha and rub it over the place of the blow.—37. For (cramps?) and for pains of heart say over spinach and oil No. 37, and drink it.—38. For the gall and the bowels take the water in which raisins have been soaked, saying over it No. 38, and drink it.—39. For the spoiled liver take (a drink) a sixth measure of water-lentils and say No. 39, and swallow it slowly (?).—40. For the milt say No. 40 over wine-lees and drink it, and repeat it for three days.—41. For the spirit who rests on the womb, say No. 41 on camphor oil and put it on it with a ball of wool.—42. For a woman who has a miscarriage, say No. 42 on a cup of wine, or strong drink, or water, and let her drink it for seven days; and even if she should see blood and she repeats it over a cup of wine, the child will live.—43. For a man who is bald, say No. 43 over nut-oil and anoint with it.—44. To conjure a spirit write on a laurel-leaf: "I conjure thee, prince whose name is Abraksas, in the name of (No. 44) that thou comest to me and revealest to me all that I ask of thee, and thou shalt not tarry." And the one bound by thee will come down and reveal himself to thee.—45. To remove a rich man from his riches, say No. 45 upon the dust of an ant-hill and throw it into his face.—46. To heal leprosy, take the patient to the side of the river and say to him: "I conjure thee, leprosy, in the name of (No. 46) to disappear and to vanish, and to pass away from NN. Amen, Amen, Selah"; and he is to go down and dip seven times in the river, and when he comes out write an amulet with the words "I conjure—Selah," and hang it round his neck.—47. For diarrhœa write No. 47 on a red copper plate and hang it round his neck.—48. If thou wishest that the rain should not fall upon thy garden, write out No. 48.—49. If thou wishest to see the sun (!) take . . . from a male tree and stand in front of the sun and say . . . which art called

Digitized by Google

on the . . called . . . and the ears of barley (?) the words of No. 49;[1] and he will appear unto thee in the form of a man dressed in white and he will answer thee upon everything that thou askest him, and he will even bring a woman after thee.—50. Whosoever wishes to enter a furnace is to write No. 50 on a silver plate and hang it upon his haunch.—51. If thou seest a king or a ruler and thou wishest that he follow thee, take a basin of water and put into it the root of genip-tree, and the root of purslane, and the root of (*Artilochia*), and say No. 51, and place it on fiery coals in a white earthen vessel and throw upon them leaves of olive-tree, and whatever thou decreest he will bring unto thee, even a woman thou canst command. —52. If you wish to overawe them, take water from the fountain and say upon it No. 52 and throw it into their faces. —53. For loosening (any charm) say over water No. 53 and throw it over him and write it as an amulet and hang it round his neck, and also for freeing a man from prison.— 54. To catch fish, take a white potsherd, and putting into it leaves of olive-tree say over them No. 54 at the side of the river.—55. If thou wishest a woman to follow thee, take thy blood and write her name upon a newly-laid egg and say towards her No. 55.—56. If a man is to follow thee, take a new potsherd and dip it in black myrrh (gall) and pronounce over his name the words of No. 56, and walk on without looking backwards.—57. For a tree that does not produce fruits, write the words No. 57 upon a new potsherd and bury it under the root of the fruitless tree, and water all the trees and these also which do not produce the fruit.—58. For illness (dog) in the fruit write on a new potsherd No. 58 and bury it in the cistern (watering-place), and say these words also over water, ashes, and salt, and water the earth with it.—59. For a suckling babe write on an onyx slab No. 59 and whisper it into its ears three times, spitting out after the whispering; then repeat them over a cupful of water 70 times and give it the child to drink.—60. For one bitten by a rabid dog,

[1] There is something probably missing here.

Digitized by Google

write No. 60 on the halter of an ass and let the ass go; then repeat these words over sesame oil and let him anoint himself with it and put on new clothes and hang that halter (?) round him.—61. For fever and small fever, write on the skin of the brains of a ram or a goat No. 61, and hang it round his neck.—62. If anyone lose his way he is to say No. 62 over the four corners of his belt (?).—63. If thou wishest to ask anything of thy neighbour, say No. 63 over oil of sesame or of . . . or of . . . —64. If thou wishest that a woman is to follow thee write thy name and her name with thy blood upon her door, and the same upon thy door, and repeat the words of No. 64.—65. If thou wishest to know whether thy journey will be lucky, take a field lettuce with open leaves, and standing before the sun say the words of No. 65 and watch the lettuce: if the leaves close and shut, then do not go; but if they remain in their natural state, proceed, and thou wilt prosper.—66. If thou wishest to deliver a man from prison (?) say No. 66 once to him, and once to the sun, and once to the prison (?) house.—67. To conquer (collect ?), take dust from thy house and say over it seven times in the road of the town the words of No. 67, and then take dust from the road and do likewise and throw it into thy house.—68. If you wish to kill a man, take mud from the two sides of the river and form it into the shape of a figure, and write upon it the name of the person, and take seven branches from seven strong palm-trees and make a bow from reed (?) with the string of horse-sinew, and place the image in a hollow, and stretch the bow and shoot with it, and at each branch (shot) say the words of No. 68; and may NN be destroyed . . .—69. To send plagues, take (parings ?) from seven men and put them into a new potsherd, and go out to the cemetery and say there No. 69, and bury it in a place that is not trodden by horses, and afterwards take the dust from this potsherd and blow it into his face or upon the lintel of his house.—70. To send dreams to your neighbours, write No. 70 upon a plate of silver and place it in the mouth (?) of a cock and kill it when it has gone

Digitized by Google

down its mouth, and take it out from the mouth and put it between its legs and bury it at the end of a wall, and put thy foot upon that spot and say thus: "In the name of X, a swift messenger is to go and torment NN in his dreams until he will fulfil my wish."—71. If a snake follows thee say No. 71, and it will dry up.—72. To stop a boat in the sea, say No. 72 over a potsherd or on a rounded flintstone and throw it against it into the sea. —73. To loosen it (from the charm), say No. 73 over dust or a clod of earth and throw it into the water, and as this dissolves the boat gets free to go.—74. If thou wishest to prevent an oven or furnace or pot from becoming destroyed (unclean ?), say No. 74 over dust and throw it over them.— 75. If thou wishest them to be hot, spit in front of them and say No. 75, and they will boil.—76. If thou wishest to pass dryshod through the sea, say upon the four corners of the head-dress (turban) No. 76, and take one corner in thy hand and the other is (?) to precede thee.—77. If thou wishest to curse anyone, say in the 'Eighteen benedictions' No. 77, in the name of X.—78. To speak with the dead, whisper No. 71 into his left ear and throw into their holes (?).—79. To kill a lion, bear, an adder, or any other hurtful animal, take the dust from under the right foot, say over it No. 79, and throw it into their faces.—80. To catch them, take the dust from under your left foot, saying No. 80, and throw it into their faces.— 81. To open a door, take the root of lotos reed and place it under the tongue and say No. 81 against the door.— 82. To kill an ox or another beast, say into its ear No. 82.—83. To inflame his heart, say No. 83 over a piece of raw meat, and give it to him to eat.—84. To make a fool of one, say No. 84 over an egg and place it in his hands.—85. To destroy the house of thy neighbour, say No. 85 over a new potsherd and throw it into his house. —86. To expose (?) your neighbour, say No. 86 over oil of . . . and smear it at the bottom of his jug (?).—87. To make your neighbour disliked, take blood from phlebotomy, say upon it No. 87, and throw it upon his lintel.—88. To

Digitized by Google

make a woman have a miscarriage, say No. 88 over a cup of water and throw it over her lintel.—89. To make a man ill, say No. 89 over olive oil and let him anoint himself with it.—90. To know whether a sick person will die or live, say before him No. 90: if he turns his face towards you he will live; if away, he will die.—91. To catch a lion by the ear, say No. 91 and make seven knots in the fringes of thy girdle and repeat these words with each knot, and you will catch him.—92. To make thy renown go throughout the world, write No. 92 as an amulet and bury it in thy house.—93. To shorten the way, say No. 93 over a single lotos reed.—94. To cure hemorrhoids, take kernels of dates . . . and burn them in fire and say No. 94, and mix it with oil of olives and place it as an amulet over it, and it will be good.—95. For every spirit write upon a bowl No. 95 and hang it round the neck.—96. For subtle poison, as cumin-seed and calamint, write No. 96 upon an egg and put it into wine, and repeat over it the same words and then drink it.—97. For the thunder that comes from heaven, take a ring (round piece) of iron and lead, and hang it on the spot you wish (to protect), and say over it No. 97.—98. To go before king or lord, say No. 98 over a piece of lion's skin dipped in black hemp (?) and pure wine, and take it with thee.—99. For blight, if it happen, take a sinew and soak it in turnip-juice in the night from Wednesday to Thursday, and say No. 99 over it; on the morrow sprinkle that water over the field.—100. If the fruit gets worm-eaten, take a worm from the mud and put it into a tube and say No. 100 over it; then close the tube and bury it in that place.—101. To free a man from prison (? shame), say over the grounds of Kappa (?) and unripe dates No. 101, and give it to him to eat.—102. For a field that does not produce fruits, take eight cups from eight houses and fill them with water from eight rivers, and put salt into them from eight houses, and say over them No. 102 eight times, and pour out two cups at each corner, and break them on eight paths.—103. If one does not know what a man is ailing

Digitized by Google

from, soak mullein (*verbascum*) in water, and say over it No. 103, and let him drink it when he is thirsty.—104. To make war, take the dust from under the left foot, say over it No. 104, and throw it into the (enemies') face, and there will appear knights with weapons in their hands who will fight for thee.—105. To throw thy fear upon mankind, write No. 105 upon a leaden plate and bury it on the west side of the Synagogue.—106. To have always light in the darkness, write No. 106 upon a chart (paper) and carry it always with thee.—107. To catch (blind) the eye, write No. 107 upon a scroll and expose it in a wicker-basket to the stars, but you must not speak when writing.—108. To send a sword which should fight for thee, say No. 108 over a new knife wholly of iron, and throw it into their face.—109. If thou wishest that they kill one another, say No. 109 over a new knife wholly of iron and bury it with your heel into the earth, and keep the heel upon it in the earth, and they will kill one another, until you take it out from the earth.—110. To make them pause, take the dust from under the right foot, and, saying the same words again backwards, throw it into their face, and they will stop.—111. If an enemy has got hold of thee and wishes to kill thee, bend the little finger of the left hand and say No. 111, and he will run away from thee like one who runs away from his murderer.—112. To catch the eye (blind), say No. 112 over the skin of a lion and carry it with thee, and no one will be able to see thee.—113. If thou fallest into a (?) and wishest to come out, say No. 113, and thou wilt come out in peace.—114. If thou fallest into a deep pit, say in thy fall No. 114, and nothing will hurt thee.—115. When thou fallest into a deep river say No. 115, and thou wilt come out in peace.—116. If any burden or weight falls upon thee, say No. 116, and thou wilt be saved.—117. If the king's servants lay hold on thee, bend the little finger of the left hand and say No. 117 before king or judge, and he will kill these people who have laid hands on thee.—118. If a host has surrounded thee, turn thy face towards the west and say

Digitized by Google

No. 118 before king or judge, and they will be like unto stones and will not move.—119. If thou wishest to release them, turn thy face towards the east and repeat these words backwards.—120. If thou walkest in vales or on the mountains and hast no water to drink, lift thine eyes to Heaven and say No. 120, and a fountain of water will be opened unto thee.—121. If thou hungerest, lift thine eyes to Heaven and spread out thine arms and say No. 121, and a spirit will stand before thee and bring thee bread and meat.—122. If thou wishest to call the angel (prince) of man, say over thy mantle (?) No. 122, and the angel bound by thee will come to thee and will tell thee whatever thou wishest (to know).—123. If thou wishest to let him go (depart), say before him the same words backward, and he will depart.—124. If thou wishest that any heavenly prince is to come to thee and teach thee, say No. 124 and conjure him in the third hour of the night from: "in the name of the Lord over the holy ones (No. 136) to the end of the 'Sword,'" and "Send him to me that he reveal unto me and teach me all that is in his power," and he will then disappear (!).—125. To walk upon the water without wetting the feet, take a leaden plate and write upon it No. 125 and place it in thy girdle, and then you can walk.—126. To become wise, remember for three months running, from the new moon of Nissan onwards, the words of No. 126, and add in the 'Eighteen benedictions': "May the gates of wisdom be opened to me so that I should meditate in them."—127. To remember immediately all thou learnest, write on a new-laid egg No. 127, then wash it off with strong wine early in the morning and drink it, and do not eat anything for three hours.—128. To make another forget what he has learned, write No. 128 in his name on laurel-leaves and bury them under his lintel.—129. To send an evil spirit against thy neighbour, take a green grasshopper and say over it No. 129, and bury it in an earth-hill and jump over it.—130. To send a plague, take the bone of a dead man and dust from under him in a pot and tie it up in a woven rag with saliva, and say upon it

Digitized by Google

No. 130 in his name, and bury it in the cemetery.—131. To tie and to fasten thiefs and robbers, say No. 131, and whilst saying it put your little finger in the ear —132. To release them, say No. 132, and take thy finger out of the ear.—133. To guard thy house from thieves, say No. 133 over a cup of water and pour it out round thy roof. Thus also to guard a house.—134. To guard a house from hosts (robbers), take earth from an ant-hill and strew it round the roof, repeating the words of No. 134.—135. To guard thyself from Mazikim, say: "In the name of 'Nos. 1–5' may I, NN, pass in peace and not in hurt." The same must be done to excommunicate them when you meet them.—136. For every other thing that has not been mentioned say, No. 136 to the end of the "Sword."

And upon every amulet that you write from this "Sword" write first: "In the name of the Lord of all the holy ones, may this 'Sword' be effectual to do my services, and may the lord of it approach to serve me, and may all these powers be delivered over to me so that I be able to use them, as they were delivered to Moses, the son of Amram, perfect from his God and no harm befalling him!" If he will not act accordingly the angels of wrath, ire, fury, and rage will come near him to minister to him, and they will lord over him, and strangle him, and plague him all over. And these are the names of their leaders: the leader of the angels of wrath is Mzpopiasaiel; the name of the leader of the angels of ire is Zkzoromtiel; the name of the leader of the angels of fury is Kso'ppghiel; the name of the leader of the angels of rage is N'mosnikttiel. And the angels that stand under them are numberless, and these all will have power over him, and will make his body like unto a dunghill.

May the Lord preserve you from every evil. Amen!

End of the "Sword," with the assistance of God feared in the council of the holy ones. End, end.

APPENDIX I.

In the name of the Lord. The Sword of Moses.

I. [A long list of mystical names; then follows:] and the angel over the animals, whose name is Ittalainma; and the angel over the wild beasts, Mtniel; and the angel over the wild fowls and over the creeping things, Trgiaob; and the angel over the deep waters and over the mountains, Rampel; and the angel over the trees, Maktiel; and the angel over the sweet-smelling herbs, Arias; and the angel over the garden fruits (vegetables), Sofiel; and the angel over the rivers, Trsiel; and the angel over the winds, Mbriel; and over man, X.—. . . hours are proper for man to pray and to ask for mercy upon man, be it for good or evil; and it is said that every hour is proper for man to pray, but during the three first hours in the morning man is to pray and to mention the hundred sacred names and the mighty ones, whose sum amounts to three hundred and four. Amen. Selah!

. . . . . X give me healing . . . .

Which is the great light? All the . . . . X, I conjure you, mother of the (whether?) male and mother of the (or?) female, you, the "Twins," I conjure you, the hard (strong) spirits, in the name of God, the mighty hero, the living one [Michael], in the name of God [Gabriel], . . Raphael (save) me from the Lions, the powerful ones (Archons?), and the Twins. I conjure you, strong spirits, in the name of God, the mighty hero, IH, IHVH, IHVH, I, N, son of N . .

II. Verily, this is the ("Sword of Moses") with which he accomplished his miracles and mighty deeds, and destroyed all kind of witchcraft; it had been revealed to Moses in the bush, when the great and glorious Name was delivered to him. Take care of it and it will take care of thee. If thou approachest fire, it will not burn thee, and it will preserve thee from every evil in the world.—1. If thou wishest to try it take a thick (green) branch and

Digitized by Google

utter this "Sword" over it five times at sunrise, and it will dry up.—2. To catch fish, take sand from the sea and the root of the date (tree) (or the kernel of the date), and repeat this "Sword" over them, and the fish will come to the spot where thou throwest the sand.—3. To walk on the waters of the sea take the wooden helve of an axe, bore a hole through it, pass a red thread through it, and tie it on to thy heel, then repeat the words of the "Sword," and then you may go in and out in peace.—4. To run quickly (?), write the "Sword" on "Chartis hieratikon," then put water into a new earthenware pot, and let them drink it and wash their faces, and they will be victorious!—5. To break it (?), write the "Sword" on a plate of copper (*kyprinon*) and put it in . . and they will be broken.—6. To subdue a woman, write with the blood of thy hand thy (?) name upon thy gate, and write thy name upon a scroll of leather of a hart with the blood of thy finger, and say this "Sword," and she will come to thee.—7. To make thyself praised in the community, take in thy left hand porret-seed and utter over it the "Sword," and throw it between them,[1] and descend (?) until the sun sets, and he will carry thee wherever thou wishest, and fast for three days, and burn incense and the smoke of white flower, and repeat the "Sword" in the morning and the evening, and he will come instantly and speak to thee and do thy bidding.—8. To get information through a dream, take balm and write upon "Chartis hieratikon," and repeat the "Sword" in front of a light, and put out the light with a stick of olive-wood, and lie down.—9. If thou wishest to go to a great man, take rose-oil and repeat the "Sword" over the oil and anoint thy hands and face with it, and he will hearken unto thee.—10. To make strife in the community, take the left hand full of mustard, speak the "Sword" over it, and throw it amongst them, and they will kill one another.—11. To separate a man from his wife, take ass's meat in thy hand and say over it the "Sword," and no harm will befall thee (?).—12. To destroy

[1] There is something probably missing here.

Digitized by Google

thy enemy, take a leaden plate and some of his hair and clothes, and say the "Sword" over them, and bury them in a deserted house, and he will fall down.—13. To walk in the street and not to be recognized by anyone, take wormwood, perfumes, and soot, and smoke thyself with it, and take the heart of a fox, and say the "Sword," and go out in the street.—14. If you are on the sea and the storm rages, stand up against the waves and say the "Sword" to them, and they will go down; then write on a plate, or potsherd, or a piece of wood, and hang it in front of the ship, and it will not founder.—15. To break an enemy, write the "Sword" upon a potsherd that has not yet been burned, and plaster it over, and throw it into his house.—16. To obtain anything thou likest, take into thy right hand wormwood, and say over it the "Sword" facing the sun, and everything will be fulfilled, and purify thyself for seven days, and thou wilt prosper in everything. Do kind deeds to thy friends, take heed not to take an oath, and walk modestly, and thus thou wilt prosper.

Write X upon the palm of thy left hand, take then a new lamp and fill it with olive-oil and naphtha, and put on new clean clothes, and sleep in a clean house, and the angel will come at once and wake thee, and reveal unto thee everything that thou wishest.

III. R. Akiba asked R. Eliezer the great: "How can one make the Angel of the Presence descend upon earth to reveal to man the mysteries from above and beneath, and the speculations of the foundations of heavenly and earthly things, and the treasures of wisdom, cunning, and help?" He said thereupon to me: "My son! I once made him come down, and he nearly destroyed the whole world, for he is a mighty prince and greater than any in the heavenly cohort, and he ministers continually before the King of the Universe, with purity and separation, and with fear and dread of the glory of his Master, because the Shekinah is always with him." And he said to him: "My master, by the glory which thou hast bestowed upon me, I conjure thee to instruct me how to attach him to me." (And he

Digitized by Google

replied): "In that hour when I wish to attach him to me and to employ him, I sit and fast on that very day; but prior to it one must keep oneself free for seven days from any nocturnal impurity, and must bathe in the fountain of water, and not speak at all during those seven days, and at the end of this purification, on the day of the fast, he must sit in the water up to his throat, and before he utters the conjuration he must first say: 'I conjure you, angels of dread, fear, and shaking, who are appointed to hurt those who are not pure and clean and desire the services of my heavenly servants—I conjure you in the name of X, who is mighty over all, and rules over all, and everything is in His hands, that you do not hurt me, nor terrify me, nor frighten me; verily, in the name of the powerful, the head of . . . ' After this he may commence his conjuration, for now he has fortified himself and has sealed himself with the name of God of 42 letters, before which all who hear it tremble and are frightened, and the heavenly hosts are terror-struck. He must then again conjure, and say: 'X, chief, who of all the destroying angels is the most hurtful and burning, with this Name and in this way I call thee AVZHIA, angel of the Presence, youthful minister before the King of the Universe, who art a prince and chief of the heavenly hosts; I conjure thee and decree upon thee that thou attachest thyself to me to fulfil my wish and to accept the decree of my conjuration and to accomplish my desires and fulfil my wishes, and do not frighten me, nor terrify me, nor overawe me, and do not make my frame shake and my feet vacillate, nor cause my speech to be perverted; but may I be fortified and strengthened, and may the conjuration be effective and the (sacred) Name uttered properly by my throat, and may no vacillation take hold of me and no trembling of the feet by thy ministering angels confuse me and overawe me, and weaken my hands, and may I not be overcome by the fire and flame of the storm and whirlwind which precedes thee, O wonderful and exalted one, whose Ineffable name is X, of whose wrath the earth trembles, and nothing can

Digitized by Google

withstand his anger, twice blessed. Again I conjure thee by thy 14 (!) names by which thou didst reveal thyself to thy prophets and seers, to place in their mouths sweet words of prophecy and to utter pleasant words; and these are the Ineffable names and their surnames (Kunya): Spirit Piskonnit, kunya, X; Atimon, kunya, X; Piskon (?), Hugron, kunya, X; Sanigron, kunya, X; Msi, kunya, X; Mokon, kunya, X; Astm, kunya, X; Sktm, kunya, X; Ihoaiel, kunya, X; Iofiel, kunya, X; Ssnialiah, kunya, X; Kngieliah, kunya, X; Zabdiel, kunya, X. I conjure thee with these fourteen names, by which all the secrets and mysteries and signs are sealed and accomplished, and which are the foundations of heaven and earth. Four of these are engraved upon the heads of the Ḥayoth (Holy Creatures), namely—X, the lord of powers; X, master of miracles; X, master of purity; and X, master of the yoke. And four are engraved upon the four sides of the Throne, namely—X, three times holy; X, Adir, Adiri, Adiron, etc., the king of kings. And four are engraved upon the four crowns of the Ofanim (wheels) that stand against the Holy Creatures, as it is said: "When those went, these went; and when those stood, these stood" (Ezek. i, 21); and these they are —X, who is the mightiest over all; X, who rules over all the inhabitants of the heights (?), and in whose hands everything is. And two are engraved upon the crown of the most exalted and high King, and these they are—X, before whom every knee bends and every mouth utters praises; X, besides him there is no God and helper. With these names I conjure thee, and firmly decree upon thee to descend quickly to me, N, son of N, thou and not thy messenger. And when thou comest down do not turn my mind, but reveal unto me all the secret mysteries from above and beneath, and the hidden secrets from above and beneath, and all the secrets of wisdom and the cunning of helpfulness, just as a man speaks to his neighbour. For I have conjured thee with these Names, that are great and mighty and wonderful and awe-inspiring, and proved and arranged in proper order, through which the glorious

Digitized by Google

throne has been established and the beautiful seat of the Most High, which has been wonderfully wrought, long before thou and the heavenly hosts had been created, "While as yet He had not made the earth nor the fields, and the inhabitants of the earth and the creatures therein" (Prov. viii, 26).

"'I call thee further by (the power) of the five selected Names, to which only one is superior, and this is their form—X. I conjure thee by these five Names, which correspond to the five names of God, whose letters are written on burning fire, and they circle round the throne of glory, one ascending and the other descending, so that the angels of the Presence should not behold them, and this is their equivalent and form and glory—X. I conjure thee by these, as thou knowest their praise and greatness, which no mouth can utter, and no ear can hear, no, not even one of them. Thou hast been commanded and ordered by the Most High: "as soon as thou hearest anyone conjuring thee with these names, to do honour to My Name, and to descend quickly and fulfil the wish of the man who makes thee hear them; but if thou tarriest I will push thee into the fiery river Rigayon and place another in thy stead." Do it, therefore, for His Name, and come quickly to me, N, son of N, not in a terror, and not in fear, not with fiery coals, not with hailstone, and not with the sleet and treasures of snow, and not with the howling of the storm, and not with the provinces of the whirlwind that usually accompany thee, and do my bidding and fulfil my desire, for everything is in thy hand; by the permission of thy God, the master over all and thy lord, and with His Names I conjure thee to attach thyself quickly to me; come and fulfil my wish, and do not tarry.

"'I further call thee with the greatest of thy Names, the pleasant and beloved one, which is the same as that of thy Master, save one letter, with which He created and formed everything, and which He placed as a seal upon all the work of His hand; and this is its equivalent—X, and the

Digitized by Google

other in the language of purity (permutations of the letters Yod, He) is read so—X. I conjure thee with the right hand of sanctity and with His beloved Name, in whose honour everything has been created, and all are terror-struck by His mighty arm, and all the sons of the internal heavenly cohort (servants) tremble and shake of His fear, which is X, and its equivalent by means of JHVH is X. Blessed be the name of His glorious kingdom for ever and ever. And all praise and extol thy Name, for they love thee. I conjure thee, and decree upon thee firmly, not to disobey my words, and not to alter my decree and my decision with which I conjured thee, and decreed upon thee, and established in peace. In the Name X, blessed be the name of His glorious kingdom for ever and ever, depart in peace, and do not frighten me in the hour of thy departure; in the name X, Lord, most high and holy, in the name of the Lord of Hosts, the God of Israel's battalions; in the name of the holy living Creatures, and in the name of the Wheels of the Chariot, and in the name of the river of fire, Ih, Zii, Ziin, and all His ministers, and in the name of IH, Ziin, Sabaoth, Z, El Z, Shaddai Z, X revealed Himself on Mount Sinai in the glory of His majesty.

"'With these Names, terrible and mighty, which darken the sun, and obscure the moon, and turn the sea, and break the rocks, and extinguish the light, I conjure you, spirits, and . . and Shiddim, and Satanim, that you depart and disappear from N, son of N.'"

APPENDIX II.

I. *Against an enemy.*—I call thee, evil spirit, cruel spirit, merciless spirit. I call thee, bad spirit, who sittest in the cemetery and takes away healing from man. Go and place a knot in NN's head, in his eyes, in his mouth, in his tongue, in his throat, in his windpipe; put poisonous water in his belly. If you do not go and put water in his belly, I will send against you the evil angels Puziel, Guziel,

Digitized by Google

Psdiel, Prziel. I call thee and those six knots that you go quickly to NN and put poisonous water in his belly and kill NN whom I mean (or, because I wish it). Amen, Amen. Selah.

II. *Against an enemy.*—Write upon a new-laid egg on a Nazarene cemetery: "I conjure you, luminaries of heaven and earth, as the heavens are separated from the earth, so separate and divide NN from his wife NN, and separate them from one another, as life is separated from death, and sea from dry land, and water from fire, and mountain from vale, and night from day, and light from darkness, and the sun from the moon; thus separate NN from NN his wife, and separate them from one another in the name of the twelve hours of the day and the three watches (?) of the night, and the seven days of the week, and the thirty days of the month, and the seven years of Shemittah, and the fifty years of Jubilee, on every day, in the name of the evil angel Tmsmael, and in the name of the angel Iabiel, and in the name of the angel Drsmiel, and in the name of the angel Zahbuk, and in the name of the angel Ataf, and in the name of the angel Zhsmael, and in the name of the angel Zsniel, who preside over pains, sharp pains, inflammation, and dropsy, and separate NN from his wife NN, make them depart from one another, and that they should not comfort one another, swiftly and quickly."

חדש וכסה אותו בו מעם שמן זית ומעט נפט ולבוש בגדים נקיים
ותישן בבית פהור ומיד בא מלאך ומעמיד לך ומגלה לך כל
מה שאתה מבקש.

III. שאל ר׳ עקיב׳ את ר׳ אליעזר הגדול במה משביעין את שר
הפנים לירד לארץ לגלות לאדם רזי מעלה ומטה ומחקרי יסודי מעלה
ומחקרי יסודי מטה ותעלומות חכמה וערמה תושיה · אמ׳ לי בני מעם
אחת הורדתי ובקש לשחת העולם כולו כי שר אדיר הוא מכל פמליא
של מעלה ותמיד עומד ומשרת לפני מלכו של עולם בנקיות פרישות
מהרה ואימה ויראה בכבוד קוניו(!) לפי ששכינה עמו בכל מקום · א״ל
ר׳ הריני מזקיק בו על אחת שבועה בהודי שהורתני · בשעה שאני
מזקיק עצמי להשתמש בו יושב אני בתענית יום אחד שהוא מורידו
וקודם לאותו היום יקדש את עצמו ז׳ ימים מן קרי ויהא צובע[1] באמת
המים ולא יהא מסיח סיחה ולתכלית ימי מהרתו ביום תענית ירד
וישב במים עד צוארו ויאמר קודם שישבע משביע אני עליכם שרי אימה
ויראה ורעד · שאתם ממונים לפנוע במי שאינו נקרה ומהור ונוגע
להשתמש במשרתי עליון בשם הנכבד והנורא הזה שנקרא קְתַת יְהֹ
הֹיֹה סַנְגֹ קְקְ [f. 64a] הֹוֹתַת הֹוֹ יְהֹ סַנְיֹקְקְ הֹוֹתַת הֹוֹ יְהֹ פַּפְנֹנֹה יְהֹ וֹהֹ
יְהֹ אַנְקְסְ יְהֹוֹה אדיר על הכל ומושל בכל והכל בידו שלא תזיקני ולא
תרעישני ולא תפחידוני באמת · גבורות גולה הרוץ " ואחד יפתח
וישבע כי נתחזק כי חתם עצמו בשם של מ״ב אותיות שמי שישמעו
יתבהלו ויפחדו וירעשו כל צבא מרום ויחזור וישביע אותם אֹדֹד גֹהֹוֹ
דֹהֹ וֹוֹ פְּצַץ יְהֹ שר שהוא פוגע ולוהם בכל מלאכי חבלה בשם הזה
בלשון הזה לך אני קורא אוהיא שר הפנים נער ומשרת לפני מלכו
של עולם שהוא שר ורב על צבא מרום משביע אני עליך ונזור אני
עליך שתוסיף לי להיזקק [רצוני] לרצוני ותקבל שבועת נזידתי ושאילתי
עשה ובקשתי תמלא ולא תבהליני ולא תרעידני ולא תחלחלני ולא
תזיע קומתי ולא ימעד קרסולי ולא תעזות דיבור שפתי ואתחזק ואתאמץ
והשבועה יתנבר והשם יסדר בגרוני ולא תאחזיני עות ולא תנידני רגל
משרתיך לבהלני וליראני לרפות ידי ולא אשמוף באש ולהבה בסופה
וסערה המהלכת עמך נפלא ונשגב שכך פירושו יוֹ הֹי גֹנֹ הֹוֹ הֹיֹה
עֹתְרֹנֹ הֹוֹוֹ יְהֹ מְמֹסְ יֹגֹנֹ הֹי הֹי שְׁמְסְ הֹי הֹוֹ הֹיֹה מקצה תרעש
הארץ ולא יכיל הכל ועמו ברוך מדבורך[2] " שוב אני קורא לך בי״ד
שמותיך שאתה נגלה להם לנביאים ותווים להמתיק דברי גביאות
[f. 64b] בפיהם ולהנעים אמרי נועם · וכך פירושם וכינויים רוח
פיסקוניות · וכינוי קְסְמְ נֹגֹי הֹוֹ הֹיֹה · מפורש אפשמן · כינוי צְצְמְסְ
גֹיֹהֹ הֹי הֹוֹה · מפורש פיסקון(!) מפורש הוגרון כינוי מְצְהוֹסְ הֹיוֹ גֹה

II. אמת הוא זה תרבו של משה שהיה עושה בו ניסים וגבורות
ויכלה כל[1] כשפים והיא נגלית למשה בסנה ונמסר לו השם הגדול
והמפואר ושמות[2] אותו באמת והוא שומר אותך · לאיתתא לא תגש
ולא תיכה והוא מצילך מכל צרה בעולם הזה · [3]ואם רצית לבדוק קח
עץ עבות ואמור התרב עליז ה' פעמי במעלה השמש ויבש · [4]ואם
תרצה לאותו דגים קח חול מן הים ועיקר תמרה ביד שמאל ואמור
התרב עליהן והן באין במקום שתשליך החול · [5]ואם רציתה להלך בים
קח עץ מפרזלא וקוב אותו ותרוז בו חום שני · וקשור אותו בעקבך
וכת' ואמ' התרב עליו ולך והכנם וצא בשלום · [6]ואם רצית להריץ
יפה כת' התרב בכרמים אי ארא מיקון · ותן יין בתרש החדש
וישתו וירחצו פניהם ונוצחין · [7]אם רצית לשבור אותו כת' תרב על
פס קפרינן וסמון בקמסון ומשתברין [6]להבאל(?) כת' מרם ידך על שערך
שמך[3] וכת' במגילת צבי בדם אצבעך בשמך ואמור התרב והיא באה ·
[7]ואם רצית לברך בקהל קח זרע כרישין ביד שמאל [f. 63a] ואמור
התרב ונזוק[4] בתוכם ורד עד שיבא השמש · ויטול אותך כרצונך וצום
ימים נ' · ועשן לבנה ופרח לבן ואמור התרב בבקר ובערב מיד יבא
וידבר עמך ויעשה כרצונך [8]ואם לשאילת חלום קח שמן אפיבלסמון
וכת' על קרמים[5] · אירישיקון והזכר התרב לפני הגר והכה את הגר
בשבט של זית וירבץ . [9]ואם רצונך לבא אצל אדם גדול קח שמן
וזרד ואמור תרב על השמשתן[6] על פניך וידיך וישמע לך · [10]ואם
רצית ליתן ריב בקהל קח תרדל מלא כפך השמאלית · ואמור התרב
ודזק וידרגו זה לזה · [11]ואם רציתה להפריש איש מאשה קח בשר
של חמר בניוך[7] ואמור התרב על שנייהן וראה[8] לא תקרוב ביניך ·
[12]ואם להפיל שנאך קח מס של עפרת וקח משערו ומבגדו וכת' התרב
ותן בבית התריבה וירביץ · [13]ואם רצית להלך בשוק ולא יכירך
אדם · קח ארמימסין ובשמים ופיה ועשן עצמך וקח לב שועל ואמור
התרב וצא · [14]ואם היית בים וקם סער עליך עמוד נבח הגלים ואמור
תרב והם נומשים · וכת' במם או בתרם או בעץ ותלי יתיה לפני
הספינה ולא תטבע · [15]ואם רצית לשבר שנאך כת' התרב על הרם
שלא נכנם לאור ושוח התרם והשלך בביתו · [16]ואם רצית לעשות
כל דבר כך בימינך ארישימום(!) ואמור תרב נוכח השמש ויעשה כל דבר
וישהר עצמך ימים [f. 63b] שבעה ותצלח בכל דבר ולתבירים עשה
מצות ושמר עצמך מכל שבועה והצנע לנמשך ובבן תצלח בכל אשר
תעשה " חזק " שעקע קמסרן " אותרן · אירפת נופיד נקשים נ' ·
סגבוני כתם כי בתי תימן אביץ · בת' על בף ידך שמאל והבא נר

[f. 1a] בשמיה דאלהא רבא וקדישא

I. ארבעה מלאכים הממונים על החרב הנתונה מפי [1] אה וה יה ה[2]
היה אדון הרזים וממונין על התורה והם רואים במחקרי רזי מפה ומעלה
ואלה שמותם שקד חוזי " מרניואל " והדרזיול[3] " סומריסי " ולמעלה
מהם תמשה שהם קדושים ועזיזים והסוברין כך מסתבר סתרי אהי הי
ידי בעולם שבע שעות ביום וממונים על אלף אלפי רבאות ואלף
מרכבות מזורזים לעשות רצון [קונם] " אהי הי היה " אדון האדונים
ואל אלהים נכבד " ואלה שמותם " מהיהונצי " פחדותתנם " אסקריהו "
שיתיניחום " קתגניפרי " וכל מרכבה ומרכבה שהן ממונים עליהם על
שרי כל אחת ואחת " מתמיה " ואומר היש מספר לגדודיו והפחות
שבמרכבה שר ורב על כל ארבעה שרים הללו " ומעלה מהם שרים
שלשה שרי צבא של " אה יוה ויו ויו " אדון הכל שהן מזיעין ומבהלין[4]
היכלות שמונה שלו ביום יום ברעש וברעד ורשות להן על כל פועל
ידיו ומתתם כפלים מרכבות אלו " והפחות שבמרכבות שר ורב על
כל השרים הללו " ואלה שמותם " אסההי " שפריס " הויה " סהותניאיה "
שר ורב מלך אהיו " פסקתיה שמו " שהוא יושב וכל צבא מרום בקידה
ובכריעה ובהשתחויה אפים בתראש ארצה לפניו בכל יום בפמירתן
מהשתחוואות[5] לפני נקץ " שלאה הו אוהה " אדון הכל " וכשאתה
משביעו נזקק לך ומזקיק לך את החמשה שרים האלו וכל המרכבות
אשר תחת רשותם ואת כל השרים האלו אשר מתחת ידם כי כך נתפקד
הוא וכל אותם השרים ליזקק למשה בן עמרם ולהזקיק לו כל השרים
שמתחת רשותם ולא יתעכבו בשמעתן ולא לזוז ממנה הנה והנה
להמשיל את כל המשביעין אותן על זה החרב את רזיה ואת צפוניה
כבודת נדולתה ותפארתה ולא יעכבו כי נזירת " אבדוהו " הוה צל
אליה אל יה " עליהם לאמר כל בשר ודם שישביע אתכם אל תעכבוהו
ואל תשנהו ממה שנצטויתם על משה בן עמרם עבדי כי בשמותי
המפורשים הוא משביע אתכם וכבוד לשמי אתם עושים ולא לו " ואם
תעכבו בו אני שורף אתכם כי לא כבדתם אותי וכל א' וא' מסר לו

ART. VI.—*The Sword of Moses. An ancient book of Magic, published for the first time, from an unique Manuscript (Cod. Heb., Gaster 178), with Introduction and Translation.* By M. GASTER, Ph.D.

I. *Introduction.*

MAGIC has exercised the deepest influence upon mankind from remote antiquity unto our own days. It either formed part of the religion of the country, as it was the case in ancient Egypt and Babylon and as it is now in some forms of Buddhism (Tibet), or lived an independent life side by side with the recognized religion. In some instances it was tolerated, or rendered less obnoxious, by a peculiar subdivision into white or beneficial and black or evil magic, or was downright persecuted. Wherever we go, however, and especially if we turn to the popular beliefs that rule the so-called civilized nations, we shall always and everywhere find a complete system of magical formulas and incantations. The belief in the witch and wizard, and their powerful filters and charms, holds still stronger sway upon human imagination than appears at first sight.

It is remarkable that we do not possess a good work, or exhaustive study, on the history and development of Magic. It is true that we find allusions to it, and sometimes special chapters devoted to the charms and incantations and other superstitious customs prevailing among various nations in books dealing with such nations. But a comprehensive study of Magic is still a pious (or impious) wish. One cannot gainsay that such an undertaking would present extreme difficulties. The material is far too vast, and is scattered over numberless nations and numerous literatures. Besides, much of ancient

Digitized by Google

times has disappeared; in fact, there is a profound gap between antiquity and modern times which is not by any means bridged over by the literature of the Middle Ages. In these times magical art and practice were ruthlessly persecuted by the Church, and the Councils teem with denunciations against the work of the Evil One. Moreover, it was connected in a certain degree with the teachings and practices of the various heretical sects, and the pursuit was anything but harmless. Thus it comes about that an exhaustive study of the origin and development of Magic is still a wish for the future, and the full influence which it has exercised upon mankind cannot be investigated in such a manner as to have a scientific value until at least a portion of the ancient literature will again have come to light.

The syncretistic character of the Gnostic teachings shows itself also in the adoption of Magic, and in the spiritual interpretation with which they invested the forms and formulas of Magic. The adherents of the various teachings of the Gnostics, and especially those that lived in Egypt and Palestine, adopted all the ideas that were floating about and transferred them into their system of superior Gnosis.

If anything of the teachings of the Gnostics has survived, it is the thaumaturgical portion of it. This has always been popular with the masses, as it afforded them those means which they wanted to defend themselves against the attacks of unseen evil spirits, and to the more speculative minds it afforded a clue to the mystery of the universe. It gave them the means to subdue and to put to their service the unknown forces of nature. This lies at the root of the general acceptance of magic formulas and enchantments, and gives to this practice the popularity which it still retains.

Being the most formidable sects that assumed an anti-Christian character, although some are anterior to Christianity, the Gnostics were the first to be attacked by the Fathers of the Church. Most of the ancient writings of the Fathers are filled with polemics against heretics, of

Digitized by Google

which these are the foremost. The result of this campaign, which lasted for centuries, has been the absolute destruction of all the writings of the Gnostics. Sparse and incoherent fragments only have come down to us, and we are now compelled to study their systems and superstitions, if we may call them so, from the writings of their antagonists, Irenæus and Hippolytus, Tertullian and Epiphanius. A single exception is the work known as "Pistis Sophia," the date of whose composition is variously assigned to the second or fourth century. It certainly seems to belong to a later stage in the development of the Gnosis, as it contains some of the later ideas. It has come down to us in a very bad state of preservation.

Within the last few years the soil of Egypt has rendered some more fragments of this kind of literature, and magic Papyri have now enriched our hitherto very scanty stock of genuine ancient literature. These belong to the second and third century, and, being exclusively of Egyptian origin, throw an unexpected light upon the form which Magic assumed under the influence of the new order of ideas. It is a fact that nothing is so stable and constant than this kind of mystical literature. The very nature of a mystic formula prevents it from ever being radically changed. As there is no other reason for its efficacy than the form in which it is pretended to have been fixed or revealed to the Select by the Divinity itself, any change of *that* form would immediately destroy its efficacy. Dread preserved the form intact, at least as long as the practitioner stood under the influence of those divinities whose power he invoked for protection, or as long as he believed in the power of those demons whose malignant influence he tried to avert by means of that form of enchantment. This explains the uniformity of a number of such charms in whatever language we find them and almost to whatever time they may belong; as long as they are the outcome of one and the same set of religious ideas, which is the determining factor. But with the change of religion the charms also undergo changes, not in the *form* but

Digitized by Google

in the *names* of the divinities invoked, and these bring other changes with them. To take a modern example, the charm against the Evil Eye will contain the name of Christ or of a Saint in a Christian charm, the name of Muhammed in the Muhammedan, and that of an angel or a mysterious name of God in the Jewish formula, though all the rest would be identical. The same process happened also in ancient times, and the Papyri mentioned above assist us in tracing the change which the new order of ideas had introduced in the magical formulas of the Christian era.

If we trace the first impulse of these changes to the Gnostics, we must at once associate it with the sects of Essenes and Theraupeuts that swarmed in Egypt and Palestine, and with the most important sect of Gnostics which produced the greatest impression, *i.e.* that represented by Valentin. His is the one against whom most of the polemics of the Fathers of the Church were directed. He is the author of the most profound and luxuriant, as well as the most influential and the best known, of the Gnostic systems. He was probably of Egyptian-Jewish descent; and he derived his material from his own fertile imagination, from Oriental and Greek speculations, and from Christian ideas.[1] In his system entered also the mystical combinations of letters and signs known under the name of cabbalistic formulas, and he moreover favoured the permutations and combinations of letters to express divine names and attributes. To him we owe the theory of Æons and the Syzygies, or divine creative pairs, of which the two first form together the sacred "Tetraktys." I believe this to be the Gnostic counterpart of the sacred "Tetragrammaton," and not, as has hitherto been assumed by others, the Tetraktys of the Pythagoreans. For one can see in his system, and more so in the mystical part of it, the direct influence of the Jewish mystical speculations of the time. Valentin lived, moreover, in Palestine, and nothing would suit him better than to

[1] P. Schaff, "Anti-Nicene Christianity," ii, Edinburgh, p. 472 ff.

Digitized by Google

manipulate that mystical, Ineffable Name of God, round which a whole system had been evolved in the service of the Temple. Angelology and mysterious names of God and His angels are, moreover, intimately connected with the above-mentioned sects.

The mysterious Ineffable Name of the divinity which is invoked seems to be the centre of most of the ancient and even modern Magic. By knowing that Name, which is assumed to be the name by means of which the world was created, the man or exorciser in Egypt pretended to constrain the god to obey his wishes and to give effect to his invocation if called by his true name; whilst in Chaldea the mysterious Name was considered a real and divine being, who had a personal existence, and therefore exclusive power over the other gods of a less elevated rank, over nature, and the world of spirits. In Egyptian magic, even if the exorcisers did not understand the language from which the Name was borrowed, they considered it necessary to retain it in its primitive form, as another word would not have the same virtue. The author of the treatise on the Egyptian mysteries attributed to Jamblichus maintains that the barbarous names taken from the dialects of Egypt and Assyria have a mysterious and ineffable virtue on account of the great antiquity of these languages. The use of such unintelligible words can be traced in Egypt to a very great antiquity.[1]

It is necessary to point out these things in order to understand the character of the new formulas which take now the place of the old. To the old and in time utterly unintelligible names, new names were either added or substituted, and the common source of many of these names is Jewish mystical speculation. The Ineffable Name of God and the fear of pronouncing it can be traced to a comparatively remote antiquity. We find in those ancient writings that have retained the traditions of the centuries before the common era, the idea of a form of the

[1] Lenormant, "Chaldæan Magic," p. 104 ff.

Digitized by Google

Ineffable Name composed of 22, 42, or 72 parts, or words, or letters, of which that consisting of 72 was the most sacred. It is still doubtful what those 22, 42, and 72 were — either different *words* expressing the various attributes of God, or *letters* in a mystical combination; but whatever these may have been they took the place of the Ineffable mystical name and were credited with the selfsame astounding powers. By means of these every miracle could be done and everything could be achieved. All the powers of nature, all the spirits and demons could be subdued, and in fact there was no barrier to human aspiration. The heavens were moreover peopled at a very early age with numberless angels arranged in a hierarchical order and each endowed with a special Name, the knowledge of which was no less desirable for working miracles. I need only allude to Dionysius Areopagita to have mentioned a complete treatise of such a divine economy recognized by the Church, but we can go much higher up and find these divisions and subdivisions of the celestial hosts recorded in books that belong to the second era before Christ. In the Book of Enoch (ch. vi) we have a long list of such names of angels, and in a book, the date of which has been differently put, the names of angels are still more numerous, to which there are added also various names of God. The book in question pretends to be a vision of the High Priest Ismael, and is a description of the heavenly Halls. Modern scholars who knew nothing of the Gnostic and other heretic literature put it as late as the ninth century, simply and solely because they could not find early traces of it in the old literature, and because it seemed to appear first in those times. A comparison of it with the Ascensio Iesaiae, and still more with a chapter in the "Pistis Sophia," easily convinces us, however, of the fact that absolutely similar treatises were known as early as the first centuries after Christ, if they were not, in fact, later remakings of still more ancient texts. The Greek Papyri already alluded to have also this peculiarity in common with these texts, that they abound in similar

Digitized by Google

lists of names of angels and demons borrowed from Egyptian, Christian, and Jewish sources. Among these we find also numerous forms of the *Name* of God consisting also of a number of letters, 7, 27, and others,[1] and also most curious combinations of letters.

The Jewish idea of a mystical Name of God rests thus upon the interpretation of the Tetragrammaton, or the word *JHVH*, that stands for God in the Hebrew text, which from very ancient times the priests first and then the whole people refrained from pronouncing in the way it was written. A substitute was found for it, so as to avoid a possible profanation of the sacred Name. But it is an object of millenary speculation what that substitute really was. As already remarked, it is represented by a changing number of elements, letters or words. The original miraculous, powerful Name, however, was the Tetragrammaton known as the "Shem ha-meforash." This word has presented great difficulties to the following generations. It can be translated either as meaning *explicit*, the "explicit" Name of God, whilst the others are merely substitutes, or *separate*, the name which is used exclusively for the designation of the Divinity. These two are the best known and most widely accepted interpretations of the "Shem ha-meforash." In the light, however, of our study it will appear that another translation will henceforth be found to be the only true one, at any rate for ancient times. Later on the true meaning of this expression was lost, and one or the other of the first-mentioned philological translations was adopted. So we find in the Testament of Solomon, *e.g.*, "the angel *called* Aphoph, which is *interpreted* as Rafael." [This expression proves that it is based upon a Hebrew original, and that the word "perush" was taken to mean "interpretation."] Considering that this name was believed to be the only *true* Name of God, the all-powerful name which was never pronounced, "Shem ha-meforash" can only mean the *Ineffable*, as we find it also in the "Pistis Sophia," and all

[1] A. Dieterich, "Abraxas," p. 185 (Papyrus Leyden,.

Digitized by Google

throughout the ancient tradition. It is an euphemism; instead of saying: it is the "Ineffable" unutterable name, they used the word which meant: it is the "explicit" name, just as they said for a "blind" man—he is "full of light"; other examples can be easily adduced. In this way an ancient mystery and a stumbling-block for the translator of such texts disappears.

As the Tetragrammaton, or "Shem ha-meforash," was the Ineffable Name, and could by no means ever be uttered, others were substituted and were used by the priest when blessing the people. These also were endowed with a special sanctity, and were revealed only to the initiated. These substitutes were considered to be no less effective for miracles, and the knowledge of these mysterious Names was no less desirable than that of the true Tetragrammaton, for they were believed to represent the exact pronunciation of the forbidden word, and thus to contain part, if not the whole, of the power with which the Tetragrammaton itself was invested. Rab, a scholar who had studied in Palestine towards the end of the second century, says of these substituted names, and more especially of that of forty-two elements (Tr. Kiddushin, fol. 71*a*): "That this Name is to be revealed only to a man who stands in the middle of his life, who is pious and modest, who never gives way to anger and to drink, who is not obstinate. Whoever knows that Name and preserves it in purity is beloved in heaven and beloved upon earth; is well considered by man and inherits both worlds."[1] What these forty-two may have been has thus far been the object of speculation. When comparing the ancient tradition with the new texts in the Papyri, and in the mystical texts of Hebrew literature, there can no longer be any doubt that the Name of forty-two, or more or less, elements could not have been originally anything else but *words* consisting of that *number of letters*, which were substituted in the public pronunciation for the Ineffable Name consisting of one *word* and only *four letters*—the Tetragrammaton! In time these

Digitized by Google

substitutes were also forgotten, or not divulged, and thus arose a series of new substitutes and variations for the divine Name. There was also the fear of profaning the name of God when writing it down in the way it occurred in the Bible, and therefore they resorted to manifold devices on the one hand to avoid a possible profanation, and on the other to obtain sacred or mysterious substitutes for the Ineffable Name.

Another element that came within the purview of this activity of coining new names was the new and greatly developed angelology that flourished at that time in Palestine and Egypt. The angels had to be provided with appropriate and powerful names, and the authors resorted to the same devices, of which I mention the most prominent, and which are the cause of many of the barbarous forms and names that abound in the magical rites and formulas and in the so-called practical Cabbalah. The biblical names of Michael, Gabriel, and others with the termination *-el*=God, served as a model for some of the new angels, such as in the Book of Enoch and in other similar writings. The first part was, as a rule, taken from the characteristic attribute connected with the activity of that new angel: so *Raphael*=the healing angel, in the Book of Tobit; *Raziel* =the angel of the mysteries; and in the same manner a host of similar names. Then came into requisition the system of permutation of the letters of the divine name: one standing first was placed at the end, and so on. Much more extensively were the change in the order or the substitution of other letters resorted to. In the Alphabet of R. Akiba no less than five different systems of this kind of substitutions are enumerated; either the last letter of the alphabet stands for the first (A-t; b-š, א"ת ב"ש, etc.), or one letter stands for the one immediately preceding such, as *b* for *a*; or the eighth and fifteenth stand for the first, and so on (A-h-s; b-t'-a, אחס בטע), or first and twelfth are interchangeable (A-l; b-m, א"ל ב"מ). One can easily see how differently the same name could be written and employed in the same amulet, and all these

Digitized by Google

various forms representing only *one* and the same name. The Tetragrammaton appears, therefore, either as מצפ"ץ, or בוזו, or בקרק, or שעפע, etc. The number of such permutations and substitutions is not limited, however, to these four systems enumerated; they are innumerable, and it is almost impossible to find the key for all met with in these mystical writings, and especially on the amulets.

Other means employed for the purpose of devising new variations and protections for the sacred name, belonging to the very oldest times, were the combination of *two* words into *one*, of which one is a sacred name and the other an attribute, but the letters of these two words are intermingled in such a manner that it is not always easy to decipher them. An example, which has hitherto not been understood, we have already in the Talmud. The High Priest Ismael is said to have seen Iah אכתריאל *Aktriel* in the Temple. This word, which stands for the mysterious name of God, is nothing else than the combination of the two words כתר *Ktr*=Crown and *Ariel*, from Isaiah xxix, 1. In the text, which I publish here, we have the name שקרחזי *Ṣḳṛḥzi*=שדי *Ṣaddai* and חזק *Hzk*=mighty, powerful. Names were further formed by leaving out one or two letters from the Tetragrammaton or from other sacred names of the Bible, the primary reason always being to avoid the possibility of profanation, as the profane utterance of the divine name brought heavy penalty upon the culprit. In this manner is the obscure exclamation in the Temple to be understood, אני והו *Ani vhu*, instead of the usual "O Lord" (help us): in each of these two words *one* letter has been left out—the *d* in the first, A*d*ni, and the second *h* in the second word. On other occasions strange letters were inserted between those of the divine name, and thus we get the puzzling form (Tr. Synhedrin, 56*a*=vii, 5) which is mentioned when the blasphemer who had blasphemed God was brought before the judges. The judges ask the witnesses to repeat the

Digitized by Google

blasphemy uttered by the accused, and they say, instead of mentioning the Divine Name, the words יוסי יוסהאת יכה, which may have obtained this form in our printed texts through popular etymology, meaning "Jose beat Jose!" But originally we have here clearly the Tetragrammaton יהוה, and a strange letter inserted after each letter of that word, viz. כ, י, ם, and א.

This process continues still unto our very days, but from the thirteenth or fourteenth century onwards a change has taken place in the system of the formation of these mysterious words, considered to be so efficacious in amulets. The initials of the words of a biblical verse are combined into a new word without any meaning, or the letters of a verse are so arranged as to form uniform words of three letters without meaning, the commencement of each of these words being the letters of the Hebrew words arranged consecutively. The most celebrated example is the use to which Exodus xiv, 19–21 has been put for many a century. But these are a mark of more recent origin, and not a trace is to be found throughout the whole ancient mystical literature, and also not in our text.

If we should apply these principles to the Greek Papyri, there is no doubt that a key might be found for the innumerable curious names which crowd these fragments of a literature that at one time must have been very rich. Traces of it we find also in the "Pistis Sophia," where special stress is laid upon that Ineffable Name, communicated only to the initiated. The knowledge which a man acquires through the "Nomen Ineffabile" is described at some length (pp. 131–153). In another place we read that Jesus spoke the Great Name over the disciples whilst preaching to them, and blew afterwards into their eyes, by which they were made to see a great light (p. 233). The mysterious names of God and of the Powers are enumerated on pp. 223 and 234–5, whilst the following passage explains the power of that Name:—"There is no greater mystery than this. It leads your soul to the light of lights, to the places of truth and goodness, to the region of the most holy, to

Digitized by Google

the place where there is neither man nor woman nor any definite shape, but a constant and inexpressible light. Nothing higher exists than these mysteries after which ye seek. These are the mysteries of the seven voices, and their forty-nine Powers, and their numbers, and no name is superior to that Name in which all the other names are contained, and all the Lights, and all the Powers. If anyone knows that Name when he goes out of the material body, neither smoke nor darkness, neither Archon, angel, or archangel, would be able to hurt the soul which knows that Name. And if it be spoken by anyone going out from the world and said to the fire, it will be extinguished; and to the darkness, and it will disappear; and if it be said to the demons and to the satellites of the external darkness, to its Archons, and to its lords and powers, they will all perish, and their flame will burn them so that they exclaim: 'Thou art holy, Thou art holy, the Holy of all the Holy.' And if that Name is said to the judges of the wicked, and to their lords and all their powers, and to Barbelo and the invisible God, and to the three Gods of triple power, as soon as that Name is uttered in those regions they will fall one upon the other, so that being destroyed they perish and exclaim: 'Light of all the Lights, who art in the infinite lights, have mercy upon us and purify us.'"[1] This is almost identical with the saying of Rab, with the difference that in the "Pistis Sophia" the Egyptian influence is not yet wholly obliterated. These examples suffice to show the character of the central point in the new Magic adopted by the Gnostics, viz., the mysterious Divine Name and its substitutes derived from the mystical speculations of Palestine, and also the general tendency of syncretism and absorption of various forms and invocations in that form of Magic which henceforth will have the deepest influence upon the imagination and belief of the nations of the West.

From that period, then, up to the twelfth or thirteenth century there is a gap which neither Psellus nor the Testament of Solomon fill sufficiently. All those ancient

[1] "Pistis Sophia," ed. Schwartze, p. 236.

Digitized by Google

magical books, being declared the work of the evil spirit, were successfully hunted up and destroyed. The link which binds the literature of the second half of the Middle Ages with the past is missing, and we find ourselves often face to face with the problem whether a book that appears after that period is of recent origin, or is an ancient book more or less modified? Such a book is, for instance, the so-called Sefer Raziel, or the book delivered to Adam by the angel Raziel shortly after he had left Paradise. It is of a composite character, but there is no criterion for the age of the component parts. The result of this uncertainty is that it has been ascribed to R. Eleazar, of Worms, who lived about the middle of the thirteenth century. One cannot, however, say which portion is due to his own ingenuity and which may be due to ancient texts utilized by him. I am speaking more particularly of this book as it seems to be the primary source for many a magical or, as it is called now, a cabbalistical book of the Middle Ages. Trithemius, the author of "Faust's Hoellenzwang," Agrippa, and many more, are deeply indebted to this book for many of their invocations and conjurations, although they must have had besides similar books at their disposal, probably also the Clavicula Solomonis, the Great Grimoyre, etc.

I must still mention one more fragmentary relic of that literature, viz. the inscribed cups and bowls from ancient Babylon with Aramaic inscriptions. These belong partly to the Lecanomantia, and are another example of the constancy of these formulas; for centuries these remain almost unchanged, and even in their latest form have retained a good number of elements from the ancient prototype.

It so happened, then, that some inquisitive men living in Kairouan, in the north of Africa, should address a letter to the then head of the great school in Babylon, Haya Gaon (d. 1037), asking him for information on various topics connected with magic rites and the miraculous powers ascribed to the Ineffable Name. I give here the gist of some of their questions, which date therefore from the second half of the tenth or the commencement of the

Digitized by Google

eleventh century. They ask first, what it is about that Ineffable Name and other similar mysterious Names of angels through the means of which people can make themselves invisible, or tie the hand of robbers, as they had heard from pious men from Palestine and Byzantium that if written upon leaves of reeds (Papyri!) or of olive trees and thrown in the face of robbers would produce that effect; and if written on a potsherd and thrown into the sea, calms it; or placed upon a corpse, quickens it to life; and, further, that it shortens the way so that man can travel immense distances in no time. They have also books with these terrible, awe-inspiring Names, and with the *seals* of those celestial powers of which they are terrified; as they know that the use of these mysterious Names, without due and careful preparation, brings with it calamity and premature death. To these and other questions the Gaon gives a sensible and philosophic reply, warning them, in the first instance, not to place too much credence on the statements of people who pretend to have seen, but to try and see with their own eyes. Then he goes on to tell them that such books with mystical names are also to be found in his college, and that one of his predecessors was known to have been addicted to these studies, and to the writing of amulets and the knowledge of incantations, but, he adds, "only a fool believes everything." As for the books with formulas, he goes on to say: "We have a number of them, such as the book called 'Sefer ha-Yashar,' and the book called '*The Sword of Moses*,' which commences with the words, 'Four angels are appointed to the Sword,' and there are in it exalted and miraculous things; there is, further, the book called 'The Great Mystery,' besides the minor treatises, which are innumerable. And many have laboured in vain to find out the truth of these things." In the course of his reply Haya touches also upon the Ineffable Name and the name of seventy-two (elements), which, according to him, was the result of the combination of three biblical verses (*cf.* above, p. 159, where reference is made to Exodus xiv, 19–21), but he neither knows which

Digitized by Google

they are nor how they were uttered; as to the other of forty-two, he says that it consisted of forty-two *letters*, the pronunciation of which was, however, doubtful, resting merely upon tradition. This name commenced, according to him, with the letters אבגיתץ *Abgiṭṣ*, and finished with שקוצית *Ṣkuṣit*. He mentions further the books—"The Great and the Small Heavenly Halls" and "The Lord of the Law," full of such terrifying names and *seals* which have had that dreaded effect upon the uncalled, and from the use of which those before them had shrunk, lest they be punished for incautious use.[1]

These abstracts suffice to show that the mystical literature had not come to an end with the third or fourth century, but had continued to grow and to exercise its influence throughout the whole intervening period. The reasons why so little is mentioned in the contemporary literature is, that each period has its own predilections, subjects which absorb almost exclusively the general interest, and are therefore prominently represented by the literature of the time, whilst other things, though in existence, are relegated to an obscure place. The best example we have is the modern folklore literature, that has assumed such large proportions, no one pretending that the subject did not exist throughout the centuries, although neglected by scholars. It must also not be forgotten that we have only *fragments* of the literature that flourished in Palestine and among the Jews in the Byzantine empire, to which countries this mystical literature belongs. Christian literature leaves us also in the dark for this period, for the reasons stated above; only Syriac might assist us somehow to fill up that gap, but as far as I am aware very little is to be expected from that quarter, as in the whole magnificent collection of the British Museum I have not found a single MS. of charms or magical recipes, except one single, rather modern, Mandaic text. Two very small, and also rather modern, Syriac MSS. of charms are in the possession of the Rev. H. Gollancz.

Of those books now mentioned by Haya Gaon in his

[1] Ṭaam Zeḳenim, f. 54*b* ff.

Digitized by Google

reply—all of which, by the way, seem to have been irretrievably lost—I have had the good fortune to discover one, viz. that called "*The Sword of Moses*," of which he gives us the first words. From the answer of Haya it is evident that he considered this book to be old and to be the most important, for he is not satisfied with merely giving the title as he does with the other books, but he makes an exception for this to indicate the commencement and to add that it contained "exalted and wonderful things." A glance at the contents of the newly-discovered text will justify the judgment of Haya, for it is a complete encyclopædia of mystical names, of eschatological teachings, and of magical recipes.

Before stating the contents I must first give a short description of this MS., now Cod. Hebr., Gaster, 178. This text has come to me with a mass of other leaves full of magical formulas, all in a very bad state of preservation and apparently hopelessly mixed up. Happily there were custodes at the ends of the leaves, and by their means I was enabled, after a long toil and careful handling of leaves falling to pieces on account of old age and decayed through dampness, to recover a good portion of the original MS. and the whole of this text, which occupies twelve small quarto leaves. The number of lines varies. The writing belongs to the thirteenth or fourteenth century, and is in Syrian Rabbinical characters. It is evidently a copy from a more ancient text, and the copyist has not been very careful in the transcript he made. Many a letter is written wrongly, having been mistaken for another similar, such as ד (*D*) for ר (*R*) and ם (*M*) for ס (*S*). In many a place there are evident lacunæ, and the copyist has often not understood the text. The language is a mixture of Hebrew and Aramaic, Hebrew prevailing in the first part, which I call the Introductory or historical, as it gives the explanation of the heavenly origin of this text, and deals with all the preliminary incidents connected with the mode of using the text in a proper and efficacious manner. In the last, which I call the theurgical or magical

Digitized by Google

part, Aramaic prevails. All the diseases are mentioned in the language of the *vulgus*, and so also all the plants and herbs, and the other directions are also in the same language. To no language, if I may say so, belongs the middle part, which is the real text of the "Sword." This consists of a number of divine and mysterious Names, a good number of which are the outcome of all those modes of manipulations with the letters briefly indicated above. It would be a hopeless task to try and decipher these names, and to transliterate them into the original forms of which they are the transformations and mystical equivalents. In this section we can recognize besides the unchangeable character of some of the magic formulas. What I said before of the Egyptians, who would not change any sacred Name, however barbarous it may sound, for fear of destroying its efficacy, holds good also for another number of Names found here in a bewildering variety. Almost every religion must have contributed to the list that makes up the "Sword." Eclecticism would be a mild word for this process of general absorption, that has made the "Sword" thus far the most complete text of magical mysterious Names which has come down to us. A small encyclopædia of a similar character is the Greek Papyrus of the British Museum, No. cxxi, and the Leyden Papyrus (J. 395), with which our text shows great similarity, but these Papyri mark as it were the first stages of this process of growth by the assimilation of various elements and combination into one single complete *vade-mecum* for the magician or conjurer. In the "Sword" we have the full development of that process, which must have run its course at a very early period.

Nothing is more fallacious than to try etymologies of proper names. The omission or addition of one letter by a careless copyist suffices to lead us completely astray. It is, therefore, difficult to advance any interpretation of even a few of the names found in this text that have a familiar appearance. If we were sure of the reading, we might recognize among those in No. 6, Isis (Apraxia,

Digitized by Google

Veronica), Osiris, Abraxas, and others; but, as already remarked, such an identification might easily lead us astray, and the coincidences might only be the result of mere chance. No doubt can, however, be entertained as to the complex character of this text, and to the astounding form of many of the names which it contains. It is a systematically arranged collection; in the apparent disorder there is order; and the names are placed according to certain leading features which they have in common. Thus we have a long string of names that are composed with the word Sabaoth (Nos. 24–37); others that are the components of the divine *-el* (Nos. 102–34). More startling still is a list of supposed names of heavenly powers that are represented as *sons of* other powers. These are undoubtedly derived from many sources, the author welding smaller texts and lists into one comprehensive list. The third part contains the directions for the application of these various Names. These are also arranged according to a certain system. The diseases follow, at any rate in the first portion, the order of the members in the human body, commencing with the head and its parts, then descending to the lower members; after which follow recipes for ailments of a different nature, to be followed by the directions for performing miracles and other remarkable feats.

Each of these 136 items (numbered by me) corresponds with a certain portion of Part II, the words or the mystical Names of those portions in Part II being the mysterious words that alone were the proper to have the expected magical result. In order to facilitate research, I have subdivided Part II into such corresponding portions to which I give the same number. There is thus an absolute parallelism between the two parts—one the text and the other its magical application. We see that the book has been very methodically arranged by one who intended to prepare as complete a magical book as possible. By this parallelism, and by the partial repetition of the mysterious words in Part III, we have the means to satisfy ourselves as to the accuracy of the copyist, who does not

Digitized by Google

come out very satisfactorily from this test. It may be that the original from which he copied was already partly corrupt, and the fear which such books inspired prevented him from attempting to correct what are obvious mistakes in the spelling of those Names. It not seldom happens that the same Name is written in two or three different forms in one and the same recipe. I have also not attempted any correction, as we have no means to decide which of these *variæ lectiones* is the true and which the corrupt. Another reason why the copyist may be exonerated from at least some of these inconsistencies, is the fact that he gives in many places what are intended to be different readings. He starts his copy with the marginal note, unfortunately half gone, the paper being destroyed in that place, that "there are differences of opinion as to the readings of the text and of the Names," or, as I would interpret this mutilated glosse, "the marginal readings are *variæ lectiones*." For, in fact, there are a good number of marginal glosses throughout Parts I and II.

There also are some in Part III, but these are of a totally different character. They are purely philological, and furnish one powerful proof more both for the antiquity of the text with which we are dealing and for the country where the MS. has been copied. Most, if not all, these glosses are, namely, *Arabic* translations of the Aramaic words of the original. By the mistakes that have crept into these Arabic glosses, it is evident that they have not been added by the copyist, who surely would have known how to write his own translation, but who would make mistakes when copying another MS., especially if it were in any way badly written or had suffered in consequence of age. The translation further proves that the original was written at a time when Aramaic was the language of the people, and that at a certain time when the copy was made from which this MS. is a transcript the language of the original had begun to be forgotten and required a translation, which, by the way, is not always exact. The Aramaic of this text is, in fact, not easy to understand; there occur in it many words

Digitized by Google

of plants and diseases which I have not found in any dictionary in existence, and many of the grammatical forms present peculiar dialectical variations, which point to Palestine as the original home of our text, and deserve a special study. Here again we have to lament the fact that we deal with an unique manuscript and have no means to test the accuracy of the text. But even as it is, this text will prove an extremely valuable contribution to Semitic philology, and would enrich even Löw's book on Aramaic names of plants, where I have in vain searched for the names and words occurring in our text. I have therefore added a translation, which, however, in some places, does not pretend to be more than an attempt to grapple with a very recalcitrant text.

The title of the book seems to be derived from the last words spoken by Moses before his death. He concludes his blessing of the Children of Israel with these words (Deuter. xxxiii, 29): "Who is like unto thee, a people saved by the Lord, the shield of thy help, and that is the Sword of thy excellency," or "thy excellent Sword." The figurative "Sword" spoken of here must have been taken at a later time to signify more than a figure of speech. Under the influence of the mystical interpretation of Scripture flourishing at a very early period, it was taken to denote a peculiar form of the divine Name, excellent and all-powerful, which served as a shield and protection. It therefore could be made to serve this purpose in magical incantations, which did not appeal to the assistance of demons but to the heavenly hosts obeying the command of the Master of that "Sword." There is no wonder, then, that it came to be connected with the name of Moses, the very man who spoke of it, and whose last words were of that "Sword." In the Greek Papyri, Moses is mentioned as one who keeps divine mysteries (Brit. Mus., Pap. xlvi, of the fourth century, lines 109 ff., ed. Kenyon, in Catalogue, 1893, p. 68, and note to it); and again, in another Papyrus, cxxi, of the third century (*ibid.* p. 104, l. 619 and note), a reference to one of the magical books ascribed to Moses, called "The Crown of Moses." But what is

Digitized by Google

more important still, the Leyden Papyrus calls itself the eighth Book of Moses. It resembles very much our text, which has thus preserved the old name by which many of these magical books went. Dieterich, who published the Leyden Papyrus (Abraxas, Leipzig, 1891), looks to Orphic origins for that magical composition and lays too great stress on the Cosmogony in it. In the light of our text it will become evident that these go all back to one common source, viz. to the mystical speculations of those sects, which he himself enumerates (pp. 136 ff.); and the "Logos ebraikos" quoted by him from the Paris Papyrus (*ibid* pp. 138–141) shows more clearly still the same sources for all these compositions. The overwhelming importance assigned in these texts to the "holy Name" consisting of a number of *letters*, and the book calling itself "The Work of Moses on the Holy Name," justify us in seeing in it an exact parallel to the Hebrew text, recovered now by me. There is much internal similarity between the Hebrew "Sword" and the Greek Papyri. The order of subjects is similar; all commence with an eschatological part, which in the Greek is more in the nature of a Cosmogony, in the Hebrew that of the description of the heavenly hierarchy. In both follows the "Name," and after that a list of magical recipes which refer back to that Name. The constant refrain of the Leyden Papyrus after each recipe is: "Say the Name!" Here the Name is still simple; in the Hebrew text it is represented by the rich variety which I have pointed out, but an intimate connection between these various texts cannot be doubted.

There exists besides another small treatise (B), also unique, that goes under the same name as "The Sword of Moses" (Cod. Oxford, 1531, 6). It is a short fragment of a different recension, and has only a remote resemblance with the first text (A). It consists of a list of mystic Names, different in their form from the other text, and has only sixteen recipes, which do not correspond with *portions* only of the first part, but, as in the Leyden Papyrus, the *whole* of this was to be repeated

Digitized by Google

after each recipe. Immediately upon this short text follows an invocation of the heavenly Chiefs, attributed to Ismael, the High Priest, the reputed author of the "Heavenly Halls." This addition corresponds to a certain extent with the first part of the "Sword" (A). In none, but very few exceptions, of B is there any trace of Aramaic, and a totally different spirit pervades the whole text. It is in the first place doubtful whether we have here the whole of it or merely a fragment. In two places we find the letters נג (NG) and נד (ND), which taken as numerals mean 53 and 54. If they stand for such, then we have here only the last two or three portions of a long text, of which the preceding *52* are missing. Again, on the other hand, as it is regularly recommended to repeat the *whole* of the "Name" after each recipe, an operation that would be well-nigh impossible for the inordinate length of that text, those NG and ND may not stand as numbers of paragraphs. This text presents besides many more peculiar traits that make it rather remarkable. We find here thus far the only trace in Hebrew literature of the "Twins" or "Didymoi" which appear in the Gnostic hymns of the apocryphal Acts of the Apostle Thomas,[1] and are brought into connection with the system of Bardesanes. The heavenly Powers mentioned in the "Sword" (A) under the form of *sons* of other Powers, point also to the same system of Bardesanes, of whom Ephraem Syrus said: "He invented male and female beings, gods and their children."[2] He may have taken these ideas from older sources. However it may be, this coincidence is none the less remarkable. We find further angels with double names, the one of which I translated "Kunya," *i.e.* the proper name, and the other the *explicit*, i.e. *Ineffable* unutterable name, corresponding entirely with that of the Testament of Solomon, where we find "the angel called Apharoph interpreted Raphael" (*τῷ καλουμένῳ Ἀφαρὼφ, ὅ ἑρμηνέυεται Ῥαφαὴλ*.—Orient, 1844, col. 747).

Digitized by Google

In the Gnostic prayer from the Acts of the Apostle Thomas, the Sophia is spoken of as the one "who knows the mysteries of the Chosen," or, according to the Syriac version, "revealer of the mysteries of the Chosen among the Prophets." With this the passage in the Hebrew text (B) may be compared, where the same idea is enunciated; and one feels almost tempted to see in the inexplicable word קינן ("Kinn") the Greek "Koinôn," the companion or partaker of the mystery; although it seems rather strange to find the very word in the Hebrew text. But there are many words that have a peculiar appearance in this text, and they look like transliterations of Greek words in Hebrew characters, such as "Chartis Hieratikon," etc. I have added, therefore, this second text also, making thus the publication of the "Sword" as complete as possible.

As a second Appendix I have added two conjurations found in the MS. of the "Sword" (A), both in Aramaic, and extremely interesting also for their similarity with the inscriptions inside the bowls brought from Assyria and Babylon. A detailed study of some of these magic bowls and their inscriptions has been published by M. Schwab.[1]

I have reproduced all these texts as closely and accurately as possible, without attempting any corrections or emendations, except in the case of obvious mistakes, which are pointed out by me as corrections. The glosses are given as notes, and the few corrections of obvious mistakes. I have refrained from referring to inscriptions on Gnostic gems and amulets, where we find "Ephesia grammata" similar to those of Part II of the "Sword" (A) and to some of Appendix I, and to the magical formulas in the terra-cotta bowls, which present a striking similarity with some portions of "The Sword." One cannot exhaust a subject of this kind, and the utmost one can attempt to do is to place as ample a material as possible at the disposal of those who make the study of Magic and theurgy and of the so-called practical Cabbalah the object of special enquiry. I have limited myself to

[1] Proc. Bibl. Archæology, 1890, pp. 292–342.

Digitized by Google

draw attention to the relation that exists between these, the Greek Papyri, and the Hebrew texts which I publish here for the first time, and to point out the important fact that we have now at least one fixed date from which to start in the enquiry of a subject in which dates and times have thus far been very doubtful. It is, moreover, a contribution to Semitic philology, and by the addition of a facsimile of the first page a contribution to Semitic palæography.

The origin of the "Sword" is none the less somewhat difficult to fix. From the letter of Haya Gaon it is evident that it must have been at least a few centuries older than his time (tenth century). But it must be much older still. As the Leyden Papyrus belongs at the latest to the third century, and those of the British Museum to the third or fourth century, we are justified in assigning to the first four centuries of the Christian era the origin of our Hebrew text, which throws so vivid a light upon those remnants of Greek Magic buried hitherto in the soil of Egypt. Herein lies also one side of the importance of our text, that it shows how the connection between antiquity and the later ages was maintained. The Greek texts had become inaccessible and practically lost to the world, whilst the Hebrew text, written in a language which was considered sacred, the knowledge of which was never allowed to be extinguished, preserved the ancient magical texts, with their curious mystical names and formulas, and carried them across the centuries, keeping up the old tradition, and affording us now a glimpse into a peculiar state of the popular mind of those remarkable times. The careful study of those Greek fragments side by side with the Hebrew will assist very materially in the understanding also of those often very obscure texts, and lift the study from the narrow groove in which it has hitherto been kept by the classical scholars who have devoted their attention recently to them. It will also help us in laying bare the fountains from which flowed the whole of the magical arts of the Middle Ages.

II. Translation.

I. *The Sword of Moses.*

In the name of the mighty and holy God!

Four angels are appointed to the "Sword" given by the Lord, the Master of mysteries, and they are appointed to the Law, and they see with penetration the mysteries from above and below; and these are their names—SKD HUZI, MRGIOIAL, VHDRZIOLO, TOTRISI. And over these are five others, holy and mighty, who meditate on the mysteries of God in the world for seven hours every day, and they are appointed to thousands of thousands, and to myriads of thousands of Chariots, ready to do the will of their Creator, X,[1] the Lord of Lords and the honoured God; these are their names—X. And the Master of each Chariot upon which they are appointed wonders and says: "Is there any number of his armies?" And the least of these Chariots is lord and master over those (above) four. And over these are three chiefs of the hosts of the Lord, who make every day tremble and shake His eight halls, and they have the power over every creature. Under them stand a double number of Chariots, and the least of them is lord and master over all the above Chiefs (rulers); and these are their names—X. And the name of the Lord and king is X, who sits, and all the heavenly hosts kneel, and prostrate themselves before Him daily before leaving X, who is the Lord over all.

And when thou conjure him he will attach himself to thee, and cause the other five Chiefs and their Chariots, and the lords that stand under them, to attach themselves to thee just as they were ordered to attach themselves to Moses, son of Amram, and to attach to him all the lords that stand under them; and they will not tarry in their obeisance, and will not withhold from giving authority to

[1] X stands for the mysterious names, which have not been transliterated. N for the name of the person who conjures.

Digitized by Google

the man who utters the conjuration over this "Sword," its mysteries and hidden powers, its glory and might, and they will not refuse to do it, as it is the command of God X saying: "Ye shall not refuse to obey a mortal who conjures you, nor should you be different to him from what you were to Moses, son of Amram, when you were commanded to do so, for he is conjuring you with My Ineffable names, and you render honour to My name and not to him. If you should refuse I will burn you, for you have not honoured Me."

Each of these angels had communicated to him (Moses) a propitious thing for the proper time. These things (words) are all words of the living God and King of the Universe, and they said to him:—

"If thou wishest to use this 'Sword' and to transmit it to the following generations, (then know) that the man who decides to use it must first free himself three days previously from accidental pollution and from everything unclean, eat and drink once every evening, and must eat the bread from a pure man or wash his hands first in salt (?), and drink only water; and no one is to know that he intends using this 'Sword,' as therein are the mysteries of the Universe, and they are practised only in secret, and are not communicated but to the chaste and pure. On the first day when you retire from (the world) bathe once and no more, and pray three times daily, and after each prayer recite the following Blessing:—

"'Blessed art thou, O Lord our God, King of the Universe, who openest the gates of the East and cleavest the windows of the firmament of the Orient, and givest light to the whole world and its inhabitants, with the multitude of His mercies, with His mysteries and secrets, and teachest Thy people Israel Thy secrets and mysteries, and hast revealed unto them the "Sword" used by the world; and Thou sayest unto them: "If anyone is desirous of using this 'Sword,' by which every wish is fulfilled and every secret revealed, and every miracle, marvel, and prodigy are performed, then speak to Me in the following manner, read before Me this

Digitized by Google

and that, and conjure in such and such a wise, and I will instantly be prevailed upon and be well disposed towards you, and I will give you authority over this Sword, by which to fulfil all that you desire, and the Chiefs will be prevailed upon by you, and my holy ones will be well disposed towards you and they will fulfil instantly your wishes, and will deliver to you my secrets and reveal to you my mysteries, and my words they will teach you and my wonders they will manifest to you, and they will listen and serve you as a pupil his master, and your eyes will be illuminated and your heart will see and behold all that is hidden, and your size will be increased." Unto Thee I call, X, Lord of the Universe. Thou art He who is called X, King of the Universe. Thou art called X, merciful king. Thou art called X, gracious king. Thou art called X, living king. Thou art called X, humble king. Thou art called X, righteous king. Thou art called X, lofty king. Thou art called X, perfect king. Thou art called X, upright king. Thou art called X, glorious king. Thou art called X, youthful king. Thou art called X, pleasant king. Thou art called X, and thou listenest to my prayer, for Thou hearkenest unto prayer; and attach unto me Thy servants the lords of the "Sword," for Thou art their king, and fulfil my desire, for everything is in Thy hands, as it is written: "Thou openest thine hand and satisfiest every living being with favour."

"'I conjure you, Azliel called X; I conjure you, Arel called X, Ta'aniel called X, Tafel called X, and the most glorious of these Yofiel Mittron called X, the glory from above. With the permission of my king (I conjure) Yadiel called X, Ra'asiel called X, Ḥaniel called X, Haniel called X, Asrael called X, Yisriel called X, A'shael called X, Amuhael called X, and Aṣrael called X, that you attach yourselves to me and surrender the "Sword" to me, so that I may use it according to my desire, and that I find shelter under the shadow of our Lord in heaven in the glorious Name, the mighty and awe-inspiring X, the twenty-four letters from the Crown; that you deliver unto me with this

Digitized by Google

"Sword" the secrets from above and below, the mysteries from above and below, and my wish be fulfilled and my words hearkened unto, and my prayer (supplication) received through the conjuration with the Ineffable name of God which is glorified in the world, through which all the heavenly hosts are tied and bound; and this is the Ineffable Name—X, blessed be he! (I conjure you) that you shall not refuse me nor hurt me, nor frighten and alarm me, in the tremendous Name of your king, the terror of whom rests upon you, and who is called X. Fulfil for me everything that I have been conjuring you for, and serve me, for I have conjured you not with the name of one who is great among you but with that of the Lord over all, whose name ties and binds and keeps and fastens all the heavenly hosts. And if you should refuse me, I will hand you over to the Lord God and to his Ineffable name, whose wrath and anger and fire are kindled, who honours his creatures with one letter of his name, and is called X; so that if you refuse he will destroy you, and you will not be found when searched after. And you preserve me from shortness of spirit and weakness of body in the name of X, the guardian of Israel. Blessed art Thou, who understandest the secrets and revealest the mysteries, and art king of the Universe.'"

A voice was heard in the heavens, the voice of the Lord of heavens, saying: "I want a light (swift) messenger (to go) to man, and if he fulfils my message my sons will become proud of the 'Sword' which I hand over to them, which is the head of all the mysteries of which also my seers have spoken, that thus will my word be, as it is said: 'Is not my word like as fire? saith the Lord'" (Jer. xxiii, 29). Thus spoke X, the lord of heaven and earth; and I, Assi Asisih and Apragsih, the light (swift) messenger, who am pleased with my messages and delighted with my sending, ascended before Him, and the Lord over all commanded me: "Go and make this known to men who are pious and good and pure and righteous and faithful, whose heart is not divided and in whose mouth is no duplicity, who do not lie with their tongues and do not deceive with

Digitized by Google

their lips, who do not grasp with their hands and are not lustful with their eyes, who do not run after evil, keep aloof from every uncleanness, depart from every defilement, keep themselves holy from contamination, and do not approach woman." When the Lord over all commanded me thus, I, X, the swift messenger, went down to earth, and I said on my way: "Where is the man who possesses all these that I should go to him and place this with him?" And I asked myself, and thought in my heart that there is no man who would do all this that I wished; and I found none, and it was heavy unto me. And the Lord over all conjured me by His mighty right arm, and by the lustre of His glory and His glorious crown, with an oath of His mighty right arm, and He conjured me, and the Lord over all strengthened me and I did not fall. I thus stood up, I, X, to put NN in the possession of the desired covenant, in the name of X."

"This is the great and glorious Name which has been given as a tradition to man—X, holy, glorious, glorious, Selah. Recite it after thy prayers.—And these are the names of the angels that minister to the son of man—Mittron, Sgrdtsih, Mqttro, Sngotiqtel, etc., etc., etc. (28 names)." "In a similar manner shall you serve me NN; and receive my prayer and my orisons, and bring them to God X, blessed be He! for I adjure you in His name, and I extol you (to ascend), like unto the bird that flies from its nest, and remember my meritorious deeds before Him and (make Him) forgive now my sins on account of my words of supplication, and you may not refuse me in the name of X, blessed be He! Sabaoth, Sabaoth, Selah. His servants sanctify Him and praise Him with sweet melody, and say: "Holy, holy, holy is the Lord of holy name; the whole earth is full of His glory"; and do not refuse me, in the name of X, who lives for ever, and in the name of Ditimon, etc., X, and in the name X of the great One from whom nothing is hidden, who sees and is not seen, and in the name of Him who is the chief over the heavens and is called X. And the King of the

Digitized by Google

Universe utters (this name) also in a different manner, thus—X. You swift messenger, do not tarry and do not frighten me, but come and do all my wants in the name of X, the great One, who sees and is not seen, AHVH, whose Ineffable Name is revealed to the heavenly hosts; and I conjure you by this Ineffable Name, such as it was revealed to Moses by the mouth of the Lord over all, X, the Lord Sabaoth is His name. Blessed art thou, O God, lord of mighty acts, who knowest all the mysteries."

And which are the letters which X communicated to Moses? He said to him: "If thou wishest to get wise and to use the 'Sword,' call me, and conjure me, and strengthen me, and fortify me, and say: 'X, with the great, holy, wonderful, pure, precious, glorious, and awe-inspiring secret Name X, with these letters I conjure thee to surrender to me and make me wise and attach to me the angels which minister to the "Sword," in the name of the Revealer of mysteries. Amen.'"

Write with ink on leather and carry about with you during those three days of purification, and invoke before and after prayer the following Names communicated to Moses by Mrgiiel, X, by Trotrosi, X, etc. (the 13 Chiefs mentioned at the beginning, and a long string of other mysterious names which are said to have been communicated to Moses). "And they have not hidden from him any of these sacred Ineffable names or letters, and have not given him instead the Substitutes of any of these sacred letters, for thus were they ordered by the Lord of all mysteries to communicate to him this 'Sword,' with these Names which constitute the mysteries of this 'Sword'; and they said to him: 'Command the generations which will come after thee to say the following blessing prior to their prayer, lest they be swept away by the fire': 'Blessed art Thou, X, who wast with Moses; be also with me, Thou, whose name is X. Send me X, who is the cover of the Cherubim, to help me. Blessed art Thou, Lord of the Sword.'"

Whoever is desirous of using this 'Sword' must recite his

Digitized by Google

usual prayers, and at the passage "Thou hearkenest to prayer" say: "I conjure you four princes, X, servants of Hadirion, X, that you receive my invocation before I pray, and my supplication before I entreat, and fulfil all my wishes through this 'Sword,' as you have done to Moses, in the glorious and wonderful name of the Lord of wonders, which is interpreted thus—X." He must then call the five superior Chiefs and say: "I conjure you, X, that you accept my conjuration as soon as I conjure you, and you attach to me those four princes and all the hosts of Chariots over which you preside, to fulfil all my wishes through this 'Sword' by this beloved name X." He must then call the three angels that are superior to these, and say: "I conjure you, X, the beloved of X, who is Hadiririon, that you attach yourselves to me and attach to me X, who are standing under your rule, to fulfil all my wishes through this 'Sword' by this unique name X." And then he must lay hold of the highest Chief over all and say: "I conjure thee, X, strong and powerful Chief over all the heavenly hosts, that thou attachest thyself to me, thou and not thy messenger, and attach to me all the Chiefs that are with thee, to fulfil my wishes through this 'Sword,' by the name X, which has no substitute, for thou art beloved and he is beloved, and I am from the seed of Abraham called the beloved. Blessed art thou, King of the mysteries, Lord of the secrets, who hearkenest unto prayer."

And he is not to touch this "Sword" ere he has done all these things; afterwards he will be able to do whatever he likes, everything being written here following in its proper order.

II. *This is the "Sword."*

[It consists of a series of mysterious names of God or angels, to which the recipes in Part III refer. The first list commences with Tobat, Tsbr, etc. (1–5). These numbers are added by me to make the formulas run parallel with their magical applications in Part III, as already explained in the Introduction. I refer to them as they break up this

Digitized by Google

part in convenient smaller portions, and are easily discernible. After these follow the words]: "With these your Names, and with the powers you possess, to which there is nowhere anything like (I conjure you) to show me and to search for me, and to bring me X to do all my bidding in the name of X," and, again, a list of names, that have no special characteristic in common. Nos. 20–24 are all names commencing with *JJ*; some of these finish with *JH*. 24–36 all these names have the word *Sabaoth* attached to them. To 41–47 *HVH* is added. From Nos. 51–93 all the names are composite; they appear as names of *sons*, the name of the father being added to each of these, close upon 160 names, *e.g.*: Ssgnis, son of Srngia; Ssgn, son of 'Arggis; Atumi, son of Batumi; Ahsuti, son of Kkthus; Agupi, son of Abkmi, etc. Every name from 102 on to the end of this part finishes with *-el*, after which follow varying syllables and words: some are only *JH* or *JV* (Nos. 102–105), or a word commencing with *'A-* and finishing with *-JH* (Nos. 106–111). Nos. 112–121 are followed by AHVH, whilst 122–127=JHVHH, and Nos. 128–134= HVJH. They conclude with the following words: "Ye sacred angels, princes of the hosts of X, who stand upon the thrones prepared for them before Him to watch over and to minister to the 'Sword,' to fulfil by it all the wants by the name of the Master over all; you Chiefs of all the angels in the world, X, in the name of X the seal of heaven and earth, ministers of X the most high God; through you I see X in the world; you are lording over me in all the place of the Master over all: I pray of you to do everything that I am asking of you, as you have the power to do everything in heaven and upon earth in the name of X, as it is written in the Law, 'I am the Lord, this is My name!'"

III.

Digitized by Google

to destroy winds (spirits), demons, and satans, and to stop a ship, and to free a man from prison, and for every other thing, write on a red bowl from Tobar, etc. (No. 1).—2. To break mountains and hills, to pass dryshod through the water, to enter the fire, to appoint and to depose kings, to blind the eyes, to stop the mouth, and to speak to the dead, and to kill the living, to bring down and to send up and to conjure angels to hearken unto thee, and to see all the mysteries of the world, write Nos. 1 and 2 upon the saucer of a cup and put in it the root of genip-tree (*genipa*). —3. Against a spirit that moves in the body write on a plate No. 3.—4. Against a spirit that burns write No. 4. —5. Against a spirit in the whole body write No. 5.—6. Against a demon (*shidda*) write No. 6.—7. Against shingles write No. 7.—8. Against quinsy (erysipelas ?) say the words of No. 8 over oil of roses and put it over his face.—9. For pains in the ear whisper in the painful ear No. 9.—10. For aches in the eye say the words No. 10 over water three days running in the morning, and wash the eye with it.—11. For cataract say the words of No. 11 over oil of sesame, and anoint the eye with it during seven mornings. —12. For grit in the eye say over Ḳohl No. 12, and fill the eye with it for three mornings.—13. For blood that runs from the head whisper No. 13 over the head early in the morning for three days, when you wash your hands before getting out of bed.—14. For paralysis say seven times over a vessel full of water and seven times over sesame-oil the words No. 14, "that it should move away and leave NN, Amen, Amen, Selah"; and throw the pail of water over his head and anoint him with the oil, and do this for three days; then write an amulet with the words from, "I conjure you" till "Amen, Selah," and hang it round his neck. —15. For pains in one half of the head (neuralgia?) and for bad singing in the ear, write No. 15 and hang it round the neck.—16. For the bad deafening (of the ear) write No. 16 and hang it round the neck.—17. For pains in the ear say into the left ear the words No. 17 backwards.—18. For deafness say over hemp water, whilst mixing it

Digitized by Google

with oil of "Idi" (sesame?), the words of No. 18, and put it into his ear as soon as it has become a little dissolved (or warm).—19. For scabs, ulcers, itches, mange, shingles, etc., that befall mankind, say over olive oil No. 19 and anoint with the left hand.—20. For jaundice say the words No. 20 over water in which radish has been soaked, and let him drink it.—21. For pains in the nose and for the spirit in the nose say No. 21 over oil of "Idi" (sesame?) and put it into his nostrils.—22. For pains in the stomach (*lit.* heart) and in the bowels say No. 22 over water, and drink it.—23. For hot fever say No. 23 over water in which rose-laurels are soaked, and he is to bathe in it.—24. For tumors, etc., say No. 24 once over them and once over olive oil, and anoint them for three days, but do not let any water come near them—25. For an evil occurrence (?) say No. 25 over seven white cups of water, filled from the river, and throw them over the head.—26. For ulcer (diphtheria?) spit out before him, and say over his mouth, and over a cup of strong drink, No. 26, and make him drink, and watch what is coming out of his mouth.—27. For a man bitten by a snake or by another (!) poisonous insect, he must say over the place of the bite or over the painful spot No. 27 and drink it; the same he is to do whenever hurt by any creeping thing.—28. For a woman who has seen blood before the time say No. 28 over an ostrich egg, then burn it, and she be smoked with it.—29. For pains in the mouth say No. 29 over risen flour, and put it upon his mouth.—30. For quinsy (croup) and for pains in the shoulder, say No. 30 over wine and drink.—31. For a painful nerve write No. 31 on a scroll and speak these words over olive oil, and rub some of it on the scroll and smear it over the painful spot and hang the amulet round his neck.—32. For stone say over a cup of wine No. 32, and drink it.—33. For hemorrhoids take tow and put salt on it and mix it with oil, saying over it No. 33, and sit on it.—34. For a man who suffers from swelling and from venereal disease (?), he is to say No. 34 over water in which radishes are soaked, and drink.—35. For sprains, either

Digitized by Google

you take a plate and write upon it No. 35 and put it upon the place, and all around it will be healed; or you take a ball of wool and dip it in oil of (sesame?), and say those words upon it and put it upon the sprain.—36. When injured or hurt by iron, and for every blow that it should not fester, say No. 36 over white naphtha and rub it over the place of the blow.—37. For (cramps?) and for pains of heart say over spinach and oil No. 37, and drink it.—38. For the gall and the bowels take the water in which raisins have been soaked, saying over it No. 38, and drink it.—39. For the spoiled liver take (a drink) a sixth measure of water-lentils and say No. 39, and swallow it slowly (?).—40. For the milt say No. 40 over wine-lees and drink it, and repeat it for three days.—41. For the spirit who rests on the womb, say No. 41 on camphor oil and put it on it with a ball of wool.—42. For a woman who has a miscarriage, say No. 42 on a cup of wine, or strong drink, or water, and let her drink it for seven days; and even if she should see blood and she repeats it over a cup of wine, the child will live.—43. For a man who is bald, say No. 43 over nut-oil and anoint with it.—44. To conjure a spirit write on a laurel-leaf: "I conjure thee, prince whose name is Abraksas, in the name of (No. 44) that thou comest to me and revealest to me all that I ask of thee, and thou shalt not tarry." And the one bound by thee will come down and reveal himself to thee.—45. To remove a rich man from his riches, say No. 45 upon the dust of an ant-hill and throw it into his face.—46. To heal leprosy, take the patient to the side of the river and say to him: "I conjure thee, leprosy, in the name of (No. 46) to disappear and to vanish, and to pass away from NN. Amen, Amen, Selah"; and he is to go down and dip seven times in the river, and when he comes out write an amulet with the words "I conjure—Selah," and hang it round his neck.—47. For diarrhœa write No. 47 on a red copper plate and hang it round his neck.—48. If thou wishest that the rain should not fall upon thy garden, write out No. 48.—49. If thou wishest to see the sun (!) take . . . from a male tree and stand in front of the sun and say . . . which art called

Digitized by Google

on the . . called . . . and the ears of barley (?) the words of No. 49;[1] and he will appear unto thee in the form of a man dressed in white and he will answer thee upon everything that thou askest him, and he will even bring a woman after thee.—50. Whosoever wishes to enter a furnace is to write No. 50 on a silver plate and hang it upon his haunch.—51. If thou seest a king or a ruler and thou wishest that he follow thee, take a basin of water and put into it the root of genip-tree, and the root of purslane, and the root of (*Artilochia*), and say No. 51, and place it on fiery coals in a white earthen vessel and throw upon them leaves of olive-tree, and whatever thou decreest he will bring unto thee, even a woman thou canst command. —52. If you wish to overawe them, take water from the fountain and say upon it No. 52 and throw it into their faces. —53. For loosening (any charm) say over water No. 53 and throw it over him and write it as an amulet and hang it round his neck, and also for freeing a man from prison.— 54. To catch fish, take a white potsherd, and putting into it leaves of olive-tree say over them No. 54 at the side of the river.—55. If thou wishest a woman to follow thee, take thy blood and write her name upon a newly-laid egg and say towards her No. 55.—56. If a man is to follow thee, take a new potsherd and dip it in black myrrh (gall) and pronounce over his name the words of No. 56, and walk on without looking backwards.—57. For a tree that does not produce fruits, write the words No. 57 upon a new potsherd and bury it under the root of the fruitless tree, and water all the trees and these also which do not produce the fruit.—58. For illness (dog) in the fruit write on a new potsherd No. 58 and bury it in the cistern (watering-place), and say these words also over water, ashes, and salt, and water the earth with it.—59. For a suckling babe write on an onyx slab No. 59 and whisper it into its ears three times, spitting out after the whispering; then repeat them over a cupful of water 70 times and give it the child to drink.—60. For one bitten by a rabid dog,

[1] There is something probably missing here.

Digitized by Google

write No. 60 on the halter of an ass and let the ass go; then repeat these words over sesame oil and let him anoint himself with it and put on new clothes and hang that halter (?) round him.—61. For fever and small fever, write on the skin of the brains of a ram or a goat No. 61, and hang it round his neck.—62. If anyone lose his way he is to say No. 62 over the four corners of his belt (?).—63. If thou wishest to ask anything of thy neighbour, say No. 63 over oil of sesame or of . . . or of . . . —64. If thou wishest that a woman is to follow thee write thy name and her name with thy blood upon her door, and the same upon thy door, and repeat the words of No. 64.—65. If thou wishest to know whether thy journey will be lucky, take a field lettuce with open leaves, and standing before the sun say the words of No. 65 and watch the lettuce: if the leaves close and shut, then do not go; but if they remain in their natural state, proceed, and thou wilt prosper.—66. If thou wishest to deliver a man from prison (?) say No. 66 once to him, and once to the sun, and once to the prison (?) house.—67. To conquer (collect ?), take dust from thy house and say over it seven times in the road of the town the words of No. 67, and then take dust from the road and do likewise and throw it into thy house.—68. If you wish to kill a man, take mud from the two sides of the river and form it into the shape of a figure, and write upon it the name of the person, and take seven branches from seven strong palm-trees and make a bow from reed (?) with the string of horse-sinew, and place the image in a hollow, and stretch the bow and shoot with it, and at each branch (shot) say the words of No. 68; and may NN be destroyed . . .—69. To send plagues, take (parings ?) from seven men and put them into a new potsherd, and go out to the cemetery and say there No. 69, and bury it in a place that is not trodden by horses, and afterwards take the dust from this potsherd and blow it into his face or upon the lintel of his house.—70. To send dreams to your neighbours, write No. 70 upon a plate of silver and place it in the mouth (?) of a cock and kill it when it has gone

Digitized by Google

down its mouth, and take it out from the mouth and put it between its legs and bury it at the end of a wall, and put thy foot upon that spot and say thus: "In the name of X, a swift messenger is to go and torment NN in his dreams until he will fulfil my wish."—71. If a snake follows thee say No. 71, and it will dry up.—72. To stop a boat in the sea, say No. 72 over a potsherd or on a rounded flintstone and throw it against it into the sea. —73. To loosen it (from the charm), say No. 73 over dust or a clod of earth and throw it into the water, and as this dissolves the boat gets free to go.—74. If thou wishest to prevent an oven or furnace or pot from becoming destroyed (unclean ?), say No. 74 over dust and throw it over them.— 75. If thou wishest them to be hot, spit in front of them and say No. 75, and they will boil.—76. If thou wishest to pass dryshod through the sea, say upon the four corners of the head-dress (turban) No. 76, and take one corner in thy hand and the other is (?) to precede thee.—77. If thou wishest to curse anyone, say in the 'Eighteen benedictions' No. 77, in the name of X.—78. To speak with the dead, whisper No. 71 into his left ear and throw into their holes (?).—79. To kill a lion, bear, an adder, or any other hurtful animal, take the dust from under the right foot, say over it No. 79, and throw it into their faces.—80. To catch them, take the dust from under your left foot, saying No. 80, and throw it into their faces.— 81. To open a door, take the root of lotos reed and place it under the tongue and say No. 81 against the door.— 82. To kill an ox or another beast, say into its ear No. 82.—83. To inflame his heart, say No. 83 over a piece of raw meat, and give it to him to eat.—84. To make a fool of one, say No. 84 over an egg and place it in his hands.—85. To destroy the house of thy neighbour, say No. 85 over a new potsherd and throw it into his house. —86. To expose (?) your neighbour, say No. 86 over oil of . . . and smear it at the bottom of his jug (?).—87. To make your neighbour disliked, take blood from phlebotomy, say upon it No. 87, and throw it upon his lintel.—88. To

Digitized by Google

make a woman have a miscarriage, say No. 88 over a cup of water and throw it over her lintel.—89. To make a man ill, say No. 89 over olive oil and let him anoint himself with it.—90. To know whether a sick person will die or live, say before him No. 90: if he turns his face towards you he will live; if away, he will die.—91. To catch a lion by the ear, say No. 91 and make seven knots in the fringes of thy girdle and repeat these words with each knot, and you will catch him.—92. To make thy renown go throughout the world, write No. 92 as an amulet and bury it in thy house.—93. To shorten the way, say No. 93 over a single lotos reed.—94. To cure hemorrhoids, take kernels of dates . . . and burn them in fire and say No. 94, and mix it with oil of olives and place it as an amulet over it, and it will be good.—95. For every spirit write upon a bowl No. 95 and hang it round the neck.—96. For subtle poison, as cumin-seed and calamint, write No. 96 upon an egg and put it into wine, and repeat over it the same words and then drink it.—97. For the thunder that comes from heaven, take a ring (round piece) of iron and lead, and hang it on the spot you wish (to protect), and say over it No. 97.—98. To go before king or lord, say No. 98 over a piece of lion's skin dipped in black hemp (?) and pure wine, and take it with thee.—99. For blight, if it happen, take a sinew and soak it in turnip-juice in the night from Wednesday to Thursday, and say No. 99 over it; on the morrow sprinkle that water over the field.—100. If the fruit gets worm-eaten, take a worm from the mud and put it into a tube and say No. 100 over it; then close the tube and bury it in that place.—101. To free a man from prison (? shame), say over the grounds of Kappa (?) and unripe dates No. 101, and give it to him to eat.—102. For a field that does not produce fruits, take eight cups from eight houses and fill them with water from eight rivers, and put salt into them from eight houses, and say over them No. 102 eight times, and pour out two cups at each corner, and break them on eight paths.—103. If one does not know what a man is ailing

Digitized by Google

from, soak mullein (*verbascum*) in water, and say over it No. 103, and let him drink it when he is thirsty.—104. To make war, take the dust from under the left foot, say over it No. 104, and throw it into the (enemies') face, and there will appear knights with weapons in their hands who will fight for thee.—105. To throw thy fear upon mankind, write No. 105 upon a leaden plate and bury it on the west side of the Synagogue.—106. To have always light in the darkness, write No. 106 upon a chart (paper) and carry it always with thee.—107. To catch (blind) the eye, write No. 107 upon a scroll and expose it in a wicker-basket to the stars, but you must not speak when writing.—108. To send a sword which should fight for thee, say No. 108 over a new knife wholly of iron, and throw it into their face.—109. If thou wishest that they kill one another, say No. 109 over a new knife wholly of iron and bury it with your heel into the earth, and keep the heel upon it in the earth, and they will kill one another, until you take it out from the earth.—110. To make them pause, take the dust from under the right foot, and, saying the same words again backwards, throw it into their face, and they will stop.—111. If an enemy has got hold of thee and wishes to kill thee, bend the little finger of the left hand and say No. 111, and he will run away from thee like one who runs away from his murderer.—112. To catch the eye (blind), say No. 112 over the skin of a lion and carry it with thee, and no one will be able to see thee.—113. If thou fallest into a (?) and wishest to come out, say No. 113, and thou wilt come out in peace.—114. If thou fallest into a deep pit, say in thy fall No. 114, and nothing will hurt thee.—115. When thou fallest into a deep river say No. 115, and thou wilt come out in peace.—116. If any burden or weight falls upon thee, say No. 116, and thou wilt be saved.—117. If the king's servants lay hold on thee, bend the little finger of the left hand and say No. 117 before king or judge, and he will kill these people who have laid hands on thee.—118. If a host has surrounded thee, turn thy face towards the west and say

Digitized by Google

No. 118 before king or judge, and they will be like unto stones and will not move.—119. If thou wishest to release them, turn thy face towards the east and repeat these words backwards.—120. If thou walkest in vales or on the mountains and hast no water to drink, lift thine eyes to Heaven and say No. 120, and a fountain of water will be opened unto thee.—121. If thou hungerest, lift thine eyes to Heaven and spread out thine arms and say No. 121, and a spirit will stand before thee and bring thee bread and meat.—122. If thou wishest to call the angel (prince) of man, say over thy mantle (?) No. 122, and the angel bound by thee will come to thee and will tell thee whatever thou wishest (to know).—123. If thou wishest to let him go (depart), say before him the same words backward, and he will depart.—124. If thou wishest that any heavenly prince is to come to thee and teach thee, say No. 124 and conjure him in the third hour of the night from: "in the name of the Lord over the holy ones (No. 136) to the end of the 'Sword,'" and "Send him to me that he reveal unto me and teach me all that is in his power," and he will then disappear (!).—125. To walk upon the water without wetting the feet, take a leaden plate and write upon it No. 125 and place it in thy girdle, and then you can walk.—126. To become wise, remember for three months running, from the new moon of Nissan onwards, the words of No. 126, and add in the 'Eighteen benedictions': "May the gates of wisdom be opened to me so that I should meditate in them."—127. To remember immediately all thou learnest, write on a new-laid egg No. 127, then wash it off with strong wine early in the morning and drink it, and do not eat anything for three hours.—128. To make another forget what he has learned, write No. 128 in his name on laurel-leaves and bury them under his lintel.—129. To send an evil spirit against thy neighbour, take a green grasshopper and say over it No. 129, and bury it in an earth-hill and jump over it.—130. To send a plague, take the bone of a dead man and dust from under him in a pot and tie it up in a woven rag with saliva, and say upon it

Digitized by Google

No. 130 in his name, and bury it in the cemetery.—131. To tie and to fasten thiefs and robbers, say No. 131, and whilst saying it put your little finger in the ear —132. To release them, say No. 132, and take thy finger out of the ear.—133. To guard thy house from thieves, say No. 133 over a cup of water and pour it out round thy roof. Thus also to guard a house.—134. To guard a house from hosts (robbers), take earth from an ant-hill and strew it round the roof, repeating the words of No. 134.—135. To guard thyself from Mazikim, say: "In the name of 'Nos. 1–5' may I, NN, pass in peace and not in hurt." The same must be done to excommunicate them when you meet them.—136. For every other thing that has not been mentioned say, No. 136 to the end of the "Sword."

And upon every amulet that you write from this "Sword" write first: "In the name of the Lord of all the holy ones, may this 'Sword' be effectual to do my services, and may the lord of it approach to serve me, and may all these powers be delivered over to me so that I be able to use them, as they were delivered to Moses, the son of Amram, perfect from his God and no harm befalling him!" If he will not act accordingly the angels of wrath, ire, fury, and rage will come near him to minister to him, and they will lord over him, and strangle him, and plague him all over. And these are the names of their leaders: the leader of the angels of wrath is Mzpopiasaiel; the name of the leader of the angels of ire is Zkzoromtiel; the name of the leader of the angels of fury is Kso'ppghiel; the name of the leader of the angels of rage is N'mosnikttiel. And the angels that stand under them are numberless, and these all will have power over him, and will make his body like unto a dunghill.

May the Lord preserve you from every evil. Amen!

End of the "Sword," with the assistance of God feared in the council of the holy ones. End, end.

APPENDIX I.

In the name of the Lord. The Sword of Moses.

I. [A long list of mystical names; then follows:] and the angel over the animals, whose name is Ittalainma; and the angel over the wild beasts, Mtniel; and the angel over the wild fowls and over the creeping things, Trgiaob; and the angel over the deep waters and over the mountains, Rampel; and the angel over the trees, Maktiel; and the angel over the sweet-smelling herbs, Arias; and the angel over the garden fruits (vegetables), Sofiel; and the angel over the rivers, Trsiel; and the angel over the winds, Mbriel; and over man, X.—. . . hours are proper for man to pray and to ask for mercy upon man, be it for good or evil; and it is said that every hour is proper for man to pray, but during the three first hours in the morning man is to pray and to mention the hundred sacred names and the mighty ones, whose sum amounts to three hundred and four. Amen. Selah!

. . . . . X give me healing . . . .

Which is the great light? All the . . . . X, I conjure you, mother of the (whether?) male and mother of the (or?) female, you, the "Twins," I conjure you, the hard (strong) spirits, in the name of God, the mighty hero, the living one [Michael], in the name of God [Gabriel], . . Raphael (save) me from the Lions, the powerful ones (Archons?), and the Twins. I conjure you, strong spirits, in the name of God, the mighty hero, IH, IHVH, IHVH, I, N, son of N . .

II. Verily, this is the ("Sword of Moses") with which he accomplished his miracles and mighty deeds, and destroyed all kind of witchcraft; it had been revealed to Moses in the bush, when the great and glorious Name was delivered to him. Take care of it and it will take care of thee. If thou approachest fire, it will not burn thee, and it will preserve thee from every evil in the world.—1. If thou wishest to try it take a thick (green) branch and

Digitized by Google

utter this "Sword" over it five times at sunrise, and it will dry up.—2. To catch fish, take sand from the sea and the root of the date (tree) (or the kernel of the date), and repeat this "Sword" over them, and the fish will come to the spot where thou throwest the sand.—3. To walk on the waters of the sea take the wooden helve of an axe, bore a hole through it, pass a red thread through it, and tie it on to thy heel, then repeat the words of the "Sword," and then you may go in and out in peace.—4. To run quickly (?), write the "Sword" on "Chartis hieratikon," then put water into a new earthenware pot, and let them drink it and wash their faces, and they will be victorious!—5. To break it (?), write the "Sword" on a plate of copper (*kyprinon*) and put it in . . and they will be broken.—6. To subdue a woman, write with the blood of thy hand thy (?) name upon thy gate, and write thy name upon a scroll of leather of a hart with the blood of thy finger, and say this "Sword," and she will come to thee.—7. To make thyself praised in the community, take in thy left hand porret-seed and utter over it the "Sword," and throw it between them,[1] and descend (?) until the sun sets, and he will carry thee wherever thou wishest, and fast for three days, and burn incense and the smoke of white flower, and repeat the "Sword" in the morning and the evening, and he will come instantly and speak to thee and do thy bidding.—8. To get information through a dream, take balm and write upon "Chartis hieratikon," and repeat the "Sword" in front of a light, and put out the light with a stick of olive-wood, and lie down.—9. If thou wishest to go to a great man, take rose-oil and repeat the "Sword" over the oil and anoint thy hands and face with it, and he will hearken unto thee.—10. To make strife in the community, take the left hand full of mustard, speak the "Sword" over it, and throw it amongst them, and they will kill one another.—11. To separate a man from his wife, take ass's meat in thy hand and say over it the "Sword," and no harm will befall thee (?).—12. To destroy

[1] There is something probably missing here.

Digitized by Google

thy enemy, take a leaden plate and some of his hair and clothes, and say the "Sword" over them, and bury them in a deserted house, and he will fall down.—13. To walk in the street and not to be recognized by anyone, take wormwood, perfumes, and soot, and smoke thyself with it, and take the heart of a fox, and say the "Sword," and go out in the street.—14. If you are on the sea and the storm rages, stand up against the waves and say the "Sword" to them, and they will go down; then write on a plate, or potsherd, or a piece of wood, and hang it in front of the ship, and it will not founder.—15. To break an enemy, write the "Sword" upon a potsherd that has not yet been burned, and plaster it over, and throw it into his house.—16. To obtain anything thou likest, take into thy right hand wormwood, and say over it the "Sword" facing the sun, and everything will be fulfilled, and purify thyself for seven days, and thou wilt prosper in everything. Do kind deeds to thy friends, take heed not to take an oath, and walk modestly, and thus thou wilt prosper.

Write X upon the palm of thy left hand, take then a new lamp and fill it with olive-oil and naphtha, and put on new clean clothes, and sleep in a clean house, and the angel will come at once and wake thee, and reveal unto thee everything that thou wishest.

III. R. Akiba asked R. Eliezer the great: "How can one make the Angel of the Presence descend upon earth to reveal to man the mysteries from above and beneath, and the speculations of the foundations of heavenly and earthly things, and the treasures of wisdom, cunning, and help?" He said thereupon to me: "My son! I once made him come down, and he nearly destroyed the whole world, for he is a mighty prince and greater than any in the heavenly cohort, and he ministers continually before the King of the Universe, with purity and separation, and with fear and dread of the glory of his Master, because the Shekinah is always with him." And he said to him: "My master, by the glory which thou hast bestowed upon me, I conjure thee to instruct me how to attach him to me." (And he

Digitized by Google

replied): "In that hour when I wish to attach him to me and to employ him, I sit and fast on that very day; but prior to it one must keep oneself free for seven days from any nocturnal impurity, and must bathe in the fountain of water, and not speak at all during those seven days, and at the end of this purification, on the day of the fast, he must sit in the water up to his throat, and before he utters the conjuration he must first say: 'I conjure you, angels of dread, fear, and shaking, who are appointed to hurt those who are not pure and clean and desire the services of my heavenly servants—I conjure you in the name of X, who is mighty over all, and rules over all, and everything is in His hands, that you do not hurt me, nor terrify me, nor frighten me; verily, in the name of the powerful, the head of . . . ' After this he may commence his conjuration, for now he has fortified himself and has sealed himself with the name of God of 42 letters, before which all who hear it tremble and are frightened, and the heavenly hosts are terror-struck. He must then again conjure, and say: 'X, chief, who of all the destroying angels is the most hurtful and burning, with this Name and in this way I call thee AVZHIA, angel of the Presence, youthful minister before the King of the Universe, who art a prince and chief of the heavenly hosts; I conjure thee and decree upon thee that thou attachest thyself to me to fulfil my wish and to accept the decree of my conjuration and to accomplish my desires and fulfil my wishes, and do not frighten me, nor terrify me, nor overawe me, and do not make my frame shake and my feet vacillate, nor cause my speech to be perverted; but may I be fortified and strengthened, and may the conjuration be effective and the (sacred) Name uttered properly by my throat, and may no vacillation take hold of me and no trembling of the feet by thy ministering angels confuse me and overawe me, and weaken my hands, and may I not be overcome by the fire and flame of the storm and whirlwind which precedes thee, O wonderful and exalted one, whose Ineffable name is X, of whose wrath the earth trembles, and nothing can

Digitized by Google

withstand his anger, twice blessed. Again I conjure thee by thy 14 (!) names by which thou didst reveal thyself to thy prophets and seers, to place in their mouths sweet words of prophecy and to utter pleasant words; and these are the Ineffable names and their surnames (Kunya): Spirit Piskonnit, kunya, X; Atimon, kunya, X; Piskon (?), Hugron, kunya, X; Sanigron, kunya, X; Msi, kunya, X; Mokon, kunya, X; Astm, kunya, X; Sktm, kunya, X; Ihoaiel, kunya, X; Iofiel, kunya, X; Ssnialiah, kunya, X; Kngieliah, kunya, X; Zabdiel, kunya, X. I conjure thee with these fourteen names, by which all the secrets and mysteries and signs are sealed and accomplished, and which are the foundations of heaven and earth. Four of these are engraved upon the heads of the Ḥayoth (Holy Creatures), namely—X, the lord of powers; X, master of miracles; X, master of purity; and X, master of the yoke. And four are engraved upon the four sides of the Throne, namely—X, three times holy; X, Adir, Adiri, Adiron, etc., the king of kings. And four are engraved upon the four crowns of the Ofanim (wheels) that stand against the Holy Creatures, as it is said: "When those went, these went; and when those stood, these stood" (Ezek. i, 21); and these they are —X, who is the mightiest over all; X, who rules over all the inhabitants of the heights (?), and in whose hands everything is. And two are engraved upon the crown of the most exalted and high King, and these they are—X, before whom every knee bends and every mouth utters praises; X, besides him there is no God and helper. With these names I conjure thee, and firmly decree upon thee to descend quickly to me, N, son of N, thou and not thy messenger. And when thou comest down do not turn my mind, but reveal unto me all the secret mysteries from above and beneath, and the hidden secrets from above and beneath, and all the secrets of wisdom and the cunning of helpfulness, just as a man speaks to his neighbour. For I have conjured thee with these Names, that are great and mighty and wonderful and awe-inspiring, and proved and arranged in proper order, through which the glorious

Digitized by Google

throne has been established and the beautiful seat of the Most High, which has been wonderfully wrought, long before thou and the heavenly hosts had been created, "While as yet He had not made the earth nor the fields, and the inhabitants of the earth and the creatures therein" (Prov. viii, 26).

"'I call thee further by (the power) of the five selected Names, to which only one is superior, and this is their form—X. I conjure thee by these five Names, which correspond to the five names of God, whose letters are written on burning fire, and they circle round the throne of glory, one ascending and the other descending, so that the angels of the Presence should not behold them, and this is their equivalent and form and glory—X. I conjure thee by these, as thou knowest their praise and greatness, which no mouth can utter, and no ear can hear, no, not even one of them. Thou hast been commanded and ordered by the Most High: "as soon as thou hearest anyone conjuring thee with these names, to do honour to My Name, and to descend quickly and fulfil the wish of the man who makes thee hear them; but if thou tarriest I will push thee into the fiery river Rigayon and place another in thy stead." Do it, therefore, for His Name, and come quickly to me, N, son of N, not in a terror, and not in fear, not with fiery coals, not with hailstone, and not with the sleet and treasures of snow, and not with the howling of the storm, and not with the provinces of the whirlwind that usually accompany thee, and do my bidding and fulfil my desire, for everything is in thy hand; by the permission of thy God, the master over all and thy lord, and with His Names I conjure thee to attach thyself quickly to me; come and fulfil my wish, and do not tarry.

"'I further call thee with the greatest of thy Names, the pleasant and beloved one, which is the same as that of thy Master, save one letter, with which He created and formed everything, and which He placed as a seal upon all the work of His hand; and this is its equivalent—X, and the

Digitized by Google

other in the language of purity (permutations of the letters Yod, He) is read so—X. I conjure thee with the right hand of sanctity and with His beloved Name, in whose honour everything has been created, and all are terror-struck by His mighty arm, and all the sons of the internal heavenly cohort (servants) tremble and shake of His fear, which is X, and its equivalent by means of JHVH is X. Blessed be the name of His glorious kingdom for ever and ever. And all praise and extol thy Name, for they love thee. I conjure thee, and decree upon thee firmly, not to disobey my words, and not to alter my decree and my decision with which I conjured thee, and decreed upon thee, and established in peace. In the Name X, blessed be the name of His glorious kingdom for ever and ever, depart in peace, and do not frighten me in the hour of thy departure; in the name X, Lord, most high and holy, in the name of the Lord of Hosts, the God of Israel's battalions; in the name of the holy living Creatures, and in the name of the Wheels of the Chariot, and in the name of the river of fire, Ih, Zii, Ziin, and all His ministers, and in the name of IH, Ziin, Sabaoth, Z, El Z, Shaddai Z, X revealed Himself on Mount Sinai in the glory of His majesty.

"'With these Names, terrible and mighty, which darken the sun, and obscure the moon, and turn the sea, and break the rocks, and extinguish the light, I conjure you, spirits, and . . and Shiddim, and Satanim, that you depart and disappear from N, son of N.'"

APPENDIX II.

I. *Against an enemy.*—I call thee, evil spirit, cruel spirit, merciless spirit. I call thee, bad spirit, who sittest in the cemetery and takes away healing from man. Go and place a knot in NN's head, in his eyes, in his mouth, in his tongue, in his throat, in his windpipe; put poisonous water in his belly. If you do not go and put water in his belly, I will send against you the evil angels Puziel, Guziel,

Digitized by Google

Psdiel, Prziel. I call thee and those six knots that you go quickly to NN and put poisonous water in his belly and kill NN whom I mean (or, because I wish it). Amen, Amen. Selah.

II. *Against an enemy.*—Write upon a new-laid egg on a Nazarene cemetery: "I conjure you, luminaries of heaven and earth, as the heavens are separated from the earth, so separate and divide NN from his wife NN, and separate them from one another, as life is separated from death, and sea from dry land, and water from fire, and mountain from vale, and night from day, and light from darkness, and the sun from the moon; thus separate NN from NN his wife, and separate them from one another in the name of the twelve hours of the day and the three watches (?) of the night, and the seven days of the week, and the thirty days of the month, and the seven years of Shemittah, and the fifty years of Jubilee, on every day, in the name of the evil angel Tmsmael, and in the name of the angel Iabiel, and in the name of the angel Drsmiel, and in the name of the angel Zahbuk, and in the name of the angel Ataf, and in the name of the angel Zhsmael, and in the name of the angel Zsniel, who preside over pains, sharp pains, inflammation, and dropsy, and separate NN from his wife NN, make them depart from one another, and that they should not comfort one another, swiftly and quickly."

חדש וכסה אותו בו מעם שמן זית ומעט נפט ולבוש בגדים נקיים
ותישן בבית פהור ומיד בא מלאך ומעמיד לך ומגלה לך כל
מה שאתה מבקש.

III. שאל ר׳ עקיב׳ את ר׳ אליעזר הגדול במה משביעין את שר
הפנים לירד לארץ לגלות לאדם רזי מעלה ומטה ומחקרי יסודי מעלה
ומחקרי יסודי מטה ותעלומות חכמה וערמה תושיה · אמ׳ לי בני מעם
אחת הורדתי ובקש לשחת העולם כולו כי שר אדיר הוא מכל פמליא
של מעלה ותמיד עומד ומשרת לפני מלכו של עולם בנקיות פרישות
מהרה ואימה ויראה בכבוד קוניו(!) לפי ששכינה עמו בכל מקום · א״ל
ר׳ הריני מזקיק בו על אחת שבועה בהודי שהורתני · בשעה שאני
מזקיק עצמי להשתמש בו יושב אני בתענית יום אחד שהוא מורידו
וקודם לאותו היום יקדש את עצמו ז׳ ימים מן קרי ויהא צובע[1] באמת
המים ולא יהא מסיח סיחה ולתכלית ימי מהרתו ביום תענית ירד
וישב במים עד צוארו ויאמר קודם שישבע משביע אני עליכם שרי אימה
ויראה ורעד · שאתם ממונים לפנוע במי שאינו נקרה ומהור ונוגע
להשתמש במשרתי עליון בשם הנכבד והנורא הזה שנקרא קְתַת יְהֹ
הֹיֹה סַנְגֹ קְקְ [f. 64a] הֹוֹתַת הֹוֹ יְהֹ סַנְיֹקְקְ הֹוֹתַת הֹוֹ יְהֹ פַּפְנֹנֹה יְהֹ וֹהֹ
יְהֹ אַנְקְסְ יְהֹוֹה אדיר על הכל ומושל בכל והכל בידו שלא תזיקני ולא
תרעישני ולא תפחידוני באמת · גבורות גולה הרוץ " ואחד יפתח
וישבע כי נתחזק כי חתם עצמו בשם של מ״ב אותיות שמי שישמעו
יתבהלו ויפחדו וירעשו כל צבא מרום ויחזור וישביע אותם אֹדֹד גֹהֹוֹ
דֹהֹ וֹוֹ פְּצַץ יְהֹ שר שהוא פוגע ולוהם בכל מלאכי חבלה בשם הזה
בלשון הזה לך אני קורא אוהיא שר הפנים נער ומשרת לפני מלכו
של עולם שהוא שר ורב על צבא מרום משביע אני עליך ונזור אני
עליך שתוסיף לי להיזקק [רצוני] לרצוני ותקבל שבועת נזידתי ושאילתי
עשה ובקשתי תמלא ולא תבהליני ולא תרעידני ולא תחלחלני ולא
תזיע קומתי ולא ימעד קרסולי ולא תעזות דיבור שפתי ואתחזק ואתאמץ
והשבועה יתנבר והשם יסדר בגרוני ולא תאחזיני עות ולא תנידני רגל
משרתיך לבהלני וליראני לרפות ידי ולא אשמוף באש ולהבה בסופה
וסערה המהלכת עמך נפלא ונשגב שכך פירושו יוֹ הֹי גֹנֹ הֹוֹ הֹיֹה
עֹתְרֹנֹ הֹוֹוֹ יְהֹ מְמֹסְ יֹגֹנֹ הֹי הֹי שְׁמְסְ הֹי הֹוֹ הֹיֹה מקצה תרעש
הארץ ולא יכיל הכל ועמו ברוך מדבורך[2] " שוב אני קורא לך בי״ד
שמותיך שאתה נגלה להם לנביאים ותווים להמתיק דברי גביאות
[f. 64b] בפיהם ולהנעים אמרי נועם · וכך פירושם וכינויים רוח
פיסקוניות · וכינוי קְסְמְ נֹגֹי הֹוֹ הֹיֹה · מפורש אפשמן · כינוי צְצְמְסְ
גֹיֹהֹ הֹי הֹוֹה · מפורש פיסקון(!) מפורש הוגרון כינוי מְצְהוֹסְ הֹיוֹ גֹה

---

[1] צובע כמ׳ ויכבם ומת׳ ויצבע. [2] ומבורך l.

II. אמת הוא זה תרבו של משה שהיה עושה בו ניסים וגבורות
ויכלה כל[1] כשפים והיא נגלית למשה בסנה ונמסר לו השם הגדול
והמפואר ושמות[2] אותו באמת והוא שומר אותך · לאיתתא לא תגש
ולא תיכה והוא מצילך מכל צרה בעולם הזה · [3]ואם רצית לבדוק קח
עץ עבות ואמור התרב עליז ה' פעמי במעלה השמש ויבש · [4]ואם
תרצה לאותו דגים קח חול מן הים ועיקר תמרה ביד שמאל ואמור
התרב עליהן והן באין במקום שתשליך החול · [5]ואם רציתה להלך בים
קח עץ מפרזלא וקוב אותו ותרוז בו חום שני · וקשור אותו בעקבך
וכת' ואמ' התרב עליו ולך והכנם וצא בשלום · [6]ואם רצית להריץ
יפה כת' התרב בכרמים אי ארא מיקון · ותן יין בתרש החדש
וישתו וירחצו פניהם ונוצחין · [7]אם רצית לשבור אותו כת' תרב על
פס קפרינן וסמון בקמסון ומשתברין [6]להבאל(?) כת' מרם ידך על שערך
שמך[3] וכת' במגילת צבי בדם אצבעך בשמך ואמור התרב והיא באה ·
[7]ואם רצית לברך בקהל קח זרע כרישין ביד שמאל [f. 63a] ואמור
התרב ונזוק[4] בתוכם ורד עד שיבא השמש · ויטול אותך כרצונך וצום
ימים נ' · ועשן לבנה ופרח לבן ואמור התרב בבקר ובערב מיד יבא
וידבר עמך ויעשה כרצונך [8]ואם לשאילת חלום קח שמן אפיבלסמון
וכת' על קרמים[5] · אירישיקון והזכר התרב לפני הגר והכה את הגר
בשבט של זית וירבץ . [9]ואם רצונך לבא אצל אדם גדול קח שמן
וזרד ואמור תרב על השמשתן[6] על פניך וידיך וישמע לך · [10]ואם
רצית ליתן ריב בקהל קח תרדל מלא כפך השמאלית · ואמור התרב
ודזק וידרגו זה לזה · [11]ואם רציתה להפריש איש מאשה קח בשר
של חמר בניוך[7] ואמור התרב על שנייהן וראה[8] לא תקרוב ביניך ·
[12]ואם להפיל שנאך קח מס של עפרת וקח משערו ומבגדו וכת' התרב
ותן בבית התריבה וירביץ · [13]ואם רצית להלך בשוק ולא יכירך
אדם · קח ארמימסין ובשמים ופיה ועשן עצמך וקח לב שועל ואמור
התרב וצא · [14]ואם היית בים וקם סער עליך עמוד נבח הגלים ואמור
תרב והם נומשים · וכת' במם או בתרם או בעץ ותלי יתיה לפני
הספינה ולא תטבע · [15]ואם רצית לשבר שנאך כת' התרב על הרם
שלא נכנם לאור ושוח התרם והשלך בביתו · [16]ואם רצית לעשות
כל דבר כך בימינך ארישימום(!) ואמור תרב נוכח השמש ויעשה כל דבר
וישהר עצמך ימים [f. 63b] שבעה ותצלח בכל דבר ולתבירים עשה
מצות ושמר עצמך מכל שבועה והצנע לנמשך ובבן תצלח בכל אשר
תעשה " חזק " שעקע קמסרן " אותרן · אירפת נופיד נקשים נ' ·
סגבוני כתם כי בתי תימן אביץ · בת' על בף ידך שמאל והבא נר

[f. 1a] בשמיה דאלהא רבא וקדישא

I. ארבעה מלאכים הממונים על החרב הנתונה מפי [1] אה וה יה ה[2]
היה אדון הרזים וממונין על התורה והם רואים במחקרי רזי מפה ומעלה
ואלה שמותם שקד חוזי " מרניואל " והדרזיול[3] " סומריסי " ולמעלה
מהם תמשה שהם קדושים ועזיזים והסוברין כך מסתבר סתרי אהי הי
ידי בעולם שבע שעות ביום וממונים על אלף אלפי רבאות ואלף
מרכבות מזורזים לעשות רצון [קונם] " אהי הי היה " אדון האדונים
ואל אלהים נכבד " ואלה שמותם " מהיהונצי " פחדותתנם " אסקריהו "
שיתיניחום " קתגניפרי " וכל מרכבה ומרכבה שהן ממונים עליהם על
שרי כל אחת ואחת " מתמיה " ואומר היש מספר לגדודיו והפחות
שבמרכבה שר ורב על כל ארבעה שרים הללו " ומעלה מהם שרים
שלשה שרי צבא של " אה יוה ויו ויו " אדון הכל שהן מזיעין ומבהלין[4]
היכלות שמונה שלו ביום יום ברעש וברעד ורשות להן על כל פועל
ידיו ומתתם כפלים מרכבות אלו " והפחות שבמרכבות שר ורב על
כל השרים הללו " ואלה שמותם " אסההי " שפריס " הויה " סהותניאיה "
שר ורב מלך אהיו " פסקתיה שמו " שהוא יושב וכל צבא מרום בקידה
ובכריעה ובהשתחויה אפים בתראש ארצה לפניו בכל יום בפמירתן
מהשתחוואות[5] לפני נקץ " שלאה הו אוהה " אדון הכל " וכשאתה
משביעו נזקק לך ומזקיק לך את החמשה שרים האלו וכל המרכבות
אשר תחת רשותם ואת כל השרים האלו אשר מתחת ידם כי כך נתפקד
הוא וכל אותם השרים ליזקק למשה בן עמרם ולהזקיק לו כל השרים
שמתחת רשותם ולא יתעכבו בשמעתן ולא לזוז ממנה הנה והנה
להמשיל את כל המשביעין אותן על זה החרב את רזיה ואת צפוניה
כבודת נדולתה ותפארתה ולא יעכבו כי נזירת " אבדוהו " הוה צל
אליה אל יה " עליהם לאמר כל בשר ודם שישביע אתכם אל תעכבוהו
ואל תשנהו ממה שנצטויתם על משה בן עמרם עבדי כי בשמותי
המפורשים הוא משביע אתכם וכבוד לשמי אתם עושים ולא לו " ואם
תעכבו בו אני שורף אתכם כי לא כבדתם אותי וכל א' וא' מסר לו

Editorial Statement

We are pleased to present the tenth volume of *Ginzei Qedem*, an annual publication devoted to Genizah texts and studies. The term Genizah here functions as a collective noun for the Genizot around the world, and the current volume demonstrates the broad variety of the genre and its research. An article on the documents of the newly discovered Afghanistan Genizah is included here, together with texts from the recently re-discovered Damascus Genizah as well as new texts from the well-known Cairo Genizah.

The diversity of the Genizah research is displayed in this volume as well, as it represents many fields, including Biblical studies and exegesis, Halakha, liturgy, history, magic, and more.

Ginzei Qedem's purpose is to provide a specialized venue for the field of Genizah research, in the hope that research on and publication of Genizah texts will, in time, enrich both traditional and academic Jewish studies, as well as Islamic ones.

Genizah research has made great strides in the last decade, mainly with the establishment of the Friedberg Genizah Project, of which Ginzei-Qedem is one branch. As part of the effort to serve our readers, the electronic edition of Ginzei Qedem will be assimilated in the FGP website and will be synchronized with the images and the bibliographic data of the FGP database.

Contributions to Ginzei Qedem may be in Hebrew or English. Any substantial quotations in a language other than that in which the article is

written must be accompanied by a translation, and articles in Hebrew must be accompanied by an English abstract.

Contributions may be sent to: Ben-Zvi Institute, P.O.B. 7660, Jerusalem 91076, Israel. Contributions and queries may also be sent by e-mail to the editor at zvi56@ybz.org.il.

A Babylonian Jewish Aramaic Magical Booklet from the Damascus Genizah

Gideon Bohak and Matthew Morgenstern

The Damascus Genizah

Although discovered at about the same time, the Damascus Genizah is far less widely known among Jewish studies scholars than its more famous sister, the one from Cairo.[1] There are two reasons for this ignorance. First, the vast proportion (more than ninety-nine percent) of the Damascus Genizah consists of Muslim Arabic texts, which are of little interest to most students of Jewish studies, and the remaining 0.5% consists mostly of Christian fragments, only some of which, notably those containing sections of the Septuagint, are of relevance for students of Judaism. Barely a handful of the texts are written in Hebrew, Aramaic, or Judaeo-Arabic and are of Jewish origin.[2] Second, the Christian and Jewish texts that made their way into this Muslim Genizah and were preserved there until the early twentieth century were shipped to Berlin in 1902 and shipped back to the Ottoman court in Istanbul in 1909, and have never been seen again. Only recently has it been discovered that while the fragments themselves are still missing (and may be found one day in Damascus, in Istanbul, or

1 For the Damascus Genizah, see the excellent study by C. Bandt and A. Rattmann, "Die Damaskusreise Bruno Violets 1900/1901 zur Erforschung der Qubbet el-Chazne," *Codices Manuscripti* 76/77 (2011): 1–20.

2 For the Christian fragments, see Bandt and Rattmann, esp. pp. 18–20; for the Jewish ones, see ibid., p. 20. See also A. Ashur, "A Ketubbah in the Palestinian Style with the Permission of Matzliah Gaon, from the Damascus Genizah," *Pe'amim* 135 (2013): 163–70 (Heb.).

elsewhere), good black and white images of some of these fragments have survived in several different collections.[3]

A Babylonian Jewish Aramaic Magical Booklet

Among these now-lost fragments is a set of seven parchment folios of small size and irregular shape containing magical spells and recipes in Jewish Babylonian Aramaic, photographs of which may now be found in the Staatsbibliothek zu Berlin under the shelf mark Or. Sim. 6.[4] The writing surface, handwriting, style, and contents make it clear that all seven folios were written by the same scribe, whose hand was identified by Judith Olszowy-Schlanger as dating to the eleventh century and displaying some possibly Babylonian features. All seven folios probably came from a single booklet, which must have contained more such folios. The order of the preserved folios cannot be determined for certain, but we tried to arrange them in what seems to be the most plausible sequence.[5] The longest

3 For the circumstances under which they were taken, see Bandt and Rattmann, pp. 9–10, 12, 16, and 18.

4 We are extremely grateful to Amir Ashur and especially to Ronny Vollandt, who is now cataloguing the Damascus fragments in Berlin, for bringing these texts to our attention. We are also grateful to Christoph Rauch for the photographs and for the permission to publish them here, to Cordula Bandt for sharing with us other photographs of the Damascus Genizah fragments, and to Judith Olszowy-Schlanger for her palaeographical advice. Dr. James Nathan Ford read the manuscript and proposed many helpful readings and interpretations, as well as granting us permission to cite from magic bowls that that he is preparing for publication (cited as JNF). Professor Shaul Shaked aided us with the Persian material and similarly granted us permission to cite from his work on the Martin Schøyen collection (cited as MS).

5 Unfortunately, the Arabic numerals on the margins of the folios bear no clear relation to the folios' original order. For the circumstances under which these numerals were added to the original folios see Bandt and Rattmann, p. 13 and Plates 7 and 8. The same is true of the small etiquettes with sequential numberings which were placed next to each folio while the pictures were taken, which also bear no relation to the original order of the folios.

continuous stretch of text is found in our folios 5–7, where the spell that begins in 5b continues into 6a, 6b, 7a, and 7b, ending at the bottom of 7b. Similarly, there is a clear textual continuity from 1b to 2a and then to 2b, and from 3a to 3b and to 4a and 4b. On the other hand, some text is probably missing before 1a, there seems to be a break between 2b and 3a, and the continuity between 4b and 5a is far from certain. In such cases, one may either try to re-order the folios in a way that would leave fewer gaps or assume, as we do, that more folios are still missing in these places, especially before 1a and between 2b and 3a. How long the original booklet was we cannot say, nor can we reconstruct the structure of its quires, as even its bifolia were dismembered before they were photographed.

One additional factor complicating the reconstruction and interpretation of this set of magical texts is that only three of the recipes bear clear titles: לאהבה (for love) in 2b:7, לשלוח אש (lit., "for sending a fire," i.e., for aggressive magic) in 3a:3, and לשילטון (for [appearing before] a governor) in 5a:4. In all other cases, no titles are provided, and it often is unclear where one recipe ends and the next begins. Unfortunately, the punctuation marks used by the scribe do not seem to mark the beginnings or ends of the magical recipes in any consistent manner or to separate the spells from the ritual instructions that explain how to employ them. These difficulties are compounded by the fact that a single textual unit may cover more than one magical aim; for example, the long text that begins in folio 5b sets off without any title or explanation (the previous recipe was "for [appearing before] a governor" and ended at the bottom of 5a) and includes a long spell for what is usually known as "opening the heart," i.e., memorizing the words of the Torah and the Talmud. But then, in 6b:5, we find the connecting word ותוב, "furthermore," followed by a long spell for protection against all types of demons, and in 7a:5 we move without any apparent break to a second anti-demonic spell, which begins with חתים ומחתם, "sealed and counter-sealed," and runs to 7b:6. Only then is the user instructed to recite this adjuration on three (consecutive?) Fridays before

dusk, to immerse himself in water, and to fast and abstain from sexual intercourse during these three Fridays. Thus, it seems that the ritual instructions were applied to a set of three adjurations, one of which was intended for the memorization of Torah and the other two for protection against demons.[6] Such mixtures might be due to copying errors or deliberate editorial activities taken by our scribe or by one of his predecessors, and they certainly reflect the recipe's complex transmission history and contribute to the difficulties inherent in interpreting magic spell texts.

Another feature of these recipes, which also reflects their long transmission history, is that whereas the spells to be recited or inscribed are consistently given in Aramaic, the ritual instructions are sometimes given in Aramaic (e.g., 3a:5–3b:4 and 7b:7–11), but in other cases are given in Arabic, here written in a phonetic manner that is also typical of the earliest Judaeo-Arabic fragments from the Cairo Genizah (e.g., 5a:1–4).[7] This is an example of a phenomenon that is well attested in both Jewish and non-Jewish magical recipe books, namely, that when the society using these recipes switches from one language of communication to another (in this case, from Aramaic to Arabic), its spell-mongers often continue transmitting the spells to be recited or inscribed in the old language, even though it is no longer fully understood, but gradually translate the practical instructions into the new vernacular.[8] In this respect, our booklet is a clear

6 As both the ritual instructions and the first of the three spells bear some resemblance to the Sar Torah rituals of the Hekhalot literature, it is likely that the anti-demonic spells are a later addition to whatever the "original" recipe may have contained.

7 For the "pre-Saadian" methods of writing Judaeo-Arabic, see J. Blau and S. Hopkins, "On Early Judaeo-Arabic Orthography,' " *Zeitschrift für arabische Linguistik* 12 (1984): 9–27 and more recently J. Blau and S. Hopkins, "On Aramaic Vocabulary in Early Judaeo-Arabic Texts Written in Phonetic Spelling," *Jerusalem Studies in Arabic and Islam* 32 (2006): 433–71.

8 For this phenomenon, see further discussion in G. Bohak, *Ancient Jewish Magic: A History* (Cambridge: Cambridge University Press, 2008), 220.

example of the ongoing circulation of some older Jewish Aramaic magical spells and recipes in the Arabic-speaking Jewish communities of the Middle Ages.

In many ways, including the small sizes and irregular shapes of the folios, the mixture of Aramaic and Judaeo-Arabic, the aims of the individual recipes, and most of the ritual techniques they employ, the Damascus Genizah magical booklet looks quite similar to the earliest parchment magical recipe books from the Cairo Genizah, with which it is roughly contemporaneous.[9] However, the Damascus booklet is distinct from its Cairene siblings in the strong Babylonian flavor of its spells, and perhaps also of some of its ritual instructions. This is especially apparent when we note the numerous parallels between these spells and those found in the Babylonian Jewish (and non-Jewish) incantation bowls, many of which are noted in our commentary to the text. It is, of course, true that these recipes also bear many resemblances to the Palestinian Jewish Aramaic magical texts, as attested in late-antique metal-plate amulets and in many Genizah magical texts, but their resemblances to the incantation bowls are far more numerous and far more striking. Moreover, in some cases the Babylonian elements are even more obvious, including, for example, the appearance of Babylonian deities in 2a:10 and of the Chaldaean priests in 4a:8. Thus, not only the folios' provenance and language (on which more below) but also their contents argue for their "Eastern" origins, in or around the world of late-antique Babylonian Jewish magic. This is a world about which we know much, but almost exclusively from a single type of source, namely, the Babylonian incantation bowls, to which may be added such texts as the *Havdala de-Rabbi Akiba*, the *Pishra de-Rabbi Hanina ben Dosa*, and perhaps also the *Sword of Moses*. Thus, the emergence of a first clear example of a Babylonian-Jewish magical

9 See, for example, T-S K1.143, published in J. Naveh and S. Shaked, *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1993), Geniza 18.

recipe book whose recipes are not embedded into any "literary" structure and display no thematic unity should make a major contribution to the study of this branch of the Jewish magical tradition. This is all the more important since this branch more or less died out in a subsequent period, as may be seen from the very few parallels between the incantation bowls and the magical recipes from the Cairo Genizah (or from non-Genizah Jewish manuscripts, including "Oriental" ones).[10] In this respect, we may note that our recipes too find very few close parallels among the published and unpublished magical texts from the Cairo Genizah and that when such parallels emerge, they are found in Cairo Genizah recipe books which display some telltale signs of the Babylonian Jewish origin of at least some of their recipes (see our notes to 2b:4–6 and 5a:4-7).

One final feature of our booklet that may be highlighted here is that while the structure of the individual recipes is not always clear, in many cases the incantations, including long stretches of *voces magicae*, seem to precede the ritual instructions, which often are quite short. In this respect, these recipes seem to differ from most magical recipes from the Cairo Genizah, which usually provide the ritual instructions first and then cite the incantations that are to be inscribed or recited. Whether this is a mere coincidence or a more typical feature of Babylonian Jewish magic is an issue that will have to be dealt with elsewhere, and only after more such texts are discovered and analyzed.[11]

10 For these parallels, see especially D. Levene and G. Bohak, "Divorcing Lilith: From the Babylonian Incantation Bowls to the Cairo Genizah," *Journal of Jewish Studies* 63 (2012): 197–217. Two more parallels will be discussed in a forthcoming publication by James Nathan Ford, but given the availability of hundreds of Genizah fragments and hundreds of bowls, such parallels clearly are the exception rather than the rule.

11 We note, for example, the occurrence of this phenomenon in the magical recipes of T-S Misc. 34.22, which displays many other signs of its Babylonian Jewish provenance (and cf. below, n. 84). The instructions similarly follow the incantations in Mandaic spells. See M. Morgenstern and T. Alfia, "Arabic Magic Texts in Mandaic Script: A Forgotten Chapter in Near-Eastern Magic," in R. Voigt (ed.), *„Durch Dein*

In addition to the Babylonian vocalization found sporadically in the manuscript, its Babylonian origin is manifest in several linguistic features, which are mostly grammatical. Some of the formulae are more classicizing than others, but many of the recognizable Babylonian dialectal features appear both in the spells and in the instructions that accompany them (insofar as these have been preserved in the original Aramaic). Representative examples of Babylonian features will be cited here.

Phonology: ותו, "furthermore" (1b:9) for תוב, showing characteristic loss of word-final *b̲*. דוץ, "stick in" (3a:7), from root דע״ץ, showing the loss of the historical ʿ and concomitant shift to II-*waw*/*yod* class.[12] Similarly, תריסר, "twelve" (4a:7), with loss of ʿ. איבי, for אעביד, "I ought do" (4a:3), and אבדנא, "I shall do" (4a:3), for עבדנא, from the root עב״ד, showing the weakening of the historical ʿ and the elision of word-final *d̲*.[13] בכצומי, "amongst sorcerers" (4a:7), for קסומי, showing assimilation of **s* to the pharyngealisation of the *q* and concomitant dissimilation of the *q* to *k*.[14]

Nominal plurals employing an *–ē* morpheme: טורי, "mountains," (1a:3); מלאכי, "angels," (1a:4);[15] בחרשי, "by charms," (2a:5); בשוקי, "in the market

Wort ward jegliches Ding!" /"Through Thy Word All Things Were Made!" II. Mandäistische und Samaritanistische Tagung / 2nd International Conference of Mandaic and Samaritan Studies (Wiesbaden: Harrassowitz, 2013), 163–79, at 164, where it is noted that the same order is employed in Demotic magic texts.

12 See M. Morgenstern, *Studies in Jewish Babylonian Aramaic Based upon Early Eastern Manuscripts* (Harvard Semitic Studies 62; Winona Lake: Indiana, 2011), 64.

13 See Morgenstern, *Studies*, 66–68.

14 As noted already by H. L. Ginsberg, "Aramaic Dialect Problems II," *The American Journal of Semitic Languages and Literatures* (1936): 95–103, at 96, such dissimilation is a Mesopotamian Aramaic feature. *kaṣuma* is also found in Mandaic (E. S. Drower and R. Macuch, *A Mandaic Dictionary* [Oxford: Clarendon, 1963] 200 [hereafter MD]), and we may compare also JBA כמצא, "locust" (M. Sokoloff, *A Dictionary of Jewish Babylonian Aramaic of the Talmudic and Geonic Periods* [Ramat Gan: Bar Ilan University Press, 2002], 586 [hereafter *DJBA*]).

15 Although the absolute form is "retained occasionally following numerals" in JBA (Morgenstern, *Studies*, 113), there are numerous exceptions in both Talmudic

places," (3b:7); דרדקי, "children," (4a:1); בני איגרי, "rooftop demons," (7a:9); בנת אלהי, "daughters of gods," (7b:2). *Nisbe* plural forms employing -איי: בכלדאיי, "amongst Chaldeans (4a:8)."[16]

Pronominal suffixes: *–ēh*, "his," on dual and plural nouns: עיניה, "his eyes" (1a:8);[17] similarly, *-ah* for the feminine: עינה, "her eyes" (2b:12).[18]

Verbal forms: 3rd person imperfects with *n–*: ניזקוף, "let him raise" (1a:8, 1b:2); ונידלי, "and he should draw" (1b:2); נשקיון, "let them give me to drink" (1b:10), showing also the characteristic loss of word-final *–ī* of the object pronoun; נימרו... נשמעו, "let them say… let them hear" (1b:11); ניפרח, "let it flutter" (2b:6); נשתכח, "may be found" (4a:8).

Participle forms: קרן, "they call" (2a:8).[19]

Participles with affixed subject pronouns: 1 m.s. דאמינא . . . ושמינא, "what I say . . . and what I hear." 1 f.s. נפקאנא, "I go out" (3b:7); קא

manuscripts and the magic bowl corpus. The evidence of the magic bowls indicates that the loss of the absolute in this position is a syntactic rather than phonological phenomenon, since it also affects forms of the feminine plural. The following are some representative examples: שבע חרשיא, "seven sorcerers" (MS 2053/29:7); ושבע מבכלתא דליליה ודיממא, "and seven *məbakkela*s of the day and the night" (MS 1927/21:11); והארבע חיותא, "and behold, four beasts" (JNF 259:6; JNF 19:8; JNF 147:5). The same applies to the quantifier כל: כל רוחי בישאתה ורוחי זידיאתה, "all evil spirits and wicked spirits' (JNF 317:4–5); כל נידרי ולוטתא, "all vows and curses" (JNF 7:5); וכל נידרי ואיסרי וכל שבעתא לוטתא ודיוי ליליתא, "all vows and bonds and all oaths, curses and *dev*s and liliths" (JNF 55:5).

16 See Y. Breuer, "The Babylonian Aramaic in Tractate *Karetot* According to MS Oxford," *Aramaic Studies* 5 (2007), 1–45 at 31–32, and M. Morgenstern, "Notes on the Noun Patterns in the Yemenite Tradition of Jewish Babylonian Aramaic," *Revue des études Juives* 168 (2009): 51–83, at 76.

17 H. Juusola, *Linguistic Peculiarities in the Aramaic Magic Bowl Texts* (Studia Orientalia 86; Helsinki: Finnish Oriental Society), 87.

18 On the latter, see M. Morgenstern, "Linguistic Features of the Texts in this Volume," in S. Shaked, J. N. Ford, and S. Bhayro, *Aramaic Bowl Spells, Jewish Babylonian Aramaic Bowls*, vol. 1 (Brill: Leiden, 2013), 42–43.

19 On this form in the Jewish Babylonian magic bowl corpus, see Juusola, *Linguistic Peculiarities*, 206–9.

מקטלאנא, "I kill" (3b:8–9), also showing the exclusively Babylonian tense-marker קא;[20] דשרינא, "that I release" (4a:9). 2 f.s. in *qṭlyt* pattern: רה[ט]ית, "you shall ru[n]," (2a:5). פרחית ונפלית, "you shall fly and fall," (2a:6).[21]

Infinitives: III-*yod* on the pattern of *miqṭā:* ולמשרא, "to loosen" (2b:7).[22]

Particles: כי, "like" (2a:6, 11). כי היכי ד- . . . הכי, "just as . . . so," (2b:5), both Talmudic forms.[23] עילויה, "upon him" (2b:11). מאי, "what" (4a:3 bis).[24]

Vocabulary: זרנוקא, "water pipe" (used euphemistically for penis) (1b:2). נרגא . . . וחצינא, "axe . . . and hatchet" (2a:10). אפותיה, "forehead" (3a:3) is common in JBA and Mandaic but is attested in Syriac only in the lexica and in the Jewish Targums only in the late Targum of Job (41:12). מעלי שבתא, "Fridays" (7b:10) is used only in JBA.

Exceptional in this respect are the spell for the acquisition of knowledge, fol. 5b–6b, and perhaps the first part of the spell for protection in 6b–7a, which employ many conservative forms. The following are a few representative examples:

y- prefix for 3rd person imperfect,[25] e.g., דישמע וילף, "that he shall hear and learn" (5b:3), etc.

20 See also קא משוינא, "I turn (X) into (Y)" (4a:1). Note that in both cases, קא is written as a separate particle, as is common in the better Babylonian manuscripts. See Morgenstern, *Studies*, 172–74.

21 2 f.s. participles in the *qṭlyt* pattern have been previously found in JBA in the magic bowl corpus. See Morgenstern, "Linguistic Features," 45.

22 S. Morag, "Some Notes on the Grammar of Babylonian Aramaic as Reflected in the Geniza Manuscripts," *Tarbiẓ* 42 (1972–73), 60–78, at 70–73.

23 הכי, a Talmudic form, already appears in a magic bowl text. See Morgenstern, "Linguistic Features," 46.

24 Ibid.

25 Juusola, *Linguistic Peculiarities*, 175.

-ūn affixes for imperfect plural verbs:[26] דתיפתחון, "that you will open" (6a:1). תעכבון, "you shall (not) delay" (6b:1). ותצלון יתי, "that you shall deliver me" (6b:6), also employing the direct object marker *yāt-*.[27]

-ti affix for 1 c.s. perfect of III-*yod* verbs: אומיתי, "I conjure" (5b:8), the so-called Onkelos/Jonathan form.[28]

However, since many of these forms are also employed in the Babylonian magic bowl texts, these do not necessarily prove a non-Babylonian origin.

Transliteration, Translation and Comments

In our transliteration, we use the following sigla:

[ ] a lacuna in the text

• a letter which is only partly preserved

א̄ (with superlinear stroke) a doubtful reading

{} Dittography

Our translation and commentary here are kept deliberately brief and aim to provide support for the interpretation of the text presented herein. As the question marks between parentheses in the translation indicate, many passages remain obscure.

26 Juusola, *Linguistic Peculiarities*, 176–77.

Folio 1a

1	BRYNG the *dev*[29] who disturbed the heavens with his (???)	ברינג דיוה דשגיש שמיה באר•יֵה
2	NṬR ṬWRY DWR NMṬY.[31] I went up the mountains,	נטר טורי דור נמטי 0 טורי[30] סליקית
3	and I went down the mountains, and I turned[32] to the hills; I saw	וטורי נחיתית ורמתה תבעית חזיתי
4	three angels, whose names are Gabriel and Uziel	תלתה מלאכי ושמיהון גבריאל ועוזיאל
5	And Shoshiel. They said to me, NN, Who overturned the m[ou]ntains	ושושיאל אמרין לי פ ב׳ פ מן הפך ט[ו]רי
6	that you overturned and the hills that you turned to I said	דאת הפכת ורמתה דאת תבעת אמרית
7	to them, I, NN, since? I wanted the mystery of love	להון אנא פ ב׳ פ דיבעית רזא דרחמת[א][33]

29 Professor Shaul Shaked has suggested to us that "bryng dywh looks like an Iranian word, but no such word exists in this form. One may think of *bērōnīg 'external' or a similar emendation. Such a word is unknown as the name of a demon, but is at least a plausible designation for a demon."

30 The following *historiola* bears a strong resemblance to similar passages in the magic bowl corpus and Mandaic formularies, e.g., *lṭura ḏ-nirig silqit ldaura rba ḏ-bit hiia aškaita lmihla pt bil alaha ulmiša br šušma hiuara*, "I ascended to the mount of Nirig, and to the great abode of the House of Life; I found Salt, daughter of the god Bel, and Oil, son of white sesame" (*Zarazta ḏ-Hibil Ziua,* ed. De Morgan 265/20: 40–43).

31 We have presented these as magic words as we are unable to propose a coherent translation. The first two words, **נטר טורי** may be rendered as "Guardian of the mountains" or "Guard mountains (imperative). . . ." **נמטי** may be either a verb (3 m.s. or 1 c.s. of **מט״י** in *qal* or *ʾapʿil*) or a noun meaning "pieces of felt, belt coverings" (Sokoloff, *DJBA*, 755).

32 For this meaning of **תבע** see M. Kahana, "The Importance of Dwelling in the Land of Israel According to the Deuteronomy Mekhilta," *Tarbiẓ* 62 (1993) 501–14, at 507 (Heb.).

8	from NN. Let him raise his eyes to heaven and he shall se[e]	מן פ׳ ב פ ניזקוף עיניה לשמיא ויחז[י]
9	the mystery of love from NN, Amen Amen Sela.	רזא דרחמתא מן פ ב פ אמן אמן סלה
10	ʾGLN QWṬY SWTY ʾKYMY ʾṢṬYS ZWṬY	אגלן קוטי סותי אכימי אצטיס זוטי
11	QYNRY NDM. Say over bdellium[35] and mustard . . .[36]	קינרי נדם ק׳ ע מיקל[34] אזרק וכרדל

1	. . . over (it?) 7 times. This mystery is appointed for NN,	[ ]•• על ז׳ זמ׳ מזמן הדין רזא לפ ב פ׳
2	that he should raise his water pipe[37] and draw his bucket and drip	ניזקוף זרנוקיה ונידלי דוליה ותינטוף

33 The expression רזי רחמתא is found in the erotic bowl published by J. A. Montgomery, *Aramaic Incantation Texts from Nippur* (Philadelphia: University Museum, 1913) 28:3, 4 (p. 213).

34 Lege: מוקל.

35 Muql azraq, i.e., bdellium; see E. Lev and Z. Amar, *Practical Materia Medica of the Medieval Eastern Mediterranean According to the Cairo Genizah* (Leiden: Brill, 2007), 111.

36 כרדל is the Judeo-Arabic spelling for خردل, "mustard," cognate with JBA חרדלא. For the use of mustard in aggressive magic in late-antique Babylonia, cf. the *Pishra de-Rabbi Hanina ben Dosa*: ואם על חרדלא עבדו ליה ועל בר זרעא עבדו ליה קטריאל ישרי ויפשר ליה, "And if they did it to him over mustard or if they did it to him over seed, Qaṭriʾel will release and exorcise for him" (Franco Michelini Tocci, "Note e documenti di letterature religiosa e parareligiosa giudaica," *Annali dell'Istituto Universitario Orientale di Napoli* 46 [1986], 101–8, at 103).

37 Here used in a figurative manner; the same usage is found in Mandaic: *mta huṭrak unidalia qumtak uniqum zarnuqak ulanitikbiš,* "extend your staff that your stature be raised up and your pipe be erected and not brought down" (DC 12: 59–60). For a similar use in Palestinian Jewish Aramaic, note the use of the Greek loan word סילונה (tube, pipe) for the male organ, on which see S. Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch und Targum* (2 vols.; Berlin, 1898–99; repr.,

3	his drop in NN, in the name of BYMH NṢṬWRYNW	נטופתיה בפ׳ ב פ׳ בשם בימה נצטורינו
4	ḤSPWṬ ʿYDNNʾ MSʿLYMṬS LʾPLYṬWS	חספוט עידננא מסעלימטס לאפליטוס
5	A(men) A(men) S(ela). Precious[38] oil, precious	א א ס 0–0 מישחא שיהא משחא
6	oil, oil boiled[39] in jasmine;[40] noblemen	שיהא משחא סליקא בדיסמין חרי
7	smeared[41] it on their necks; noblewomen, on their pudenda(?),[42] contentious women	שפוי בצוריהון חרתא בגנסקיהי גרגיתא

Hildesheim: Georg Olms, 1964) 1:383, and G. Bohak, "The Magical Rotuli from the Cairo Genizah," in G. Bohak, Y. Harari, and S. Shaked. eds., *Continuity and Innovation in the Magical Tradition* (Jerusalem Studies in Religion and Culture, 15; Leiden: Brill, 2011), 321–40, at 333. דולא, "bucket," is also used as a euphemism for the source of fecundity in a wedding poem in Jewish Palestinian Aramaic: דולך לא יחסר וטב תתבשר, "may your bucket not be lacking and may you be told good (tidings)," published in M. Sokoloff and J. Yahalom, *Jewish Palestinian Aramaic Poetry From Late Antiquity* (Jerusalem: Israel Academy of Science, 1999), 258, text 44*:8 (in Hebrew).

38 Compare E. S. Drower and R. Macuch, *A Mandaic Dictionary* (Oxford: Clarendon, 1965), 458 s.v. šušma, cited from *miša anat šiha br šušma hiuara,* "The oil you are, precious, from white sesame" (CP no. 23).

39 Cf. Sokoloff, *DJBA*, p. 674: ישחא שליקא = butter. The text could also mean oil boiled with jasmine.

40 For the use of jasmine oil, cf. על מישחא דיסמין זמנין ז׳ רטין ושלח מיניך, "on jasmine-oil, whisper seven times and remove your clothes" (T-S K 1.162, published in P. Schäfer and S. Shaked [eds.], *Magische Texte aus der Kairoer Geniza* III [Tübingen: Mohr Siebeck, 1999], no. 61).

41 Derived from older שפוהי. See M. Morgenstern, "Linguistic Notes on Magic Bowls in the Moussaieff Collection," *Bulletin of the School of Oriental and African Studies* 68 (2005): 349–67, at 363.

8	on the circles of their navels; the troop on the (???)[44] of its servants	בקופי שיריהי[43] גיסנא בשופי דטליה
9	smeared it. NN, in front of the house of love(?) of the town; and furthermore,	שפיה פ׳ב׳פ׳ וקבאל בי חן דמתא ותו
10	from their meat let them (give me to) eat and from their cup let them give me to drink,[45]	מאוֹמציהו ניכלון ומיכסיהו נשקיון
11	what I say they let them say and what I hear[46] let them hear	דאמינא אנא נימרו ושמינא נשמעו
12	A(men) A(men) S(ela). Say at the beginning of the month when it is the second (day)	א׳ א׳ ס׳ ק׳ כל ראש ירחא מידהוי ב׳

Folio 2a

1	of the month and one of its other days, first of all, sa[y]	בירחא וחד מי אחרנה אולשי ואמ̇[ר][47]
2	seven times, each day three times. From	ז׳ זמני כל יומא תלת זמני 0–0 מן

42 **גנסק** might be a Persian loanword for "orchis, testicle," apparently employed euphemistically for both male and female pudenda. See Claudia A. Ciancaglini, *Iranian Loanwords in Syriac* (Wiesbaden: Ludwig Reichert, 2008), 138.

43 Lege: **שוריהי**. Cf. below, 3a:8.

44 The reading **שופי** is certain, but we are unable to propose a suitable interpretation.

45 Since **נשקיון** is a transitive verb bearing the 1 c.s. object suffix (*n* < *-ni*; contrast the following verbs **נימרו**, "let them say," and **נשמעו**, "let them hear," without the final *n*), we should similarly understand **ניכלון** as representing a minor scribal error for **נוכלון**, "let them give to eat."

46 Here **שמינא** appears in place of regular JBA **שמענא**. On the morphological shift of III-*ʿayin* to III-*yod* in JBA, see Morgenstern, *Studies,* 63–64.

47 The reading of the last two words is uncertain, and their meaning is unclear.

3	the gloom of gloominess[48] you came out, from the great	חבר חברירי̈ה נפקתון מן אתרא
4	place of darkness; the evil spirit Anpharid,	רבא דיחשוכא אנפרי דרוחא בישׁתא[49]
5	which is sent by charms;[50] you shall[51] ru[n] like a deer,[52]	דמישתדר בחרשי כי טביא רה[ט]ית
6	you shall fly like a wind,[53] and you shall fall upon NN;	כי זיקא פרחית ונפלית עליה דפ ב פ

48 We interpret חברא as equivalent to הברא, "darkness," which is sometimes written with etymological ח in JBA (Sokoloff, *DJBA*, 361). חברירי̈ה (plural emphatic) appears to be an antonym of שבריר̈א, "radiance of sun, sunlight". For the sentence structure, compare *umn škinatun ḏ-hiia qadmaiia atit mn atra rba ḏ-nhura,* "you came from the dwellings of the Primordial Life, from the great place of light" (*Pašar Mihla,* DC 51: 14–16).

49 Lege: אנפריד רוחא בישא. Compare אנפרת רוחא בישתא, "Infarat, the evil spirt" (BM 91767:2), also written אינפרת (ibid:7), who is similarly sent against an opponent by means of witchcraft. See M. Morgenstern, "The Jewish Babylonian Aramaic Magic Bowl BM 91767 Reconsidered," *Le Muséon* 120 (2007): 5–27. Professor Shaul Shaked has drawn our attention to the discussion of Arabic عفريت, *ʿifrīt*, in A. Jeffery, *The Foreign Vocabulary of the Qur'an* (Baroda: Oriental Institute), 215, and adds: "The Aramaic form suggests a Persian antecedent word such as **an-āfrīd,* 'uncreated,' and the Arabic word may be regarded as an abbreviated form."

50 Formulae like דמשתדר(ין) בחרשי are common in the bowls' descriptions of demons, e.g., מן סטני דמישתדרי בחרשי, "from satans that are sent by charms" (Moussaeiff 121:4, published in D. Levene, *A Corpus of Magic Bowls: Incantation Texts in Jewish Aramaic from Late Antiquity* [London, 2003], 81). See also C. Isbell, *Corpus of the Aramaic Incantation Bowls* (Missoula, Montana: Society of Biblical Literature and Scholars Press, 1975), 63:7.

51 For the *qṭlyt* pattern of the 2 f.s. participles, see the linguistic introduction.

52 For this simile, cf. below, 6a:6–7: ואירוץ בהון כצבי שהוא רץ במדבר, "I will run in them like a deer that runs in the desert."

53 Cf. the anti-witchcraft spell of *b. Pes* 110a–b: קרח קרחייכי פרח פרחייכי איבדור תבלונייכי, **פרחא זיקא** למוריקא חדתא דנקטיתו נשים כשפניות, "may your heads grow bald(?), may your capers flutter, may your spices be scattered, may a wind flutter the new saffron that you are holding, you female witches."

7	like the three angels which are sent in the clouds	איך תלתא מלאכין דמשתד[ר]ין בענני
8	of hail,[54] and thus they are called:[55] Aglit and Maglit	ברדא וכין קרן להון אגליט ומגליט
9	and Hadar Galat; ascend to the high heavens and break	והדר גלת סקו לשמי מר[ו]מא ותברו
10	the axe from Bel and the hatchet from Barbel(?), and they will turn back	נרגא מן ביל וחצינא ומן[56] בַּרביל[57] ומיתפכין
11	like an eagle and turn back against NN. In your name	כי נישרא ומיתפכין על פ ב פ׳ בשמך
12	ʾYWʾY PY DWN ʾYWʾY ʾWRP ʾWRP	איואי פי דון איואי אוֹרָף אורף

54 ענני ברדא is paralleled in two of the bowls from the British Museum, 001A:10 and 002A:12 (J. B. Segal, *Catalogue of the Aramaic and Mandaic Incantation Bowls in the British Museum* [London: British Museum Press, 2000], 43–44): ושדרו וחבילו יתה מין עננין דברדא, "and they sent and injured her from clouds of hail."

55 Lit: they call them; קרן is an impersonal 3 pl. participle of the "Onkelos" type. For the "naming" of demons, compare מסמיתא מטריתא עוירתא קרן לכי מחגרתא קרן לכי גרבניתא קרן לכי שפופתי קרן לכי, "They call you the blinder, the smiter, the sightless; they call you the lame one, the scabeous, the crawler" (MS 1927/8:7, in S. Shaked, J. N. Ford, and S. Bhayro, *Aramaic Bowl Spells, Jewish Babylonian Aramaic Volume 1* [Leiden: Brill, 2013], 56, with some alterations to the translation).

56 Lege: מן.

57 For this formula, cf. the bowl (IM 9736) republished by Ortal-Paz Saar, "An Incantation Bowl for Sowing Discord," *Journal of Semitic Studies* 58 (2013): 241–56, at 242, l. 7: איתהפיך ביל ואביל ונבו ובורסיף, "overturned are Bel and Abel and Nabu and Borsip." For the reemergence of the old Mesopotamian gods in Aramaic and Mandaic texts, see C. Müller-Kessler and K. Kessler, "Spätbabylonische Gottheiten in spätantiken mandäischen Texten," *Zeitschrift für Assyriologie* 89 (1999): 65–87; D. Levene and G. Bohak, "A Babylonian Jewish Aramaic Incantation Bowl with a List of Deities and Toponyms," *Jewish Studies Quarterly* 19 (2012): 56–72.

Folio 2b

1	ʾH ʾW WʾY ʾYPʾ WʾYP PNT PNT	אה או ואי איפא ואיף פנת פנת
2	ʾNBYʾ ʾPNT PNT WʾP WʾP ʾWRP	אנביא אפנת פנת ואף ואף אורף
3	ʾWRP. Say over dust from under a corpse,	אורף ק׳ ע עפרא מתחות מיתא
4	and put it in an amulet and hang it on a bird and let it fly	ורמי בקמיעא ותלי בצפרא ואפרחה[58]
5	and say over it: Just as this bird	ואמר עליה כי היכי דפרחא הדא
6	flutters, so shall the heart of (fem.) NN flutter[59] after	ציפרתא הכי ניפרח ליבה דפ ב׳ פ בתר
7	NN, A(men) A(men) S(ela). For love: I have love, it is mine[60]	פ ב פ א א׳ ס׳ 0 לאהבה לי חן לי הוא
8	SSGR MGMR, holy angels who sit	ססגר מגמר[61] מלאכיה קדישיא דיתבין

58 For binding the text to a bird and letting it fly, see also the Genizah fragment Mosseri Ia. 26.2, copied by Abraham ibn Yiju (probably during his stay in Aden) and published in S. D. Goitein and Mordechai Akiva Friedman, *India Book III: Abraham ben Yijû, India Trader and Manufacturer* (Jerusalem: Ben-Zvi, 2010) (Heb.), 421, ותלי קמיעא בכרע[א] דציפור ואפרח יתיה, "and bind the amulet to the leg of a bird and let it fly," (but in a recipe to cause a person to be exiled from his community). See also R. Campbell Thompson, "The Folklore of Mossoul," *Proceedings of the Society of Biblical Archaeology* 1906, 76–86, 97–109; 1907, 165–74, 282–88, 323–31; 1908, 30–33, no. 23.

59 For the double meaning of פרח, which cannot be rendered into English, see the frequent appearance of פרח ליביה in the Babylonian Talmud, as well as פרחיאל אפרח לביה דפ׳בפ׳ בתר פ׳ב׳פ׳ (T-S K 1.37, published in P. Schäfer and S. Shaked, eds., *Magische Texte aus der Kairoer Geniza* I [Tübingen: Mohr Siebeck, 1994], no. 4).

60 Or LY ḤN LY HWʾ.

61 Cf. the angels סוסגר מכמר in the Horvat Rimmon erotic spell and its many parallels, for which see Naveh-Shaked, *Amulets and Magic Bowls*, A10 (p. 84) and esp. Joseph Naveh and Shaul Shaked, *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity*, Jerusalem: Magnes, 1993, G22, 1/9 (pp. 216, 219).

9	under the cauldron(?) of fire of the (heavenly) Temple, to bind	תחות דוֹדָא דנורא דהיכלא למיסר
10	and to loosen, that (fem.) NN shall come after NN	ולמשרא דתיתי פ ב׳ פ עילויה דפב׳פ
11	with her mouth open and her saliva dripping[62] and her eyes	כד פומה פתיח ודייב רירה פתיחן
12	open but not seeing, in the Name of (??)	עינה ולא חזין בשם ••

Folio 3a

1	and stick and bind [ ] of flax, and bury	וֹדוֹץ וכַרוֹן[ ]דכיתנא וקבר
2	at the threshold of the house or on the bank	באיסקופתא [ד]בֵּיתא או על גידא
3	of the river. For sending a fire / fever ʾRH DYG??	דנהרא 0–0 לשלוח אש ארה דיג..

5	of the town? Write on its[64] forehead his name [and the name]	דקרתא כתוב על אפותיה שמיה [ושמא]
6	of his mother, and this[66] mystery on the image and ???	דאימיה[65] והיי ראזא על צלמא וא...

62 Compare in Mandaic: *rirḫ daiib upumḫ ptia*, "his saliva is dripping and his mouth is open" (DC 43E:8 // DC 20: 18-20). DC 43 here provides the better reading but was erroneously read in C. Müller-Kessler, "A Mandaic Incantation against an Anonymous Dew Causing Fright (Drower Collection 20 and its variant 43 E)," *Aram* 22 (2010): 453–57, at 460.

63 The words here look like *voces magicae*, but one would expect instructions such as "Take mud, fashion a figurine," etc.

64 Presumably the text is referring to the production of a "voodoo doll," writing on its forehead, sticking needles in it, etc.

7	and bring five needles; stick one	ואיתו חמיש מחטי דוץ חדא
8	in its heart and one in its navel and one in its two	בלביה וא׳ בשוריה וא׳ בתרתין
9	thighs, with its two hands	עטמתיה וב׳ ב׳ ידיה

Folio 3b

1	on its knees right [to the left, and le]ft (one) to right	על רוכביה ימין [לסמול ו]סמול לימין
2	and put it in a new[67] vessel with its [hea]d below[68] and its legs	ושידיה במנא חתא[ר]שׁיה מתיי ושקיה
3	above, and bury it in a fresh grave which is one day old	לעילא וקבור בקברא חתא בר א׳ יומא
4	or two days old. ʾ[Y]DR ʾYDR BWKʾNʾ	או בר ב׳ יומי 0–0 א[י]דר אידר בוכאנא
5	BʾDʾ BYK QWʾ QZ[69] On the back of a lion I ride	באדא ביך קוא קז אגבא דאריא רכינא
6	and the girdle of male sorcerers and female sorceresses I have fastened to	והומיאנא דחרשי וחרשתא בחציי
7	my loins.[71] I go out[72] in the market places of infant(s),	מחי לי בשוקי יניק נפקאנא[70]

65 Here and in the next two lines there is a hole in the parchment that was clearly present before the scribe began writing his text.

66 For היי, note that in early Babylonian manuscripts the form of the demonstrative pronoun is האיי, *hāyi*. See Morag, "Some Notes," 66–7 (Hebrew).

67 Here and in the next line, חתא = חדתא. Compare Th. Nöldeke, *Compendious Syriac Grammar* (London: Williams and Norgate, 1904), 21.

68 We take מתיי as *mittaii,* equivalent to מתחתאיי, "underneath." For placing the "voodoo doll" upside down, note, for example T-S Ar. 43.259: ותאכד קדר גדידה ותג׳על פיהא גיר ותאכד׳ אלתמתאל ותכבה עלי ראסה פי אלקדר, "take a new cooking pot and put lime in it and take the figurine and cast it upside-down into the pot."

69 It is unclear whether this was once a coherent text or was always magic words.

8	and in the streets that are full of children; I	ובביריאתא דמלין דרדקי קא
9	kill an infant in the market places and children in	מקטלאנא בשוקי יניק ובביריאתא

Folio 4a

1	the streets.[73] I turn wine into vinegar and old wine[74]	דרדקי קא משוינא חמרא חלא ואתיקא
2	into ???,[76] white flour into ashes {ashes}, barley	גאנה חיוריתא קיטמא קיטמא[75] קמחא

70 There is a hole in the parchment, here and in the next line, that was clearly present before the scribe began writing his text.

71 **מחי לי**, "I have fastened," represents the *qəṭīl li* syntagm. Compare the Mandaean *Zarazta d-Hibil Ziua: himiana d-birqa mhilia bhalṣai*, "I have fastened a girdle of lightening to my loins" (DC 44: 505-6). For "loins," JBA commonly employs **חרצא**, pl. **חרצי** (Sokoloff, *DJBA*, 484), though the by-form **חצי** is already found in the Dead Sea Scrolls (see M. Morgenstern et al., "The Hitherto Unpublished Columns of the Genesis Apocryphon," *Abr-Nahrain* 33 [1999]: 30–54, at 35) and late Mandaic (MD 125) and is the regular form in Classical Syriac (see M. Sokoloff, *A Syriac Lexicon* [Winona Lake, IN: Eisenbrauns], 482). Dr. Y. Z. Stampfer has drawn our attention to the use of **חציה** in Geonic citation from *b. Giṭ* 78a. See Z. Stampfer, *Laws of Divorce (Kitāb al-Ṭalāq) by Samuel ben Ḥofni Gaon* (Jerusalem: Ben Zvi Institute, 2008), 92.

72 **נאפקאנא** and the following verbs represent 1 f. participle forms, characteristic of the best textual witnesses of Jewish Babylonian Aramaic. See Morgenstern, *Studies*, 120–22, and M. Morgenstern, "Rare Forms in Eastern Aramaic," *Language Studies* (Heb., forthcoming).

73 For this section, see Shaked, Ford, and Bhayro, *Aramaic Bowl Spells*, 202, and additional parallels in M. Morgenstern and M. Schlüter, "A Mandaic Amulet on Lead," Martin Schøyen Collection MS 2087/1 *Eretz Israel*, (Joseph Naveh Memorial volume), forthcoming.

74 **ואתיקא** is a phonetic spelling of **ועתיקא**.

75 Dittography?

76 We are unable to offer a satisfactory explanation for the word **גאנה**, which presumably refers to some acidic substance into which wine may deteriorate.

3	flour into dust and ashes?[77] What ought I do[78] to him, and what	דסערי עפרא ופרי מאי איבי ליה ומאי
4	shall I do to him, to NN? I shall take his thorn(?) / spirit(?) from him,	אבדנא ליה לפ ב׳ פ חוחיה[79] שקלנא ליה
5	and I shall cast it in a tube, I shall seal it with pitch	בגובתא שדיאנא ליה בכופרא סטמנא ליה
6	and bury it in the earth and trample it with my heels	בארעא קברנא ליה ובעיקבאי דישנא
7	for twelve months of the year; so that neither amongst magicians nor	ליה תריסר ירחי שתא לא בכצומי ולא
8	amongst Chaldaeans[80] shall a healer be found for him, un[til?]	בכלדאיי אסיא לא נשתכח ליה אד••
9	I release him and he dies. Say (it) over a green lizard	דשרינא ליה ומית ק׳ על[81] צרריתא

Folio 4b

1	seven times in a reed tube and bury (it) in the inner	יורקתא ז׳ זמ׳ בגובתא דקניא וקבר באסקפתא
2	threshold. 0–0 ʾṬṬ ʾSS WʾWSYS WHWDYH	גויתא 0–0 אטט אסס ואוסיס והודיה

77 Perhaps this is **ופרי** for **ואפרי**, like Hebrew **עפר ואפר**.

78 On the Babylonian forms **איבי** and **אבדנא**, both derived from the root **עב״ד**, see Morgenstern, *Studies*, 66–68.

79 Lege: **רוחיה**?

80 The expression **כצומי וכלדאי** is also attested in the Klagsbald bowl, AMB 13:13 (J. Naveh and S. Shaked, *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* [Jerusalem: Magnes, 1987], 200).

81 There is a hole in the parchment, which was probably there before the scribe began writing his text.

3	WHWDYRYH, send, send against him, NN	והודיריה[82] שדר שדר עלוהי דפ׳ בפ׳
4	the fire of a spell; say (it) over 7 ???[83] of ???, and place it in the socket	אש לחש: ק׳ ע׳ ז׳ בורי דטבין ושדי בצינורא
5	of the door. Skull, GPNM WNY?SGP	דדשא 0 גולגולתא[84] גפנם ונ?סגף
6	I have adjured you, NWRDPYS the satan, that you shall go	אשבעית עלך נורדפיס סטנא דתיזיל
7	and cast fire upon NN, that it may dance[85] upon you,	[ות]פיל אשתא על פ׳ב׳פ׳ דתירפיס עלך
8	on him on him on you on you on him Amen Amen Sela.	ועלה עלה עלך עלך עלה אמן אמן סלה

Folio 5a

1	Say (it) over the (???) . . . the white son of an egg, which	ק׳ ע׳ אלערבייה [ ] אבין בידה אלביד אלדי

82 A similar set of voces *magicae appe*ars in the Sword *of Moses:* אנא אססי אסס ואסיסיה ואפרגסיה שליחא קלילא, "I am ʾSSY ʾSS WʾSYSYH WʾPRGSYH, the speedy messenger"; see Yuval Harari, Harba d*e-Moshe (The Sword of Moses): A New Edition and a Study Jerusal*em: Academon, 1997) (Heb.), 26.

83 This may be the same as בורא *b. Šabb.* 140b (Sokoloff, *DJBA*, 192), the meaning of which remains unknown.

84 This spell has a partial parallel in T-S Misc. 34.22 (a fragment whose magical recipes display a strong Babylonian influence): שילוח אש אנה גולגלתא אנא גלגולתא כ?ם ו?הנ?ם / כם והנם אנא והנם אנה והנם אשבע לכי ומנ?א? לכי? / .ד רום סטנא בישא דיתיב על תלת מאה ושיתין סטנין / איזיל ואפיל אש על פ׳ב׳פ, "(For) sending fire: ʾNH skull, ʾN׳ skull, KM WHNM KM WHNM ʾN׳ WHNM ʾNH WHNM, I adjure you and I conjure? you .D RWM, the evil satan who sits over three hundred and sixty satans, go down and bring down fire on NN," etc.

85 The meaning of רפ״ס in this context is uncertain. It could mean to dance, flutter (see Sokoloff, *A Syriac Lexicon,* 1485), or perhaps to tremble (denominative of ריפסי, *DJBA* 1077).

2	no chicken has mounted and ??? and slaughter/cook	לם יצעד עליה דגיגיה[86] מא ותכרא ואדבח

Folio 5b

1	Do (it) for your Name, for the sake of [your name]. This amulet	לשמך עשה למען ש[מך] מזמן הדין
2	is appointed[91] for the name of NN, that you may open his	קמיעא על שום פ׳ב׳פ׳ דתיפתח ליביה

86 Lege: דג׳אג׳ה, i.e. דג׳ג׳ה.

87 Lege: אגעלה?

88 The magic words are vocalized with Babylonian vocalization.

89 There is a hole, or some other irregularity in the parchment, that was clearly there before the scribe began writing his text.

90 Note a somewhat similar recipe in Bod. Heb. e 74.21 (a folio from the same manuscript as the two fragments published by Schäfer and Shaked, M*agische Texte* III, no. 69, which display a Babylonian vocalization): להנצל מעת צרה: אמור ג׳ פעמים על קטר של תבן לגת לגם סכר בלם ותן אותו אחורי אזניך, "to be saved from a time of trouble, say three times over a knot of hay LGT LGM SKR BLM and place it behind your ear."

91 This is a common formula in the bowls, e.g.: מזמן הדין קמיעה לאסותא לנטרתא ולחתמתא דביתיה ד-, "This amulet is appointed for the healing and protection and sealing of the house of . . ." (Gordon A:1, published in C. H. Gordon, "Aramaic Magic

3	foolish[92] heart to all words of the Torah, that he shall hear and learn,	טפשא לכל פיתגמי אוריתא דישמע וילף

9	you and adjure you,	עליכון ואשבעית עליכון

Bowls in the Istanbul and Baghdad Museums," *Archiv Orientální* 6 [1934]: 319–34, at 321).

92 Sokoloff, *DJBA* 514, reconstructs the singular of this adjectival form as טפשאה. On the merger of the noun marker *-ā* and the adjectival/gentilic morpheme *-āʾā*, see M. Morgenstern, "Notes on the Noun Patterns in the Yemenite Tradition of Jewish Babylonian Aramaic," *Revue des Études Juives* 168 (2009): 51–83, at 75–79, where evidence is also cited for alternative plural forms טיפשי, and טיפשאיי.

93 For the following set of *voces magicae*, note a similar sequence in MS New York Public Library 190 (*olim* Sassoon 56), p. 77, lines 7–9: ובהדין שמא רבא ויקירא וקדישא / ק׳ק׳ק׳ פץ קה והוה קדוש פפותמי קתניה קדוש קתר נקססה / נספרה, "and by this great, precious, and holy name, H(oly), H(oly), H(oly), PẒ (=WH in *atbash*) QH WHWH Holy PPWTMY QTNYH Holy QTR NQSSH NSPRH."

94 The series of *voces magicae* in lines 4–8 is characterized by the repetitive structure XXX + Yh *qadosh*, and if we omit the initial *aleph*, we may note that the individual sequences begin with ק, פ, ע, ש, ת, צ, ס, which may indicate an earlier attempt at an acrostic arrangement of this series.

95 There is a hole, or some other irregularity in the parchment, that was clearly there before the scribe began writing his text.

96 Compare Mandaic *smir,* "well preserved, safeguarded," in MD 333 s.v. SMR.

Folio 6a

1	and place an oath upon you,[97] that you will open my heart, me	וקיימית עליכון דתיפתחון ליבי דילי אנא
2	NN, and you will make (it) wise for Torah, and you will remove the foolishness	פ ב׳ פ ותחכמון לאוריתא ותפקון טפשות
3	of the[98] heart from the heart of me, I, NN, and you will see/make seen[99] and open	ליביה מן ליבא דילי אנא פ׳ב׳פ׳ ותחמון ותפ[תחון]
4	my heart , I, NN, like the heart of Metatron and like the heart of	את ליבי דילי אנא פ ב פ כלב מיטטרון וכלבּ
5	Moses son of Amram, and teach me the six columns of the Tal[mud][100]	משה בר עמרם ולמדני ששה טורים שלתּל[מוד]
6	in six(?) years, and I will run in them like a deer that runs[102]	בשם שנים[101] ואירוץ בהון כצבי שהוא רָץ
7	in the desert and guard in my belly all that I learn, and what I learn	במדבר וטרו במעי כל מה דאילוף ומא דאילוף
8	from this day and forever, and teach me words of Torah and wisdom,	מן יומא דנן ולעלם ולמדני דברי תורה וחכמה

97 This is a common formula in the bowls, e.g.: ואסרית ואשבעית ואחרימית וגזרית וקיימית עליכון in an unpublished bowl (SAD 31) brought to our attention by Dan Levene.

98 Lit.: his.

99 If the text is not corrupt (lege: ותחכמון, as in the previous line?), then we have here a rare example of the root חמ״י used in a Babylonian text. This spell is in general very conservative in its language.

100 This expression apparently refers to the six orders of classical rabbinic literature, though the use of טורים, "columns," in this context is unusual.

101 Lege: בשש שנים.

102 The use of the correlative pronoun with participle is regarded as characteristic of the Palestinian transmission of rabbinic Hebrew. See M. Bar-Asher, "Mishnaic Hebrew: An Introductory Survey," *Hebrew Studies* 40 (1999): 115–51, at 132.

Folio 6b

1	so that everything that I will hear I will learn[104] at once.[105] And you shall not delay	וכל דאישמע למדינו[103] בזמן אחד ולא תעכבון

7	from all evil demons and from demons, whether demons of the day	מן כל מזיקין בישין ומזיקין בן מזיקין דיממא
8	or demons of the night, and all demons and demons which stand	ובין מזיקין דליליא וכל מזיקין ומזיקין דקימין

Folio 7a

1	before me, I, NN, smite them	לקבלי דילי אנא פ ב פ׳ טרופו יתהון
2	in the name of these letters by which I adjured y[ou]	בשום אותות הללו שהשבעתי אתכם

103 Lege: אלמדינו, or perhaps למדיני.

104 Or: teach me. See previous note.

105 בזמן אחד may be a calque on Aramaic בחד זימנא, "in one go." Standard Hebrew for "time" (French *fois* rather than *temps*) would be פעם.

106 Lege: דתצלון.

3	and by the name HWH YH YH HW HH HYW HW	בהם ובשם הוה יה יה הו הה היו הו
4	HH HY YH WH WHW HH YH YH YHW HY forever.	הה הי יה וה והו הה יה יה יהו הי[107] לעולם
5	Sealed and counter-sealed (is) NN from demons and spark-demons	חתים ומחתם פ ב פ מן מזיקין ומזיקין
6	and harmers and devils and evil spirits, [whether male]	ופיגעי וסיטני ומן רוחין בשתא בֿ[ין דיכרי]
7	or female, whether of the day or of the night, and from	ובין ניקבתא ובין דיממא ובין דלילֿ[יא] ומן
8	demons and *devs* and Liliths and from idol-spirits	שידי ומן דיוין ומן לליתא ומן [פ]תיכרי
9	and from the rooftop-demons[108] and from the sixty-six (demons) which are	ומן בני איגרי ומן שיתין ושתה דאית
10	in the world.[109] All who stand before me,	בעלמא כל דקאים לקבלי

107 Lege: חי?

108 On the identification of "roof demons" as demons causing epilepsy, see T. Kwasman, "The Demon of the Roof," in I. Finkel and M. J. Geller, eds., *Disease in Babylonia* (Leiden: Brill, 2007), 160–72, esp. 165–69.

109 This list of demons finds ample parallels in the bowls. For the number sixty-six, cf., e.g., בשום צידקיה דהוא ראיש שיתין ושיתא מלאכין די ממנן על דמה, "In the name of Ṣidqiyyah who is the chief of sixty-six angels who are appointed over her blood" (Moussaeiff 155:10, published in Levene, *Corpus*, 111) or ובעיזקתיה דישלמה בר דויד מלכה דיחתימין בה תלת מאה ושיתין ושיתה שידין, "by the signet ring of Solomon son of David, the king of Israel, by which are sealed three hundred and sixty six demons" (VA 3854:15–18, published in D. Levene, "*Heal O' Israel*: A Pair of Duplicate Magic Bowls from the Pergamon Museum in Berlin," *Journal of Jewish Studies* 54 [2003]: 104–21, at 105).

Folio 7b

1	I, will be killed by a great killing, just as were killed[110]	אנא יתקטל בקטלא רבא כמא דאיתקטל
2	the seven daughters of the gods and the eight daughters of the female	שבע בנת אלהי ותמני בנת איסתראתא
3	ishtars. By the name of HY HY HWH HY HH HW HH	ניקבאתא[111] בשם הי הי הוה הי הה הו הה
4	YH HY HH WH HY HW HH WH YH YHW HY the eternal(?)	יה הי הה וה הי הו הה וה יה יהו הי[112] עולמים
5	A(men) A(men) S(elah) YHH WYH YH HH HH YW HW HH WH WH	א א ס יהה ויה יה הה הה יו הו הה וה וה
6	HW YH WH WYHH KYN[114] ṬM'. This adjuration.	הו יה וה ויהה כין טמא[113] הדין שבועתא
7	Say(?) (it) 23 (or, on 3?) Fridays, before dusk[115]	ק' פּג' מעלי שבתא קדים סמוך יומא
8	just as ??? (when he heats an oven?) when the day sets and he should immerse (himself in)	כי היכי חמי קמנא במסמך יומא וניטבול

110 On the apocopated form of the 3 m.p. perfect see Morgenstern, *Studies*, 186–89 (with previous literature).

111 For a partial parallel in the bowls, see היכא דיתבן הנין שבע בני אלהי וידען שבע מילי תקיפתא, "where there dwell these seven sons of gods who know seven powerful words" (Moussaieff 163:9, published in Levene, *Corpus*, 122).

112 Lege: חי?

113 Lege: תמת?

114 The sequence WYHH KYN might be construed as garbled Aramaic, but note a similar sequence in 6b:3.

115 For סמוך יומא, compare Mandaic *masmikana* (dusk), which stands in contrast to *madnaha* (dawn): *mn madnaha ualma lmasmikana umn masmikana ualma lmadnaha,* "from dawn to dusk and from dusk to dawn" (*Pašar Mihla*, DC 51: 300–302).

9	water, and come out(?) from the dawn of the Friday,	מיא ויתא מנגהי מעלי שבתא
10	and he should sit in fasting for three Fridays,	ויתב תעניתא ג׳ מעלי שבתא
11	and keep away from sexual intercourse.	ויזדהר מן תשמיש 0

Editorial Statement

We are pleased to present the tenth volume of *Ginzei Qedem*, an annual publication devoted to Genizah texts and studies. The term Genizah here functions as a collective noun for the Genizot around the world, and the current volume demonstrates the broad variety of the genre and its research. An article on the documents of the newly discovered Afghanistan Genizah is included here, together with texts from the recently re-discovered Damascus Genizah as well as new texts from the well-known Cairo Genizah.

The diversity of the Genizah research is displayed in this volume as well, as it represents many fields, including Biblical studies and exegesis, Halakha, liturgy, history, magic, and more.

Ginzei Qedem's purpose is to provide a specialized venue for the field of Genizah research, in the hope that research on and publication of Genizah texts will, in time, enrich both traditional and academic Jewish studies, as well as Islamic ones.

Genizah research has made great strides in the last decade, mainly with the establishment of the Friedberg Genizah Project, of which Ginzei-Qedem is one branch. As part of the effort to serve our readers, the electronic edition of Ginzei Qedem will be assimilated in the FGP website and will be synchronized with the images and the bibliographic data of the FGP database.

Contributions to Ginzei Qedem may be in Hebrew or English. Any substantial quotations in a language other than that in which the article is

written must be accompanied by a translation, and articles in Hebrew must be accompanied by an English abstract.

Contributions may be sent to: Ben-Zvi Institute, P.O.B. 7660, Jerusalem 91076, Israel. Contributions and queries may also be sent by e-mail to the editor at zvi56@ybz.org.il.

A Babylonian Jewish Aramaic Magical Booklet from the Damascus Genizah

Gideon Bohak and Matthew Morgenstern

The Damascus Genizah

Although discovered at about the same time, the Damascus Genizah is far less widely known among Jewish studies scholars than its more famous sister, the one from Cairo.[1] There are two reasons for this ignorance. First, the vast proportion (more than ninety-nine percent) of the Damascus Genizah consists of Muslim Arabic texts, which are of little interest to most students of Jewish studies, and the remaining 0.5% consists mostly of Christian fragments, only some of which, notably those containing sections of the Septuagint, are of relevance for students of Judaism. Barely a handful of the texts are written in Hebrew, Aramaic, or Judaeo-Arabic and are of Jewish origin.[2] Second, the Christian and Jewish texts that made their way into this Muslim Genizah and were preserved there until the early twentieth century were shipped to Berlin in 1902 and shipped back to the Ottoman court in Istanbul in 1909, and have never been seen again. Only recently has it been discovered that while the fragments themselves are still missing (and may be found one day in Damascus, in Istanbul, or

1 For the Damascus Genizah, see the excellent study by C. Bandt and A. Rattmann, "Die Damaskusreise Bruno Violets 1900/1901 zur Erforschung der Qubbet el-Chazne," *Codices Manuscripti* 76/77 (2011): 1–20.

2 For the Christian fragments, see Bandt and Rattmann, esp. pp. 18–20; for the Jewish ones, see ibid., p. 20. See also A. Ashur, "A Ketubbah in the Palestinian Style with the Permission of Matzliah Gaon, from the Damascus Genizah," *Pe'amim* 135 (2013): 163–70 (Heb.).

elsewhere), good black and white images of some of these fragments have survived in several different collections.[3]

A Babylonian Jewish Aramaic Magical Booklet

Among these now-lost fragments is a set of seven parchment folios of small size and irregular shape containing magical spells and recipes in Jewish Babylonian Aramaic, photographs of which may now be found in the Staatsbibliothek zu Berlin under the shelf mark Or. Sim. 6.[4] The writing surface, handwriting, style, and contents make it clear that all seven folios were written by the same scribe, whose hand was identified by Judith Olszowy-Schlanger as dating to the eleventh century and displaying some possibly Babylonian features. All seven folios probably came from a single booklet, which must have contained more such folios. The order of the preserved folios cannot be determined for certain, but we tried to arrange them in what seems to be the most plausible sequence.[5] The longest

3 For the circumstances under which they were taken, see Bandt and Rattmann, pp. 9–10, 12, 16, and 18.

4 We are extremely grateful to Amir Ashur and especially to Ronny Vollandt, who is now cataloguing the Damascus fragments in Berlin, for bringing these texts to our attention. We are also grateful to Christoph Rauch for the photographs and for the permission to publish them here, to Cordula Bandt for sharing with us other photographs of the Damascus Genizah fragments, and to Judith Olszowy-Schlanger for her palaeographical advice. Dr. James Nathan Ford read the manuscript and proposed many helpful readings and interpretations, as well as granting us permission to cite from magic bowls that that he is preparing for publication (cited as JNF). Professor Shaul Shaked aided us with the Persian material and similarly granted us permission to cite from his work on the Martin Schøyen collection (cited as MS).

5 Unfortunately, the Arabic numerals on the margins of the folios bear no clear relation to the folios' original order. For the circumstances under which these numerals were added to the original folios see Bandt and Rattmann, p. 13 and Plates 7 and 8. The same is true of the small etiquettes with sequential numberings which were placed next to each folio while the pictures were taken, which also bear no relation to the original order of the folios.

continuous stretch of text is found in our folios 5–7, where the spell that begins in 5b continues into 6a, 6b, 7a, and 7b, ending at the bottom of 7b. Similarly, there is a clear textual continuity from 1b to 2a and then to 2b, and from 3a to 3b and to 4a and 4b. On the other hand, some text is probably missing before 1a, there seems to be a break between 2b and 3a, and the continuity between 4b and 5a is far from certain. In such cases, one may either try to re-order the folios in a way that would leave fewer gaps or assume, as we do, that more folios are still missing in these places, especially before 1a and between 2b and 3a. How long the original booklet was we cannot say, nor can we reconstruct the structure of its quires, as even its bifolia were dismembered before they were photographed.

One additional factor complicating the reconstruction and interpretation of this set of magical texts is that only three of the recipes bear clear titles: לאהבה (for love) in 2b:7, לשלוח אש (lit., "for sending a fire," i.e., for aggressive magic) in 3a:3, and לשילטון (for [appearing before] a governor) in 5a:4. In all other cases, no titles are provided, and it often is unclear where one recipe ends and the next begins. Unfortunately, the punctuation marks used by the scribe do not seem to mark the beginnings or ends of the magical recipes in any consistent manner or to separate the spells from the ritual instructions that explain how to employ them. These difficulties are compounded by the fact that a single textual unit may cover more than one magical aim; for example, the long text that begins in folio 5b sets off without any title or explanation (the previous recipe was "for [appearing before] a governor" and ended at the bottom of 5a) and includes a long spell for what is usually known as "opening the heart," i.e., memorizing the words of the Torah and the Talmud. But then, in 6b:5, we find the connecting word ותוב, "furthermore," followed by a long spell for protection against all types of demons, and in 7a:5 we move without any apparent break to a second anti-demonic spell, which begins with חתים ומחתם, "sealed and counter-sealed," and runs to 7b:6. Only then is the user instructed to recite this adjuration on three (consecutive?) Fridays before

dusk, to immerse himself in water, and to fast and abstain from sexual intercourse during these three Fridays. Thus, it seems that the ritual instructions were applied to a set of three adjurations, one of which was intended for the memorization of Torah and the other two for protection against demons.[6] Such mixtures might be due to copying errors or deliberate editorial activities taken by our scribe or by one of his predecessors, and they certainly reflect the recipe's complex transmission history and contribute to the difficulties inherent in interpreting magic spell texts.

Another feature of these recipes, which also reflects their long transmission history, is that whereas the spells to be recited or inscribed are consistently given in Aramaic, the ritual instructions are sometimes given in Aramaic (e.g., 3a:5–3b:4 and 7b:7–11), but in other cases are given in Arabic, here written in a phonetic manner that is also typical of the earliest Judaeo-Arabic fragments from the Cairo Genizah (e.g., 5a:1–4).[7] This is an example of a phenomenon that is well attested in both Jewish and non-Jewish magical recipe books, namely, that when the society using these recipes switches from one language of communication to another (in this case, from Aramaic to Arabic), its spell-mongers often continue transmitting the spells to be recited or inscribed in the old language, even though it is no longer fully understood, but gradually translate the practical instructions into the new vernacular.[8] In this respect, our booklet is a clear

6 As both the ritual instructions and the first of the three spells bear some resemblance to the Sar Torah rituals of the Hekhalot literature, it is likely that the anti-demonic spells are a later addition to whatever the "original" recipe may have contained.

7 For the "pre-Saadian" methods of writing Judaeo-Arabic, see J. Blau and S. Hopkins, "On Early Judaeo-Arabic Orthography,' " *Zeitschrift für arabische Linguistik* 12 (1984): 9–27 and more recently J. Blau and S. Hopkins, "On Aramaic Vocabulary in Early Judaeo-Arabic Texts Written in Phonetic Spelling," *Jerusalem Studies in Arabic and Islam* 32 (2006): 433–71.

8 For this phenomenon, see further discussion in G. Bohak, *Ancient Jewish Magic: A History* (Cambridge: Cambridge University Press, 2008), 220.

example of the ongoing circulation of some older Jewish Aramaic magical spells and recipes in the Arabic-speaking Jewish communities of the Middle Ages.

In many ways, including the small sizes and irregular shapes of the folios, the mixture of Aramaic and Judaeo-Arabic, the aims of the individual recipes, and most of the ritual techniques they employ, the Damascus Genizah magical booklet looks quite similar to the earliest parchment magical recipe books from the Cairo Genizah, with which it is roughly contemporaneous.[9] However, the Damascus booklet is distinct from its Cairene siblings in the strong Babylonian flavor of its spells, and perhaps also of some of its ritual instructions. This is especially apparent when we note the numerous parallels between these spells and those found in the Babylonian Jewish (and non-Jewish) incantation bowls, many of which are noted in our commentary to the text. It is, of course, true that these recipes also bear many resemblances to the Palestinian Jewish Aramaic magical texts, as attested in late-antique metal-plate amulets and in many Genizah magical texts, but their resemblances to the incantation bowls are far more numerous and far more striking. Moreover, in some cases the Babylonian elements are even more obvious, including, for example, the appearance of Babylonian deities in 2a:10 and of the Chaldaean priests in 4a:8. Thus, not only the folios' provenance and language (on which more below) but also their contents argue for their "Eastern" origins, in or around the world of late-antique Babylonian Jewish magic. This is a world about which we know much, but almost exclusively from a single type of source, namely, the Babylonian incantation bowls, to which may be added such texts as the *Havdala de-Rabbi Akiba*, the *Pishra de-Rabbi Hanina ben Dosa*, and perhaps also the *Sword of Moses*. Thus, the emergence of a first clear example of a Babylonian-Jewish magical

9 See, for example, T-S K1.143, published in J. Naveh and S. Shaked, *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1993), Geniza 18.

recipe book whose recipes are not embedded into any "literary" structure and display no thematic unity should make a major contribution to the study of this branch of the Jewish magical tradition. This is all the more important since this branch more or less died out in a subsequent period, as may be seen from the very few parallels between the incantation bowls and the magical recipes from the Cairo Genizah (or from non-Genizah Jewish manuscripts, including "Oriental" ones).[10] In this respect, we may note that our recipes too find very few close parallels among the published and unpublished magical texts from the Cairo Genizah and that when such parallels emerge, they are found in Cairo Genizah recipe books which display some telltale signs of the Babylonian Jewish origin of at least some of their recipes (see our notes to 2b:4–6 and 5a:4-7).

One final feature of our booklet that may be highlighted here is that while the structure of the individual recipes is not always clear, in many cases the incantations, including long stretches of *voces magicae*, seem to precede the ritual instructions, which often are quite short. In this respect, these recipes seem to differ from most magical recipes from the Cairo Genizah, which usually provide the ritual instructions first and then cite the incantations that are to be inscribed or recited. Whether this is a mere coincidence or a more typical feature of Babylonian Jewish magic is an issue that will have to be dealt with elsewhere, and only after more such texts are discovered and analyzed.[11]

10 For these parallels, see especially D. Levene and G. Bohak, "Divorcing Lilith: From the Babylonian Incantation Bowls to the Cairo Genizah," *Journal of Jewish Studies* 63 (2012): 197–217. Two more parallels will be discussed in a forthcoming publication by James Nathan Ford, but given the availability of hundreds of Genizah fragments and hundreds of bowls, such parallels clearly are the exception rather than the rule.

11 We note, for example, the occurrence of this phenomenon in the magical recipes of T-S Misc. 34.22, which displays many other signs of its Babylonian Jewish provenance (and cf. below, n. 84). The instructions similarly follow the incantations in Mandaic spells. See M. Morgenstern and T. Alfia, "Arabic Magic Texts in Mandaic Script: A Forgotten Chapter in Near-Eastern Magic," in R. Voigt (ed.), *„Durch Dein*

In addition to the Babylonian vocalization found sporadically in the manuscript, its Babylonian origin is manifest in several linguistic features, which are mostly grammatical. Some of the formulae are more classicizing than others, but many of the recognizable Babylonian dialectal features appear both in the spells and in the instructions that accompany them (insofar as these have been preserved in the original Aramaic). Representative examples of Babylonian features will be cited here.

Phonology: ותו, "furthermore" (1b:9) for תוב, showing characteristic loss of word-final *b̲*. דוץ, "stick in" (3a:7), from root דע״ץ, showing the loss of the historical ʿ and concomitant shift to II-*waw*/*yod* class.[12] Similarly, תריסר, "twelve" (4a:7), with loss of ʿ. איבי, for אעביד, "I ought do" (4a:3), and אבדנא, "I shall do" (4a:3), for עבדנא, from the root עב״ד, showing the weakening of the historical ʿ and the elision of word-final *d̲*.[13] בכצומי, "amongst sorcerers" (4a:7), for קסומי, showing assimilation of **s* to the pharyngealisation of the *q* and concomitant dissimilation of the *q* to *k*.[14]

Nominal plurals employing an *–ē* morpheme: טורי, "mountains," (1a:3); מלאכי, "angels," (1a:4);[15] בחרשי, "by charms," (2a:5); בשוקי, "in the market

Wort ward jegliches Ding!" /"Through Thy Word All Things Were Made!" II. Mandäistische und Samaritanistische Tagung / 2nd International Conference of Mandaic and Samaritan Studies (Wiesbaden: Harrassowitz, 2013), 163–79, at 164, where it is noted that the same order is employed in Demotic magic texts.

12 See M. Morgenstern, *Studies in Jewish Babylonian Aramaic Based upon Early Eastern Manuscripts* (Harvard Semitic Studies 62; Winona Lake: Indiana, 2011), 64.

13 See Morgenstern, *Studies*, 66–68.

14 As noted already by H. L. Ginsberg, "Aramaic Dialect Problems II," *The American Journal of Semitic Languages and Literatures* (1936): 95–103, at 96, such dissimilation is a Mesopotamian Aramaic feature. *kaṣuma* is also found in Mandaic (E. S. Drower and R. Macuch, *A Mandaic Dictionary* [Oxford: Clarendon, 1963] 200 [hereafter MD]), and we may compare also JBA כמצא, "locust" (M. Sokoloff, *A Dictionary of Jewish Babylonian Aramaic of the Talmudic and Geonic Periods* [Ramat Gan: Bar Ilan University Press, 2002], 586 [hereafter *DJBA*]).

15 Although the absolute form is "retained occasionally following numerals" in JBA (Morgenstern, *Studies*, 113), there are numerous exceptions in both Talmudic

places," (3b:7); דרדקי, "children," (4a:1); בני איגרי, "rooftop demons," (7a:9); בנת אלהי, "daughters of gods," (7b:2). *Nisbe* plural forms employing -איי: בכלדאיי, "amongst Chaldeans (4a:8)."[16]

Pronominal suffixes: *–ēh*, "his," on dual and plural nouns: עיניה, "his eyes" (1a:8);[17] similarly, *-ah* for the feminine: עינה, "her eyes" (2b:12).[18]

Verbal forms: 3rd person imperfects with *n–*: ניזקוף, "let him raise" (1a:8, 1b:2); ונידלי, "and he should draw" (1b:2); נשקיון, "let them give me to drink" (1b:10), showing also the characteristic loss of word-final *–ī* of the object pronoun; נימרו... נשמעו, "let them say… let them hear" (1b:11); ניפרח, "let it flutter" (2b:6); נשתכח, "may be found" (4a:8).

Participle forms: קרן, "they call" (2a:8).[19]

Participles with affixed subject pronouns: 1 m.s. דאמינא . . . ושמינא, "what I say . . . and what I hear." 1 f.s. נפקאנא, "I go out" (3b:7); קא

manuscripts and the magic bowl corpus. The evidence of the magic bowls indicates that the loss of the absolute in this position is a syntactic rather than phonological phenomenon, since it also affects forms of the feminine plural. The following are some representative examples: שבע חרשיא, "seven sorcerers" (MS 2053/29:7); ושבע מבכלתא דליליה ודיממא, "and seven *məbakkela*s of the day and the night" (MS 1927/21:11); והארבע חיותא, "and behold, four beasts" (JNF 259:6; JNF 19:8; JNF 147:5). The same applies to the quantifier כל: כל רוחי בישאתה ורוחי זידיאתה, "all evil spirits and wicked spirits' (JNF 317:4–5); כל נידרי ולוטתא, "all vows and curses" (JNF 7:5); וכל נידרי ואיסרי וכל שבעתא לוטתא ודיוי ליליתא, "all vows and bonds and all oaths, curses and *dev*s and liliths" (JNF 55:5).

16 See Y. Breuer, "The Babylonian Aramaic in Tractate *Karetot* According to MS Oxford," *Aramaic Studies* 5 (2007), 1–45 at 31–32, and M. Morgenstern, "Notes on the Noun Patterns in the Yemenite Tradition of Jewish Babylonian Aramaic," *Revue des études Juives* 168 (2009): 51–83, at 76.

17 H. Juusola, *Linguistic Peculiarities in the Aramaic Magic Bowl Texts* (Studia Orientalia 86; Helsinki: Finnish Oriental Society), 87.

18 On the latter, see M. Morgenstern, "Linguistic Features of the Texts in this Volume," in S. Shaked, J. N. Ford, and S. Bhayro, *Aramaic Bowl Spells, Jewish Babylonian Aramaic Bowls*, vol. 1 (Brill: Leiden, 2013), 42–43.

19 On this form in the Jewish Babylonian magic bowl corpus, see Juusola, *Linguistic Peculiarities*, 206–9.

מקטלאנא, "I kill" (3b:8–9), also showing the exclusively Babylonian tense-marker קא;[20] דשרינא, "that I release" (4a:9). 2 f.s. in *qṭlyt* pattern: רה[ט]ית, "you shall ru[n]," (2a:5). פרחית ונפלית, "you shall fly and fall," (2a:6).[21]

Infinitives: III-*yod* on the pattern of *miqṭā:* ולמשרא, "to loosen" (2b:7).[22]

Particles: כי, "like" (2a:6, 11). כי היכי ד- . . . הכי, "just as . . . so," (2b:5), both Talmudic forms.[23] עילויה, "upon him" (2b:11). מאי, "what" (4a:3 bis).[24]

Vocabulary: זרנוקא, "water pipe" (used euphemistically for penis) (1b:2). נרגא . . . וחצינא, "axe . . . and hatchet" (2a:10). אפותיה, "forehead" (3a:3) is common in JBA and Mandaic but is attested in Syriac only in the lexica and in the Jewish Targums only in the late Targum of Job (41:12). מעלי שבתא, "Fridays" (7b:10) is used only in JBA.

Exceptional in this respect are the spell for the acquisition of knowledge, fol. 5b–6b, and perhaps the first part of the spell for protection in 6b–7a, which employ many conservative forms. The following are a few representative examples:

y- prefix for 3rd person imperfect,[25] e.g., דישמע וילף, "that he shall hear and learn" (5b:3), etc.

20 See also קא משוינא, "I turn (X) into (Y)" (4a:1). Note that in both cases, קא is written as a separate particle, as is common in the better Babylonian manuscripts. See Morgenstern, *Studies*, 172–74.

21 2 f.s. participles in the *qṭlyt* pattern have been previously found in JBA in the magic bowl corpus. See Morgenstern, "Linguistic Features," 45.

22 S. Morag, "Some Notes on the Grammar of Babylonian Aramaic as Reflected in the Geniza Manuscripts," *Tarbiẓ* 42 (1972–73), 60–78, at 70–73.

23 הכי, a Talmudic form, already appears in a magic bowl text. See Morgenstern, "Linguistic Features," 46.

24 Ibid.

25 Juusola, *Linguistic Peculiarities*, 175.

-ūn affixes for imperfect plural verbs:[26] דתיפתחון, "that you will open" (6a:1). תעכבון, "you shall (not) delay" (6b:1). ותצלון יתי, "that you shall deliver me" (6b:6), also employing the direct object marker *yāt-*.[27]

-ti affix for 1 c.s. perfect of III-*yod* verbs: אומיתי, "I conjure" (5b:8), the so-called Onkelos/Jonathan form.[28]

However, since many of these forms are also employed in the Babylonian magic bowl texts, these do not necessarily prove a non-Babylonian origin.

Transliteration, Translation and Comments

In our transliteration, we use the following sigla:

[ ] a lacuna in the text

• a letter which is only partly preserved

א̄ (with superlinear stroke) a doubtful reading

{} Dittography

Our translation and commentary here are kept deliberately brief and aim to provide support for the interpretation of the text presented herein. As the question marks between parentheses in the translation indicate, many passages remain obscure.

26 Juusola, *Linguistic Peculiarities*, 176–77.

27 Juusola, *Linguistic Peculiarities*, 226–28.

28 Juusola, *Linguistic Peculiarities*, 172–73.

Folio 1a

1	BRYNG the *dev*[29] who disturbed the heavens with his (???)	ברינג דיוה דשגיש שמיה באר•יֵה
2	NṬR ṬWRY DWR NMṬY.[31] I went up the mountains,	נטר טורי דור נמטי 0 טורי[30] סליקית
3	and I went down the mountains, and I turned[32] to the hills; I saw	וטורי נחיתית ורמתה תבעית חזיתי
4	three angels, whose names are Gabriel and Uziel	תלתה מלאכי ושמיהון גבריאל ועוזיאל
5	And Shoshiel. They said to me, NN, Who overturned the m[ou]ntains	ושושיאל אמרין לי פ ב׳ פ מן הפך ט[ו]רי
6	that you overturned and the hills that you turned to I said	דאת הפכת ורמתה דאת תבעת אמרית
7	to them, I, NN, since? I wanted the mystery of love	להון אנא פ ב׳ פ דיבעית רזא דרחמת[א][33]

29 Professor Shaul Shaked has suggested to us that "bryng dywh looks like an Iranian word, but no such word exists in this form. One may think of *bērōnīg 'external' or a similar emendation. Such a word is unknown as the name of a demon, but is at least a plausible designation for a demon."

30 The following *historiola* bears a strong resemblance to similar passages in the magic bowl corpus and Mandaic formularies, e.g., *lṭura ḏ-nirig silqit ldaura rba ḏ-bit hiia aškaita lmihla pt bil alaha ulmiša br šušma hiuara*, "I ascended to the mount of Nirig, and to the great abode of the House of Life; I found Salt, daughter of the god Bel, and Oil, son of white sesame" (*Zarazta ḏ-Hibil Ziua,* ed. De Morgan 265/20: 40–43).

31 We have presented these as magic words as we are unable to propose a coherent translation. The first two words, **נטר טורי** may be rendered as "Guardian of the mountains" or "Guard mountains (imperative). . . ." **נמטי** may be either a verb (3 m.s. or 1 c.s. of **מט״י** in *qal* or *ʾapʿil*) or a noun meaning "pieces of felt, belt coverings" (Sokoloff, *DJBA*, 755).

32 For this meaning of **תבע** see M. Kahana, "The Importance of Dwelling in the Land of Israel According to the Deuteronomy Mekhilta," *Tarbiẓ* 62 (1993) 501–14, at 507 (Heb.).

8	from NN. Let him raise his eyes to heaven and he shall se[e]	מן פ׳ ב פ ניזקוף עיניה לשמיא ויחז[י]
9	the mystery of love from NN, Amen Amen Sela.	רזא דרחמתא מן פ ב פ אמן אמן סלה
10	ʾGLN QWṬY SWTY ʾKYMY ʾṢṬYS ZWṬY	אגלן קוטי סותי אכימי אצטיס זוטי
11	QYNRY NDM. Say over bdellium[35] and mustard . . .[36]	קינרי נדם ק׳ ע מיקל[34] אזרק וכרדל

Folio 1b

1	. . . over (it?) 7 times. This mystery is appointed for NN,	[ ]•• על ז׳ זמ׳ מזמן הדין רזא לפ ב פ׳
2	that he should raise his water pipe[37] and draw his bucket and drip	ניזקוף זרנוקיה ונידלי דוליה ותינטוף

33 The expression רזי רחמתא is found in the erotic bowl published by J. A. Montgomery, *Aramaic Incantation Texts from Nippur* (Philadelphia: University Museum, 1913) 28:3, 4 (p. 213).

34 Lege: מוקל.

35 Muql azraq, i.e., bdellium; see E. Lev and Z. Amar, *Practical Materia Medica of the Medieval Eastern Mediterranean According to the Cairo Genizah* (Leiden: Brill, 2007), 111.

36 כרדל is the Judeo-Arabic spelling for خردل, "mustard," cognate with JBA חרדלא. For the use of mustard in aggressive magic in late-antique Babylonia, cf. the *Pishra de-Rabbi Hanina ben Dosa*: ואם על חרדלא עבדו ליה ועל בר זרעא עבדו ליה קטריאל ישרי ויפשר ליה, "And if they did it to him over mustard or if they did it to him over seed, Qaṭriʾel will release and exorcise for him" (Franco Michelini Tocci, "Note e documenti di letterature religiosa e parareligiosa giudaica," *Annali dell'Istituto Universitario Orientale di Napoli* 46 [1986], 101–8, at 103).

37 Here used in a figurative manner; the same usage is found in Mandaic: *mta huṭrak unidalia qumtak uniqum zarnuqak ulanitikbiš,* "extend your staff that your stature be raised up and your pipe be erected and not brought down" (DC 12: 59–60). For a similar use in Palestinian Jewish Aramaic, note the use of the Greek loan word סילונה (tube, pipe) for the male organ, on which see S. Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch und Targum* (2 vols.; Berlin, 1898–99; repr.,

3	his drop in NN, in the name of BYMH NṢṬWRYNW	נטופתיה בפ׳ ב פ׳ בשם בימה נצטורינו
4	ḤSPWṬ ʿYDNNʾ MSʿLYMṬS LʾPLYṬWS	חספוט עידננא מסעלימטס לאפליטוס
5	A(men) A(men) S(ela). Precious[38] oil, precious	א א ס 0–0 מישחא שיהא משחא
6	oil, oil boiled[39] in jasmine;[40] noblemen	שיהא משחא סליקא בדיסמין חרי
7	smeared[41] it on their necks; noblewomen, on their pudenda(?),[42] contentious women	שפוי בצוריהון חרתא בגנסקיהי גרגיתא

Hildesheim: Georg Olms, 1964) 1:383, and G. Bohak, "The Magical Rotuli from the Cairo Genizah," in G. Bohak, Y. Harari, and S. Shaked. eds., *Continuity and Innovation in the Magical Tradition* (Jerusalem Studies in Religion and Culture, 15; Leiden: Brill, 2011), 321–40, at 333. דולא, "bucket," is also used as a euphemism for the source of fecundity in a wedding poem in Jewish Palestinian Aramaic: דולך לא יחסר וטב תתבשר, "may your bucket not be lacking and may you be told good (tidings)," published in M. Sokoloff and J. Yahalom, *Jewish Palestinian Aramaic Poetry From Late Antiquity* (Jerusalem: Israel Academy of Science, 1999), 258, text 44*:8 (in Hebrew).

38 Compare E. S. Drower and R. Macuch, *A Mandaic Dictionary* (Oxford: Clarendon, 1965), 458 s.v. šušma, cited from *miša anat šiha br šušma hiuara,* "The oil you are, precious, from white sesame" (CP no. 23).

39 Cf. Sokoloff, *DJBA*, p. 674: ישחא שליקא = butter. The text could also mean oil boiled with jasmine.

40 For the use of jasmine oil, cf. על מישחא דיסמין זמנין ז׳ רטין ושלח מיניך, "on jasmine-oil, whisper seven times and remove your clothes" (T-S K 1.162, published in P. Schäfer and S. Shaked [eds.], *Magische Texte aus der Kairoer Geniza* III [Tübingen: Mohr Siebeck, 1999], no. 61).

41 Derived from older שפוהי. See M. Morgenstern, "Linguistic Notes on Magic Bowls in the Moussaieff Collection," *Bulletin of the School of Oriental and African Studies* 68 (2005): 349–67, at 363.

8	on the circles of their navels; the troop on the (???)[44] of its servants	בקופי שיריהי[43] גיסנא בשופי דטליה
9	smeared it. NN, in front of the house of love(?) of the town; and furthermore,	שפיה פ׳ב׳פ׳ וקבאל בי חן דמתא ותו
10	from their meat let them (give me to) eat and from their cup let them give me to drink,[45]	מאוֹמציהו ניכלון ומיכסיהו נשקיון
11	what I say they let them say and what I hear[46] let them hear	דאמינא אנא נימרו ושמינא נשמעו
12	A(men) A(men) S(ela). Say at the beginning of the month when it is the second (day)	א׳ א׳ ס׳ ק׳ כל ראש ירחא מידהוי ב׳

Folio 2a

1	of the month and one of its other days, first of all, sa[y]	בירחא וחד מי אחרנה אולשי ואמ̇[ר][47]
2	seven times, each day three times. From	ז׳ זמני כל יומא תלת זמני 0–0 מן

42 **גנסק** might be a Persian loanword for "orchis, testicle," apparently employed euphemistically for both male and female pudenda. See Claudia A. Ciancaglini, *Iranian Loanwords in Syriac* (Wiesbaden: Ludwig Reichert, 2008), 138.

43 Lege: **שוריהי**. Cf. below, 3a:8.

44 The reading **שופי** is certain, but we are unable to propose a suitable interpretation.

45 Since **נשקיון** is a transitive verb bearing the 1 c.s. object suffix (*n* < *-ni*; contrast the following verbs **נימרו**, "let them say," and **נשמעו**, "let them hear," without the final *n*), we should similarly understand **ניכלון** as representing a minor scribal error for **נוכלון**, "let them give to eat."

46 Here **שמינא** appears in place of regular JBA **שמענא**. On the morphological shift of III-*ʿayin* to III-*yod* in JBA, see Morgenstern, *Studies,* 63–64.

47 The reading of the last two words is uncertain, and their meaning is unclear.

3	the gloom of gloominess[48] you came out, from the great	חבר חברירי̈ה נפקתון מן אתרא
4	place of darkness; the evil spirit Anpharid,	רבא דיחשוכא אנפרי דרוחא בישׁתא[49]
5	which is sent by charms;[50] you shall[51] ru[n] like a deer,[52]	דמישתדר בחרשי כי טביא רה[ט]ית
6	you shall fly like a wind,[53] and you shall fall upon NN;	כי זיקא פרחית ונפלית עליה דפ ב פ

48 We interpret חברא as equivalent to הברא, "darkness," which is sometimes written with etymological ח in JBA (Sokoloff, *DJBA*, 361). חברירי̈ה (plural emphatic) appears to be an antonym of שבריר̈א, "radiance of sun, sunlight". For the sentence structure, compare *umn škinatun ḏ-hiia qadmaiia atit mn atra rba ḏ-nhura,* "you came from the dwellings of the Primordial Life, from the great place of light" (*Pašar Mihla,* DC 51: 14–16).

49 Lege: אנפריד רוחא בישא. Compare אנפרת רוחא בישתא, "Infarat, the evil spirt" (BM 91767:2), also written אינפרת (ibid:7), who is similarly sent against an opponent by means of witchcraft. See M. Morgenstern, "The Jewish Babylonian Aramaic Magic Bowl BM 91767 Reconsidered," *Le Muséon* 120 (2007): 5–27. Professor Shaul Shaked has drawn our attention to the discussion of Arabic عفريت, *ʿifrīt*, in A. Jeffery, *The Foreign Vocabulary of the Qur'an* (Baroda: Oriental Institute), 215, and adds: "The Aramaic form suggests a Persian antecedent word such as **an-āfrīd,* 'uncreated,' and the Arabic word may be regarded as an abbreviated form."

50 Formulae like דמשתדר(ין) בחרשי are common in the bowls' descriptions of demons, e.g., מן סטני דמישתדרי בחרשי, "from satans that are sent by charms" (Moussaeiff 121:4, published in D. Levene, *A Corpus of Magic Bowls: Incantation Texts in Jewish Aramaic from Late Antiquity* [London, 2003], 81). See also C. Isbell, *Corpus of the Aramaic Incantation Bowls* (Missoula, Montana: Society of Biblical Literature and Scholars Press, 1975), 63:7.

51 For the *qṭlyt* pattern of the 2 f.s. participles, see the linguistic introduction.

52 For this simile, cf. below, 6a:6–7: ואירוץ בהון כצבי שהוא רץ במדבר, "I will run in them like a deer that runs in the desert."

53 Cf. the anti-witchcraft spell of *b. Pes* 110a–b: קרח קרחייכי פרח פרחייכי איבדור תבלונייכי, **פרחא זיקא** למוריקא חדתא דנקטיתו נשים כשפניות, "may your heads grow bald(?), may your capers flutter, may your spices be scattered, may a wind flutter the new saffron that you are holding, you female witches."

7	like the three angels which are sent in the clouds	איך תלתא מלאכין דמשתד[ר]ין בענני
8	of hail,[54] and thus they are called:[55] Aglit and Maglit	ברדא וכין קרן להון אגליט ומגליט
9	and Hadar Galat; ascend to the high heavens and break	והדר גלת סקו לשמי מר[ו]מא ותברו
10	the axe from Bel and the hatchet from Barbel(?), and they will turn back	נרגא מן ביל וחצינא ומן[56] בַּרביל[57] ומיתפכין
11	like an eagle and turn back against NN. In your name	כי נישרא ומיתפכין על פ ב פ׳ בשמך
12	ʾYWʾY PY DWN ʾYWʾY ʾWRP ʾWRP	איואי פי דון איואי אוֹרָף אורף

54 ענני ברדא is paralleled in two of the bowls from the British Museum, 001A:10 and 002A:12 (J. B. Segal, *Catalogue of the Aramaic and Mandaic Incantation Bowls in the British Museum* [London: British Museum Press, 2000], 43–44): ושדרו וחבילו יתה מין עננין דברדא, "and they sent and injured her from clouds of hail."

55 Lit: they call them; קרן is an impersonal 3 pl. participle of the "Onkelos" type. For the "naming" of demons, compare מסמיתא מטריתא עוירתא קרן לכי מחגרתא קרן לכי גרבניתא קרן לכי שפופתי קרן לכי, "They call you the blinder, the smiter, the sightless; they call you the lame one, the scabeous, the crawler" (MS 1927/8:7, in S. Shaked, J. N. Ford, and S. Bhayro, *Aramaic Bowl Spells, Jewish Babylonian Aramaic Volume 1* [Leiden: Brill, 2013], 56, with some alterations to the translation).

56 Lege: מן.

57 For this formula, cf. the bowl (IM 9736) republished by Ortal-Paz Saar, "An Incantation Bowl for Sowing Discord," *Journal of Semitic Studies* 58 (2013): 241–56, at 242, l. 7: איתהפיך ביל ואביל ונבו ובורסיף, "overturned are Bel and Abel and Nabu and Borsip." For the reemergence of the old Mesopotamian gods in Aramaic and Mandaic texts, see C. Müller-Kessler and K. Kessler, "Spätbabylonische Gottheiten in spätantiken mandäischen Texten," *Zeitschrift für Assyriologie* 89 (1999): 65–87; D. Levene and G. Bohak, "A Babylonian Jewish Aramaic Incantation Bowl with a List of Deities and Toponyms," *Jewish Studies Quarterly* 19 (2012): 56–72.

Folio 2b

1	ʾH ʾW WʾY ʾYPʾ WʾYP PNT PNT	אה או ואי איפא ואיף פנת פנת
2	ʾNBYʾ ʾPNT PNT WʾP WʾP ʾWRP	אנביא אפנת פנת ואף ואף אורף
3	ʾWRP. Say over dust from under a corpse,	אורף ק׳ ע עפרא מתחות מיתא
4	and put it in an amulet and hang it on a bird and let it fly	ורמי בקמיעא ותלי בצפרא ואפרחה[58]
5	and say over it: Just as this bird	ואמר עליה כי היכי דפרחא הדא

62 Compare in Mandaic: *rirḫ daiib upumḫ ptia*, "his saliva is dripping and his mouth is open" (DC 43E:8 // DC 20: 18-20). DC 43 here provides the better reading but was erroneously read in C. Müller-Kessler, "A Mandaic Incantation against an Anonymous Dew Causing Fright (Drower Collection 20 and its variant 43 E)," *Aram* 22 (2010): 453–57, at 460.

63 The words here look like *voces magicae*, but one would expect instructions such as "Take mud, fashion a figurine," etc.

64 Presumably the text is referring to the production of a "voodoo doll," writing on its forehead, sticking needles in it, etc.

7	and bring five needles; stick one	ואיתו חמיש מחטי דוץ חדא
8	in its heart and one in its navel and one in its two	בלביה וא׳ בשוריה וא׳ בתרתין
9	thighs, with its two hands	עטמתיה וב׳ ב׳ ידיה

Folio 3b

1	on its knees right [to the left, and le]ft (one) to right	על רוכביה ימין [לסמול ו]סמול לימין
2	and put it in a new[67] vessel with its [hea]d below[68] and its legs	ושידיה במנא חתא[ר]שׁיה מתיי ושקיה
3	above, and bury it in a fresh grave which is one day old	לעילא וקבור בקברא חתא בר א׳ יומא
4	or two days old. ʾ[Y]DR ʾYDR BWKʾNʾ	או בר ב׳ יומי 0–0 א[י]דר אידר בוכאנא
5	BʾDʾ BYK QWʾ QZ[69] On the back of a lion I ride	באדא ביך קוא קז אגבא דאריא רכינא
6	and the girdle of male sorcerers and female sorceresses I have fastened to	והומיאנא דחרשי וחרשתא בחציי
7	my loins.[71] I go out[72] in the market places of infant(s),	מחי לי בשוקי יניק נפקאנא[70]

65 Here and in the next two lines there is a hole in the parchment that was clearly present before the scribe began writing his text.

66 For היי, note that in early Babylonian manuscripts the form of the demonstrative pronoun is האיי, *hāyi*. See Morag, "Some Notes," 66–7 (Hebrew).

67 Here and in the next line, חתא = חדתא. Compare Th. Nöldeke, *Compendious Syriac Grammar* (London: Williams and Norgate, 1904), 21.

68 We take מתיי as *mittaii,* equivalent to מתחתאיי, "underneath." For placing the "voodoo doll" upside down, note, for example T-S Ar. 43.259: ותאכד קדר גדידה ותג׳על פיהא גיר ותאכד׳ אלתמתאל ותכבה עלי ראסה פי אלקדר, "take a new cooking pot and put lime in it and take the figurine and cast it upside-down into the pot."

69 It is unclear whether this was once a coherent text or was always magic words.

8	and in the streets that are full of children; I	ובביריאתא דמלין דרדקי קא
9	kill an infant in the market places and children in	מקטלאנא בשוקי יניק ובביריאתא

Folio 4a

1	the streets.[73] I turn wine into vinegar and old wine[74]	דרדקי קא משוינא חמרא חלא ואתיקא
2	into ???,[76] white flour into ashes {ashes}, barley	גאנה חיוריתא קיטמא קיטמא[75] קמחא

70 There is a hole in the parchment, here and in the next line, that was clearly present before the scribe began writing his text.

71 **מחי לי**, "I have fastened," represents the *qəṭīl li* syntagm. Compare the Mandaean *Zarazta d-Hibil Ziua: himiana d-birqa mhilia bhalṣai*, "I have fastened a girdle of lightening to my loins" (DC 44: 505-6). For "loins," JBA commonly employs **חרצא**, pl. **חרצי** (Sokoloff, *DJBA*, 484), though the by-form **חצי** is already found in the Dead Sea Scrolls (see M. Morgenstern et al., "The Hitherto Unpublished Columns of the Genesis Apocryphon," *Abr-Nahrain* 33 [1999]: 30–54, at 35) and late Mandaic (MD 125) and is the regular form in Classical Syriac (see M. Sokoloff, *A Syriac Lexicon* [Winona Lake, IN: Eisenbrauns], 482). Dr. Y. Z. Stampfer has drawn our attention to the use of **חציה** in Geonic citation from *b. Giṭ* 78a. See Z. Stampfer, *Laws of Divorce (Kitāb al-Ṭalāq) by Samuel ben Ḥofni Gaon* (Jerusalem: Ben Zvi Institute, 2008), 92.

72 **נאפקאנא** and the following verbs represent 1 f. participle forms, characteristic of the best textual witnesses of Jewish Babylonian Aramaic. See Morgenstern, *Studies*, 120–22, and M. Morgenstern, "Rare Forms in Eastern Aramaic," *Language Studies* (Heb., forthcoming).

73 For this section, see Shaked, Ford, and Bhayro, *Aramaic Bowl Spells*, 202, and additional parallels in M. Morgenstern and M. Schlüter, "A Mandaic Amulet on Lead," Martin Schøyen Collection MS 2087/1 *Eretz Israel*, (Joseph Naveh Memorial volume), forthcoming.

74 **ואתיקא** is a phonetic spelling of **ועתיקא**.

75 Dittography?

76 We are unable to offer a satisfactory explanation for the word **גאנה**, which presumably refers to some acidic substance into which wine may deteriorate.

3	flour into dust and ashes?[77] What ought I do[78] to him, and what	דסערי עפרא ופרי מאי איבי ליה ומאי
4	shall I do to him, to NN? I shall take his thorn(?) / spirit(?) from him,	אבדנא ליה לפ ב׳ פ חוחיה[79] שקלנא ליה
5	and I shall cast it in a tube, I shall seal it with pitch	בגובתא שדיאנא ליה בכופרא סטמנא ליה
6	and bury it in the earth and trample it with my heels	בארעא קברנא ליה ובעיקבאי דישנא
7	for twelve months of the year; so that neither amongst magicians nor	ליה תריסר ירחי שתא לא בכצומי ולא
8	amongst Chaldaeans[80] shall a healer be found for him, un[til?]	בכלדאיי אסיא לא נשתכח ליה אד••
9	I release him and he dies. Say (it) over a green lizard	דשרינא ליה ומית ק׳ על[81] צרריתא

Folio 4b

1	seven times in a reed tube and bury (it) in the inner	יורקתא ז׳ זמ׳ בגובתא דקניא וקבר באסקפתא
2	threshold. 0–0 ʾṬṬ ʾSS WʾWSYS WHWDYH	גויתא 0–0 אטט אסס ואוסיס והודיה

77 Perhaps this is **ופרי** for **ואפרי**, like Hebrew **עפר ואפר**.

78 On the Babylonian forms **איבי** and **אבדנא**, both derived from the root **עב״ד**, see Morgenstern, *Studies*, 66–68.

79 Lege: **רוחיה**?

80 The expression **כצומי וכלדאי** is also attested in the Klagsbald bowl, AMB 13:13 (J. Naveh and S. Shaked, *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* [Jerusalem: Magnes, 1987], 200).

81 There is a hole in the parchment, which was probably there before the scribe began writing his text.

3	WHWDYRYH, send, send against him, NN	והודיריה[82] שדר שדר עלוהי דפ׳ בפ׳
4	the fire of a spell; say (it) over 7 ???[83] of ???, and place it in the socket	אש לחש: ק׳ ע׳ ז׳ בורי דטבין ושדי בצינורא
5	of the door. Skull, GPNM WNY?SGP	דדשא 0 גולגולתא[84] גפנם ונ?סגף
6	I have adjured you, NWRDPYS the satan, that you shall go	אשבעית עלך נורדפיס סטנא דתיזיל
7	and cast fire upon NN, that it may dance[85] upon you,	[ות]פיל אשתא על פ׳ב׳פ׳ דתירפיס עלך
8	on him on him on you on you on him Amen Amen Sela.	ועלה עלה עלך עלך עלה אמן אמן סלה

Folio 5a

1	Say (it) over the (???) . . . the white son of an egg, which	ק׳ ע׳ אלערבייה [ ] אבין בידה אלביד אלדי

82 A similar set of voces *magicae appe*ars in the Sword *of Moses:* אנא אססי אסס ואסיסיה ואפרגסיה שליחא קלילא, "I am ʾSSY ʾSS WʾSYSYH WʾPRGSYH, the speedy messenger"; see Yuval Harari, Harba d*e-Moshe (The Sword of Moses): A New Edition and a Study Jerusal*em: Academon, 1997) (Heb.), 26.

83 This may be the same as בורא *b. Šabb.* 140b (Sokoloff, *DJBA*, 192), the meaning of which remains unknown.

84 This spell has a partial parallel in T-S Misc. 34.22 (a fragment whose magical recipes display a strong Babylonian influence): שילוח אש אנה גולגלתא אנא גלגולתא כ?ם ו?הנ?ם / כם והנם אנא והנם אנה והנם אשבע לכי ומנ?א? לכי? / .ד רום סטנא בישא דיתיב על תלת מאה ושיתין סטנין / איזיל ואפיל אש על פ׳ב׳פ, "(For) sending fire: ʾNH skull, ʾN׳ skull, KM WHNM KM WHNM ʾN׳ WHNM ʾNH WHNM, I adjure you and I conjure? you .D RWM, the evil satan who sits over three hundred and sixty satans, go down and bring down fire on NN," etc.

85 The meaning of רפ״ס in this context is uncertain. It could mean to dance, flutter (see Sokoloff, *A Syriac Lexicon,* 1485), or perhaps to tremble (denominative of ריפסי, *DJBA* 1077).

2	no chicken has mounted and ??? and slaughter/cook	לם יצעד עליה דגיגיה[86] מא ותכרא ואדבח
3	and put it on the egg(?)/in his hand(?) and ??? from the sackcloth garment and bury it	איג עלה[87] בידה ואגעלוה מן אלמיסח ואדפ[נוה]

Folio 5b

1	Do (it) for your Name, for the sake of [your name]. This amulet	לשמך עשה למען ש[מך] מזמן הדין
2	is appointed[91] for the name of NN, that you may open his	קמיעא על שום פ׳ב׳פ׳ דתיפתח ליביה

86 Lege: דג׳אג׳ה, i.e. דג׳ג׳ה.

87 Lege: אגעלה?

88 The magic words are vocalized with Babylonian vocalization.

89 There is a hole, or some other irregularity in the parchment, that was clearly there before the scribe began writing his text.

90 Note a somewhat similar recipe in Bod. Heb. e 74.21 (a folio from the same manuscript as the two fragments published by Schäfer and Shaked, M*agische Texte* III, no. 69, which display a Babylonian vocalization): להנצל מעת צרה: אמור ג׳ פעמים על קטר של תבן לגת לגם סכר בלם ותן אותו אחורי אזניך, "to be saved from a time of trouble, say three times over a knot of hay LGT LGM SKR BLM and place it behind your ear."

91 This is a common formula in the bowls, e.g.: מזמן הדין קמיעה לאסותא לנטרתא ולחתמתא דביתיה ד-, "This amulet is appointed for the healing and protection and sealing of the house of . . ." (Gordon A:1, published in C. H. Gordon, "Aramaic Magic

3	foolish[92] heart to all words of the Torah, that he shall hear and learn,	טפשא לכל פיתגמי אוריתא דישמע וילף
4	and all that he learns he shall not forget. ʾQQPṢ[94] HH WH YH	וכל די ילף לא ישכח אקקפץ[93] הה וה יה
5	holy, PṬMNY PTPTY PTPYH holy, ʿGSNṢ	קדוש פטמני פתפתי פתפיה קדוש עגסנץ
6	MYN holy, ŠSYS HʿNH HYG holy, THPGYH	מ֗ין קדוש שסיס ה֗ענה היג קדוש תהפגיה
7	SPYH holy, ṢWH NPNT HWH holy, STW	ספיה֗ קדוש צוה נפנת הוה קדוש סתו
8	NQSS Q?W? safeguarded,[96] holy. I conjure	נקסס[95] קו֗ סמיר קדוש אומיתי
9	you and adjure you,	עליכון ואשבעית עליכון

Bowls in the Istanbul and Baghdad Museums," *Archiv Orientální* 6 [1934]: 319–34, at 321).

92 Sokoloff, *DJBA* 514, reconstructs the singular of this adjectival form as טפשאה. On the merger of the noun marker *-ā* and the adjectival/gentilic morpheme *-āʾā*, see M. Morgenstern, "Notes on the Noun Patterns in the Yemenite Tradition of Jewish Babylonian Aramaic," *Revue des Études Juives* 168 (2009): 51–83, at 75–79, where evidence is also cited for alternative plural forms טיפשי, and טיפשאיי.

93 For the following set of *voces magicae*, note a similar sequence in MS New York Public Library 190 (*olim* Sassoon 56), p. 77, lines 7–9: ובהדין שמא רבא ויקירא וקדישא / ק׳ק׳ק׳ פץ קה והוה קדוש פפותמי קתניה קדוש קתר נקססה / נספרה, "and by this great, precious, and holy name, H(oly), H(oly), H(oly), PẒ (=WH in *atbash*) QH WHWH Holy PPWTMY QTNYH Holy QTR NQSSH NSPRH."

94 The series of *voces magicae* in lines 4–8 is characterized by the repetitive structure XXX + Yh *qadosh*, and if we omit the initial *aleph*, we may note that the individual sequences begin with ק, פ, ע, ש, ת, צ, ס, which may indicate an earlier attempt at an acrostic arrangement of this series.

95 There is a hole, or some other irregularity in the parchment, that was clearly there before the scribe began writing his text.

96 Compare Mandaic *smir,* "well preserved, safeguarded," in MD 333 s.v. SMR.

Folio 6a

1	and place an oath upon you,[97] that you will open my heart, me	וקיימית עליכון דתיפתחון ליבי דילי אנא
2	NN, and you will make (it) wise for Torah, and you will remove the foolishness	פ ב׳ פ ותחכמון לאוריתא ותפקון טפשות
3	of the[98] heart from the heart of me, I, NN, and you will see/make seen[99] and open	ליביה מן ליבא דילי אנא פ׳ב׳פ׳ ותחמון ותפ[תחון]
4	my heart , I, NN, like the heart of Metatron and like the heart of	את ליבי דילי אנא פ ב פ כלב מיטטרון וכלבּ
5	Moses son of Amram, and teach me the six columns of the Tal[mud][100]	משה בר עמרם ולמדני ששה טורים שלתּל[מוד]
6	in six(?) years, and I will run in them like a deer that runs[102]	בשם שנים[101] ואירוץ בהון כצבי שהוא רָץ
7	in the desert and guard in my belly all that I learn, and what I learn	במדבר וטרו במעי כל מה דאילוף ומא דאילוף
8	from this day and forever, and teach me words of Torah and wisdom,	מן יומא דנן ולעלם ולמדני דברי תורה וחכמה

97 This is a common formula in the bowls, e.g.: ואסרית ואשבעית ואחרימית וגזרית וקיימית עליכון in an unpublished bowl (SAD 31) brought to our attention by Dan Levene.

98 Lit.: his.

99 If the text is not corrupt (lege: ותחכמון, as in the previous line?), then we have here a rare example of the root חמ״י used in a Babylonian text. This spell is in general very conservative in its language.

100 This expression apparently refers to the six orders of classical rabbinic literature, though the use of טורים, "columns," in this context is unusual.

101 Lege: בשש שנים.

102 The use of the correlative pronoun with participle is regarded as characteristic of the Palestinian transmission of rabbinic Hebrew. See M. Bar-Asher, "Mishnaic Hebrew: An Introductory Survey," *Hebrew Studies* 40 (1999): 115–51, at 132.

Folio 6b

1	so that everything that I will hear I will learn[104] at once.[105] And you shall not delay	וכל דאישמע למדינו[103] בזמן אחד ולא תעכבון
2	this oath and this adjuration, and by the name of YH HW	מומתא הדא ושבועתא הדא ובשום יה הו

7	from all evil demons and from demons, whether demons of the day	מן כל מזיקין בישין ומזיקין בן מזיקין דיממא
8	or demons of the night, and all demons and demons which stand	ובין מזיקין דליליא וכל מזיקין ומזיקין דקימין

Folio 7a

1	before me, I, NN, smite them	לקבלי דילי אנא פ ב פ׳ טרופו יתהון
2	in the name of these letters by which I adjured y[ou]	בשום אותות הללו שהשבעתי אתכם

103 Lege: אלמדינו, or perhaps למדיני.

104 Or: teach me. See previous note.

105 בזמן אחד may be a calque on Aramaic בחד זימנא, "in one go." Standard Hebrew for "time" (French *fois* rather than *temps*) would be פעם.

106 Lege: דתצלון.

3	and by the name HWH YH YH HW HH HYW HW	בהם ובשם הוה יה יה הו הה היו הו
4	HH HY YH WH WHW HH YH YH YHW HY forever.	הה הי יה וה והו הה יה יה יהו הי[107] לעולם
5	Sealed and counter-sealed (is) NN from demons and spark-demons	חתים ומחתם פ ב פ מן מזיקין ומזיקין
6	and harmers and devils and evil spirits, [whether male]	ופיגעי וסיטני ומן רוחין בשתא בֿ[ין דיכרי]
7	or female, whether of the day or of the night, and from	ובין ניקבתא ובין דיממא ובין דלילֿ[יא] ומן
8	demons and *devs* and Liliths and from idol-spirits	שידי ומן דיוין ומן לליתא ומן [פ]תיכרי
9	and from the rooftop-demons[108] and from the sixty-six (demons) which are	ומן בני איגרי ומן שיתין ושתה דאית
10	in the world.[109] All who stand before me,	בעלמא כל דקאים לקבלי

107 Lege: חי?

108 On the identification of "roof demons" as demons causing epilepsy, see T. Kwasman, "The Demon of the Roof," in I. Finkel and M. J. Geller, eds., *Disease in Babylonia* (Leiden: Brill, 2007), 160–72, esp. 165–69.

109 This list of demons finds ample parallels in the bowls. For the number sixty-six, cf., e.g., בשום צידקיה דהוא ראיש שיתין ושיתא מלאכין די ממנן על דמה, "In the name of Ṣidqiyyah who is the chief of sixty-six angels who are appointed over her blood" (Moussaeiff 155:10, published in Levene, *Corpus*, 111) or ובעיזקתיה דישלמה בר דויד מלכה דיחתימין בה תלת מאה ושיתין ושיתה שידין, "by the signet ring of Solomon son of David, the king of Israel, by which are sealed three hundred and sixty six demons" (VA 3854:15–18, published in D. Levene, "*Heal O' Israel*: A Pair of Duplicate Magic Bowls from the Pergamon Museum in Berlin," *Journal of Jewish Studies* 54 [2003]: 104–21, at 105).

Folio 7b

1	I, will be killed by a great killing, just as were killed[110]	אנא יתקטל בקטלא רבא כמא דאיתקטל
2	the seven daughters of the gods and the eight daughters of the female	שבע בנת אלהי ותמני בנת איסתראתא
3	ishtars. By the name of HY HY HWH HY HH HW HH	ניקבאתא[111] בשם הי הי הוה הי הה הו הה
4	YH HY HH WH HY HW HH WH YH YHW HY the eternal(?)	יה הי הה וה הי הו הה וה יה יהו הי[112] עולמים
5	A(men) A(men) S(elah) YHH WYH YH HH HH YW HW HH WH WH	א א ס יהה ויה יה הה הה יו הו הה וה וה
6	HW YH WH WYHH KYN[114] ṬM'. This adjuration.	הו יה וה ויהה כין טמא[113] הדין שבועתא
7	Say(?) (it) 23 (or, on 3?) Fridays, before dusk[115]	ק' פּג' מעלי שבתא קדים סמוך יומא
8	just as ??? (when he heats an oven?) when the day sets and he should immerse (himself in)	כי היכי חמי קמנא במסמך יומא וניטבול

110 On the apocopated form of the 3 m.p. perfect see Morgenstern, *Studies*, 186–89 (with previous literature).

111 For a partial parallel in the bowls, see היכא דיתבן הנין שבע בני אלהי וידען שבע מילי תקיפתא, "where there dwell these seven sons of gods who know seven powerful words" (Moussaieff 163:9, published in Levene, *Corpus*, 122).

112 Lege: חי?

113 Lege: תמת?

114 The sequence WYHH KYN might be construed as garbled Aramaic, but note a similar sequence in 6b:3.

115 For סמוך יומא, compare Mandaic *masmikana* (dusk), which stands in contrast to *madnaha* (dawn): *mn madnaha ualma lmasmikana umn masmikana ualma lmadnaha,* "from dawn to dusk and from dusk to dawn" (*Pašar Mihla*, DC 51: 300–302).

9	water, and come out(?) from the dawn of the Friday,	מיא ויתא מנגהי מעלי שבתא
10	and he should sit in fasting for three Fridays,	ויתב תעניתא ג׳ מעלי שבתא

THE MAGICAL ROTULI FROM THE CAIRO GENIZAH

Gideon Bohak

Introduction

In spite of much progress in recent decades, the magical texts found in the Cairo Genizah have yet to receive the attention they deserve.[1] In the present paper, I shall focus on a previously unnoted type of Genizah magical fragments—namely those written on vertical parchment scrolls (*rotuli*).[2] Such scrolls are extremely interesting not only because of their format, but because of their contents as well, and especially the aggressive magical recipes they contain, some of which clearly stem from late-antique Palestine. But as these fragments are quite long, and the task of reconstructing them is in no way finished, no attempt will be made here to offer a full edition of any single rotulus; instead, I shall limit myself to a description of their codicological and scribal features, a brief analysis of their contents, and a selective edition of some of their magical recipes. In the future, I hope to provide a full edition of

[1] The present paper forms a part of a wider research project on the magical texts from the Cairo Genizah, which is based on a preliminary list of Genizah magical fragments compiled by Professor Shaul Shaked, and is funded by the Israel Science Foundation (Grant no. 725/03). I am grateful to my research assistants—Shani Levy, Karina Shalem and Irena Lerman—and to Ortal-Paz Saar, for their assistance throughout this research project. The final version of the present paper was written during my year-long stay in Cambridge, partly funded by the Genizah Unit of the Cambridge University Library (for which I am especially grateful to Stefan Reif and Ben Outhwaite, the former and current heads of the Unit), and by the Friedberg Genizah Project. I am also grateful to Judith Olszowy-Schlanger for her illuminating codicological and paleographical advice.

[2] For previous publications of Genizah magical texts, see especially Joseph Naveh and Shaul Shaked, *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1985) (henceforth AMB); id., *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1993) (henceforth MSF); L. H. Schiffman and M. D. Swartz, *Hebrew and Aramaic Incantation Texts from the Cairo Genizah: Selected Texts from Taylor-Schechter Box K1*, [Semitic Texts and Studies 1] (Sheffield: Sheffield Academic Press, 1992) (henceforth HAITCG); Peter Schäfer and Shaul Shaked, *Magische Texte aus der Kairoer Geniza*, [Texte und Studien zum Antiken Judentum 42, 64, 72] (Tübingen: J. C. B. Mohr (Paul Siebeck)), vol. 1 (1994), vol. 2 (1997), vol. 3 (1999), vol. 4 (forthcoming) (henceforth MTKG).

these fragments, as of many other Genizah magical recipes and recipe-collections which deserve a more detailed analysis.[3]

The Magical Rotuli—A Broad Survey

The presence of rotuli—that is, vertical scrolls made of relatively narrow pieces of parchment sewn together one below the other—in the Cairo Genizah has occasionally been noted, and a few such rotuli have already been published.[4] However, the number of unpublished Genizah rotuli known to me already amounts to many dozens, and as these fragments seem to belong to the earlier strata of the Cairo Genizah, and some of them clearly were in use even before Genizah times, they certainly deserve a close codicological analysis of their different forms and contents and of their place within the history of the Jewish book.[5] My own interest in these fragments began when, during a short visit to Cambridge to study some magical fragments, I noticed that one or two fragments had a row of tiny holes at their top or at their bottom. This surprised me, as I could not see why anyone would bother to pin-prick his or her magical texts in this manner, but a few days later I was checking some of the Genizah fragments in the Bodleian Library at Oxford and discovered a most unusual magic scroll (Bodleian MS Heb. a3.31), which is made up of four unequal pieces of parchment stitched together vertically and then inscribed horizontally. I then realized that the pin-pricked fragments I had seen in Cambridge had once been parts of such vertical rotuli, but the threads of the stitches that

---

[3] For a broad survey of the magical texts from the Cairo Genizah, and much further bibliography, see Gideon Bohak, *Ancient Jewish Magic: A History* (Cambridge: Cambridge University Press, 2008), pp. 215–221.

[4] For the place of rotuli in the history of the Jewish book, see the brief remarks of Malachi Beit-Arié, *Hebrew Manuscripts of East and West* [The Panizzi Lectures, 1992], (London: The British Library, 1993), pp. 10–11, and of Colette Sirat, *Hebrew Manuscripts of the Middle Ages* (ed. and tr. by N. de Lange) (Cambridge: Cambridge University Press, 2002), p. 102. For published Genizah rotuli see, for example, Neḥemiah Allony, "RASAG's Version of *Sefer Yezira* in Scroll Form from the Cairo Genizah," in I. Weinstock (ed.), *Temirin*, vol. 2 (Jerusalem: Kook, 1981), pp. 9–29 (Heb.); Nicholas de Lange, *Greek Jewish Texts from the Cairo Genizah*, [TSAJ 51] (Tübingen: J. C. B. Mohr (Paul Siebeck), 1996), No. 15 (pp. 165–294); Yosef Tobi, *Poetry, Judeo-Arabic Literature, and the Geniza*, [Jewish Culture in Muslim Lands and Cairo Geniza Studies, IV] (Tel Aviv University, 2006), pp. 51–55 (Heb.). See also n. 6 below.

[5] Judith Olszowy-Schlanger and I have recently begun to map out the Genizah rotuli, but the results of this survey will have to be published elsewhere.

once held them together had crumbled long ago, leaving only narrow sheets of parchment with stitching-holes at their tops, or bottoms, or both. I have since continued looking for such fragments, and gradually came to realize that in some cases the rotuli disintegrated to such a degree that not only the stitches disappeared, but even the stitched pieces of parchment broke into much smaller pieces, without any pin-prick holes to set them apart from other small parchment fragments. I therefore try to keep track not only of all the Genizah magical fragments I can find, but also of all the parchment rotuli and rotuli-fragments, even those which have nothing to do with magic. At present, I am aware of two rotuli with magical recipes and one astrological rotulus re-used for magical recipes, of possible fragments of other magical rotuli, and of many parchment rotuli and rotuli-fragments whose contents are non-magical.[6] The magical rotuli are as follows:

1) Bodleian MS Heb. a3.31: A vertical parchment scroll, 92 cm long and 12 cm wide, made up of four pieces sewn together, measuring (from top to bottom) 38.5, 22.5, 17.2 and 13.8 cm, respectively. The first piece is of darkish brown color, the second is even darker, the third is a much lighter yellowish brown, and the fourth is even lighter in color. The scroll's right margin is preserved throughout, but the left margin is fully preserved only for small parts of the lower sections of the scroll, while for the rest of the scroll it has been damaged (by fire?) in differing quantities. From the "wavy" pattern created by the missing parts when the scroll is stretched out, it seems clear that the scroll's left margin was damaged while it was all rolled up, from bottom to top, which also explains why the bottom part of the scroll is much better preserved than its topmost section. It must be stressed, however, that the scroll begins and ends *in medias res*, and there is no telling how long the original scroll was or how much is missing on

[6] For another magical fragment which may have come from a rotulus, see Westminster College Misc. 59, published as MTKG III, 74, with the editors' note on p. 179. In what follows, I focus only on parchment rotuli, whose pieces were stitched to each other, and ignore those cases in which loose pieces of paper—including used paper—were glued one below the other and used for writing different texts (including amulets and magical recipes), a phenomenon which seems to have occurred quite often, and not only in the earlier strata of the Cairo Genizah. For published paper rotuli see, for example, MTKG II, 24 (= Bodleian Heb. a3.25); MTKG III, 66 (= T-S AS 142.15 + NS 246.14).

either end.[7] Moreover, it is quite possible that more fragments of this scroll would be identified in the future, either in Oxford or in other Genizah collections.

On the recto, the 145 lines of text are written in a well-trained hand, entirely uniform throughout, and clearly belonging to the earliest stratum of the Cairo Genizah (the hand was dated by Judith Olszowy-Schlanger to the (early) tenth century).[8] The layout of the text also is remarkably uniform—each two recipes are separated by a few centimeters of blank space, many of the words in different recipes are deliberately written backward, abbreviations are marked by the same supralinear dots, and the abbreviation for "Name son of Name," appears both as the standard *p(eloni) b(en) p(elonit)* and as the hitherto unattested ŠWŠ, a sequence whose exact meaning still eludes me.[9] Even the magical recipes themselves display a remarkable degree of internal consistency, both in their aims and in the magical practices they enjoin. In light of all this, it is quite certain that the scroll was produced by a single copyist, who was quite an experienced scribe and quite a sophisticated magician. On the verso, the scroll is sporadically covered by different magical texts, in several different hands, all of which seem to be later, and much less professional, than that on the recto. It thus seems quite clear that the rotulus was originally written on one side only (a common procedure on such rotuli), but later users decided to utilize the blank side too, and added their own magical recipes on the verso.[10] This apparently means that the scroll remained in circulation and use over several generations of Jewish magicians.

---

[7] Note that one of the two rotuli published by de Lange is estimated by him to have been about 3 meters long (*Greek Jewish Texts*, p. 165).

[8] Both the hand and the style of writing closely resemble those of T-S Misc. 24.1 (see Neil Danzig, "Two Insights from a Ninth-Century Liturgical Handbook: The Origins of *Yequm Purqan* and *Qaddish de-Ḥadata*," in Stefan C. Reif (ed.), *The Cambridge Genizah Collections: Their Contents and Significance* (Cambridge: Cambridge University Press, 2002), pp. 74–122 and Plate 10), which was dated by Danzig to the final quarter of the ninth century.

[9] The most likely explanation seems to be that this is an abbreviation of שם ושם, "a name and a name" (i.e., the name of the victim and the name of his or her mother); as a partial parallel, one could adduce MS Sassoon 56 = NYPL 190, p. 117, ll.7–8: ונקמת את נקמתי מאת המקולל הארור האכזרי פלו׳ ש׳ בן פלוני׳ ש׳ וכו׳ ("And you shall exact my revenge from the accursed, the damned, the cruel *pel(oni)* Š *son of peloni(t)* Š, etc."). It has also been suggested to me that שוש is four letters removed from פבפ, but this might be a mere coincidence.

[10] For Genizah rotuli whose verso is blank, see the next item. For Genizah rotuli with different texts on both sides, clearly inscribed by different hands and in different

Looking at the recto of our rotulus, we find eighteen different recipes (including two of which only a few words are preserved), of which one is for gaining knowledge, one whose aim is not entirely clear (see recipe a in the next section), and all the rest are for aggressive purposes, and especially for "binding" the sexual potencies of male victims. Such uniformity of purpose is not unparalleled in some of the Greek magical papyri—I note, especially, PGM XXXVI, whose 19 recipes focus almost entirely on issues of interpersonal relations. These single-minded collections always make one wonder whether the practitioners behind them specialized in just one type of magical practices, or had their recipes arranged thematically, and only one of their collections (or a small part thereof) happened to be preserved. But be that as it may, the recipes found on the Bodleian rotulus are of the greatest interest: They are written in a mixture of Palestinian Jewish Aramaic and Hebrew, and contain virtually no Arabisms, a sure sign of their relative antiquity. They also display many Greek loanwords, including what seems like a whole Greek sentence in transliteration, as we shall see below. Moreover, some of the rituals enjoined by these recipes seem quite different, and often far more "daring," than those found in other Genizah magical texts, and this too might be a sign of their relative antiquity, as in the later recipe collections the potentially offensive features tended to be filtered out of the textual transmission.[11] Finally, the extant recipes contain a few apparent references to extra-biblical myths, which also are quite rare in the more typical Genizah magical recipe books. Below, we shall edit and analyze some of the recipes on the recto of this intriguing rotulus.

2) T-S K 1.120 + T-S NS 258.153–154 + T-S K 1.154: The largest fragment of this rotulus is T-S K 1.154, a vertical parchment scroll 31.2 cm long and 8.8 cm wide, which is made up of three pieces sewn together,

periods, see the rotulus edited by Tobi (above, n. 4). Some Genizah rotuli seem to have been written on both sides by their original scribes, including the two rotuli edited by de Lange (above, n. 4), and the one analyzed by Danzig (above, n. 8). Having seen numerous Genizah rotuli, my own impression is that most of them were written on the recto only, and that some retained a blank verso while in others the verso was re-used by later scribes, often for different types of texts than those on the recto.

[11] For such processes of self-censorship, see Bohak, *Ancient Jewish Magic*, pp. 183 and 344.

measuring (from top to bottom) 7.4, 13.5, and 10.5 cm, respectively.[12] All three pieces are of a yellowish-brown color, and all three have their right margin intact, but are damaged on their left margin. Moreover, a stain caused by water runs vertically through all three pieces, and is the likely cause of the damage to the left margin, and certainly caused the effacement of many letters on the scroll's left half. Like the Bodleian rotulus, this one too begins and ends *in medias res*, but in this case I can already point to three more fragments which clearly belong with the same rotulus. Two parchment fragments—T-S NS 258.153 and 154—are quite small, measuring 5.5 by 7 cm and 3.2 by 6.5 cm respectively, and neither fragment displays the telltale prick-holes characteristic of broken rotuli. But the fact that these parchment fragments are quite narrow, and inscribed on one side only, suggests that they may have come from such a rotulus (and not from a codex, in which both sides should be inscribed), and a comparison of the parchment and the handwriting with that of T-S K 1.154 demonstrates their great similarity. The identification is made secure by the pattern created by the stain which runs vertically through both fragments, and matches perfectly the stain running through the top part of T-S K 1.154, thus proving that all three fragments once belonged together, and that the damage caused by water preceded the disintegration of the original rotulus. Moreover, T-S K 1.120 (13.2 by 9.8 cm), which was published as MTKG III, 60 but not identified as forming part of a rotulus, displays the same hand and the same stain, and ends with the first half of Num 21.28, whose continuation may be found on T-S NS 258.153. Thus, it is entirely certain that all four fragments once belonged in a single rotulus, and the original order was (from top to bottom) T-S K 1.120, T-S NS 258.153, T-S NS 258.154 and T-S K 1.154. Throughout the reconstructed rotulus, the right margin is well preserved, but the left margin is preserved only at the top section (T-S K 1.120) and parts of the bottom one (T-S K 1.154). On all four fragments the verso is blank, which means that this rotulus was not re-used by later scribes, perhaps because it was damaged by water at a relatively early stage. It must be stressed, however, that the reconstructed rotulus still begins and ends *in medias res*, so there is no doubt that more pieces are still

[12] This fragment was briefly mentioned by Peter Schäfer, "New Magical Fragments from the Cairo Genizah," in *Proceedings of the Tenth World Congress of Jewish Studies*, Section C/1 (Jerusalem, 1990), pp. 245–252, on p. 248 (Heb.).

missing both at the top and at the bottom of this scroll. If and when more pieces are found, they may allow a more precise reconstruction of this rotulus and of its codicological history.

On the recto of the reconstructed scroll, 89 lines of text are written in a uniform hand, clearly later than that of the Bodleian rotulus (the hand was dated by Judith Olszowy-Schlanger to the (early) eleventh century).[13] The text is written in a mixture of Aramaic and Judeo-Arabic, and some of the recipes use many biblical verses, which are cited in Hebrew. As this rotulus is not well preserved, it is not entirely clear how many recipes were written in the extant section, but one can detect the remains of at least ten different recipes and—as in the Bodleian rotulus—all of them are aggressive in nature. But unlike the Bodleian rotulus, the recipes found here seem much less unusual, and involve many magical practices which are quite standard in Genizah magical recipes. And while some of these recipes display signs of an early origin (including the use of the title קיבלוה for aggressive recipes, for which see Dan Levene's paper in the present volume), others probably stem from the Genizah period itself, or are watered-down versions of older recipes. Thus they are of considerably less historical interest than those of the Bodleian rotulus.

3) T-S K 1.50 + T-S K 1.133: Unlike the two previous items, this rotulus was first inscribed not with magical recipes but with an astrological text, best known as the *Treatise of Shem* in its Judeo-Arabic version (and in a phonetic transliteration which is characteristic of the earlier Judeo-Arabic Genizah fragments).[14] T-S K 1.50 (6.9 cm long and 8.4 cm wide) preserves the section on Gemini, while T-S K 1.133 (25.1 by 8.8 cm) preserves the sections on Cancer, Leo, Virgo and Libra, so there is no doubt that the former once belonged directly above the latter, and that the original scroll was at least twice as long as these two fragments combined. The parchment is, once again, of a yellowish-brown color, and the margins of this rotulus are well preserved, but T-S K 1.50 is missing small pieces of both margins. The hand on the

[13] And note that T-S K 1.120 = MTKG III, 60 was dated by its editors to the tenth century.

[14] For the *Treatise of Shem*, see Reimund Leicht, *Astrologumena Judaica: Untersuchungen zur Geschichte der Astrologischen Literatur der Juden*, [Texts and Studies in Medieval and Early Modern Judaism, 21] (Tübingen: Mohr Siebeck, 2006), pp. 45–55 (who mentions both fragments on p. 46). For another rotulus with an astrological text see British Library 5557A 64, published by Tobi (above, n. 4).

recto was dated by Judith Olszowy-Schlanger to the late-tenth or early-eleventh century. Like the Bodleian rotulus, this rotulus too was re-used by a later scribe, whose hand may be dated to the later eleventh century, but this writer used the stitched up pieces of parchment not as a rotulus but as an horizontal scroll, on which magical recipes were written in columns, each some 6–7 cm wide. T-S K 1.50 preserves one full column of text and the end of another, while T-S K 1.133 preserves three columns of text and the beginning of a fourth one. Thus, the verso of both fragments presents the appearance of a parchment scroll—a very unusual occurrence in Genizah magical texts and in non-biblical Genizah fragments in general—but this is due solely to the re-use of an old rotulus.[15] And in this case, the magical recipes are both aggressive and apotropaic (including a recipe for making an amulet), are written mostly in Judeo-Arabic, and display clear signs of a Muslim influence (including a reference to the lost tribes of ʿAd and Thamud, mentioned in the Qurʾan). We may therefore conclude that both in format and in contents this scroll differs greatly from the two magical rotuli discussed above.

Select Recipes from Bodleian Heb. a3.31

These, then, are the Genizah magical rotuli currently known to me, and it is hoped that more fragments of these rotuli, and more Genizah magical rotuli, will be identified in the future. But as my own interests lie less in codicology and more in the magical texts themselves, the rest of the present paper will be devoted to a closer analysis of some of the magical recipes found on the recto of the Bodleian rotulus. Being one of the oldest Genizah magical texts identified thus far, and displaying a long set of magical recipes which are characterized by their purely Palestinian Jewish Aramaic idiom and many Greek loanwords, this collection offers an excellent point of entry into the world of Jewish magic in late-antique Palestine. And as it is devoted almost exclusively to aggressive magic, it allows us a closer look at a set of practices

[15] For non-biblical Genizah scrolls, which are quite rare, see T-S AS 74.324, published by Marc Bregman, "An Early Fragment of *Avot de Rabbi Natan* from a Scroll," *Tarbiz* 52 (1983): 201–222 (Heb.); T-S K 21.95.S, published by Peter Schäfer, *Geniza-Fragmente zur Hekhalot-Literatur* [TSAJ, 6] (Tübingen: Mohr, 1984), G1 (Hekhalot Rabbati).

which are not as well documented as the apotropaic and medicinal magical practices of late antique Jews.[16] To see this, we may focus on five different recipes, of varying length and sophistication, and analyze the magical technologies utilized in each of them. To facilitate future references to each recipe, I have included the line-numbers from my transcription of the entire rotulus; and in the transcription itself, I have used the following conventions:

() Uncertain reading of one or more letters.
= A letter which I could not read.
[ ] A lacuna in the text, and my reconstruction thereof.
א (bold type) Words which the scribe wrote "in reverse"—i.e., from left to right.[17]

a) The second (but first more or less complete) recipe on the recto of Bodleian Heb. a 3.31 is very short and quite obscure, but its great interest lies in its use of a whole Greek phrase, transliterated in Hebrew characters. The recipe itself runs as follows:

1 (סוף מרשם קודם) אין הווה[לך?
2 קופד אמור על קדרה אלין מלייא והדא [אמור?
3 תיאון פ(נ)יומה קטיגורוס (תחילת המרשם הבא)

1 (end of prev. recipe) (vac) If [you?] have
2 meat?, say over a pot these words and [say] this
3 TY'WN PN?YWMH QṬYGWRWS (vac) (beg. of next recipe)

Unfortunately, the aim of this short recipe—which is found at the very top of the rotulus, where much of the left margin was eaten away—is not very clear. If QWPD means "a piece of meat" (from the Greek

[16] For the dearth of aggressive magic in the Jewish literature of Late Antiquity, apart from *Sefer Ha-Razim*, see Philip S. Alexander, "*Sefer ha-Razim* and the Problem of Black Magic in Early Judaism," in Todd Klutz (ed.), *Magic in the Biblical World: From the Rod of Aaron to the Ring of Solomon* [JSNT Suppl. 245] (London: T&T Clark, 2003), pp. 170–190, whose conclusions will have to be revised in light of the Bodleian rotulus. See also Yuval Harari, "If You Wish to Kill A Man: Aggressive Magic and the Defense Against It in Ancient Jewish Magic," *Jewish Studies* 37 (1997): 111–142 (Heb.), and Dan Levene's paper in the present volume.

[17] For this magical practice, common especially in aggressive magic, see Joshua Trachtenberg, *Jewish Magic and Superstition: A Study in Folk Religion* (New York: Behrman's Jewish Book House, 1939) (repr. Philadelphia: University of Pennsylvania Press, 2004, with an Introduction by Moshe Idel), pp. 116, 126 and 129; Joseph Naveh, "Lamp Inscriptions and Inverted Writing," *IEJ* 38 (1988): 36–43.

kopadion), as in rabbinic literature, then we might have here a spell to be uttered over a pot with meat, to make it cook faster, and such recipes are well attested in ancient magical texts.[18] If, on the other hand, QWPD is derived from the Aramaic root QPD, "to be angry," then we might have another aggressive magical recipe (which would fit the nature of almost all the other recipes in this rotulus), with an aggressive spell uttered over a pot (full of water, which is then poured near the victim's home?). But be this as it may, the spell to be uttered is extremely interesting, for it consists of three Greek words, and may originally have consisted of four words, with one word now lost at the end of line 2. Of these Greek words, TY'WN is almost certainly Greek, *theos*, "god," either in the accusative singular (*theon*) or in the genitive plural (*theôn*).[19] The third word, QṬYGWRWS, certainly is the Greek *katêgoros*, which is quite common in rabbinic literature (but note how here it preserves the nominative ending, whereas in rabbinic literature it often loses it and becomes קטיגור), and means "accuser, prosecutor."[20] The second word, on the other hand, is less certain—it may be the Greek *phainomai*, "I appear, I come," but is more likely to be *pneuma*, "spirit." In the first case, the phrase might mean something like "I come as an opponent of the gods," whereas in the second case we might either assume a missing preposition at the end of line 2 and translate the whole sequence as "among the gods, the spirit is an accuser," or assume a missing noun (or nothing missing) and translate "(X,) a spirit of gods, an accuser."[21] But be this as it may, it seems quite clear that we are dealing here with a short, but complete, Greek sentence, which would be quite like the famous transliterated Greek prayer in *Sefer Ha-Razim*, or the shorter Greek dismissal for-

---

[18] For קופד, see Samuel Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch und Targum*, 2 vols. (Berlin, 1898–99) (repr. Hildesheim: Georg Olms, 1964), vol. 2, p. 516; Michael Sokoloff, *A Dictionary of Jewish Palestinian Aramaic of the Byzantine Period* (Bar-Ilan: Bar-Ilan University Press, 1990), 2nd ed., 2002, p. 483. For such magical practices, see Hippolytus, *Ref.* 4.33.2, and R. Ganschinietz, *Hippolytos' Capitel gegen die Magier (Refut. Haer. IV 28–42)* [Texte und Untersuchungen 39/2], (Leipzig: Hinrichs, 1913), p. 49, and note a similar practice attributed to Rav Naḥman's daughters in bt Gitt 45a.

[19] And note the sequence *theon ha-gadol amona* in MSF, A22, briefly discussed in Bohak, *Ancient Jewish Magic*, p. 257.

[20] See Krauss, *Lehnwörter*, p. 524; Sokoloff, *Palestinian Jewish Aramaic*, p. 485.

[21] A search for similar expressions in the *Thesaurus Linguae Graecae* CD-ROM (version E, which also includes the Greek Magical Papyri), came up with nothing that seemed relevant for the present context, although *pneuma theôn* indeed is attested, for example in Philostratus, *VAT* 7.34.

mula found in the same text, or the Greek formulae which are found (together with their Aramaic translations), in the "sword" section of the *Sword of Moses*.[22] In all these cases, the reconstruction of the original Greek sequences is hampered by the difficulty of reconstructing Greek formulae transliterated in an alphabet which was utterly unsuitable for this task. In the present instance, the difficulty is further exacerbated by the damaged state of our text and by the uncertainty about the nature of the recipe as a whole (although the presence of *katêgoros* certainly argues in favor of an aggressive context), which makes it less clear what kind of Greek phrase we might expect here. But in all these cases, the very presence of Greek sentences and phrases attests to the extensive Greek influences on the Jewish magical texts of Late Antiquity, including those written in Hebrew and in Aramaic.

b) The second recipe to be analyzed here, which is the fourth recipe on the recto of the Bodleian rotulus, involves an interesting example of a much debated issue in the study of late-antique Judaism, namely, the worship of angels, in this case on a *do ut des* basis, whereby the user of this recipe offers a specific angel various gifts, and explains what he or she would like to receive in return:

11 (סוף מרשם קודם) לח[
12 דאיבר וז' פרתותין וז' בולין דמלח וא(ד)[
13 ואמור עליהון ז'ב ז' לך אנה קרי פוסיס[
14 מלאכה רבה הכמה דאנה יהיב לך לחם מן[לחמי]
15 ומלח מן מלחי וממון מן ממוני כן תתן ל(ש')[ו'ש'
16 ריוי מן ריוך וכיוב מן כיובך ושיקוץ מן (ש)[יקוצך]
17 וניאוף מן ניאופך וניצוץ מן ניצוצך בשם [
18 כלקיטס ובשם סמאל סטנה רבה בפריע [
19 הדן בויכל (תחילת המרשם הבא)

11 (end of prev. recipe) (vac) For [. . . take . . .
12 of lead and 7 chunks[23] of bread and 7 lumps of salt and [
13 and say over them 7 times,[24] to you I call, PWSYS[

[22] For these, see M. Margalioth, *Sepher Ha-Razim: A Newly Recovered Book of Magic from the Talmudic Period* (Tel Aviv: Yediot Aharonot, 1966), pp. 12–13 (Heb.); Claudia Rohrbacher-Sticker, "From Sense to Nonsense, From Incantation Prayer to Magical Spell," *JSQ* 3 (1996): 24–46; Bohak, *Ancient Jewish Magic*, p. 179, n. 92.

[23] For פרתותין, see Syriac *prtwt'*, "broken bits of bread, crumbs, fragments," in R. and J. Payne Smith, *A Compendious Syriac Dictionary* (Oxford: Clarendon Press, 1903), p. 466.

[24] For זבנין, see Sokoloff, *Palestinian Jewish Aramaic*, p. 171.

14 the great angel, just as I give you bread from my [bread]
15 and salt from my salt and money from my money, so shall you give N[N
16 a dispute?[25] from your dispute? and a pain from your pain and an abomination from your ab[omination]
17 and a fornication from your fornication and a spark from your spark; in the name of [
18 KLQYṬS, and in the name of Samael the great satan, quickly [
19 this, for pain(?) (vac) (beg. of next recipe)

Unlike the first recipe we analyzed, here there are few problems of interpretation, in spite of the absence of a few letters at the end of each line.[26] Here the practitioner is instructed to take lead, bread and salt, all in groups of seven (a common typological number in such recipes), to offer these to an angel, and to ask that angel to dispense some of his special qualities in return and send his dispute, pain, abomination, fornication and spark upon the person's opponent. Such a ritual must be seen in the light of the recurrent claims in ancient Christian literature concerning the Jewish worship of angels, and the recurrent rabbinic condemnations of such practices, which also are attested in *Sepher Ha-Razim*.[27] In the present recipe, there is no doubt that the practitioner is appealing to a powerful evil angel, and is offering that angel monetary and alimentary offerings in return for his services. There also is no doubt that the angel is adjured by (the hitherto unattested KLQYṬS and by) "Samael the great satan," who certainly is seen here as supervising the powers of evil.[28] In their search for aggressive powers, some

---

[25] For ריו, see Sokoloff, *Palestinian Jewish Aramaic*, p. 523, for the meaning "appearance, form." Such a meaning is not impossible here, but a meaning influenced by the Hebrew ריב, "strife, contest, dispute," seems more likely. Another possibility would be that the original text read דיוי, or דוי, "sorrow."

[26] There are, however, some obscure points, such as the meaning of the last word of our recipe, "for pain." This might be a specification of the recipe's aim, "for (causing) pain," and placing a recipe's aim at the very end is paralleled both in this rotulus (in line 64), and in other Genizah magical texts. But in such a case, what should we make of the word]לח with which the recipe opens, and which seems to state its aim, "For X"?

[27] See Margalioth, *Sepher Ha-Razim*, pp. 10–16; Michel-Yves Perrin, "'Rendre un culte aux anges à la manière des Juifs': Quelques observations nouvelles d'ordre historiographique et historique," *Mélanges de l'École Française de Rome: Moyen Âge* 114 (2002): 669–700.

[28] For Samael, see Gershom Scholem, *Kabbalah* (Jerusalem: Keter, 1974), pp. 385–388; Günter Stemberger, "Samael und Uzza: Zur Rolle der Dämonen im späten Midrasch," in Armin Lange, Hermann Lichtenberger and K. F. Diethard Römheld (eds.), *Die Dämonen—Demons: Die Dämonologie der israelitisch-jüdischen und frühchristlichen*

Jewish magicians clearly were willing to cross the line separating the worship of the One True God from angelolatry, and even from the worship of the powers of darkness. This does not necessarily mean that our recipes assume a dualistic theology, with Samael as God's opponent, but it does imply that they assume that it is to Samael and his ilk that one should turn when one seeks to harm a fellow human being.

c) Another interesting recipe in the Bodleian rotulus (the eleventh in the extant portion) makes use of a myth which seems to be unattested elsewhere, at least in Jewish sources. This recipe runs as follows:

64 (סוף מרשם קודם) אסר לרוחה [
65 ואסר אנה ל'ש'ו'ש' כמה דאסירין [
66 לעלם כן אסיר פ' לעלם וחתים לדרי[דרין? ו...לא
67 יהווי לה מן ברנש בשם אפס פפא נ(ט)[
68 עולמים ובשמה דקטריאל מלאכה דנ(ח)[ת ל...
69 ענה ולבקרת תורייה ואסר תורין דכרין [
70 כן אסור זרעה ד'ש'ו'ש' וסילוניה דלא ימר[...ו...
71 דלא תהלך עד זמן דנבעי ונשרי יתה בש[ם
72 פצציאל ובשם חצציאל ובשם קטריאל מלא[כה
73 כן אסור לעלם וחתום לדרי דרין וסב מחט דפרזל
74 ואמור עליה זמ' ז' ובזמנה שביעייה הב ראשה
75 דמחטה בעוקצה וכרכה בכתן דלא עלת ל(א)[
76 וטמור בזווי צניעה שרייה אפק מחט[ה לשימשה?
77 ואשווי מחטה (תחילת המרשם הבא)

64 (end of prev. recipe) (vac). A binding for a spirit [
65 and I bind ŠWŠ just as [ ] are bound [
66 forever, so is N bound forever and sealed for all gene[rations?
67 shall have from no one. In the name of 'PS PP' NṬ[
68 forever, and in the name of Qaṭriel the angel who came do[wn for
69 small cattle and for the herding of bulls, and he bound male bulls [
70 so shall you bind the sperm of ŠWŠ and his sperm canal,[29] that it / he shall not [
71 that she / it shall not walk until the time that we shall ask (for it) and loosen him, in the na[me of
72 Paẓaẓiel and in the name of Ḥaẓaẓiel and in the name of Qaṭriel the ang[el
73 so bind forever and seal for all generations. And take an iron needle

Literatur im Kontext ihrer Umwelt. The Demonology of Israelite-Jewish and Early Christian Literature in Context of their Environment (Tübingen: Mohr Siebeck, 2003), pp. 636–661.

[29] For סילון (Greek *sôlên*, "tube") used for the sperm canal of the male organ, see Krauss, *Lehnwörter*, p. 383.

74 and say (it) over it 7 times, and in the seventh time put the head
75 of the needle in its tip (sic) and wrap it in linen that did not go into [
76 and bury (it) in a hidden place. (Its) loosening:[30] Take the needle out [to the sun?
77 and straighten the needle out. (vac) (beg. of next recipe)

Like several other recipes in the Bodleian rotulus, this one too seeks to "bind" the male organ of its victim, a common magical practice in Late Antiquity, and one that also was known to, and discussed by, the rabbis of late-antique Palestine.[31] It does this by way of an adjuration, accompanied by an interesting *historiola* (a mythical event used as a precedent or an analogy for the desired outcome of the magical procedure) and an intriguing ritual whose symbolic meaning is quite manifest. On the ritualistic-symbolical level, we see the practice (attested in other cultures as well) of "binding" a male victim by twisting a needle (whose phallic connotations are quite obvious) and turning it into a closed circle, with its tip inside its own eye (and thus unable to penetrate any other object).[32] In this recipe, as in several other recipes in this rotulus and in other Genizah recipe books, and in the *Sword of Moses* as well, we also find instructions on how to loosen this piece of aggressive witchcraft once it is no longer deemed necessary—in this case, by taking the needle out of the dark spot in which it was buried and straightening it up, in the assumption that the same would now happen to the victim's virile organ. On the mythical side, we have here a reference to the angel Qaṭriel (whose name is derived from the Aramaic root קטר, "to bind" + the standard ending -el, and who appears quite frequently in ancient Jewish magical texts), who came down from heaven to herd small cattle and bulls and "bound" (i.e., castrated?) the male bulls (a well known symbol of virility in many cultures, ancient and modern); just as this had happened *in illo tempore*, so shall the hapless victim be "bound" and rendered impotent as the practitioner wishes. The use of such *historiolae* is extremely common in ancient and medieval magical texts, including the Jewish ones, but whereas most Genizah magical recipes utilize well worn biblical stories as precedents—and especially the story of Sodom and Gomorrah, to

[30] For שרייה, see the use of שריא, and שריא דגברא in MTKG III, 61 (= T-S K 1.162), 1c/25–1d/4.

[31] For the "binding" of bridegrooms, see Bohak, *Ancient Jewish Magic*, p. 396.

[32] For a possible medieval Latin parallel, see Catherine Rider, *Magic and Impotence in the Middle Ages* (Oxford: Oxford University Press, 2006), p. 145.

which we shall return below—the composer of this recipe made use of a non-biblical, and perhaps even non-Jewish, myth.[33] Further research might shed more light on the possible origins of this myth, which does not seem to be an ad hoc invention but a casual reference to a myth which was circulating in the magician's own world.

d) The last two recipes in the extant part of our rotulus, and therefore also the best preserved, are also the most interesting. The first of these is described as intended to make peace between a man and a woman, but in fact is an aggressive / erotic magical recipe, involving the adjuration and slaughtering of a white cock:

117 (סוף מרשם קודם) למרמי שלם [בין]
118 גבר לבין איתה בס כל לוגנרת רווח עבשאו (יול)[ע?
119 דע אוהד נייחב רומאו אנה פ'ב'פ' משבענה
120 לך תרנגלה בשמה דמלכה עלייא דיתיב על
121 כורסייה דדינה: המך תאד שיבך ינבל השנא
122 הריעבלו נך שבכתי ש'ו'ש' במאתין מ'ח' אברין
123 דאית בה ונעמתה תהווי מכיכה קודם פ'ב'פ'
124 בשמה דכבשיאל דכבש ארעה בחיי(ל)ה ותהומ(ה)
125 בתוקפיה מלין אמרית עובדין יתעבדון וכ(ל)[אשר?
126 דיברתי יצליח: בסו נולטיף דכסיט וכת' א[לין מלייה
127 בגווה: בסו דדוג נם יונאם הרבנד [בהו היתי
128 הלטיפב עוזבו הלגנרת הבו (!) הבתך הוינ[ב בהו
129 (ה)פושן דפיל לגו מעוי וכוף ראשה: הלגנר(ת)[ד]
130 יועמל רומטו תשרפב התחרוא (ו)[הב?] עלוי כיף
131 דלא יפק יתה חיווה ואשבע עלוי אלין מלייה

117 (end of prev. recipe) (vac) To make peace [between?
118 a man and a woman, take a white cock and adjure over it
119 while it is still alive and say, I, NN, adjure
120 you, cock, in the name of the exulted king who sits upon
121 the throne of judgment. Just as you are subdued by men
122 and by cattle, so shall ŠWŠ be subdued by the two hundred 48 limbs

[33] By way of comparison, I note Mousaieff bowl M163 (edited by Dan Levene, *A Corpus of Magic Bowls: Incantation Texts in Jewish Aramaic from Late Antiquity* [The Kegan Paul Library of Jewish Studies] (London: Kegan Paul, 2003), p. 123): והיכדין דאיתכביש רימון תורא קדמאה, "…and just as RYMWN, the primordial bull, was subdued." I also note the traditions about the eschatological punishment of the Sun and the Moon "like castrated bulls," as cited and discussed by David J. Halperin and Gordon D. Newby, "Two Castrated Bulls: A Study in the Haggadah of Kaʿb al Aḥbâr," *JAOS* 102 (1982): 631–638. One may also go further afield, and cite the stories about Hercules and the bull or the Mithraic motif of the scorpion attacking the bull's genitals, but such parallels do not seem to elucidate our recipe.

123 that are in her, and her tune?[34] shall be humbled before NN
124 in the name of Kabshiel who subdued the earth by his strength and the abyss
125 by his might. Words have I spoken, deeds shall be done, and all [that?
126 I have spoken shall succeed. And take a tin lamella,[35] and write th[ese words
127 upon it. And take a thread from the clothes of the man [and place it
128 in the lamella and tear the cock apart and place the writing inside it [and place
129 fine flour[36] of ??? inside its intestines and twist the head of the cock
130 to its intestines and bury it at a crossroads. And [place?] upon it a rock
131 so that no animal shall dig it out, and adjure upon it these words.

Once again, we are faced with an aggressive magical recipe, this time intended to subdue a person and make him amorously or sexually submissive to another person of the opposite sex; and once again, the recipe involves both a ritual and an adjuration. On the ritual level, the user is instructed to take a white cock, utter an adjuration over it, tear it apart, and place inside its intestines a tin lamella with the adjuration, a thread from the victim's clothes (what James Frazer would call "magic of contagion"), and fine flour. The cock is then twisted into a kind of a knot (an action which certainly is intended as analogous to what would happen to the victim should s/he fail to comply), and buried at the crossroads, a common location for the practice of magic rituals in many ancient cultures, and perhaps also symbolizing here the desired meeting of the man and the woman.[37] The use of white cocks in aggressive magical recipes seems to have been quite common, and one may cite parallels from other Genizah magical texts, from *Sepher Ha-Razim* (for which see Ithamar Gruenwald's paper in the present

[34] For נעמה, see Sokoloff, *Palestinian Jewish Aramaic*, p. 354.

[35] For פיטלון, see Bohak, *Ancient Jewish Magic*, p. 374, n. 64; for כסיט = כסיטרון = Greek *kassiteros*, see Krauss, *Lehnwörter*, p. 556 (where the word is consistently spelled with a *qof*, not a *kaf*).

[36] For נשופה, see Jonas C. Greenfield, Michael E. Stone and Ester Eshel, *The Aramaic Levi Document: Edition, Translation, Commentary* [Studia in Veteris Testamenti Pseudepigrapha, 19] (Leiden: Brill, 2004), p. 82 (= ALD 8:6): נישפא בליל במשחא, "fine meal (Gr. *semidalin*) mixed with oil," with the editors' note on p. 176 (I am grateful to Matthew Morgenstern for this reference); I am still puzzled by the word פיל, but cf. Sokoloff, *Palestinian Jewish Aramaic*, p. 431. Note also the appearance of פילון as an ingredient in several Jewish magical texts, including Bodleian Heb. a 2.2.

[37] For Greco-Roman examples, see S. I. Johnston, "Crossroads," *ZPE* 88 (1991): 217–224, esp. 223–224; for rabbinic examples, see bt Yoma 84a; Pess 111a.

volume), from the Babylonian incantation bowls, and even from the Babylonian Talmud.[38] Most intriguing is the almost exact parallel in the *Sword of Moses*, in a recipe for sending dreams upon someone, which involves placing an inscribed silver lamella in the mouth of a cock, slaughtering it, twisting its body so that its mouth will be between its thighs and burying it at the foot of a wall.[39] But with such parallels in mind it is also interesting to note the practical mindset displayed by the author of our recipe, who is worried lest the smelly carcass might be dug out and eaten by some animal, thus dissolving the spell (or, at least, exposing it for all to see, and perhaps compromising both the client and the magician), and therefore instructs the user to place a rock over the burial place of the mutilated rooster. On the mythical level, we find in the adjuration itself a reference to "Kabshiel who subdued the earth by his strength and the abyss by his might." This angel, whose name is derived from the root כבש, "to subdue" + the standard ending -el, was extremely popular in ancient Jewish aggressive magic, and even the entire formula found here is closely paralleled in other Genizah magical texts and clearly was quite common in late antique Jewish magical texts.[40] Embedded in the adjuration we also find an interesting expression, "Words have I spoken, deeds shall be done, and all [that?] I have spoken shall succeed," which provides an interesting summary of the magician's mindset and which—judging

[38] See, for example, Bodleian MS Heb. a2.2; *Sepher Ha-Razim* I/160–169 (pp. 75–76 Margalioth); Levene, *A Corpus*, M163, p. 122: תחות הנא תרנולא חיורא דמזמ[ן ל]יך (“under this white cock that is appoin[ted on your beh]alf”); bt AZ 4a–b // Ber 7a // San 105b, with Gideon Bohak, “Magical Means for Dealing with *Minim* in Rabbinic Literature,” in Peter J. Tomson and Doris Lambers-Petry (eds.), *The Image of the Judaeo-Christians in Ancient Jewish and Christian Literature* (Tübingen: Mohr Siebeck, 2003), pp. 267–279.

[39] See Yuval Harari, *Harba de-Moshe (The Sword of Moses): A New Edition and a Study* (Jerusalem: Academon, 1997), p. 42: ואחית בפום תרנגלא ושחוט יתיה…ואהדר פיו ואחית ביני ירכתיה, וקבר בעקבא דשורא (“and place (the lamella) in the mouth of a cock and slaughter it…and turn back its mouth and place it between its thighs, and bury (it) at the foot of a wall”). For such sacrificial acts in late-antique Jewish magic see also Michael D. Swartz, “Sacrificial Themes in Jewish Magic,” in Paul Mirecki and Marvin Meyer (eds.), *Magic and Ritual in the Ancient World*, [Religions in the Graeco-Roman World 141] (Leiden: Brill, 2002), pp. 303–315.

[40] And cf. MTKG II, 45 (= T-S K 1.26), 1b/7–8: כבשיאל דכבש ארעה קודם שמייה וכביש [תהו?]ם [ ] ובתוקפה (“Kabshiel, who subdued the earth under heaven and subdued (the) [abys]s, [by] and by his power”). The formula is echoed in Levene, *A Corpus*, M163, p. 124: ובשמיה דאישו דכבש רומא ועומקא בזקיפה (“And in the name of Jesus, who subdued the height and the depth by his cross”).

from the shift from Aramaic to Hebrew in mid-sentence—might be based on some very old Jewish magical formula.

e) The last recipe on our rotulus is in many ways the most interesting of them all. It is yet another aggressive recipe, and involves some exotic ingredients and a well known *historiola*, but this time with a special twist:

132 אשקיו לרוחה בדיקה סב מיין
133 חטיפין פראהורון מן מבוע ומי של(ק)ה ד(חט)י[א]
134 ומי טלופחין שלוקן ועקר צברה ותונין דח(מ)[ר
135 ותונין דתורה אכומה ותונין מן דידך ואמו[ר
136 עליהון זמ' ז' אתון הנון דינאמיס דאלהא רב[ה
137 אתון הנון רוחתה דעלמה דהפך אלהא ב[ ] סדום
138 ועמורה אדמה וצבויים כן תהפכון ותע[ק]רון
139 ותגלון לש'ו'ש' נם התיב נמו הרתא וכל ר[וחי]ן
140 ושדין וכל מזיקין דעבידין על סרחונה וע(ל)[
141 ועל ערבובה ייתון על פ'ב'פ' ויצערון יתיה וי[
142 יתה ויגלון יתה מן בייתה בשמה דנוריאל והפ[כיאל?
143 סור(י)אל אלין ד(מ)שמשין מלאך מותה ׳ צ(י)ברו מד[וק?]
144 [ה]תייב (תחילת המרשם הבא)

132 (vac) A watering for a spirit. Tested?, take fast-flowing?[41] water
133 PR'HWRWN[42] from a spring, and water of cooked wh[eat?]
134 and water of boiled lentils and the root of aloe[43] and the urine[44] of a don[key
135 and the urine of a black bull and your own urine, and sa[y
136 over them 7 times, You are the power of the great God,
137 you are the spirit of the world [by which?] God has overturned Sodom
138 and Gomorrah Adama and Zeboim, so shall you overturn and uproot
139 and exile ŠWŠ from his house and from his place and all the sp[irits
140 and demons and harmers who are in charge of sin and of [
141 and of turbulence shall come upon NN and shall cause him grief and […
142 him and exile him from his home, in the name of Nuriel and Hap[khiel?

[41] I am not sure what מיין חטיפין really means, but the instruction to use מים חטופים appears in other Jewish magical texts as well, including, for example, the *Shimmush Tehillim* instructions in MTKG III, 81 (= T-S NS 216.23) 1a/12 (and see the editors' note on p. 322); T-S NS 322.95, and several different recipes in MS Sassoon 56 = NYPL 190.

[42] פראהורון clearly is a Greek word, but I am not yet sure which one, and the transliteration may be somewhat faulty.

[43] For צברה, see Syriac *ṣbr'*, "the aloe," in Payne Smith, *Syriac Dictionary*, p. 473.

[44] For תונין, see Syriac *twn'*, "urine," in Payne Smith, *Syriac Dictionary*, p. 608.

143 Suri'el, those who serve the angel of death. And sprinkle bef[ore
144 his home. (vac) (beg. of next recipe)

As in the previous examples, this aggressive magical recipe—intended to harm a person and exile him or her from their home—involves both a ritual and a mythical component. On the ritual side, a smelly concoction is prepared from six liquids and a root (the inclusion of which may be due in part to the similarity between "root" (עקר) and "uproot" (here תעקרון), and perhaps also to the similarity between צברה, "aloe, " and רבץ, "to sprinkle"), and once the adjuration is uttered over it, it is sprinkled in front of the house of the intended victim. On the mythical side, we get an elaborate oral adjuration in which the unsavory concoction is equated with the *dynamis* of the great God, and with the spirit of the world by/with which God rained sulfur on Sodom, Gomorrah, Adama and Zeboim and brought about their utter destruction (see Genesis 19). In a similar manner, the magician insists, shall the liquids manipulated here overturn and uproot and exile the victim from his or her home. And as if this was not enough, the spell adds the wish that all kinds of harmful spirits would descend upon the victim and harm him and exile him from his house, and all this in the name of Nuriel (whose name is made of "fire" + -el ending) and probably Hapkhiel (whose name is derived from the root HPK, "to overturn" + -el ending), who are here identified as part of the entourage of the angel of death. The use of Sodom and Gomorrah as a *historiola* in Jewish magical recipes—in Hebrew, Aramaic and Greek, and later in Judeo-Arabic as well—is extremely common in Jewish magical texts, as is the identification of a substance used by the magician with substances used *in illo tempore* to destroy the troublesome cities.[45] Similarly, the appeal to the powers of evil should no longer surprise us, as we have found it in other recipes on this rotulus. But the use of the urine of several animals, and of the magician's own urine, is—as far as I know—quite unattested in the Jewish magical tradition, and proves once again the relatively "daring" nature of the recipes found in the Bodleian rotulus. Finally, the sprinkling of the "adjured" substance in front of the victim's home, yet another example of "contagious magic," is well attested in other sources too; whether

[45] For a fuller discussion of this point, see Bohak, *Ancient Jewish Magic*, pp. 312–314.

the stench would have made the victim leave his or her home is quite doubtful, but I suspect it could have made them aware that some foul act was being perpetrated against them.

Summary

To sum up: While rotuli and rotuli fragments are relatively rare in the Cairo Genizah, and magical rotuli extremely rare, those magical rotuli which happened to survive turn out to be of great historical importance. This is especially true of Bodleian Heb. a3.31, which is one of the oldest available Genizah magical texts, is entirely based on much earlier Palestinian Jewish recipes which seem to have been neither "updated" nor censored in any significant manner, and provides important evidence on the aggressive magical practices of the Jews of late-antique Palestine and early medieval Cairo. The significance of this evidence may be highlighted by noting that among many hundreds of Genizah magical texts transcribed within the framework of my research project, not a single one provided as many early Jewish magical recipes in such a good state of preservation and with such a high concentration of very "daring" aggressive magical recipes. Moreover, my search for parallels for the recipes contained in this rotulus did not come up with much, neither inside the Genizah nor outside it, which seems to imply that most of these magical recipes were not re-copied by later Jewish practitioners (perhaps because they were deemed too offensive in their blatant transgressions of some biblical and rabbinic injunctions and in their frequent appeals to the forces of darkness), and would have been utterly lost were it not for the chance preservation of this rotulus. In the future, more fragments of the above-listed rotuli, and of other magical rotuli, might be identified, and further enhance our knowledge of an important stage in the textual transmission of the Jewish magical tradition from Late Antiquity to the early Middle Ages.

THE MAGICAL ROTULI FROM THE CAIRO GENIZAH

Gideon Bohak

Introduction

In spite of much progress in recent decades, the magical texts found in the Cairo Genizah have yet to receive the attention they deserve.[1] In the present paper, I shall focus on a previously unnoted type of Genizah magical fragments—namely those written on vertical parchment scrolls (*rotuli*).[2] Such scrolls are extremely interesting not only because of their format, but because of their contents as well, and especially the aggressive magical recipes they contain, some of which clearly stem from late-antique Palestine. But as these fragments are quite long, and the task of reconstructing them is in no way finished, no attempt will be made here to offer a full edition of any single rotulus; instead, I shall limit myself to a description of their codicological and scribal features, a brief analysis of their contents, and a selective edition of some of their magical recipes. In the future, I hope to provide a full edition of

[1] The present paper forms a part of a wider research project on the magical texts from the Cairo Genizah, which is based on a preliminary list of Genizah magical fragments compiled by Professor Shaul Shaked, and is funded by the Israel Science Foundation (Grant no. 725/03). I am grateful to my research assistants—Shani Levy, Karina Shalem and Irena Lerman—and to Ortal-Paz Saar, for their assistance throughout this research project. The final version of the present paper was written during my year-long stay in Cambridge, partly funded by the Genizah Unit of the Cambridge University Library (for which I am especially grateful to Stefan Reif and Ben Outhwaite, the former and current heads of the Unit), and by the Friedberg Genizah Project. I am also grateful to Judith Olszowy-Schlanger for her illuminating codicological and paleographical advice.

[2] For previous publications of Genizah magical texts, see especially Joseph Naveh and Shaul Shaked, *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1985) (henceforth AMB); id., *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1993) (henceforth MSF); L. H. Schiffman and M. D. Swartz, *Hebrew and Aramaic Incantation Texts from the Cairo Genizah: Selected Texts from Taylor-Schechter Box K1*, [Semitic Texts and Studies 1] (Sheffield: Sheffield Academic Press, 1992) (henceforth HAITCG); Peter Schäfer and Shaul Shaked, *Magische Texte aus der Kairoer Geniza*, [Texte und Studien zum Antiken Judentum 42, 64, 72] (Tübingen: J. C. B. Mohr (Paul Siebeck)), vol. 1 (1994), vol. 2 (1997), vol. 3 (1999), vol. 4 (forthcoming) (henceforth MTKG).

these fragments, as of many other Genizah magical recipes and recipe-collections which deserve a more detailed analysis.[3]

The Magical Rotuli—A Broad Survey

The presence of rotuli—that is, vertical scrolls made of relatively narrow pieces of parchment sewn together one below the other—in the Cairo Genizah has occasionally been noted, and a few such rotuli have already been published.[4] However, the number of unpublished Genizah rotuli known to me already amounts to many dozens, and as these fragments seem to belong to the earlier strata of the Cairo Genizah, and some of them clearly were in use even before Genizah times, they certainly deserve a close codicological analysis of their different forms and contents and of their place within the history of the Jewish book.[5] My own interest in these fragments began when, during a short visit to Cambridge to study some magical fragments, I noticed that one or two fragments had a row of tiny holes at their top or at their bottom. This surprised me, as I could not see why anyone would bother to pin-prick his or her magical texts in this manner, but a few days later I was checking some of the Genizah fragments in the Bodleian Library at Oxford and discovered a most unusual magic scroll (Bodleian MS Heb. a3.31), which is made up of four unequal pieces of parchment stitched together vertically and then inscribed horizontally. I then realized that the pin-pricked fragments I had seen in Cambridge had once been parts of such vertical rotuli, but the threads of the stitches that

[3] For a broad survey of the magical texts from the Cairo Genizah, and much further bibliography, see Gideon Bohak, *Ancient Jewish Magic: A History* (Cambridge: Cambridge University Press, 2008), pp. 215–221.

[4] For the place of rotuli in the history of the Jewish book, see the brief remarks of Malachi Beit-Arié, *Hebrew Manuscripts of East and West* [The Panizzi Lectures, 1992], (London: The British Library, 1993), pp. 10–11, and of Colette Sirat, *Hebrew Manuscripts of the Middle Ages* (ed. and tr. by N. de Lange) (Cambridge: Cambridge University Press, 2002), p. 102. For published Genizah rotuli see, for example, Neḥemiah Allony, "RASAG's Version of *Sefer Yezira* in Scroll Form from the Cairo Genizah," in I. Weinstock (ed.), *Temirin*, vol. 2 (Jerusalem: Kook, 1981), pp. 9–29 (Heb.); Nicholas de Lange, *Greek Jewish Texts from the Cairo Genizah*, [TSAJ 51] (Tübingen: J. C. B. Mohr (Paul Siebeck), 1996), No. 15 (pp. 165–294); Yosef Tobi, *Poetry, Judeo-Arabic Literature, and the Geniza*, [Jewish Culture in Muslim Lands and Cairo Geniza Studies, IV] (Tel Aviv University, 2006), pp. 51–55 (Heb.). See also n. 6 below.

[5] Judith Olszowy-Schlanger and I have recently begun to map out the Genizah rotuli, but the results of this survey will have to be published elsewhere.

once held them together had crumbled long ago, leaving only narrow sheets of parchment with stitching-holes at their tops, or bottoms, or both. I have since continued looking for such fragments, and gradually came to realize that in some cases the rotuli disintegrated to such a degree that not only the stitches disappeared, but even the stitched pieces of parchment broke into much smaller pieces, without any pin-prick holes to set them apart from other small parchment fragments. I therefore try to keep track not only of all the Genizah magical fragments I can find, but also of all the parchment rotuli and rotuli-fragments, even those which have nothing to do with magic. At present, I am aware of two rotuli with magical recipes and one astrological rotulus re-used for magical recipes, of possible fragments of other magical rotuli, and of many parchment rotuli and rotuli-fragments whose contents are non-magical.[6] The magical rotuli are as follows:

1) Bodleian MS Heb. a3.31: A vertical parchment scroll, 92 cm long and 12 cm wide, made up of four pieces sewn together, measuring (from top to bottom) 38.5, 22.5, 17.2 and 13.8 cm, respectively. The first piece is of darkish brown color, the second is even darker, the third is a much lighter yellowish brown, and the fourth is even lighter in color. The scroll's right margin is preserved throughout, but the left margin is fully preserved only for small parts of the lower sections of the scroll, while for the rest of the scroll it has been damaged (by fire?) in differing quantities. From the "wavy" pattern created by the missing parts when the scroll is stretched out, it seems clear that the scroll's left margin was damaged while it was all rolled up, from bottom to top, which also explains why the bottom part of the scroll is much better preserved than its topmost section. It must be stressed, however, that the scroll begins and ends *in medias res*, and there is no telling how long the original scroll was or how much is missing on

[6] For another magical fragment which may have come from a rotulus, see Westminster College Misc. 59, published as MTKG III, 74, with the editors' note on p. 179. In what follows, I focus only on parchment rotuli, whose pieces were stitched to each other, and ignore those cases in which loose pieces of paper—including used paper—were glued one below the other and used for writing different texts (including amulets and magical recipes), a phenomenon which seems to have occurred quite often, and not only in the earlier strata of the Cairo Genizah. For published paper rotuli see, for example, MTKG II, 24 (= Bodleian Heb. a3.25); MTKG III, 66 (= T-S AS 142.15 + NS 246.14).

either end.[7] Moreover, it is quite possible that more fragments of this scroll would be identified in the future, either in Oxford or in other Genizah collections.

On the recto, the 145 lines of text are written in a well-trained hand, entirely uniform throughout, and clearly belonging to the earliest stratum of the Cairo Genizah (the hand was dated by Judith Olszowy-Schlanger to the (early) tenth century).[8] The layout of the text also is remarkably uniform—each two recipes are separated by a few centimeters of blank space, many of the words in different recipes are deliberately written backward, abbreviations are marked by the same supralinear dots, and the abbreviation for "Name son of Name," appears both as the standard *p(eloni) b(en) p(elonit)* and as the hitherto unattested ŠWŠ, a sequence whose exact meaning still eludes me.[9] Even the magical recipes themselves display a remarkable degree of internal consistency, both in their aims and in the magical practices they enjoin. In light of all this, it is quite certain that the scroll was produced by a single copyist, who was quite an experienced scribe and quite a sophisticated magician. On the verso, the scroll is sporadically covered by different magical texts, in several different hands, all of which seem to be later, and much less professional, than that on the recto. It thus seems quite clear that the rotulus was originally written on one side only (a common procedure on such rotuli), but later users decided to utilize the blank side too, and added their own magical recipes on the verso.[10] This apparently means that the scroll remained in circulation and use over several generations of Jewish magicians.

---

[7] Note that one of the two rotuli published by de Lange is estimated by him to have been about 3 meters long (*Greek Jewish Texts*, p. 165).

[8] Both the hand and the style of writing closely resemble those of T-S Misc. 24.1 (see Neil Danzig, "Two Insights from a Ninth-Century Liturgical Handbook: The Origins of *Yequm Purqan* and *Qaddish de-Ḥadata*," in Stefan C. Reif (ed.), *The Cambridge Genizah Collections: Their Contents and Significance* (Cambridge: Cambridge University Press, 2002), pp. 74–122 and Plate 10), which was dated by Danzig to the final quarter of the ninth century.

[9] The most likely explanation seems to be that this is an abbreviation of שם ושם, "a name and a name" (i.e., the name of the victim and the name of his or her mother); as a partial parallel, one could adduce MS Sassoon 56 = NYPL 190, p. 117, ll.7–8: ונקמת את נקמתי מאת המקולל הארור האכזרי פלו׳ ש׳ בן פלוני׳ ש׳ וכו׳ ("And you shall exact my revenge from the accursed, the damned, the cruel *pel(oni)* Š *son of peloni(t)* Š, etc."). It has also been suggested to me that שוש is four letters removed from פבפ, but this might be a mere coincidence.

[10] For Genizah rotuli whose verso is blank, see the next item. For Genizah rotuli with different texts on both sides, clearly inscribed by different hands and in different

Looking at the recto of our rotulus, we find eighteen different recipes (including two of which only a few words are preserved), of which one is for gaining knowledge, one whose aim is not entirely clear (see recipe a in the next section), and all the rest are for aggressive purposes, and especially for "binding" the sexual potencies of male victims. Such uniformity of purpose is not unparalleled in some of the Greek magical papyri—I note, especially, PGM XXXVI, whose 19 recipes focus almost entirely on issues of interpersonal relations. These single-minded collections always make one wonder whether the practitioners behind them specialized in just one type of magical practices, or had their recipes arranged thematically, and only one of their collections (or a small part thereof) happened to be preserved. But be that as it may, the recipes found on the Bodleian rotulus are of the greatest interest: They are written in a mixture of Palestinian Jewish Aramaic and Hebrew, and contain virtually no Arabisms, a sure sign of their relative antiquity. They also display many Greek loanwords, including what seems like a whole Greek sentence in transliteration, as we shall see below. Moreover, some of the rituals enjoined by these recipes seem quite different, and often far more "daring," than those found in other Genizah magical texts, and this too might be a sign of their relative antiquity, as in the later recipe collections the potentially offensive features tended to be filtered out of the textual transmission.[11] Finally, the extant recipes contain a few apparent references to extra-biblical myths, which also are quite rare in the more typical Genizah magical recipe books. Below, we shall edit and analyze some of the recipes on the recto of this intriguing rotulus.

2) T-S K 1.120 + T-S NS 258.153–154 + T-S K 1.154: The largest fragment of this rotulus is T-S K 1.154, a vertical parchment scroll 31.2 cm long and 8.8 cm wide, which is made up of three pieces sewn together,

periods, see the rotulus edited by Tobi (above, n. 4). Some Genizah rotuli seem to have been written on both sides by their original scribes, including the two rotuli edited by de Lange (above, n. 4), and the one analyzed by Danzig (above, n. 8). Having seen numerous Genizah rotuli, my own impression is that most of them were written on the recto only, and that some retained a blank verso while in others the verso was re-used by later scribes, often for different types of texts than those on the recto.

[11] For such processes of self-censorship, see Bohak, *Ancient Jewish Magic*, pp. 183 and 344.

measuring (from top to bottom) 7.4, 13.5, and 10.5 cm, respectively.[12] All three pieces are of a yellowish-brown color, and all three have their right margin intact, but are damaged on their left margin. Moreover, a stain caused by water runs vertically through all three pieces, and is the likely cause of the damage to the left margin, and certainly caused the effacement of many letters on the scroll's left half. Like the Bodleian rotulus, this one too begins and ends *in medias res*, but in this case I can already point to three more fragments which clearly belong with the same rotulus. Two parchment fragments—T-S NS 258.153 and 154—are quite small, measuring 5.5 by 7 cm and 3.2 by 6.5 cm respectively, and neither fragment displays the telltale prick-holes characteristic of broken rotuli. But the fact that these parchment fragments are quite narrow, and inscribed on one side only, suggests that they may have come from such a rotulus (and not from a codex, in which both sides should be inscribed), and a comparison of the parchment and the handwriting with that of T-S K 1.154 demonstrates their great similarity. The identification is made secure by the pattern created by the stain which runs vertically through both fragments, and matches perfectly the stain running through the top part of T-S K 1.154, thus proving that all three fragments once belonged together, and that the damage caused by water preceded the disintegration of the original rotulus. Moreover, T-S K 1.120 (13.2 by 9.8 cm), which was published as MTKG III, 60 but not identified as forming part of a rotulus, displays the same hand and the same stain, and ends with the first half of Num 21.28, whose continuation may be found on T-S NS 258.153. Thus, it is entirely certain that all four fragments once belonged in a single rotulus, and the original order was (from top to bottom) T-S K 1.120, T-S NS 258.153, T-S NS 258.154 and T-S K 1.154. Throughout the reconstructed rotulus, the right margin is well preserved, but the left margin is preserved only at the top section (T-S K 1.120) and parts of the bottom one (T-S K 1.154). On all four fragments the verso is blank, which means that this rotulus was not re-used by later scribes, perhaps because it was damaged by water at a relatively early stage. It must be stressed, however, that the reconstructed rotulus still begins and ends *in medias res*, so there is no doubt that more pieces are still

[12] This fragment was briefly mentioned by Peter Schäfer, "New Magical Fragments from the Cairo Genizah," in *Proceedings of the Tenth World Congress of Jewish Studies*, Section C/1 (Jerusalem, 1990), pp. 245–252, on p. 248 (Heb.).

missing both at the top and at the bottom of this scroll. If and when more pieces are found, they may allow a more precise reconstruction of this rotulus and of its codicological history.

On the recto of the reconstructed scroll, 89 lines of text are written in a uniform hand, clearly later than that of the Bodleian rotulus (the hand was dated by Judith Olszowy-Schlanger to the (early) eleventh century).[13] The text is written in a mixture of Aramaic and Judeo-Arabic, and some of the recipes use many biblical verses, which are cited in Hebrew. As this rotulus is not well preserved, it is not entirely clear how many recipes were written in the extant section, but one can detect the remains of at least ten different recipes and—as in the Bodleian rotulus—all of them are aggressive in nature. But unlike the Bodleian rotulus, the recipes found here seem much less unusual, and involve many magical practices which are quite standard in Genizah magical recipes. And while some of these recipes display signs of an early origin (including the use of the title קיבלוה for aggressive recipes, for which see Dan Levene's paper in the present volume), others probably stem from the Genizah period itself, or are watered-down versions of older recipes. Thus they are of considerably less historical interest than those of the Bodleian rotulus.

3) T-S K 1.50 + T-S K 1.133: Unlike the two previous items, this rotulus was first inscribed not with magical recipes but with an astrological text, best known as the *Treatise of Shem* in its Judeo-Arabic version (and in a phonetic transliteration which is characteristic of the earlier Judeo-Arabic Genizah fragments).[14] T-S K 1.50 (6.9 cm long and 8.4 cm wide) preserves the section on Gemini, while T-S K 1.133 (25.1 by 8.8 cm) preserves the sections on Cancer, Leo, Virgo and Libra, so there is no doubt that the former once belonged directly above the latter, and that the original scroll was at least twice as long as these two fragments combined. The parchment is, once again, of a yellowish-brown color, and the margins of this rotulus are well preserved, but T-S K 1.50 is missing small pieces of both margins. The hand on the

[13] And note that T-S K 1.120 = MTKG III, 60 was dated by its editors to the tenth century.

[14] For the *Treatise of Shem*, see Reimund Leicht, *Astrologumena Judaica: Untersuchungen zur Geschichte der Astrologischen Literatur der Juden*, [Texts and Studies in Medieval and Early Modern Judaism, 21] (Tübingen: Mohr Siebeck, 2006), pp. 45–55 (who mentions both fragments on p. 46). For another rotulus with an astrological text see British Library 5557A 64, published by Tobi (above, n. 4).

recto was dated by Judith Olszowy-Schlanger to the late-tenth or early-eleventh century. Like the Bodleian rotulus, this rotulus too was re-used by a later scribe, whose hand may be dated to the later eleventh century, but this writer used the stitched up pieces of parchment not as a rotulus but as an horizontal scroll, on which magical recipes were written in columns, each some 6–7 cm wide. T-S K 1.50 preserves one full column of text and the end of another, while T-S K 1.133 preserves three columns of text and the beginning of a fourth one. Thus, the verso of both fragments presents the appearance of a parchment scroll—a very unusual occurrence in Genizah magical texts and in non-biblical Genizah fragments in general—but this is due solely to the re-use of an old rotulus.[15] And in this case, the magical recipes are both aggressive and apotropaic (including a recipe for making an amulet), are written mostly in Judeo-Arabic, and display clear signs of a Muslim influence (including a reference to the lost tribes of ʿAd and Thamud, mentioned in the Qurʾan). We may therefore conclude that both in format and in contents this scroll differs greatly from the two magical rotuli discussed above.

Select Recipes from Bodleian Heb. a3.31

These, then, are the Genizah magical rotuli currently known to me, and it is hoped that more fragments of these rotuli, and more Genizah magical rotuli, will be identified in the future. But as my own interests lie less in codicology and more in the magical texts themselves, the rest of the present paper will be devoted to a closer analysis of some of the magical recipes found on the recto of the Bodleian rotulus. Being one of the oldest Genizah magical texts identified thus far, and displaying a long set of magical recipes which are characterized by their purely Palestinian Jewish Aramaic idiom and many Greek loanwords, this collection offers an excellent point of entry into the world of Jewish magic in late-antique Palestine. And as it is devoted almost exclusively to aggressive magic, it allows us a closer look at a set of practices

[15] For non-biblical Genizah scrolls, which are quite rare, see T-S AS 74.324, published by Marc Bregman, "An Early Fragment of *Avot de Rabbi Natan* from a Scroll," *Tarbiz* 52 (1983): 201–222 (Heb.); T-S K 21.95.S, published by Peter Schäfer, *Geniza-Fragmente zur Hekhalot-Literatur* [TSAJ, 6] (Tübingen: Mohr, 1984), G1 (Hekhalot Rabbati).

which are not as well documented as the apotropaic and medicinal magical practices of late antique Jews.[16] To see this, we may focus on five different recipes, of varying length and sophistication, and analyze the magical technologies utilized in each of them. To facilitate future references to each recipe, I have included the line-numbers from my transcription of the entire rotulus; and in the transcription itself, I have used the following conventions:

() Uncertain reading of one or more letters.
= A letter which I could not read.
[ ] A lacuna in the text, and my reconstruction thereof.
א (bold type) Words which the scribe wrote "in reverse"—i.e., from left to right.[17]

a) The second (but first more or less complete) recipe on the recto of Bodleian Heb. a 3.31 is very short and quite obscure, but its great interest lies in its use of a whole Greek phrase, transliterated in Hebrew characters. The recipe itself runs as follows:

1 (סוף מרשם קודם) אין הווה[לך?
2 קופד אמור על קדרה אלין מלייא והדא [אמור?
3 תיאון פ(נ)יומה קטיגורוס (תחילת המרשם הבא)

1 (end of prev. recipe) (vac) If [you?] have
2 meat?, say over a pot these words and [say] this
3 TY'WN PN?YWMH QṬYGWRWS (vac) (beg. of next recipe)

Unfortunately, the aim of this short recipe—which is found at the very top of the rotulus, where much of the left margin was eaten away—is not very clear. If QWPD means "a piece of meat" (from the Greek

[16] For the dearth of aggressive magic in the Jewish literature of Late Antiquity, apart from *Sefer Ha-Razim*, see Philip S. Alexander, "*Sefer ha-Razim* and the Problem of Black Magic in Early Judaism," in Todd Klutz (ed.), *Magic in the Biblical World: From the Rod of Aaron to the Ring of Solomon* [JSNT Suppl. 245] (London: T&T Clark, 2003), pp. 170–190, whose conclusions will have to be revised in light of the Bodleian rotulus. See also Yuval Harari, "If You Wish to Kill A Man: Aggressive Magic and the Defense Against It in Ancient Jewish Magic," *Jewish Studies* 37 (1997): 111–142 (Heb.), and Dan Levene's paper in the present volume.

[17] For this magical practice, common especially in aggressive magic, see Joshua Trachtenberg, *Jewish Magic and Superstition: A Study in Folk Religion* (New York: Behrman's Jewish Book House, 1939) (repr. Philadelphia: University of Pennsylvania Press, 2004, with an Introduction by Moshe Idel), pp. 116, 126 and 129; Joseph Naveh, "Lamp Inscriptions and Inverted Writing," *IEJ* 38 (1988): 36–43.

kopadion), as in rabbinic literature, then we might have here a spell to be uttered over a pot with meat, to make it cook faster, and such recipes are well attested in ancient magical texts.[18] If, on the other hand, QWPD is derived from the Aramaic root QPD, "to be angry," then we might have another aggressive magical recipe (which would fit the nature of almost all the other recipes in this rotulus), with an aggressive spell uttered over a pot (full of water, which is then poured near the victim's home?). But be this as it may, the spell to be uttered is extremely interesting, for it consists of three Greek words, and may originally have consisted of four words, with one word now lost at the end of line 2. Of these Greek words, TY'WN is almost certainly Greek, *theos*, "god," either in the accusative singular (*theon*) or in the genitive plural (*theôn*).[19] The third word, QṬYGWRWS, certainly is the Greek *katêgoros*, which is quite common in rabbinic literature (but note how here it preserves the nominative ending, whereas in rabbinic literature it often loses it and becomes קטיגור), and means "accuser, prosecutor."[20] The second word, on the other hand, is less certain—it may be the Greek *phainomai*, "I appear, I come," but is more likely to be *pneuma*, "spirit." In the first case, the phrase might mean something like "I come as an opponent of the gods," whereas in the second case we might either assume a missing preposition at the end of line 2 and translate the whole sequence as "among the gods, the spirit is an accuser," or assume a missing noun (or nothing missing) and translate "(X,) a spirit of gods, an accuser."[21] But be this as it may, it seems quite clear that we are dealing here with a short, but complete, Greek sentence, which would be quite like the famous transliterated Greek prayer in *Sefer Ha-Razim*, or the shorter Greek dismissal for-

---

[18] For קופד, see Samuel Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch und Targum*, 2 vols. (Berlin, 1898–99) (repr. Hildesheim: Georg Olms, 1964), vol. 2, p. 516; Michael Sokoloff, *A Dictionary of Jewish Palestinian Aramaic of the Byzantine Period* (Bar-Ilan: Bar-Ilan University Press, 1990), 2nd ed., 2002, p. 483. For such magical practices, see Hippolytus, *Ref.* 4.33.2, and R. Ganschinietz, *Hippolytos' Capitel gegen die Magier (Refut. Haer. IV 28–42)* [Texte und Untersuchungen 39/2], (Leipzig: Hinrichs, 1913), p. 49, and note a similar practice attributed to Rav Naḥman's daughters in bt Gitt 45a.

[19] And note the sequence *theon ha-gadol amona* in MSF, A22, briefly discussed in Bohak, *Ancient Jewish Magic*, p. 257.

[20] See Krauss, *Lehnwörter*, p. 524; Sokoloff, *Palestinian Jewish Aramaic*, p. 485.

[21] A search for similar expressions in the *Thesaurus Linguae Graecae* CD-ROM (version E, which also includes the Greek Magical Papyri), came up with nothing that seemed relevant for the present context, although *pneuma theôn* indeed is attested, for example in Philostratus, *VAT* 7.34.

mula found in the same text, or the Greek formulae which are found (together with their Aramaic translations), in the "sword" section of the *Sword of Moses*.[22] In all these cases, the reconstruction of the original Greek sequences is hampered by the difficulty of reconstructing Greek formulae transliterated in an alphabet which was utterly unsuitable for this task. In the present instance, the difficulty is further exacerbated by the damaged state of our text and by the uncertainty about the nature of the recipe as a whole (although the presence of *katêgoros* certainly argues in favor of an aggressive context), which makes it less clear what kind of Greek phrase we might expect here. But in all these cases, the very presence of Greek sentences and phrases attests to the extensive Greek influences on the Jewish magical texts of Late Antiquity, including those written in Hebrew and in Aramaic.

b) The second recipe to be analyzed here, which is the fourth recipe on the recto of the Bodleian rotulus, involves an interesting example of a much debated issue in the study of late-antique Judaism, namely, the worship of angels, in this case on a *do ut des* basis, whereby the user of this recipe offers a specific angel various gifts, and explains what he or she would like to receive in return:

11 (סוף מרשם קודם) לח[
12 דאיבר וז' פרתותין וז' בולין דמלח וא(ד)[
13 ואמור עליהון ז'ב ז' לך אנה קרי פוסיס[
14 מלאכה רבה הכמה דאנה יהיב לך לחם מן[לחמי]
15 ומלח מן מלחי וממון מן ממוני כן תתן ל(ש')[ו'ש'
16 ריוי מן ריוך וכיוב מן כיובך ושיקוץ מן (ש)[יקוצך]
17 וניאוף מן ניאופך וניצוץ מן ניצוצך בשם [
18 כלקיטס ובשם סמאל סטנה רבה בפריע [
19 הדן בויכל (תחילת המרשם הבא)

11 (end of prev. recipe) (vac) For [. . . take . . .
12 of lead and 7 chunks[23] of bread and 7 lumps of salt and [
13 and say over them 7 times,[24] to you I call, PWSYS[

[22] For these, see M. Margalioth, *Sepher Ha-Razim: A Newly Recovered Book of Magic from the Talmudic Period* (Tel Aviv: Yediot Aharonot, 1966), pp. 12–13 (Heb.); Claudia Rohrbacher-Sticker, "From Sense to Nonsense, From Incantation Prayer to Magical Spell," *JSQ* 3 (1996): 24–46; Bohak, *Ancient Jewish Magic*, p. 179, n. 92.

[23] For פרתותין, see Syriac *prtwt'*, "broken bits of bread, crumbs, fragments," in R. and J. Payne Smith, *A Compendious Syriac Dictionary* (Oxford: Clarendon Press, 1903), p. 466.

[24] For זבנין, see Sokoloff, *Palestinian Jewish Aramaic*, p. 171.

14 the great angel, just as I give you bread from my [bread]
15 and salt from my salt and money from my money, so shall you give N[N
16 a dispute?[25] from your dispute? and a pain from your pain and an abomination from your ab[omination]
17 and a fornication from your fornication and a spark from your spark; in the name of [
18 KLQYṬS, and in the name of Samael the great satan, quickly [
19 this, for pain(?) (vac) (beg. of next recipe)

Unlike the first recipe we analyzed, here there are few problems of interpretation, in spite of the absence of a few letters at the end of each line.[26] Here the practitioner is instructed to take lead, bread and salt, all in groups of seven (a common typological number in such recipes), to offer these to an angel, and to ask that angel to dispense some of his special qualities in return and send his dispute, pain, abomination, fornication and spark upon the person's opponent. Such a ritual must be seen in the light of the recurrent claims in ancient Christian literature concerning the Jewish worship of angels, and the recurrent rabbinic condemnations of such practices, which also are attested in *Sepher Ha-Razim*.[27] In the present recipe, there is no doubt that the practitioner is appealing to a powerful evil angel, and is offering that angel monetary and alimentary offerings in return for his services. There also is no doubt that the angel is adjured by (the hitherto unattested KLQYṬS and by) "Samael the great satan," who certainly is seen here as supervising the powers of evil.[28] In their search for aggressive powers, some

---

[25] For ריו, see Sokoloff, *Palestinian Jewish Aramaic*, p. 523, for the meaning "appearance, form." Such a meaning is not impossible here, but a meaning influenced by the Hebrew ריב, "strife, contest, dispute," seems more likely. Another possibility would be that the original text read דיוי, or דוי, "sorrow."

[26] There are, however, some obscure points, such as the meaning of the last word of our recipe, "for pain." This might be a specification of the recipe's aim, "for (causing) pain," and placing a recipe's aim at the very end is paralleled both in this rotulus (in line 64), and in other Genizah magical texts. But in such a case, what should we make of the word]לח with which the recipe opens, and which seems to state its aim, "For X"?

[27] See Margalioth, *Sepher Ha-Razim*, pp. 10–16; Michel-Yves Perrin, "'Rendre un culte aux anges à la manière des Juifs': Quelques observations nouvelles d'ordre historiographique et historique," *Mélanges de l'École Française de Rome: Moyen Âge* 114 (2002): 669–700.

[28] For Samael, see Gershom Scholem, *Kabbalah* (Jerusalem: Keter, 1974), pp. 385–388; Günter Stemberger, "Samael und Uzza: Zur Rolle der Dämonen im späten Midrasch," in Armin Lange, Hermann Lichtenberger and K. F. Diethard Römheld (eds.), *Die Dämonen—Demons: Die Dämonologie der israelitisch-jüdischen und frühchristlichen*

Jewish magicians clearly were willing to cross the line separating the worship of the One True God from angelolatry, and even from the worship of the powers of darkness. This does not necessarily mean that our recipes assume a dualistic theology, with Samael as God's opponent, but it does imply that they assume that it is to Samael and his ilk that one should turn when one seeks to harm a fellow human being.

c) Another interesting recipe in the Bodleian rotulus (the eleventh in the extant portion) makes use of a myth which seems to be unattested elsewhere, at least in Jewish sources. This recipe runs as follows:

64 (סוף מרשם קודם) אסר לרוחה [
65 ואסר אנה ל'ש'ו'ש' כמה דאסירין [
66 לעלם כן אסיר פ' לעלם וחתים לדרי[דרין? ו...לא
67 יהווי לה מן ברנש בשם אפס פפא נ(ט)[
68 עולמים ובשמה דקטריאל מלאכה דנ(ח)[ת ל...
69 ענה ולבקרת תורייה ואסר תורין דכרין [
70 כן אסור זרעה ד'ש'ו'ש' וסילוניה דלא ימר[...ו...
71 דלא תהלך עד זמן דנבעי ונשרי יתה בש[ם
72 פצציאל ובשם חצציאל ובשם קטריאל מלא[כה
73 כן אסור לעלם וחתום לדרי דרין וסב מחט דפרזל
74 ואמור עליה זמ' ז' ובזמנה שביעייה הב ראשה
75 דמחטה בעוקצה וכרכה בכתן דלא עלת ל(א)[
76 וטמור בזווי צניעה שרייה אפק מחט[ה לשימשה?
77 ואשווי מחטה (תחילת המרשם הבא)

64 (end of prev. recipe) (vac). A binding for a spirit [
65 and I bind ŠWŠ just as [ ] are bound [
66 forever, so is N bound forever and sealed for all gene[rations?
67 shall have from no one. In the name of 'PS PP' NṬ[
68 forever, and in the name of Qaṭriel the angel who came do[wn for
69 small cattle and for the herding of bulls, and he bound male bulls [
70 so shall you bind the sperm of ŠWŠ and his sperm canal,[29] that it / he shall not [
71 that she / it shall not walk until the time that we shall ask (for it) and loosen him, in the na[me of
72 Paẓaẓiel and in the name of Ḥaẓaẓiel and in the name of Qaṭriel the ang[el
73 so bind forever and seal for all generations. And take an iron needle

---

Literatur im Kontext ihrer Umwelt. The Demonology of Israelite-Jewish and Early Christian Literature in Context of their Environment (Tübingen: Mohr Siebeck, 2003), pp. 636–661.

[29] For סילון (Greek *sôlên*, "tube") used for the sperm canal of the male organ, see Krauss, *Lehnwörter*, p. 383.

74 and say (it) over it 7 times, and in the seventh time put the head
75 of the needle in its tip (sic) and wrap it in linen that did not go into [
76 and bury (it) in a hidden place. (Its) loosening:[30] Take the needle out [to the sun?
77 and straighten the needle out. (vac) (beg. of next recipe)

Like several other recipes in the Bodleian rotulus, this one too seeks to "bind" the male organ of its victim, a common magical practice in Late Antiquity, and one that also was known to, and discussed by, the rabbis of late-antique Palestine.[31] It does this by way of an adjuration, accompanied by an interesting *historiola* (a mythical event used as a precedent or an analogy for the desired outcome of the magical procedure) and an intriguing ritual whose symbolic meaning is quite manifest. On the ritualistic-symbolical level, we see the practice (attested in other cultures as well) of "binding" a male victim by twisting a needle (whose phallic connotations are quite obvious) and turning it into a closed circle, with its tip inside its own eye (and thus unable to penetrate any other object).[32] In this recipe, as in several other recipes in this rotulus and in other Genizah recipe books, and in the *Sword of Moses* as well, we also find instructions on how to loosen this piece of aggressive witchcraft once it is no longer deemed necessary—in this case, by taking the needle out of the dark spot in which it was buried and straightening it up, in the assumption that the same would now happen to the victim's virile organ. On the mythical side, we have here a reference to the angel Qaṭriel (whose name is derived from the Aramaic root קטר, "to bind" + the standard ending -el, and who appears quite frequently in ancient Jewish magical texts), who came down from heaven to herd small cattle and bulls and "bound" (i.e., castrated?) the male bulls (a well known symbol of virility in many cultures, ancient and modern); just as this had happened *in illo tempore*, so shall the hapless victim be "bound" and rendered impotent as the practitioner wishes. The use of such *historiolae* is extremely common in ancient and medieval magical texts, including the Jewish ones, but whereas most Genizah magical recipes utilize well worn biblical stories as precedents—and especially the story of Sodom and Gomorrah, to

[30] For שרייה, see the use of שריא, and שריא דגברא in MTKG III, 61 (= T-S K 1.162), 1c/25–1d/4.

[31] For the "binding" of bridegrooms, see Bohak, *Ancient Jewish Magic*, p. 396.

[32] For a possible medieval Latin parallel, see Catherine Rider, *Magic and Impotence in the Middle Ages* (Oxford: Oxford University Press, 2006), p. 145.

which we shall return below—the composer of this recipe made use of a non-biblical, and perhaps even non-Jewish, myth.[33] Further research might shed more light on the possible origins of this myth, which does not seem to be an ad hoc invention but a casual reference to a myth which was circulating in the magician's own world.

d) The last two recipes in the extant part of our rotulus, and therefore also the best preserved, are also the most interesting. The first of these is described as intended to make peace between a man and a woman, but in fact is an aggressive / erotic magical recipe, involving the adjuration and slaughtering of a white cock:

117 (סוף מרשם קודם) למרמי שלם [בין]
118 גבר לבין איתה בס כל לוגנרת רווח עבשאו (יול)[ע?
119 דע אוהד נייחב רומאו אנה פ'ב'פ' משבענה
120 לך תרנגלה בשמה דמלכה עלייא דיתיב על
121 כורסייה דדינה: המך תאד שיבך ינבל השנא
122 הריעבלו נך שבכתי ש'ו'ש' במאתין מ'ח' אברין
123 דאית בה ונעמתה תהווי מכיכה קודם פ'ב'פ'
124 בשמה דכבשיאל דכבש ארעה בחיי(ל)ה ותהומ(ה)
125 בתוקפיה מלין אמרית עובדין יתעבדון וכ(ל)[אשר?
126 דיברתי יצליח: בסו נולטיף דכסיט וכת' א[לין מלייה
127 בגווה: בסו דדוג נם יונאם הרבנד [בהו היתי
128 הלטיפב עוזבו הלגנרת הבו (!) הבתך הוינ[ב בהו
129 (ה)פושן דפיל לגו מעוי וכוף ראשה: הלגנר(ת)[ד]
130 יועמל רומטו תשרפב התחרוא (ו)[הב?] עלוי כיף
131 דלא יפק יתה חיווה ואשבע עלוי אלין מלייה

117 (end of prev. recipe) (vac) To make peace [between?
118 a man and a woman, take a white cock and adjure over it
119 while it is still alive and say, I, NN, adjure
120 you, cock, in the name of the exulted king who sits upon
121 the throne of judgment. Just as you are subdued by men
122 and by cattle, so shall ŠWŠ be subdued by the two hundred 48 limbs

[33] By way of comparison, I note Mousaieff bowl M163 (edited by Dan Levene, *A Corpus of Magic Bowls: Incantation Texts in Jewish Aramaic from Late Antiquity* [The Kegan Paul Library of Jewish Studies] (London: Kegan Paul, 2003), p. 123): והיכדין דאיתכביש רימון תורא קדמאה, "…and just as RYMWN, the primordial bull, was subdued." I also note the traditions about the eschatological punishment of the Sun and the Moon "like castrated bulls," as cited and discussed by David J. Halperin and Gordon D. Newby, "Two Castrated Bulls: A Study in the Haggadah of Kaʿb al Aḥbâr," *JAOS* 102 (1982): 631–638. One may also go further afield, and cite the stories about Hercules and the bull or the Mithraic motif of the scorpion attacking the bull's genitals, but such parallels do not seem to elucidate our recipe.

123 that are in her, and her tune?[34] shall be humbled before NN
124 in the name of Kabshiel who subdued the earth by his strength and the abyss
125 by his might. Words have I spoken, deeds shall be done, and all [that?
126 I have spoken shall succeed. And take a tin lamella,[35] and write th[ese words
127 upon it. And take a thread from the clothes of the man [and place it
128 in the lamella and tear the cock apart and place the writing inside it [and place
129 fine flour[36] of ??? inside its intestines and twist the head of the cock
130 to its intestines and bury it at a crossroads. And [place?] upon it a rock
131 so that no animal shall dig it out, and adjure upon it these words.

Once again, we are faced with an aggressive magical recipe, this time intended to subdue a person and make him amorously or sexually submissive to another person of the opposite sex; and once again, the recipe involves both a ritual and an adjuration. On the ritual level, the user is instructed to take a white cock, utter an adjuration over it, tear it apart, and place inside its intestines a tin lamella with the adjuration, a thread from the victim's clothes (what James Frazer would call "magic of contagion"), and fine flour. The cock is then twisted into a kind of a knot (an action which certainly is intended as analogous to what would happen to the victim should s/he fail to comply), and buried at the crossroads, a common location for the practice of magic rituals in many ancient cultures, and perhaps also symbolizing here the desired meeting of the man and the woman.[37] The use of white cocks in aggressive magical recipes seems to have been quite common, and one may cite parallels from other Genizah magical texts, from *Sepher Ha-Razim* (for which see Ithamar Gruenwald's paper in the present

[34] For נעמה, see Sokoloff, *Palestinian Jewish Aramaic*, p. 354.

[35] For פיטלון, see Bohak, *Ancient Jewish Magic*, p. 374, n. 64; for כסיט = כסיטרון = Greek *kassiteros*, see Krauss, *Lehnwörter*, p. 556 (where the word is consistently spelled with a *qof*, not a *kaf*).

[36] For נשופה, see Jonas C. Greenfield, Michael E. Stone and Ester Eshel, *The Aramaic Levi Document: Edition, Translation, Commentary* [Studia in Veteris Testamenti Pseudepigrapha, 19] (Leiden: Brill, 2004), p. 82 (= ALD 8:6): נישפא בליל במשחא, "fine meal (Gr. *semidalin*) mixed with oil," with the editors' note on p. 176 (I am grateful to Matthew Morgenstern for this reference); I am still puzzled by the word פיל, but cf. Sokoloff, *Palestinian Jewish Aramaic*, p. 431. Note also the appearance of פילון as an ingredient in several Jewish magical texts, including Bodleian Heb. a 2.2.

[37] For Greco-Roman examples, see S. I. Johnston, "Crossroads," *ZPE* 88 (1991): 217–224, esp. 223–224; for rabbinic examples, see bt Yoma 84a; Pess 111a.

volume), from the Babylonian incantation bowls, and even from the Babylonian Talmud.[38] Most intriguing is the almost exact parallel in the *Sword of Moses*, in a recipe for sending dreams upon someone, which involves placing an inscribed silver lamella in the mouth of a cock, slaughtering it, twisting its body so that its mouth will be between its thighs and burying it at the foot of a wall.[39] But with such parallels in mind it is also interesting to note the practical mindset displayed by the author of our recipe, who is worried lest the smelly carcass might be dug out and eaten by some animal, thus dissolving the spell (or, at least, exposing it for all to see, and perhaps compromising both the client and the magician), and therefore instructs the user to place a rock over the burial place of the mutilated rooster. On the mythical level, we find in the adjuration itself a reference to "Kabshiel who subdued the earth by his strength and the abyss by his might." This angel, whose name is derived from the root כבש, "to subdue" + the standard ending -el, was extremely popular in ancient Jewish aggressive magic, and even the entire formula found here is closely paralleled in other Genizah magical texts and clearly was quite common in late antique Jewish magical texts.[40] Embedded in the adjuration we also find an interesting expression, "Words have I spoken, deeds shall be done, and all [that?] I have spoken shall succeed," which provides an interesting summary of the magician's mindset and which—judging

[38] See, for example, Bodleian MS Heb. a2.2; *Sepher Ha-Razim* I/160–169 (pp. 75–76 Margalioth); Levene, *A Corpus*, M163, p. 122: תחות הנא תרנולא חיורא דמזמ[ן ל]יך (“under this white cock that is appoin[ted on your beh]alf”); bt AZ 4a–b // Ber 7a // San 105b, with Gideon Bohak, “Magical Means for Dealing with *Minim* in Rabbinic Literature,” in Peter J. Tomson and Doris Lambers-Petry (eds.), *The Image of the Judaeo-Christians in Ancient Jewish and Christian Literature* (Tübingen: Mohr Siebeck, 2003), pp. 267–279.

[39] See Yuval Harari, *Harba de-Moshe (The Sword of Moses): A New Edition and a Study* (Jerusalem: Academon, 1997), p. 42: ואחית בפום תרנגלא ושחוט יתיה…ואהדר פיו ואחית ביני ירכתיה, וקבר בעקבא דשורא (“and place (the lamella) in the mouth of a cock and slaughter it…and turn back its mouth and place it between its thighs, and bury (it) at the foot of a wall”). For such sacrificial acts in late-antique Jewish magic see also Michael D. Swartz, “Sacrificial Themes in Jewish Magic,” in Paul Mirecki and Marvin Meyer (eds.), *Magic and Ritual in the Ancient World*, [Religions in the Graeco-Roman World 141] (Leiden: Brill, 2002), pp. 303–315.

[40] And cf. MTKG II, 45 (= T-S K 1.26), 1b/7–8: כבשיאל דכבש ארעה קודם שמייה וכביש [תהו?]ם [ ] ובתוקפה (“Kabshiel, who subdued the earth under heaven and subdued (the) [abys]s, [by] and by his power”). The formula is echoed in Levene, *A Corpus*, M163, p. 124: ובשמיה דאישו דכבש רומא ועומקא בזקיפה (“And in the name of Jesus, who subdued the height and the depth by his cross”).

from the shift from Aramaic to Hebrew in mid-sentence—might be based on some very old Jewish magical formula.

e) The last recipe on our rotulus is in many ways the most interesting of them all. It is yet another aggressive recipe, and involves some exotic ingredients and a well known *historiola*, but this time with a special twist:

132 אשקיו לרוחה בדיקה סב מיין
133 חטיפין פראהורון מן מבוע ומי של(ק)ה ד(חט)י[א]
134 ומי טלופחין שלוקן ועקר צברה ותונין דח(מ)[ר
135 ותונין דתורה אכומה ותונין מן דידך ואמו[ר
136 עליהון זמ' ז' אתון הנון דינאמיס דאלהא רב[ה
137 אתון הנון רוחתה דעלמה דהפך אלהא ב[ ] סדום
138 ועמורה אדמה וצבויים כן תהפכון ותע[ק]רון
139 ותגלון לש'ו'ש' נם התיב נמו הרתא וכל ר[וחי]ן
140 ושדין וכל מזיקין דעבידין על סרחונה וע(ל)[
141 ועל ערבובה ייתון על פ'ב'פ' ויצערון יתיה וי[
142 יתה ויגלון יתה מן בייתה בשמה דנוריאל והפ[כיאל?
143 סור(י)אל אלין ד(מ)שמשין מלאך מותה ׳ צ(י)ברו מד[וק?]
144 [ה]תייב (תחילת המרשם הבא)

132 (vac) A watering for a spirit. Tested?, take fast-flowing?[41] water
133 PR'HWRWN[42] from a spring, and water of cooked wh[eat?]
134 and water of boiled lentils and the root of aloe[43] and the urine[44] of a don[key
135 and the urine of a black bull and your own urine, and sa[y
136 over them 7 times, You are the power of the great God,
137 you are the spirit of the world [by which?] God has overturned Sodom
138 and Gomorrah Adama and Zeboim, so shall you overturn and uproot
139 and exile ŠWŠ from his house and from his place and all the sp[irits
140 and demons and harmers who are in charge of sin and of [
141 and of turbulence shall come upon NN and shall cause him grief and […
142 him and exile him from his home, in the name of Nuriel and Hap[khiel?

[41] I am not sure what מיין חטיפין really means, but the instruction to use מים חטופים appears in other Jewish magical texts as well, including, for example, the *Shimmush Tehillim* instructions in MTKG III, 81 (= T-S NS 216.23) 1a/12 (and see the editors' note on p. 322); T-S NS 322.95, and several different recipes in MS Sassoon 56 = NYPL 190.

[42] פראהורון clearly is a Greek word, but I am not yet sure which one, and the transliteration may be somewhat faulty.

[43] For צברה, see Syriac *ṣbr'*, "the aloe," in Payne Smith, *Syriac Dictionary*, p. 473.

[44] For תונין, see Syriac *twn'*, "urine," in Payne Smith, *Syriac Dictionary*, p. 608.

143 Suri'el, those who serve the angel of death. And sprinkle bef[ore
144 his home. (vac) (beg. of next recipe)

As in the previous examples, this aggressive magical recipe—intended to harm a person and exile him or her from their home—involves both a ritual and a mythical component. On the ritual side, a smelly concoction is prepared from six liquids and a root (the inclusion of which may be due in part to the similarity between "root" (עקר) and "uproot" (here תעקרון), and perhaps also to the similarity between צברה, "aloe, " and רבץ, "to sprinkle"), and once the adjuration is uttered over it, it is sprinkled in front of the house of the intended victim. On the mythical side, we get an elaborate oral adjuration in which the unsavory concoction is equated with the *dynamis* of the great God, and with the spirit of the world by/with which God rained sulfur on Sodom, Gomorrah, Adama and Zeboim and brought about their utter destruction (see Genesis 19). In a similar manner, the magician insists, shall the liquids manipulated here overturn and uproot and exile the victim from his or her home. And as if this was not enough, the spell adds the wish that all kinds of harmful spirits would descend upon the victim and harm him and exile him from his house, and all this in the name of Nuriel (whose name is made of "fire" + -el ending) and probably Hapkhiel (whose name is derived from the root HPK, "to overturn" + -el ending), who are here identified as part of the entourage of the angel of death. The use of Sodom and Gomorrah as a *historiola* in Jewish magical recipes—in Hebrew, Aramaic and Greek, and later in Judeo-Arabic as well—is extremely common in Jewish magical texts, as is the identification of a substance used by the magician with substances used *in illo tempore* to destroy the troublesome cities.[45] Similarly, the appeal to the powers of evil should no longer surprise us, as we have found it in other recipes on this rotulus. But the use of the urine of several animals, and of the magician's own urine, is—as far as I know—quite unattested in the Jewish magical tradition, and proves once again the relatively "daring" nature of the recipes found in the Bodleian rotulus. Finally, the sprinkling of the "adjured" substance in front of the victim's home, yet another example of "contagious magic," is well attested in other sources too; whether

[45] For a fuller discussion of this point, see Bohak, *Ancient Jewish Magic*, pp. 312–314.

the stench would have made the victim leave his or her home is quite doubtful, but I suspect it could have made them aware that some foul act was being perpetrated against them.

Summary

To sum up: While rotuli and rotuli fragments are relatively rare in the Cairo Genizah, and magical rotuli extremely rare, those magical rotuli which happened to survive turn out to be of great historical importance. This is especially true of Bodleian Heb. a3.31, which is one of the oldest available Genizah magical texts, is entirely based on much earlier Palestinian Jewish recipes which seem to have been neither "updated" nor censored in any significant manner, and provides important evidence on the aggressive magical practices of the Jews of late-antique Palestine and early medieval Cairo. The significance of this evidence may be highlighted by noting that among many hundreds of Genizah magical texts transcribed within the framework of my research project, not a single one provided as many early Jewish magical recipes in such a good state of preservation and with such a high concentration of very "daring" aggressive magical recipes. Moreover, my search for parallels for the recipes contained in this rotulus did not come up with much, neither inside the Genizah nor outside it, which seems to imply that most of these magical recipes were not re-copied by later Jewish practitioners (perhaps because they were deemed too offensive in their blatant transgressions of some biblical and rabbinic injunctions and in their frequent appeals to the forces of darkness), and would have been utterly lost were it not for the chance preservation of this rotulus. In the future, more fragments of the above-listed rotuli, and of other magical rotuli, might be identified, and further enhance our knowledge of an important stage in the textual transmission of the Jewish magical tradition from Late Antiquity to the early Middle Ages.

THE MAGICAL ROTULI FROM THE CAIRO GENIZAH

Gideon Bohak

Introduction

In spite of much progress in recent decades, the magical texts found in the Cairo Genizah have yet to receive the attention they deserve.[1] In the present paper, I shall focus on a previously unnoted type of Genizah magical fragments—namely those written on vertical parchment scrolls (*rotuli*).[2] Such scrolls are extremely interesting not only because of their format, but because of their contents as well, and especially the aggressive magical recipes they contain, some of which clearly stem from late-antique Palestine. But as these fragments are quite long, and the task of reconstructing them is in no way finished, no attempt will be made here to offer a full edition of any single rotulus; instead, I shall limit myself to a description of their codicological and scribal features, a brief analysis of their contents, and a selective edition of some of their magical recipes. In the future, I hope to provide a full edition of

[1] The present paper forms a part of a wider research project on the magical texts from the Cairo Genizah, which is based on a preliminary list of Genizah magical fragments compiled by Professor Shaul Shaked, and is funded by the Israel Science Foundation (Grant no. 725/03). I am grateful to my research assistants—Shani Levy, Karina Shalem and Irena Lerman—and to Ortal-Paz Saar, for their assistance throughout this research project. The final version of the present paper was written during my year-long stay in Cambridge, partly funded by the Genizah Unit of the Cambridge University Library (for which I am especially grateful to Stefan Reif and Ben Outhwaite, the former and current heads of the Unit), and by the Friedberg Genizah Project. I am also grateful to Judith Olszowy-Schlanger for her illuminating codicological and paleographical advice.

[2] For previous publications of Genizah magical texts, see especially Joseph Naveh and Shaul Shaked, *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1985) (henceforth AMB); id., *Magic Spells and Formulae: Aramaic Incantations of Late Antiquity* (Jerusalem: Magnes Press, 1993) (henceforth MSF); L. H. Schiffman and M. D. Swartz, *Hebrew and Aramaic Incantation Texts from the Cairo Genizah: Selected Texts from Taylor-Schechter Box K1*, [Semitic Texts and Studies 1] (Sheffield: Sheffield Academic Press, 1992) (henceforth HAITCG); Peter Schäfer and Shaul Shaked, *Magische Texte aus der Kairoer Geniza*, [Texte und Studien zum Antiken Judentum 42, 64, 72] (Tübingen: J. C. B. Mohr (Paul Siebeck)), vol. 1 (1994), vol. 2 (1997), vol. 3 (1999), vol. 4 (forthcoming) (henceforth MTKG).

these fragments, as of many other Genizah magical recipes and recipe-collections which deserve a more detailed analysis.[3]

The Magical Rotuli—A Broad Survey

The presence of rotuli—that is, vertical scrolls made of relatively narrow pieces of parchment sewn together one below the other—in the Cairo Genizah has occasionally been noted, and a few such rotuli have already been published.[4] However, the number of unpublished Genizah rotuli known to me already amounts to many dozens, and as these fragments seem to belong to the earlier strata of the Cairo Genizah, and some of them clearly were in use even before Genizah times, they certainly deserve a close codicological analysis of their different forms and contents and of their place within the history of the Jewish book.[5] My own interest in these fragments began when, during a short visit to Cambridge to study some magical fragments, I noticed that one or two fragments had a row of tiny holes at their top or at their bottom. This surprised me, as I could not see why anyone would bother to pin-prick his or her magical texts in this manner, but a few days later I was checking some of the Genizah fragments in the Bodleian Library at Oxford and discovered a most unusual magic scroll (Bodleian MS Heb. a3.31), which is made up of four unequal pieces of parchment stitched together vertically and then inscribed horizontally. I then realized that the pin-pricked fragments I had seen in Cambridge had once been parts of such vertical rotuli, but the threads of the stitches that

---

[3] For a broad survey of the magical texts from the Cairo Genizah, and much further bibliography, see Gideon Bohak, *Ancient Jewish Magic: A History* (Cambridge: Cambridge University Press, 2008), pp. 215–221.

[4] For the place of rotuli in the history of the Jewish book, see the brief remarks of Malachi Beit-Arié, *Hebrew Manuscripts of East and West* [The Panizzi Lectures, 1992], (London: The British Library, 1993), pp. 10–11, and of Colette Sirat, *Hebrew Manuscripts of the Middle Ages* (ed. and tr. by N. de Lange) (Cambridge: Cambridge University Press, 2002), p. 102. For published Genizah rotuli see, for example, Neḥemiah Allony, "RASAG's Version of *Sefer Yezira* in Scroll Form from the Cairo Genizah," in I. Weinstock (ed.), *Temirin*, vol. 2 (Jerusalem: Kook, 1981), pp. 9–29 (Heb.); Nicholas de Lange, *Greek Jewish Texts from the Cairo Genizah*, [TSAJ 51] (Tübingen: J. C. B. Mohr (Paul Siebeck), 1996), No. 15 (pp. 165–294); Yosef Tobi, *Poetry, Judeo-Arabic Literature, and the Geniza*, [Jewish Culture in Muslim Lands and Cairo Geniza Studies, IV] (Tel Aviv University, 2006), pp. 51–55 (Heb.). See also n. 6 below.

[5] Judith Olszowy-Schlanger and I have recently begun to map out the Genizah rotuli, but the results of this survey will have to be published elsewhere.

once held them together had crumbled long ago, leaving only narrow sheets of parchment with stitching-holes at their tops, or bottoms, or both. I have since continued looking for such fragments, and gradually came to realize that in some cases the rotuli disintegrated to such a degree that not only the stitches disappeared, but even the stitched pieces of parchment broke into much smaller pieces, without any pin-prick holes to set them apart from other small parchment fragments. I therefore try to keep track not only of all the Genizah magical fragments I can find, but also of all the parchment rotuli and rotuli-fragments, even those which have nothing to do with magic. At present, I am aware of two rotuli with magical recipes and one astrological rotulus re-used for magical recipes, of possible fragments of other magical rotuli, and of many parchment rotuli and rotuli-fragments whose contents are non-magical.[6] The magical rotuli are as follows:

1) Bodleian MS Heb. a3.31: A vertical parchment scroll, 92 cm long and 12 cm wide, made up of four pieces sewn together, measuring (from top to bottom) 38.5, 22.5, 17.2 and 13.8 cm, respectively. The first piece is of darkish brown color, the second is even darker, the third is a much lighter yellowish brown, and the fourth is even lighter in color. The scroll's right margin is preserved throughout, but the left margin is fully preserved only for small parts of the lower sections of the scroll, while for the rest of the scroll it has been damaged (by fire?) in differing quantities. From the "wavy" pattern created by the missing parts when the scroll is stretched out, it seems clear that the scroll's left margin was damaged while it was all rolled up, from bottom to top, which also explains why the bottom part of the scroll is much better preserved than its topmost section. It must be stressed, however, that the scroll begins and ends *in medias res*, and there is no telling how long the original scroll was or how much is missing on

[6] For another magical fragment which may have come from a rotulus, see Westminster College Misc. 59, published as MTKG III, 74, with the editors' note on p. 179. In what follows, I focus only on parchment rotuli, whose pieces were stitched to each other, and ignore those cases in which loose pieces of paper—including used paper—were glued one below the other and used for writing different texts (including amulets and magical recipes), a phenomenon which seems to have occurred quite often, and not only in the earlier strata of the Cairo Genizah. For published paper rotuli see, for example, MTKG II, 24 (= Bodleian Heb. a3.25); MTKG III, 66 (= T-S AS 142.15 + NS 246.14).

either end.[7] Moreover, it is quite possible that more fragments of this scroll would be identified in the future, either in Oxford or in other Genizah collections.

On the recto, the 145 lines of text are written in a well-trained hand, entirely uniform throughout, and clearly belonging to the earliest stratum of the Cairo Genizah (the hand was dated by Judith Olszowy-Schlanger to the (early) tenth century).[8] The layout of the text also is remarkably uniform—each two recipes are separated by a few centimeters of blank space, many of the words in different recipes are deliberately written backward, abbreviations are marked by the same supralinear dots, and the abbreviation for "Name son of Name," appears both as the standard *p(eloni) b(en) p(elonit)* and as the hitherto unattested ŠWŠ, a sequence whose exact meaning still eludes me.[9] Even the magical recipes themselves display a remarkable degree of internal consistency, both in their aims and in the magical practices they enjoin. In light of all this, it is quite certain that the scroll was produced by a single copyist, who was quite an experienced scribe and quite a sophisticated magician. On the verso, the scroll is sporadically covered by different magical texts, in several different hands, all of which seem to be later, and much less professional, than that on the recto. It thus seems quite clear that the rotulus was originally written on one side only (a common procedure on such rotuli), but later users decided to utilize the blank side too, and added their own magical recipes on the verso.[10] This apparently means that the scroll remained in circulation and use over several generations of Jewish magicians.

---

[7] Note that one of the two rotuli published by de Lange is estimated by him to have been about 3 meters long (*Greek Jewish Texts*, p. 165).

[8] Both the hand and the style of writing closely resemble those of T-S Misc. 24.1 (see Neil Danzig, "Two Insights from a Ninth-Century Liturgical Handbook: The Origins of *Yequm Purqan* and *Qaddish de-Ḥadata*," in Stefan C. Reif (ed.), *The Cambridge Genizah Collections: Their Contents and Significance* (Cambridge: Cambridge University Press, 2002), pp. 74–122 and Plate 10), which was dated by Danzig to the final quarter of the ninth century.

[9] The most likely explanation seems to be that this is an abbreviation of שם ושם, "a name and a name" (i.e., the name of the victim and the name of his or her mother); as a partial parallel, one could adduce MS Sassoon 56 = NYPL 190, p. 117, ll.7–8: ונקמת את נקמתי מאת המקולל הארור האכזרי פלו׳ ש׳ בן פלוני׳ ש׳ וכו׳ ("And you shall exact my revenge from the accursed, the damned, the cruel *pel(oni)* Š *son of peloni(t)* Š, etc."). It has also been suggested to me that שוש is four letters removed from פבפ, but this might be a mere coincidence.

[10] For Genizah rotuli whose verso is blank, see the next item. For Genizah rotuli with different texts on both sides, clearly inscribed by different hands and in different

Looking at the recto of our rotulus, we find eighteen different recipes (including two of which only a few words are preserved), of which one is for gaining knowledge, one whose aim is not entirely clear (see recipe a in the next section), and all the rest are for aggressive purposes, and especially for "binding" the sexual potencies of male victims. Such uniformity of purpose is not unparalleled in some of the Greek magical papyri—I note, especially, PGM XXXVI, whose 19 recipes focus almost entirely on issues of interpersonal relations. These single-minded collections always make one wonder whether the practitioners behind them specialized in just one type of magical practices, or had their recipes arranged thematically, and only one of their collections (or a small part thereof) happened to be preserved. But be that as it may, the recipes found on the Bodleian rotulus are of the greatest interest: They are written in a mixture of Palestinian Jewish Aramaic and Hebrew, and contain virtually no Arabisms, a sure sign of their relative antiquity. They also display many Greek loanwords, including what seems like a whole Greek sentence in transliteration, as we shall see below. Moreover, some of the rituals enjoined by these recipes seem quite different, and often far more "daring," than those found in other Genizah magical texts, and this too might be a sign of their relative antiquity, as in the later recipe collections the potentially offensive features tended to be filtered out of the textual transmission.[11] Finally, the extant recipes contain a few apparent references to extra-biblical myths, which also are quite rare in the more typical Genizah magical recipe books. Below, we shall edit and analyze some of the recipes on the recto of this intriguing rotulus.

2) T-S K 1.120 + T-S NS 258.153–154 + T-S K 1.154: The largest fragment of this rotulus is T-S K 1.154, a vertical parchment scroll 31.2 cm long and 8.8 cm wide, which is made up of three pieces sewn together,

periods, see the rotulus edited by Tobi (above, n. 4). Some Genizah rotuli seem to have been written on both sides by their original scribes, including the two rotuli edited by de Lange (above, n. 4), and the one analyzed by Danzig (above, n. 8). Having seen numerous Genizah rotuli, my own impression is that most of them were written on the recto only, and that some retained a blank verso while in others the verso was re-used by later scribes, often for different types of texts than those on the recto.

[11] For such processes of self-censorship, see Bohak, *Ancient Jewish Magic*, pp. 183 and 344.

measuring (from top to bottom) 7.4, 13.5, and 10.5 cm, respectively.[12] All three pieces are of a yellowish-brown color, and all three have their right margin intact, but are damaged on their left margin. Moreover, a stain caused by water runs vertically through all three pieces, and is the likely cause of the damage to the left margin, and certainly caused the effacement of many letters on the scroll's left half. Like the Bodleian rotulus, this one too begins and ends *in medias res*, but in this case I can already point to three more fragments which clearly belong with the same rotulus. Two parchment fragments—T-S NS 258.153 and 154—are quite small, measuring 5.5 by 7 cm and 3.2 by 6.5 cm respectively, and neither fragment displays the telltale prick-holes characteristic of broken rotuli. But the fact that these parchment fragments are quite narrow, and inscribed on one side only, suggests that they may have come from such a rotulus (and not from a codex, in which both sides should be inscribed), and a comparison of the parchment and the handwriting with that of T-S K 1.154 demonstrates their great similarity. The identification is made secure by the pattern created by the stain which runs vertically through both fragments, and matches perfectly the stain running through the top part of T-S K 1.154, thus proving that all three fragments once belonged together, and that the damage caused by water preceded the disintegration of the original rotulus. Moreover, T-S K 1.120 (13.2 by 9.8 cm), which was published as MTKG III, 60 but not identified as forming part of a rotulus, displays the same hand and the same stain, and ends with the first half of Num 21.28, whose continuation may be found on T-S NS 258.153. Thus, it is entirely certain that all four fragments once belonged in a single rotulus, and the original order was (from top to bottom) T-S K 1.120, T-S NS 258.153, T-S NS 258.154 and T-S K 1.154. Throughout the reconstructed rotulus, the right margin is well preserved, but the left margin is preserved only at the top section (T-S K 1.120) and parts of the bottom one (T-S K 1.154). On all four fragments the verso is blank, which means that this rotulus was not re-used by later scribes, perhaps because it was damaged by water at a relatively early stage. It must be stressed, however, that the reconstructed rotulus still begins and ends *in medias res*, so there is no doubt that more pieces are still

[12] This fragment was briefly mentioned by Peter Schäfer, "New Magical Fragments from the Cairo Genizah," in *Proceedings of the Tenth World Congress of Jewish Studies*, Section C/1 (Jerusalem, 1990), pp. 245–252, on p. 248 (Heb.).

missing both at the top and at the bottom of this scroll. If and when more pieces are found, they may allow a more precise reconstruction of this rotulus and of its codicological history.

On the recto of the reconstructed scroll, 89 lines of text are written in a uniform hand, clearly later than that of the Bodleian rotulus (the hand was dated by Judith Olszowy-Schlanger to the (early) eleventh century).[13] The text is written in a mixture of Aramaic and Judeo-Arabic, and some of the recipes use many biblical verses, which are cited in Hebrew. As this rotulus is not well preserved, it is not entirely clear how many recipes were written in the extant section, but one can detect the remains of at least ten different recipes and—as in the Bodleian rotulus—all of them are aggressive in nature. But unlike the Bodleian rotulus, the recipes found here seem much less unusual, and involve many magical practices which are quite standard in Genizah magical recipes. And while some of these recipes display signs of an early origin (including the use of the title קיבלוה for aggressive recipes, for which see Dan Levene's paper in the present volume), others probably stem from the Genizah period itself, or are watered-down versions of older recipes. Thus they are of considerably less historical interest than those of the Bodleian rotulus.

3) T-S K 1.50 + T-S K 1.133: Unlike the two previous items, this rotulus was first inscribed not with magical recipes but with an astrological text, best known as the *Treatise of Shem* in its Judeo-Arabic version (and in a phonetic transliteration which is characteristic of the earlier Judeo-Arabic Genizah fragments).[14] T-S K 1.50 (6.9 cm long and 8.4 cm wide) preserves the section on Gemini, while T-S K 1.133 (25.1 by 8.8 cm) preserves the sections on Cancer, Leo, Virgo and Libra, so there is no doubt that the former once belonged directly above the latter, and that the original scroll was at least twice as long as these two fragments combined. The parchment is, once again, of a yellowish-brown color, and the margins of this rotulus are well preserved, but T-S K 1.50 is missing small pieces of both margins. The hand on the

[13] And note that T-S K 1.120 = MTKG III, 60 was dated by its editors to the tenth century.

[14] For the *Treatise of Shem*, see Reimund Leicht, *Astrologumena Judaica: Untersuchungen zur Geschichte der Astrologischen Literatur der Juden*, [Texts and Studies in Medieval and Early Modern Judaism, 21] (Tübingen: Mohr Siebeck, 2006), pp. 45–55 (who mentions both fragments on p. 46). For another rotulus with an astrological text see British Library 5557A 64, published by Tobi (above, n. 4).

recto was dated by Judith Olszowy-Schlanger to the late-tenth or early-eleventh century. Like the Bodleian rotulus, this rotulus too was re-used by a later scribe, whose hand may be dated to the later eleventh century, but this writer used the stitched up pieces of parchment not as a rotulus but as an horizontal scroll, on which magical recipes were written in columns, each some 6–7 cm wide. T-S K 1.50 preserves one full column of text and the end of another, while T-S K 1.133 preserves three columns of text and the beginning of a fourth one. Thus, the verso of both fragments presents the appearance of a parchment scroll—a very unusual occurrence in Genizah magical texts and in non-biblical Genizah fragments in general—but this is due solely to the re-use of an old rotulus.[15] And in this case, the magical recipes are both aggressive and apotropaic (including a recipe for making an amulet), are written mostly in Judeo-Arabic, and display clear signs of a Muslim influence (including a reference to the lost tribes of ʿAd and Thamud, mentioned in the Qurʾan). We may therefore conclude that both in format and in contents this scroll differs greatly from the two magical rotuli discussed above.

Select Recipes from Bodleian Heb. a3.31

These, then, are the Genizah magical rotuli currently known to me, and it is hoped that more fragments of these rotuli, and more Genizah magical rotuli, will be identified in the future. But as my own interests lie less in codicology and more in the magical texts themselves, the rest of the present paper will be devoted to a closer analysis of some of the magical recipes found on the recto of the Bodleian rotulus. Being one of the oldest Genizah magical texts identified thus far, and displaying a long set of magical recipes which are characterized by their purely Palestinian Jewish Aramaic idiom and many Greek loanwords, this collection offers an excellent point of entry into the world of Jewish magic in late-antique Palestine. And as it is devoted almost exclusively to aggressive magic, it allows us a closer look at a set of practices

[15] For non-biblical Genizah scrolls, which are quite rare, see T-S AS 74.324, published by Marc Bregman, "An Early Fragment of *Avot de Rabbi Natan* from a Scroll," *Tarbiz* 52 (1983): 201–222 (Heb.); T-S K 21.95.S, published by Peter Schäfer, *Geniza-Fragmente zur Hekhalot-Literatur* [TSAJ, 6] (Tübingen: Mohr, 1984), G1 (Hekhalot Rabbati).

which are not as well documented as the apotropaic and medicinal magical practices of late antique Jews.[16] To see this, we may focus on five different recipes, of varying length and sophistication, and analyze the magical technologies utilized in each of them. To facilitate future references to each recipe, I have included the line-numbers from my transcription of the entire rotulus; and in the transcription itself, I have used the following conventions:

() Uncertain reading of one or more letters.
= A letter which I could not read.
[ ] A lacuna in the text, and my reconstruction thereof.
א (bold type) Words which the scribe wrote "in reverse"—i.e., from left to right.[17]

a) The second (but first more or less complete) recipe on the recto of Bodleian Heb. a 3.31 is very short and quite obscure, but its great interest lies in its use of a whole Greek phrase, transliterated in Hebrew characters. The recipe itself runs as follows:

1 (סוף מרשם קודם) אין הווה[לך?
2 קופד אמור על קדרה אלין מלייא והדא [אמור?
3 תיאון פ(נ)יומה קטיגורוס (תחילת המרשם הבא)

1 (end of prev. recipe) (vac) If [you?] have
2 meat?, say over a pot these words and [say] this
3 TY'WN PN?YWMH QṬYGWRWS (vac) (beg. of next recipe)

Unfortunately, the aim of this short recipe—which is found at the very top of the rotulus, where much of the left margin was eaten away—is not very clear. If QWPD means "a piece of meat" (from the Greek

[16] For the dearth of aggressive magic in the Jewish literature of Late Antiquity, apart from *Sefer Ha-Razim*, see Philip S. Alexander, "*Sefer ha-Razim* and the Problem of Black Magic in Early Judaism," in Todd Klutz (ed.), *Magic in the Biblical World: From the Rod of Aaron to the Ring of Solomon* [JSNT Suppl. 245] (London: T&T Clark, 2003), pp. 170–190, whose conclusions will have to be revised in light of the Bodleian rotulus. See also Yuval Harari, "If You Wish to Kill A Man: Aggressive Magic and the Defense Against It in Ancient Jewish Magic," *Jewish Studies* 37 (1997): 111–142 (Heb.), and Dan Levene's paper in the present volume.

[17] For this magical practice, common especially in aggressive magic, see Joshua Trachtenberg, *Jewish Magic and Superstition: A Study in Folk Religion* (New York: Behrman's Jewish Book House, 1939) (repr. Philadelphia: University of Pennsylvania Press, 2004, with an Introduction by Moshe Idel), pp. 116, 126 and 129; Joseph Naveh, "Lamp Inscriptions and Inverted Writing," *IEJ* 38 (1988): 36–43.

kopadion), as in rabbinic literature, then we might have here a spell to be uttered over a pot with meat, to make it cook faster, and such recipes are well attested in ancient magical texts.[18] If, on the other hand, QWPD is derived from the Aramaic root QPD, "to be angry," then we might have another aggressive magical recipe (which would fit the nature of almost all the other recipes in this rotulus), with an aggressive spell uttered over a pot (full of water, which is then poured near the victim's home?). But be this as it may, the spell to be uttered is extremely interesting, for it consists of three Greek words, and may originally have consisted of four words, with one word now lost at the end of line 2. Of these Greek words, TY'WN is almost certainly Greek, *theos*, "god," either in the accusative singular (*theon*) or in the genitive plural (*theôn*).[19] The third word, QṬYGWRWS, certainly is the Greek *katêgoros*, which is quite common in rabbinic literature (but note how here it preserves the nominative ending, whereas in rabbinic literature it often loses it and becomes קטיגור), and means "accuser, prosecutor."[20] The second word, on the other hand, is less certain—it may be the Greek *phainomai*, "I appear, I come," but is more likely to be *pneuma*, "spirit." In the first case, the phrase might mean something like "I come as an opponent of the gods," whereas in the second case we might either assume a missing preposition at the end of line 2 and translate the whole sequence as "among the gods, the spirit is an accuser," or assume a missing noun (or nothing missing) and translate "(X,) a spirit of gods, an accuser."[21] But be this as it may, it seems quite clear that we are dealing here with a short, but complete, Greek sentence, which would be quite like the famous transliterated Greek prayer in *Sefer Ha-Razim*, or the shorter Greek dismissal for-

---

[18] For קופד, see Samuel Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch und Targum*, 2 vols. (Berlin, 1898–99) (repr. Hildesheim: Georg Olms, 1964), vol. 2, p. 516; Michael Sokoloff, *A Dictionary of Jewish Palestinian Aramaic of the Byzantine Period* (Bar-Ilan: Bar-Ilan University Press, 1990), 2nd ed., 2002, p. 483. For such magical practices, see Hippolytus, *Ref.* 4.33.2, and R. Ganschinietz, *Hippolytos' Capitel gegen die Magier (Refut. Haer. IV 28–42)* [Texte und Untersuchungen 39/2], (Leipzig: Hinrichs, 1913), p. 49, and note a similar practice attributed to Rav Naḥman's daughters in bt Gitt 45a.

[19] And note the sequence *theon ha-gadol amona* in MSF, A22, briefly discussed in Bohak, *Ancient Jewish Magic*, p. 257.

[20] See Krauss, *Lehnwörter*, p. 524; Sokoloff, *Palestinian Jewish Aramaic*, p. 485.

[21] A search for similar expressions in the *Thesaurus Linguae Graecae* CD-ROM (version E, which also includes the Greek Magical Papyri), came up with nothing that seemed relevant for the present context, although *pneuma theôn* indeed is attested, for example in Philostratus, *VAT* 7.34.

mula found in the same text, or the Greek formulae which are found (together with their Aramaic translations), in the "sword" section of the *Sword of Moses*.[22] In all these cases, the reconstruction of the original Greek sequences is hampered by the difficulty of reconstructing Greek formulae transliterated in an alphabet which was utterly unsuitable for this task. In the present instance, the difficulty is further exacerbated by the damaged state of our text and by the uncertainty about the nature of the recipe as a whole (although the presence of *katêgoros* certainly argues in favor of an aggressive context), which makes it less clear what kind of Greek phrase we might expect here. But in all these cases, the very presence of Greek sentences and phrases attests to the extensive Greek influences on the Jewish magical texts of Late Antiquity, including those written in Hebrew and in Aramaic.

b) The second recipe to be analyzed here, which is the fourth recipe on the recto of the Bodleian rotulus, involves an interesting example of a much debated issue in the study of late-antique Judaism, namely, the worship of angels, in this case on a *do ut des* basis, whereby the user of this recipe offers a specific angel various gifts, and explains what he or she would like to receive in return:

11 (סוף מרשם קודם) לח[
12 דאיבר וז' פרתותין וז' בולין דמלח וא(ד)[
13 ואמור עליהון ז'ב ז' לך אנה קרי פוסיס[
14 מלאכה רבה הכמה דאנה יהיב לך לחם מן[לחמי]
15 ומלח מן מלחי וממון מן ממוני כן תתן ל(ש')[ו'ש'
16 ריוי מן ריוך וכיוב מן כיובך ושיקוץ מן (ש)[יקוצך]
17 וניאוף מן ניאופך וניצוץ מן ניצוצך בשם [
18 כלקיטס ובשם סמאל סטנה רבה בפריע [
19 הדן בויכל (תחילת המרשם הבא)

11 (end of prev. recipe) (vac) For [. . . take . . .
12 of lead and 7 chunks[23] of bread and 7 lumps of salt and [
13 and say over them 7 times,[24] to you I call, PWSYS[

[22] For these, see M. Margalioth, *Sepher Ha-Razim: A Newly Recovered Book of Magic from the Talmudic Period* (Tel Aviv: Yediot Aharonot, 1966), pp. 12–13 (Heb.); Claudia Rohrbacher-Sticker, "From Sense to Nonsense, From Incantation Prayer to Magical Spell," *JSQ* 3 (1996): 24–46; Bohak, *Ancient Jewish Magic*, p. 179, n. 92.

[23] For פרתותין, see Syriac *prtwt'*, "broken bits of bread, crumbs, fragments," in R. and J. Payne Smith, *A Compendious Syriac Dictionary* (Oxford: Clarendon Press, 1903), p. 466.

[24] For זבנין, see Sokoloff, *Palestinian Jewish Aramaic*, p. 171.

14 the great angel, just as I give you bread from my [bread]
15 and salt from my salt and money from my money, so shall you give N[N
16 a dispute?[25] from your dispute? and a pain from your pain and an abomination from your ab[omination]
17 and a fornication from your fornication and a spark from your spark; in the name of [
18 KLQYṬS, and in the name of Samael the great satan, quickly [
19 this, for pain(?) (vac) (beg. of next recipe)

Unlike the first recipe we analyzed, here there are few problems of interpretation, in spite of the absence of a few letters at the end of each line.[26] Here the practitioner is instructed to take lead, bread and salt, all in groups of seven (a common typological number in such recipes), to offer these to an angel, and to ask that angel to dispense some of his special qualities in return and send his dispute, pain, abomination, fornication and spark upon the person's opponent. Such a ritual must be seen in the light of the recurrent claims in ancient Christian literature concerning the Jewish worship of angels, and the recurrent rabbinic condemnations of such practices, which also are attested in *Sepher Ha-Razim*.[27] In the present recipe, there is no doubt that the practitioner is appealing to a powerful evil angel, and is offering that angel monetary and alimentary offerings in return for his services. There also is no doubt that the angel is adjured by (the hitherto unattested KLQYṬS and by) "Samael the great satan," who certainly is seen here as supervising the powers of evil.[28] In their search for aggressive powers, some

---

[25] For ריו, see Sokoloff, *Palestinian Jewish Aramaic*, p. 523, for the meaning "appearance, form." Such a meaning is not impossible here, but a meaning influenced by the Hebrew ריב, "strife, contest, dispute," seems more likely. Another possibility would be that the original text read דיוי, or דוי, "sorrow."

[26] There are, however, some obscure points, such as the meaning of the last word of our recipe, "for pain." This might be a specification of the recipe's aim, "for (causing) pain," and placing a recipe's aim at the very end is paralleled both in this rotulus (in line 64), and in other Genizah magical texts. But in such a case, what should we make of the word]לח with which the recipe opens, and which seems to state its aim, "For X"?

[27] See Margalioth, *Sepher Ha-Razim*, pp. 10–16; Michel-Yves Perrin, "'Rendre un culte aux anges à la manière des Juifs': Quelques observations nouvelles d'ordre historiographique et historique," *Mélanges de l'École Française de Rome: Moyen Âge* 114 (2002): 669–700.

[28] For Samael, see Gershom Scholem, *Kabbalah* (Jerusalem: Keter, 1974), pp. 385–388; Günter Stemberger, "Samael und Uzza: Zur Rolle der Dämonen im späten Midrasch," in Armin Lange, Hermann Lichtenberger and K. F. Diethard Römheld (eds.), *Die Dämonen—Demons: Die Dämonologie der israelitisch-jüdischen und frühchristlichen*

Jewish magicians clearly were willing to cross the line separating the worship of the One True God from angelolatry, and even from the worship of the powers of darkness. This does not necessarily mean that our recipes assume a dualistic theology, with Samael as God's opponent, but it does imply that they assume that it is to Samael and his ilk that one should turn when one seeks to harm a fellow human being.

c) Another interesting recipe in the Bodleian rotulus (the eleventh in the extant portion) makes use of a myth which seems to be unattested elsewhere, at least in Jewish sources. This recipe runs as follows:

64 (סוף מרשם קודם) אסר לרוחה [
65 ואסר אנה ל'ש'ו'ש' כמה דאסירין [
66 לעלם כן אסיר פ' לעלם וחתים לדרי[דרין? ו...לא
67 יהווי לה מן ברנש בשם אפס פפא נ(ט)[
68 עולמים ובשמה דקטריאל מלאכה דנ(ח)[ת ל...
69 ענה ולבקרת תורייה ואסר תורין דכרין [
70 כן אסור זרעה ד'ש'ו'ש' וסילוניה דלא ימר[...ו...
71 דלא תהלך עד זמן דנבעי ונשרי יתה בש[ם
72 פצציאל ובשם חצציאל ובשם קטריאל מלא[כה
73 כן אסור לעלם וחתום לדרי דרין וסב מחט דפרזל
74 ואמור עליה זמ' ז' ובזמנה שביעייה הב ראשה
75 דמחטה בעוקצה וכרכה בכתן דלא עלת ל(א)[
76 וטמור בזווי צניעה שרייה אפק מחט[ה לשימשה?
77 ואשווי מחטה (תחילת המרשם הבא)

64 (end of prev. recipe) (vac). A binding for a spirit [
65 and I bind ŠWŠ just as [ ] are bound [
66 forever, so is N bound forever and sealed for all gene[rations?
67 shall have from no one. In the name of 'PS PP' NṬ[
68 forever, and in the name of Qaṭriel the angel who came do[wn for
69 small cattle and for the herding of bulls, and he bound male bulls [
70 so shall you bind the sperm of ŠWŠ and his sperm canal,[29] that it / he shall not [
71 that she / it shall not walk until the time that we shall ask (for it) and loosen him, in the na[me of
72 Paẓaẓiel and in the name of Ḥaẓaẓiel and in the name of Qaṭriel the ang[el
73 so bind forever and seal for all generations. And take an iron needle

---

Literatur im Kontext ihrer Umwelt. The Demonology of Israelite-Jewish and Early Christian Literature in Context of their Environment (Tübingen: Mohr Siebeck, 2003), pp. 636–661.

[29] For סילון (Greek *sôlên*, "tube") used for the sperm canal of the male organ, see Krauss, *Lehnwörter*, p. 383.

74 and say (it) over it 7 times, and in the seventh time put the head
75 of the needle in its tip (sic) and wrap it in linen that did not go into [
76 and bury (it) in a hidden place. (Its) loosening:[30] Take the needle out [to the sun?
77 and straighten the needle out. (vac) (beg. of next recipe)

Like several other recipes in the Bodleian rotulus, this one too seeks to "bind" the male organ of its victim, a common magical practice in Late Antiquity, and one that also was known to, and discussed by, the rabbis of late-antique Palestine.[31] It does this by way of an adjuration, accompanied by an interesting *historiola* (a mythical event used as a precedent or an analogy for the desired outcome of the magical procedure) and an intriguing ritual whose symbolic meaning is quite manifest. On the ritualistic-symbolical level, we see the practice (attested in other cultures as well) of "binding" a male victim by twisting a needle (whose phallic connotations are quite obvious) and turning it into a closed circle, with its tip inside its own eye (and thus unable to penetrate any other object).[32] In this recipe, as in several other recipes in this rotulus and in other Genizah recipe books, and in the *Sword of Moses* as well, we also find instructions on how to loosen this piece of aggressive witchcraft once it is no longer deemed necessary—in this case, by taking the needle out of the dark spot in which it was buried and straightening it up, in the assumption that the same would now happen to the victim's virile organ. On the mythical side, we have here a reference to the angel Qaṭriel (whose name is derived from the Aramaic root קטר, "to bind" + the standard ending -el, and who appears quite frequently in ancient Jewish magical texts), who came down from heaven to herd small cattle and bulls and "bound" (i.e., castrated?) the male bulls (a well known symbol of virility in many cultures, ancient and modern); just as this had happened *in illo tempore*, so shall the hapless victim be "bound" and rendered impotent as the practitioner wishes. The use of such *historiolae* is extremely common in ancient and medieval magical texts, including the Jewish ones, but whereas most Genizah magical recipes utilize well worn biblical stories as precedents—and especially the story of Sodom and Gomorrah, to

[30] For שרייה, see the use of שריא, and שריא דגברא in MTKG III, 61 (= T-S K 1.162), 1c/25–1d/4.

[31] For the "binding" of bridegrooms, see Bohak, *Ancient Jewish Magic*, p. 396.

[32] For a possible medieval Latin parallel, see Catherine Rider, *Magic and Impotence in the Middle Ages* (Oxford: Oxford University Press, 2006), p. 145.

which we shall return below—the composer of this recipe made use of a non-biblical, and perhaps even non-Jewish, myth.[33] Further research might shed more light on the possible origins of this myth, which does not seem to be an ad hoc invention but a casual reference to a myth which was circulating in the magician's own world.

d) The last two recipes in the extant part of our rotulus, and therefore also the best preserved, are also the most interesting. The first of these is described as intended to make peace between a man and a woman, but in fact is an aggressive / erotic magical recipe, involving the adjuration and slaughtering of a white cock:

117 (סוף מרשם קודם) למרמי שלם [בין]
118 גבר לבין איתה בס כל לוגנרת רווח עבשאו (יול)[ע?
119 דע אוהד נייחב רומאו אנה פ'ב'פ' משבענה
120 לך תרנגלה בשמה דמלכה עלייא דיתיב על
121 כורסייה דדינה: המך תאד שיבך ינבל השנא
122 הריעבלו נך שבכתי ש'ו'ש' במאתין מ'ח' אברין
123 דאית בה ונעמתה תהווי מכיכה קודם פ'ב'פ'
124 בשמה דכבשיאל דכבש ארעה בחיי(ל)ה ותהומ(ה)
125 בתוקפיה מלין אמרית עובדין יתעבדון וכ(ל)[אשר?
126 דיברתי יצליח: בסו נולטיף דכסיט וכת' א[לין מלייה
127 בגווה: בסו דדוג נם יונאם הרבנד [בהו היתי
128 הלטיפב עוזבו הלגנרת הבו (!) הבתך הוינ[ב בהו
129 (ה)פושן דפיל לגו מעוי וכוף ראשה: הלגנר(ת)[ד]
130 יועמל רומטו תשרפב התחרוא (ו)[הב?] עלוי כיף
131 דלא יפק יתה חיווה ואשבע עלוי אלין מלייה

117 (end of prev. recipe) (vac) To make peace [between?
118 a man and a woman, take a white cock and adjure over it
119 while it is still alive and say, I, NN, adjure
120 you, cock, in the name of the exulted king who sits upon
121 the throne of judgment. Just as you are subdued by men
122 and by cattle, so shall ŠWŠ be subdued by the two hundred 48 limbs

[33] By way of comparison, I note Mousaieff bowl M163 (edited by Dan Levene, *A Corpus of Magic Bowls: Incantation Texts in Jewish Aramaic from Late Antiquity* [The Kegan Paul Library of Jewish Studies] (London: Kegan Paul, 2003), p. 123): והיכדין דאיתכביש רימון תורא קדמאה, "…and just as RYMWN, the primordial bull, was subdued." I also note the traditions about the eschatological punishment of the Sun and the Moon "like castrated bulls," as cited and discussed by David J. Halperin and Gordon D. Newby, "Two Castrated Bulls: A Study in the Haggadah of Kaʿb al Aḥbâr," *JAOS* 102 (1982): 631–638. One may also go further afield, and cite the stories about Hercules and the bull or the Mithraic motif of the scorpion attacking the bull's genitals, but such parallels do not seem to elucidate our recipe.

123 that are in her, and her tune?[34] shall be humbled before NN
124 in the name of Kabshiel who subdued the earth by his strength and the abyss
125 by his might. Words have I spoken, deeds shall be done, and all [that?
126 I have spoken shall succeed. And take a tin lamella,[35] and write th[ese words
127 upon it. And take a thread from the clothes of the man [and place it
128 in the lamella and tear the cock apart and place the writing inside it [and place
129 fine flour[36] of ??? inside its intestines and twist the head of the cock
130 to its intestines and bury it at a crossroads. And [place?] upon it a rock
131 so that no animal shall dig it out, and adjure upon it these words.

Once again, we are faced with an aggressive magical recipe, this time intended to subdue a person and make him amorously or sexually submissive to another person of the opposite sex; and once again, the recipe involves both a ritual and an adjuration. On the ritual level, the user is instructed to take a white cock, utter an adjuration over it, tear it apart, and place inside its intestines a tin lamella with the adjuration, a thread from the victim's clothes (what James Frazer would call "magic of contagion"), and fine flour. The cock is then twisted into a kind of a knot (an action which certainly is intended as analogous to what would happen to the victim should s/he fail to comply), and buried at the crossroads, a common location for the practice of magic rituals in many ancient cultures, and perhaps also symbolizing here the desired meeting of the man and the woman.[37] The use of white cocks in aggressive magical recipes seems to have been quite common, and one may cite parallels from other Genizah magical texts, from *Sepher Ha-Razim* (for which see Ithamar Gruenwald's paper in the present

[34] For נעמה, see Sokoloff, *Palestinian Jewish Aramaic*, p. 354.

[35] For פיטלון, see Bohak, *Ancient Jewish Magic*, p. 374, n. 64; for כסיט = כסיטרון = Greek *kassiteros*, see Krauss, *Lehnwörter*, p. 556 (where the word is consistently spelled with a *qof*, not a *kaf*).

[36] For נשופה, see Jonas C. Greenfield, Michael E. Stone and Ester Eshel, *The Aramaic Levi Document: Edition, Translation, Commentary* [Studia in Veteris Testamenti Pseudepigrapha, 19] (Leiden: Brill, 2004), p. 82 (= ALD 8:6): נישפא בליל במשחא, "fine meal (Gr. *semidalin*) mixed with oil," with the editors' note on p. 176 (I am grateful to Matthew Morgenstern for this reference); I am still puzzled by the word פיל, but cf. Sokoloff, *Palestinian Jewish Aramaic*, p. 431. Note also the appearance of פילון as an ingredient in several Jewish magical texts, including Bodleian Heb. a 2.2.

[37] For Greco-Roman examples, see S. I. Johnston, "Crossroads," *ZPE* 88 (1991): 217–224, esp. 223–224; for rabbinic examples, see bt Yoma 84a; Pess 111a.

volume), from the Babylonian incantation bowls, and even from the Babylonian Talmud.[38] Most intriguing is the almost exact parallel in the *Sword of Moses*, in a recipe for sending dreams upon someone, which involves placing an inscribed silver lamella in the mouth of a cock, slaughtering it, twisting its body so that its mouth will be between its thighs and burying it at the foot of a wall.[39] But with such parallels in mind it is also interesting to note the practical mindset displayed by the author of our recipe, who is worried lest the smelly carcass might be dug out and eaten by some animal, thus dissolving the spell (or, at least, exposing it for all to see, and perhaps compromising both the client and the magician), and therefore instructs the user to place a rock over the burial place of the mutilated rooster. On the mythical level, we find in the adjuration itself a reference to "Kabshiel who subdued the earth by his strength and the abyss by his might." This angel, whose name is derived from the root כבש, "to subdue" + the standard ending -el, was extremely popular in ancient Jewish aggressive magic, and even the entire formula found here is closely paralleled in other Genizah magical texts and clearly was quite common in late antique Jewish magical texts.[40] Embedded in the adjuration we also find an interesting expression, "Words have I spoken, deeds shall be done, and all [that?] I have spoken shall succeed," which provides an interesting summary of the magician's mindset and which—judging

133 PR'HWRWN[42] from a spring, and water of cooked wh[eat?]
134 and water of boiled lentils and the root of aloe[43] and the urine[44] of a don[key
135 and the urine of a black bull and your own urine, and sa[y
136 over them 7 times, You are the power of the great God,
137 you are the spirit of the world [by which?] God has overturned Sodom
138 and Gomorrah Adama and Zeboim, so shall you overturn and uproot
139 and exile ŠWŠ from his house and from his place and all the sp[irits
140 and demons and harmers who are in charge of sin and of [
141 and of turbulence shall come upon NN and shall cause him grief and […
142 him and exile him from his home, in the name of Nuriel and Hap[khiel?

[41] I am not sure what מיין חטיפין really means, but the instruction to use מים חטופים appears in other Jewish magical texts as well, including, for example, the *Shimmush Tehillim* instructions in MTKG III, 81 (= T-S NS 216.23) 1a/12 (and see the editors' note on p. 322); T-S NS 322.95, and several different recipes in MS Sassoon 56 = NYPL 190.

[42] פראהורון clearly is a Greek word, but I am not yet sure which one, and the transliteration may be somewhat faulty.

[43] For צברה, see Syriac *ṣbr'*, "the aloe," in Payne Smith, *Syriac Dictionary*, p. 473.

[44] For תונין, see Syriac *twn'*, "urine," in Payne Smith, *Syriac Dictionary*, p. 608.

143 Suri'el, those who serve the angel of death. And sprinkle bef[ore
144 his home. (vac) (beg. of next recipe)

As in the previous examples, this aggressive magical recipe—intended to harm a person and exile him or her from their home—involves both a ritual and a mythical component. On the ritual side, a smelly concoction is prepared from six liquids and a root (the inclusion of which may be due in part to the similarity between "root" (עקר) and "uproot" (here תעקרון), and perhaps also to the similarity between צברה, "aloe, " and רבץ, "to sprinkle"), and once the adjuration is uttered over it, it is sprinkled in front of the house of the intended victim. On the mythical side, we get an elaborate oral adjuration in which the unsavory concoction is equated with the *dynamis* of the great God, and with the spirit of the world by/with which God rained sulfur on Sodom, Gomorrah, Adama and Zeboim and brought about their utter destruction (see Genesis 19). In a similar manner, the magician insists, shall the liquids manipulated here overturn and uproot and exile the victim from his or her home. And as if this was not enough, the spell adds the wish that all kinds of harmful spirits would descend upon the victim and harm him and exile him from his house, and all this in the name of Nuriel (whose name is made of "fire" + -el ending) and probably Hapkhiel (whose name is derived from the root HPK, "to overturn" + -el ending), who are here identified as part of the entourage of the angel of death. The use of Sodom and Gomorrah as a *historiola* in Jewish magical recipes—in Hebrew, Aramaic and Greek, and later in Judeo-Arabic as well—is extremely common in Jewish magical texts, as is the identification of a substance used by the magician with substances used *in illo tempore* to destroy the troublesome cities.[45] Similarly, the appeal to the powers of evil should no longer surprise us, as we have found it in other recipes on this rotulus. But the use of the urine of several animals, and of the magician's own urine, is—as far as I know—quite unattested in the Jewish magical tradition, and proves once again the relatively "daring" nature of the recipes found in the Bodleian rotulus. Finally, the sprinkling of the "adjured" substance in front of the victim's home, yet another example of "contagious magic," is well attested in other sources too; whether

[45] For a fuller discussion of this point, see Bohak, *Ancient Jewish Magic*, pp. 312–314.

the stench would have made the victim leave his or her home is quite doubtful, but I suspect it could have made them aware that some foul act was being perpetrated against them.

Summary

To sum up: While rotuli and rotuli fragments are relatively rare in the Cairo Genizah, and magical rotuli extremely rare, those magical rotuli which happened to survive turn out to be of great historical importance. This is especially true of Bodleian Heb. a3.31, which is one of the oldest available Genizah magical texts, is entirely based on much earlier Palestinian Jewish recipes which seem to have been neither "updated" nor censored in any significant manner, and provides important evidence on the aggressive magical practices of the Jews of late-antique Palestine and early medieval Cairo. The significance of this evidence may be highlighted by noting that among many hundreds of Genizah magical texts transcribed within the framework of my research project, not a single one provided as many early Jewish magical recipes in such a good state of preservation and with such a high concentration of very "daring" aggressive magical recipes. Moreover, my search for parallels for the recipes contained in this rotulus did not come up with much, neither inside the Genizah nor outside it, which seems to imply that most of these magical recipes were not re-copied by later Jewish practitioners (perhaps because they were deemed too offensive in their blatant transgressions of some biblical and rabbinic injunctions and in their frequent appeals to the forces of darkness), and would have been utterly lost were it not for the chance preservation of this rotulus. In the future, more fragments of the above-listed rotuli, and of other magical rotuli, might be identified, and further enhance our knowledge of an important stage in the textual transmission of the Jewish magical tradition from Late Antiquity to the early Middle Ages.

Babylonian Jewish Magic in Late Antiquity
Beyond the Incantation Bowls

Gideon Bohak

Babylonian Jewish Magic and the Aramaic Incantation Bowls

Upon their first discovery, in 1853, the Babylonian incantation bowls seem to have aroused little scholarly attention.[1] A few studies were devoted to the edition and interpretation of several bowls, and there was some discussion of their chronology, their original mode of use, their relationship with rabbinic Judaism and their possible overall significance. But the scholars who studied the bowls were mostly busy establishing the correct reading and understanding of the texts inscribed upon these clay bowls, a task that proved exceptionally difficult, especially at a time when very few bowls were known, and when publications were not yet accompanied by images of the bowls themselves, so that different scholars had access to different bowls – in Paris, Cannes, London, Berlin, Philadelphia and elsewhere.[2] And yet, going through these earlier publications, one has a feeling that none of the scholars involved realized that these humble clay bowls would one day furnish a

1 I dedicate this study to Professor Shaul Shaked, mentor, friend, and path-breaking scholar, whose immense contributions to the study of Jewish magic, and especially of the Aramaic incantation bowls, made the present study possible.

2 For the most important publications, see the bowls published by Thomas Ellis in Layard, *Discoveries*, pp. 509–526; Schwab, 'Une coupe d'incantation'; idem, 'Les coupes magiques'; idem, 'Coupes à inscriptions magiques'; idem, 'Deux vases'; Hyvernat, 'Sur un vase judéo-babylonien'; Wohlstein, 'Über einige aramäische Inschriften'; Lacau, 'Une coupe d'incantation'; Myhrman, 'An Aramaic Incantation Text.' Most, but not all, of these bowls have since been re-edited in the more recent publications listed below. Here and in what follows, I essentially ignore the Syriac and Mandaic incantation bowls, since my focus in on Babylonian *Jewish* magic.

major source for the study of late-antique Mesopotamia in general, and of late-antique Babylonian Jewish culture in particular.[3]

It was only sixty years after the initial publications, and just over a full century ago, that Montgomery's exemplary edition of the Nippur incantation bowls in the University of Philadelphia's Museum provided other scholars with a sound textual basis on which to base their own analyses of unpublished bowls and of the bowl phenomenon as a whole.[4] This line of research was continued by Montgomery's disciple, Cyrus Herzl Gordon, and by Gordon's own disciples, such as Mark Geller and Edwin Yamauchi.[5] But It gained new prominence with the publication of the two volumes of Aramaic magical texts by Joseph Naveh and Shaul Shaked, in 1985 and 1993, and the subsequent publications of important corpora by Shaul Shaked, Dan Levene, Christa Müller-Kessler and many others.[6]

Today, we are on the threshold of a new era in bowl studies, with the appearance of the first volume of the Schøyen collection of incantation bowls, edited by Shaul Shaked, James Nathan Ford and Siam Bhayro.[7] Once all projected nine volumes of the Schøyen bowls are published (and especially the five volumes devoted to bowls written in Jewish Babylonian Aramaic), the corpus of published Aramaic incantation bowls will become one of the largest Jewish textual corpora from Antiquity, almost as large as the Babylonian Talmud itself. And even this will not end the stream of publications, since more bowls surface on the antiquities markets all the time, and many bowls in museums and

3 They are mentioned only briefly by Blau, in *Das altjüdische Zauberwesen*, p. 154, note 2, and idem, 'Amulet,' p. 547. Thus, even the greatest scholar of Jewish magic of the late nineteenth century was not yet aware of their importance.

4 Montgomery, *Aramaic Incantation Texts*.

5 For the most important publications, see Gordon, 'Aramaic Magical Bowls'; idem, 'Aramaic and Mandaic Magical Bowls'; idem, 'Aramaic Incantation Bowls'; idem, 'Magic Bowls in the Moriah Collection'; Rossell, *A Handbook*; Jeruzalmi, *Les coupes magiques*; Isbell, *Corpus*; Geller, 'Four Aramaic Incantation Bowls'; and idem, 'Eight Incantation Bowls.'

6 See Naveh and Shaked, *Amulets and Magic Bowls*; eidem, *Magic Spells and Formulae*; Segal, *Catalogue*; Levene, *A Corpus*; idem, *Jewish Aramaic Curse Texts*; Müller-Kessler, *Die Zauberschalentexte*; Faraj, *Coppe magiche*; and Bhayro, Ford, Levene and Saar, *Aramaic Magic Bowls*.

7 Shaked, Ford and Bhayro, *Aramaic Bowl Spells*.

private collections remain unpublished.[8] In fact, no one really knows how many unpublished bowls are out there already, and once Iraq regains its former stability, new archaeological excavations are bound to lead to the discovery of many more Aramaic incantation bowls.

The Babylonian Aramaic incantation bowls are an important source for the study of Babylonian Jewish magic and of Babylonian Jewish culture as a whole.[9] They present four major advantages over most other types of textual sources currently at our disposal for the study of ancient Jewish culture. The first is that, in the world of the bowls, there seems to be a close connection between a bowl's language and script and the ethnic or religious identity of its producers. At the very least, one may definitely assume that bowls written in Aramaic and in the square script were produced by Jews (though not necessarily for Jewish clients). The hundreds of bowls in this category that have been published thus far display many signs of the Jewish origins of their producers, and no Aramaic bowl displays clear signs of having been produced by a non-Jewish practitioner. This gives the Aramaic incantation bowls a vast advantage over such magical texts as are found, for example, in the Greek magical papyri, some of which may have been produced by Jews, but most of which probably were not, even if they display some Jewish influence. More important still, the Aramaic incantation bowls provide a much more reliable body of evidence for the study of late-antique Jewish culture than the massive body of evidence assembled by

8 For some of the most recent publications, see Gorea, 'Trois nouvelles coupes'; Moriggi, 'Aramaean Demons'; idem, 'Two New Incantation Bowls'; Abousamra, 'Une nouvelle coupe'; Abousamra and Lemaire, 'Bol magique'; Faraj, 'An Incantation Bowl'; Ford, 'A New Parallel'; Ford and Ten-Ami, 'An Incantation Bowl'; Levene and Bohak, 'A Babylonian Jewish Aramaic Incantation'; Levene and Ford, 'For Aḥata-de-'abuh Daughter of Imma'; al-Jubouri, 'An Aramaic Incantation Bowl'; idem, 'An Aramaic Incantation Text'; idem, 'A New Aramaic Incantation Bowl'; Fain, Ford and Lyavdansky, 'Aramaic Incantation Bowls'; and cf. Frankfurter, 'Scorpion/Demon.'

9 For detailed surveys of the bowls and their significance, see Yamauchi, 'Aramaic Magic Bowls'; Isbell, 'The Story'; Shaked, 'Popular Religion'; idem, 'Jews, Christians and Pagans'; idem, 'Magical Bowls and Incantation Texts'; Levene, *Curse or Blessing*; Harari, 'On the Trail,' pp. 59–67; idem, *Jewish Magic*, pp. 234–251; Morony, 'Magic and Society'; idem, 'Religion'; Bohak, *Ancient Jewish Magic*, pp. 183–193; and Müller-Kessler, 'Zauberschalen und ihre Umwelt.'

Erwin Goodenough for his monumental work on Jewish symbols, most of which probably is non-Jewish to begin with.[10]

A second advantage of the Babylonian incantation bowls is that they come from Babylonia itself and are late-antique objects, not medieval copies of late-antique texts. This means that, unlike many other bodies of ancient Jewish literature (such as most of the Apocrypha and Pseudepigrapha), their chronological and geographical coordinates are well known. In this respect, the bowls may even help us peg down some texts whose original contexts are far more obscure. Thus, to give just one example, when we find Hekhalot-related motifs, and even rather extensive passages known to us from the Hekhalot literature, in some of the Babylonian incantation bowls, we can be certain that these motifs and textual units were already in circulation in late-antique Babylonia.[11] This does not necessarily mean that they began their life there and not in Palestine, and it does not really tell us how much older they may have been, but it does provide a firm *terminus ante quem*, and one specific geographical and social context, for the early transmission of at least some textual components of the Hekhalot literature. This evidence is of great importance, since it dates to long before the references to the Hekhalot literature in the responsa of Sherira Gaon and Hai Gaon or in the *Scroll of Aḥimaaz*, and even longer before the earliest Geniza fragments of this literature, not to mention the much later manuscripts of European origin.[12]

The third reason why the bowls are such an important source is that they come in great abundance and that each bowl carries a relatively long text. Unlike tombstones, for example, which often come in great abundance but tend to be quite short, and in many cases highly formulaic and thus extremely repetitive, a typical bowl provides us with the equivalent of half a page of printed text; and while many textual

10 See Goodenough, *Jewish Symbols*.

11 For a pertinent example, see Bohak, 'Observations,' pp. 220–222; for the formula discussed there, see now Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, JBA 9 (MS 2053/183), ll. 16–17. The pioneering study in this field was Shaked, 'Peace Be upon You,' and cf. idem, 'Jewish and Iranian Visions'; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 23–27; and Müller-Kessler, 'Eine ungewöhnliche Hekhalot-Zauberschale.'

12 For a useful introduction to these complex issues, see Boustan, 'Study of Heikhalot Literature.' For the earliest manuscripts of the Hekhalot literature, see Bohak, 'Dangerous Books.'

units recur in more than one bowl (often with some variation between the different parallels), the number of different textual units found in the entire corpus amounts to many hundreds. These units range in length from a line or two to ten or twelve lines of printed text, and they often contain one or two larger spells along with a plethora of smaller textual units and recurrent formulae.[13] And they have much to tell us about many aspects of Sasanian Jewish society and culture, including language, onomastics, family structures, levels of literacy, Jewish/non-Jewish cultural and social contacts, and even the knowledge and use of such texts as the Hebrew Bible, the Mishna and the Jewish liturgy. For scholars used to reconstructing ancient cultures from their scanty textual remains, this is an extremely important body of evidence, which has not yet been utilized for all that it has to offer.

Finally, a fourth major advantage of the bowls is that they clearly stem from more than one site. This is a rather sensitive issue, since most of the bowls that have come out of Iraq over the last two decades were looted from unknown locations, but those that were excavated in more peaceful times often are of a known provenance. A full study of all these different findspots, and of the possible differences between bowls found in different locations, has yet to be carried out, but enough is known about bowls from Babylon (such as those published by Ellis), Nippur (such as those published by Montgomery), Khafajah, Kish, Tell Baruda (Ctesiphon), Bidjan, Tel Omar (Seleucia), Borsippa and some sites in Western Iran to assure us of their wide geographic distribution.[14] Thus, it is clear that these bowls are not the product of some aberrant social

13 For a pioneering attempt to sort out the different *types* of textual units found in the bowls and disentangle the logic of their internal arrangement, see Shaked, 'Transmission and Transformation of Spells'; see also Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 8–13.

14 See Cook, 'An Aramaic Incantation Bowl' (Khafajah); Gordon, 'Aramaic Incantation Bowls,' pp. 129–130 and pp. 276–280 (Kish); Franco, 'Five Aramaic Incantation Bowls' (Tel Baruda); Gawlikowski, 'Une coupe magique' (Bidjan, near Anah); Waterman, *Preliminary Report*, pp. 61–62 (Tel Omar); Harviainen, 'An Aramaic Incantation Bowl' (as this bowl was bought in Borsippa, and not excavated in situ, its provenance is less certain). For bowls from Western Iran, see Yamauchi, 'Aramaic Magic Bowls,' p. 512. For bowls found in other locations, see, for example, Faraj and Moriggi, 'Two Incantation Bowls,' pp. 72 and 77. And note the map provided by Müller-Kessler, 'Zauberschalen und ihre Umwelt,' which includes the Syriac and Mandaic evidence as well as the Jewish Aramaic bowls.

group or of specific local circumstances, but objects produced in great numbers, by many different producers, in many different locations, for numerous clients. As such, they represent a phenomenon that clearly is very different from that represented by the Dead Sea Scrolls, for example, or by the Gnostic library found at Nag Hammadi, each of which may have been intended for the use of one rather small group of potential readers. With the bowls, the potential readers were the demons whom the bowls were trying to thwart, but the clients on whose behalf these texts were written were both male and female, both Jews and non-Jews, living in many different towns and villages over a period of two, three or four centuries, from the fifth to the seventh or eighth centuries CE.[15]

Useful as the bowls might be, their usefulness as sources for the study of Jewish magic is diminished by several important drawbacks. On the one hand, because of the problematic ways in which they reach the markets, many bowls are without provenance and utterly devoid of any archaeological or precise geographical context. In some cases, bowls whose provenance is unknown may be ascribed to a specific location because the client for whom they were produced is known from other bowls whose provenance is known for certain, but such cases are few and far between. This is to be regretted, since the absence of provenance almost precludes any attempt to study which spells were used in which locations, and how the spells travelled from one location to the next.[16]

The lack of clear archaeological contexts for many bowls is a major handicap, but the bowls also suffer from another disadvantage, in that they are rather uni-dimensional. A vast majority of the bowls are apotropaic in nature, as they seek to bind demons and avert the dangers of witchcraft and the evil eye. In some bowls, there is implicit or explicit reference to the illnesses from which the bowls' owners suffered, and these bowls thus shed some light on the etiology of certain diseases, and the connection between magic and medicine, in late-antique Babylonia.[17]

15 The bowls' chronology is not easy to establish for certain, since very few carry specific dates or other chronological indicators, but those that do carry such indications cluster in the second half of the sixth century and in the seventh; see Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 1, note 2.

16 For a modest effort in this direction, see Hunter, 'Manipulating Incantation Texts.'

17 See, for example, Levene, *Curse or Blessing*, pp. 28–29; Ford, 'A New

But only some two dozen of the published bowls are aggressive in nature, and even these tend to be intended more to send the witchcraft back upon its perpetrators, with only six bowls containing aggressive spells that are not presented as counter-spells.[18] Only four published bowls are intended for erotic magic, and only one seeks to enhance its client's economic and social position by attracting people to his business.[19] Thus, a reading of the bowls might give us the impression that the Jews of Sasanian Babylonia were mostly busy with 'white' magic and showed little interest in recourse to 'black' magic. Some students of Jewish culture might be satisfied with such a conclusion, since this is the type of Jewish magical activity that is easiest for them to swallow.[20] But students of magic should be extremely skeptical of such a scenario, since in other magical traditions, and in the Jewish magic of later periods and even of late-antique Palestine, magical practices for aggressive, erotic, medicinal and divinatory purposes tend to be at least as popular, and often more so, than magic aimed for protection against demons and witchcraft.[21] That the bowls preserve mostly one type of magic must be because this type was committed to writing, and on writing surfaces that happen to be quite durable; that they were buried in the ground also helped preserve them for posterity. Other types of magical activity apparently involved different practices, including the manipulation of various objects, the uttering of oral spells, the writing of spells on perishable writing surfaces or their destruction during the

Parallel,' pp. 272–275; and Bhayro, 'An Aramaic Magic Bowl for Fertility.' For a broader analysis, see Bohak, 'Conceptualizing Demons.'

18 These bowls have now been collected and analyzed as a group by Levene, *Jewish Aramaic Curse Texts*. My statistics are based on his discussion, *ibid*., p. 1. And cf. Saar, 'A Study in Conceptual Parallels.'

19 For the erotic bowls, see Saar, 'An Incantation Bowl'; for the economic bowl, see Levene and Bhayro, 'Bring to the Gates.'

20 For a case in point, see Baron, *Social and Religious History*, VIII, p. 283, note 21: 'The relative paucity of erotic incantations emanating from the Jews of Nippur and elsewhere (Montgomery's text, No. 28, p. 213, invoking the aid of the goddess of love Dlibat evidently was of pagan origin) testifies to the strong hold of the regnant Jewish ethics over the popular masses and their miracle-working agents even in the obscure realm of sex.' For Montgomery's Bowl 28, see below, note 103.

21 For 'black' magic in late-antique Palestine, cf. Alexander, '*Sefer ha-Razim*'; and Bohak, 'Magical Rotuli.'

magical ritual (e.g., by burning or washing in water), and so they left no archaeological traces.[22]

Thus, I would suggest that rather than being the central sphere of Jewish magical activity in late-antique Mesopotamia, the bowls represent just one type of magical activity, but the type which produced long-lasting remains, whereas all other types left far fewer remains or none at all.[23] But this suggestion raises two related questions: (a) What do we know about the other magical practices known to and used by the Jews of Sasanian Babylonia? And: (b) What other Jewish magical texts from Sasanian Babylonia do we currently have and may we hope to find in the future? The present paper is an attempt to answer these two questions, by surveying some of the possible sources of evidence pertaining to the Jewish magical texts and practices of late-antique Mesopotamia, apart from the bowls. In what follows I shall not try to offer a full analysis of each textual corpus, but I will endeavor to raise the basic questions, point to some pertinent examples and note where further research is still needed. Moreover, as many of the relevant texts have never been published, it is my hope that the survey offered here will encourage the edition and closer analysis of these neglected sources.

Babylonian Jewish Magic in the Babylonian Talmud

The most obvious starting point for any attempt to complement the image of Sasanian Jewish magic emerging from the Aramaic incantation bowls is the Babylonian Talmud. Here we are dealing with a large body of evidence that has much to tell us about the magical practices and spells known to, taught by and sometimes even used by the rabbis of late-antique Mesopotamia.[24] Surveying all this evidence would be out

22 Note, however, a lead amulet on which the spell was written in ink, published by Geller, 'More Magic Spells,' pp. 331–334; if authentic, it could provide one more point of entry into late-antique Babylonian Jewish magic. Another relevant item is the amulet from Afghanistan (see below, note 75), which probably dates to the tenth century, and whose authenticity is hardly in doubt.

23 And note Shaked, '*Dramatis Personae*,' who highlights the differences between the magic bowls and Geniza magical texts, and stresses, on p. 366, that 'the bowls do not reflect the whole range of magical practices used in the Babylonian environment at the time.'

24 For broad surveys of rabbinic magic and a more extensive bibliography, see

of the question here, and as the magical practices and recipes found in the Babylonian Talmud have often been studied, we may merely note two of their most important features. First, here we find numerous examples of medicinal magic, including the use of many types of amulets and the recitation of many types of spells, and some examples of anti-demonic and anti-witchcraft practices – but very little aggressive magic, no erotic magic whatsoever and very little divinatory magic. Second, most of the magical activity recorded in the Babylonian Talmud is transmitted and enacted orally; there are only a few references to the writing down of magical spells as a part of the ritual process,[25] confirming our suspicion that the Jews of Sasanian Babylonia utilized many magical practices that involved only the oral recitation of spells, without writing them down. These practices also involved the manipulation of various objects, the binding or slaughtering of animals and the burial (or hanging) of magical objects at crossroads, in cemeteries and at the entrance to one's home. Thus, the Talmud complements the evidence supplied by the bowls in terms not only of the goals sought by those who had recourse to magic, but also of the rituals enacted in order to attain those goals.

As has often been noted, the Babylonian Talmud never refers to the practice of writing down spells on clay bowls, and it seems unaware of this practice, whose apogee probably postdates the time of its redaction.[26] And yet, numerous motifs appear both in the Babylonian Talmud and in the Aramaic incantation bowls, including specific rabbinic, demonic and angelic figures, shared legal and liturgical formulae, similar uses of

Blau, *Das altjüdische Zauberwesen*; Goldin, 'Magic of Magic'; Harari, 'The Sages and the Occult'; Geller, 'Deconstructing Talmudic Magic'; and Bohak, *Ancient Jewish Magic*, pp. 351–425.

25 For these exceptions, see BT *Baba batra* 73a (sailors writing on wooden staffs); BT *Yoma* 84a (a spell to be written on hyena-skin); BT *Pesaḥim* 111b (two rabbinic disciples writing amulets); BT *Gitin* 67b ('Why do you need to know the demon's name? To write the proper amulet'). The Talmud also refers to books of magic (e.g., BT *Ḥullin* 13a), but these were books owned by non-Jews or laypersons, and not by the rabbis themselves.

26 The Babylonian Talmud (BT *Ḥullin* 84b, *Baba metsia* 29b) is aware of the existence of 'a sorcerers' cup' (כסא דחרשין) but attributes this knowledge to the Palestinian Rabbi Yohanan, and the ensuing discussion shows that it is not the inscribed clay bowls that the rabbi had in mind.

biblical verses and a pervasive fear of demons and witchcraft.[27] More specifically, there are some interesting overlaps between the spells found in the incantation bowls (and not found on the metal amulets from late-antique Palestine, Egypt, Italy and so on) and those recommended by the Babylonian Talmud, thus showing that both textual corpora share some of the magical know-how of late-antique Babylonian Jewish society. These parallels have never been collected systematically, but useful starting points have been provided in several earlier studies.[28] In what follows, I wish to point to one such parallel, which has not yet been studied, and note its potential significance.

In BT *Shabbat* 67a, a discussion of the mishnaic dictum (Mishna *Shabbat* 6:10) that one may not carry (as an amulet) the egg of a locust, the tooth of a fox or a nail from a crucifixion, because these are 'ways of the Amorites,' soon leads to a dictum by Rabbi Ḥiyya bar Abin (a Babylonian *amora* of the third generation) that two specific first aid practices are not to be included under this umbrella term for forbidden practices. First, if a fishbone got stuck in someone's throat, those next to him should place a bone of the same kind on his head and say: 'One, one, went down, swallowed, swallowed, went down, one, one.'[29] Second, for a fishbone (stuck in one's throat), one should say: 'You were stuck in like a needle and you were locked up like a shield, *shia shia*' (ננעצתה כמחט וננעלתה כתריס שייה שייה).[30] The first of these spells

27 For some of these, see Ten-Ami, 'Rabbinic Motifs'; Manekin Bamberger, 'Jewish Legal Formulae'; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 22–23, 53–55, 103–104; Bhayro, 'Divorcing a Demon'; and Elman, 'Saffron, Spices, and Sorceresses.' For the rabbis who are mentioned in the bowls, see Shaked, 'Rabbis.'

28 See Segal, *Catalogue*, p. 74; Müller-Kessler, *Die Zauberschalentexte*, p. 45; Bohak, 'Babylonian Incantation Bowls,' p. 258; Mishor, 'Hebrew,' p. 224; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 55; and Manekin Bamberger, 'An Akkadian Demon.'

29 The same magical practice, but without the spell, is found in Tosefta *Shabbat* 7:21 (ed. Zuckermandel, p. 119), and in *Testament of Solomon* 18, and is attributed by Pliny, *NH* 28.49, to the Magi. This parallel has often been noted; and see Blau, *Das altjüdische Zauberwesen*, p. 76; and Veltri, 'The "Other" Physicians,' p. 51.

30 The most important manuscripts, as recorded in the Henkind Databank of the Saul Lieberman Institute, read: בגעצתה כמחט מנעלתה כתריס שייה שייה (Munich 95); ננעצתא כמחט ננעלתא כתריס שיא כשיאה (Oxford, Opp. Add. 23); (ניגע צתא) נינעצתה במחט נינעלתה כמחט נינעלתא כתריס שרא שיאה שיאה [נינעצתא] (Vatican 108);

is characterized by a chiastic structure (A, A, B, C, C, B, A, A), which in this case clearly is intended mimetically to encourage the bone that went down the throat to go back up again and join its fellow bone on the patient's head.[31] As far as I know, no parallel to this spell has thus far been found in any of the published Aramaic incantation bowls, but the chiastic structure is well attested both in the Aramaic bowls (as we shall see in one of the following examples) and in other spells recommended by the Babylonian Talmud.[32] However, the second spell is paralleled in several bowls, where it appears as דעלת כימחט דעס ביתרוס, or על כל דמחט דעלת כימחט דעס כיתרוס, or ועץ מחץ כיתרם … כיתרם מחץ ועץ דמחט כל על, or דעלת כימחט רססת כיתרס שוא פשנוש.[33] The last of these examples might even be a partial parallel to the sequence שייה שייה at the end of the talmudic spell, and in all of them we find clear parallels to the Talmud's ננעצתה כמחט וננעלתה כתריס, even though these parallels are not identical with the talmudic spell, or with each other.[34]

Reading all these parallels, one is struck by the fact that the talmudic spell is both coherent and context-specific, whereas those of the bowls are not. In the talmudic spell, most of the text, with the exception of the last two words, makes perfect sense (which definitely is not true of all the spells recommended by or recorded in the Babylonian Talmud), and this sense accords well with its intended use as a spell against a fishbone that got inserted into the throat like a needle and got locked up in there like a shield. In the bowls, on the other hand, the text of this spell makes

[שייאה שייאה](שיחשיאה) כתריס (Westminster College, Talm. II, 2 [Geniza]). Rashi *ad loc*. interprets the last two words as meaning 'Go down, go down.' The *'Arukh* of R. Nathan b. Yehiel gives them as שיח שיח and interprets them as deriving from the Aramaic root שוח, 'to melt'; see Kohut, *Aruch Completum*, VIII, p. 47.

31 See also Bar-Ilan, 'Between Magic and Religion,' pp. 394–396.

32 The clearest example being the spell הוית דפקיק הוית דפקיק, for which see Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 55.

33 See, respectively, Faraj, *Coppe magiche*, pp. 52–53, Bowl 4 (IM 148241), l. 7; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 75, JBA 7 (MS 2053/12), ll. 13–14; *ibid*., p. 266, JBA 61 (MS 2053/214), l. 7. See also *ibid*., p. 254, JBA 57 (MS 2053/36), l. 8. The same formula is found in some unpublished bowls whose texts were shared with me by Dan Levene.

34 However, the readings of the bowls are complicated by the indistinguishability, in many of them, of the letters *yod* and *waw*, *bet* and *kaph*, and *samekh* and final *mem*. Thus, these parallels may be closer than what their editors' readings might lead us to believe.

no sense at all, changes from one bowl to the next and is appended to the bowls' main texts as a small appendage. Moreover, the sequence is given in Hebrew, and when the texts of the Aramaic incantation bowls shift from Aramaic to Hebrew, this usually is because they are citing pre-existing Hebrew textual units – from the Hebrew Bible, the Mishna or the Jewish liturgy, from what we now know as the Hekhalot literature and so on – which were originally transmitted in Hebrew. Finally, the word תריס, 'shield,' is a loanword from Greek (*thyreos*) that appears frequently in tannaitic sources, and while it is attested elsewhere in the Babylonian Talmud, it might point to a Palestinian origin of the entire spell.[35] Thus, we seem to have a Hebrew spell that was originally intended to help people who got fishbones stuck in their throats and that may have come to Babylonia from Palestine. In the bowls, it has nothing to do with fish or bones and appears mainly as a 'space filler,' a short formula intended to complement the longer spells that already were inscribed upon the bowl but did not suffice to fill its surface with text.

To sum up our brief discussion of the Babylonian Talmud, we may note that it is an extremely important source for the study of Babylonian Jewish magic and an excellent aid in placing the magic of the bowls in its wider social and religious contexts. On the one hand, there are enough overlaps between the bowls and the talmudic spells to assure us that they reflect the same world and stem from the same cultural environment. These overlaps still deserve a much closer scrutiny in order to highlight both the textual parallels and the contextual resemblances and differences between the two corpora, but enough has already been achieved to give us a sense of the terrain. On the other hand, the Babylonian Talmud complements the data provided by the bowls in many important ways and sheds much light on magical aims and practices that are unattested, or only partly attested, in the bowls. But even when we combine the data provided by these two major

35 Since Rabbi Ḥiyya bar Abin visited Palestine (see Hyman, *Toldoth tannaim ve'amoraim*, II, pp. 439–441), it is possible that he brought this spell with him, and that it is of Palestinian Jewish origin. That some spells of Palestinian Jewish origin found their way to the bowls is made clear by the example of the Semamit-*historiola*, for which see Naveh and Shaked, *Amulets and Magic Bowls*, pp. 188–197; Elitzur-Leiman, 'An Aramaic Amulet'; and Ford, 'New Light from Babylonia on the Story of Smamit.'

textual corpora, we cannot help feeling that large parts of late-antique Babylonian Jewish magic still lie beyond our grasp.

A Brief Note on Method

Before turning to the Jewish magical texts of later periods in search of the remains of late-antique Babylonian Jewish magic, a methodological issue must be raised: None of the evidence discussed below was found in Babylonia, nor is it preserved in late-antique manuscripts (since none from the region has survived); it comes from medieval and even later Jewish manuscripts, which we assume to contain copies of copies of much earlier texts. But this raises a grave question – reading a Jewish magical text found in medieval and later Jewish manuscripts, how would we know that it is of late-antique Babylonian origins? One criterion is linguistic, but it is problematic, because of the tendency of medieval Jewish scribes to 'normalize' Aramaic texts in line with the Aramaic of the Babylonian Talmud and of Targum Onqelos, which they knew so well.[36] Such processes are much more pronounced in the magical texts, which are non-canonical and intended for practical use, so that their language was constantly 'updated,' modified or even changed to the contemporary vernacular. As a rule, we may note that the magical instructions were far more likely to be modified than the incantations themselves (the copyists' assumption being that the instructions should be as clear as possible, but the incantations might lose their power if modified), but even the latter were corrupted, 'corrected,' modified and translated during their long transmission history. Thus, a linguistic analysis of later Jewish magical texts in search of earlier Babylonian Aramaic forms is not *a priori* useless, but it is not very probative either. Moreover, some Aramaic spells may even be medieval compositions. We know that Jews were writing new texts in Aramaic in the Middle Ages, with the Zohar as our best example (on which we shall say more in a moment) and the *Sidre deshimmusha rabba*, a mystical-magical text edited and analyzed by Gershom Scholem, as an even more pertinent example.[37] Even the presence of Babylonian vocalization in a

36 For this process, as seen in non-magical texts, see the classic statement by Kutscher, *Studies*, pp. 2 and 12–15.

37 For this phenomenon, see Rapoport-Albert and Kwasman, 'Late Aramaic';

manuscript of Jewish magic is no proof of the Babylonian origin of its recipes. Below, we shall note a magical booklet from Damascus that displays some Babylonian vocalization, but right next to it we could place Cairo Geniza magical texts with Babylonian vocalizations, texts whose magical recipes show no sign of a specifically Babylonian origin.[38]

A second and related problem is that once the Babylonian Talmud became the central text of medieval Jewish culture, its own magical spells and recipes became widely known to many medieval Jews. Interestingly, they did not have a great impact on the Jewish magical tradition, which had many other sources from which to draw its spells and recipes, but occasionally we do find spells and recipes that drew at least some of their inspiration from the Babylonian Talmud.[39] Moreover, there are cases where the reliance on talmudic precedents led to the creation of new spells that in some way resemble those of the Babylonian incantation bowls. Note, for example, the following passage in the Zohar, which retells the story of the creation of the woman out of the primordial human being, how Lilith was incensed by that development, and:

ערקת היא לימא, וזמינא לאבאשא בני עלמא. אסוותא להאי, בההיא שעתא דאזדווג בר נש באתתיה, יכוין לביה לקדושה דמאריה, ולימא הכי, עטיפא בקטפא אזדמנת, שארי שארי, לא תעול ולא תנפוק, לא דידך ולא בעדבך, תוב תוב, ימא אתרגישא,

Mopsik, 'Late Judeo-Aramaic'; and Tal, 'The Role of Targum Onqelos.' For the *Sidrei*, see Scholem, 'Sidrei.'

38 See, for example, Oxford, Bodleian Heb. e 74.21 (for which see the brief note in Yeivin, *The Hebrew Language Tradition*, I, p. 236); and Schäfer and Shaked, *Magische Texte*, III, no. 69 (= T-S AS 142.13 + T-S NS 317.18). All three Geniza fragments come from the same manuscript, which is characterized by the Babylonian vocalization of some of its 'magic words,' but the magical recipes display no special affinity with the Babylonian Jewish magical texts of late antiquity.

39 As one example, I note the sequence שברירי ברירי רירי ירי רי י, which appears in BT *'Avoda zara* 12b and *Pesaḥim* 112a in a recipe against temporary blindness (for the Akkadian origin of the term *shabriri*, and for magical rituals against it, see Stol, 'Blindness,' and Geller, 'Akkadian Medicine,' p. 107). The same sequence appears in medieval and modern manuscripts of Jewish magic and is often used in contexts that have nothing to do with blindness. See, for example, Barel, 'Rav-Pe'alim,' p. 223, where it is used against epilepsy and to exorcize a demon.

גלגלוי ליך קראן, בחולקא קדישא אחידנא, בקדושה דמלכא אתעטפנא. ולחפיא ליה לרישיה ולאתתיה עד שעתא חדא, וכן בכל זמנא, עד תלת יומין לקליטה, דכל הרכבה דלא קולטת לתלת יומין, תוב ליתא קולטת.

She fled to the sea and is present to harm the people of the world. The cure for this – at that hour when a man copulates with his wife, he should turn his heart to the holiness of his Master and say thus: 'The one who is wrapped in bed-linen is present; loosen, loosen; you shall not come in and not come out; it is neither yours nor of your share (?). Return, return, the sea is stormy, its waves are calling you; to the holy garment I cleave, in the holiness of the King I wrap myself.' And he should cover his head and that of his wife for one hour, and thus at every time, up to three days from the moment of the reception (of the sperm in the womb), since every combination that does not receive (pregnancy) within three days, does not receive any more.[40]

Comparing this spell with those of the bowls, we may note the duplication of some words (שארי שארי, תוב תוב) and especially the structure of 'by X I did A (בחולקא קדישא אחידנא), by Y I did B (בקדושה דמלכא אתעטפנא),' both well attested in the Jewish Babylonian Aramaic bowls. And yet, there is no need to assume that the composer of this recipe had any direct or indirect knowledge of the bowls or their spells, since both features are well attested in the Babylonian Talmud as well.[41] We already noted above the sequence שייה שייה, which may have served as a source of inspiration for the Zohar's שארי שארי (loosen, loosen).[42] We may also note such a talmudic spell as במישרא דכרתי חבטיה בלועא דחמרא

40 Zohar III, 19a. The translation is my own, but I used the Hebrew translation of the incantation in Scholem, *Elements*, p. 152. For a brief discussion of this incantation, see Cohen-Alorro, 'Magic and Sorcery,' pp. 110–111. On pp. 319–320, note 24, Cohen-Alorro adduces an Akkadian parallel to this incantation and refers to the spells against Lilith in Babylonian incantation bowls.

41 Scholem, in his own copy of the Zohar, wrote of this spell that 'its composer is the very author of the (Zoharic) pericope on Leviticus, as emerges from its language and its contents' (לעניין הלחש: המחבר הוא בעל פרשת ויקרא עצמו כפי שיוצא מלשונו ותוכנו). See Scholem, *Sefer haZohar*, V, p. 2244.

42 Moreover, such formulae are common in many magical traditions, and see the formula שרא שרא גבר, 'Release, release a man,' in a Nabatean magical text published by Naveh, 'A Nabatean Incantation,' p. 113. I am grateful to Ortal-Paz Saar for this reference.

חטרתיה, 'in a bed of leeks I hit it, with the mouth of an ass I pounded it' (*Shabbat* 67a), as a source of inspiration for the second formula.[43] In light of such precedents, we can see why the Zohar's own spell may resemble the bowls in some striking ways, but this resemblance is not necessarily due to any historical continuity from the bowls to the world of the Zohar.

In light of these considerations, we cannot merely count on a general resemblance of language, or on some phenomenological similarities between the bowl-spells and those of later Jewish magical texts, as proof of historical continuity. We need much sounder criteria. One sound criterion for deciding about the 'Babylonian-ness' of other Jewish magical texts is a comparison thereof with the Babylonian incantation bowls, especially when we find in them parallel motifs and parallel formulae that are not attested in other Jewish magical texts, such as those from late-antique Palestine or from the Babylonian Talmud, or those found in other magical traditions (except, of course, Mandaic and Syriac magical texts, which often are of Babylonian origin themselves). In such cases, we may also use our extensive knowledge of Palestinian Jewish magic and of the Greco-Egyptian magical tradition, which had such an impact upon Palestinian Jewish magic but had only a minor impact on the Babylonian incantation bowls, to highlight those aspects of the bowls that are typical of them and of them alone.[44] When such elements re-emerge in later Jewish magical texts, these texts are likely to be copies of copies of texts that go back to late-antique Mesopotamia.

One possible application of this criterion would be to search in later Jewish magical texts for those long spells and *historiolae* that are known to us from the Babylonian incantation bowls and are unattested in late-antique Palestine. Below, we shall note some striking examples of such continuity, but also their rarity. Another application would be to search outside the Babylonian incantation bowls for words and technical terms that are extremely typical of the bowls' vocabulary and are unattested in Palestinian Jewish magic. Most useful in this regard are terms and

43 And the Zohar's description of Lilith as עטיפא בקטפא may have been influenced by the reference to חומרתא דקטיפתא, 'amulet of *qeṭifta*,' in BT *Shabbat* 57b.

44 For the continuity of Palestinian Jewish magic from Late Antiquity to the Middle Ages, which is much easier to demonstrate, see Naveh, 'A Good Subduing'; idem, 'On Ancient Jewish'; and Bohak, 'Jewish Magical Tradition.'

names borrowed from the Persian language, such as זרני, דנחיש, דיוי, בגדנא, איספנדס and פתיכרי, as these are *a priori* unlikely to have had much of an impact on Palestinian Jewish magic.[45] But to this short list we may add a much longer list of Aramaic and Hebrew terms that are typical of the bowls (some of which go back to Akkadian, but others do not), including especially the many different categories of demons, such as זכיא, בני איגרי, אשלמתא, שקופתא, שלניתא, ענקתא, מבכלתא, לטבי, ירורי, חטפיתא, חומרי זידניתא and so on, as well as the many personal names of the demons and liliths attested in the bowls, including פלחס, פלחדד, אביטור and so on.[46] To this list, which reflects the highly developed demonology of Babylonian Jewish magic, we may add the Babylonian gods, who occasionally appear in the Babylonian Jewish magical texts, especially in lists of the seven planets – שמיש וסין ונבו ודליבת וביל ונריג וכיון.

Of course, when compiling such a list we must recall that once one of these words is found in a text that is of a Palestinian and late-antique origin, it must be excluded, which is why we must strike off our list terms like עינא בישא, שידא, חרשין בישין or עובדין תקיפין, not to mention סטנין or מזיקין, all of which are typical of both Palestinian and Babylonian Jewish magical texts. Similarly, words that are found in the Hebrew Bible or the Babylonian Talmud should not be on our list, which is why we should exclude Ashmedai, even though he has a Persian name, and Lilith, in spite of her Babylonian origins, and why a single appearance of Bel or Keiwan does not necessarily tell us much about a text's provenance. And, as with every such set of 'textual markers,' we must note that it is not always easy to distinguish between real appearances of a certain word and mere phantoms, as when a corrupt word or a *vox magica* accidentally resembles one of the words in our list. Thus, the more such 'markers' we find in any given text, and the more we can be certain that they are indeed our words and not some random flukes, the more likely the text itself is to be of Babylonian origin or to preserve older Babylonian material.[47]

45 For these terms, see Shaked, 'Bagdâna,' and idem, 'Popular Religion.'

46 To date, no attempt has been made to catalogue all the demons that appear in the Aramaic bowls, and the most detailed survey remains Montgomery, *Aramaic Incantation Texts*, pp. 70–83. For a useful comparandum, see Furlani, 'I nomi delle classe.'

47 One more feature that seems typical of Babylonian Jewish magic and sometimes

To these 'textual markers' we could, at least in theory, add a list of 'iconographical markers,' that is, features of the bowls' peculiar iconography (especially the appearance of the demons and the different manners by which they are bound) for which we could search in later Jewish magical texts.[48] However, such an analysis would not get us very far, since later Jewish magical texts rarely have a pictorial component, and when they depict demons, these depictions resemble those of Muslim magical texts and greatly differ from those of the Aramaic incantation bowls.[49] Similarly, one could examine the magic signs that occasionally appear in the bowls and usually differ from the typical *charactêres* of Greco-Egyptian and Palestinian Jewish magic, and search for similar signs in later Jewish magical texts.[50] However, I know of no attempt to assemble the relevant data from all the published (and well photographed!) bowls, without which no such research could be carried out.

Another important criterion is the appearance in later Jewish magical texts of themes and practices that seem typical of non-Jewish Mesopotamian magic, and especially of the older Babylonian magical tradition.[51] This tradition seems to have had relatively little impact on the Babylonian incantation bowls, although the exact nature of this impact is still being debated by scholars, and the publication of more bowls might shed additional light.[52] However, in looking for older Babylonian magical elements that entered the Jewish magical tradition,

emerges in later Jewish magical texts is the first-person *historiola* (for which see Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 15–17). However, I know of no attempt to classify the *historiolae* found in the 'Western' and 'Eastern' branches of late-antique Jewish magic and to isolate those features that are found exclusively in the 'Eastern' branch.

48 For the bowls' iconography, see Vilozny, 'Between Demons and Kings'; eadem, 'Lilith's Hair'; eadem, *Lilith's Hair*; and cf. Lesses, 'Image and Word.'

49 For one striking example, see the image from T-S Ar. 51.95, reproduced in Baker and Polliack, *Arabic and Judaeo-Arabic Manuscripts*, Plate 21.

50 For the *charaktêres*, see Bohak, 'The *Charaktêres*,' with further bibliography.

51 The same applies to the Persian magical tradition, which, unfortunately, is not well documented.

52 And see Müller-Kessler, 'Die aramäische Beschwörung'; Oelsner, 'Incantations in Southern Mesopotamia'; Geller, 'Tablets and Magic Bowls'; idem, 'Magic Bowls'; Gabbay, 'King of the Demons'; Bhayro, 'The Reception'; Levene, Marx and Bhayro, 'Gabriel is on Their Right'; Ford, 'Ancient Mesopotamian Motif'; and Wasserman, 'Old-Babylonian.'

we must always keep in mind that similar traditions and practices may have existed outside Babylonia as well.[53] Their presence in the Jewish magical tradition may therefore be due to non-Babylonian influences and thus tell us little about their ultimate origins. Of course, the more specifically-Babylonian a certain text or practice is, the more likely it is to have entered the Jewish magical tradition in late-antique Mesopotamia.

With these guidelines in mind, we may approach the sources, which include more than a thousand magic-related fragments from the Cairo Geniza and many hundreds of non-Geniza manuscripts of Jewish magic, some of which are hundreds of pages long. In what follows, I shall try to make two separate inroads into this vast territory. First, I shall look for longer Jewish magical texts that may be identified as coming from Sasanian Babylonia, or as displaying some Babylonian features. Next, I shall look for single Jewish magical recipes, found in manuscripts from the Cairo Geniza and elsewhere, that may be identified as stemming from late-antique Babylonian Jewish origins, even though they are found in collections of magical recipes with recipes of many different origins. I shall end with a brief evaluation of the results and some suggestions for further research.

Jewish Magical Texts of Mesopotamian Provenance

Reading through the dozens of Aramaic and Hebrew magical texts transmitted in medieval and later Jewish manuscripts (most of which have never been properly edited), we are soon forced to conclude that the search for magical texts that are likely to be of a late-antique Babylonian Jewish origin proves to be extremely complex. On the one hand, some of the magical texts may securely be attributed to other geograph-

53 I note, in this context, the interesting book by Daiches, *Babylonian Oil Magic*. Noting that the practice of gazing at oil-stains for the purpose of divination is attested in Mesopotamia and is well known to the Babylonian Talmud, Daiches goes on to edit and analyze early modern and modern manuscripts of Jewish magic where such practices may be found. His book contains much valuable data on modern Jewish magic, but it is entirely irrelevant to the study of Jewish magical texts of Babylonian origin, especially as the practice of oil-gazing for divination is extremely common in the Greek magical papyri as well and probably entered the Jewish magical tradition from several different directions.

ical and historical contexts and especially to late-antique Palestine or to the Jews of the Middle Ages, living under either Muslim or Christian rule. Thus, to give a few examples, a text such as *Sefer harazim* is so deeply influenced by the Greco-Egyptian magical tradition, and so full of Greek loanwords, as to assure us of its Palestinian origins and of its date some time in the Early Byzantine period, prior to the Muslim conquest.[54] Its Palestinian origins are further confirmed by its immense popularity in the Cairo Geniza, which as a rule tends to preserve Palestinian materials much more than Babylonian ones (as may be seen, for example, from the study of the *piyyutim*).[55] A Palestinian origin may also be postulated for *Shimmush Tehillim* (Use of the Psalms), which is written in Palestinian Jewish Aramaic, displays some Greek loanwords and is also well attested in the Cairo Geniza.[56] Similarly, the text called *Sheva' ma'alot* (The seven grades) is written in Palestinian Jewish Aramaic and displays many borrowings from the Greco-Egyptian magical tradition, and it may thus be classified as Palestinian, even though it is not as well represented among the Geniza fragments.[57]

While these texts stem from late-antique Palestine, other Jewish magical texts clearly date to the Middle Ages. This applies, for example, to the texts of astral magic that are found both in the Cairo Geniza and in non-Geniza manuscripts, which tend to be of a Muslim origin and to have reached the Jewish world either directly from Arabic or through intermediaries in other languages.[58] Likewise, a text like *Segullot 'or hanaḥash* (The properties of snakeskin) is a medieval Hebrew translation (or rather, a set of several different translations) of a Latin text called *Experimenta duodecim Johannes Paulini* (The twelve experiments of

54 For *Sefer harazim*, see Margalioth, *Sepher Ha-Razim*; Morgan, *Sepher Ha-Razim*; and Rebiger and Schäfer, *Sefer ha-Razim*.

55 For the Geniza fragments of *Sefer harazim*, see Rebiger and Schäfer, *Sefer ha-Razim*, I, pp. 1–16, 121*–201*.

56 See Rebiger, *Sefer Shimmush Tehillim*; for some of the Geniza fragments, see Schäfer and Shaked, *Magische Texte*, III, nos. 78–84.

57 For this text, which deserves a fuller study, see Schäfer and Shaked, *Magische Texte*, II, no. 26 (= T-S K 1.35 + T-S K 1.48), 2b/1–28; *ibid*., no. 27 (= T-S K 1.74), 1a–1b; and MS NYPL 190, in Bohak, *A Fifteenth-Century Manuscript*, I, pp. 195–198; II, pp. 153–155.

58 For a pertinent example, see Burnett and Bohak, 'A Judaeo-Arabic Version.'

Johannes Paulinus), which itself is said to have been translated from Arabic.[59] Other examples of these processes could easily be adduced.[60]

If some books of Jewish magic display clear signs of a Palestinian or medieval provenance, others prove much harder to pin down. I note, for example, that both *Sefer hayashar* (The Book of the righteous) and *Sefer hamalbush* (The Book of the wearing [of the divine name]) are written in Hebrew and are likely to be of late-antique origin, but they do not provide any clear signs of either Palestinian or Babylonian provenance.[61] In both cases, only a small part of the relevant textual evidence has received any scholarly attention, and the question of their provenance has hardly even been discussed. Thus, it is possible that a closer examination of each of these texts would yield sounder conclusions about their likely provenance, but it also is quite possible that we will not have a clear answer even if and when such analyses are carried out.

Thus, we are left with some Jewish magical texts that clearly have little to do with late-antique Babylonia, and some whose provenance is not really known. But we also have some texts that are likely to go back to late-antique Babylonia, and of these, four merit special attention: the *Ḥarba deMoshe*, the *Pishra deRabbi Ḥanina ben Dosa*, the *Havdala deRabbi Aqiba* and some versions of *Sefer haqevitsa*.[62] Let us look

59 For this text, see my brief comments in Bohak, 'Rabbanite Magical Texts,' pp. 26–27, with further bibliography. In the future, I hope to devote a separate study to this text.

60 And see Shaked, 'Jewish Magical Literature'; Leicht, 'Legend of St. Eustachius'; Bohak, 'Catching a Thief'; Mesler, 'The Three Magi'; and Saar, 'A Genizah Magical Fragment.'

61 For both texts, see Wandrey, *Das Buch des Gewandes*. See also the book known as *Sefer Adam*, recently edited in Rebiger and Schäfer, *Sefer ha-Razim*, as '*Sefer ha-Razim* II.' It, too, displays no clear sign of its ultimate origins.

62 Another book that must have been of Babylonian Jewish origin is *Raza rabba* (The Great secret), which one Karaite author described as רזה רבה פי קצת סבע סמואת ומלאיכה ופרורים ודיוים ולטבין וירורין בגיר אלעדד, '*Raza rabba*, on the history of the seven heavens, and angels, and *paror*s, and *dev*s, and no-good-ones and *yaror*s without number.' For this passage, see Mann, *Texts and Studies*, II, p. 82. Unfortunately, *Raza Rabba* is no longer extant, and Scholem's attempts to reconstruct it from Ashkenazi citations of a Hebrew book with a similar name (see Scholem, *Origins of the Kabbalah*, pp. 106–123) were not successful. That we have yet to find this book only shows how little we really know about the Jewish magical texts of late-antique Babylonia and how much room is left for further research.

at each of these more closely and assess the evidence for its possible provenance.

(a) Ḥarba deMoshe

One obvious, but problematic, starting point for our quest is the *Ḥarba deMoshe* (The Sword of Moses). Since the text is first mentioned by Hai Gaon in his famous responsum on the uses of divine names, written ca. 1000 CE, we may perhaps assume that this is a Babylonian Jewish text, going back a few centuries before Hai's own time.[63] But the *Ḥarba deMoshe* is only preserved in very late manuscripts that clearly are corrupt, with only a few earlier Geniza fragments, covering only a part of the text.[64] As we now have it, the text of the *Ḥarba deMoshe* clearly presents some Babylonian components, but it also has some obviously Palestinian elements, including materials derived from the Greco-Egyptian magical tradition.[65] A close analysis of all the evidence has led Yuval Harari to conclude that the *Ḥarba deMoshe* combines both Palestinian and Babylonian elements and that its final redaction was in Palestine.[66] As with all such source-critical analyses, certainty on these issues is beyond our reach, but the fact that the *Ḥarba deMoshe* is not the most reliable witness for the study of Babylonian Jewish magic in late antiquity seems incontrovertible. We shall return to this issue below.

(b) Havdala deRabbi Aqiba

A somewhat less problematic example is provided by the *Havdala deRabbi Aqiba* (Rabbi Aqiba's *havdala*), a text that is modelled on the

63 For Hai's responsum, see Emanuel, *Newly Discovered*, pp. 124–146; the reference to the *Sword of Moses* and the citation of its *incipit* are on p. 131. The text of the *Sword of Moses* was first identified and edited by Moses Gaster, from a manuscript in his possession; and see Gaster, *Sword of Moses*.

64 For a newer edition, based on MS Sassoon 290, see Harari, *Ḥarba deMoshe*; for a recent translation, see idem, 'The Sword of Moses'; for the Geniza fragments, see idem, 'Geniza Fragments.'

65 For some pertinent examples, see Rohrbacher-Sticker, 'From Sense to Nonsense'; see further Bohak, *Ancient Jewish Magic*, pp. 175–179.

66 See Harari, *Ḥarba deMoshe*, pp. 52–53; idem, 'The Sword of Moses,' pp. 65–67.

standard rabbinic *havdala* ritual (intended symbolically to 'separate' the sacred from the profane at the end of the Sabbath) but transforms it into an apotropaic ritual to ward off demons, cure 'bound' (i.e., impotent) husbands, 'open the heart' (i.e., improve one's memory and learning abilities) and so on. It was edited from several manuscripts by Gershom Scholem, who published it with a detailed introduction and commentary.[67] Here, too, there is no doubt that some textual units go back to Babylonian Jewish magic, including long lists of demons known to us exclusively from the Babylonian incantation bowls and clearly Mesopotamian in origin, and one first-person *historiola* that clearly belongs in the world of the Babylonian incantation bowls and finds partial parallels in some of the published ones.[68] But the *Havdala deRabbi Aqiba* also includes many Hebrew sections that display no clear affinity with what we find in the bowls, and it is not clear that the whole composition is of a Babylonian origin or a late-antique date. Scholem noted some of the Babylonian elements and argued for either a Babylonian or a south Italian origin of the final text, and for a date in the Gaonic period.[69] But he also stressed that this text seems to have been assembled from several different sources and that some of its adjurations display the impact of the Greco-Egyptian magical tradition.[70] Hannu Juusola offered a more detailed linguistic analysis and concluded that the text presents both 'Eastern' and 'Western' features, and that, like the *Ḥarba deMoshe*, it, too, must have had a complex redaction history.[71] Thus, both the contents and the language argue for a Babylonian origin for parts of this text, but probably not for all of it; that it is only rarely found among the Geniza fragments might provide further support for the assumption of a Babylonian-Jewish origin, but it could also support

67 Scholem, 'Havdala.'

68 For the long list of demons' names, see *ibid*., pp. 258–262 (= pp. 160–164 of the revised reprint), and Scholem's numerous references in his commentary to the appearance of many of these demons in the Babylonian incantation bowls. For the *historiola*, see *ibid*., pp. 262–265 (= pp. 164–167) (for the partial parallels, see BM 135563, edited in Segal, *Catalogue*, as 049A, and re-edited in Morgenstern, 'Notes'), and cf. the 'Enochic' *historiola* in pp. 270–272 (= pp. 171–173).

69 For Scholem's view of the text's likely origins, see *ibid*., pp 245–246 (= p. 148).

70 See, for example, *ibid*., pp. 252 (= p. 154) and 267 (= p. 168).

71 Juusola, 'Notes on the Aramaic Sections.'

a southern Italian origin, in accordance with Scholem's intuitive suggestion.[72] Thus, we find ourselves once again, as in the case of the *Ḥarba deMoshe*, with a text that preserves some elements of late-antique Babylonian Jewish magic but probably does not stem in its entirety from that geographical and historical context.

(c) Pishra deRabbi Ḥanina ben Dosa

If both the *Ḥarba deMoshe* and the *Havdala deRabbi Aqiba* leave us wishing for more conclusive results, the *Pishra deRabbi Ḥanina ben Dosa* (The Spell-loosener of R. Ḥanina ben Dosa), an anti-witchcraft spell that is about two or three pages long, seems much less problematic.[73] This text, which has been edited only once, from a faulty manuscript, is surprisingly well attested; it is found in at least nine Geniza fragments and in quite a few later manuscripts, including some twentieth-century amulets.[74] The late-antique Babylonian origin of this text is made quite clear not only by its Babylonian Aramaic dialect, but also by the fact that it continues in a tradition of much older Babylonian anti-witchcraft rituals (especially some of the features of the Maqlû texts) and 'Judaizes' them by turning the gods' names into angel names. The Babylonian nature of this text is further highlighted by the list of demons and dangers with which it opens, which closely resembles those of the magic bowls; by the close parallel between its closing formula and a formula used in circumcision rituals in Babylonian Jewish prayer books (*siddurim*); and by the close parallel between one of its adjura-

72 The only securely identifiable Geniza fragment of the *Havdala deRabbi Aqiba* of which I am currently aware is T-S NS 326.51; for other possible fragments, see Schäfer, *Geniza-Fragmente*, G16 (=T-S NS 322.21) and G18 (= Bodleian Heb. e 107.10). For a find that could modify our view of the *Havdala*, but might be a modern forgery, see Hamilton, 'A New Hebrew-Aramaic Incantation,' with Bohak, *Ancient Jewish Magic*, p. 158.

73 For a brief introduction to the *Pishra*, see Bohak, 'Pishra.'

74 See Michelini Tocci, 'Note e documenti,' pp. 101–106. For a published Geniza fragment, see Schäfer and Shaked, *Magische Texte*, II, no. 22 (= T-S K 1.144 + T-S K 21.95T + T-S K 21.95P), 1a/1–1b/9. For a fifteenth-century manuscript, see NYPL 190 (on which more below), in Bohak, *A Fifteenth-Century Manuscript*, I, pp. 229–231; II, pp. 187–189. For a twentieth-century amulet that utilizes the *Pishra* text, see Vukosavović, *Angels and Demons*, p. 126.

tions and a section of an Aramaic amulet from Afghanistan.[75] As far as I can see, its text remained remarkably stable throughout its long transmission history and bears no clear marks of later, medieval interpolations.

Like the vast majority of the incantation bowls, the *Pishra*, too, is an apotropaic, anti-witchcraft spell, and most of its contents are rather repetitive, consisting mainly of the names of the respective angels who would loosen an aggressive magic act performed against the spell's potential user on each day of the week, each day of the month and so on.[76] But one section also lists all the different types of aggressive magical acts that might have been performed against the potential user and thus gives us a glimpse of the world of aggressive magic in late-antique Babylonia, as known to the *Pishra*'s composers.[77] Of course, much of this aggressive magic may have been utilized by non-Jewish magicians and witches, and it thus is not necessarily relevant to the study of the aggressive magical texts and practices of the Jews of Sasanian Babylonia, but in at least one case we can probably show that an aggressive magical practice known to the composers of the *Pishra* was indeed used by Jews as well. It occurs in the section that says: ואם בחספא וסילוי עבדו ליה כיבמשיאל ישרי ויפשר ליה, 'And if with clay / potsherd and thorns they worked (witchcraft) upon him, Kivmashiel will release and loosen him.'[78] This is a rather vague reference, but it

75 I hope to deal with these issues at greater length elsewhere. For the amulet from Afghanistan (whose reading can be improved in light of this parallel), see Shaked, 'A Jewish Aramaic Amulet.' It must be noted, however, that the study of the *Pishra* is partly complicated by the fact that a text with similar logic is found on an unpublished amulet, deciphered by Joseph Naveh, Shaul Shaked and Ada Yardeni, which clearly is of Palestinian Jewish origins.

76 This list of angelic names enjoyed a life of its own in later Jewish magic, and appears, for example, in MS New York JTSA 8114 (IMHM F 11305), part 2, fols. 4v–6r.

77 Such listings sometimes appear in the bowls, too. See the brief discussions in Morony, 'Magic and Society,' pp. 99–100, and Levene, *Jewish Aramaic Curse Texts*, pp. 12–16. A full survey of such listings in all the published bowls and their comparison with those of the *Pishra* remains a scholarly desideratum.

78 I cite the text from MS NYPL 190 (on which more below), in Bohak, *A Fifteenth-Century Manuscript*, I, p. 229; and II, p. 187. All the other copies of the text I examined differ only with regard to the angel's exact name, which is irrelevant to the present discussion.

is tempting to compare it with the detailed instructions provided by the *Ḥarba deMoshe* in one of its aggressive magical recipes:

> אם בעית למקטל אינש סב טינא מן תרי כיפי נהרא ועביד צלמא וכת׳ עליה שמיה וסב ז׳ סלוין מן דיקלא צויא ועביד קשתא דחוסקניאתא במיני דסוסיא ואחית צלמתא בגו צרתא ומתח צלוי בקשתא ושדי בה ואמור על כל סלוא מן אקדתס ועד פרסוסי יתחבל פ׳ב׳פ׳ וי׳ת׳ד׳ מ׳נ׳ך׳.
>
> If you wish to kill a person, take mud from the two banks of the river and make a figurine and write his name on it. And take seven thorns from a withered date palm and make a bow of *huskaniata* wood and strands of horse hair and put the figurine in a cloth bag and stretch the thorns in the bow and shoot it (the figurine) and say over every thorn from *'QTDS* until *PRSWSY* may N, son of N, be injured, and he will be removed from you.[79]

The preparation of mimetic figurines (what we might call 'voodoo dolls') to represent the aggressive ritual's intended victims is, of course, an almost universal practice, but the instruction to take mud from the two banks of the river is far from common and finds a close parallel in older Babylonian magical praxis.[80] And the use of palm-thorns (סילוי) as arrows with which to shoot the clay figurine is also very specific and fits extremely well with the *Pishra*'s reference to an aggressive magical ritual carried out by means of clay (חספא) and palm-thorns (סילוי). Thus, we seem to be seeing the same magical practice, or two close variants thereof, once from the aggressive side and once from the apotropaic side.

(d) Some Versions of Sefer haQevitsa

Sefer haqevitsa (the Book of gathering [of demons]) is a text, or a cluster of texts, written in Judeo-Arabic, Hebrew and Aramaic, whose aim is to gather demons to a certain place, to adjure them and thus to make

79 I cite the text from Harari, *Ḥarba deMoshe*, p. 42, and the translation from idem, 'The Sword of Moses,' p. 89, with minor modifications. The corrupt textual sequence ויתדמנך at the end of the recipe might be derived from דמך, in which case the translation would be: 'and he shall be laid low.'

80 See Geller, 'Mesopotamian Love Magic,' p. 132.

them subservient to the adjuring practitioner. Both the aim and the praxis involved, as well as the names of some of the demons adjured, point to a strong Arabic-Muslim influence on this body of texts.[81] And yet, the texts seem to incorporate some older materials, including demons who are known to us exclusively from the Babylonian Jewish magical tradition of late antiquity. Note, for example, the appearance, in one published Geniza fragment of this literature, of the demons שפטין … וסטנין וברקו[תא] ופגעא ופלגא ודחלולי ימא ודחלו[לי] ליליא … ורוחא דיתבא בליבא … ורוח כומרי ורוח פתכרי ואסתרתא … ולוטבין בישין … מיני דנחוש … מיני איגרי … ומיני טולי ומיני דיקלי … וכל זיקין ומזיקין and so on.[82] All these demons find clear parallels in the bowls (in some cases, in slightly different spellings), and their clustering here is far too thick to be a mere accident. Moreover, in another Geniza fragment the demons are adjured:

> ותבואו מארבע רוחות השמים ותביאו לי עמכם את המלכה ששמה ארגז בת קטט דיתבא על נהרות מיטרא[83] דפרת היא וכל חייליה ... שלא יקרא (!) אתכם מה שה יקרא[84] בגוגרום מדינתא אתר דמתקלין תמן כל שדין וכל רוחין באתון נורא יקידתא.
>
> And you shall come from the four directions and bring to me with you the queen whose name is Argaz daughter of Qaṭaṭ, who sits on the rivers ??? of the Euphrates, she and all her soldiers ... so that you will not suffer the same fate as what happened in the town GWGRWM,[85] the place where all demons and spirits are burnt in a furnace of blazing fire.[86]

The geographical reference to the Euphrates would not suffice to identify this text as building on older Babylonian materials, but the reference to

81 As was noted long ago by Scholem, 'Bilar'; and idem, 'Some Sources.'

82 Schäfer and Shaked, *Magische Texte*, II, no. 54 (= T-S NS 322.29), 1a/6–1b/11. Other published Geniza fragments of this text, such as *ibid.*, I, no. 6 (= T-S K 1.1) display no Babylonian features, and the same is true of many unpublished fragments.

83 In JTS 3513.11, the reading is מישרא.

84 Lege: מה שקרה.

85 Or, 'inside (בגו) the town GWRM.' I am grateful to James Nathan Ford for this suggestion.

86 T-S NS 307.6, with a parallel in JTS 3513.11. Parts of this text (but not those that interest us here) are paralleled in Schäfer and Shaked, *Magische Texte*, III, no. 66 (= T-S AS 142.15 + T-S NS 246.14), 1b/11–34.

the demoness ארגז בת קטט is extremely revealing. Not only is this type of personal name for a demon extremely common in Babylonian Jewish magic (including אגרת בת מחלת, mentioned in BT *Pesaḥim* 112b), but this specific name appears in two bowls, as ארגז בת קסס.[87] And while I have not yet been able to identify the town GWGRWM (or GWRM) and the story about the place where demons are burnt, I suspect that it is in the Babylonian incantation bowls, or in earlier Babylonian magical texts, that the answer to this crux shall be found.[88] Be this last point as it may, some older Babylonian Jewish sources seem to lurk behind at least some of the medieval *Qevitzah* texts, so popular among Jews in the Muslim but also in the Christian world from the Middle Ages onwards.

Looking at the results of the above enquiries, we may note that they are mixed. On the one hand, there is no doubt that the *Ḥarba deMoshe*, the *Havdala deRabbi Aqiba* and the *Pishra deRabbi Ḥanina ben Dosa* have at least some components that go back to Babylonian Jewish magic of the Sasanian period. In and of itself, this conclusion should suffice to convince us that late-antique Babylonian Jewish magic was not a dead-end street, and that the fact that the production of Aramaic magic bowls ceased some time in the seventh or eighth centuries does not mean that the Babylonian Jewish magical tradition completely died out at that time. On the contrary, we may conclude that there were many other forms of Jewish magical activity in Sasanian Babylonia, and that the instructions for some of these activities kept on being transmitted and were incorporated into texts such as the *Havdala*, the *Ḥarba* and the *Pishra*. We may even conclude that some of the longer spells inscribed upon the bowls kept on being transmitted even after such bowls were

87 See Gordon, 'Aramaic and Mandaic Magical Bowls,' Bowl H (p. 87), l. 8; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, JBA 55 (=MS 1928/1), l. 3. Another female demon who seems to re-emerge in later Jewish traditions is Buznai, daughter of Zanai Lilith, who is found in some bowls (see especially Müller-Kessler, 'The Story of Bguzan-Lilit'), and who appears in a midrashic text in T-S C 1.3 (ed. Ginzburg, 'Hagadot qetu'ot,' pp. 66–67) as פיזנא and as אפיזנא בת פיזנאי לילית, as was first noted by Shaked, 'Popular Religion,' p. 112.

88 For an illuminating parallel, see bowl MS 1927/9, ll. 5–6: שבילכי אם לא תשני אירמי יתיכי לחצקר חצב גובא אתר דירמן שידייא כולהון, 'If you do not change your path, I will cast you into HẔQR HẔB, the pit, the place (into which) all demons are cast.' The text was published in Shaked, 'Form and Purpose,' p. 27, and the reading was corrected by Matthew Morgenstern. I am grateful to James Nathan Ford for bringing this parallel to my attention.

no longer being produced, and several spells probably were woven into the *Havdala deRabbi Aqiba*. As we shall soon see, this conclusion gains much support from the evidence provided by individual recipes transmitted in medieval and later Jewish magic.

Jewish Magical Recipes of Mesopotamian Provenance

When we move from the rather limited inventory of longer Jewish magical texts to the thousands of Jewish magical recipes preserved individually or in larger compendia in hundreds of Geniza fragments and non-Geniza manuscripts, we find ourselves in a similar situation as before. On the one hand, some of these magical recipes may securely be attributed to late-antique Palestine, while others are demonstrably medieval in origin and often borrowed from Muslim or Christian sources.[89] On the other hand, a vast majority of the relevant recipes are quite 'timeless' in nature, and it is difficult to ascribe them to specific chronological or geographical places of origin. Thus, the search for magical recipes whose ultimate origins lie in late-antique Babylonia is tantamount to searching for a few needles in the proverbial haystack. And yet, such needles may be identified, as we shall see from the following few examples.

(a) The first example is perhaps the clearest evidence currently available for the continuous transmission of the spells found in Aramaic magic bowls.[90] It is found in a Geniza fragment, HUC 1029, probably dating to the twelfth century, where we find traces of two magical recipes, one of which is formulated as a *get* (a deed of divorce) for the demoness Lilith. Not only is the practice of writing deeds of divorce for the demons extremely popular in Babylonian Aramaic bowls (and even in some Syriac and Mandaic bowls), but the text of the Geniza fragment closely parallels one of the commonest variants of the divorce deed found on the bowls.[91] In this case, there is no doubt that the medieval recipe is directly based on a spell originating in Sasanian Babylonia, but it also

89 And see above, notes 58–60.

90 For a fuller discussion of this example, see Levene and Bohak, 'Divorcing Lilith.'

91 In addition to the bowls cited in the paper mentioned in the previous note, we may now note this spell's appearance in Shaked, Ford and Bhayro, *Aramaic*

seems quite clear that this spell was not very popular in the Middle Ages, since this is the only Geniza fragment of which I am aware that preserves it, and I have not yet found it in any non-Geniza manuscripts of Jewish magic.

To this example of direct continuity, one or two more examples may be added of long spells that appear both in unpublished bowls and in published magical texts from the Cairo Geniza.[92] In addition, several other published Geniza magical spells and recipes have some parallels in the bowls or are likely to be of late-antique Babylonian origins.[93] Surveying all these fragments would be out of the question here, but the number of potential candidates is quite small, making it clear that most of the published magical recipes from the Cairo Geniza are not likely to be of a Babylonian Jewish origin.

(b) Turning from the published Geniza magical texts to the unpublished ones, we find ourselves in a similar situation, with only a few recipes that are likely to be of a Babylonian Jewish origin. One such case is T-S Misc. 34.22, a parchment bifolium inscribed in several different hands, all dated by Edna Engel to the tenth century. It contains a Judeo-Arabic commentary on Deuteronomy 2 and 3, an elaborate drawing of a menorah, labelled מנרת שפטים, and – on a page probably left blank in the original manuscript – two magical recipes:

לאהבה בשם גבריאל ומיכאל ורפאל וח?[סדיאל? ו...] / אתון ה׳ מלאכין דיממניין
על גנין[94] ו... / [ ]ומזומן לה בהיך בהיך אסא ב׳א׳ל׳ה׳א׳ רב?. דבר ... א? / וחזוא

Bowl Spells, JBA 15 (MS 1927/43), 19 (MS 2053/132), 24 (MS 2053/251) and 62 (MS 2053/242).

92 These examples are studied in a forthcoming publication by James Nathan Ford.

93 See Kwasman, 'Demon of the Roof,' for a cluster of Babylonian demons found in a recipe in Schäfer and Shaked, *Magische Texte*, I, no. 2 (= T-S K 1.56) and *ibid*., no. 20 (= T-S K 1.147). Another published Geniza fragment that is likely to preserve magical recipes of Babylonian-Jewish origin is Mosseri Ia 26.2 (published by Goitein and Friedman, *Abraham ben Yijû*, pp. 418–421), a collection of magical recipes apparently copied by Abraham ben Yijû in Aden; recipe no. 4 contains an interesting first-person *historiola*, and a reference to דנהש, who is probably identical with דנחיש, for whom see Shaked, 'Bagdâna,' pp. 520–522, and Müller-Kessler, 'Dan(ḫ)iš.' See also Shaked, 'An Early Geniza Fragment,' for a fragment that is unique and therefore harder to classify.

94 Lege: גנון.

96 Lege: טרפי? Or maybe טאסי, ‘foils’ → ‘leaves’?
97 Perhaps תם or תמת.
98 For Jewish erotic magic, see Saar, *Jewish Love Magic*.
99 The duplication is probably a result of scribal dittography.
100 For the Persian loanword ביסתרקא, ‘bedding, mattress, carpet’, see Sokoloff, *Dictionary*, p. 204.
101 This type of aggressive action of sending fire or fever against someone is extremely common; see, for example, Naveh and Shaked, *Magic Spells and Formulae*, G16 (= T-S K 1.91 + K 1.117), p. 7, l. 1; Schäfer and Shaked, *Magische Texte*, III, no. 56 (= T-S Ar. 44.26), 1b/3; *ibid*., no. 60 (= T-S K 1.120), 1a/4, 10.
102 For the use of human skulls in late-antique Jewish magic, see Levene, ‘Calvariae Magicae.’

not be extinguished from him until I desire (so). 'And the people com[plained]' (Num 11:1) in its entirety. Write (all this) on a day-old egg and bury it at his gate.

Several factors argue for a Babylonian Jewish origin of these two recipes. In the first recipe, in addition to some Babylonian Aramaic forms such as נשגי, the separation of the preposition כי from the subsequent noun (כי בסתרקיך) and the Persian loanword בסתרקיך, 'mattress,' we may note that the formula תשתחן ותשתגר ותשבב is closely paralleled in one of the erotic bowls published by Montgomery.[103] Another formula, נשגי ממללה בפומה ולישנה ביני ספוותה, is partly paralleled in a bowl published by Shaked, where the damages caused by the spirit that afflicts the poor targets include ומשגשא לישנה בפומה, 'and it confuses her tongue in her mouth.'[104] And in the second recipe, the spell is partly paralleled by a similar formula found in the Damascus magical recipe book to which we shall soon turn.[105] All this does not amount to a clear proof of a Babylonian Jewish origin, but it certainly makes such an origin very plausible.

To this example, several others may be added of unpublished Geniza magical spells and recipes that display some sign of a Babylonian Jewish origin.[106] And yet, the total number of such recipes seems

103 See Montgomery, *Aramaic Incantation Texts*, Bowl 28, ll. 1–2 (p. 213): לשמיה דאנור .. בר פרכוי דנישתיחן ונישתגר ונישתבב בתר אחת בת נבאזך (Montgomery reads the second verb as ונישתנר). A similar but much longer series of verbs appears in an unpublished Geniza fragment, JTS 3320.7. For other parallels, see Levene, *Jewish Aramaic Curse Texts*, p. 85 (VA 2492), ll. 2–3: נישחנוניה ונישבבניה ונירדוניה ונישגרוניה, and cf. *ibid*., p. 118 (039A), l. 13, and p. 81 (VA 3381), l. 16.

104 See Shaked, 'Peace Be upon You,' p. 207 (Bowl M1, ll. 11–12).

105 See below, note 107. The spell there reads גולגולתא גפנם וני?סגף / אי?שבעית עלך נורדפיס סטנא דתיזיל / [ות]פ?יל אשתא על פ׳ב׳פ׳, 'Skull, GPNM WNYSGP, I have adjured you, NWRDPYS the satan, that you shall go and cast fire upon NN.'

106 I note, for example, T-S K 1.67, where one finds the sequence ויתנצל מן נחי..א ומן ממללתה / ומן כל חרשין בישין ועובדין / תקיפין ומן רוחי בישתה וחומרי / זנייתה זידניתה, 'and he shall be saved from ??? and from (evil) words and from all evil sorceries and powerful (magical) actions, and from evil spirits and fornicating (or 'evil,' which is the common formula in the bowls) amulet spirits.' This amulet was written for Nûmeir bar Qûbîha, the same individual for whom the spell in T-S K 1.26 (Schäfer and Shaked, *Magische Texte*, II, no. 45) was written – a spell which, as noted by James Nathan Ford, also displays clear parallels with the bowls. T-S Misc. 10.90 bears the title (written

exceedingly small, given the large number of magical texts from the Cairo Geniza, and the presence there not only of magical spells and recipes whose late-antique Palestinian provenance is quite clear, but even of a Babylonian Jewish text like the *Pishra deRabbi Ḥanina ben Dosa*.

(c) From the Cairo Geniza we may turn to a very curious find, namely, a booklet with magical recipes, possibly dating to the eleventh century, found by Bruno Violet in the Geniza of the famous Mosque in Damascus.[107] In this case, both the Aramaic dialect and some of the specific parallels with the bowls argue for a Babylonian Jewish origin, and the Damascene provenance of the booklet itself certainly could support such a hypothesis. Moreover, very little in this booklet is derived from or influenced by the Greco-Egyptian magical tradition or by Christian or Muslim magic. Thus, while there is no way of accurately measuring the 'antiquity' or 'Babylonian-ness' of each of its recipes, we seem to have here a good starting point for the study of Babylonian Jewish magic as it survived, and was perhaps also modified, in the Early Islamic period, in a region not far removed from Babylonia.[108] What is perhaps most interesting about this find is that the booklet's magical recipes have few clear parallels among the many thousands of magical recipes found in the Cairo Geniza or in non-Geniza manuscripts, which might show that while the Babylonian Jewish magical tradition survived the Muslim conquest, its remains kept on fading into oblivion in subsequent centuries, apart from the few exceptions surveyed here.

(d) From the Jewish Geniza of Cairo and the Muslim Geniza of Damascus we move to non-Geniza manuscripts of Jewish magical recipes – that is, to manuscripts that normally do not date from before the thirteenth or fourteenth centuries. This vast field has never even been

in a strange script!) קמיעות מבחנות מבבל, 'tested amulets from Babylonia,' but the recipes themselves do not seem particularly Babylonian. JTS 3753.9–10 has an interesting *historiola* about Mt. Hermon and a demon, which might be of Babylonian Jewish origin.

107 See Bohak and Morgenstern, 'A Babylonian Jewish Aramaic Booklet.'

108 One obvious modification is the translation of some of the instructions, which must originally have been written in Aramaic, into Judeo-Arabic, a phenomenon that is extremely well attested in the magical recipe books from the Cairo Geniza as well.

charted, let alone studied in greater depth.[109] I therefore limit myself to a single manuscript that I know well: NYPL 190 (formerly Sassoon 56), a fifteenth-century compendium of magic and Kabbalah produced in an unknown location (but certainly somewhere in the Arabic-speaking world), of which I have prepared a complete critical edition.[110] In this manuscript, recipe no. 124 ('For the evil eye') on pp. 111–112 displays clear signs of the Babylonian Jewish origins of at least some of its components, the clearest of which is the following formula:

אשבעית עליכון כל חרשין בישין וכל / עובדין תקיפין בשם סלגס סליגס אדרקס אדריקס נקיקיאל קבניאל / אתון מלאכיא קדישיא דממנן על חרשין בישין ועל עובדין תקיפין / ובישין עבידו לפ׳ בן פ׳ פשרתא ואסותא אם חרשי יהודאי עבידו לה / פשרו[111] ופשרו לה אם חרשי ארמאי עבידו לה פשרו ופשרו לה אם חרשי / טיאעי עבידו לה פשרו ופשרו לה אם חרשי פרסאי עבדו לה פשרו ופשרו / לה ואם במיא ובמילחא צתרי במיכלא ובמשתיא וכל לבושא וכסויא וכל / מדעם מאית בעלמא עבדו לה פשרו ופשרו ותהא ליה אסותא א׳א׳א׳ סלה.

I adjure you, all evil sorceries and all powerful (magical) deeds, in the name of SLGS SLYGS 'DRQS 'DRYQS NQYQY'L QBNY'L, you holy angels who are appointed over evil sorceries and powerful and evil (magical) acts, accomplish for NN a spell-loosening and a healing. If Jewish sorcerers performed (witchcraft) upon him, loosen[112] and loosen him; if Aramean sorcerers performed (witchcraft) upon him, loosen and loosen him; if Ṭayya'ei sorcerers performed (witchcraft) upon him, loosen and loosen him; if Persian sorcerers performed (witchcraft) upon him, loosen and loosen him. And if with water and salt ??? in food or drink and any garment and covering and any dead thing in the world they performed (witchcraft) upon him, loosen and loosen (him), and may there be health for him, A(men) A(men) A(men) Sela.[113]

109 For some useful starting points, see Trachtenberg, *Jewish Magic and Superstition*; Benayahu, '*Shoshan yesod ha'olam*'; Scholem, *Kabbalah*, pp. 182–189; and Harari, 'Jewish Magic.'

110 See Bohak, *A Fifteenth-Century Manuscript*.

111 Here and in what follows, the original formula must have been שרו ופשרו ליה.

112 The original text must have read 'release and loosen him' – see the previous note.

113 NYPL 190, in Bohak, *A Fifteenth-Century Manuscript*, I, pp. 155–156; II, p. 112, ll. 19–26.

Three different arguments may be adduced to support the late-antique Babylonian Jewish origins of this spell. The first is that the last section closely resembles in its logic and phraseology the *Pishra deRabbi Ḥanina ben Dosa*, even if the specific aggressive magical activities mentioned here are not mentioned in the *Pishra*. The second is the geographical and chronological logic of the references to Jews, Arameans (which may mean nothing more than 'Gentiles'), Persians and Ṭayya'ans (i.e., pre-Muslim Arab tribesmen), the latter being well known from the Babylonian Talmud. Clearly, whoever composed this spell lived in a time and place where Persians and pre-Islamic Mesopotamian Arabs were the Jews' close neighbors.

But the third and most conclusive argument is that this very formula is attested on one of the Babylonian incantation bowls, where it reads:

> ויבטלון ... חרשין / ארמאין חרשין יהודאין חרשין טיאעין חרשין פרסאין חרשין הינדואין חרשין יונאין חרשין די כיתין חרשין / דמיתעבדין בשבעין לישנין.
>
> And there shall be annulled ... Aramean sorceries, Jewish sorceries, Ṭayya'an sorceries, Persian sorceries, Indian sorceries, Greek sorceries, Roman sorceries, sorceries that are performed in (each of the) seventy languages.[114]

The identity between the two spells is quite clear, and the fact that almost a full millennium separates the Aramaic bowl and the manuscript with magical recipes written in the 1460s by a certain Moses, son of Jacob and Marḥaba, proves that at least some Babylonian Jewish magical spells kept on being transmitted even long after the incantation bowls were no longer produced. Unfortunately, it is not easy to tell how much of the fifteenth-century recipe goes back to late-antique Babylonia, but an examination of its other components, and the reconstruction of some unpublished Geniza parallels to them, will no doubt shed more light on this issue. It is also impossible to say whether the fact that this is an Oriental manuscript, produced by an Arabic-speaking Jew who may have lived in or come from one of the large cities of present-day Syria or Iraq, makes it more likely that its producer came across magical

114 See Gordon, 'Aramaic Magical Bowls,' bowl D (p. 328), l. 9. In the original publication, Gordon read טיאעין as שיאעין, 'Shiites,' but he corrected his mistake in idem, 'Aramaic and Mandaic Magical Bowls,' p. 106.

formulae whose origins lie in Sasanian Babylonia. Only after much further research, and detailed studies of many other manuscripts, will the answers to such questions become somewhat clearer.

Conclusions and Desiderata

Having searched for the remains of late-antique Babylonian Jewish magic in several different textual corpora, I may now offer some broader conclusions and note in which areas more research is still needed. First and foremost, we may safely assert that even when all the above-mentioned criteria are used, and the relevant texts are isolated from the vast corpus of medieval and later Jewish magical texts, we would still face a body of sources that suffers from two disadvantages vis-à-vis the bowls. On the one hand, for most of these texts we can never be absolutely sure that they are late-antique and Babylonian in origin, unless we find detailed parallels in the bowls themselves. Moreover, we can never assume that they present the text in its 'pure' form, whatever that might mean, for we are dealing only with much later copies of copies of whatever original texts may have been in circulation in Sasanian Babylonia.

Going into greater detail, we may note the need for a fuller assessment of the relationship between Babylonian Jewish magic as reflected in the bowls and that reflected in the Babylonian Talmud. To offer such an assessment, we must not only gather all the textual parallels between these two corpora, but also analyze the function and context of each of these parallel units in the bowls on the one hand and in the Talmud on the other. Moreover, we must note especially those areas where the Babylonian Talmud helps us study those facets of ancient Babylonian Jewish magic that are not well represented by the bowls, in order to arrive at a more balanced view of what late-antique Babylonian Jewish magic may have looked like.

A second conclusion that emerges from our survey is that magical texts such as the *Havdala deRabbi Aqiba* or the *Pishra deRabbi Ḥanina ben Dosa* often are easier to identify as Babylonian in origin than individual magical recipes. The reason for this is that such texts were often seen by their copyists as complete units and thus enjoyed a certain degree of textual stability (as may be seen, for example, in the different manuscripts of the *Pishra*), whereas individual recipes were

often translated, abridged, simplified or modified in other ways. Thus, the more often a recipe was copied, the less likely it was to retain its original wording and therefore also the markers of its ultimate origins. In this regard, one may note another scholarly desideratum: the re-edition of the *Pishra deRabbi Ḥanina ben Dosa*, and perhaps also of *Sefer hayashar* and *Sefer hamalbush*, in light of new textual evidence, especially from the Cairo Geniza. To this may be added the renewed search for the long-lost *Raza rabba*, which must have enjoyed some circulation in the ninth and tenth centuries, after which it seems to have vanished.

A third conclusion that emerges from our survey is that the bowls' limited spheres of interest inadvertently limit our ability to look for Jewish Babylonian magic in other textual corpora as well. As we saw, when we compile a list of 'textual markers' that are specific to the Babylonian incantation bowls, this list ends up containing mostly the names and classes of the different demons of Sasanian Babylonia. Thus, when we look in later Jewish magical texts, a list of demons found in the *Havdala*, or a specific female demon found in *Sefer haqevitsa*, or a *get* against demons in a fragment from the Cairo Geniza may all securely be identified as building on earlier Babylonian sources. But when we look at erotic and aggressive magical texts from the Cairo Geniza, we find that they have very few precedents among the incantation bowls, and we can therefore point to very few specifically Babylonian 'textual markers.' And, the fewer the comparanda, the less secure we must remain about these recipes' place in the Babylonian Jewish magical tradition, leaving us trapped in a vicious circle, like demons trapped in a bowl.

What all this means is that with the sources currently at our disposal, we are not likely to have a large body of non-bowl texts that can securely be used as evidence for late-antique Babylonian Jewish magic. As noted at the outset, the enormous advantage of the bowls is that they come from Mesopotamia and that they are late-antique objects; none of the other sources at our disposal can be used 'as is' as evidence for late-antique Babylonian Jewish magic, and some of it can only tentatively be classified as Babylonian. At the same time, the fact that we have some non-bowl texts that can securely be seen as later copies and reworkings of Jewish magical texts of Babylonian Jewish origin, and that each of these texts reached us through different channels of

transmission, leaves some room for optimism. Once more such sources are identified, published and analyzed, and with the ever-growing corpus of incantation bowls at our disposal, we will be on a much surer footing in our study of late-antique Babylonian Jewish magic.[115]

Babylonian Jewish Magic in Late Antiquity
Beyond the Incantation Bowls

Gideon Bohak

Babylonian Jewish Magic and the Aramaic Incantation Bowls

Upon their first discovery, in 1853, the Babylonian incantation bowls seem to have aroused little scholarly attention.[1] A few studies were devoted to the edition and interpretation of several bowls, and there was some discussion of their chronology, their original mode of use, their relationship with rabbinic Judaism and their possible overall significance. But the scholars who studied the bowls were mostly busy establishing the correct reading and understanding of the texts inscribed upon these clay bowls, a task that proved exceptionally difficult, especially at a time when very few bowls were known, and when publications were not yet accompanied by images of the bowls themselves, so that different scholars had access to different bowls – in Paris, Cannes, London, Berlin, Philadelphia and elsewhere.[2] And yet, going through these earlier publications, one has a feeling that none of the scholars involved realized that these humble clay bowls would one day furnish a

1 I dedicate this study to Professor Shaul Shaked, mentor, friend, and path-breaking scholar, whose immense contributions to the study of Jewish magic, and especially of the Aramaic incantation bowls, made the present study possible.

2 For the most important publications, see the bowls published by Thomas Ellis in Layard, *Discoveries*, pp. 509–526; Schwab, 'Une coupe d'incantation'; idem, 'Les coupes magiques'; idem, 'Coupes à inscriptions magiques'; idem, 'Deux vases'; Hyvernat, 'Sur un vase judéo-babylonien'; Wohlstein, 'Über einige aramäische Inschriften'; Lacau, 'Une coupe d'incantation'; Myhrman, 'An Aramaic Incantation Text.' Most, but not all, of these bowls have since been re-edited in the more recent publications listed below. Here and in what follows, I essentially ignore the Syriac and Mandaic incantation bowls, since my focus in on Babylonian *Jewish* magic.

major source for the study of late-antique Mesopotamia in general, and of late-antique Babylonian Jewish culture in particular.[3]

It was only sixty years after the initial publications, and just over a full century ago, that Montgomery's exemplary edition of the Nippur incantation bowls in the University of Philadelphia's Museum provided other scholars with a sound textual basis on which to base their own analyses of unpublished bowls and of the bowl phenomenon as a whole.[4] This line of research was continued by Montgomery's disciple, Cyrus Herzl Gordon, and by Gordon's own disciples, such as Mark Geller and Edwin Yamauchi.[5] But It gained new prominence with the publication of the two volumes of Aramaic magical texts by Joseph Naveh and Shaul Shaked, in 1985 and 1993, and the subsequent publications of important corpora by Shaul Shaked, Dan Levene, Christa Müller-Kessler and many others.[6]

Today, we are on the threshold of a new era in bowl studies, with the appearance of the first volume of the Schøyen collection of incantation bowls, edited by Shaul Shaked, James Nathan Ford and Siam Bhayro.[7] Once all projected nine volumes of the Schøyen bowls are published (and especially the five volumes devoted to bowls written in Jewish Babylonian Aramaic), the corpus of published Aramaic incantation bowls will become one of the largest Jewish textual corpora from Antiquity, almost as large as the Babylonian Talmud itself. And even this will not end the stream of publications, since more bowls surface on the antiquities markets all the time, and many bowls in museums and

3 They are mentioned only briefly by Blau, in *Das altjüdische Zauberwesen*, p. 154, note 2, and idem, 'Amulet,' p. 547. Thus, even the greatest scholar of Jewish magic of the late nineteenth century was not yet aware of their importance.

4 Montgomery, *Aramaic Incantation Texts*.

5 For the most important publications, see Gordon, 'Aramaic Magical Bowls'; idem, 'Aramaic and Mandaic Magical Bowls'; idem, 'Aramaic Incantation Bowls'; idem, 'Magic Bowls in the Moriah Collection'; Rossell, *A Handbook*; Jeruzalmi, *Les coupes magiques*; Isbell, *Corpus*; Geller, 'Four Aramaic Incantation Bowls'; and idem, 'Eight Incantation Bowls.'

private collections remain unpublished.[8] In fact, no one really knows how many unpublished bowls are out there already, and once Iraq regains its former stability, new archaeological excavations are bound to lead to the discovery of many more Aramaic incantation bowls.

The Babylonian Aramaic incantation bowls are an important source for the study of Babylonian Jewish magic and of Babylonian Jewish culture as a whole.[9] They present four major advantages over most other types of textual sources currently at our disposal for the study of ancient Jewish culture. The first is that, in the world of the bowls, there seems to be a close connection between a bowl's language and script and the ethnic or religious identity of its producers. At the very least, one may definitely assume that bowls written in Aramaic and in the square script were produced by Jews (though not necessarily for Jewish clients). The hundreds of bowls in this category that have been published thus far display many signs of the Jewish origins of their producers, and no Aramaic bowl displays clear signs of having been produced by a non-Jewish practitioner. This gives the Aramaic incantation bowls a vast advantage over such magical texts as are found, for example, in the Greek magical papyri, some of which may have been produced by Jews, but most of which probably were not, even if they display some Jewish influence. More important still, the Aramaic incantation bowls provide a much more reliable body of evidence for the study of late-antique Jewish culture than the massive body of evidence assembled by

8 For some of the most recent publications, see Gorea, 'Trois nouvelles coupes'; Moriggi, 'Aramaean Demons'; idem, 'Two New Incantation Bowls'; Abousamra, 'Une nouvelle coupe'; Abousamra and Lemaire, 'Bol magique'; Faraj, 'An Incantation Bowl'; Ford, 'A New Parallel'; Ford and Ten-Ami, 'An Incantation Bowl'; Levene and Bohak, 'A Babylonian Jewish Aramaic Incantation'; Levene and Ford, 'For Aḥata-de-'abuh Daughter of Imma'; al-Jubouri, 'An Aramaic Incantation Bowl'; idem, 'An Aramaic Incantation Text'; idem, 'A New Aramaic Incantation Bowl'; Fain, Ford and Lyavdansky, 'Aramaic Incantation Bowls'; and cf. Frankfurter, 'Scorpion/Demon.'

9 For detailed surveys of the bowls and their significance, see Yamauchi, 'Aramaic Magic Bowls'; Isbell, 'The Story'; Shaked, 'Popular Religion'; idem, 'Jews, Christians and Pagans'; idem, 'Magical Bowls and Incantation Texts'; Levene, *Curse or Blessing*; Harari, 'On the Trail,' pp. 59–67; idem, *Jewish Magic*, pp. 234–251; Morony, 'Magic and Society'; idem, 'Religion'; Bohak, *Ancient Jewish Magic*, pp. 183–193; and Müller-Kessler, 'Zauberschalen und ihre Umwelt.'

Erwin Goodenough for his monumental work on Jewish symbols, most of which probably is non-Jewish to begin with.[10]

A second advantage of the Babylonian incantation bowls is that they come from Babylonia itself and are late-antique objects, not medieval copies of late-antique texts. This means that, unlike many other bodies of ancient Jewish literature (such as most of the Apocrypha and Pseudepigrapha), their chronological and geographical coordinates are well known. In this respect, the bowls may even help us peg down some texts whose original contexts are far more obscure. Thus, to give just one example, when we find Hekhalot-related motifs, and even rather extensive passages known to us from the Hekhalot literature, in some of the Babylonian incantation bowls, we can be certain that these motifs and textual units were already in circulation in late-antique Babylonia.[11] This does not necessarily mean that they began their life there and not in Palestine, and it does not really tell us how much older they may have been, but it does provide a firm *terminus ante quem*, and one specific geographical and social context, for the early transmission of at least some textual components of the Hekhalot literature. This evidence is of great importance, since it dates to long before the references to the Hekhalot literature in the responsa of Sherira Gaon and Hai Gaon or in the *Scroll of Aḥimaaz*, and even longer before the earliest Geniza fragments of this literature, not to mention the much later manuscripts of European origin.[12]

The third reason why the bowls are such an important source is that they come in great abundance and that each bowl carries a relatively long text. Unlike tombstones, for example, which often come in great abundance but tend to be quite short, and in many cases highly formulaic and thus extremely repetitive, a typical bowl provides us with the equivalent of half a page of printed text; and while many textual

10 See Goodenough, *Jewish Symbols*.

11 For a pertinent example, see Bohak, 'Observations,' pp. 220–222; for the formula discussed there, see now Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, JBA 9 (MS 2053/183), ll. 16–17. The pioneering study in this field was Shaked, 'Peace Be upon You,' and cf. idem, 'Jewish and Iranian Visions'; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 23–27; and Müller-Kessler, 'Eine ungewöhnliche Hekhalot-Zauberschale.'

12 For a useful introduction to these complex issues, see Boustan, 'Study of Heikhalot Literature.' For the earliest manuscripts of the Hekhalot literature, see Bohak, 'Dangerous Books.'

units recur in more than one bowl (often with some variation between the different parallels), the number of different textual units found in the entire corpus amounts to many hundreds. These units range in length from a line or two to ten or twelve lines of printed text, and they often contain one or two larger spells along with a plethora of smaller textual units and recurrent formulae.[13] And they have much to tell us about many aspects of Sasanian Jewish society and culture, including language, onomastics, family structures, levels of literacy, Jewish/non-Jewish cultural and social contacts, and even the knowledge and use of such texts as the Hebrew Bible, the Mishna and the Jewish liturgy. For scholars used to reconstructing ancient cultures from their scanty textual remains, this is an extremely important body of evidence, which has not yet been utilized for all that it has to offer.

Finally, a fourth major advantage of the bowls is that they clearly stem from more than one site. This is a rather sensitive issue, since most of the bowls that have come out of Iraq over the last two decades were looted from unknown locations, but those that were excavated in more peaceful times often are of a known provenance. A full study of all these different findspots, and of the possible differences between bowls found in different locations, has yet to be carried out, but enough is known about bowls from Babylon (such as those published by Ellis), Nippur (such as those published by Montgomery), Khafajah, Kish, Tell Baruda (Ctesiphon), Bidjan, Tel Omar (Seleucia), Borsippa and some sites in Western Iran to assure us of their wide geographic distribution.[14] Thus, it is clear that these bowls are not the product of some aberrant social

13 For a pioneering attempt to sort out the different *types* of textual units found in the bowls and disentangle the logic of their internal arrangement, see Shaked, 'Transmission and Transformation of Spells'; see also Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 8–13.

14 See Cook, 'An Aramaic Incantation Bowl' (Khafajah); Gordon, 'Aramaic Incantation Bowls,' pp. 129–130 and pp. 276–280 (Kish); Franco, 'Five Aramaic Incantation Bowls' (Tel Baruda); Gawlikowski, 'Une coupe magique' (Bidjan, near Anah); Waterman, *Preliminary Report*, pp. 61–62 (Tel Omar); Harviainen, 'An Aramaic Incantation Bowl' (as this bowl was bought in Borsippa, and not excavated in situ, its provenance is less certain). For bowls from Western Iran, see Yamauchi, 'Aramaic Magic Bowls,' p. 512. For bowls found in other locations, see, for example, Faraj and Moriggi, 'Two Incantation Bowls,' pp. 72 and 77. And note the map provided by Müller-Kessler, 'Zauberschalen und ihre Umwelt,' which includes the Syriac and Mandaic evidence as well as the Jewish Aramaic bowls.

group or of specific local circumstances, but objects produced in great numbers, by many different producers, in many different locations, for numerous clients. As such, they represent a phenomenon that clearly is very different from that represented by the Dead Sea Scrolls, for example, or by the Gnostic library found at Nag Hammadi, each of which may have been intended for the use of one rather small group of potential readers. With the bowls, the potential readers were the demons whom the bowls were trying to thwart, but the clients on whose behalf these texts were written were both male and female, both Jews and non-Jews, living in many different towns and villages over a period of two, three or four centuries, from the fifth to the seventh or eighth centuries CE.[15]

Useful as the bowls might be, their usefulness as sources for the study of Jewish magic is diminished by several important drawbacks. On the one hand, because of the problematic ways in which they reach the markets, many bowls are without provenance and utterly devoid of any archaeological or precise geographical context. In some cases, bowls whose provenance is unknown may be ascribed to a specific location because the client for whom they were produced is known from other bowls whose provenance is known for certain, but such cases are few and far between. This is to be regretted, since the absence of provenance almost precludes any attempt to study which spells were used in which locations, and how the spells travelled from one location to the next.[16]

The lack of clear archaeological contexts for many bowls is a major handicap, but the bowls also suffer from another disadvantage, in that they are rather uni-dimensional. A vast majority of the bowls are apotropaic in nature, as they seek to bind demons and avert the dangers of witchcraft and the evil eye. In some bowls, there is implicit or explicit reference to the illnesses from which the bowls' owners suffered, and these bowls thus shed some light on the etiology of certain diseases, and the connection between magic and medicine, in late-antique Babylonia.[17]

15 The bowls' chronology is not easy to establish for certain, since very few carry specific dates or other chronological indicators, but those that do carry such indications cluster in the second half of the sixth century and in the seventh; see Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 1, note 2.

16 For a modest effort in this direction, see Hunter, 'Manipulating Incantation Texts.'

17 See, for example, Levene, *Curse or Blessing*, pp. 28–29; Ford, 'A New

But only some two dozen of the published bowls are aggressive in nature, and even these tend to be intended more to send the witchcraft back upon its perpetrators, with only six bowls containing aggressive spells that are not presented as counter-spells.[18] Only four published bowls are intended for erotic magic, and only one seeks to enhance its client's economic and social position by attracting people to his business.[19] Thus, a reading of the bowls might give us the impression that the Jews of Sasanian Babylonia were mostly busy with 'white' magic and showed little interest in recourse to 'black' magic. Some students of Jewish culture might be satisfied with such a conclusion, since this is the type of Jewish magical activity that is easiest for them to swallow.[20] But students of magic should be extremely skeptical of such a scenario, since in other magical traditions, and in the Jewish magic of later periods and even of late-antique Palestine, magical practices for aggressive, erotic, medicinal and divinatory purposes tend to be at least as popular, and often more so, than magic aimed for protection against demons and witchcraft.[21] That the bowls preserve mostly one type of magic must be because this type was committed to writing, and on writing surfaces that happen to be quite durable; that they were buried in the ground also helped preserve them for posterity. Other types of magical activity apparently involved different practices, including the manipulation of various objects, the uttering of oral spells, the writing of spells on perishable writing surfaces or their destruction during the

Parallel,' pp. 272–275; and Bhayro, 'An Aramaic Magic Bowl for Fertility.' For a broader analysis, see Bohak, 'Conceptualizing Demons.'

18 These bowls have now been collected and analyzed as a group by Levene, *Jewish Aramaic Curse Texts*. My statistics are based on his discussion, *ibid*., p. 1. And cf. Saar, 'A Study in Conceptual Parallels.'

19 For the erotic bowls, see Saar, 'An Incantation Bowl'; for the economic bowl, see Levene and Bhayro, 'Bring to the Gates.'

20 For a case in point, see Baron, *Social and Religious History*, VIII, p. 283, note 21: 'The relative paucity of erotic incantations emanating from the Jews of Nippur and elsewhere (Montgomery's text, No. 28, p. 213, invoking the aid of the goddess of love Dlibat evidently was of pagan origin) testifies to the strong hold of the regnant Jewish ethics over the popular masses and their miracle-working agents even in the obscure realm of sex.' For Montgomery's Bowl 28, see below, note 103.

21 For 'black' magic in late-antique Palestine, cf. Alexander, '*Sefer ha-Razim*'; and Bohak, 'Magical Rotuli.'

magical ritual (e.g., by burning or washing in water), and so they left no archaeological traces.[22]

Thus, I would suggest that rather than being the central sphere of Jewish magical activity in late-antique Mesopotamia, the bowls represent just one type of magical activity, but the type which produced long-lasting remains, whereas all other types left far fewer remains or none at all.[23] But this suggestion raises two related questions: (a) What do we know about the other magical practices known to and used by the Jews of Sasanian Babylonia? And: (b) What other Jewish magical texts from Sasanian Babylonia do we currently have and may we hope to find in the future? The present paper is an attempt to answer these two questions, by surveying some of the possible sources of evidence pertaining to the Jewish magical texts and practices of late-antique Mesopotamia, apart from the bowls. In what follows I shall not try to offer a full analysis of each textual corpus, but I will endeavor to raise the basic questions, point to some pertinent examples and note where further research is still needed. Moreover, as many of the relevant texts have never been published, it is my hope that the survey offered here will encourage the edition and closer analysis of these neglected sources.

Babylonian Jewish Magic in the Babylonian Talmud

The most obvious starting point for any attempt to complement the image of Sasanian Jewish magic emerging from the Aramaic incantation bowls is the Babylonian Talmud. Here we are dealing with a large body of evidence that has much to tell us about the magical practices and spells known to, taught by and sometimes even used by the rabbis of late-antique Mesopotamia.[24] Surveying all this evidence would be out

22 Note, however, a lead amulet on which the spell was written in ink, published by Geller, 'More Magic Spells,' pp. 331–334; if authentic, it could provide one more point of entry into late-antique Babylonian Jewish magic. Another relevant item is the amulet from Afghanistan (see below, note 75), which probably dates to the tenth century, and whose authenticity is hardly in doubt.

23 And note Shaked, '*Dramatis Personae*,' who highlights the differences between the magic bowls and Geniza magical texts, and stresses, on p. 366, that 'the bowls do not reflect the whole range of magical practices used in the Babylonian environment at the time.'

24 For broad surveys of rabbinic magic and a more extensive bibliography, see

of the question here, and as the magical practices and recipes found in the Babylonian Talmud have often been studied, we may merely note two of their most important features. First, here we find numerous examples of medicinal magic, including the use of many types of amulets and the recitation of many types of spells, and some examples of anti-demonic and anti-witchcraft practices – but very little aggressive magic, no erotic magic whatsoever and very little divinatory magic. Second, most of the magical activity recorded in the Babylonian Talmud is transmitted and enacted orally; there are only a few references to the writing down of magical spells as a part of the ritual process,[25] confirming our suspicion that the Jews of Sasanian Babylonia utilized many magical practices that involved only the oral recitation of spells, without writing them down. These practices also involved the manipulation of various objects, the binding or slaughtering of animals and the burial (or hanging) of magical objects at crossroads, in cemeteries and at the entrance to one's home. Thus, the Talmud complements the evidence supplied by the bowls in terms not only of the goals sought by those who had recourse to magic, but also of the rituals enacted in order to attain those goals.

As has often been noted, the Babylonian Talmud never refers to the practice of writing down spells on clay bowls, and it seems unaware of this practice, whose apogee probably postdates the time of its redaction.[26] And yet, numerous motifs appear both in the Babylonian Talmud and in the Aramaic incantation bowls, including specific rabbinic, demonic and angelic figures, shared legal and liturgical formulae, similar uses of

Blau, *Das altjüdische Zauberwesen*; Goldin, 'Magic of Magic'; Harari, 'The Sages and the Occult'; Geller, 'Deconstructing Talmudic Magic'; and Bohak, *Ancient Jewish Magic*, pp. 351–425.

25 For these exceptions, see BT *Baba batra* 73a (sailors writing on wooden staffs); BT *Yoma* 84a (a spell to be written on hyena-skin); BT *Pesaḥim* 111b (two rabbinic disciples writing amulets); BT *Gitin* 67b ('Why do you need to know the demon's name? To write the proper amulet'). The Talmud also refers to books of magic (e.g., BT *Ḥullin* 13a), but these were books owned by non-Jews or laypersons, and not by the rabbis themselves.

26 The Babylonian Talmud (BT *Ḥullin* 84b, *Baba metsia* 29b) is aware of the existence of 'a sorcerers' cup' (כסא דחרשין) but attributes this knowledge to the Palestinian Rabbi Yohanan, and the ensuing discussion shows that it is not the inscribed clay bowls that the rabbi had in mind.

biblical verses and a pervasive fear of demons and witchcraft.[27] More specifically, there are some interesting overlaps between the spells found in the incantation bowls (and not found on the metal amulets from late-antique Palestine, Egypt, Italy and so on) and those recommended by the Babylonian Talmud, thus showing that both textual corpora share some of the magical know-how of late-antique Babylonian Jewish society. These parallels have never been collected systematically, but useful starting points have been provided in several earlier studies.[28] In what follows, I wish to point to one such parallel, which has not yet been studied, and note its potential significance.

In BT *Shabbat* 67a, a discussion of the mishnaic dictum (Mishna *Shabbat* 6:10) that one may not carry (as an amulet) the egg of a locust, the tooth of a fox or a nail from a crucifixion, because these are 'ways of the Amorites,' soon leads to a dictum by Rabbi Ḥiyya bar Abin (a Babylonian *amora* of the third generation) that two specific first aid practices are not to be included under this umbrella term for forbidden practices. First, if a fishbone got stuck in someone's throat, those next to him should place a bone of the same kind on his head and say: 'One, one, went down, swallowed, swallowed, went down, one, one.'[29] Second, for a fishbone (stuck in one's throat), one should say: 'You were stuck in like a needle and you were locked up like a shield, *shia shia*' (ננעצתה כמחט וננעלתה כתריס שייה שייה).[30] The first of these spells

27 For some of these, see Ten-Ami, 'Rabbinic Motifs'; Manekin Bamberger, 'Jewish Legal Formulae'; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 22–23, 53–55, 103–104; Bhayro, 'Divorcing a Demon'; and Elman, 'Saffron, Spices, and Sorceresses.' For the rabbis who are mentioned in the bowls, see Shaked, 'Rabbis.'

28 See Segal, *Catalogue*, p. 74; Müller-Kessler, *Die Zauberschalentexte*, p. 45; Bohak, 'Babylonian Incantation Bowls,' p. 258; Mishor, 'Hebrew,' p. 224; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 55; and Manekin Bamberger, 'An Akkadian Demon.'

29 The same magical practice, but without the spell, is found in Tosefta *Shabbat* 7:21 (ed. Zuckermandel, p. 119), and in *Testament of Solomon* 18, and is attributed by Pliny, *NH* 28.49, to the Magi. This parallel has often been noted; and see Blau, *Das altjüdische Zauberwesen*, p. 76; and Veltri, 'The "Other" Physicians,' p. 51.

30 The most important manuscripts, as recorded in the Henkind Databank of the Saul Lieberman Institute, read: בגעצתה כמחט מנעלתה כתריס שייה שייה (Munich 95); ננעצתא כמחט ננעלתא כתריס שיא כשיאה (Oxford, Opp. Add. 23); (ניגע צתא) נינעצתה במחט נינעלתה כמחט נינעלתא כתריס שרא שיאה שיאה [נינעצתא] (Vatican 108);

is characterized by a chiastic structure (A, A, B, C, C, B, A, A), which in this case clearly is intended mimetically to encourage the bone that went down the throat to go back up again and join its fellow bone on the patient's head.[31] As far as I know, no parallel to this spell has thus far been found in any of the published Aramaic incantation bowls, but the chiastic structure is well attested both in the Aramaic bowls (as we shall see in one of the following examples) and in other spells recommended by the Babylonian Talmud.[32] However, the second spell is paralleled in several bowls, where it appears as דעלת כימחט דעס ביתרוס, or על כל דמחט דעלת כימחט דעס כיתרוס, or ועץ מחץ כיתרם … כיתרם מחץ ועץ דמחט כל על, or דעלת כימחט רססת כיתרס שוא פשנוש.[33] The last of these examples might even be a partial parallel to the sequence שייה שייה at the end of the talmudic spell, and in all of them we find clear parallels to the Talmud's ננעצתה כמחט וננעלתה כתריס, even though these parallels are not identical with the talmudic spell, or with each other.[34]

Reading all these parallels, one is struck by the fact that the talmudic spell is both coherent and context-specific, whereas those of the bowls are not. In the talmudic spell, most of the text, with the exception of the last two words, makes perfect sense (which definitely is not true of all the spells recommended by or recorded in the Babylonian Talmud), and this sense accords well with its intended use as a spell against a fishbone that got inserted into the throat like a needle and got locked up in there like a shield. In the bowls, on the other hand, the text of this spell makes

[שייאה שייאה](שיחשיאה) כתריס (Westminster College, Talm. II, 2 [Geniza]). Rashi *ad loc*. interprets the last two words as meaning 'Go down, go down.' The *'Arukh* of R. Nathan b. Yehiel gives them as שיח שיח and interprets them as deriving from the Aramaic root שוח, 'to melt'; see Kohut, *Aruch Completum*, VIII, p. 47.

31 See also Bar-Ilan, 'Between Magic and Religion,' pp. 394–396.

32 The clearest example being the spell הוית דפקיק הוית דפקיק, for which see Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 55.

33 See, respectively, Faraj, *Coppe magiche*, pp. 52–53, Bowl 4 (IM 148241), l. 7; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, p. 75, JBA 7 (MS 2053/12), ll. 13–14; *ibid*., p. 266, JBA 61 (MS 2053/214), l. 7. See also *ibid*., p. 254, JBA 57 (MS 2053/36), l. 8. The same formula is found in some unpublished bowls whose texts were shared with me by Dan Levene.

34 However, the readings of the bowls are complicated by the indistinguishability, in many of them, of the letters *yod* and *waw*, *bet* and *kaph*, and *samekh* and final *mem*. Thus, these parallels may be closer than what their editors' readings might lead us to believe.

no sense at all, changes from one bowl to the next and is appended to the bowls' main texts as a small appendage. Moreover, the sequence is given in Hebrew, and when the texts of the Aramaic incantation bowls shift from Aramaic to Hebrew, this usually is because they are citing pre-existing Hebrew textual units – from the Hebrew Bible, the Mishna or the Jewish liturgy, from what we now know as the Hekhalot literature and so on – which were originally transmitted in Hebrew. Finally, the word תריס, 'shield,' is a loanword from Greek (*thyreos*) that appears frequently in tannaitic sources, and while it is attested elsewhere in the Babylonian Talmud, it might point to a Palestinian origin of the entire spell.[35] Thus, we seem to have a Hebrew spell that was originally intended to help people who got fishbones stuck in their throats and that may have come to Babylonia from Palestine. In the bowls, it has nothing to do with fish or bones and appears mainly as a 'space filler,' a short formula intended to complement the longer spells that already were inscribed upon the bowl but did not suffice to fill its surface with text.

To sum up our brief discussion of the Babylonian Talmud, we may note that it is an extremely important source for the study of Babylonian Jewish magic and an excellent aid in placing the magic of the bowls in its wider social and religious contexts. On the one hand, there are enough overlaps between the bowls and the talmudic spells to assure us that they reflect the same world and stem from the same cultural environment. These overlaps still deserve a much closer scrutiny in order to highlight both the textual parallels and the contextual resemblances and differences between the two corpora, but enough has already been achieved to give us a sense of the terrain. On the other hand, the Babylonian Talmud complements the data provided by the bowls in many important ways and sheds much light on magical aims and practices that are unattested, or only partly attested, in the bowls. But even when we combine the data provided by these two major

35 Since Rabbi Ḥiyya bar Abin visited Palestine (see Hyman, *Toldoth tannaim ve'amoraim*, II, pp. 439–441), it is possible that he brought this spell with him, and that it is of Palestinian Jewish origin. That some spells of Palestinian Jewish origin found their way to the bowls is made clear by the example of the Semamit-*historiola*, for which see Naveh and Shaked, *Amulets and Magic Bowls*, pp. 188–197; Elitzur-Leiman, 'An Aramaic Amulet'; and Ford, 'New Light from Babylonia on the Story of Smamit.'

textual corpora, we cannot help feeling that large parts of late-antique Babylonian Jewish magic still lie beyond our grasp.

A Brief Note on Method

Before turning to the Jewish magical texts of later periods in search of the remains of late-antique Babylonian Jewish magic, a methodological issue must be raised: None of the evidence discussed below was found in Babylonia, nor is it preserved in late-antique manuscripts (since none from the region has survived); it comes from medieval and even later Jewish manuscripts, which we assume to contain copies of copies of much earlier texts. But this raises a grave question – reading a Jewish magical text found in medieval and later Jewish manuscripts, how would we know that it is of late-antique Babylonian origins? One criterion is linguistic, but it is problematic, because of the tendency of medieval Jewish scribes to 'normalize' Aramaic texts in line with the Aramaic of the Babylonian Talmud and of Targum Onqelos, which they knew so well.[36] Such processes are much more pronounced in the magical texts, which are non-canonical and intended for practical use, so that their language was constantly 'updated,' modified or even changed to the contemporary vernacular. As a rule, we may note that the magical instructions were far more likely to be modified than the incantations themselves (the copyists' assumption being that the instructions should be as clear as possible, but the incantations might lose their power if modified), but even the latter were corrupted, 'corrected,' modified and translated during their long transmission history. Thus, a linguistic analysis of later Jewish magical texts in search of earlier Babylonian Aramaic forms is not *a priori* useless, but it is not very probative either. Moreover, some Aramaic spells may even be medieval compositions. We know that Jews were writing new texts in Aramaic in the Middle Ages, with the Zohar as our best example (on which we shall say more in a moment) and the *Sidre deshimmusha rabba*, a mystical-magical text edited and analyzed by Gershom Scholem, as an even more pertinent example.[37] Even the presence of Babylonian vocalization in a

36 For this process, as seen in non-magical texts, see the classic statement by Kutscher, *Studies*, pp. 2 and 12–15.

37 For this phenomenon, see Rapoport-Albert and Kwasman, 'Late Aramaic';

manuscript of Jewish magic is no proof of the Babylonian origin of its recipes. Below, we shall note a magical booklet from Damascus that displays some Babylonian vocalization, but right next to it we could place Cairo Geniza magical texts with Babylonian vocalizations, texts whose magical recipes show no sign of a specifically Babylonian origin.[38]

A second and related problem is that once the Babylonian Talmud became the central text of medieval Jewish culture, its own magical spells and recipes became widely known to many medieval Jews. Interestingly, they did not have a great impact on the Jewish magical tradition, which had many other sources from which to draw its spells and recipes, but occasionally we do find spells and recipes that drew at least some of their inspiration from the Babylonian Talmud.[39] Moreover, there are cases where the reliance on talmudic precedents led to the creation of new spells that in some way resemble those of the Babylonian incantation bowls. Note, for example, the following passage in the Zohar, which retells the story of the creation of the woman out of the primordial human being, how Lilith was incensed by that development, and:

ערקת היא לימא, וזמינא לאבאשא בני עלמא. אסוותא להאי, בההיא שעתא דאזדווג בר נש באתתיה, יכוין לביה לקדושה דמאריה, ולימא הכי, עטיפא בקטפא אזדמנת, שארי שארי, לא תעול ולא תנפוק, לא דידך ולא בעדבך, תוב תוב, ימא אתרגישא,

Mopsik, 'Late Judeo-Aramaic'; and Tal, 'The Role of Targum Onqelos.' For the *Sidrei*, see Scholem, 'Sidrei.'

38 See, for example, Oxford, Bodleian Heb. e 74.21 (for which see the brief note in Yeivin, *The Hebrew Language Tradition*, I, p. 236); and Schäfer and Shaked, *Magische Texte*, III, no. 69 (= T-S AS 142.13 + T-S NS 317.18). All three Geniza fragments come from the same manuscript, which is characterized by the Babylonian vocalization of some of its 'magic words,' but the magical recipes display no special affinity with the Babylonian Jewish magical texts of late antiquity.

39 As one example, I note the sequence שברירי ברירי רירי ירי רי י, which appears in BT *'Avoda zara* 12b and *Pesaḥim* 112a in a recipe against temporary blindness (for the Akkadian origin of the term *shabriri*, and for magical rituals against it, see Stol, 'Blindness,' and Geller, 'Akkadian Medicine,' p. 107). The same sequence appears in medieval and modern manuscripts of Jewish magic and is often used in contexts that have nothing to do with blindness. See, for example, Barel, 'Rav-Pe'alim,' p. 223, where it is used against epilepsy and to exorcize a demon.

גלגלוי ליך קראן, בחולקא קדישא אחידנא, בקדושה דמלכא אתעטפנא. ולחפיא ליה לרישיה ולאתתיה עד שעתא חדא, וכן בכל זמנא, עד תלת יומין לקליטה, דכל הרכבה דלא קולטת לתלת יומין, תוב ליתא קולטת.

She fled to the sea and is present to harm the people of the world. The cure for this – at that hour when a man copulates with his wife, he should turn his heart to the holiness of his Master and say thus: 'The one who is wrapped in bed-linen is present; loosen, loosen; you shall not come in and not come out; it is neither yours nor of your share (?). Return, return, the sea is stormy, its waves are calling you; to the holy garment I cleave, in the holiness of the King I wrap myself.' And he should cover his head and that of his wife for one hour, and thus at every time, up to three days from the moment of the reception (of the sperm in the womb), since every combination that does not receive (pregnancy) within three days, does not receive any more.[40]

Comparing this spell with those of the bowls, we may note the duplication of some words (שארי שארי, תוב תוב) and especially the structure of 'by X I did A (בחולקא קדישא אחידנא), by Y I did B (בקדושה דמלכא אתעטפנא),' both well attested in the Jewish Babylonian Aramaic bowls. And yet, there is no need to assume that the composer of this recipe had any direct or indirect knowledge of the bowls or their spells, since both features are well attested in the Babylonian Talmud as well.[41] We already noted above the sequence שייה שייה, which may have served as a source of inspiration for the Zohar's שארי שארי (loosen, loosen).[42] We may also note such a talmudic spell as במישרא דכרתי חבטיה בלועא דחמרא

40 Zohar III, 19a. The translation is my own, but I used the Hebrew translation of the incantation in Scholem, *Elements*, p. 152. For a brief discussion of this incantation, see Cohen-Alorro, 'Magic and Sorcery,' pp. 110–111. On pp. 319–320, note 24, Cohen-Alorro adduces an Akkadian parallel to this incantation and refers to the spells against Lilith in Babylonian incantation bowls.

41 Scholem, in his own copy of the Zohar, wrote of this spell that 'its composer is the very author of the (Zoharic) pericope on Leviticus, as emerges from its language and its contents' (לעניין הלחש: המחבר הוא בעל פרשת ויקרא עצמו כפי שיוצא מלשונו ותוכנו). See Scholem, *Sefer haZohar*, V, p. 2244.

42 Moreover, such formulae are common in many magical traditions, and see the formula שרא שרא גבר, 'Release, release a man,' in a Nabatean magical text published by Naveh, 'A Nabatean Incantation,' p. 113. I am grateful to Ortal-Paz Saar for this reference.

חטרתיה, 'in a bed of leeks I hit it, with the mouth of an ass I pounded it' (*Shabbat* 67a), as a source of inspiration for the second formula.[43] In light of such precedents, we can see why the Zohar's own spell may resemble the bowls in some striking ways, but this resemblance is not necessarily due to any historical continuity from the bowls to the world of the Zohar.

In light of these considerations, we cannot merely count on a general resemblance of language, or on some phenomenological similarities between the bowl-spells and those of later Jewish magical texts, as proof of historical continuity. We need much sounder criteria. One sound criterion for deciding about the 'Babylonian-ness' of other Jewish magical texts is a comparison thereof with the Babylonian incantation bowls, especially when we find in them parallel motifs and parallel formulae that are not attested in other Jewish magical texts, such as those from late-antique Palestine or from the Babylonian Talmud, or those found in other magical traditions (except, of course, Mandaic and Syriac magical texts, which often are of Babylonian origin themselves). In such cases, we may also use our extensive knowledge of Palestinian Jewish magic and of the Greco-Egyptian magical tradition, which had such an impact upon Palestinian Jewish magic but had only a minor impact on the Babylonian incantation bowls, to highlight those aspects of the bowls that are typical of them and of them alone.[44] When such elements re-emerge in later Jewish magical texts, these texts are likely to be copies of copies of texts that go back to late-antique Mesopotamia.

One possible application of this criterion would be to search in later Jewish magical texts for those long spells and *historiolae* that are known to us from the Babylonian incantation bowls and are unattested in late-antique Palestine. Below, we shall note some striking examples of such continuity, but also their rarity. Another application would be to search outside the Babylonian incantation bowls for words and technical terms that are extremely typical of the bowls' vocabulary and are unattested in Palestinian Jewish magic. Most useful in this regard are terms and

43 And the Zohar's description of Lilith as עטיפא בקטפא may have been influenced by the reference to חומרתא דקטיפתא, 'amulet of *qeṭifta*,' in BT *Shabbat* 57b.

44 For the continuity of Palestinian Jewish magic from Late Antiquity to the Middle Ages, which is much easier to demonstrate, see Naveh, 'A Good Subduing'; idem, 'On Ancient Jewish'; and Bohak, 'Jewish Magical Tradition.'

names borrowed from the Persian language, such as זרני, דנחיש, דיוי, בגדנא, איספנדס and פתיכרי, as these are *a priori* unlikely to have had much of an impact on Palestinian Jewish magic.[45] But to this short list we may add a much longer list of Aramaic and Hebrew terms that are typical of the bowls (some of which go back to Akkadian, but others do not), including especially the many different categories of demons, such as זכיא, בני איגרי, אשלמתא, שקופתא, שלניתא, ענקתא, מבכלתא, לטבי, ירורי, חטפיתא, חומרי זידניתא and so on, as well as the many personal names of the demons and liliths attested in the bowls, including פלחס, פלחדד, אביטור and so on.[46] To this list, which reflects the highly developed demonology of Babylonian Jewish magic, we may add the Babylonian gods, who occasionally appear in the Babylonian Jewish magical texts, especially in lists of the seven planets – שמיש וסין ונבו ודליבת וביל ונריג וכיון.

Of course, when compiling such a list we must recall that once one of these words is found in a text that is of a Palestinian and late-antique origin, it must be excluded, which is why we must strike off our list terms like עינא בישא, שידא, חרשין בישין or עובדין תקיפין, not to mention סטנין or מזיקין, all of which are typical of both Palestinian and Babylonian Jewish magical texts. Similarly, words that are found in the Hebrew Bible or the Babylonian Talmud should not be on our list, which is why we should exclude Ashmedai, even though he has a Persian name, and Lilith, in spite of her Babylonian origins, and why a single appearance of Bel or Keiwan does not necessarily tell us much about a text's provenance. And, as with every such set of 'textual markers,' we must note that it is not always easy to distinguish between real appearances of a certain word and mere phantoms, as when a corrupt word or a *vox magica* accidentally resembles one of the words in our list. Thus, the more such 'markers' we find in any given text, and the more we can be certain that they are indeed our words and not some random flukes, the more likely the text itself is to be of Babylonian origin or to preserve older Babylonian material.[47]

45 For these terms, see Shaked, 'Bagdâna,' and idem, 'Popular Religion.'

46 To date, no attempt has been made to catalogue all the demons that appear in the Aramaic bowls, and the most detailed survey remains Montgomery, *Aramaic Incantation Texts*, pp. 70–83. For a useful comparandum, see Furlani, 'I nomi delle classe.'

47 One more feature that seems typical of Babylonian Jewish magic and sometimes

To these 'textual markers' we could, at least in theory, add a list of 'iconographical markers,' that is, features of the bowls' peculiar iconography (especially the appearance of the demons and the different manners by which they are bound) for which we could search in later Jewish magical texts.[48] However, such an analysis would not get us very far, since later Jewish magical texts rarely have a pictorial component, and when they depict demons, these depictions resemble those of Muslim magical texts and greatly differ from those of the Aramaic incantation bowls.[49] Similarly, one could examine the magic signs that occasionally appear in the bowls and usually differ from the typical *charactêres* of Greco-Egyptian and Palestinian Jewish magic, and search for similar signs in later Jewish magical texts.[50] However, I know of no attempt to assemble the relevant data from all the published (and well photographed!) bowls, without which no such research could be carried out.

Another important criterion is the appearance in later Jewish magical texts of themes and practices that seem typical of non-Jewish Mesopotamian magic, and especially of the older Babylonian magical tradition.[51] This tradition seems to have had relatively little impact on the Babylonian incantation bowls, although the exact nature of this impact is still being debated by scholars, and the publication of more bowls might shed additional light.[52] However, in looking for older Babylonian magical elements that entered the Jewish magical tradition,

emerges in later Jewish magical texts is the first-person *historiola* (for which see Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, pp. 15–17). However, I know of no attempt to classify the *historiolae* found in the 'Western' and 'Eastern' branches of late-antique Jewish magic and to isolate those features that are found exclusively in the 'Eastern' branch.

48 For the bowls' iconography, see Vilozny, 'Between Demons and Kings'; eadem, 'Lilith's Hair'; eadem, *Lilith's Hair*; and cf. Lesses, 'Image and Word.'

49 For one striking example, see the image from T-S Ar. 51.95, reproduced in Baker and Polliack, *Arabic and Judaeo-Arabic Manuscripts*, Plate 21.

50 For the *charaktêres*, see Bohak, 'The *Charaktêres*,' with further bibliography.

51 The same applies to the Persian magical tradition, which, unfortunately, is not well documented.

52 And see Müller-Kessler, 'Die aramäische Beschwörung'; Oelsner, 'Incantations in Southern Mesopotamia'; Geller, 'Tablets and Magic Bowls'; idem, 'Magic Bowls'; Gabbay, 'King of the Demons'; Bhayro, 'The Reception'; Levene, Marx and Bhayro, 'Gabriel is on Their Right'; Ford, 'Ancient Mesopotamian Motif'; and Wasserman, 'Old-Babylonian.'

we must always keep in mind that similar traditions and practices may have existed outside Babylonia as well.[53] Their presence in the Jewish magical tradition may therefore be due to non-Babylonian influences and thus tell us little about their ultimate origins. Of course, the more specifically-Babylonian a certain text or practice is, the more likely it is to have entered the Jewish magical tradition in late-antique Mesopotamia.

With these guidelines in mind, we may approach the sources, which include more than a thousand magic-related fragments from the Cairo Geniza and many hundreds of non-Geniza manuscripts of Jewish magic, some of which are hundreds of pages long. In what follows, I shall try to make two separate inroads into this vast territory. First, I shall look for longer Jewish magical texts that may be identified as coming from Sasanian Babylonia, or as displaying some Babylonian features. Next, I shall look for single Jewish magical recipes, found in manuscripts from the Cairo Geniza and elsewhere, that may be identified as stemming from late-antique Babylonian Jewish origins, even though they are found in collections of magical recipes with recipes of many different origins. I shall end with a brief evaluation of the results and some suggestions for further research.

Jewish Magical Texts of Mesopotamian Provenance

Reading through the dozens of Aramaic and Hebrew magical texts transmitted in medieval and later Jewish manuscripts (most of which have never been properly edited), we are soon forced to conclude that the search for magical texts that are likely to be of a late-antique Babylonian Jewish origin proves to be extremely complex. On the one hand, some of the magical texts may securely be attributed to other geograph-

53 I note, in this context, the interesting book by Daiches, *Babylonian Oil Magic*. Noting that the practice of gazing at oil-stains for the purpose of divination is attested in Mesopotamia and is well known to the Babylonian Talmud, Daiches goes on to edit and analyze early modern and modern manuscripts of Jewish magic where such practices may be found. His book contains much valuable data on modern Jewish magic, but it is entirely irrelevant to the study of Jewish magical texts of Babylonian origin, especially as the practice of oil-gazing for divination is extremely common in the Greek magical papyri as well and probably entered the Jewish magical tradition from several different directions.

ical and historical contexts and especially to late-antique Palestine or to the Jews of the Middle Ages, living under either Muslim or Christian rule. Thus, to give a few examples, a text such as *Sefer harazim* is so deeply influenced by the Greco-Egyptian magical tradition, and so full of Greek loanwords, as to assure us of its Palestinian origins and of its date some time in the Early Byzantine period, prior to the Muslim conquest.[54] Its Palestinian origins are further confirmed by its immense popularity in the Cairo Geniza, which as a rule tends to preserve Palestinian materials much more than Babylonian ones (as may be seen, for example, from the study of the *piyyutim*).[55] A Palestinian origin may also be postulated for *Shimmush Tehillim* (Use of the Psalms), which is written in Palestinian Jewish Aramaic, displays some Greek loanwords and is also well attested in the Cairo Geniza.[56] Similarly, the text called *Sheva' ma'alot* (The seven grades) is written in Palestinian Jewish Aramaic and displays many borrowings from the Greco-Egyptian magical tradition, and it may thus be classified as Palestinian, even though it is not as well represented among the Geniza fragments.[57]

While these texts stem from late-antique Palestine, other Jewish magical texts clearly date to the Middle Ages. This applies, for example, to the texts of astral magic that are found both in the Cairo Geniza and in non-Geniza manuscripts, which tend to be of a Muslim origin and to have reached the Jewish world either directly from Arabic or through intermediaries in other languages.[58] Likewise, a text like *Segullot 'or hanaḥash* (The properties of snakeskin) is a medieval Hebrew translation (or rather, a set of several different translations) of a Latin text called *Experimenta duodecim Johannes Paulini* (The twelve experiments of

54 For *Sefer harazim*, see Margalioth, *Sepher Ha-Razim*; Morgan, *Sepher Ha-Razim*; and Rebiger and Schäfer, *Sefer ha-Razim*.

55 For the Geniza fragments of *Sefer harazim*, see Rebiger and Schäfer, *Sefer ha-Razim*, I, pp. 1–16, 121*–201*.

56 See Rebiger, *Sefer Shimmush Tehillim*; for some of the Geniza fragments, see Schäfer and Shaked, *Magische Texte*, III, nos. 78–84.

57 For this text, which deserves a fuller study, see Schäfer and Shaked, *Magische Texte*, II, no. 26 (= T-S K 1.35 + T-S K 1.48), 2b/1–28; *ibid*., no. 27 (= T-S K 1.74), 1a–1b; and MS NYPL 190, in Bohak, *A Fifteenth-Century Manuscript*, I, pp. 195–198; II, pp. 153–155.

58 For a pertinent example, see Burnett and Bohak, 'A Judaeo-Arabic Version.'

Johannes Paulinus), which itself is said to have been translated from Arabic.[59] Other examples of these processes could easily be adduced.[60]

If some books of Jewish magic display clear signs of a Palestinian or medieval provenance, others prove much harder to pin down. I note, for example, that both *Sefer hayashar* (The Book of the righteous) and *Sefer hamalbush* (The Book of the wearing [of the divine name]) are written in Hebrew and are likely to be of late-antique origin, but they do not provide any clear signs of either Palestinian or Babylonian provenance.[61] In both cases, only a small part of the relevant textual evidence has received any scholarly attention, and the question of their provenance has hardly even been discussed. Thus, it is possible that a closer examination of each of these texts would yield sounder conclusions about their likely provenance, but it also is quite possible that we will not have a clear answer even if and when such analyses are carried out.

Thus, we are left with some Jewish magical texts that clearly have little to do with late-antique Babylonia, and some whose provenance is not really known. But we also have some texts that are likely to go back to late-antique Babylonia, and of these, four merit special attention: the *Ḥarba deMoshe*, the *Pishra deRabbi Ḥanina ben Dosa*, the *Havdala deRabbi Aqiba* and some versions of *Sefer haqevitsa*.[62] Let us look

59 For this text, see my brief comments in Bohak, 'Rabbanite Magical Texts,' pp. 26–27, with further bibliography. In the future, I hope to devote a separate study to this text.

60 And see Shaked, 'Jewish Magical Literature'; Leicht, 'Legend of St. Eustachius'; Bohak, 'Catching a Thief'; Mesler, 'The Three Magi'; and Saar, 'A Genizah Magical Fragment.'

61 For both texts, see Wandrey, *Das Buch des Gewandes*. See also the book known as *Sefer Adam*, recently edited in Rebiger and Schäfer, *Sefer ha-Razim*, as '*Sefer ha-Razim* II.' It, too, displays no clear sign of its ultimate origins.

62 Another book that must have been of Babylonian Jewish origin is *Raza rabba* (The Great secret), which one Karaite author described as רזה רבה פי קצת סבע סמואת ומלאיכה ופרורים ודיוים ולטבין וירורין בגיר אלעדד, '*Raza rabba*, on the history of the seven heavens, and angels, and *paror*s, and *dev*s, and no-good-ones and *yaror*s without number.' For this passage, see Mann, *Texts and Studies*, II, p. 82. Unfortunately, *Raza Rabba* is no longer extant, and Scholem's attempts to reconstruct it from Ashkenazi citations of a Hebrew book with a similar name (see Scholem, *Origins of the Kabbalah*, pp. 106–123) were not successful. That we have yet to find this book only shows how little we really know about the Jewish magical texts of late-antique Babylonia and how much room is left for further research.

at each of these more closely and assess the evidence for its possible provenance.

(a) Ḥarba deMoshe

One obvious, but problematic, starting point for our quest is the *Ḥarba deMoshe* (The Sword of Moses). Since the text is first mentioned by Hai Gaon in his famous responsum on the uses of divine names, written ca. 1000 CE, we may perhaps assume that this is a Babylonian Jewish text, going back a few centuries before Hai's own time.[63] But the *Ḥarba deMoshe* is only preserved in very late manuscripts that clearly are corrupt, with only a few earlier Geniza fragments, covering only a part of the text.[64] As we now have it, the text of the *Ḥarba deMoshe* clearly presents some Babylonian components, but it also has some obviously Palestinian elements, including materials derived from the Greco-Egyptian magical tradition.[65] A close analysis of all the evidence has led Yuval Harari to conclude that the *Ḥarba deMoshe* combines both Palestinian and Babylonian elements and that its final redaction was in Palestine.[66] As with all such source-critical analyses, certainty on these issues is beyond our reach, but the fact that the *Ḥarba deMoshe* is not the most reliable witness for the study of Babylonian Jewish magic in late antiquity seems incontrovertible. We shall return to this issue below.

(b) Havdala deRabbi Aqiba

A somewhat less problematic example is provided by the *Havdala deRabbi Aqiba* (Rabbi Aqiba's *havdala*), a text that is modelled on the

63 For Hai's responsum, see Emanuel, *Newly Discovered*, pp. 124–146; the reference to the *Sword of Moses* and the citation of its *incipit* are on p. 131. The text of the *Sword of Moses* was first identified and edited by Moses Gaster, from a manuscript in his possession; and see Gaster, *Sword of Moses*.

64 For a newer edition, based on MS Sassoon 290, see Harari, *Ḥarba deMoshe*; for a recent translation, see idem, 'The Sword of Moses'; for the Geniza fragments, see idem, 'Geniza Fragments.'

65 For some pertinent examples, see Rohrbacher-Sticker, 'From Sense to Nonsense'; see further Bohak, *Ancient Jewish Magic*, pp. 175–179.

66 See Harari, *Ḥarba deMoshe*, pp. 52–53; idem, 'The Sword of Moses,' pp. 65–67.

standard rabbinic *havdala* ritual (intended symbolically to 'separate' the sacred from the profane at the end of the Sabbath) but transforms it into an apotropaic ritual to ward off demons, cure 'bound' (i.e., impotent) husbands, 'open the heart' (i.e., improve one's memory and learning abilities) and so on. It was edited from several manuscripts by Gershom Scholem, who published it with a detailed introduction and commentary.[67] Here, too, there is no doubt that some textual units go back to Babylonian Jewish magic, including long lists of demons known to us exclusively from the Babylonian incantation bowls and clearly Mesopotamian in origin, and one first-person *historiola* that clearly belongs in the world of the Babylonian incantation bowls and finds partial parallels in some of the published ones.[68] But the *Havdala deRabbi Aqiba* also includes many Hebrew sections that display no clear affinity with what we find in the bowls, and it is not clear that the whole composition is of a Babylonian origin or a late-antique date. Scholem noted some of the Babylonian elements and argued for either a Babylonian or a south Italian origin of the final text, and for a date in the Gaonic period.[69] But he also stressed that this text seems to have been assembled from several different sources and that some of its adjurations display the impact of the Greco-Egyptian magical tradition.[70] Hannu Juusola offered a more detailed linguistic analysis and concluded that the text presents both 'Eastern' and 'Western' features, and that, like the *Ḥarba deMoshe*, it, too, must have had a complex redaction history.[71] Thus, both the contents and the language argue for a Babylonian origin for parts of this text, but probably not for all of it; that it is only rarely found among the Geniza fragments might provide further support for the assumption of a Babylonian-Jewish origin, but it could also support

67 Scholem, 'Havdala.'

68 For the long list of demons' names, see *ibid*., pp. 258–262 (= pp. 160–164 of the revised reprint), and Scholem's numerous references in his commentary to the appearance of many of these demons in the Babylonian incantation bowls. For the *historiola*, see *ibid*., pp. 262–265 (= pp. 164–167) (for the partial parallels, see BM 135563, edited in Segal, *Catalogue*, as 049A, and re-edited in Morgenstern, 'Notes'), and cf. the 'Enochic' *historiola* in pp. 270–272 (= pp. 171–173).

69 For Scholem's view of the text's likely origins, see *ibid*., pp 245–246 (= p. 148).

70 See, for example, *ibid*., pp. 252 (= p. 154) and 267 (= p. 168).

71 Juusola, 'Notes on the Aramaic Sections.'

a southern Italian origin, in accordance with Scholem's intuitive suggestion.[72] Thus, we find ourselves once again, as in the case of the *Ḥarba deMoshe*, with a text that preserves some elements of late-antique Babylonian Jewish magic but probably does not stem in its entirety from that geographical and historical context.

(c) Pishra deRabbi Ḥanina ben Dosa

If both the *Ḥarba deMoshe* and the *Havdala deRabbi Aqiba* leave us wishing for more conclusive results, the *Pishra deRabbi Ḥanina ben Dosa* (The Spell-loosener of R. Ḥanina ben Dosa), an anti-witchcraft spell that is about two or three pages long, seems much less problematic.[73] This text, which has been edited only once, from a faulty manuscript, is surprisingly well attested; it is found in at least nine Geniza fragments and in quite a few later manuscripts, including some twentieth-century amulets.[74] The late-antique Babylonian origin of this text is made quite clear not only by its Babylonian Aramaic dialect, but also by the fact that it continues in a tradition of much older Babylonian anti-witchcraft rituals (especially some of the features of the Maqlû texts) and 'Judaizes' them by turning the gods' names into angel names. The Babylonian nature of this text is further highlighted by the list of demons and dangers with which it opens, which closely resembles those of the magic bowls; by the close parallel between its closing formula and a formula used in circumcision rituals in Babylonian Jewish prayer books (*siddurim*); and by the close parallel between one of its adjura-

72 The only securely identifiable Geniza fragment of the *Havdala deRabbi Aqiba* of which I am currently aware is T-S NS 326.51; for other possible fragments, see Schäfer, *Geniza-Fragmente*, G16 (=T-S NS 322.21) and G18 (= Bodleian Heb. e 107.10). For a find that could modify our view of the *Havdala*, but might be a modern forgery, see Hamilton, 'A New Hebrew-Aramaic Incantation,' with Bohak, *Ancient Jewish Magic*, p. 158.

73 For a brief introduction to the *Pishra*, see Bohak, 'Pishra.'

74 See Michelini Tocci, 'Note e documenti,' pp. 101–106. For a published Geniza fragment, see Schäfer and Shaked, *Magische Texte*, II, no. 22 (= T-S K 1.144 + T-S K 21.95T + T-S K 21.95P), 1a/1–1b/9. For a fifteenth-century manuscript, see NYPL 190 (on which more below), in Bohak, *A Fifteenth-Century Manuscript*, I, pp. 229–231; II, pp. 187–189. For a twentieth-century amulet that utilizes the *Pishra* text, see Vukosavović, *Angels and Demons*, p. 126.

tions and a section of an Aramaic amulet from Afghanistan.[75] As far as I can see, its text remained remarkably stable throughout its long transmission history and bears no clear marks of later, medieval interpolations.

Like the vast majority of the incantation bowls, the *Pishra*, too, is an apotropaic, anti-witchcraft spell, and most of its contents are rather repetitive, consisting mainly of the names of the respective angels who would loosen an aggressive magic act performed against the spell's potential user on each day of the week, each day of the month and so on.[76] But one section also lists all the different types of aggressive magical acts that might have been performed against the potential user and thus gives us a glimpse of the world of aggressive magic in late-antique Babylonia, as known to the *Pishra*'s composers.[77] Of course, much of this aggressive magic may have been utilized by non-Jewish magicians and witches, and it thus is not necessarily relevant to the study of the aggressive magical texts and practices of the Jews of Sasanian Babylonia, but in at least one case we can probably show that an aggressive magical practice known to the composers of the *Pishra* was indeed used by Jews as well. It occurs in the section that says: ואם בחספא וסילוי עבדו ליה כיבמשיאל ישרי ויפשר ליה, 'And if with clay / potsherd and thorns they worked (witchcraft) upon him, Kivmashiel will release and loosen him.'[78] This is a rather vague reference, but it

75 I hope to deal with these issues at greater length elsewhere. For the amulet from Afghanistan (whose reading can be improved in light of this parallel), see Shaked, 'A Jewish Aramaic Amulet.' It must be noted, however, that the study of the *Pishra* is partly complicated by the fact that a text with similar logic is found on an unpublished amulet, deciphered by Joseph Naveh, Shaul Shaked and Ada Yardeni, which clearly is of Palestinian Jewish origins.

76 This list of angelic names enjoyed a life of its own in later Jewish magic, and appears, for example, in MS New York JTSA 8114 (IMHM F 11305), part 2, fols. 4v–6r.

77 Such listings sometimes appear in the bowls, too. See the brief discussions in Morony, 'Magic and Society,' pp. 99–100, and Levene, *Jewish Aramaic Curse Texts*, pp. 12–16. A full survey of such listings in all the published bowls and their comparison with those of the *Pishra* remains a scholarly desideratum.

78 I cite the text from MS NYPL 190 (on which more below), in Bohak, *A Fifteenth-Century Manuscript*, I, p. 229; and II, p. 187. All the other copies of the text I examined differ only with regard to the angel's exact name, which is irrelevant to the present discussion.

is tempting to compare it with the detailed instructions provided by the *Ḥarba deMoshe* in one of its aggressive magical recipes:

> אם בעית למקטל אינש סב טינא מן תרי כיפי נהרא ועביד צלמא וכת׳ עליה שמיה וסב ז׳ סלוין מן דיקלא צויא ועביד קשתא דחוסקניאתא במיני דסוסיא ואחית צלמתא בגו צרתא ומתח צלוי בקשתא ושדי בה ואמור על כל סלוא מן אקדתס ועד פרסוסי יתחבל פ׳ב׳פ׳ וי׳ת׳ד׳ מ׳נ׳ך׳.
>
> If you wish to kill a person, take mud from the two banks of the river and make a figurine and write his name on it. And take seven thorns from a withered date palm and make a bow of *huskaniata* wood and strands of horse hair and put the figurine in a cloth bag and stretch the thorns in the bow and shoot it (the figurine) and say over every thorn from *'QTDS* until *PRSWSY* may N, son of N, be injured, and he will be removed from you.[79]

The preparation of mimetic figurines (what we might call 'voodoo dolls') to represent the aggressive ritual's intended victims is, of course, an almost universal practice, but the instruction to take mud from the two banks of the river is far from common and finds a close parallel in older Babylonian magical praxis.[80] And the use of palm-thorns (סילוי) as arrows with which to shoot the clay figurine is also very specific and fits extremely well with the *Pishra*'s reference to an aggressive magical ritual carried out by means of clay (חספא) and palm-thorns (סילוי). Thus, we seem to be seeing the same magical practice, or two close variants thereof, once from the aggressive side and once from the apotropaic side.

(d) Some Versions of Sefer haQevitsa

Sefer haqevitsa (the Book of gathering [of demons]) is a text, or a cluster of texts, written in Judeo-Arabic, Hebrew and Aramaic, whose aim is to gather demons to a certain place, to adjure them and thus to make

79 I cite the text from Harari, *Ḥarba deMoshe*, p. 42, and the translation from idem, 'The Sword of Moses,' p. 89, with minor modifications. The corrupt textual sequence ויתדמנך at the end of the recipe might be derived from דמך, in which case the translation would be: 'and he shall be laid low.'

80 See Geller, 'Mesopotamian Love Magic,' p. 132.

them subservient to the adjuring practitioner. Both the aim and the praxis involved, as well as the names of some of the demons adjured, point to a strong Arabic-Muslim influence on this body of texts.[81] And yet, the texts seem to incorporate some older materials, including demons who are known to us exclusively from the Babylonian Jewish magical tradition of late antiquity. Note, for example, the appearance, in one published Geniza fragment of this literature, of the demons שפטין … וסטנין וברקו[תא] ופגעא ופלגא ודחלולי ימא ודחלו[לי] ליליא … ורוחא דיתבא בליבא … ורוח כומרי ורוח פתכרי ואסתרתא … ולוטבין בישין … מיני דנחוש … מיני איגרי … ומיני טולי ומיני דיקלי … וכל זיקין ומזיקין and so on.[82] All these demons find clear parallels in the bowls (in some cases, in slightly different spellings), and their clustering here is far too thick to be a mere accident. Moreover, in another Geniza fragment the demons are adjured:

> ותבואו מארבע רוחות השמים ותביאו לי עמכם את המלכה ששמה ארגז בת קטט דיתבא על נהרות מיטרא[83] דפרת היא וכל חייליה ... שלא יקרא (!) אתכם מה שה יקרא[84] בגוגרום מדינתא אתר דמתקלין תמן כל שדין וכל רוחין באתון נורא יקידתא.
>
> And you shall come from the four directions and bring to me with you the queen whose name is Argaz daughter of Qaṭaṭ, who sits on the rivers ??? of the Euphrates, she and all her soldiers ... so that you will not suffer the same fate as what happened in the town GWGRWM,[85] the place where all demons and spirits are burnt in a furnace of blazing fire.[86]

The geographical reference to the Euphrates would not suffice to identify this text as building on older Babylonian materials, but the reference to

81 As was noted long ago by Scholem, 'Bilar'; and idem, 'Some Sources.'

82 Schäfer and Shaked, *Magische Texte*, II, no. 54 (= T-S NS 322.29), 1a/6–1b/11. Other published Geniza fragments of this text, such as *ibid.*, I, no. 6 (= T-S K 1.1) display no Babylonian features, and the same is true of many unpublished fragments.

83 In JTS 3513.11, the reading is מישרא.

84 Lege: מה שקרה.

85 Or, 'inside (בגו) the town GWRM.' I am grateful to James Nathan Ford for this suggestion.

86 T-S NS 307.6, with a parallel in JTS 3513.11. Parts of this text (but not those that interest us here) are paralleled in Schäfer and Shaked, *Magische Texte*, III, no. 66 (= T-S AS 142.15 + T-S NS 246.14), 1b/11–34.

the demoness ארגז בת קטט is extremely revealing. Not only is this type of personal name for a demon extremely common in Babylonian Jewish magic (including אגרת בת מחלת, mentioned in BT *Pesaḥim* 112b), but this specific name appears in two bowls, as ארגז בת קסס.[87] And while I have not yet been able to identify the town GWGRWM (or GWRM) and the story about the place where demons are burnt, I suspect that it is in the Babylonian incantation bowls, or in earlier Babylonian magical texts, that the answer to this crux shall be found.[88] Be this last point as it may, some older Babylonian Jewish sources seem to lurk behind at least some of the medieval *Qevitzah* texts, so popular among Jews in the Muslim but also in the Christian world from the Middle Ages onwards.

Looking at the results of the above enquiries, we may note that they are mixed. On the one hand, there is no doubt that the *Ḥarba deMoshe*, the *Havdala deRabbi Aqiba* and the *Pishra deRabbi Ḥanina ben Dosa* have at least some components that go back to Babylonian Jewish magic of the Sasanian period. In and of itself, this conclusion should suffice to convince us that late-antique Babylonian Jewish magic was not a dead-end street, and that the fact that the production of Aramaic magic bowls ceased some time in the seventh or eighth centuries does not mean that the Babylonian Jewish magical tradition completely died out at that time. On the contrary, we may conclude that there were many other forms of Jewish magical activity in Sasanian Babylonia, and that the instructions for some of these activities kept on being transmitted and were incorporated into texts such as the *Havdala*, the *Ḥarba* and the *Pishra*. We may even conclude that some of the longer spells inscribed upon the bowls kept on being transmitted even after such bowls were

87 See Gordon, 'Aramaic and Mandaic Magical Bowls,' Bowl H (p. 87), l. 8; Shaked, Ford and Bhayro, *Aramaic Bowl Spells*, JBA 55 (=MS 1928/1), l. 3. Another female demon who seems to re-emerge in later Jewish traditions is Buznai, daughter of Zanai Lilith, who is found in some bowls (see especially Müller-Kessler, 'The Story of Bguzan-Lilit'), and who appears in a midrashic text in T-S C 1.3 (ed. Ginzburg, 'Hagadot qetu'ot,' pp. 66–67) as פיזנא and as אפיזנא בת פיזנאי לילית, as was first noted by Shaked, 'Popular Religion,' p. 112.

88 For an illuminating parallel, see bowl MS 1927/9, ll. 5–6: שבילכי אם לא תשני אירמי יתיכי לחצקר חצב גובא אתר דירמן שידייא כולהון, 'If you do not change your path, I will cast you into HẔQR HẔB, the pit, the place (into which) all demons are cast.' The text was published in Shaked, 'Form and Purpose,' p. 27, and the reading was corrected by Matthew Morgenstern. I am grateful to James Nathan Ford for bringing this parallel to my attention.

no longer being produced, and several spells probably were woven into the *Havdala deRabbi Aqiba*. As we shall soon see, this conclusion gains much support from the evidence provided by individual recipes transmitted in medieval and later Jewish magic.

Jewish Magical Recipes of Mesopotamian Provenance

When we move from the rather limited inventory of longer Jewish magical texts to the thousands of Jewish magical recipes preserved individually or in larger compendia in hundreds of Geniza fragments and non-Geniza manuscripts, we find ourselves in a similar situation as before. On the one hand, some of these magical recipes may securely be attributed to late-antique Palestine, while others are demonstrably medieval in origin and often borrowed from Muslim or Christian sources.[89] On the other hand, a vast majority of the relevant recipes are quite 'timeless' in nature, and it is difficult to ascribe them to specific chronological or geographical places of origin. Thus, the search for magical recipes whose ultimate origins lie in late-antique Babylonia is tantamount to searching for a few needles in the proverbial haystack. And yet, such needles may be identified, as we shall see from the following few examples.

(a) The first example is perhaps the clearest evidence currently available for the continuous transmission of the spells found in Aramaic magic bowls.[90] It is found in a Geniza fragment, HUC 1029, probably dating to the twelfth century, where we find traces of two magical recipes, one of which is formulated as a *get* (a deed of divorce) for the demoness Lilith. Not only is the practice of writing deeds of divorce for the demons extremely popular in Babylonian Aramaic bowls (and even in some Syriac and Mandaic bowls), but the text of the Geniza fragment closely parallels one of the commonest variants of the divorce deed found on the bowls.[91] In this case, there is no doubt that the medieval recipe is directly based on a spell originating in Sasanian Babylonia, but it also

89 And see above, notes 58–60.

90 For a fuller discussion of this example, see Levene and Bohak, 'Divorcing Lilith.'

91 In addition to the bowls cited in the paper mentioned in the previous note, we may now note this spell's appearance in Shaked, Ford and Bhayro, *Aramaic*

seems quite clear that this spell was not very popular in the Middle Ages, since this is the only Geniza fragment of which I am aware that preserves it, and I have not yet found it in any non-Geniza manuscripts of Jewish magic.

To this example of direct continuity, one or two more examples may be added of long spells that appear both in unpublished bowls and in published magical texts from the Cairo Geniza.[92] In addition, several other published Geniza magical spells and recipes have some parallels in the bowls or are likely to be of late-antique Babylonian origins.[93] Surveying all these fragments would be out of the question here, but the number of potential candidates is quite small, making it clear that most of the published magical recipes from the Cairo Geniza are not likely to be of a Babylonian Jewish origin.

(b) Turning from the published Geniza magical texts to the unpublished ones, we find ourselves in a similar situation, with only a few recipes that are likely to be of a Babylonian Jewish origin. One such case is T-S Misc. 34.22, a parchment bifolium inscribed in several different hands, all dated by Edna Engel to the tenth century. It contains a Judeo-Arabic commentary on Deuteronomy 2 and 3, an elaborate drawing of a menorah, labelled מנרת שפטים, and – on a page probably left blank in the original manuscript – two magical recipes:

לאהבה בשם גבריאל ומיכאל ורפאל וח?[סדיאל? ו...] / אתון ה׳ מלאכין דיממניין
על גנין[94] ו... / [ ]ומזומן לה בהיך בהיך אסא ב׳א׳ל׳ה׳א׳ רב?. דבר ... א? / וחזוא

Bowl Spells, JBA 15 (MS 1927/43), 19 (MS 2053/132), 24 (MS 2053/251) and 62 (MS 2053/242).

92 These examples are studied in a forthcoming publication by James Nathan Ford.

93 See Kwasman, 'Demon of the Roof,' for a cluster of Babylonian demons found in a recipe in Schäfer and Shaked, *Magische Texte*, I, no. 2 (= T-S K 1.56) and *ibid*., no. 20 (= T-S K 1.147). Another published Geniza fragment that is likely to preserve magical recipes of Babylonian-Jewish origin is Mosseri Ia 26.2 (published by Goitein and Friedman, *Abraham ben Yijû*, pp. 418–421), a collection of magical recipes apparently copied by Abraham ben Yijû in Aden; recipe no. 4 contains an interesting first-person *historiola*, and a reference to דנהש, who is probably identical with דנחיש, for whom see Shaked, 'Bagdâna,' pp. 520–522, and Müller-Kessler, 'Dan(ḫ)iš.' See also Shaked, 'An Early Geniza Fragment,' for a fragment that is unique and therefore harder to classify.

For love:[98] In the name of Gabriel and Michael and Raphael and H[asdiel? and ...], you five angels who are appointed over (the) bridal chamber and ???, and is prepared for her by this by this[99] myrtle, by the great God who created (?) [charm?] and grace to NN, may she be inflamed, heated up and enkindled, may her speech become confused in her mouth, and her tongue (become confused) between her lips, may NN fall under NN like clay under its worker, like a mattress[100] under the hero, its master. In the name of ’H ’H YH WH YH ‘Holy holy holy the Lord of Hosts, the whole earth is filled with his Glory’ (Isa 6:3). Firm and established. Take (?) three leaves (?) of myrtle and prepare it (i.e., them) on her name, and say on each one seven times and give her. The End.

(For) sending fire:[101] I, skull,[102] I, skull, KM WHNM KM WHNM ’N’ WHNM ’NH WHNM, I adjure you and I beswear you, D RWM the evil Satan, who sits upon three hundred and sixty Satans. Go and let fall upon NN a fire, burning by night and day, and it shall

95 Lege: קח?; in any case, the meaning should be ‘take.’
96 Lege: טרפי? Or maybe טאסי, ‘foils’ → ‘leaves’?
97 Perhaps תם or תמת.
98 For Jewish erotic magic, see Saar, *Jewish Love Magic*.
99 The duplication is probably a result of scribal dittography.
100 For the Persian loanword ביסתרקא, ‘bedding, mattress, carpet’, see Sokoloff, *Dictionary*, p. 204.
101 This type of aggressive action of sending fire or fever against someone is extremely common; see, for example, Naveh and Shaked, *Magic Spells and Formulae*, G16 (= T-S K 1.91 + K 1.117), p. 7, l. 1; Schäfer and Shaked, *Magische Texte*, III, no. 56 (= T-S Ar. 44.26), 1b/3; *ibid*., no. 60 (= T-S K 1.120), 1a/4, 10.
102 For the use of human skulls in late-antique Jewish magic, see Levene, ‘Calvariae Magicae.’

not be extinguished from him until I desire (so). 'And the people com[plained]' (Num 11:1) in its entirety. Write (all this) on a day-old egg and bury it at his gate.

Several factors argue for a Babylonian Jewish origin of these two recipes. In the first recipe, in addition to some Babylonian Aramaic forms such as נשגי, the separation of the preposition כי from the subsequent noun (כי בסתרקיך) and the Persian loanword בסתרקיך, 'mattress,' we may note that the formula תשתחן ותשתגר ותשבב is closely paralleled in one of the erotic bowls published by Montgomery.[103] Another formula, נשגי ממללה בפומה ולישנה ביני ספוותה, is partly paralleled in a bowl published by Shaked, where the damages caused by the spirit that afflicts the poor targets include ומשגשא לישנה בפומה, 'and it confuses her tongue in her mouth.'[104] And in the second recipe, the spell is partly paralleled by a similar formula found in the Damascus magical recipe book to which we shall soon turn.[105] All this does not amount to a clear proof of a Babylonian Jewish origin, but it certainly makes such an origin very plausible.

To this example, several others may be added of unpublished Geniza magical spells and recipes that display some sign of a Babylonian Jewish origin.[106] And yet, the total number of such recipes seems

103 See Montgomery, *Aramaic Incantation Texts*, Bowl 28, ll. 1–2 (p. 213): לשמיה דאנור .. בר פרכוי דנישתיחן ונישתגר ונישתבב בתר אחת בת נבאזך (Montgomery reads the second verb as ונישתנר). A similar but much longer series of verbs appears in an unpublished Geniza fragment, JTS 3320.7. For other parallels, see Levene, *Jewish Aramaic Curse Texts*, p. 85 (VA 2492), ll. 2–3: נישחנוניה ונישבבניה ונירדוניה ונישגרוניה, and cf. *ibid*., p. 118 (039A), l. 13, and p. 81 (VA 3381), l. 16.

104 See Shaked, 'Peace Be upon You,' p. 207 (Bowl M1, ll. 11–12).

105 See below, note 107. The spell there reads גולגולתא גפנם וני?סגף / אי?שבעית עלך נורדפיס סטנא דתיזיל / [ות]פ?יל אשתא על פ׳ב׳פ׳, 'Skull, GPNM WNYSGP, I have adjured you, NWRDPYS the satan, that you shall go and cast fire upon NN.'

106 I note, for example, T-S K 1.67, where one finds the sequence ויתנצל מן נחי..א ומן ממללתה / ומן כל חרשין בישין ועובדין / תקיפין ומן רוחי בישתה וחומרי / זנייתה זידניתה, 'and he shall be saved from ??? and from (evil) words and from all evil sorceries and powerful (magical) actions, and from evil spirits and fornicating (or 'evil,' which is the common formula in the bowls) amulet spirits.' This amulet was written for Nûmeir bar Qûbîha, the same individual for whom the spell in T-S K 1.26 (Schäfer and Shaked, *Magische Texte*, II, no. 45) was written – a spell which, as noted by James Nathan Ford, also displays clear parallels with the bowls. T-S Misc. 10.90 bears the title (written

exceedingly small, given the large number of magical texts from the Cairo Geniza, and the presence there not only of magical spells and recipes whose late-antique Palestinian provenance is quite clear, but even of a Babylonian Jewish text like the *Pishra deRabbi Ḥanina ben Dosa*.

(c) From the Cairo Geniza we may turn to a very curious find, namely, a booklet with magical recipes, possibly dating to the eleventh century, found by Bruno Violet in the Geniza of the famous Mosque in Damascus.[107] In this case, both the Aramaic dialect and some of the specific parallels with the bowls argue for a Babylonian Jewish origin, and the Damascene provenance of the booklet itself certainly could support such a hypothesis. Moreover, very little in this booklet is derived from or influenced by the Greco-Egyptian magical tradition or by Christian or Muslim magic. Thus, while there is no way of accurately measuring the 'antiquity' or 'Babylonian-ness' of each of its recipes, we seem to have here a good starting point for the study of Babylonian Jewish magic as it survived, and was perhaps also modified, in the Early Islamic period, in a region not far removed from Babylonia.[108] What is perhaps most interesting about this find is that the booklet's magical recipes have few clear parallels among the many thousands of magical recipes found in the Cairo Geniza or in non-Geniza manuscripts, which might show that while the Babylonian Jewish magical tradition survived the Muslim conquest, its remains kept on fading into oblivion in subsequent centuries, apart from the few exceptions surveyed here.

(d) From the Jewish Geniza of Cairo and the Muslim Geniza of Damascus we move to non-Geniza manuscripts of Jewish magical recipes – that is, to manuscripts that normally do not date from before the thirteenth or fourteenth centuries. This vast field has never even been

in a strange script!) קמיעות מבחנות מבבל, 'tested amulets from Babylonia,' but the recipes themselves do not seem particularly Babylonian. JTS 3753.9–10 has an interesting *historiola* about Mt. Hermon and a demon, which might be of Babylonian Jewish origin.

107 See Bohak and Morgenstern, 'A Babylonian Jewish Aramaic Booklet.'

108 One obvious modification is the translation of some of the instructions, which must originally have been written in Aramaic, into Judeo-Arabic, a phenomenon that is extremely well attested in the magical recipe books from the Cairo Geniza as well.

charted, let alone studied in greater depth.[109] I therefore limit myself to a single manuscript that I know well: NYPL 190 (formerly Sassoon 56), a fifteenth-century compendium of magic and Kabbalah produced in an unknown location (but certainly somewhere in the Arabic-speaking world), of which I have prepared a complete critical edition.[110] In this manuscript, recipe no. 124 ('For the evil eye') on pp. 111–112 displays clear signs of the Babylonian Jewish origins of at least some of its components, the clearest of which is the following formula:

אשבעית עליכון כל חרשין בישין וכל / עובדין תקיפין בשם סלגס סליגס אדרקס אדריקס נקיקיאל קבניאל / אתון מלאכיא קדישיא דממנן על חרשין בישין ועל עובדין תקיפין / ובישין עבידו לפ׳ בן פ׳ פשרתא ואסותא אם חרשי יהודאי עבידו לה / פשרו[111] ופשרו לה אם חרשי ארמאי עבידו לה פשרו ופשרו לה אם חרשי / טיאעי עבידו לה פשרו ופשרו לה אם חרשי פרסאי עבדו לה פשרו ופשרו / לה ואם במיא ובמילחא צתרי במיכלא ובמשתיא וכל לבושא וכסויא וכל / מדעם מאית בעלמא עבדו לה פשרו ופשרו ותהא ליה אסותא א׳א׳א׳ סלה.

I adjure you, all evil sorceries and all powerful (magical) deeds, in the name of SLGS SLYGS 'DRQS 'DRYQS NQYQY'L QBNY'L, you holy angels who are appointed over evil sorceries and powerful and evil (magical) acts, accomplish for NN a spell-loosening and a healing. If Jewish sorcerers performed (witchcraft) upon him, loosen[112] and loosen him; if Aramean sorcerers performed (witchcraft) upon him, loosen and loosen him; if Ṭayya'ei sorcerers performed (witchcraft) upon him, loosen and loosen him; if Persian sorcerers performed (witchcraft) upon him, loosen and loosen him. And if with water and salt ??? in food or drink and any garment and covering and any dead thing in the world they performed (witchcraft) upon him, loosen and loosen (him), and may there be health for him, A(men) A(men) A(men) Sela.[113]

109 For some useful starting points, see Trachtenberg, *Jewish Magic and Superstition*; Benayahu, '*Shoshan yesod ha'olam*'; Scholem, *Kabbalah*, pp. 182–189; and Harari, 'Jewish Magic.'

110 See Bohak, *A Fifteenth-Century Manuscript*.

111 Here and in what follows, the original formula must have been שרו ופשרו ליה.

112 The original text must have read 'release and loosen him' – see the previous note.

113 NYPL 190, in Bohak, *A Fifteenth-Century Manuscript*, I, pp. 155–156; II, p. 112, ll. 19–26.

Three different arguments may be adduced to support the late-antique Babylonian Jewish origins of this spell. The first is that the last section closely resembles in its logic and phraseology the *Pishra deRabbi Ḥanina ben Dosa*, even if the specific aggressive magical activities mentioned here are not mentioned in the *Pishra*. The second is the geographical and chronological logic of the references to Jews, Arameans (which may mean nothing more than 'Gentiles'), Persians and Ṭayya'ans (i.e., pre-Muslim Arab tribesmen), the latter being well known from the Babylonian Talmud. Clearly, whoever composed this spell lived in a time and place where Persians and pre-Islamic Mesopotamian Arabs were the Jews' close neighbors.

But the third and most conclusive argument is that this very formula is attested on one of the Babylonian incantation bowls, where it reads:

> ויבטלון ... חרשין / ארמאין חרשין יהודאין חרשין טיאעין חרשין פרסאין חרשין הינדואין חרשין יונאין חרשין די כיתין חרשין / דמיתעבדין בשבעין לישנין.
>
> And there shall be annulled ... Aramean sorceries, Jewish sorceries, Ṭayya'an sorceries, Persian sorceries, Indian sorceries, Greek sorceries, Roman sorceries, sorceries that are performed in (each of the) seventy languages.[114]

The identity between the two spells is quite clear, and the fact that almost a full millennium separates the Aramaic bowl and the manuscript with magical recipes written in the 1460s by a certain Moses, son of Jacob and Marḥaba, proves that at least some Babylonian Jewish magical spells kept on being transmitted even long after the incantation bowls were no longer produced. Unfortunately, it is not easy to tell how much of the fifteenth-century recipe goes back to late-antique Babylonia, but an examination of its other components, and the reconstruction of some unpublished Geniza parallels to them, will no doubt shed more light on this issue. It is also impossible to say whether the fact that this is an Oriental manuscript, produced by an Arabic-speaking Jew who may have lived in or come from one of the large cities of present-day Syria or Iraq, makes it more likely that its producer came across magical

114 See Gordon, 'Aramaic Magical Bowls,' bowl D (p. 328), l. 9. In the original publication, Gordon read טיאעין as שיאעין, 'Shiites,' but he corrected his mistake in idem, 'Aramaic and Mandaic Magical Bowls,' p. 106.

formulae whose origins lie in Sasanian Babylonia. Only after much further research, and detailed studies of many other manuscripts, will the answers to such questions become somewhat clearer.

Conclusions and Desiderata

Having searched for the remains of late-antique Babylonian Jewish magic in several different textual corpora, I may now offer some broader conclusions and note in which areas more research is still needed. First and foremost, we may safely assert that even when all the above-mentioned criteria are used, and the relevant texts are isolated from the vast corpus of medieval and later Jewish magical texts, we would still face a body of sources that suffers from two disadvantages vis-à-vis the bowls. On the one hand, for most of these texts we can never be absolutely sure that they are late-antique and Babylonian in origin, unless we find detailed parallels in the bowls themselves. Moreover, we can never assume that they present the text in its 'pure' form, whatever that might mean, for we are dealing only with much later copies of copies of whatever original texts may have been in circulation in Sasanian Babylonia.

Going into greater detail, we may note the need for a fuller assessment of the relationship between Babylonian Jewish magic as reflected in the bowls and that reflected in the Babylonian Talmud. To offer such an assessment, we must not only gather all the textual parallels between these two corpora, but also analyze the function and context of each of these parallel units in the bowls on the one hand and in the Talmud on the other. Moreover, we must note especially those areas where the Babylonian Talmud helps us study those facets of ancient Babylonian Jewish magic that are not well represented by the bowls, in order to arrive at a more balanced view of what late-antique Babylonian Jewish magic may have looked like.

A second conclusion that emerges from our survey is that magical texts such as the *Havdala deRabbi Aqiba* or the *Pishra deRabbi Ḥanina ben Dosa* often are easier to identify as Babylonian in origin than individual magical recipes. The reason for this is that such texts were often seen by their copyists as complete units and thus enjoyed a certain degree of textual stability (as may be seen, for example, in the different manuscripts of the *Pishra*), whereas individual recipes were

often translated, abridged, simplified or modified in other ways. Thus, the more often a recipe was copied, the less likely it was to retain its original wording and therefore also the markers of its ultimate origins. In this regard, one may note another scholarly desideratum: the re-edition of the *Pishra deRabbi Ḥanina ben Dosa*, and perhaps also of *Sefer hayashar* and *Sefer hamalbush*, in light of new textual evidence, especially from the Cairo Geniza. To this may be added the renewed search for the long-lost *Raza rabba*, which must have enjoyed some circulation in the ninth and tenth centuries, after which it seems to have vanished.

A third conclusion that emerges from our survey is that the bowls' limited spheres of interest inadvertently limit our ability to look for Jewish Babylonian magic in other textual corpora as well. As we saw, when we compile a list of 'textual markers' that are specific to the Babylonian incantation bowls, this list ends up containing mostly the names and classes of the different demons of Sasanian Babylonia. Thus, when we look in later Jewish magical texts, a list of demons found in the *Havdala*, or a specific female demon found in *Sefer haqevitsa*, or a *get* against demons in a fragment from the Cairo Geniza may all securely be identified as building on earlier Babylonian sources. But when we look at erotic and aggressive magical texts from the Cairo Geniza, we find that they have very few precedents among the incantation bowls, and we can therefore point to very few specifically Babylonian 'textual markers.' And, the fewer the comparanda, the less secure we must remain about these recipes' place in the Babylonian Jewish magical tradition, leaving us trapped in a vicious circle, like demons trapped in a bowl.

What all this means is that with the sources currently at our disposal, we are not likely to have a large body of non-bowl texts that can securely be used as evidence for late-antique Babylonian Jewish magic. As noted at the outset, the enormous advantage of the bowls is that they come from Mesopotamia and that they are late-antique objects; none of the other sources at our disposal can be used 'as is' as evidence for late-antique Babylonian Jewish magic, and some of it can only tentatively be classified as Babylonian. At the same time, the fact that we have some non-bowl texts that can securely be seen as later copies and reworkings of Jewish magical texts of Babylonian Jewish origin, and that each of these texts reached us through different channels of

transmission, leaves some room for optimism. Once more such sources are identified, published and analyzed, and with the ever-growing corpus of incantation bowls at our disposal, we will be on a much surer footing in our study of late-antique Babylonian Jewish magic.[115]

DIGITISED MANUSCRIPTS

Add MS 27199

Date 1516

Title Kabbalistic collectaneum.

Content A collection of mystical and kabbalistic texts..Fols 1r-379vAuthor: Eleazar ben Judah, of Worms, approximately 1176-1238. (אלעזר בן יהודה, מגרמיזה)Title: Sode razaya.Title: סודי רזייא.Note: The contents of folio 1-49 are very close to those printed in Sefer Raziel, ed. Amsterdam 1701, folios 7v-24r.. The manuscript contains all the five parts of Sode razaya: Sod maʿaseh bereshit, Sod ha-merkavah (including Hilkhot Metatron, Hilkhot malʾakhim, Hilkhot ha-kise, Hilkhot ha-kavod, Hilkhot ha-dibur, Hilkhot ha-nevuʾah, Hilkhot ha-emunah), Sefer ha-shem, Perush sefer yetsirah, Sefer ḥokhmat ha-nefesh.. The marginal notes are partially in Latin, especially between folios 55-290..Decoration note: diagrams (ink). . (Fols 32r, 32v, 37v, 88v, 90r, 150r, 151r, 228v, 271v, 272r, 272v, 369v)Decoration note: Maniculae. . (Fols 152r, 168v, 290r)Fols 379v-388vTitle: Sefer yetsirah.Title: ספר יצירה.Note: This recension of Sefer yetsirah is presented in five chapters..Filiation: Cf contents of .BL: Or 6577. (Margoliouth, Catalogue, no. 736). .Fols 388v-470vAuthor: Eleazar ben Judah, of Worms, approximately 1176-1238. (אלעזר בן יהודה, מגרמיזה)Title: Perush sefer yetsirah.Title: פירוש ספר יצירה.Note: The author's colophon is copied on folio 470r: הסלת ספר יצירה ופירושו שבתי בר' אברהם החכם והרופא: וכאשר קבלתי ממורי אבא ר' יהודה ב"ר קלונימוס: וגם קבלתי ממורי הרב ר' יהודה החסיד בן רבנא ר' שמואל והוספתי לפרש בו גם אני הקטן אליעזר.Filiation: Cf .Steinschneider_1879: number 918.Decoration note: diagrams (ink). . (Fols 437r, 437v, 439r, 439v, 440r, 442r)Decoration note: Maniculae. . (Fols 393r, 397v, 400r, 401r, 413v, 424r, 426v, 428r, 438r)Fols 470v-485vAuthor: Eleazar ben Judah, of Worms, approximately 1176-1238. (אלעזר בן יהודה, מגרמיזה)Title: סגולות.Title: Segulot.Note: A number of segulot, combinations of letters of the alphabet and an astrological section.. Folios 476v-477r contain a poem, followed by a list of the divine names derived from each line of the poem, and a prayer connected with the same.. Folio 477v contains some additional names which were added by the scribe.. Folios 480v-485v - additional notes on divine and angelic names and excerpts from Peraḳim de-rabi Eliʿezer..Decoration note: a pen and ink drawing of a snake. . (Fol 484v)Fols 485v-522vAuthor: Eleazar ben Judah, of Worms, approximately 1176-1238. (אלעזר בן יהודה, מגרמיזה)Title: Sefer ḥokhmat ha-nefesh.Title: ספר חכמת הנפש.Decoration note: Maniculae. . (Fols 498r, 498v, 499r, 503r, 503v, 507r, etc.)Fols 522v-526rAuthor: Eleazar ben Judah, of Worms, approximately 1176-1238. (אלעזר בן יהודה, מגרמיזה)Title: Sheʾelat teshuvah.Title: שאלת תשובה.Note: An enquiry regarding the destiny of the soul by Shemuʾel ben Kalonymus, the younger, to Eleʿazar of Worms, preceded by a poem, apparently also by Shemuʾel ben Kalonymus..Fols 526r-600vTitle: Sefer ḥokhmat ha-nefesh.Title: ספר חכמת הנפש.Note: A continuation of the piece under no. 5.. Finishes with a short summary and a short poetical piece by Eleʿazar of Worms..Colophon: אמר המתנצל הכותב הספר הזה אל יאשימני אדם כאשר ימצא בספר הזה טעותים עד אין חקר כי הנני נשבע ביוצרי כי כפל כפלי כפלים היו בהעתק אשר לפני ואני תקנתי מהם הרבה והרבה ולפעמים הנחתי מקום פנוי מתיבה אחת או שתים כאשר לא הבנתי מה עניין התיבה ההיא וכתבתי הספר הזה לאחד מחסידי אומות העולם איש תם וישר מכהני במות שנטו אגושטינו שמו אדון זידייו ראש וקצין על כל כהני הבמות הנזכרי' אשר בכל מדינות ארץ הנוצרים. השם יזכהו להגות בו ולהבין מה שכתוב בו ובשאר ספירי ספריו אשר קנה והכתיב והוציא ממון רב ועוד ידו נטויה להוציא ממונו עד שיהיו לו כל הספרים הנמצאי' אצלינו. והשלמתי הספר הקדוש הזה היום יום ד' שהוא יום הושענא רבא -[רע"ו] - אשר ראיתי בו ראשי בעל הלבנה ברוך ה' כי מובטח אני שלא אמות השנה הזאת נאם הסופר אליהו ב"ר אשר הלוי אשכנזי המדקדק.. 5. Magic Bowls in the Present Volume 26
6. Other Texts of Magic and the Geniza Material 29
7. Notes on the Language of the Texts 30
8. Magic in the Palestinian Amulets and their Religious World 35

Texts and Commentary

I. Amulets from Palestine and Syria

Amulet 1. Provenance unknown. Dr. R. Hecht Collection, Haifa 40
Amulet 2. Ḥorvat Kanaf. Golan Archaeological Museum, Qaṣrin, No. 3164 44
Amulet 3. Ḥorvat Kanaf, Golan Archaeological Museum, Qaṣrin, No. 3163 50
Amulet 4. Aleppo. Museum of the Flagellation Convent, Jerusalem 54
Amulet 5. Emmaus. Present location unknown 60
Amulet 6. Syriac. Provenance and present location unknown 62
Amulet 7. Ağabeyli, Turkey. Present location unknown 68
Amulet 8. Teqoaʿ (?). Museum of the Flagellation Convent, Jerusalem 78
Amulet 9. Oxyrrhynchus (?). University of Cologne, T. Colon, Inv. No. 6 82
Amulet 10. Ḥorvat Rimmon. Israel Department of Antiquities, No. 80.880 84
Amulet 11. Nirim. Israel Department of Antiquities, No. 57.733 90
Amulet 12. Nirim. Israel Department of Antiquities No. 57.739 94
Amulet 13. Nirim. Israel Department of Antiquities, No. 57.744 98

Amulet 14. Provenance unknown. Collection of J. Sammel, Munich 102
Amulet 15. Provenance unknown. Israel Museum, No. 69.3.146 104
Appendix to Amulet 15 111

II. Incantation Bowls from Mesopotamia

Bowl 1. Syriac. Formerly in the possession of V. Barakat, Jerusalem 124
Bowl 2. Hebrew University, Institute of Archaeology, No. 1401 134
Bowl 3. Hebrew University, Institute of Archaeology, No. 1399 146
Bowl 4. Hebrew University, Institute of Archaeology, No. 1042 152
Bowl 5. Israel Museum, No. 80.1.1 158
Bowl 6. Israel Museum, No. 80.1.2 164
Bowl 7. Israel Museum, No. 80.1.3 168
Bowl 8. Israel Museum, No. 69.20.265 172
Bowl 9. Formerly in the possession of V. Barakat, Jerusalem 174
Bowl 10. Syriac. Jewish Historical Museum, Belgrade, No. 243 180
Bowl 11. Jewish Historical Museum, Belgrade, No. 242/1 184
Bowl 12. 12a: Jewish National and University Library, Jerusalem, No. Heb. 4°, 6079
12b: Metropolitan Museum, New York, No. 86.11.259 188
Bowl 13. Collection of V. Klagsbald, Jerusalem 198

III. Amulets and Fragments of Magic Books from the Cairo Geniza

Geniza 1. Amulet on cloth. T-S A.S. 142.174 216
Geniza 2. Two pages from a magic book. T-S A.S. 143.229 216
Geniza 3. Amulet. T-S A.S. 143.403 220
Geniza 4. Amulet.T-S K 1.68 222
Geniza 5. Four pages from a magic book. T-S K 1.70 224
Geniza 6. Four pages from a magic book. T-S K 1.73 230
Geniza 7. Amulet. T-S K 1.127 237
Geniza 8. Amulet. T-S K 1.137 239

PREFACE

It was a widespread practice in the area of Palestine, Syria and Asia Minor during the fourth to the seventh centuries of the current era to use talismans written on metal sheets in order to ward off the powers of evil, to heal people, or to gain the love of a person. The common Babylonian practice of the same period was to write incantation texts on earthenware bowls. The number of Mesopotamian texts written in Jewish Aramaic, Syriac and Mandaic on clay bowls published to date reaches about one hundred and fifty, whereas less than ten Aramaic amulets from Palestine and its vicinity have been published so far.

This book developed from the desire of the two authors to do a modest work on a number of Aramaic magic bowls which at that time (almost ten years ago) were in Jerusalem in the hands of dealers and in the collection of the Institute of Archaeology of the Hebrew University. It has developed to its present dimensions as more texts have turned up. Work on some newly found metal amulets has made it necessary to study and revise the readings of the whole corpus of Aramaic amulets from the area of the Holy Land. Thus fifteen amulets have been edited in this volume — all those which can be deciphered with some confidence — and twelve new bowl texts written in Babylonian Jewish Aramaic and Syriac.

In order to understand the terminology and praxis of the texts discussed in this volume, it is essential to refer to contemporary and later texts from other sources: the Greek magic papyri, the early magic literature in Hebrew, and the magic fragments in the Cairo Geniza. Of the last group, so far almost completely neglected, a few selected texts are included in this work: five amulets, and three fragments from books of magic recipes.

The texts are provided with translations and commentaries, and a detailed glossary of all words is given. All newly published texts are accompanied by photographs. It has been our wish to make available to

scholars material for the study of popular religious life of Jews and pagans in the crucial period which corresponds to that of the Talmud. Our primary aim has been to provide philologically reliable material, and not to offer a detailed study of the religious implications of these texts.

It is out pleasant task to acknowledge the help received from various institutions and persons in the course of preparing the present study.

The following institutions provided us with photographs and allowed us to publish these texts and we should like to extend our thanks to their directors and staff: the Institute of Archaeology and the National University Library of the Hebrew University; the Israel Department of Antiquities; the Israel Museum; Museum of the Flagellation Convent, Jerusalem; the Jewish Historical Museum of Belgrade; the Metropolitan Museum; the New York Public Library; the Geniza Research Unit, Cambridge University Library.

The persons who made it possible for us to publish texts from their collections are Mr. Victor Barakat, Dr. Reuven Hecht, Mr. Victor Klagsbald, Dr. Wladimir Rosenbaum and Mr. Joseph Sammel.

Dr. Amos Kloner and Mr. Zvi Maoz of the Israel Department of Antiquities, the excavators of Ḥorvat Rimmon and Ḥorvat Kanaf, placed at our disposal their finds and their notes.

Mme. Hélène Lozachmeur has found and put at our disposal the original photos of Amulets 7a and 7b which were used by the late Professor A. Dupont-Sommer. We are very grateful for this help, which came when the book was nearly ready in the press.

Several friends and colleagues have given valuable advice. We should like to mention in particular the late Professor G.G. Scholem, as well as J.C. Greenfield, M. Sokoloff, G. Stroumsa and Y. Sussman.

Mrs. Ada Yardeni has contributed to this volume much more than drawings and layout; in several places she has improved the readings of the text. Mrs. Tamar Naveh has typed the manuscript and has rendered great assistance in the preparation of the book. Mrs. Miriam Shaked has done the editing of the typescript and prepared it for the press.

The staff of the Magnes Press, and in particular its director, Mr. B. Yehoshua, who has taken personal interest in this book, have done their utmost to produce an attractive-looking volume.

Jerusalem, February 1984 *J.N., S.S.*

PREFACE TO THE THIRD EDITION

Since the publication of the first edition of this book in 1985 the authors have continued to work on new materials of the same genre. The result was the publication in 1993 of the book *Magic Spells and Formulae*, where further texts were edited and further comments made on a number of topics touched upon in the present book. Each one of the present authors has dealt in a number of articles with further texts. A large collection of Geniza texts have been brought to light by Peter Schäfer and Shaul Shaked, in collaboration with a team of young scholars, under the title *Magische Texte aus der Kairoer Geniza*, I–II, Tübingen 1994–1997. Further texts are planned for publication in the subsequent volumes of the same series. The authors of the present volume are thinking of preparing a new corpus of Aramaic amulets, but this may take some time to complete.

The "Additions and Corrections" at the end of the volume (pp. 295 ff.) incorporate those printed in the second edition of the book (1987), together with further addenda and corrigenda that have been detected since then by discerning colleagues and by ourselves. The reader is urged to consult the Additions and Corrections while using the book.

Jerusalem, June 1998 *J.N., S.S.*

INTRODUCTION

1. Aramaic Magic Texts: General Description

The Aramaic texts published and discussed in this book are part of a long-standing tradition of magic in the Near East. Aramaic magic literature continues Assyrian, Babylonian and Egytian magic, and is closely related to the rich literature of magic and incantations in Greek, known to us chiefly from Egytian papyri. These texts, taken together, supplement our knowledge of society, religion and culture during the early centuries of the Christian era. The Aramaic magic texts, of which a a group of hitherto unpublished specimens is given here, form a distinct body of material within the corpus of magic in late antiquity, and we shall try to elucidate them mostly within their own terms.

The inscribed magic artifacts in Aramaic, which are usually supposed to date from the fourth to the sixth or seventh centuries C.E., are known to exist in two basic material forms: (a) earthenware bowls, inscribed with ink, usually on the concave side in spiral concentric circles,[1] all of them found, as far as it is possible to tell from controlled excavations,[2] in the area of Mesopotamia and Iran; and (b) metal sheets, of gold,

[1] Exceptions to this method are not rare. Some other techniques of writing are: The inscription, or part of it, is written on the outside surface of the bowl; the inside area is divided into sections, in which the writing is done in columns (e.g. our Bowl 8); some bowls have their writing arranged in circular lines without a spiral connection between the lines. The usual spiral arrangement can begin either in the centre or on the rim.

[2] In some cases (e.g. our Bowl 9) the provenance as given by the dealer is Palestine, but this statement, which cannot be verified, lacks credibility. For a similar claim made with regard to a Mandaic amulet cf. Naveh 1975, p. 47, note 1.

silver, copper or lead,[3] with the inscription incised into the surface of the metal with the aid of a sharp instrument. These latter amulets were designed to be folded, rolled into a narrow strip, and inserted into a container (reminiscent of a *mezuza* in shape), also made of metal, which could be worn as a phylactery on the body of the owner, or placed in a private house or a synagogue, possibly by suspension (see Commentary to Amulet 11). Amulet 10, which was written on a potsherd, and which served not for protection but for arousing love, was presumably designed to achieve its effect by being placed in fire (see Commentary *ad loc.*). Amulets written on a metal sheet are mostly typical of the area of Syria, Palestine and Asia Minor, although they are not entirely absent from the eastern regions, i.e. Mesopotamia and Iran.[4] It may be taken for granted that besides such solid materials as earthenware and metal, soft materials, such as parchment, papyrus or cloth, were also often used for writing amulets, but have not survived. Amulets on papyrus are in fact known from Egypt, written in Greek and Coptic,[5] and incantations on paper, parchment and cloth have been found in the Cairo Geniza (dating to the 10th century and later); some specimens of these latter texts are given in this book. Metal bowls were used for incantations in the Muslim world (Spoer 1935; Reich 1937-38), but this practice is unknown from the earlier period. We come across medallions and gems inscribed as amulets in the Hellenistic and Iranian cultures,[6] but no such objects inscribed in Aramaic have yet come to light.[7]

[3] At least one Nabataean incantation (Naveh 1979a) is written on a large pebble. One Aramaic amulet is done on a potsherd (our Amulet 10).

[4] Metal amulets written in Syriac have been found in the area of Luristan (a photograph, without decipherment or identification, published in Vanden Berghe 1970). Several Mandaic amulets on sheets of lead have been found; cf. Lidzbarski 1909; Macuch 1967, 1968; Caquot 1972; Naveh 1975.

[5] The most comprehensive collection of the Greek material is in Preisendanz 1928, 1931, 1941.

[6] For the Hellenistic material, cf. chiefly Mouterde 1930; Bonner 1950 and 1951. The rare Pahlavi amulets are discussed in Pope 1938, among the Sasanian seals. Bivar 1967 discusses a Parthian amulet while adducing other Iranian material.

[7] There are some Samaritan amulets written on metal pendants and rings, cf. Ben-Zvi 1976; Kaplan 1967.

Among Semitic amulets from Palestine and its environs we have texts written in three languages, Jewish Aramaic (Amulet 1–3, 5, 7–15), Hebrew (Amulet 4), and Syriac (Amulet 6). The first two varieties, Jewish Aramaic and Hebrew, were presumably written by Jews; they use the regular Hebrew script of the period, whereas the Syriac amulet, which seems to have been composed by a Christian, is written in Estrangelo.

As to the magic practice which accompanied the use of the bowls, different opinions have been expressed. Many bowls were found placed in their original position upside down, a fact which has led scholars to assume that they may have served as traps for demons, being meant to keep the evil spirits imprisoned inside them. This view may gain some support from the fact that in some cases two bowls were found placed facing each other forming between them a closed sphere.[8] Such an enclosed ball-shaped area might be an ideal prison for evil spirits. This theory was rejected by Gordon,[9] who argued that it would be absurd to assume that any house-owner would want to have demons permanently locked in his house. It seems, according to Gordon, much more likely that they would want to get rid of the maleficent spirits and to have them removed from the house. He therefore suggests that the shape of the bowls resembles that of a skull, which may have been regarded as magically effective. We must confess that this argument fails to convince us. The idea of keeping demon-traps in the house need not strike us as more ridiculous than that of placing mouse-traps. In both cases the hated victim, once caught, is incapacitated and is made powerless to cause harm. A harmless demon caught by the bowl constitutes no menace to the safety of the house. The text of the bowls very often talks of chaining and pressing the evil entities; at the same time it may also bid them go away, leave the house and desist from bothering the house-owner. The bowl thus serves both to entrap the evil powers and to reject them; there is no real contradiction between these two propositions.

It may be noted that many bowls, especially in Mandaic, are designed

[8] Pognon 1898, pp. 3 ff.; Hilprecht 1903, pp. 447 f.; Montgomery 1913, pp. 40 ff.

[9] Gordon 1957, pp. 161 f.; Isbell 1975, pp. 13 ff., represents the same view.

as "of the cemetery".[10] This may possibly indicate that some bowls were placed in a cemetery, and this association with the Other World added to their mysterious power. This was by no means the only location which was used in order to increase the efficacy of amulets. The amulets from Nirim (Amulets 11–13) were found in the apse of the synagogue, where the ark of the holy scrolls was presumably placed. It may be assumed that the amulet was put there in order for it to be as close as possible to the spot which served as a gate for communication (through prayer) with heaven. In this connection one may recall that a favourite modern spot for placing appeals to divine help is in the Wailing Wall.

Another theory for the use of the bowls is based on the current modern practice of bowl magic in the Middle East, according to which the bowl is often filled with some liquid and the person who seeks protection or healing is made to drink the water which has absorbed the contents of the formula and has thus been made potent.[11] There is, however, no evidence for such a practice with our Mesopotamian bowls, and it seems rather unlikely that they were used in such a way, which might have effaced the letters or left some other mark on the bowl.

Apart from bowls designed to protect the house and the person of the inhabitants of the house from harm or disease — the most common type — or to arouse love,[12] there are bowls which aim at inflicting evil on an enemy specifically named (e.g. Bowl 9). We have no information as to how these latter bowls were used. One can only try to speculate that they were buried or hidden in the vicinity of the enemy's house, or attached to some personal effect of the victim to be, probably obtained furtively.[13]

[10] Pognon 1898, p. 3, and our Bowl 4:2, which carries the phrase "the spell of the tomb". Some metal amulets were found in tombs; see our Amulet 4 (from Aleppo) and Montgomery 1911, p. 272 (Irbid). See also Montgomery 1913, pp. 40, 43 f.

[11] Canaan 1914, p. 102; similar injunctions in Winkler 1930, pp. 75, 76. Montgomery 1913, p. 45 gives the text of an Arabic brass bowl which also contains a reference to drinking. An early reference to this practice is in the Geniza text T.-S. K1.132: פתיחת לב. קח קערה חדשה וחכתוב ג ימים בכל יום אלו השימות ותרחוץ אותו במים ותשחה...

[12] Montgomery 1913, Nos. 13, 28. Our Amulet 10 and Geniza 1 and 3 constitute further examples.

[13] We have a recipe for hatred in a late Judaeo-Persian manuscript of magic (JTS 1714,

Three basic Semitic modes of writing are presented by the Babylonian incantation bowls. These are Judaeo-Aramaic, Syriac and Mandaic. A fourth type of writing found on some bowls is Pahlavi, but its interpretation is, unfortunately, extremely difficult. A single bowl which has been seen (at the Yale Babylonian Collection) contains a script looking like Parthian, but its authenticity is questionable and it is likely to be a modern forgery. The different scripts correspond not so much to linguistic or ethnic differences (although such differences also existed), but rather more to distinctions among religious communities; it is therefore interesting to raise the question whether the religious differences are also reflected in the magic texts, or whether one can establish a correspondence between each community's magic and its religious perceptions.

On the plane of language and phraseology we have significant and obvious differences between the various groups. The bowls in Judaeo-Aramaic contain a high degree of material which is derived from the Hebrew scriptures (see the index of scriptural quotations of this volume and Isbell 1975, p. 195). They also contain a small number of peculiarly Jewish concepts of the post-biblical period. The most noteworthy among these is the figure of Yehoshuaʿ bar (or ben) Peraḥya and the idea, associated often with his name, of giving a *geṭ*, a letter of divorce, to the female demons. This is further elaborated on in some of the texts by the idea of a *geṭ* which is sent across the sea (see below, p. 27). It is remarkable that the figure of Yehoshuaʿ bar Peraḥya occurs also in two Syriac bowls (Montgomery 1913, Nos. 32–33), where the Jewish term *geṭ* is rendered by the Persian word *dastabīra*.[14] A similar concept which may be of Jewish origin (although it may equally well be a pagan magical concept introduced into the Talmud) occurs in our Bowl 6 (see Commentary to Bowl 6:7–8 **wbyr**...). Several Talmudic associations seem to be present in Bowl 13.

Such elements are specifically Jewish; it is hard to imagine that they could have been composed by non-Jews. One must come to the conclu-

ENA 2326, fol. 1b): ... לשנאה יכתוב על חרס חדש לפּבּפּ עם פּבּפּ בשם... בשם אלו שמות תתנו
The practice accompanying the writing of an incantation for hatred is to bury the inscribed new potsherd in a new tomb. The same instruction with regard to a "new egg" is given in Geniza 6, p. 4:9–11.

[14] On this term cf. Shaked (forthcoming).

sion that the writers of these Jewish-Aramaic bowls were in all probability practitioners of magic who belonged to the Jewish community. This conclusion does not necessarily apply to the clients, who ordered the bowls written for healing, protection or other purposes. There is, in fact, a combination of two factors which makes it likely that not a few of these customers were indeed non-Jews: First, there is the fact that Jewish bowls constitute the great majority of inscribed earthenware bowls from Mesopotamia and Iran, while Jews certainly did not form more than a minority of the population; and secondly, there is the fact that the names of most of the clients were not Jewish, and some of them are theophoric names of Zoroastrian significance. The second fact would not be particulatly significant on its own, since there can be no doubt that many Jews carried Persian and other non-Jewish names. However, when it is combined with the first consideration, it adds some weight to the supposition that magic may have been considered to some extent a Jewish specialization and that pagans and Zoroastrians often turned to Jewish practitioners when they sought an effective remedy, protection or curse.[15]

It may be noted that the amount of Zoroastrian religious influence which may be detected in the Babylonian bowls is very limited; it concerns mostly some names of demons (see Shaked, forthcoming). This observation stands in contrast to the strong presence of Iranian linguistic elements in Babylonian Jewish Aramaic, and to the Iranian influence which may be detected in other spheres of Jewish life.[16] The same may be said of the Syriac bowls, which seem to have been written by pagans (or even by Zoroastrians). Mandaic bowls tend to have some specifically Mandaic terminology (e.g. the divine names **abatur, iurba**), but the same divine and demonic names and concepts are sometimes found also in Jewish bowls.[17] In general, the Mandaic texts follow the same magical conventions as found in Jewish Aramaic and Syriac bowls. In one or two cases Syriac and Mandaic bowls seem to reflect

[15] See further on this in Greenfield 1973a, p.150, and Shaked 1983, pp. 16 f.

[16] This field of study has not yet been treated in a comprehensive study. Sketchy references may be found in Neusner 1968 and 1975.

[17] See Pognon 1898, pp. 93 ff.; Montgomery 1913, p. 96; Yamauchi 1967, pp. 40 ff.

specific Jewish texts.[18] At least one Jewish Aramaic text seems to show clear dependence on a Mandaic *Vorlage* (cf. Greenfield and Naveh's forthcoming article on a Mandaic lead amulet containing four incantations).

2. History of Research : Bowls

The study of the Aramaic magic texts was first begun in the middle of the nineteenth century, when Thomas Ellis translated for Layard six incantation texts in Jewish Aramaic and one in Syriac, inscribed on earthenware bowls which were brought from Mesopotamia to England and deposited in the British Museum (Layard 1853; Levy 1855). Several other texts on bowls, inscribed in Jewish Aramaic and in Syriac, were published afterwards by Rodwell 1873 (for which cf. Halévy 1877); Chwolson 1882; Hyvernat 1885 (with Nöldeke 1885 and Grünbaum 1885); Schwab 1886 and Schwab's later publications; Harkavy 1889; Wohlstein 1893, 1894; Stübe 1895; Lacau 1896. These early attempts at interpretation are often quite faulty, though they paved the way to subsequent research. Towards the end of the century Pognon (1894, 1898) published more than thirty Mandaic incantation bowls found at Khuabir on the Euphrates, west of Baghdad.

The most important single scholarly contribution to the study of the bowls was done by Montgomery 1913, a monumental book containing an edition and translation, with notes and indices, of forty bowls (thirty of them in Jewish Aramaic, seven in Syriac, and three in Mandaic). All of these bowls were found *in situ* in the archaeological excavations conducted by the University of Pennsylvania at Nippur. This fact

[18] See the observations in Greenfield 1973a, as well as the comments above on Yehoshua' bar Peraḥya in Syriac bowls.

enables us to have a unified corpus of inscriptions written (or at least used) in a single town, presumably within a relatively short period of time, often by or for members of the same family. We thus gain an insight into the range of languages and scripts used in Nippur, as well as into the variety and limitations of the magic formulae which were current among the various communities in that town.

Montgomery's work (1913, pp. 16 ff.) has the added benefit of presenting the most comprehensive and solid introduction to the study of the bowls. It gives a detailed survey of earlier publications, thus rendering further discussion of the early studies of the magic bowls unnecessary, and analyzes the most important aspects of the texts and their contents. No attempt will be made in the following to duplicate or supersede Montgomery's treatment of the subject. Only certain points on which new material is available, or on which new suggestions may be offered, will be touched upon in the following pages.

Although Montgomery's readings are on the whole solid and reliable, the book contains a number of textual errors, both with regard to the reading of the bowls and with regard to points of interpretation. Many of these were corrected and clarified in an important review article by J.N. Epstein (1921-1922), which, unfortunately, was not taken into account by many of the scholars who have worked in this field since, with the result that several of Montgomery's patent errors have been perpetuated in the literature.[19]

The next most important name in this field of study is C.H. Gordon, who has in a series of articles,[20] published a great many new bowls from various collections in the U.S.A., Europe and the Middle East. The study of the magic bowls further benefited from the fact that a number of students of Professor Gordon felt inspired to work on this material; as a result there were published several dissertations containing corpora of bowls in Mandaic (Yamauchi 1967), Syriac (Hamilton 1971) and Jewish Aramaic (Isbell 1975), as well as a Handbook of the latter

[19] This observation applies to the work of C.H. Gordon, whose readings are generally reliable, as well as to that of his students Rossell 1953; Yamauchi 1967; and Isbell 1975. In Hamilton 1971 the Syriac texts of Montgomery are corrected in the light of Epstein's comments.

[20] See Bibliography under Gordon. The only work done on the subject in the intervening period between Montgomery's and Gordon's is by Fuÿe 1925.

language, in which a grammatical sketch is included (Rossell 1953). The texts collected in these corpora make up the following total numbers: 72 in Jewish Aramaic, 33 in Mandaic and 21 in Syriac. It may be remarked that not all the published bowls were incorporated into these collections.[21]

The more recent publications of texts in this field include Oberman 1940; Teixidor 1962; Jeruzalmi 1963; Yamauchi 1965; McCullough 1967; [22] Borisov 1969; Kaufman 1973, 1975; Geller 1976, 1980; Harviainen 1981.

3. Amulets Published So Far

The state of study of the Palestinian incantation texts is much less satisfactory than that of the Mesopotamian bowls. One part of the problem is that the small number of Palestinian texts makes their comparative study difficult. Another problem is that these texts were inscribed on small metal plaques (mainly silver, copper and lead), which were rolled up. The unrolling of the generally corroded fragile material and then the reading of the preserved tiny letters, which often consist of shallow scratches on the surface of the material, is by no means an easy task. Among the few generally fragmentary Palestinian amulets five were published at the beginning of this century: one, Amulet 4, is from Aleppo (Schwab 1906); one, Amulet 5, from Emmaus (Vincent 1908) and three from Irbid (Montgomery 1911). Two other amulets, Amulets 7a–b, were found at Ağabeyli in Turkey, near the Syrian border (Dupont-Sommer 1950/51). Still another, of unknown provenance,

[21] Missing from Isbell 1975 are, for example, the texts published in Hyvernat 1885; Harkavy 1889; Wohlstein 1893 and 1894; Stübe 1895; Fuÿe 1925; Borisov 1969. Not all of these were published without facsimiles.

[22] Cf. the reviews by Segal 1970; Yamauchi 1970.

Amulet 8, was published in Testa 1967. The latest publication of an amulet, Amulet 9, is by Klein-Franke 1971. The amulet is in Cologne, Germany, and may have come from Oxyrrhynchus in Egypt.

The amulets preserved in the New York Public Library, of which three were published by Montgomery in 1911, are part of a group of six metal amulets which were donated by Mrs. Henry Draper. Their state of preservation is such that it is very difficult to improve much on Montgomery's readings (which in some cases are evidently wrong).[23] We have therefore decided to leave them out of the present publication, which otherwise aims at giving a complete corpus of the known Aramaic amulets. Apart from Aramaic amulets we have included here one amulet in Syriac, published by Dupont-Sommer 1946, where we believe we can offer an improved reading and interpretation. Otherwise, because of the geographical definition which we have found useful to adopt with regard to amulets, namely those coming from the region of Palestine and adjoining countries, we have excluded from this corpus metal amulets from Iran and Mesopotamia in Mandaic and Syriac (see above, note 4).

The first amulet of this kind to be published, found near Aleppo (Schwab 1906; our Amulet 4), is one of the longest Palestinian amulets known. It contains some manifestly Jewish elements (e.g. the figure of 248 limbs, some biblical allusions, and many Hebrew phrases), together with the usual magic terminology (e.g. Ablanathanalba, Marmaraot, **ʾwgryt**). A prominent symbol which occurs in the text is strongly reminiscent of the Christian monogram XP. It has led scholars to believe that we are faced here with a Judaeo-Christian monument, though this does not seem proven, as the symbol may have been widely used outside Christian circles and may have preceded Christianity.

Vincent published in 1908 a fragmentary amulet of some five lines

[23] As an example for lines where the readings of Montgomery 1911 may be improved upon with some confidence, cf. the beginning of New York Public Library, Hebrew amulet No. 3 (Montgomery's amulet A) where one may read:

1. ובחטרה דמשה ובציצה דאהרן[]
2. כהנה רבה ובעזקתה דשלמה ו(ב)[מג]
3. נה דדויד ובקרנתה דמדבחא ובשמ(ה)
4. [ד]אלהא חיה וקימה ד(תי)גע[רון]

The combination **bḥwṭrʾ dmšh nbyyʾ... wbʿzqtyh dšlmh br dwd mlkʾ dyś[rʾl]** occurs in the Geniza fragment ENA 3513.11a.

found in Emmaus (our Amulet 5). Vincent's readings, which have been followed by subsequent scholars, have proved upon inspection to be in need of emendations, which are included in the edition presented here. We encounter in this amulet some divine names (Masagiel, Shamriel) and the magic term **krqtyry'** "magic characters, magic signs".

It has been the bad luck of this material, perhaps because of its rarity and the difficulties inherent in its decipherment, that it suffered in some cases from fanciful interpretations and unreasonable speculations. Thus, one amulet (our Amulet 6) was heralded upon its first publication as containing a gnostic doctrine relating to the letter *waw* (Dupont-Sommer 1946); subsequently it has been shown (by Gordon 1949, 1953) that not even once does the name of this letter occur in the text. Another text (our Amulet 7) was understood to allude to the Great God, who would be different from the God of Israel (Dupont-Sommer 1950/51, p. 208 on lines 15–16), but this was shown to be inexact (Scholem 1965, pp. 84 ff.). In both these cases the new reading offered here tends to confirm the revised interpretations, and in some measure it adds new details which improve our understanding of the amulets. Thus, the Syriac amulet (our Amulet 6) is now shown to contain an allusion to three deities, who are named Bar-Theon, Rabbā Ḥasīnā and Qaddiš Īlā "who stand in the great ford of the sea". It talks of a demon, called apparently Tarpas-dukh. In the Aramaic amulet (our Amulet 7) we may eliminate the speculation as to the "womb to be blessed" as well as to Metatron, as we can recognize the name of the client Shalluna bar Demetrion in lines 7–8. On the other hand there is a possibility of reading (in lines 14–15) a reference to words which rise "beside (or behind?) the throne", an allusion which brings to mind the notion of the angel whose name, Metatron, indicates that he is "beside or behind the throne".

A similar scholarly controversy has arisen with regard to an amulet which was apparently found near Jerusalem (our Amulet 8). The scholar who first published it regarded it as a blessing of the "oil of faith" (Testa 1967), but this interpretation was rightly rejected by Milik 1967 in favour of the more likely reading of the plaque as an incantation. We can see from the new reading that a demon by the name of Marten daughter of Qoriel is adjured in the name of the angel Agirat.

Finally, an amulet here reprinted with some corrections (our Amulet 9) adjures a spirit called "Fever and Shivering", evidently with the aim of healing the client, a certain Marian daughter of Esther.

4. The Newly Found Amulets

The corpus of amulets presented here is enriched by nine newly discovered texts, all, except three (Amulets 1,14,15) coming from controlled excavations in Israel, two from Ḥorvat Kanaf, near the Sea of Galilee (Amulets 2–3), one from Ḥorvat Rimmon, north of Beer-Sheba (Amulet 10) and three from Nirim in South Western Israel (Amulets 11–13). The last six amulets (Amulets 10–15) reached us at a stage when the corpus was ready for the press, and the numbers assigned had to follow at the end of the group.

As to the dating of the amulets, the archaeological data converge around the fifth-sixth centuries C.E. This dating is provided very clearly in the case of Nirim (Amulets 11–13), where the late Roman and Byzantine coins help in defining the period from which the amulets stem. The conclusion reached by L.Y. Rahmani as to the period of the small finds places them in the sixth century C.E. A similar conclusion was reached by the excavators of Ḥorvat Rimmon (fifth-sixth century C.E.) and Ḥorvat Kanaf (same period).

Amulet 1 is designated for healing the client. It contains several Jewish formulae, such as are encountered in the prayer before sleep *(Qeri'at shema' 'al ham-miṭṭa)*, as well as biblical quotations. It also has a series of magic names, and an interesting sequence of nouns, each one preceded by the word **m'yn**, which may mean either "from the eye of..." or "in the form of...".

Amulet 2, more specifically formulated for healing, commands "the fever and the shiver, the female demon and the spirits" to be driven out from the body of its owner.

Amulet 3 is for the protection of "Rabbi Eleazar..., the servant of the God of Heaven". This title is quite unusual in our amulets. Some of the text seems to suggest that the amulet is designed for protecting the owner on the road: "In every place where this amulet will be seen, you (the evil spirit) should not detain Eleazar, son of Esther. And if you detain him , you will be cast immediately into a burning furnace". Other parts seem to beg for the healing of the owner: "Send healing and cure to Eleazar". This amulet also contains verbal allusions to the Bible.

Amulet 10 is a love charm. It is written on an unbaked potsherd, which must have been meant to be thrown into the fire after the writing

of the amulet, and was probably used in this way, as far as we can tell from the black areas caused by fire on the surface of the sherd. The evidence for writing amulets on unbaked clay comes from the Judaeo-Arabic texts of the Geniza, where the term *nayy* "uncooked" occurs. The subsequent burning in fire was alluded to in the text of this amulet (and in Geniza amulets of similar nature) by the words: "Just as this sherd burns, so shall burn the heart of..."

Amulet 11 is for curing its owner from headache, which is called here by the Greek term κεφαλαργία, written **qplrgy'**. The pain is considered to go into the bones (?) of the chest.

Amulet 12 is designated for the protection of a woman and her child. Here too Jewish formulae are quite conspicuous. The female customer is called Shlamṣu, a hypocoristic form of Shlomṣiyyon.

Amulet 13 is for a woman called Esther daughter of Tatis. Esther is the most widely attested feminine name in these amulets. The amulet is designated to save her from evil spirits, and much of the text is taken by a quotation from Exodus 15:26.

Amulet 14, which is very fragmentary, is remarkable for its combination of Hebrew-Aramaic with Greek.

Amulet 15 is based on an interesting *historiola*, or magic story, which is also available to us in a Babylonian version in Bowls 12a and 12b. This story enjoyed widespread popularity in Christian magic literature of the East, where the name of the helper was identified with Saint Sisinnius. The names of the helpers in this amulet were perpetuated in late Jewish magic under the form Sanoy, Sansanoy and Samangalof, in amulets which are used for the protection of a new-born baby and its mother. The names of the main actors in our amulet are partly metaphorical: The woman is called Smamit (= spider or lizard), the attacking fiend Sideros (=iron), while the names of the helpers, **swny, swswny** and **snygly**, have not yet received satisfactory explanation. It may be significant that all names begin with the letter *s*.

5. Magic Bowls in the Present Volume

The present volume contains most of the legible bowls available in Jerusalem. These are bowls which form part of the collection of the Institute of Archaeology of the Hebrew Universty (Nos. 2–4), as well as those of the Israel Museum (Nos. 5–8). In addition we have included a bowl recently presented to the Jewish National and University Library in Jerusalem (No. 12a), together with a parallel text which occurs in a bowl at the New York Metropolitan Museum (12b). We are also publishing two bowls seen in the hands of an antique dealer in Jerusalem, Mr. Victor Barakat (Nos. 1 and 9), although the present whereabouts of these latter bowls is unknown. The texts of two unpublished bowls at the Jewish Historical Museum in Belgrade, Yugoslavia, photographs of which have been sent to Jerusalem for study and publication, have also been included (Bowls 10, 11). A last addition to this group of bowls comes from the Klagsbald Collection, Jerusalem (Bowl 13).

Several points of interest are brought out by the new bowl texts which are published in this volume. Two bowls contained in this collection are in Syriac, 1 and 10. Bowl 1 contains basically a well-known text, occurring on three Syriac bowls so far published (see Commentary to Bowl 1). The parallel text presented in this new bowl allows us to complement and improve certain readings in the previously published texts, and it confirms some of J.N. Epstein's conjectural readings (cf. Commentary to lines 3–4). A point which can be made on the basis of this text and which clarifies a formula in Aramaic bowls is the possibility of eliminating the figure of Hermes where it does not belong. It is clear that in Montgomery Nos. 2 and 27 what was regarded as an allusion to the Greek god is actually a reference to steel (cf. Commentary to line 12). It is a recurrent phrase in the bowls that the sorcerer is surrounded by a wall of pure steel, or clothed with a garment of pure steel.

Bowl 10 uses some interesting metaphors for the demons who are to be abjured. They are to be like birds who fly and change places (which is why they should leave the body and person of the client), and they should be like wax which melts in fire. It is not unlikely that such formulae were accompanied by suitable magic practices of the sympathetic kind.

Our Bowl 2 (in Jewish Aramaic) has five parallel texts already published. The new text again helps establish the correct readings of the formulae. From the study of Bowls 1 and 2 we may learn something of the mechanism of the transmission of magic formulae, which is not entirely that of a scribal tradition, but is akin in some respects to oral transmission. The combination of the two modes of transmission is clearly visible in the list of eleven names of angels (see Commentary to lines 6–7), where we can see certain modifications which may be attributed to copying, while others are only comprehensible in terms of free oral tradition.

Bowl 2 also affords a possibility of establishing the original form of the divine (or angel) name which occurs in Mandaic as **iurba**, identified with Adonai. The element **yw** in **ywrbʾ** is certainly a development of the divine name Yah, Yahu etc. (which occurs here as **yyy**), with the epithet *rabbā*. Although this figure is apparently defined here as an angel, there are eleven names of other angels who assist him against the demons, a fact which establishes his lofty position as a deity.

The international character of this magic is apparent in the expression **byt ʾylhy wbyt knyšt**ʾ (line 5), which seems to refer to pagan temple(s) and to Jewish synagogue(s).

Bowl 3 has a glaring example of Hebrew spelled from hearing, without acquaintance with the traditional spelling, when Num. 10:35 is given as ...וחיחי בין נסוע הארון וימר מושה קומה יהוה ויפוצו איבאך וינסו מ מיפנך

Bowl 4 has a curious illustration of an undefinable human figure. The ribbons waving to the left of the figure may be associated with the ribbons which constitute a symbol of royalty in Sasanian iconography; cf. Göbl 1971, pp. 11f. If this was intended in the picture, it may be possible to regard **mlkn**ʾ (in line 4) as signifying "I am king" or "I rule", rather than "I advise", as preferred in our translation.

Yehoshuaʿ bar Perahya is a well-known figure in the Aramaic incantation bowls. He occurs in Bowl 5, where he is associated, as is usual, with the practice of giving a deed of divorce (*geṭ*) to a female demon, named Lilit; the legal complication which arises in this situation is similar to that of a *geṭ* sent across the sea, which is valid. However, the *geṭ* lacks force because the man who writes it does not know the name of the woman. This is rectified by the divine powers, who add the name in the blank space. The situation is used to make the exorcism valid in all cases, "both when I know the name, and when I do not know the name"

(line 4). The point about the name of the demoness being unknown is so far only attested in this text, but it may explain the particular difficulty of the *get* which comes from across the sea, with an incomplete name.

Bowl 6 presents a curious introductory text which seems to be moulded partly on the Book of Jonah, but also uses other biblical allusions (e.g. Ps. 115:4–6), as well as what looks like an association with a phrase in the Babylonian Talmud (Ta'anit 8a; see Commentary to 6:7–8). A sequence of chronological designations, which has parallels in other magic texts, is included, and also a reference to groups of people "who sit in market places and streets, and who go out on the roads". This kind of enumeration is reminiscent of the various lists of nationalities which occur on some bowls; see e.g. Kaufman 1975, where the spirits of different nationalities are mentioned.

Bowl 7 is so unusually formulated that it partly defies translation. The translation provided is to a large extent conjectural. It provides us, nevertheless, with some interesting parallels to late Jewish magical literature. The phrase **kmypl ḥysy' mn ṭwr'** etc. can be understood in the light of *The Sword of Moses* (Gaster 1898), which in its turn also gains in clarity by this comparison.

Bowl 8 has an unusual arrangement in columns radiating from the centre cross-like. This is the only text in our collection which has already been published (it was first printed in a Hebrew article by Narqis 1935), and it is re-edited in order to complete the collection of the Jerusalem bowls, as well as for rectifying some minor points in the reading.

Bowl 9 is particularly interesting in that it provides a rare example of a text devoted to imprecations addressed by name against an enemy, Judah bar Nanai. The language of the curses is based on biblical verses, and in some cases it invents non-existent biblical phrases; **wl' th' 'swth lmḥtm** betrays the intention of the writer, since he fell into the trap of using Aramaic words where he obviously thought he was writing in good Biblical Hebrew. A list of diseases, not all of them understood by us, is an interesting feature of this bowl.

Bowl 11 provides us with some new features. A seemingly Iranian term for a magic formula, **mhryn**, occurs here for the first time, as well as such unusual forms as **pydgmy** and **'ryswt'** (the latter denoting a magic bane). Two biblical verses are intertwined for magical purposes in lines 6–7 by giving a word of each successively.

Under number 12 two bowls which have a similar text are given in parallel columns, together with the text of Amulet 15, which contains

the same story. For some comments on the story of Smamit and her helpers see above in the description of Amulet 15 (p. 25).

The main interest of Bowl 13 is in its large size and very long text as well as in some features of its contents. It contains a unique description of the physical appearance of the demon addressed in the incantation, apparently the demon Bagdana, "head of sixty kingdoms, whose power is the power of a blast, whose heat is the heat of fire" and so on. Besides these attributes of power and of the terror which he arouses, we have such concrete details as "his head is that of a lion, his molar teeth are those of a she-wolf, his teeth are those of a tiger, the draughts of his mouth are furnaces of fire" and so on. The text of this bowl is also remarkable by the fact that it has a well defined structure of parallel passages, which begin with similar formulae, although the precise significance of the dialogue formed by these passages is not entirely clear. All in all, the text of this bowl presents a unique incantation formula, which has no parallel in other magic texts as far as we know.

6. Other Texts of Magic and the Geniza Material

The objective of this study was to publish the texts of our amulets and bowls with readings and intepretations which would be as exact and thorough as possible. While doing this work we checked previously published incantation texts (as far as possible from photographs or facsimile drawings) without relying too much on previous editions. Thus we could suggest revised readings not only for the amulets which we have re-edited (Amulets 4–9), but also for several phrases in the previously published Mesopotamian bowl texts.

In order to get acquainted with the whole magical literature in antiquity, major publications of Greek magic papyri and various magic books which have survived, such as the Christian Syriac *Book of Protection* (Gollancz 1912) or the Jewish *Sword of Moses* (Gaster 1898) and *Sefer ha-razim*, which was found among the Geniza materials, were checked. However, among the fragments which survived in the Cairo

Geniza there are many amulets and pages of magic books which have not yet been treated by scholars. We have found it necessary to go through some of this material and compare it with other Jewish magical texts, although we have not aimed at completeness in this field.

The Geniza amulets and magic books were written in the Middle Ages, generally in Egypt itself, but some presumably in the neighbouring countries, as e.g. Palestine. The writers of these texts spoke Arabic (in certain cases Persian, and in one case a Persian dialect), but their magic texts were written in an interesting mixture of Hebrew, Aramaic and Arabic (including some Greek terms and words). As for the contents, it is obvious that the magic of the Geniza follows in general the Palestinian tradition. Thus it is possible in some cases to understand phrases in the Palestinian amulets and restore the fragmentary love charm from Ḥorvat Rimmon only by comparing them with the formulae used in the Geniza magic texts. A selection of five Geniza amulets (Geniza 1, 3–4, 7–8) and three fragments of magic books (Geniza 2, 5–6) is given here. Apart from these texts, some occasional phrases from further unpublished Geniza fragments are quoted in the Commentary. The use of the Geniza texts is designed to help in elucidating certain obscurities and to add paralled material to the formulae discussed in the main parts of the book (mainly in connection with the amulets).

7. Notes on the Language of the Texts

Short sketches of the three main dialects of the bowls are provided in the following publications: Rossell 1953 (Jewish Aramaic); Yamauchi 1967 (Mandaic); and Hamilton 1971 (Syriac). Useful remarks on some expressions will be found in Epstein 1960, p. 14; Levine 1970; Greenfield 1973a and 1973b. On some formulae there are also remarks in Niggemeyer 1975 (which is mainly concerned with those in *Sefer harazim*); Gruenwald 1980; and Niditch 1979. Mention should also be made of the observations by F. Rosenthal 1939, pp. 218 ff., 233 ff. Some

points of detail have been dealt with by Schiffman 1973 and Sperber 1966.

In discussing the language of the bowls and the amulets published in this volume, we have to distinguish three groups of texts: Syriac (Bowls 1 and 10 and Amulet 6); Babylonian Jewish Aramaic (Bowls 2–9, 11–13); Palestinian Jewish Aramaic (Amulets 1–3, 5, 7–15). In Amulet 4 the Hebrew element is predominant.

a. The Syriac Bowls

The three Syriac texts are not written in the same script: the script of Bowl 1 is Proto-Manichaean, more akin to Palmyrene cursive (cf. Montgomery 1913, Nos. 31–37), while Bowl 10 and Amulet 6 are in Estrangelo. All three Syriac texts share some common features: the determined state is always written with a final *alef* and the masculine plural det. st., *-ē*, is expressed by *alef* (generally marked by a *seyāme*). *Alef* as a medial *mater lectionis* occurs in Bowl 1, cf. **yʾtẅh** (in line 6), **ymʾmʾ** (line 13). *ʿAyin* and *ḥet* are weak , cf. **šmʾ** (for **šmʿ** in 1:8); **mbʿdʾ** (for **mʿbdʾ** in Bowls 1:11; 10:8); **bwtk** (for **bʿwtk** in Amulet 6:10); **ḥdyn** and **ḥdʾ** (for **hdyn** and **hdʾ** in Bowl 10:7, 11, 13); *he* is sometimes omitted, cf. **nywn** (10:10). Moreover, in Bowl 10 *ʿayin* is used as an initial *mater lectionis* for the designation of the vowel *e/i*, cf. **ʿmmʾ** (line 4) **br-ʿmʾ** (line 6), **ʿtqṭlw** (line 12), etc. This trait is characteristic also of Mandaic (cf. Yamauchi 1967, pp. 75f.).

Further features of the orthography of the Syriac in Bowl 1 are: a line over the final part of words usually marks the participle (e.g. **mḥwʾ** line 6, **mtqrʾ** line 9). The *seyāme* is sometimes used for marking forms which are only reminiscent of the plural (e.g. **yʾtẅh**, Bowl 1:6). The third person singular in both bowls has the typical Syriac **n-** prefix, e.g. **nhwʾ** (1:8), **nḥdrh** (1:11); **nytnṭr** (10:6) etc. If the reading **lkbyšwh** (10:13) is correct, *lamed* occurs for the *nun* prefix in this case.

b. The Bowls in Babylonian Jewish Aramaic

The language of the bowls written in the Jewish script has the clear features of Babylonian Jewish Aramaic. The plural masculine, for example, has quite often the *-ē* ending, as in Syriac, but here it is expressed by a final *yod*: cf. **kwkby wmzly** (Bowl 2:3); **byšy wtqypy** (Bowl 6:2), etc. The final *-ā* designating the determined state (in singular masculine and in singular and plural feminine) is generally marked by an *alef*, but there are quite a number of words ending with a final *he* (as

in Palestinian Jewish Aramaic), cf. mainly the word **ʾrʿh** in Bowls 2:8; 3:4; 5:2; 7:8; but also **bny ʾynšh** (6:2,5); **ywblh** (6:7); **byryʾth** (6:9); **ʾswth** (11:7); **ršyʿh** (12a:3); **nḥšh** (12b:3); **rbh** (12a:6); **mqdšh** (12b:6). For this phenomenon, cf. Rossell 1953, p. 36.

Bowl 6 has the characteristic Babylonian Jewish Aramaic *paʿʿel* infinitive **lštwqy wlskwry** (line 1), but in line 5 there occurs **lštqʾ**. Rossell 1953, p. 53 has already remarked on this: "the infinitive may be *qaṭṭālā*, or more commonly, *qaṭṭōlē*".

It has been pointed out that in Babylonian Jewish Aramaic the *qamaṣ* was quite often pronounced *o*. In the bowl-texts there is sometimes a *waw*, where an *ā* is expected (cf. Rossell 1953, p. 20). This trait is quite prominent in Bowl 12a, cf. **smwmyt** (line 1), **wʿwl** (line 5), **ywtyh** (lines 5, 6, 7), **qwmw** (line 6), and in Bowl 13, cf. **qwmk** (line 2), **qwmh** (line 8) and perhaps **ywyty** (line 1). Since this phenomenon occurs in a limited number of bowls only, it may justify the assumption of Sharvit 1974, p. 555, according to which Babylonian Jewish Aramaic possessed two contemporary pronunciations of the *qamaṣ*, probably distributed by areas, one where we may observe the development *ā* > *ō*, while in another area the *qamaṣ* was pronounced *ā*. A similar division had been suggested for Palestine. On this problem cf. also the study by Boyarin 1978b.

The *shwa* was sometimes written with a *yod*. This is attested not only with regard to the conjunction **wy-**, the prepositions **by-**, **ly-**, and the relative pronoun **dy-** (cf. Rossell 1953, p. 21 and our Commentary to Bowl 2), but also within the words themselves as **pyryšw** (Bowl 5:4–5); **tyštqwn** (*paʿʿel* imperfect, Bowl 6:9). This trait occurs also in Amulet 3:4, **tyḥšyn** (*paʿʿel* imp.).

Alef is often elided in the bowls; examples are **dytt**ʾ (2:9), **ytytt**ʾ (2:9), **dym**ʾ (2:4).

Besides the older form of the possessive suffix of the third person singular masculine attached to a plural noun, **-why**, which is attested in forms like **ḥzwhy** (Bowl 9:13), we have the younger form with **-yh**, e.g. **šqyh** (Bowl 9:3) and **kkyh, šynyh** (Bowl 13:4), **ʿynyh** (Bowl 13:5) and similar forms in Bowl 13. In Syriac we have such a form in **bnyh** "his sons" (Bowl 10:6). For this phenomenon cf. Epstein 1960, p. 123; Rossell 1953, p. 38. In addition we have the interesting hybrid form **(h)dmyhw**ʾ (Bowl 9:13). With regard to the preposition **ʿl**, again, both suffixes for the third person singular masculine are used, sometimes in one and the same bowl; cf. **ʿlyh** (Bowl 9:7), **ʿlwhy** (Bowl 9:14). In

contrast, the Palestinian forms attested in the amulets tend to show this ending as **-wy** (Amulet 3:15, 16; 5:5,7; 15:16). Amulet 1:22 has the full form **bgydwhy wbgrmwhy.**

c. The Amulets

Since Amulets 2, 3 and 10–13 were found in excavations carried out in Palestinian sites, they may be considered — together with the synagogue inscriptions (Naveh 1978) — as a reliable witnesses for the description of Palestinian Jewish Aramaic. Similar traits can be found in Amulets 7 and 9, although they stem from Ağabeyli (in southern Turkey) and Oxyrrhynchus (in Egypt). The other amulets (with the obvious exception of 6, which is in Syriac), may be presumed to derive from Palestine or its immediate vicinity.

In most Palestinian texts the determined state is generally marked by *he*, but the Nirim amulets display a preponderance of *alef*.

The negative *lā* is spelled **lh** in two amulets: Amulet 3:4 and 9:6.

A typical Galilean Aramaic trait is the absence of initial *lamed* in the infinitives, cf. **mʾsyh** and **mgʿwr** in Amulet 2:1,11. This can be compared to **dʿtyd mʿbd mṣwth** in the inscription of the synagogue at Tiberias (Naveh 1978, No. 26). The above-mentioned form **mʾsyh**, i.e. the *paʿʿel* infinitive with an initial *mem*, is also characteristic of Galilean Aramaic. For **plṭʾ**, where the existence of a prefix is uncertain, see Commentary to Amulet 13:4.

The form **šwmyh** in Amulets 3:6 and 9:5 is well-known in Palestinian Christian Aramaic (Schulthess 1903, p. 209), and it occurs in two synagogue inscriptions (Naveh 1978, Nos. 20, 70).

As in the synagogue inscriptions, there are here signs for the weakening of the gutturals, cf. **ʾwryth** in Amulet 9:1 (for **ʿryth**, occurring in Amulet 2:2,12 and **hʿryh** in the Hebrew text of Amulet 4:29; but see Commentary to Amulet 9:1. A case of *ʿayin* for *alef* occurs in **mrʿšy** (Amulet 14:8), as part of the same phenomenon. The *alef* was left out by the writer of Amulet 9: cf. **mryn brth dstr** (9:2), as against **rby ʾlʿzr brh dʾstr** (Amulet 3:5).

Incidentally, the Palestinian form **rby** (cf. Naveh 1978, p. 58) occurs in Amulet 3, whereas the Babylonian form **rb** occurs in a bowl text (cf. Harviainen 1981, p. 5:8,9). For the title of the well-known authority on magic , R. Joshua bar Peraḥya, the form attested on Babylonian bowls seems to be invariably *rabbi*, as in the Palestinian tradition, presumably because this is a name borrowed into Babylonia from Palestine. This is

also the case in our Bowl 5. (Montgomery 1913, Nos. 32, 33, reads in the Syriac text **rb yyšwʿ**, but an examination of the facsimiles suggests that the correct reading should be **rby**, followed by **yšwʿ**; in Montgomery No. 17 Yehoshuaʿ ben Perahya is not given a title). Cohen 1981, p. 78, collected forms of the title **rby**. In about five cases the "Babylonian" form occurs in Palestine.

The expression **ythzh yt** in Amulet 3:14, i.e. the accusative particle **yt** after a passive verb, has some parallels in the Targum.

A typical Palestinian form is the plural imperative **ʾswn** (Amulet 3:22), whereas the third person plural feminine perfect **slqh** (Amulet 7:14) occurs in *qeri* Biblical Aramaic and the language of Onqelos.

d. Contacts Between Palestine and Babylonia

There were, no doubt, strong connections between the magical tradition of Jewish Palestine and that current among the Jews of Babylonia. This is demonstrated by various phrases and expressions which are common to both the amulets and the bowls. The opening formula of Amulet 3 occurs in three of the magic bowls (Isbell 1975, Nos. 67 and 69; Isbell 1976, p. 23). The use of the phrase from Zach. 3:2, which is quite common in the bowls (cf. our Bowl 11:5–6), occurs in Amulet 1:5–6. The story told in Amulet 7:16–22 has close parallels in two bowls dealt with by Gordon 1971, pp. 233 f. and 236 f.

This connection between the two traditions is also visible in the orthography. It has already been noted that in the bowls there are some *he* endings for marking the determined state. On the other hand, in the amulets there are several *alef* endings.

The overlapping between the Babylonian and the Palestinian traditions may occasionally be noticed in some points of vocabulary. Thus the verb **ḤMʾ** occurs in the Babylonian Bowl 6:4, although it is generally considered to belong to western Aramaic (cf. Kutscher 1971, cols. 270, 274). This is, however, a verb which is known to occur outside the area of western Aramaic (cf. Tal 1975, p. 199 and note 24).

Amulet 15, with Bowls 12a and 12b, present a concrete case of a Palestinian-Babylonian contact. The formula contained in these magic texts certainly travelled from west to east. Along with the formula and the names of the heroes of the story some typical Palestinian expressions were adopted by the writers of the Babylonian bowls: cf. **ʾrtq** (for which see Kutscher 1971, col. 274). In other cases, the writers of the bowls made the necessary linguistic adjustments to translate the

language of the formula into Babylonian Aramaic: e.g. Palestinian **kl hn d-** "everywhere" (Amulet 15:19) corresponds to **kl ʾtr d-** in Bowl 12:VIIIb.

8. Magic in the Palestinian Amulets and their Religious World

While this book aims to give, for the first time, a full and accurate reading and interpretation of all the legible amulets from Palestine and the neighbouring areas, it seems proper to try and attempt an interpretation of the world of religion and of the occult as it emerges from these texts. Of the period in which these amulets were written we do not have too many direct epigraphical traces in Palestine, especially not in Aramaic.[24] And yet this is a period of great importance in Jewish history: it is the period in which post-exilic Judaism crystallized, the Jerusalem Talmud emerged, and to a very large extent the final shape of late Judaism was determined. The study of these texts, however short they are, and however fragmentary, should therefore prove to be of considerable interest.

The Jewish influence in the magic of the period is conspicuous. This can be seen both in the Greek and Coptic papyri from Egypt and in the Mesopotamian bowls which use non-Jewish scripts (see above, p. 18). For its own part, however, "Jewish" magic, i.e. magic written by Jews and using the Hebrew script, is also cosmopolitan, containing as it does religious elements borrowed from other cults and cultures, as do other types of magic written in other scripts. It partakes with other forms of neighbouring contemporary magic the use and address of such prominent magical figures as Abrasax, Marmaraot, Ablanatanalba, Sesengen

[24] The most important epigraphical material is the collection of synagogue inscriptions, some of them extremely short; see Naveh 1978. Apart from these, there are a number of funerary inscriptions; See Frey 1952, though the latest finds have not yet been collected.

Bar Ferenges. It contains allusions to such concepts and *topoi* of magic as the great importance of iron and copper, the careful inclusion in the incantation of a reference to all possible directions: right, left, front, behind, and above (with the deliberate omission of the world underneath; see Amulet 1). It makes use of magic letters and magic figures, of a comprehensive number for the limbs of the body (usually 248, but there are other figures), and sometimes of a list of specific limbs, of careful references to divisions of time (day, week, month, year), and of other themes of a similar nature.

Within this general web of magical elements, there are elements which may strike us as Jewish. Some of these have become part of the general non-Jewish magic tradition, e.g. names such as Yah, Yahu, Sabaoth, El, I-am-who-I-am, as well as formulae such as Amen, Selah, etc. More to the point are the direct biblical quotations and the biblical allusions, and sometimes the made-up biblical verses, which underline the fact that the amulets were composed in a *milieu* where the Bible was the sacred scripture, and quoting it, or at least pretending to quote it, was deemed to be of special magic power. It is of course important to bear in mind that we have to do here in most cases with a popular type of practice, and with a level of learning that does not go very deep.

Can any doubt be raised as to the orthodoxy, in terms of Jewish religion, of the people who wrote and used these amulets? Contemporary Jewish sources, notably the Talmudic and Midrashic literatures, are notoriously ambiguous about magic.[25] It must be recalled that we should not take the utterances of the sages in the matter of magic at face value. Magic is officially condemned, but many people who practised what we call "magic" would deny that they indulged in a practice which was against Jewish law. They would say that they practised healing, protection, etc., and that they relied not on magical powers, but on the power of God and His angels. The argument about the legitimacy of magic, among Jews just as in other cultures, sometimes revolves around the definition of terms.

Of more fundamental importance is the question as to what powers are invoked in the Jewish amulets, and what position they are deemed to occupy. In the Jewish bowl texts from Mesopotamia, the divine names

[25] See L. Blau 1898, pp. 19 ff.; Urbach 1975, pp. 97 ff.

appealed to include, besides Yahweh and his epithets, and the Jewish angels Gabriel, Yehoel, Yequtiel, Michael, Nuriel, etc., also names of pagan gods such as the Greek Hermes (see Montgomery 1913, p. 99); the Mesopotamian and Syrian Belti, Nereg, Nanai, Shamish, Dlibat and Mot (see Index here and in Montgomery 1913); the Iranian Anahid, Danahish, Bagdana, and others.

The Palestinian amulets in Jewish script do not contain references to such pagan deities. In the amulets, as far as we can make out, the various powers invoked are apparently conceived as being magic agents dependent on or subordinate to Yah the God of Israel. This seems to be the case in most amulets, though in some of them (Nos. 5, 8 and 10) the God of Israel is not mentioned at all. Amulet 3:11 speaks of "Yahu **krmsys**, the great God"; whatever the actual identity of this **krmsys**, it seems to figure here as an epithet of Yahu, and not as an independent power.

Abrasax is very frequently invoked in the Palestinian charms (see Amulets 1:9; 2:3; 12:2). According to *Sefer ha-razim* IV:3 Abrasax is the first among some thirty angels directing the sun during the day. In the same chapter of *Sefer ha-razim*, a Greek prayer addressed to Helios, the sun god, is given in Hebrew transcription. The text says: "Holy, eastern Helios, good sailor, highest governor, most exalted, who of old regulate the heavenly wheel, holy umpire, controller of the poles, Lord, glorious guide, master, soldier".[26] It may be mentioned in this connection that in the mosaic pavement of three synagogues of the fourth to the sixth centuries, those of Bet Alpha, Hamat-Tiberias and Naʿaran, Helios is shown in the centre of the mosaic, riding his chariot in the middle of the zodiac. The reason for this prominent display of Helios in Palestinian synagogues has been the subject of extensive scholarly discussion.[27] The basic question is whether it may be assumed that Helios was worshipped alongside, or independently, of God in these synagogues. The evidence of our amulets, while not decisive in itself, tends to strengthen the position that Helios, like so many other supernatural powers who were treated with great respect, did not seriously encroach upon the supreme position of God. Amulets 11–13 were found in

[26] *Sefer ha-razim* IV:61–63; translation by M. Smith 1982, p. 210*.

[27] See some references in Smith 1982.

another synagogue of the same period, in Nirim, and they were placed in or close to the holy ark. The syncretistic mixture which they display, while perhaps not universally approved of in rabbinic circles, was nevertheless part of the everyday piety of the age, and the angels mentioned in them are all subservient to God.

We know from the Talmudic sources that the use of this magic was not confined exclusively to the ignorant classes of society, but may have been shared partly by people who belonged to the circles of the learned. It is interesting, nevertheless, to have this confirmed by one of the amulets of Ḥorvat Kanaf, which was made for the benefit of a certain "Rabbi Eleazar son of Esther, the servant of the God of Heaven" (Amulet 3:6–7). Specialists in Talmudic literature may try to identify the person in question, but it is sufficient to note that this title, which is not too common in magic texts, occurs here for the client of an amulet. S. Cohen 1981 discussed all the evidence for people called Rabbi in epigraphical sources. Cohen makes a distinction between two senses of the title "Rabbi": It may be used either as a general honorific title, or for a tradent of Talmudic tradition. It is obviously impossible to decide here which usage is relevant, but the pious formula "the servant of the God of Heaven" no doubt indicates that "Rabbi" is here used in a religious sense.

The one amulet in our collection which is clearly not Jewish, the Syriac amulet No. 6, displays a spirit which stands in sharp contrast to that of the Jewish amulets from Palestine. It talks of three deities, and these are given high epithets. If this contrast is anything to go by, the distinction between Jewish and non-Jewish magic in Palestine and its environs is strongly pronounced. However, since we possess no more than a few specimens of what must have been a very extensive literature of magic in that area, it would be rash to base far-reaching conclusions on so little material.

TEXTS AND COMMENTARY

I. Amulets from Palestine, Syria, Asia Minor and Egypt

Amulet 1

Provenance unknown
Collection of Dr. R. Hecht, Haifa

Amulet 1

Translation

1 On your right are very many, on your left is Uzziel,
2 in front of you is Susiel, behind you is Repose.
3 Above these is God's Divine Presence. Save
4 [Quzm]a son of Salminu from affliction, from (bad) fate (?), from plague.
5 "And God said unto Satan: May God rebuke you Satan
6 and may God who has chosen Jerusalem rebuke you" (Zach. 3:2). Amen.
7 King **ywnwn nymws** and all **mswsyn** ...
8 Ishmael the great, mighty and terrifying. ...
9 **wlydpt wlwzpt wmrhptys ʾbrsqws**
10 Ruḥa, Ruba, Rabia, Yah, Yah. Be healed,
11 Bar Salminu, from all pain from this day
12 to eternity. Amen, Amen, Selah. I have written, God
13 will heal. In the name of Satriel, Azriel, ...
14 ... heaven, who ... wine in vessels (?), h[e]
15 will send forth the healing of Quzma son of Salminu ...
16 ... from the eye of cataract (?), from the eye of a spell, [and from the eye of]
17 a talk, from the eye of the house, and from the eye of the open space (?), and from the eye of ...
18 in his cure on behalf of the Lord of heaven. Amen, Amen, Selah.
19 ... one and on top of that one, then there are two. Amen, Amen, Selah.
20 [Blessed be] He who afflicts and heals the spirit of the bones. A [good] amulet.
21 I adjure you, the spirit of the bones, that walks
22 within the tendons and the bones of Quzma son of Salminu.
23 (I adjure) you by the God who lives, God of Israel, from the beginning ...
24 ... [of Hos]ts, king of the kings of kings ...

This amulet was incised with a sharp instrument on a narrow silver sheet, rolled from the upper part to the bottom; it was placed in a container, which has been preserved with the amulet. Nothing is known of its provenance. Its surviving height is 4.5 cm., width 3.3 cm.

1–3 The first phrase is reminiscent of Geniza 5, p. 2, lines 9–10 and that of the prayer "*Qeri'at shema'* on the bed": מימיני מיכאל ומשמאלי גבריאל ומלפני אוריאל ומאחורי רפאל ועל ראשי שכינת אל "On my right Michael, on my left Gabriel, in front of me Uriel, behind me Raphael and above my head the Shekina of El". See also Amulet 14:8. This formula found its way into Christian Syriac (Gollancz 1912, p. 5, § 7; p. 6, § 8) and Muslim Arabic (Goldziher 1894, pp. 359 f.) sources. See also Winkler 1930, pp. 20ff.

4 The name of the client Quzma — Cosmas is well known among the Syriac Christians (Payne-Smith, col. 3515). The name of the client's mother **slmynw** is unknown; can it be a variant of Σαλώμη? Cf. also Frey 1952, Nos. 1236–1237, 1459.

mpg' mrg' mng' is a pun. Only **pg'** and **ng'** have the sense of "affliction" and "plague". **rg'** means generally "moment"; it may mean here "a sudden calamity".

5–6 This verse from Zach. 3:2–3 is common in magic bowls and occurs in "*Qeri'at shema'* on the bed"

7–10 The names in the frames are of angels: **nymws** is Greek νόμος "law"; **mswsyn** means perhaps "healers", a *saf'el* form of the root **'SY**. Cf. Brockelmann 1928, p. 464b.

lwzpt: See Isbell 1975, 69:7 and Isbell 1976, p. 23 **llyzpt.**

mrhptys: This may be an inversion of a Greek compound word such as ἑπτῆμαρ or ἑπτημέρος.

'brsqws is generally written **'brsks**; see Amulet 2:3 as well as the Geniza amulet 7:29 and a fragment from the magic book, Geniza 6, p. 1:11–12: **'brsks ml'kh rbh** "Abrasax the great angel". This angel is well known in the Greek magic papyri from Egypt, where it is listed with Yau the God Sabaoth, Adonai, Michael, Suriel, Gabriel and Raphael (Preisendanz 1928, I, p. 36; pp. 10, 158). See also in the bowls Isbell 1975, Nos. 3:8–9; 4:3–4 and in the Syriac bowl Montgomery 1913, 34:9 as well as *Sefer ha-razim,* pp. 8 and 96 (IV, 13).

8 **rb' gybr' wdḥyl'**: The reading of the last word is dubious. One seems

Fig. 1. Amulet 1

to see **drwqyl**ʾ, but this may be considered to be a corruption of **wdḥyl**ʾ. The whole formula brings to mind the expression in the ʿAmida prayer: האל הגדול הגבור והנורא. For the phrase **rb**ʾ **gybr**ʾ **wdḥyl**ʾ, which seemingly uses *rabbā* as the substantive epithet for the deity, followed by two attributes, cf. Amulet 6:1–2 **rb**ʾ **ḥsyn**ʾ (one of a trinity of deities); Bowl 6:9 **mšbʿn**ʾ **ytkwn byšmyh** ʿ**d**ʾ**rb**ʾ **wdḥyl**ʾ; and Amulet 7:15 **bsṭr krsyh d**ʾ**lh rbh ḥsynh wdḥylh,** where the sequence **rbh ḥsynh wdḥylh** may possibly be taken as an apposition to ʾ**lh.**

12–13 **ʾnh ktbt yyyy yʾsy**: See Isbell 1975, 1:14–15 **ʾnḥnʾ ktbnʾ wšmyh ysyk** "we have written, and his name will heal you", or Isbell 69:8 **ʾnʾ ktbyt wʾlhʾ mʾry kwlʾ ysy yt**[...] "I have written, and God the Lord of All, will heal [...].

14 If one may reconstruct [**t**]**rʿ rqyʿh** we may compare it with **trʿy šmyʾ** in 4QLevi, I:18 (Fitzmyer and Harrington 1978, p. 90) and Hebrew **šʿry šmym**.

14, 16–17 The readings and the interpretations in these lines are uncertain. **brwqh** may mean "lightning", but it may also mean "cataract" as **brwqtʾ** in Gaster 1896, p. XIII:3; *Sefer ha-razim* II:182 (p. 91) **rwḥ hbrqt**; see **brqyt** in Jastrow, p. 197a and **bruqta** in Drower and Macuch, p. 70a: **aina bruqtia** "eye with cataract". In Syriac there occurs the phrase **wbrq brwqʾ bḥṣh wpqʿt mtnh** (Gollancz 1912, p. 8,§10), which the editor translated "he hurt (?) his back, his loin ruptured" (p. XXXI). **mʿyn** could conceivably also be translated "in the form of", but the formula in the printed amulet (Warsaw 1867), where

Amulet 2

Provenance: Ḥorvat Kanaf
Golan Archaeological Museum, Qaṣrin, No. 3164
Plate 2; Figure 2

1 קמיע טב מאסיה יאיתה בר[תה]
2 דמרין מן אשתה ועריתה ועינה
3 בישתה אברסכס יה יה יהו
4 אל אל אל קקקקקקקקקק צצצצצ
5 צצצצצ ץץץץץץץץץ ה ה ה א ח א
6 אות או אוא יה יה יה יה יה
7 יהו יהו יהו יהו יהו (*4 magic signs*)
8 געורו אשתה ועריתה שידתה
9 רוחתה מן פגרה דיאיתה ברתה
10 דמרין בשם אהיה אשר אהיה

we have a series of **ʿynʾ** indicating various forms of evil eyes (Fig. 21 on p. 133), suggests that here too a similar concept is probably present.

20 For **[brwk] hmkh whmrpʾ** see Gordon 1941, p. 352 **brwk mkh wrwpʾ** "blessed is he who smites and heals"; Bowl 12b:13 **brwk ... mk(h) wrwph**; as well as Isaiah 30:26; Jer. 14:19. See also Geniza 7:2–3 **ʾl mwḥṣ wrwpʾ** "smiting and healing God", and Geniza 8:21.

20–22 **rwḥ grmyh** "the spirit of the bones" is the actual sickness, that "walks within the tendons and the bones of Quzma". For **gydwhy wgrmwhy** see the Geniza fragment at the Jewish Theological Seminary in New York ENA 3381 fol. 7b: אנה משבע יחכון שמהתה דאסרין לי פֿל וגידוי וגרמוי ; see also Amulet 5 below.

23 See Geniza 5, p. 1:2–3 **mšbʿnʾ bšm ḥy hʾl** and I Sam. 25:34 and I Kings 17:1 חי יהוה אלהי ישראל and Dan. 12:7 וישבע בחי העולם.

24 **mlk mlky hmlkym**: This is a frequent expression; see Jastrow, p. 791a.

Amulet 2

Translation

1 An amulet proper to heal Yaʾitha the daughter
2 of Marian from the fever and the shiver and the evil
3 eye. Abrasax Ya Ya Yahu
4 El El El **qqqqqqqqq, ssssss**
5 **ssssss**, (final) **sssssssss** **hhh** **ʾhʾ**
6 **ʾwt** (letter) **ʾw ʾwʾ** Ya Ya Ya Ya Ya
7 Yahu Yahu Yahu Yahu Yahu *(4 magic signs)*
8 exorcise the fever and the shiver, the female demons
9 (and) the spirits from the body of Yaʾitha the daughter
10 of Marian. In the name of I-am-who-I-am

14 כסיאל זריאל צצצצצצ בשם
15 קקקקקקק בשם מיכאל]
16 עזריאל]

Amulets 2 and 3 were found in the excavations at Ḥorvat Kanaf by Mr. Zvi Maoz of the Israel Department of Antiquities, who kindly entrusted us with the publication of these texts. The essential details about the archaeological context of these amulets, as communicated by Z. Maoz, can be summed up as follows:

> Ḥorvat Kanaf is situated on a lofty spur, descending from the basalt plateau of the Golan, 3.5 km. off the north-eastern shore of the Sea of Galilee. In 1885 Lawrence Oliphant found here a fragmentary Aramaic inscription with Hebrew characters, which was part of an inscribed lintel of the ancient synagogue (Naveh 1978, No. 19). Systematic excavations began at the site in 1977 by Zvi Maoz. During four seasons two areas were unearthed: (A) The synagogue and the adjacent area on the top of the hill; (B) Building 300 on the lowest terrace of the southern slope below the synagogue.
>
> The two amulets were found in two rooms in Building 300. Amulet 2, that of Yaitha, was unearthed in a shallow pit in the north-western corner of Locus 301, together with an iron ring and a bronze ring that lost its inlay. Amulet 3, that of Eleazar, was found in the earth fill in the centre of Locus 308, 1.35 m. above the floor level. It probably had fallen from somewhere above.

According to the stratigraphy provided by Z. Maoz, Building 300 was erected in the early Byzantine period (350–500 C.E.), while the synagogue was erected in the middle Byzantine period (c. 500–551 C.E.). In the late Byzantine period (c. 551–630 C.E.) there took place the restoration of the synagogue and the division of Building 300. It seems likely to us that the two amulets belong to the later part of the occupation of Building 300, i.e. late 6th or early 7th century C.E.

11 Amen Amen Selah. An amulet proper to exorcise
12 the fever and the shiver and the hectic (fever) from
13 Ya'itha the daughter of Marian. In the name of Kariel,
14 Kasiel, Zariel ssssssss; in the name of
15 qqqqqqq; in the name of Michael [ ]
16 ʿEzriel [ ]

Amulet 2 is written on a copper sheet, incised with a pointed instrument. Only the first 18 lines are preserved. The surviving portion measures *c.* 6×6 cm. Fuller commentary on Amulet 2 will be found in Naveh 1983.

1 **qmyʿ ṭb** "a proper amulet". These two words, which are repeated here in line 11, appear also at the beginning of the Aleppo amulet (No. 4), and they occur in the Geniza fragment of a magic book, Geniza 5, p. 1:7 as **qmyʿ ṭwb**.

mʾsyh "to heal", infinitive of the root ʾSY (*paʿʿel*). The lack of the *lamed* (see also **mgʿwr**, line 11) and the initial *mem* in the *paʿʿel* infinitive are characteristic of Galilean Aramaic (Dalman 1905, p. 281).

yʾyth is a feminine personal name meaning "the nice/beautiful (girl)"; cf. **špyrh**, a well known name in the first two centuries C.E., in Amulet 14:1.

2 **mryn** is a quite common Palestinian feminine personal name; see Amulet 9 and Montgomery 1911, p. 273 f. lines 15, 22. **mryn** is a by-form of **mrym**. See Kutscher 1976, pp. 61–62.

ʾšth wʿryth: These nouns seem to be synonymous. Whereas **ʾšth** is well known in all Aramaic dialects as "the fire" or "the fever", **ʿryth** is rare. In Syriac, however, the root ʿRY means *inter alia* "to be seized with illness, to swoon"; in *paʿʿel* "to become numb with cold"; ʿryʾ "cold, frost, chill"; and ʿrwytʾ "the shivering fit of an ague". The latter meaning fits **ʿryth** in our text. **ʾyšth wʿryth** occur in the British Museum incantation bowl No. 91745 (cf. Gordon 1941, p. 341). Cf. also **hʾš whʿryh** in Amulet 4:28–29. In Amulet 9:1 the word **ʾwryth** seems to be a misspelling of **ʿryth** (but see also Commentary *ad loc.*). The sequence ʾ(y)š(ʾ)tʾ and ʿrwytʾ occurs also in the Geniza fragment T-S K 1.95 as

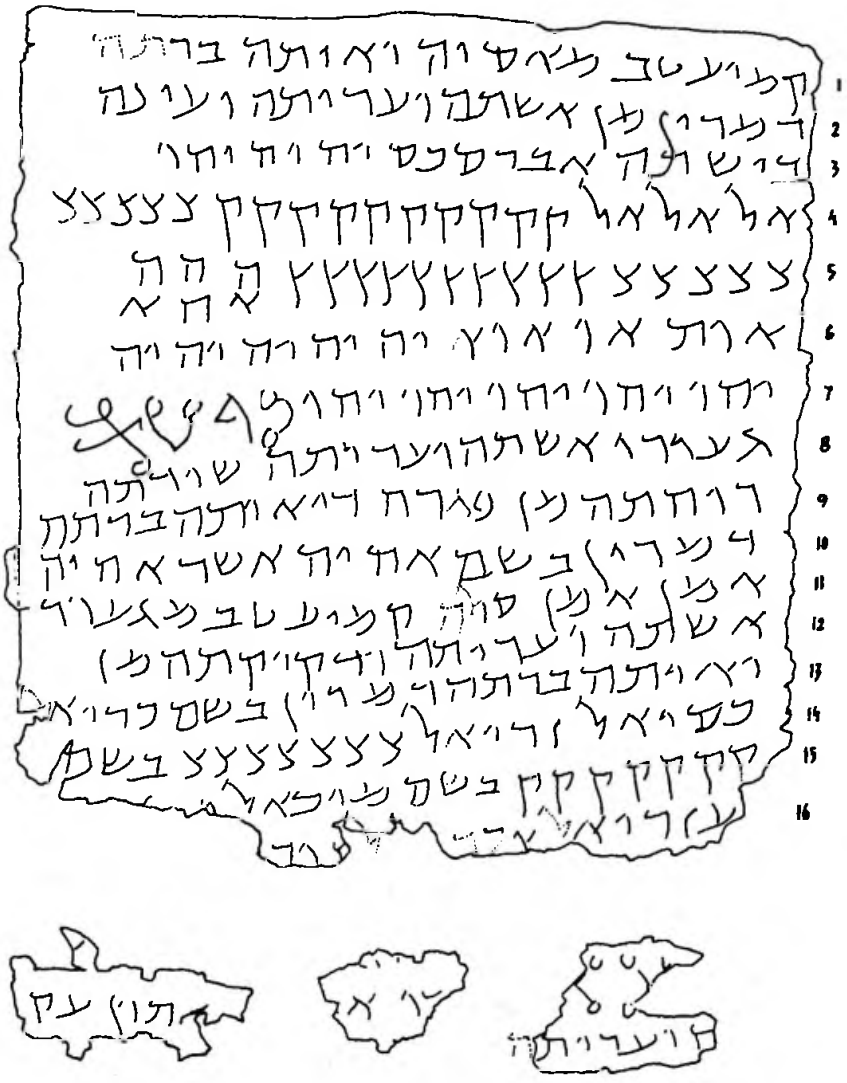

Fig. 2. Amulet 2

well as in Geniza 7:16. The combination **ʾšt ʿrwyt** together with other diseases occurs in a late Syriac magic book, Gollancz 1912, p. 8 f., § 11. The Samaritan Targum of Lev. 26:16 and Deut. 28:22 renders **qdḥt** by **ʿrbyth** (Tal 1980–81).

3 Abrasax is followed by a series of divine names and letters. It seems likely that in a prototype of this incantation these names were followed by a phrase like אתון אתייה קדישייה "You holy letters"; אתון שמהתה קדישייה "You holy names", which appear quite frequently, as in Geniza 6; or אתון כלקטיריה קדישיא "You holy characters", as in Geniza 1. For a similar phrase see Amulets 7:4 and 10:3. The plural imperative verb **gʿwrw** (line 8) implies such an address. For Abrasax see Commentary to Amulet 12:2.

4–5 The letters *qof* and *ṣade* may represent Is. 6:3. On the other hand, *qof*, medial *ṣade* and final *ṣade*, each repeated ten times in succession, may represent the root QṢṢ "to cut, break, fell, scrape, mutilate" (possibly addressed against the evil spirits of disease?).

8 For the verb **GʿR** in the sense of "to drive away, to exorcise" cf. Greenfield 1980, pp. XXXVIII f., as well as Geniza 4:3. Further discussion in Naveh 1983.

10 For the phrase אהיה אשר אהיה cf. e.g. Amulets 3:2–3; 11:1; 12:6, 40; Isbell 1975, Nos. 67:2, 69:3–4 and Geniza 4:5–6; 7:7.

11 **mgʿwr** instead of **lmgʿwr**; see above, Commentary to line 1, **mʾsyh**.

12 **dqyqth** is the rendering of the Samaritan Targum to Deut. 28:22 **ḥrḥr**; the Arabic equivalent given in *Ha-Meliṣ* is **ʾldq** (see Ben-Ḥayyim 1957, p. 473b). Bar-Hebraeus, pp. 13, 28, translates the phrase **ʾštʾ dqyqtʾ** in the Peshiṭta version of Ben Sira 26:26 as Greek ἑκτικός. In the Geniza fragments we have various corruptions of this word: **rqyqtʾ** (Geniza 5, p. 1:1), **zʿqh** (Geniza 6, p. 3:12) and **dnwqh** (Geniza 6, p. 4:2).

Amulet 3

Provenance: Ḥorvat Kanaf
Golan Archaeological Museum, Qasrin, No. 3163
Plate 3; Figure 3

1 שיר חשבחות למלך עלמ[יה]

21 [ו]בשתארות מלאכיה דמ[מנין]
22 [ע]ל אשתה ועריתה אסון אל[עזר]
23 [ב]מאמר קדיש

This amulet is written on a copper sheet, incised with a pointed instrument. The sheet measures *c.* 7.5×5 cm. The writing seems to have been preserved almost intact. It was found by Mr. Zvi Maoz in the excavation of Ḥorvat Kanaf. For a description of the Ḥ. Kanaf amulets see Commentary to Amulet 2.

Amulet 3

Translation

1 A song of praise to the King of the Worlds
2 Yah, Yah, Yah, Yaḥish of the Worlds, I-am-
3 who-I-am, the King who speaks with distinct mystery
4 to every bad and evil-doing spirit, that you should not
5 cause pain to Rabbi Eleazar the son of Esther,
6 the servant of the God of Heaven. **ḥzq** and **gʿr**,
7 **šrd** and **prt**, **ṭrgyn**, **ʾstd** and **bqth**,
8 **sislyrhʾ**, **qllqm**, **yqyps**, Suriel,
9 Raphael, Abiel, Anael, Nahariel
10 Nagdiel, Aphaphel and Ananel **ms**
11 **ps yqrndrys** Yahu **krmsys**
12 the great god **ṯḥth gḥgh ṭḥṭh**
13 **mrmr psps** Yahweh, sanctity. In every
14 place where this amulet will be seen,
15 you (the evil spirit) should not detain Eleazar
16 the son of Esther. And if you detain him,
17 you will be cast immediately into a burning
18 fiery furnace (Dan. 3:6). Blessed are you our Lord,
19 the Healer of all (people on) earth, send healing
20 (and) cure to Eleazar. **bwbryt, tbryṭ**,
21 **bštʾrwt**, the angels that are [appointed]
22 over fever and shivering, cure Ele[azar]
23 by a holy command!

1–3 The opening phrase, which consists of a mixture of Hebrew and Aramaic words, is very similar to that which occurs in the magic bowls published by Jeruzalmi 1963 (see Isbell 1975, Nos. 67 and 69) and by Isbell 1976, p. 23, where the correct reading is שיר תשבחות למלך עלמיה יהוה צבאות צור עולמים אהיה אשר אהיה מלך ממליל ברזי (בראזי) פרישתא. This

similarity constitutes a further indication to the existence of contacts between Babylonian and Palestinian Jewish magic formulae.

2 **yḥyš** (or **yḥwš**): Probably connected to the "name" **yḥwš**, which developed from an appeal to speed, so common in magical invocations; cf. Scholem 1980/81, p. 266, notes 84–85. Our Geniza material illustrates the transition from the verb **ʾḥyšh** in Ps. 55:9 to the divine name. The verse is prominently used in Geniza 5, p. 2:6–7; 7:23–25 (where the verse occurs twice, straight and backwards). The divine name occurs in Geniza 8 in the formula **yh ʾhh ḥsyn yh yḥyšh**, repeated several times with slight variations (lines 6f.; 8f.; 10f.; 13f.).

4 **ʾl** is Hebrew, for Aramaic **ʿl**; **dlh** is sometimes written for **dlʾ**, cf. Amulet 9:6.

5 **tyḥšyn** is probably a causative form of ḤWŠ/ḤŠŠ "to feel (pain), to suffer"; the *yod* after the *taw* shows that it cannot be an *afʿel*, but rather a *paʿʿel*, the *yod* standing for a *shwa mobile*. At any rate it is a second person feminine imperfect meaning "you will cause pain".

5–6 The client is called Rabbi Eleazar son of Esther (note the *plene* spelling **ʾstyr**), the servant of the God of Heaven. This is one of the rare examples in which the client of a magic text bears the title Rabbi. Cf. also Harviainen 1981, p. 5:8,9 **rb ywsp br ʾymʾ dʾymh**.

6–10 **ḥzq wgʿr šrd** ... can be a series of verbs: "strengthen and drive out, cause to remain...", but this sequence does not make much sense. Therefore, it may perhaps be assumed that **ḥzq wgʿr šrd** is a sequence of corrupt words based on a formula such as we have in Isbell 1975, 67:3 **byʾl ḥzq wgybwr šlḥ byd** "By God, strong and mighty, send by the hand...", where it is followed by a series of angels: Shlomiel, Michael, Raphael etc. Here we may reconstruct something like **ʾlh šwmyh ḥzq *wgbwr *šdr** "...God of Heaven, strong and mighty, send..." The words **prt ṭrgyn ʾstd**...until **yqyps** may be names of angels (or *nomina barbara*); they are followed by Suriel, Raphael etc.

10–13 **msps** is an Atbash reversal of **yḥwḥ** and **psps** for **wḥwḥ** i.e. Yahweh; Cf. Montgomery 1913, p. 60.

krmsys has been explained by Jeruzalmi 1963, pp. 25,40 as Hermes. The text there says: **[bšmyh] dkrmsys yh šmh rbh mpršh.**

mrmr is reminiscent of Marmaraoth.

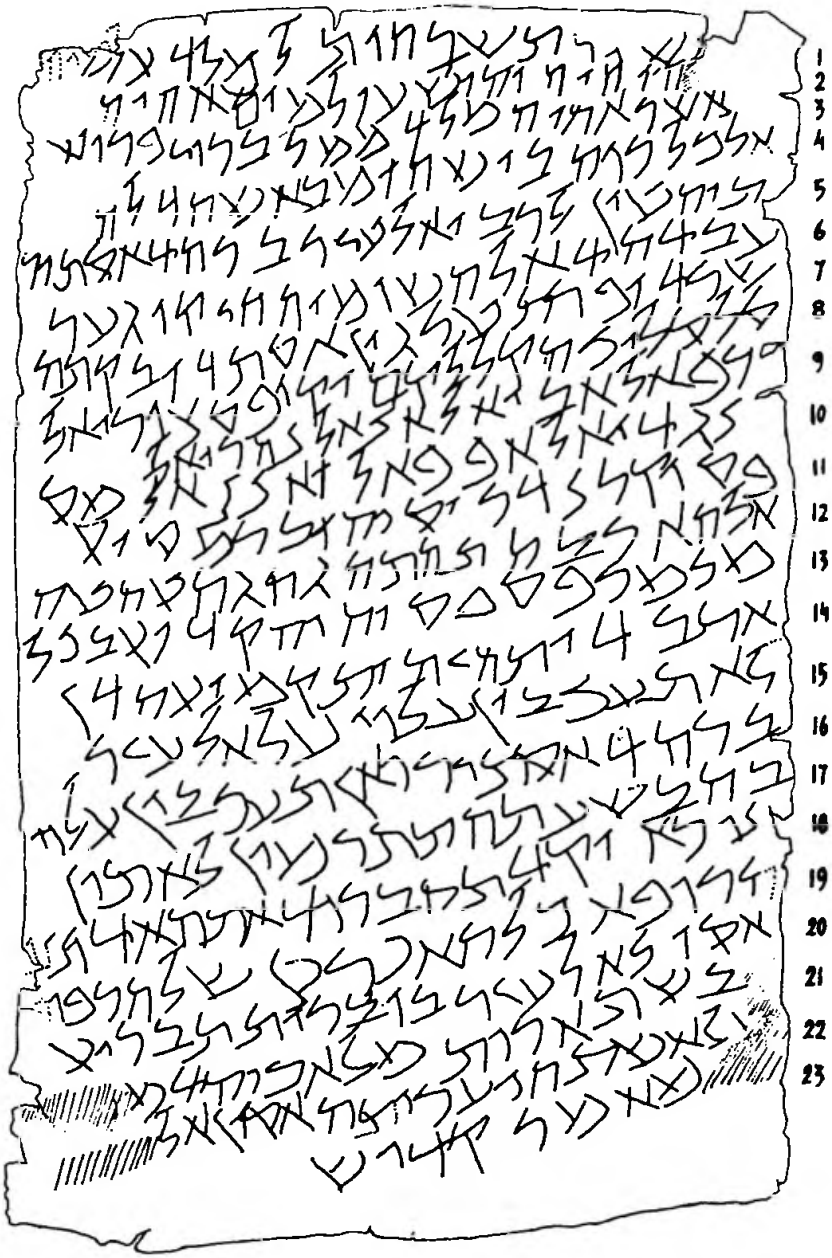

Fig. 3. **Amulet 3**

14–18 For a similar warning phrase see Gaster 1896, pp. I:25–28; III:13–21, and XXV:4–7, where both the word **tʿkb** and the punishment of burning in fire are mentioned. The construction **dyṯhzh yt**, where the accusative particle **yt** occurs after the passive *itpeʿel* form, appears extraordinary, but it is not unknown in Biblical and Mishnaic Hebrew (Ben-David 1971, p. 489; Bar-Asher 1983). One recalls the biblical verses Ex. 34:23; Deut. 16:16 יראה את פני ה׳. In the Targums to Ex. 16:12 the Hebrew...שמעתי את תלונות is rendered...שמיע קדמי ית תרעמת, where the passive construction is followed by the accusative; apparently the accusative **yt** is inserted as an equivalent of the Hebrew ʾt. Kutscher 1969, p. 151, mentions this verse as an instance of the passive construction. A problematic instance is a Targum of Genesis 38:25 **wlʾ ʾštkḥt ythwn** (Klein 1980, p. 61), where Targum Jonathan has **wlʾ ʾškḥt ythwn**. We have taken **dyṯhzh** as **d+yṯhzh**, the relative pronoun **d-** followed by an imperfect 3rd person masc. *itpeʿel*. However, it can also be divided **dy+thzh**, the relative pronoun **dy-** followed by the 2nd person masc. *peʿal*. While this is possible, we must bear in mind that the following verbs, **tʿkbyn** and **ttrmyn**, are both 2nd person feminine singular. The readings **tʿkbwn** and **ttṛmwn** are implausible, since the letters seem to be clear *yod*s.

The expression **ʾtwn nwrʾ yqydth** (following Dan. 3:6) occurs in Borisov 1969, p. 11.

Amulet 4

Hebrew–Aramaic
Provenance: Aleppo
Museum of the Flagellation Convent, Jerusalem
Plate 4; Figure 4

1 קמיע טב כתום פי פתגמא הד[ן]
2 קדישא ברבר<ב>ן ובקדישיא שמו (נכ)[בד]
3 רמיאל מפאר יה עזרי אהיה א
4 אחמה אהיה אחמה יה שדי ח
5 אל (ת)י הוא אתו מאשו (מ)כרעי
6 טלמי ו(כ)מא במנא (כ)ל נדרך ה

19 **hrwpʾ kl hʾrṣ**: This blessing formula is unknown; but it can be compared with רפא חולי כל בשר (in Isbell 1975, 42:12) and רופא חולי עמו ישראל (in the ʿAmida prayer). In Gen. 18:25 we have, somewhat differently, השפט כל הארץ. There is a curved line (possibly the beginning of a *ṣade*) between the *alef* and *resh* in the word הא־רץ.

20 The first word in this line can be read either **ʾsy**, *paʿʿel* imperative, or **ʾsw**, the absolute state of the noun meaning health, healing, cure. The latter may serve as a gloss on the Hebrew word **rpwy**.

21–22 The reconstruction **dmmnyn ʿl** is based on the phrase which occurs in several magic texts; cf. Amulet 12:2; the Geniza fragment T-S K 1.160 ואלן מלאכיה דממנין על לילותא; *Sefer ha-razim* V:13–14 ואלה הם הממונים על שנים עשר חודשי השנה; Gaster 1896, Sword of Moses XX:4 שם סרא דממנא על מלאכי רוגזא.

22 **ʾšth wʿryth**: See above, Amulet 2.

ʾswn = pl. imperative; the final *nun* is typical of Galilean Aramaic, see Dalman 1905, the paradigms on pp. 402 ff. This word seems to be followed by a *lamed* somewhat ligatured with the following *alef*, but it is perhaps only a highly drawn right bar of the *alef*; whether we read with or without *lamed* the meaning is the same.

23 **bmʾmr qdyš**: In Isbell 1975, No. 42:6 we read **bdbr ʾylwh wbmʾmr qwdwš** "by the Word of God and by the holy commandment".

Amulet 4

Translation

1 A proper amulet. Write (?) this phrase,
2 the holy one. His name is venerated through great ones and through the holy ones.
3 Ramiel adorns Yah. My help is I-am,
4 I-see, I-am, I-see. Yah, Shaddai,
5-6 living God. (*An incomprehensible sequence of words; in the following such words are indicated by dots*)

33 His vigour, **byh yh byh yh by**[**h** Lord of]
34 Hosts, the God of Israel ...
35 ...

Amulet 4

This text was incised on a silver sheet, folded and placed in a bronze tube. It was found in a tomb near Aleppo.

The text was first published by Schwab 1906, and again 1916/17, p. 624. It was reproduced by Frey 1952, No. 819, and discussed in Testa 1962, pp. 52 ff.

The translation is given here with great reservation, as the text is largely obscure. We have examined the original at the Museum, and have had the benefit of a fresh photograph, kindly supplied to us by Father Michele Piccirillo O.F.

1 **ktwm py** seems a better reading than Schwab's **ktwm (htwm) bw. py** may be a dittography on the following **ptgm'. ktwm** may be a corruption of **ktwb.**

2 **brbr<b>n**: Schwab read **brbwn.**

6 **bmn' kl**: Cf. Schwab **kmw 'pl.**

8 This line contains the so-called "monogram of Christ". Deissmann 1927, p. 255 n. 4, remarks that it was in use long before the time of Christ. Testa 1962, p.55, regards it as an evident Christian symbol, following Avi-Yonah 1940, p. 112. See also Budge 1930, p. 347 f.

10 Schwab reads *waws* where the amulet seems to have vertical strokes.

11 **zmrw ldwyd** seems to be written. One might expect **l<y>hwh** as occurs frequently in the Psalms.

12 **pnym** signifies "east", cf. Kimron 1980, p. 41 f.

13 **śm'wl** is written with a *waw* following the *alef*, as in Amulet 1. For **śm'wl** in the sense of "north"cf.Kutscher 1957, p.32, and Kimron 1980.

15 **ṭlnyt**: This species of demons is quite widely attested. In our texts they occur in Amulets 7:6; 11:8; 13:8. For other occurrences in bowl texts see Gordon 1941, p. 279; Borisov 1969, p. 7:4, and the discussion in Scholem 1965, pp. 85, 88. The Targum of Cant. 4:6 has **ṭlny** as a species of demons (reference kindly supplied by Dr. E. Kimron). The same sense occurs in Mandaic **ṭulaniata** (pl.), cf. Drower 1946, p. 332, line 2. The transition from the sense of "shadows" to that of "demons" is illustrated by a passage in the *Schatzhöhle*, where a number of natural

Fig. 4. Amulet 4.
After Testa 1962

elements worshipped are listed: **wmnhwn byd ṭʿywthwn lšmšʾ sgdyn hww wmnhwn lshrʾ wlkẅkbʾ wmnhwn lʾrʿ wlḥyẅtʾ wlpr̈ḥtʾ wlr̈ḥšʾ wlʾẏlnʾ wlk̈pʾ wlṭlnẏtʾ wlmẏ wlr̈wḥʾ** (Bezold 1888, II, p. 130).

16 **ʾmrbn** is probably to be read Em-Rabban.

17–18 While 248 is רמ"ח, the traditional Jewish figure for the number of limbs, 400 followed by **ʿm** is incomprehensible.

20 **mwʿṭ lbnh** may be connected with Heb. **mʿwṭ** "diminution, waning". The juxtaposition *ḥammā-levānā* occurs in Is. 24:23; 30:26; Cant. 6:10. The whole expression is reminiscent of the phrases in the Qiddush Levana prayer.

wkmzlwtyh was not read correctly by Schwab.

24 **ʾlwhy mʿrkwt**: Cf. Geniza 4:2–3.

ʾwgryt, which occurs in Bavli Pesaḥim 111a (see Margaliot 1945, p. 204), is also attested in Amulet 8:6.

Amulet 5

Provenance: Emmaus
Present location unknown
Figure 5

(magic characters) 2–1

This amulet was found in 1896 in a tomb in Emmaus and was acquired by Herbert Clark for his collection. It is written on a thin silver sheet. It was first published (with a facsimile drawing only) by Vincent 1908; and then again in Frey 1952, No. 1185; cf. also Testa 1962, pp. 64–66. Our

25 We have here the familiar Marmaraot, and afterwards the formula Ablanatanalba (lines 25–26), Scholem 1965, p. 94. Cf. also *Sefer harazim*, p. 8.

26 For **qṭb nrqy** cf. **qṭb mryry** in Deut. 32:24. For the use of the biblical formula in magic, cf. *Midrash Tehillim* (*Shoḥer Ṭov*), ed. S. Buber, Vilna 1891, p. 397 (on Ps. 91:3); *Midrash Rabba*, *Bammidbar*, Jerusalem 1965, fol. 87b (Parasha 12:3).

28 Cf. **mpgʿ mrgʿ mngʿ** in Amulet 1:4.

29 **hʾš whʿryh**: Cf. **ʾštʾ wʿrytʾ** in Amulet 2.

29–31 On the time divisions in this magic usage cf. Commentary to Bowl 6:7–8.

32 Cf. הושיעה לו ימינו וזרוע קדשו (Ps. 98:1).

33 For **yh byh** cf. Commentary to Bowl 6:2.

Amulet 5

Translation

1–2 *(magic characters)*

3 ...Masagiel, Samriel, the God [... You]

4 holy [charac]ters, annul all [the...]

5 [from] his eyes, from his nostril, from his head, from his tendon[s,]

6 [from the eye-]lids. In the name of (*magic figures*)

7 ... and from ... and from her sons...

reading is based on the drawing in Vincent; we have no information about the present whereabouts of the object, and have seen no photograph of it. It does not appear to be in the Clark collection, which is kept at the Y.M.C.A. in Jerusalem.

3 **mšgʾl**: See *Sefer ha-razim*, VI:14 **msgyʾl**. In Greek amulets we have Μυσαγαω[ϑ], Preisendanz 1928, p. 34 (III:56); Μυσαγωϑ, Preisendanz 1930, p. 51 (IX:2). For **šmrʾl** see the late Jewish amulet in Shachar 1971, No. 2.

3–4 The reading is based on Geniza 1:2 and similar texts.

4 **bṭlwn**: A *he* is written above the line; hardly to be read **bṭlhwn**.

5 Vincent followed by Frey read **nwhrh** "son intelligence".

7 Vincent read unconvincingly, **wmn ʾwznwy bṣyh** "et de ses oreilles et de ses testicules".

Amulet 6

Translation

1 O Bar-Theon, mighty
2 Lord, the holy one of God!
3 These three are standing in the
4 great ford of the ocean
5 and directing the water and the
6 world in the ford of the
7 world. I adjure you,
8 Greatness, Aqem Zabaoth.
9 Loosen Ṭarpas-dukh
10 the demon. Illuminate your desire,
11 O Bar Theon the God!
12 I invoke (?) you, the Lord
13 Aqem Zabaoth. Loosen Ṭarpas-
14 dukh the demon from the sea (?) and from
15–19 (undecipherable)

Amulet 6

This amulet is inscribed on a silver sheet in Syriac in Estrangelo characters. It was acquired in 1925 in Beirut by Charles Virolleaud. The object was lost in 1926 when it was sent to A. Cowley in Oxford for examination, and the first editor, A. Dupont-Sommer, and all subsequent scholars who have worked on it, have had to rely on photographs only.

The inscription was first published with an extensive commentary by Dupont-Sommer 1946, who sought to understand it as an expression of a gnostic adoration of the letter *waw*. This theory was contested by Gordon 1949, who suggested a new reading of the inscription. Dupont-Sommer 1951 defended his original interpretation, and a further article by Gordon 1953 concludes this debate. See further Del Medico 1949; Testa 1962, pp. 59–64.

One problem in the interpretation of the text is the use of word-dividers. There are two devices used for this purpose in this amulet: a dot and a circle. It should be noted that in the first part of the inscription, viz. lines 1–7, only a dot is regularly used, while the circle is consistently used from line 7 on. After the first word in line 7 the transition from the one system to the other is marked by the fact that a dot followed by a circle are both used to divide **bʿlmʾ** from **mwmmnʾ**. It may be remarked that at this point the introductory invocation is concluded, and the main text of the adjuration begins. It follows from these remarks that the first word in the inscription, after the cross, is probably to be read **wʾw** (as read by Dupont-Sommer), though this does not imply that Dupont-Sommer's interpretation of the word as meaning the letter *waw*, personified or otherwise, is acceptable. **wʾw br tʾwn** corresponds to **ʾw br tʾwn** in line 11 (where **ʾw** follows a clear word-divider in the shape of a circle) and both must be forms of interjection (as seen by Gordon 1953, p. 116). It may be possible to interpret the **wʾw** in line 1 as either a variant form of the vocative particle, otherwise unattested, or, more likely, as the conjunction **w-** followed by the vocative **ʾw**. In the latter case, the initial **w-** begins the text in the same way as does **twb**, e.g. in Bowl 4, and may be translated "again" or similarly.

Resh has a dot over the letter (cf. Dupont-Sommer 1946, pp. 83f.). In **dywʾ** (lines 10,14) the *dalet* has a dot to its right.

1 The cross at the beginning of the inscription may indicate that this is a Christian amulet.

br tʾwn is here written without an internal divider, while in line 11 **br** is

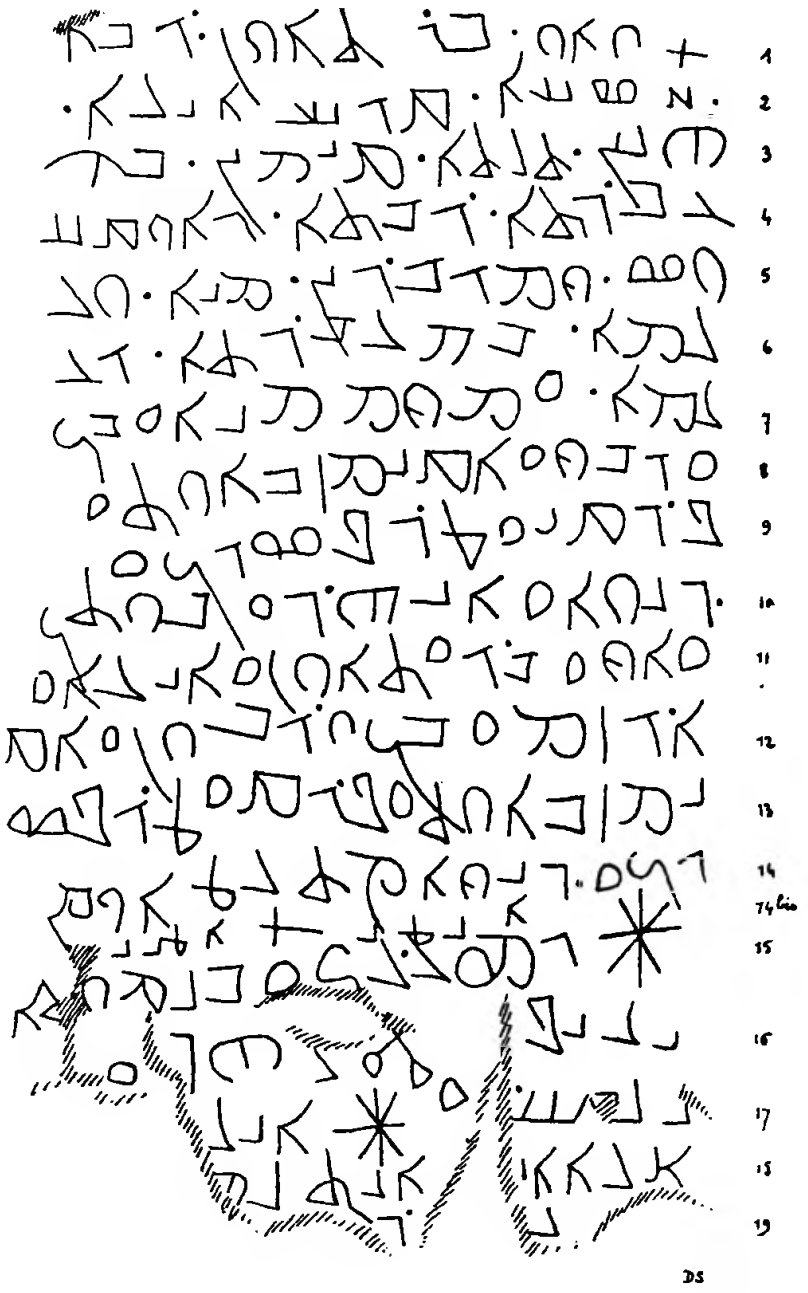

Fig. 6. Amulet 6. From Dupont-Sommer 1946

separated from **t'wn** by a circle. For the name Bar-Theon cf. Βεραδωνάι quoted in Winkler 1930, p. 141 from an amulet published by Froehner, "Sur une amulette basilidienne inédite du Musée Napoléon III", *Bull. de la Société des Antiquaires de Normandie*, 4 (1866), p. 272 (which we have not seen).

1–2 Line 3 speaks of three divine beings, the names of which must be sought in these two lines. That is why we prefer to take **rb' ḥsyn'** as one name, rather than regarding **rb'** as an epithet of Bar-Theon.

rb' ḥsyn': If our interpretation is correct, Rabbā is the name of the deity and **ḥsyn'** is the adjective; see Commentary to Bowl 13:3. and to Amulet 1:8. For **qdyš 'yl'** (written without a divider) cf. **qdšy'l**, *Sefer ha-razim*, II:119; **qwdšy'l** op. cit., IV:15. In line 11 the formula is abbreviated and only **br t'wn 'yl'** is invoked.

3 For three angels in a framework of a magic situation cf. Gordon 1934b, p. 326 (C:4 f.) **tlt'hwn ml'k'... tly bsykth dmyšply dmydly** "three angels... hung on a peg which is lowered and raised". A somewhat similar formula occurs in Gollancz 1912, p. 96, where an incantation begins **hlyn šb' 'ḥyn**. Three mysterious figures also occur as part of the incantation in Amulet 7:16–17 **hmwn tlthyn**...

3–4 Dupont-Sommer, followed by the other scholars, read **bh / gbrt'**. A comparison of the letter which comes after the *bet* with other forms in this inscription shows that it is closer to *mem* than to *he*. The fact that there is no divider either at the end of line 3 or at the beginning of line 4 shows that we have here a single word. The first letter of line 4 is quite clearly an *'ayin*.

5 **mdbryn**: This verb seems to correspond to Hebrew **mnhygym** in *Sefer ha-razim*, IV:9,11,18, which refers to angels directing or ruling over the fourth firmament.

7 **mwmmn'**: Cf. the spelling of this verb in the bowl published by Kaufman 1975, p. 151, where one should probably read **mwmymny** (for **mwmymn'**).

8 **rbw** lacks a dot over the *resh*, hence a reading **dkw** should be considered. However, in line 12 we have **rbwn** clearly written in the same combination. **rbw** and **rbwn** are both nouns derived from the same root as **rb'** in line 1, a fact which may strengthen our interpretation of **rb'** as an independent divine appellation. For **rbw** cf. Gollancz 1898, p. 95:

b'ynn mnk wmtkšpynn lrbwtk "we beg you and implore your greatness".

'qym zb'wt: The first word may be a form of the verb QWM in *af'el*, which recalls the frequent personal names mainly in Palmyrene: **'qmt** (Stark 1971, p. 72), **mqym, mqymw, mqymy, mqymt, mqmw** (Stark 1971, p. 96). What appears to be the same name occurs in Amulet 4:16, **'qmw brth d'mrbn**.

The reading **zb'wt** (see already Gordon 1949, pp. 340f.) is based on the assumption that this form can be a reflection of Hebrew **ṣb'wt**, as Syriac **zdyq** corresponds to Hebrew **ṣdyq**. This goes against the fact that **ṣb'wt** is the usual Syriac spelling of this word; cf. e.g. Macler 1908, p. 20. In Bowl 10:5 **bšwm ṣb'wty ṣb'wty ḥy' wqym'**, we have in the same phrase both **ṣb'wty** and **qym'**, which are reminiscent of **'qym zb'wt**. Arabic magic texts also have **ṣb'wt**; cf. Goldziher 1894, p. 358.

The presumed spelling of a *ṣade* with a *zayin* may gain some force from the Greek form Ζεβυθ which occurs in the formula Ιαβεζεβυθ (the Paris magical papyrus, lines 1798 and 2000, quoted by Blau 1898, p. 134 and footnote 4), if indeed this compound name means **yhwh ṣb'wt**. The phenomenon of Greek *zeta* corresponding to *sigma* in such names may similarly be attested in the two names Σουτιήλ and Ζωτιήλ as suggested by Peterson 1926b, p. 419, No. 114; cf. also there p. 402. J.C. Greenfield would regard the expression **'qym zb'wt** as equivalent to **'lhym ṣb'wt** (Ps. 59:6; 80:5 etc.), but this seems problematic.

However, a different reading of our word is possible: **zk'wt**. This word would be the equivalent of classical Syriac **zkywt'**, which renders Hebrew **ṣdqh**; see Brockelmann 1928, p. 196. This reading may be supported by the divine name Ἰαω Ζούχα which occurs in the Paris magic papyrus, line 1983, cf. Peterson 1926b, p. 402, No. 41. The whole epithet **'qym zk'wt** may then mean "establish justice", or with an initial vocative *alef*, "he who stands (in) justice".

9 **prqy** is a feminine singular imperative, perhaps addressed at **rbw** which is a feminine noun; its emphatic state would be **rbwt'**.

ṭrpsdk: The first element of this word was explained by Dupont-Sommer 1946, p. 21 as Greek τρόπος "façon, manière". Gordon connects it with **ṭrps lyb'** "pericardium" and adduces the meaning "(metal) sheet". It seems to us that **ṭrpsdk** is a Persian form, Tarpas-dukh, with the typical Persian suffix for "daughter". A similar formation is e.g. **zrdwk dyw'** (Gollancz 1912, p. 89, §25). The first part of the compound may be interpreted as **ṭrps** in Judaeo-Persian, which

means "backwards". For a different interpretation of **ṭrps** one may try to connect it with the Greek form θραφιαρι (Preisendanz 1928, p. 94, VI:652; cf. variants in Preisendanz 1941, Register XII, p. 257). A demon **ṭarpis** is attested in Mandaic, see Drower 1943, pp. 2 f.; **dwrps** occurs on a bowl: Jeruzalmi 1963, p. 128: 4 (Isbell 1976, No. 69).

10 **ʾnhr**: The same verb occurs in Myhrman 1909, p. 146 (=Montgomery 1913, p. 151) **wmnṭrnʾ lkwn wmnhrnʾ lkwn wmḥṭymnʾ lkwn.**
bwtk seems to be a defective writing of **bʿwtk.**

11 There seems to us no reason to assume an omission of **rbʾ ḥsynʾ qdyš**, as does Gordon 1949.

12 **ʾrzm bk** corresponds to **mwmmnʾ bk** in line 7 (cf. Gordon 1949, p. 341), thus establishing the meaning of the verb **RZM** (a variant of **RMZ**, cf. Job 15:12 and for Targumic Aramaic cf. Jastrow, p. 1482, s.v. **RMZ**). The verb **RMZ/RZM** has a magic connotation, e.g. in Mandaic **kup raza urimza uraza** "bow thyself, mystery and winking and mystery!" (Drower 1937, p. 596; translation on p. 610). A discussion of words derived from **RMZ** in a magic connotation is in Pognon 1898, pp. 91 f. In Montgomery 1913, No. 19:8 we have the phrase **wbšm srpyʾl mry dynʾ**

Amulet 7

Provenance: Ağabeyli, Turkey
Present location unknown
Plate 6; Figures 7–8

7a

1 vacat שויו רחמין מן שמיה
2 לשלונה בשם מיכאל רפאל
3 עזאל עזריאל אריאל ס(רר)ו
4 רבה אחון מלאכיה קדשיה דקימי[ן]
5 קדם כרסיה דאלה רבה דיתכלון
6 רוחה בישחה וטלגיתה ושידה
7 אן דכר ואן נקבה מן שלונה
8 בר דמיטרין בשם ...

(emended by Epstein 1921, pp. 49 f. to **rwz**ʾ, though doubtful) **wrymz**ʾ, where the last word is obviously a magical technical term.

rbwn: This is evidently a variant of the form **rbw** in line 8, although **rbw** seems to be the absolute form of the feminine abstract "greatness", while **rbwn** appears to be an absolute form of a word meaning "master". On this latter word see Kutscher 1963, pp. 268–271; Ben-Ḥayyim 1967, pp. 37 ff.; Kutscher 1968, pp. 403 f. This may be the reason why the imperative following **rbwn** (in line 13) is in the masculine singular form **prq**, as opposed to **prqy** in line 9 following **rbw**.

14 **tlṭ**ʾ: Del Medico 1949, p. 182, recognized here the Greek word for sea θάλαττα, which makes sense as it corresponds to "ocean" and "water" in lines 4–5.

15 The reading is difficult. It is possible that the star at the beginning of the line is a pictogram representing the noun which should follow **wmn** in line 14. Del Medico 1949, p. 180, in fact translated it as "le Soleil".

dmwlik may be a defective writing for **dnmwlik** "may he crush you". The following word might possibly also be **bnqmt**ʾ "with vengeance".

Amulets 7a and 7b are two silver sheets inscribed in Jewish Aramaic. They were found by peasants in the market village Ağabeyli in the valley of Bertiz not far from Maraş, placed in a cylindrical bronze container. The circumstances of the discovery are described by Anstock-Darga 1950/51. The larger sheet (our Amulet 7a) measures approximately 50×58 mm. Amulet 7b, of which only a fragment is preserved, measures about 43×12 mm. The *editio princeps* was by Dupont-Sommer 1950/51. A new interpretation was offered by Scholem in 1960 (see Scholem 1965, pp. 85 ff.) Further elucidation was given by Levine 1970, pp. 360 f. A comment on a part of the text is in Sperber 1966. We have tried to present in the following a better text, but in view of the fact that the

9 **ššqwpwt wsmrwṭwš ʿqrmkmry**
10 **swsgwn brprwngs ʾstr** and...
11 under **yhwh**. In your name, sacred God,
12 may there be extinguished the evil spirit and the demon
13 and the shadow-spirit and the tormentor and the destroyer. In your name
14 God of Israel, may the words rise up to heaven
15 at the side of the throne of the great, powerful, aweful,
16 sacred, magnified, praised and exalted God. Those
17 three: one who is hungry, but does not eat, one who
18 is thirsty, but does not drink, and one who is drowsy,
19 but does not sleep. I said to the hungry one: Why are you
20 hungry, but you do not eat? (I said) to the thirsty one: Why are you thirsty,
21 but you do not drink? (I said) to the drowsy one: Why are you drowsy, but you do not
22 sleep? The three vanished and said: **dʾn**.

7b

1 For mercy in front of the throne [of the great God.]
2 [May] there be extinguished the tormentor, the destroyer and ...
3 [and] the demon and the shadow-spirit, whether male or female,
4 from **šlwnh** son of Demetrion. In [the name of]
5 ...

photographs reproduced in Dupont-Sommer 1950/51 are not sufficiently legible, we have had to rely largely on Dupont-Sommer's drawings (Fig. 7), which seem to be accurate. [But see *Addendum* at the end of this Commentary, on p. 76.]

1 It is noteworthy that in both amulets there is a space left on the right hand side of the first line. It seems therefore unjustified to assume that something is missing at the beginning of Amulet 7b.

Dupont-Sommer read **šwy wrḥmyn**, which he translated "prix (?) et amour". Scholem suggested an emended reading **šyyl rḥmyn** "begging mercy", which is unlikely as an Aramaic phrase and is contradicted by

Amulet 7b which starts with **lrḥmyn**. Levine suggests that **šwy wrḥmyn** be interpreted "accord and mercy", the first word connected with **šwyt²**, which occurs in Montgomery 1913, No. 16:6. While Levine's interpretation may be correct, it seems at least equally possible and perhaps better to read the first two words **šwyw rḥmyn** from the verb **ŠWY** "to place, put", which was recently discussed in connection with Samaritan Aramaic by Margain 1979. The usage "put mercy" would be analogous to the Hebrew **śym šlwm** in the ʿAmida prayer, rendered into Aramaic **šwy lyšlm²** (Gaster 1928, III, p. 56), with its counterpart in Bowl 1:10 **dmšw² šlm² zk² bdyn²**. A similar expression is in Mandaic **šauia asuta** "one who makes a remedy" (Drower 1946, p. 326). For the form **šwyw** see Gen. Apocryphon 21:26. In 7b the shorter formula, **lrḥmyn**, is used. It is easier to explain **lrḥmyn** as an abbreviation from **šwyw rḥmyn** than from a formula such as **šwy wrḥmyn**. For the whole expression compare **wlrḥmn yśmnk qdm drywhwš mlk²** "and may He give you favour before Darius the king" (Cowley 1923, No. 30:2).

šwy, which corresponds to Hebrew **šwh**, could also mean "at once" (cf. Ben-Ḥayyim 1943, p. 119; Lieberman 1962, p. 135; Kutscher 1961, pp. 124 ff.; Ben-Ḥayyim 1967, p. 69, n. 23), though such an interpretation seems unlikely in the present context. Similarly, it is possible to interpret **šwyw** in the sense of "make haste", cf. Ben-Ḥayyim 1967, p. 69, n. 23, where we have in a Samaritan liturgical poem **nšwy khln wnpṯḥ pwmynn** "let us hasten all of us and open our mouths"; **²šww... m<bd** "they did at once". This construction hardly fits in here, as it seems normally to require another verb or infinitive which is qualified by the verb **šwy**.

2 **lšlwnh**: Dupont-Sommer, followed by Scholem, read **lšlw zh**, which is impossible because: (1) the text is purely Aramaic, (2) the Hebrew phrase suggested is nowhere attested and is quite unlikely in the sense of "he who possesses this (amulet)". The letter *nun* is not sharply distinguished from *zayin* and in this case it merges with the preceding *waw*. The name **šlwnh** may be compared to **šlwn**, Greek Σαλων, a feminine proper name (cf. Sukenik 1930). A name **slwn²**, in Syriac, is rendered by Chabot 1898, p. 303, line 183, "Sylvain"; see also Payne-Smith 1890, p. 2641, s.v. **slw²n²**. A name CHΛONO(C) appears in a tomb-stone inscription from Italy (Frey 1936, p. 433, No. 596). For the correspondence of Aramaic *shin* to Greek *sigma* cf. Krauss 1898, pp. 7 ff. The masculine name **šlwnh** may be a variant of the masculine Jewish name Shallum. On the variation of **m>n** in word-final position cf. Kutscher 1976, pp. 58 ff.

7a

7b

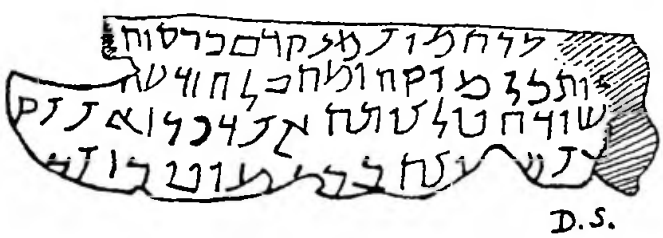

Fig. 7. Amulets 7a and 7b. From Dupont-Sommer 1950/51

Sokoloff 1982, p. 114 quotes an oral remark by Kutscher according to which the name in our amulet should be read as **šlw** (Shallu, an abbreviated form of Shallum). Kutscher accepted the reading **zh**, which follows the name as a demonstrative pronoun. It seems to us unlikely that the Hebrew demonstrative would be used in this Aramaic text.

4 **ʾtwn mlʾkyh qdšyh**: Here again the combination of *waw* and *nun* misled previous scholars. Dupont-Sommer read **ʾtt mlʾky hqdš wḥd**, which mixes Aramaic with Hebrew and makes an impossible sentence. For the phrase **ʾtwn mlʾkyh qdšyh** cf. Amulet 10:3 and the Commentary to Amulet 2:3.

dqymyn: Cf. Amulet 6:3, where the same word is used for angels.

5 **qdm krsyh dʾlh rbh**: We assume that **qdm krsyh** stands in contrast to **bsṭr krsyh** in line 15. A similar contrast is found in Stübe 1895, p. 26, lines 56 ff.; Lacau 1896, p. 50: ובשום גבריאל ומיכאל ורפאל ובשמיה דעניאל דקאים אחורי גלגלי שמשא ובשום דוקיאל ופרקיאל ודרקיאל וערכיאל דימשמשין קדם כורסיה דיקרא דאלהא

6 For **ṭlnyth** see Amulet 4:15.

7–8 **mn šlwnh br dmyṭryn:** Dupont-Sommer read in line 8 **brk myṭryn** "bénis une matrice". Scholem translated this "blessed be Meta[t?]ron". See also Niggemeyer 1975, p. 146, n. 28. The reading given here, which presents the full name of the owner of this amulet, is quite well established. The Greek name Δημήτριος, which seems to underlie here the parent's name, is generally attested for men, although we normally would expect the mother's name to be mentioned in an amulet. As a Jewish name, Demetrius is found in inscriptions; see Frey 1936, No. 682 and Lifshitz in Frey 1975, Prolegomenon, p. 85, No. 715 i.

9–10 For these magical names see Scholem 1965, pp. 89, 94 ff.

11 Dupont-Sommer read **bšm dʾlh**, while it is preferable to read as given here. It will be noticed that final *kaf* is not always carefully distinguished from *dalet*.

14 **slqh** is the correct form of the third person plural feminine perfect in Jewish Palestinian Aramaic. See Dalman 1905, paradigm on p. 402 (**slyqʾ**).

15 **bsṭr** has been explained as "at the side of". However, it is possible to take it as an equivalent of Syriac **bstr** "backwards, behind" (which

may be of Persian origin). "Behind the throne" would then be the perfect counterpart of μετὰ θρόνον. **bstr** stands in contrast to **qdm** in line 5.

A recent discussion of the etymology of Metatron by S. Lieberman is contained in Gruenwald 1980, pp. 235 ff. Lieberman argues that μετάθρονος, though unattested in Greek sources, is the equivalent of σύνθρονος and was preferred by Jews for the name of the angel. An earlier detailed discussion of the term is in Odeberg 1928, pp. 137 ff.

rbh ḥsynh wdḥylh: We have here the same sequence as in Amulet 1:8 (see Commentary there). A similar sequence **rbʾ ḥsynʾ qdyš ʾylʾ** occurs in Amulet 6:1–2.

16 This sequence of adjectives is reminiscent of the series of verbs in the Qaddish prayer, as noted by Scholem 1965, p. 90. See also T–S AS 143.143 ... מלך מפואר מרומם מלא כל הארץ כבודו נורא תהלות נשגב נפלא

hmwn: The form is not mentioned in the grammars of Palestinian Aramaic and Syriac (e.g. Dalman 1905, Kutscher 1976, Schulthess 1924), but it is attested in Biblical Aramaic for the masculine and once (Dan. 2:34) for the feminine.

16–22 For the theme of three mysterious figures we have numerous analogies in magic texts. We may refer, e.g. to Gollancz 1898, pp. 92 f., where three evil forms, a man, a wolf and lion, meet Moses when he tends his sheep.

A very close analogy to our story is found in the Iraq Museum bowl, No. 9731 (published in Gordon 1941, p. 349, and Gordon 1978, pp. 236 f.) and in a bowl in the Zion Research Library in Boston, No. 48 (published in Gordon 1978, pp. 233 f.). A recently published parallel version is in Scholem 1980/81, pp. 263 f. In these Jewish texts we have the story of the sorcerer (who speaks in the first person) going up to the roof at night and talking to some mysterious figures addressed as **ḥršyn byšyn wrʾzyn ʾpwkyn** "evil magicians and overturned mysteries". He says to them "If you are hungry, come eat! If you are thirsty, come drink! If you are dried up, come be oiled! But if you are not hungry, or thirsty, or dried up, go back the way you came, enter the house from which you went out, and the mouth from which you went out". The first to notice this parallel was Levine 1970, pp. 360 f., who suggested as an interpretation the observation "that providing hospitality for demons was a duty that could not be overlooked. Like many hosts the exorcist is saying, in fact, that unless there is more coming to the demons

by the way of official hospitality, they had better be on their way". Gordon 1957, pp. 171 f. (followed by Niggemeyer 1975, pp. 70 f.) also speaks of hospitality offered to demons. Our context, however, brings to mind that we have to do with a somewhat different situation. The demons come to the house probably masked as human beings, but they do not partake of food and drink as human guests normally do. They can be unmasked by putting to them the embarrassing question: why do you not eat, drink or sleep; when they are found out they must depart. There are Jewish discussions of the problem whether demons can eat and drink; according to Bavli Ḥagiga 16a they can. On this question see Shaked (forthcoming).

22 **gyzw**: Dupont-Sommer read **ḥzy** which does not conform to the signs visible. The form **gyzw** is difficult. We might have expected **gyzn**, the feminine plural of the active participle "they vanish", or **gzn**, the third person fem. plural perfect.

tltyhn is an error for **tlthyn**; see line 17.

ʾmrn: Active participle (or perfect?) plural feminine.

dʾn may be connected to the magic word mentioned in Tosefta Shabbat 7:3 and Bavli Shabbat 67b: **dny dny**, which is explained by Lieberman 1957/58, p. 188 as Greek δέννω, δέννω or δένο, δένο "I bind, I bind". **dʾn** could also be interpreted as **d-+ʾn** "(they say): yes!".

[*Addendum*: When the book was already set in the press we received from Mme. Hélène Lozachmeur the original photographs of the two amulets (7a and 7b) which the late Prof. Dupont-Sommer had used. On the basis of enlargements made from these photographs (Pl. 6), Mrs. A. Yardeni has made a fresh drawing (Fig. 8). A study of both the enlargements and the drawing brings out the following new readings:
Line 1 of 7b. Read at the beginning בעון רחמין "ask mercy".
Line 15. Read בסטר כרסיה דאלה רבה תקיפה ודחילה.
Line 22. For גיזו read ענו, which makes better sense and removes most of the difficulties. The translation is: "The three answered and said: **dʾn**".]

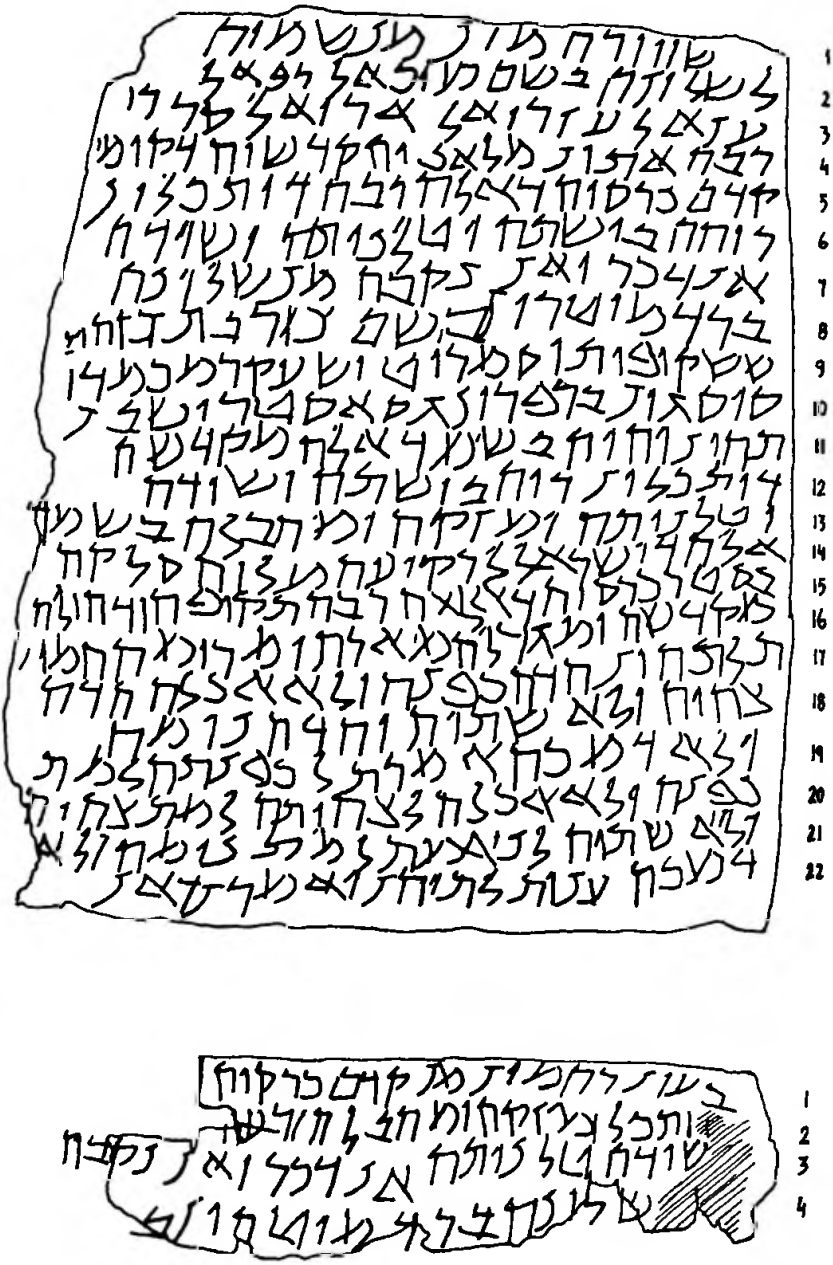

Fig. 8. Amulets 7a and 7b.

Amulet 8

Provenance: Teqoaʿ (?)
Museum of the Flagellation Convent, Jerusalem
Plate 7; Figures 9–10

1 לשם מרת(י)ן
2 ברתה דקוראל
3 משבע אנה
4 על מרת(י)ן ברתה
5 דקורלא בשם
6 אגירת מרתי פ
7 ללא ויכ(ך)
(magic characters)
8 (מ)חרב אנ<ה>
9 (סטרסוק שאפתי)
10 (נקימנס וסקאי)
11 (חטרב) אי(ת)ה
12 ניחה שלום

This amulet, written on a silver sheet, was bought in the antiquities market. According to the dealer who sold it, it was found at Teqoaʿ south of Bethlehem. It is now kept in the Museum of the Franciscan Convent of the Flagellation in Jerusalem. It measures 60×24 mm. The first publication of the text by Testa 1967 suggested that it refers to an unction of sick people. Milik 1967 recognized that the text is an amulet, and gave an emended reading and interpretation of it, which we regard as largely correct. Testa 1968 defended his original reading and attacked Milik's interpretation. The reading offered below is based on an examination of the original, aided by a new photograph, for which we should like to extend our thanks to Father Michele Piccirillo, O.P.M.

1 **lšm mrtyn.** The amulet is addressed at the name of the demon Marten ("our lady"?) daughter of Qoriel. For Marten one may compare Μαρθήνη Αστερία in Mouterde 1930, p. 124, line 15, where it occurs as a feminine proper name. The title Marten occurs also in Montgomery

Amulet 8

Translation

1 To the name of Marten
2 daughter of Qoriel
3 I adjure
4 against Marten daughter of
5 Qoriel. In the name of
6 Agirat, my lady,
7 **pll'**...
(*magic characters*)
8 I destroy
9 ...
10 ...
11 ...bring (?)
12 rest. Peace

1913, No. 19:5–6 **wbšmyk mrtyn 'ybwlyt mlkt' rbt' d'ystr't'**. The name is known from the triad of deities in Hatra (Marēn, Martēn and Bar-Marēn), for which cf. Drijvers 1980, pp. 176–179. Palaeographically Milik's reading, **mrtwn = mrt(h)wn** "their lady", is also possible. It seems, however, preferable to connect this word with a well-established divine name.

2 Qoriel is well-known as a name of an angel. It occurs in the Geniza fragment JTS ENA 1177, fol. 16:13 **qry'l**. In the unpublished Aramaic bowl Metropolitan Museum, New York, L. 66.6, line 8, we have **bšwm qwry'l glgly'**. In Greek there occur the forms Κουριήλ in Preisendanz 1928, IV:86; Καρα(α)ήλ, Καριήλ, cf. Peterson 1926b, p. 405, No. 59.

6–7 For **'gyrt** see above Amulet 4:24. Each of the names **'gyrt, mrty, pll'** and **ybk** seems to have a counterpart in the list of angels in *Sefer ha-razim* 4:13–16... **m'ryt**... **y'bwk**... **'gryt'l**... **pl'w'l**. If this correspondence is correct, **pll'** (for ***pl'l**) displays the same transposition of

Amulet 8

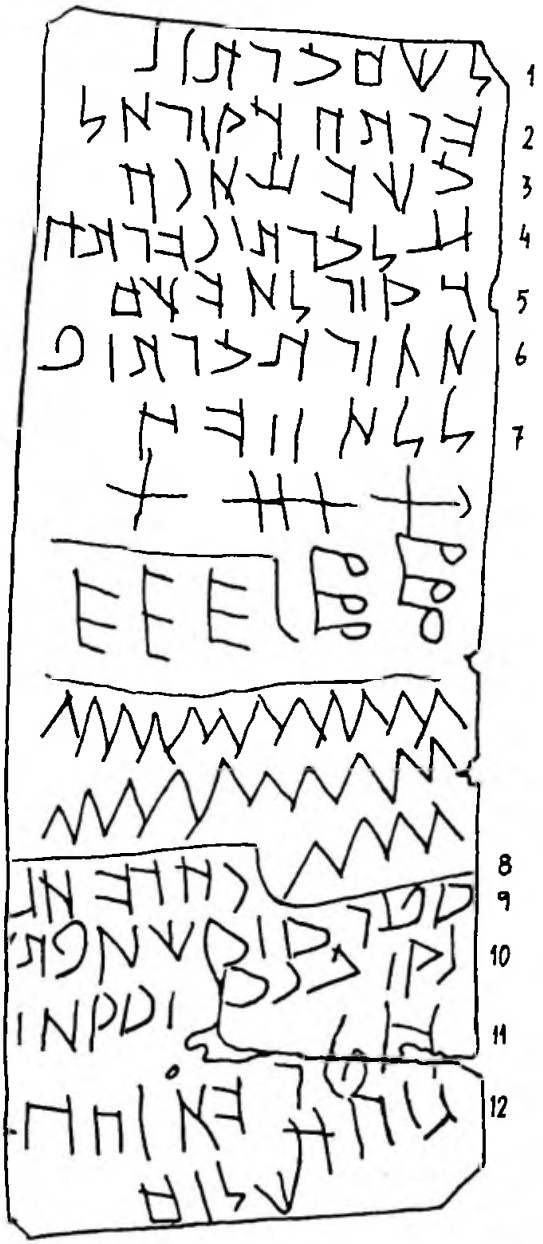

Fig. 9. Amulet 8

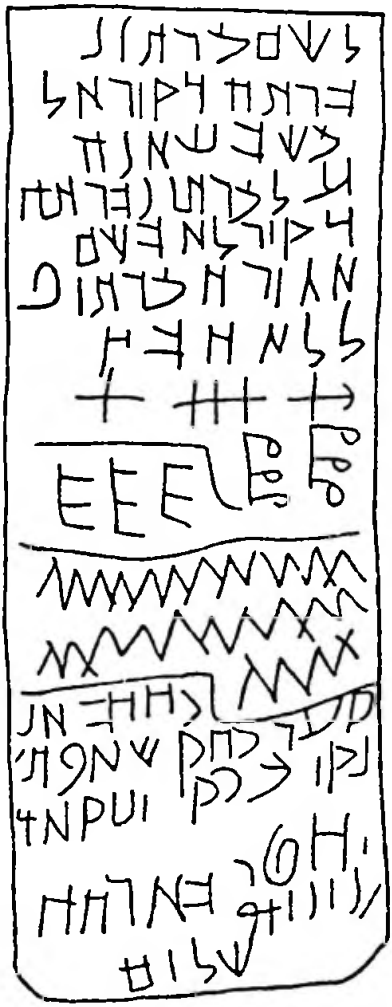

Fig. 10. Amulet 8.
From Milik 1967

letters as we have in **qwrl**ʾ for **qwrʾl**. For **mrty**=**mʾryt** cf. Peterson 1926, pp. 40 f., No. 75 Μοριάθ, etc. **mrty** may be at the base of the name **mrtyn**.

8 Our transcription follows that of Milik, though the traces do not give an unequivocal reading.

11–12 ʾ**yth** is doubtful, whereas **nyḥh** is quite safely established.

12 **šlwm** as a concluding formula, although it is frequent in epitaphs and dedicatory inscriptions, is quite unknown in amulets.

Amulet 9

Provenance: Oxyrrhynchus (?)
University of Cologne, Institut für Altertumskunde,
T. Colon, Inv. No. 6
Plate 8; Figure 11

1 עליך רוחה דמתקריה אשתה אוריתה
2 אגער מן גופה דמרין ברחה דסחר
3 מן מתין ותמניה וארבעין אברין
4 דבה משבע אנה עליך אגער מנה בשמה

6 דלה בשלשלן ואקים ארעה דלה [על]
7 עמודין וימה ומדברה ת(מהי)ן מן
8 ק[ד]מוי וטוריה וגלמחה מזד(ע)[זעין]

This amulet, inscribed on a lead sheet and measuring 93×46 mm., is now in Cologne, Germany (T. Colon, Inv. No. 6). It was presumably found in the cemetery of Oxyrrhynchus, Egypt, from which the rest of the collection of Greek amulets in Cologne derives. The original text seems to have consisted of no more than the eight lines that are preserved. It was first published by Klein-Franke 1971 and was subsequently discussed by Greenfield 1979, pp. XXXVIII f. Our readings are in several points different from the *editio princeps*.

1–2 **ʿlyk**: This word was read **lyk** by Greenfield 1979, but Klein-Franke is certainly right in seeing an *ʿayin* at the beginning of the line. Although an invocation beginning with **ʿlyk** is not elsewhere attested, it seems clear that this is the actual beginning of the text. For a similar beginning compare Amulet 8:1 **lšm mrtyn**...The construction is elliptical, and one has to assume an implied **mšbʿ ʾnh**, as in line 4. According to Greenfield **lyk** is the direct object of **ʾgʿr**, which he understood as the first person singular imperfect of *peʿal*. However, it seems preferable to explain **ʾgʿr** as imperative singular masculine *itpeʿel* from **GʿR**, to be read as *iggĕʿar* (<**itgĕʿar*). The root **GʿR** occurs very

Amulet 9

Translation

1 Against you, the spirit which is called fever (and) shivering:
2 Be exorcised from the body of Marian the daughter of Esther,
3 from the two hundred and forty eight limbs
4 which are in her. I adjure you, be exorcised from her, in the name
5 of He who lives and exists, of He who suspended the sky
6 without chains, and set up the earth without
7 pillars, and the sea and the wilderness are terrified (?) from
8 His presence, and the mountains and the hills tre[mble].

often in the *itpeʿel* form; see the examples adduced in Greenfield 1979. For the assimilation of the *taw* to the *gimmel* cf. Dalman 1905, pp. 103 and 252 f. It is noteworthy that the form of the verb **ʾgʿr** is masculine, although **rwḥh** is described by the feminine participle **dmtqryh**. **rwḥʾ** of course can be either masc. or fem., cf. Geniza 4:3, **rwḥyn byšyn**, as against **rwḥʾ bʾyštʾ** in the Gen. Apocryphon (see Greenfield *loc. cit.*). For **GʿR** cf. Amulet 2:8.

ʾšth ʾwryth: The meaning of these two words is established by Amulet 2:2 (see Commentary there). Geniza 6, p. 4:2 displays another corruption of the formula. The spelling with *alef* for *ʿayin* is caused by the loss of the gutturals; cf. Kutscher 1976, pp. 67 ff. The peculiar spelling **ʾwryt**ʾ occurs possibly also in Hyvernat 1885, p. 116: ובעיזקתיה דמיכאיל גברא מלכא עיסרא דאוריתא ... ובעיזקתיה דגבריאיל גברא מלכא עיסרא דנורא ... The parallel **ʾwryt**ʾ//**nwr**ʾ recalls our **ʾšth ʾwryth**. It has been noted (Grünbaum 1885, p. 223; cf. also Margaliot 1945, p. 118) that Michael represents water and hail, while Gabriel is fire. Montgomery 1913, 24:2 should be read **dtytsy brḥmy šmyʾ mn ʾšytʾ wmn ʾrytʾ**, which gives us a third instance of the spelling with *alef*. Since Biblical Hebrew has **ʾwr** in the sense of "flame", one wonders whether the spellings

ʾwryth, ʾwryt, ʾryt do not represent a contamination of two words of different origin, the root **ʿRY** and the word *ʾūr* (?).

mryn: See above, Commentary to Amulet 2:2.

dstr: The reading seems certain. The initial *alef* of **ʾstr** was elided. The same name, spelled *plene* (**ʾstyr**), occurs in Amulet 3:5, 16.

3 **mtyn**: Here too the *alef* was omitted.

5 **dḥyh wqymh**: Cf. Bowl 10:5.

5–6 דחלה שומיה דלה בשלשלן ואקים ארעה דלה [על] עמודין: References to the earth and the firmament, which are said to be either supported or unsupported by pillars and chains, are frequent in magical and early mystical Jewish literature. Lieberman 1962, pp. 80 f. quotes from *Shir ha-shirim Rabba* 7:8 דברייתא משתבעין ואמרין במאן דאקים ארעא על תלתא עמודים. Niggemeyer 1975, p. 153, n. 32 quotes various sources, where the world is said to rely on the arm of the Lord. Wertheimer 1980, I, p. 28 ירושלים וביח המקדש עומדים p. 41; וכל העולם כולו עומד על עמוד אחד וחלויים בשלשלאות של אש בין שחקים לזבול (in *Seder Rabba di-Breshit*).

Arabic invocations have references to the same theme; cf. e.g. "und bei 'Allah, der die Himmel erhöht hat ohne Säulen' (Sura 13:2) und ohne ein Band" (Winkler 1930, p. 60, translation on p. 64; and a similar phrase in Winkler 1931, p. 9).

The idea is attested also in Zoroastrian Pahlavi: "I am thankful to the good, bounteous, beneficent and merciful Creator, who, when he created Asmān (the sky), which is well-formed, bright, of wondrous substance, wondrously adorned, fully ornamented, fashioned by the spirits, which stands in *mēnōg* without pillars (*a-stun*) and without being held from above (*an-abar-dāštār*)..." (*Zand-i khūrtak avistāk*, p. 256:5–10).

Amulet 10

Provenance: Ḥorvat Rimmon
Israel Department of Antiquities, No. 80.880
Plate 9; Figure 12

For the spelling **šwmyh** cf. the inscription in the Engedi synagogue (Naveh 1978, No. 70:15) and cf. **šwmy'** (op. cit., No. 20:5).

7 **wymh wmdbrh t(mhy)n**: The reading of the verb is uncertain. The root **TMH** is used in Biblical Hebrew, *inter alia*, for the terror and trembling of the earth or the pillars of heaven in the presence of God. In Job 26:11 עמודי שמים ירופפו ויתמהו מגערתו is rendered in the Jewish Targum עמודין דשמיא מזדעזעין ורחתין מן מזופיתיה. The Peshitta has עמודי שמיא רעלין ונחמהון מן כאחה. Syriac **TMH** is used to render Hebrew **HRD** "fear, tremble" in Gen. 42:28, where the Jewish Targums have **TWH** instead.

8 **glmt'**: The word seems to be typically Palestinian. It is attested in the Palestinian Targum, where it renders **gb'h** and **'mq**. It also occurs in Palestinian Syriac.

3 You ho[ly (and mighty)] angels
4 [I adjure] you, just as [this sherd]
5 [burns, so shall] burn the heart of R[... son/daughter of]
6 [Mar]ian after me, I ..[...and you should turn]
7 [his/her heart and mi]nd and kidney, so [that he/she will do]
8 my desire in this [ ]
9 (*magic characters*)

This amulet is inscribed on a potsherd. It was found in the excavations at Ḥorvat Rimmon (Kh. Umm er-Ramamin, Map Ref. 13721/08677), *c.* 1/2 km. south of Kibbutz Lahav and *c.* 13 km. north of Beer-Sheba, by Dr. Amos Kloner of the Israel Department of Antiquities, who kindly entrusted us with its publication. Dr. Kloner also communicated the following details about the archaeological context of the amulet:

> The potsherds under discussion were found in Locus 148, in the Ḥorvat Rimmon excavations in 1980 (cf. Kloner 1980, 1981). Locus 148 is in the north-eastern corner of the enclosure, which contains the synagogue and its adjoining area; this enclosure was created in the fifth century C.E. by the erection of a surrounding wall. The area of Locus 148 was excavated through a filling of debris down to the bed rock. Two different strata were distinguished within the debris: the upper stratum, 80 cm. in thickness, contained numerous fragments of jars, cooking pots and lids, oil-lamps, roof-tiles, glass objects, iron nails and animal bones, as well as an axe-like iron instrument and fragments of a chancel screen and a chancel post. All of these finds date back to the Byzantine period. The lower stratum (20 cm. in thickness) contained potsherds from the Second Temple period and later (1st century B.C.E. — 2nd century C.E.). The five fragments of the amulet (registered as 858/572; 858/559/1–2) were found scattered in different places in the upper stratum of the fill. It seems that the upper stratum of the debris accumulated at the end of the Byzantine period. The amulet under consideration is thus to be dated to the fifth-sixth centuries C.E.

Amulet 10

The amulet consists of five broken pieces, four of which can be attached to each other, forming line 1 and parts of lines 2–8. The fifth piece contains parts of the last two lines (lines 8–9), but it cannot be properly joined to the other fragments, as there seems to be a tiny piece missing. As a result we do not have a consecutive text of line 8. Mrs. Ada Yardeni, who suggested how the fifth fragment should be joined to the amulet, based her idea on an observation of the pattern of the thickness and of the wheelmarks.

In contrast to other potsherds, this is not an accidental fragment of a broken pot. It seems that the potter deliberately cut deep incisions on the surface of the jar before firing it, and that he broke the jar along the same incisions. Marks of the incisions are visible along the edges of the fragments, where about half the thickness of the clay is smooth and the rest is rough. The writing must have been executed when the clay was still soft, before it was baked.

This observation brings to mind the injunction which occurs in several magic recipe books, especially in connection with love charms, to use "a new sherd". Cf. e.g. the *Sword of Moses*, Gaster 1896, p. XV:17–18, where we read לגברא דייתי בתרך סב חספא חדתא וצבע במורא אוכם ואמר על שמיה מין אחומי עד פנכיר ואיזיל ולא תצפי לאחורך "If a man is to follow thee, take a new potsherd and dip it in black myrrh and pronounce over his name the words from **ʾtwmy** until **pnkyr** and walk without looking backwards" (Gaster 1896, p. 184; "black myrrh" is Greek *zmurnomelan*, cf. Margaliot in *Sefer ha-razim*, p. 2). The idea of a new piece of clay on which the charm is written occurs as a fixed formula in Mandaic incantation bowls, e.g. **ʿl glala dlbzʿia ʿtib wʿktubinin ʿl kasa hdta ḏphara uʿšadrinin lluṭata ḏlaṭu**... "on the rock that is not split I will sit and I will write them on a new bowl of clay and I will send the curses (back) to those who cursed..." (Yamauchi 1967, No. 18c:5–8; see also Nos. 7:24–26; 12:34–39; 19:16–18; 26:20–22). In the Mandaic instances the texts are not love charms. Similar injunctions occur with regard to using "a new piece of cloth" **kyrqh gdydh** (in Geniza 6, p. 1:15). An example for such an amulet on a piece of cloth exists in Geniza 1, another love charm.

In some Geniza fragments of magic books we have a more specific instruction, which relates to love or hate charms. The expression used is not "a new sherd", but **šqph nyh** (Geniza 5, p. 3:12), **pkr ny** (Geniza 6, p. 1:3, 4:4), or **kzph nyh** (Geniza 2, p. 2:). These expressions signify "an unbaked piece of pottery"; the Arabic *nayy* (like Hebrew *nāʾ*) means

"uncooked". For a charm against an enemy we have in Gaster 1896, p. XXII:29:30 the following instruction: "to break an enemy write the Sword (=amulet) upon a potsherd that has not yet been burned (**šlʾ nkns lʾwr**)..." (op. cit., p. 193). In a Geniza fragment, T-S K 1.153, p.1:11, we have: לאהבה סב חסף לא צלי וכתוב עלוי ... וכד את מטלק חספה בנורה אמור היך דאלין כתביה מתיקדין כן יתיקד לביה דפלנית ברת פלנית בחר פּבּפּ. Our amulet was apparently prepared according to such an instruction.

The amulet bears marks of black areas which were perhaps caused by exposure to fire. It was perhaps thrown into the fire as part of the sympathetic magic rite alluded to in the text: "Just as this sherd burns, so shall burn the heart of...". This is a frequent formula which occurs in love charms, such as our own amulet. On this point see further below, Commentary to lines 4–5.

1–2 These lines contain the names of six angels surrounded by a frame. **qwlhwn** and **sptwn** remind one of **qlhwn** and **swptyn** in T-S K 1.160, whereas for **swsgr** see **ssgn**, **ssngnys** in *Sword of Moses*, Gaster 1896,IX:21,**swsgwn** in Amulet 7:10. See further Scholem 1965, pp.94 ff.

3 **ʾtwn mlʾkyh qdyšyh**: See Amulet 7:4 and Commentary to Amulet 2:3.

4–5 The reconstruction is based on the Geniza fragments Nos. 2, 5–6, which are pages from magic books, as well as on the Geniza amulets Nos. 1 and 3, which are love charms. In all these texts the angels are invoked and asked to cause the heart of a certain person to burn in love for the client just as this potsherd burns in the fire. The words **yqwd lbh dr[** "the heart of R... should burn" are sufficient for the suggested reconstruction. Moreover, the word **kwlyth** "his/her kidney" (line 7) has also been preserved, and this word occurs in Geniza 6, p. 1:13–14 **lbh whwnh wkwlyth dp** "the heart, the mind (?) and the kidney of X".

6 It is possible to read **btr dʾnh** "after that I", but in this case the reconstruction suggested here is difficult. **btr dʾnh** would hardly be "after Dana", as we would expect a name to be followed by **br** or **brt** and the name of the parent (usually mother).

8 For the phrase **yʿbd/tʿbd ṣbywny** cf. Geniza 6, p. 1:2; Gaster 1896, p. VIII:5. If this reading is correct, **bhd[h]** might mean "in this matter". Alternatively, it is possible to supplement **[ytʿbd] ṣbywny bhd[yn]/bhd[h]** [personal name] "May my desire be accomplished with regard to this [person]".

11 ... [

Amulets 11–13 were discovered among the "small finds" in the apse of the ancient synagogue excavated in 1957–58 near kibbutz Nirim in the North Western Negev (see S. Levy and others 1960). This site has been identified as that of ancient Ma'on (Menois; cf. S. Levy 1960, p. 6). The group of 19 bronze amulets were deposited in the store-rooms of the Israel Department of Antiquities, where for many years they lay unopened. The three amulets given here have now been unrolled with relatively little damage in the chemical laboratories of the Israel Museum, thanks to the efforts and expertise of Dodo Shenhav and David Bigelajzen.

The synagogue is remarkable for its beautiful mosaic, covering the whole width of its nave (on which cf. Avi-Yonah in S. Levy and others 1960, pp. 25 ff.), in which an Aramaic inscription is inlaid, probably executed by a craftsman ignorant of the Hebrew alphabet (cf. S. Yeivin in S. Levy and others 1960, pp. 36 ff., and Naveh 1978, No. 57).

As for the dating of the amulets, since they were found in the apse of the synagogue, they are likely to belong to a late period in its use.

Amulet 11

Translation

1 ...I-am-who-I-am. In the name of... **š(n)rwn, ʾrskyʾl...**
2 ...] el, **mš(n)ydh, šmgrwn, sksk, dwqwn, dwqwn** and ...
3 ...]el, Barqiel, Uriel, Milḥamiel, **ʾh, ʾh, ʾh, ʾh, ʾh, ʾh...**
4 ...that you should depart from the head of Natrun, the daughter of Sarah, Amen, Amen...
5 ...called *kephalargia* and goes into the bones (?) of the chest and does not (?) ...
6 ...In the name of Nagdiel the angel who is bound by chains, which are not of bronze, and...
7 ...not of iron, and in the name of Naḥšur and in the name of Suriel the angel...
8 ...blast-demons, tormentors and shadow-spirits should flee away from her. Joel, Joel...
9 ...Na]trun, daughter of Sarah. In the name of **ʾwh, hlwsʾ**, El, Bael...
10 ...remove from the bones (?) of her chest and from her head...
11 ...

Rahmani 1960, p. 18, summarizes his discussion in the following words:

> These finds show that the synagogue was built in an area settled in the fourth century; also that the floor, and probably the whole building as well, were not later than 538. This suggests an early date of construction in the reign of Justin I, or Justinian I, at any rate before A.D. 538. It is probable that the synagogue was still in use about A.D. 582.

S. Levy (in S. Levy and others 1960, p. 11) concludes from the ceramic finds that the synagogue was used in "the sixth century A.D. with a possible continuation into the early seventh century A.D."

As mentioned by Rahmani 1960, p. 15, the amulets were "rolled tightly into a little scroll", and "on some of the amulets fragments of an outer wrapping of some woven material can still be seen; one still has the remains of the thread by which it was suspended, tied round one end. This shows that it was worn on the body, most probably around the neck". Alternatively it may be supposed that some of the amulets were suspended from the wall near or behind the Ark of the Law, or even

from the Ark itself (see the description of the place of the find in S. Levy 1960, p. 7). See above, p. 16.

The maximum dimensions of Amulet 11 are 130×45 mm. It is clear that one or more lines are missing before the first preserved line.

3 Barqiel and Uriel occur in *Sefer ha-razim* (see index there).

4 **š'rh** seems to be a curious spelling of Sarah.

5 **qplrgy'**: This is obviously Greek κεφαλαργία "headache". The same word may be present in a quotation from the lost *Midrash Yelamdenu* to Ex. 4:10 (Kohut 1955, VII, p. 165a): אינו עשוי לקופלארגיא הזו הוי לא איש דבורים אנכי. Kohut explains **qwpl'rgy'** from Greek κουφολογία "light, empty talk". Jacobson 1980, p. 59, has suggested that the Greek derivation should be from καλοπραγία "noble, heroic acts". The word in ther *Arukh* is spelled practically in the same manner as the word in our amulet, and the sense obtained may be acceptable: "He is not made for this 'headache'", although such a usage is apparently otherwise unknown in Greek.

kwrkwry': There seem to be two possible ways to explain this word: (1) A word of Greek origin in Aramaic (κερκίς, κερκίδος = staff, rod, weaver's comb, shuttle") gives in Jewish Aramaic a variety of forms **krkr, krkd, kyrkwr** etc.; see Jastrow, p. 670b. This word acquired in Syriac the additional meaning of "the bone of the upper arm, or of the upper leg". (2) A word of Semitic origin attested in the Hebrew and Aramaic root **KRKR** "to go around in circles", from which one might hypothetically derive a word meaning "a circle, a disc". None of these explanations seems entirely satisfactory.

(n)y': The reading here gains from the comparison with the same expression in line 10. In contrast to Syriac **n'**, Jewish Aramaic has **ny'**, our form **ny'** may have developed from the latter.

6 **ngdy'l**: The reading of this word is based on Amulet 3:10.

dkbyš: This verb often comes in association with **KPT** and **'SR** (e.g. Bowl 5:3); hence its use here in a context which implies tying or binding.

6–7 **šwšln dl' d[n]ḥš... dl' dpwrzyl**: The designation of the suppressing object as being "of iron" is fairly frequent (e.g. Bowl 13:13–14), but the negation of metals is much rarer. Compare, however, the phrase in Mandaic **zariz napšaikun bzaina dla hwa mn parzla** (*Ginza Y.*, p. 25:20), "arm yourselves with a weapon which is not of iron". For the

Fig. 13. Amulet 11

expression **bšwšln dl> dnhš** one may compare **w>srwhw bšlšln dnḥš** in Targum Judges 16:21 translating ויאסרוהו בנחשתים , "and they bound him with (fetters of) brass".

7 **nḥšwr**: The connection of this word with **nḥšyr** "hunt, eschatological war" in the Scroll of the War from Qumran (1QWar I:9, 10, 13) is unlikely.

Amulet 12

Amulet 13

Translation

1 ...
2 An amulet proper for Esther,
3 daughter of ṭ'ṭys,
4 to save her from
5 evil tormentors,
6 from evil eye,
7 from spirit, from demon,
8 from shadow-spirit, from
9 [all] evil tormentors,
10 from evil eye, from
11 ... from imp[ure] spirit,
12 ..."If thou wilt diligently
13 hearken to the voice of the Lord
14 thy God, and wilt do that
15 which is right in his sight,
16 and wilt give ear
17 to his commandments,
18 and keep all his statutes,
19 I will put none of these
20 diseases upon thee, which
21 I have brought upon the Egyptians.
22 For I am the Lord that healeth thee" (Ex. 15:26).
23 ...

2 **qmy' ṭb**: See Amulet 2:1 and the Commentary there.

3 **ṭ'ṭys**: For this name cf. the feminine pr. n. Tation in a synagogue inscription from Ionia; Frey 1952, No. 738. A masculine proper name

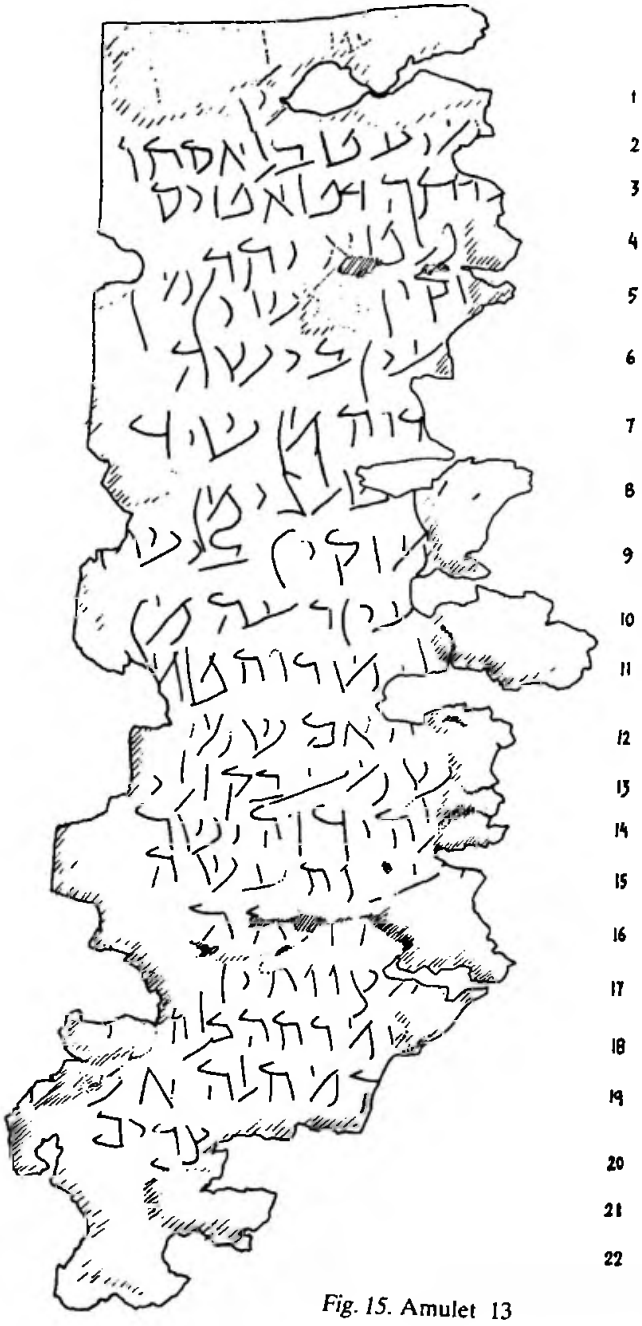

Fig. 15. Amulet 13

Tettius is attested on a Jewish tombstone in Rome (Frey 1936, No. 480).

4 [ḥ]**plṭ**ʾ: Infinitive of *paʿʿel*. The reconstructed letter could also be *mem*; **mplṭ**ʾ would then follow the pattern of Galilean Aramaic (see Commentary to Amulet 2:1). The root **PLṬ** corresponds to **ḥṣylh** in Amulet 1:3 and **ṭwlw wšyzbw** in Geniza 8:11.

5–11 The evil entities here have all indefinite forms, as in Amulet 14 and Geniza 8. The sequence **rwḥ wšyd wṭlny** occurs also in Scholem 1980/81, pp. 252 f. The same sequence occurs in Amulet 7 with the definite forms. For **ṭlny** see also above, Amulet 4:15.

The list of evil entities is partly repeated, given first in Aramaic and then in Hebrew (**mzqyn byšyn** serves both in Aramaic and in Hebrew). Geniza 7 displays a somewhat parallel phenomenon, giving a full incantation in Hebrew, which is then partly repeated in a similar text formulated in Aramaic.

12–22 The same biblical verse concludes also Geniza 8, which has other parallels with our amulet.

For the reconstruction yyyy see the Commentary to Amulet 12:18.

This amulet was brought to the Israel Museum for opening by its owner, Mr. Joseph Sammel, and we are indebted to Prof. Yaʿakov Meshorer for drawing our attention to it. It consists of a silver sheet which was rolled along its narrow side. The writing is in lines which run along the length of the sheet. Its general state of preservation is fairly good, though the right-hand side and the bottom are lost. The size of the extant fragment is *c.* 4×3 cm.

1 Both Shimʿon and Shappira are widely attested names since Second Temple times. Shappira is a feminine name, meaning the same as Yaʾita (Amulet 2). Cf. Naveh 1980, p. 57, note 12.

2 The list of nouns is given here, as often, in the absolute forms; see Amulet 13.

3 At the beginning of this line one might imagine that the natural word to follow ʾš ʿry, ʿrwy, the presumed absolute forms of ʿryt, ʿrwyt; see Amulet 2:2 and the commentary *ad loc.*, and the corresponding Hebrew form ʿryh in Amulet 4:29.

ʾl(wh)h dyśrʾl: The reading of the first word is not entirely clear. An alternative reading may be **ʾl(ʾ)h**.

4 We owe the reading of this Greek line to Professor Morton Smith, as well as most of the following comments on this line.

The first word may be read ZAIP or ΣAIP (if we assume that the upper stroke of the *sigma* merged with the leg of the *lamed* in the preceding line). Prof. Smith suggests that the word may be a reflection of the biblical toponym Śeʿir (Septuaginta Σηειρ) in Jud. 5:4. We wonder whether an association with biblical *śaʿir* "satyr, demon" (cf. e.g. Is. 34:14) is to be excluded.

ΦΘAΩ is explained by Prof. Smith as the name Ptah with an ending.

For ΦΩZAX(ΩT), Prof. Smith comments: "ΦΩZA is a word found in two spells: Preisendanz 1931, p.164 (XXXVI:44) and p.170 (XXXVI:228). In both it follows πεφθα/πεφνα and πεφρα is followed in Preisendaz 1931, p. 14 (VII:312) by ζαωθ. Both spells in XXXVI are for personal favour, that in VII:312 is for protection from dreams and demons".

8 We have here a sequence which is reminiscent of the text of *Qeri'at šema' 'al ham-miṭṭa*, as in Amulet 1:1–3, although what is left of the formula here conforms more closely to the traditional text. We should therefore expect the words which survive in our amulet to be preceded by an enumeration of four angels on each side of the person to be

This is an amulet on a thin silver sheet, measuring 35×82 mm. It was purchased by the Israel Museum in 1969 from an antique dealer in Jerusalem, but the provenance of the object was not transmitted. By its language, orthography, the material on which it is written and its place of purchase there can be little doubt that this is a Palestinian amulet.

The amulet, which forms a parallel to Bowls 12a and 12b, came to our attention at a late stage in the preparation of the book when it was going to press. The commentary to Bowls 12a and 12b has had to be somewhat modified in view of our better understanding of the text and of the history of the formulae which occur here. However, it was impossible to rewrite the whole commentary, and some inconsistency in the treatment of these texts may have remained.

At the same time, since the amulet is fragmentary and its decipherment has been very difficult, due to the fact that the letters are crowded together and the text is often elliptical, it might have been impossible to reach a clear understanding of the text of Amulet 15 without the benefit of previous acquaintance with the story from Bowls 12a and 12b (and the other parallels).

The text of Amulet 15, like that of Bowls 12a and 12b, is based on a story of Smamit (lizard or spider; see below, Commentary to line 1), whose sons were killed by an evil agent; the name of that demon may be reconstructed from Bowl 12a: Sideros. She flees to a place, which, if it conforms to the detail in Bowl 12, would be a mountain, and there three helpers, **swny**, **swswny** and **snygly**, enter her house, unwittingly admitting with them the fiend, who kills her (new-born) son. She cries at her helpers, but the fiend flees. They chase him and find him in the midst of the sea. When they wish to kill him he swears that wherever the names of **swny**, **swswny** and **snygly** are mentioned, he will not kill the client of this amulet and her new-born son. This story obviously serves for the protection of a woman giving birth and of her child. The details of the story and the comparison to other versions of the same story in

22 Antonina, daughter of...
23 ... and her son. Blessed art Thou y[yyy]
24 the living God, King of the world. [May He exorcise]
25 the spirits from your presence.

medieval and later times will be discussed in the Appendix to this amulet.

In order to facilitate the textual comparison, we have set the three Aramaic texts — Bowls 12a and 12b with Amulet 15 — in parallel columns, in the section which deals with Bowl 12 (p.188–193).

1 A word was probably lost before **smmyt**. Two possible reconstructions of the lost word have been considered: **ḥdh** ("one") and **hdh** ("this"). The first alternative would have required an indefinite form **smmy**; the second alternative seems to go along better with the form **smmyt**, although it lacks the determined ending, on the assumption that **smmyt** is already used as a proper name. For **hdh** before a proper name cf. e.g. **hdh rḥl**, *Berešit Rabba*, 70; ed. Theodor-Albeck, p. 817.

smmyt (Bowl 12a **smwmyt**, 12b **smmyt**ʾ) is related to Biblical Hebrew *śmāmīt* (Prov. 30:28), which is variously interpreted as a lizard or a spider; the Targum and the traditional Jewish commentaries favour the latter rendering, while the Septuagint has *kalabōtēs* "spotted lizard". In Lev. 11:30 *lĕṭāʾā* is rendered by the Jonathan version *śmāmītā*, which the medieval commentary on Jonathan says is a spider. In Talmudic Hebrew and Aramaic, **smmyt/śmmy** seem to mean uniformly "spider" (cf. Kohut 1955, VI, pp. 72b f.; Jastrow s. vv.). Our context could bear either interpretation, but the preponderance of the sense "spider" in Hebrew and Aramaic in the period corresponding to the writing of our texts seems to weigh in favour of this interpretation (see also Löw 1912, pp. 140 ff.). A late Jewish amulet from Tunis (cf. Casanowicz 1917, p. 50) mentions a negative figure called **zmzwmyt**, probably unrelated to our **smmyt**. One may also recall the grasshopper figure in Islamic wonder stories (cf. Goldziher 1872, p. 767).

bnyn [...]: It is possible that the number of sons followed, although it is not certain that there is room for a number. The number should have

normally preceded the designation **bnyn**. In the bowls the number of sons killed is twelve, while in the late Greek version given in the Appendix the number is six.

2 **[sd]**rws: The name is reconstructed on the basis of Bowl 12a. That the name Sideros ("iron") is original is demonstrated by the Ethiopian Werzelya (see Appendix).

3 **br²(š)[ ]**: One may be tempted to reconstruct here and at the end of line 4 **br²(š) [ṭwr²]** "at the top of a mountain", following the indication in Bowls 12a and 12b, section III.

4–6 The details about the construction of a house with gates and the shutting of the gate are not mentioned in Bowls 12a and 12b, though they are implied in the story given there. All of this is explicitly found in the late Greek version (see Appendix).

7 **lyd²**: This is a puzzling expression in this context. **yd²** might signify "handle", but would not make a meaningful translation. **lyd** normally means "at, near"; **mn yd** or **myd** means "immediately". One wonders whether **lyd²** could not mean "near there" or "at that time"?

swny etc.: The three names are clearly divided in lines 12–13 and 20–21. The same division seems to occur in Bowls 12a and 12b, and it is continued in the later tradition of this story; e.g. in the late Hebrew amulets **snwy, snsnwy wsmnglp**, and in the Greek stories (Perdrizet 1922, p. 16: Sisinios, Sinēs and Sēnodōros). For further discussion of these names see Appendix.

8 **²rtqw**: This verb has been identified as typical of Galilean Aramaic (Kutscher 1971, col. 274). In Bowls 12a and 12b this verb lost its meaning, and it seems to be used as part of the name of the helpers.

9 A portion of the story seems to have been contracted here. The parallel stories tell of the request of the helpers to enter, the initial refusal of Smamit, their insistence, and her final acquiescence. Here we only have the helpers' insistence.

13 The reading of the final part of the line is uncertain.

14 The verbs "[heard]...opened (the door), fled" are not found in Bowls 12a and 12b.

15 For the reconstruction **[mn] ḥzyn** (the verb is in the active participle pl. m.) see Kutscher 1976, pp. 51 ff.; the alternative construction, with

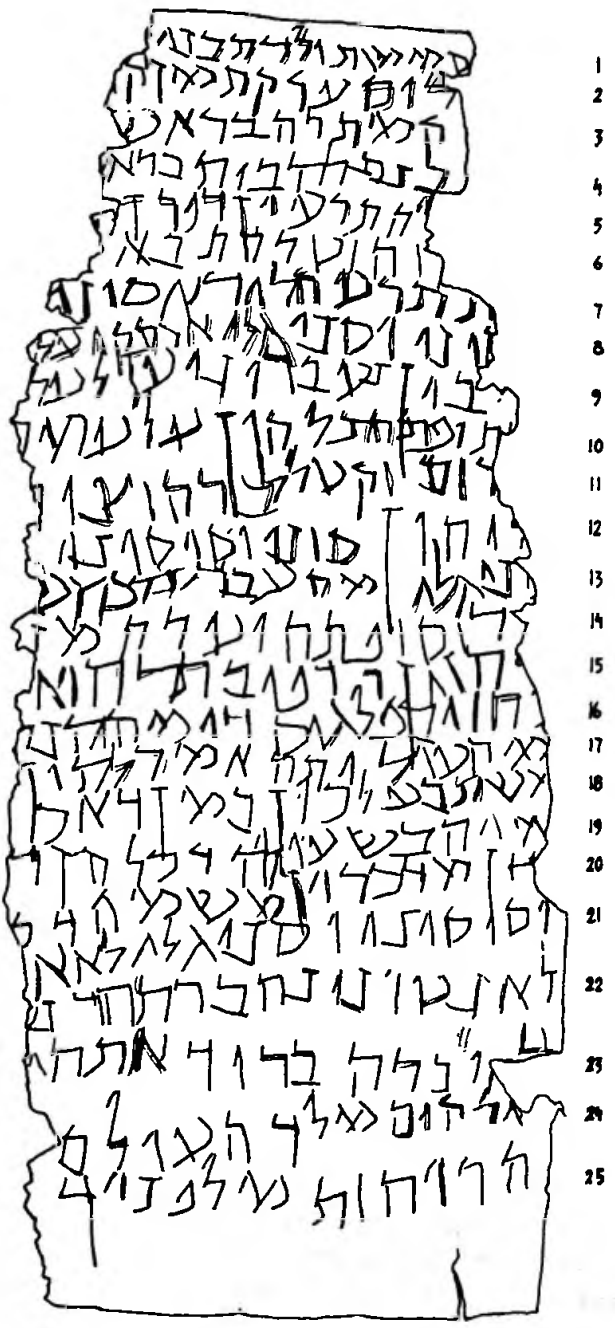

Fig. 17. Amulet 15

kd, is not attested in Galilean Aramaic (op. cit., p. 58). However, as we should have expected to see a trace of the *nun*, the reconstruction is doubtful.

15–16 **w'[šk]ḥwy**: The reconstruction is based on the parallel versions of 12a and 12b, where we have **w'drykw ytyh**. The verb **DRK** in *af'el* should mean there "to find", although the writers of the bowls probably understood it to mean "to lead", and used **lgw** "into (the Great Sea)", instead of **bgw** "in".

16 **bplgws dymh**: This double usage — Greek and Aramaic — seems to be a constant phrase in Jewish Aramaic (perhaps more particularly in the Palestinian dialect) to indicate "the midst of the sea". The Hebrew expression *bĕ-lev yām* (Ex. 15:8) is rendered by the Targum of Jonathan b. Uzziel **bgw pylgws dym' rb'**. A similar translation occurs in the Aramaic version of Ps. 46:3. The phrase is also attested in *Lev. Rabba*, section 12, beginning. In Bowls 12a and 12b the phrase is **lgw plgws ym' rb'**.

18–19 We have here a version of Is. 40:12 which is close to the Peshitta. The Targum to this verse diverges from the Hebrew text. Bowls 12a and 12b, in contrast, use the original Hebrew; in Bowl 12b the whole verse is quoted.

kl hn d- is apparently a Palestinian usage. Bowls 12a and 12b use **kl 'tr d-** instead.

20 The first word could be reconstructed as **['tw]n** on the basis of the phrase in parallel late Hebrew amulets; see Shachar 1971, p. 19, No. 4: כשמזכירים אתם את שמותינו

22 **l'nṭwnynh**: Antonina is attested as a feminine Jewish name in Rome; see Frey 1936, Nos. 236 and 416. Antoninos occurs as a masculine name on a Jewish tombstone from Palestine; see Frey 1952, No. 970.

23–24 The blessing here corresponds partly to the blessing in Bowl 12b, section X.

24–25 The reconstruction **[yg'r]** is based on the Qumran Scroll of the War X:31 ורוחי [גו]רלו גערתה מפנינו

In **mlpnyk** the suffixed pronoun refers probably to the client.

Appendix to Amulet 15

The story on which the texts in Amulet 15 and Bowls 12a and 12b are based is interesting because of its wide-ranging connections. It tells of a *smamit*, i.e. a lizard or a spider (see Commentary to Amulet 15:1), which gave birth to (twelve) children, who were killed by Sideros (the wicked).[1] Bowl 12b has the name **srgys** (Sergius?) instead. There is no clear explanation to the name Sergius in this connection, except by assuming that it is a corruption of Sideros. The latter name is clearly the Greek *sideros* "iron", a sense which gets a gratifying confirmation in the Ethiopian versions (see below).

The bereaved mother flees to a mountain "the name of which is unique in the world", to quote the phrasing of Bowl 12a. According to the two bowls she performs magic rites of copper and iron,[2] but this detail is absent from the amulet. Three new persons, **swny**, **swswny** and **snygly**, appear on the scene as friendly helpers; in the Christian version they are usually described as the woman's brothers. The meaning of these names is obscure. One might think of some Greek connection, e.g. σαύνιον "javelin"; σείσις "shaking, concussion", but such explanations lack proof.

swny, **swswny** and **snygly** knock on the door and ask the woman to open the door for them, but she refuses. At their insistence,[3] she opens, and then the wicked Sideros enters with them and kills the child which has evidently been born in the meantime. When she raises a cry, the helpers chase Sideros and reach him in the midst of the sea. They seek to kill him, but refrain when they are told by Sideros that if they spare him, he will undertake by oath to desist from killing the client and her son wherever the name of the helpers is mentioned.

The story told here has many parallels in medieval Christian literature, in Greek, Coptic, Ethiopian, Armenian, Rumanian, Slavonic

[1] The name Sideros is attested once as an angel name in the Geniza fragment T-S N.S. 329.972: אסידרוס רוחה רבה. It seems also to occur once in Mandaic, cf. Macuch 1967, p. 118:37 f., 43, but the context there is not entirely clear.

[2] The magic combination "iron and copper" occurs in Amulet 11:6–7 and in Montgomery 1913, No. 19:10.

[3] The argument which they use and which ultimately convinces her to open the door is not made explicit.

and late Syriac, as well as in Arabic and Hebrew. The various versions are discussed in detail by Peterson 1926a, pp. 109ff. and by Winkler 1931. A Greek version of it exists in a number of late medieval manuscripts. We are reproducing the Greek text given by Perdrizet 1922, pp. 16 ff.:[4]

Ἐπὶ τῆς βασιλείας Τραϊανοῦ τοῦ βασιλέως ἦν τις γυνὴ ὀνόματι Μελετινή, ἥτις ἐγέννησεν παιδία ἕξ, καὶ συνέλαβεν αὐτὰ ἡ μιαρὰ καὶ ἀκάθαρτος Γυλλοῦ· καὶ πάλιν ἐν γαστρὶ συνέλαβεν ἡ Μελετινή, καὶ εἰσῆλθεν εἰς τὰ λεγόμενα Χαλκοπράτια, καὶ κτήσας πύργον ὑψηλόν, καὶ καθηλώσας αὐτὸν καὶ μολυβδώσας, καὶ λαβὼν ιβ' θεραπαίνιδας διῆγεν μετ' αὐτῶν καὶ ἐμεῖς ἐν αὐτῷ, ἔτεκεν ἐκεῖ τὸ παιδίον.

Ἐν μιᾷ οὖν τῶν ἡμερῶν ὁ ἅγιος Σισίνιος, Σίνης καὶ Σηνέδωρος κατῆλθον τοῦ ἐπισκέψασθαι τὴν ἀδελφὴν αὐτῶν, καὶ γινόμενοι πλησίον τοῦ πύργου ἔκραξαν αὐτὴν λέγοντες· ἄνοιξον ἡμῖν, ἀδελφὴ Μελετινή. Ἡ δὲ εἶπεν· παιδίον ἐγέννησα καὶ φοβοῦμαι ἀνοῖξαι.

Ἐπὶ πολὺ δὲ αὐτῶν ἱσταμένων καὶ τῶν ἵππων χαλινοκτυπούντων, κατῆλθε τοῦ ἀνοῖξαι αὐτῶν. Ἡ δὲ μιαρὰ Γυλλοῦ συνεισῆλθε σὺν τοῖς ἵπποις ὥσπερ μυῖα· καὶ περὶ μέσης τῆς νυκτὸς ἀπέκτεινε τὸ παιδίον. Ἡ δὲ Μελετινὴ ὠλόλυζεν πικρῶς, λέγουσα· ὦ Σισίνιε, Σίνη, καὶ συνοδία, οὐκ εἶπον ὑμῖν ὅτι παιδίον ἐγέννησα καὶ φοβοῦμαι ἀνοῖξαι; ἦλθεν ἡ μιαρὰ καὶ ἀπέκτεινεν αὐτό. Τότε οἱ ἅγιοι προσευχὴν ποιήσαντες πρὸς Θεόν, κατῆλθεν ἄγγελος ἐξ οὐρανοῦ καὶ εἶπεν αὐτοῖς· εἰσηκούσθη ἡ δέησις ὑμῶν πρὸς Θεόν· καταδιώξατε αὐτὴν εἰς τὰ μέρη τοῦ Διβάνου.

Τότε λέγουσιν πρὸς τὴν ἀδελφὴν αὐτῶν· μὴ λυποῦ, ἀδελφὴ Μελετινή, ἡμεῖς γὰρ ἐν ὀνόματι τοῦ Θεοῦ γενόμεθα ὡς κυνηγοί, καὶ κρατήσωμεν αὐτήν. Τότε καθίσαντες ἐπὶ τοῖς ἵπποις αὐτῶν, ἔτρεχον αὐτήν. Ἡ δὲ μιαρά, ἰδοῦσα τοὺς ἁγίους ὄπισθεν αὐτῆς, ἔδραμεν πρὸς τὴν θάλασσαν, καὶ ἔλασαν οἱ ἅγιοι

[4] Another closely related Greek story was published in an English translation by M. Gaster 1900, pp. 142 ff., from the text in Leo Allatius, *De templis graecorum*, 1645 (not available to us). Perdrizet seems to have been unaware of this earlier publication. These Greek stories are probably the origin from which are derived the Slavonic and Rumanian versions discussed in M. Gaster 1900. Perdrizet 1922, p. 19, note 1, mentions a related Arabic text which occurs in a Vatican Ms. Arab. 118. Winkler 1931, pp. 97 ff., gives the text of Cod. Arab. 117 in the Vatican, which is a prayer by St. Sūsniyūs for the protection of small children. Some further bibliography is provided by T. Gaster 1971, pp. XXXIV f., and in his articles of 1942 and 1955.

τοὺς ἵππους αὐτῶν, καὶ ἔφθασαν αὐτήν. Καὶ ἀπέλαβεν αὐτὴν ὁ ἅγιος Σισίνιος ἐκ τοῦ πλευροῦ αἰτῆς, καὶ ἤρξατο βασανίζειν αὐτήν· ἐὰν μὴ μοῦ ὁμολογήσῃς ποῖον θεὸν σέβεις καὶ ποῦ τὴν δύναμιν ἔχεις, ἐκ τῶν χειρῶν ἡμῶν οὐκ ἀπόλυσαι, ἕως οὗ ἀποδώσεις ἡμῖν καὶ τὰ ζ' τέκνα Μελετινῆς ζῶντα, ὥσπερ ἔλαβες. Τότε ἡ μιαρὰ λέγει τοῖς ἁγίους· Ἅγιοι τοῦ Θεοῦ, ἀδύνατόν ἐστιν δοῦναι τὰ παιδία, ἐὰν μὴ πίω γάλα ἐκ τῶν μασθῶν Μελετινῆς. Καὶ στραφεὶς ὁ ἅγιος Σηνόδωρος πρὸς τὴν ἀδελφὴν αὐτῶν, ἀνήγγειλεν αὐτῇ τὸ γεγονός, καὶ ἔδωκεν γάλα τὸν ἅγιον. Καὶ ἐλθὼν αὐτὸς εἰς τὸν τόπον ὅπου ἐκράτησαν τὴν μιαράν, καὶ ποτίσαντες αὐτὴν τὸ γάλα, καὶ κατ' οἰκονομίᾳ Θεοῦ ἐξέρασεν τὰ παιδία ζῶντα. Τότε ἤρξαντο μαστίζειν αὐτὴν· ἡ δὲ μιαρὰ λέγει τοὺς ἁγίους· Ἅγιοι τοῦ Θεοῦ, μὴ μὲ πολυβασανίσετε, καὶ ὀμνύω σας εἰς τὸν κύκλον τοῦ ἡλίου καὶ εἰς τὸ κέρας τῆς σελήνης, ὅτι ἔπου γράφεται τὸ ὄνομά σας καὶ ἀναγινώσκεται ἡ πολιτεία σας, καὶ τὰ ιβ' ἥμισυ ὀνόματά μου, οὐ μὴ τολμήσω προσεγγίσω ἐν τῷ οἴκῳ ἐκείνῳ, ἀλλὰ ἀπὸ τριῶν μιλίων φεύξομαι ἐκ τοῦ οἴκου ἐκείνου. Τότε λέγουσιν αὐτήν· Ἀνάγγειλον ἡμῖν τὰ δώδεκα ἥμισύ σου ὀνόματα. Τότε ἡ μιαρὰ πυρὶ φλεγομένη ἔλεγεν· Τὸ μὲν πρῶτόν μου ὄνομα καὶ ἐξαίρετον καλεῖται Γυλλου, τὸ δεύτερον Αμορφους, τὸ τρίτον Αὔυζου, τὸ τέταρτον Καρχους, τὸ πέμπτον Βριανη, τὸ ἕκτον Βαρδελλους, τὸ ἕβδομον Αἰγυπτιανή, τὸ ὄγδοον Βαρνα, τὸ ἔνατον Χαρχανιστρέα, τὸ ι' Ἀδικία, [τὸ ια'...], τὸ ιβ' Μυῖα, τὸ ἥμισον Πετομένη (ι). Καὶ ἀκούσαντες ταῦτα τὰ ὀνόματα, οἱ ἅγιοι ἐθαύμασαν, καὶ ἀνέσπασαν τὸν δεξιὸν πλόκαμον τῆς κεφαλῆς αὐτῆς ποιήσαντες σχοινία τοῖς ἵπποις αὐτῶν, καὶ λαβόντες τὰ ἰδιόχερα αὐτῆς ὀνόματα, καὶ τὰ παιδία ζῶντα ὥσπερ ἔλαβεν, καὶ ἀπόλυσαν αὐτήν. Καὶ εἰσελθόντες εἰς τὴν Πόλιν, πᾶσα ἡ πόλις ἐδόξαζεν τὸν Θεὸν τὸν ποιοῦντα θαυμάσια διὰ τῶν ἁγίων αὐτοῦ.

Ὁ ἔχων τὴν ἀποστροφὴν αὐτῆς οὐ μὴ ἀδικηθῇ.

In the reign of Trajan the King there was a woman by the name of Meletinē. She gave birth to six children, and the abominable and impure Gyllou carried them off. Meletinē became once again pregnant, and went to those (places) called Khalkopratia, where she acquired a lofty tower; she bolted it (with nails) and sealed it with lead. Having taken twelve maids, she lived amongst them and entered into it, and she gave birth there to the child.

One day Saint Sisinios, Sinēs and Sēnodōros came down to visit their sister. Having drawn close to the tower, they called her saying,

"Open the door for us, our sister Meletinē". But she said, "I have given birth to a child and I am afraid to open the door".

But as they stood there for a long time, and as their horses stamped upon the wood, she descended to open the door for them. The abominable Gyllou came in together with the horses in the form of a fly, and toward midnight he killed the child. Meletinē cried bitterly, saying: "O Sisinios, Sinēs and company! Did I not tell you that I had given birth to a child and that I was afraid to open the door? The abominable one has come and killed him". The saints then addressed themselves to God in prayer, and an angel came down from heaven and said to them: "Your petition has been heard by God. Pursue her as far as the Lebanon".

They then told their sister: "Do not be distressed, Sister Meletinē, for we are going to be pursuers in the name of God and we shall seize her". Then, seated on their horses, they ran after her. The abominable one, however, seeing the saints behind her, ran into the sea. The saints drove their horses and overtook her. Saint Sisinios took her from her side and started to torture her: "If you do not promise to tell me which god you worship and where you derive your power, you will not escape from our hands until you give back to us the seven children of Meletinē, as much alive as they were when you snatched them". The abominable one then says to the saints: "Saints of God, it is impossible for me to give the children as long as I do not drink milk from the breasts of Meletinē". Saint Sēnodōros returned to their sister and recounted to her that which had happened, and she gave milk to the saint.

Having come to the place where they were holding the abominable one, they gave her the milk to drink, and, by God's disposition, she vomited the children alive. Then they started flogging her. The abominable one said to the saints: "Saints of God, do not torture me too much, and I swear to you by the disc of the sun and the horn of the moon that wherever your name is written and your association is known, and my twelve and a half names, I shall not dare approach that house, but shall keep away from that house to a distance of three miles". Then they said to her, "Disclose to us your twelve and a half names". The abominable one, burning in fire, said: "My first and special name is called Gyllou; the second Amorphous; the third Abyzou; the fourth Karkhous; the fifth Brianē; the sixth Bardellous; the seventh Aigyptianē; the eighth

Barna; the ninth Kharkhanistrea; the tenth Adikia; (...) the twelfth Myia; the half Petomene". Hearing these names, the saints were surprised. They tore off the right-hand braid of her head, making cords for their horses. Taking the names revealed by herself, and the children, alive just as they had been when she had snatched them, they let her go. Having entered the City, the whole city praised God who made wonders by the hand of His saints.

This device against her will not cause any harm to him who uses it.

Here we have nearly all the essential elements of our Aramaic story: Several children killed by the fiend; the flight of the mother to a fortified and lofty place;[5] the three helpers[6] coming and not being admitted; they insist; the tricky fiend sneaks in with them; the new-born baby is killed; the appeal to the helpers; the chase into the sea; and the promise of the fiend not to harm anyone who uses the helpers' names and those of the fiend. The differences are mostly of secondary character: the name (and proper identity) of the attacked mother;[7] the name[8] and gender of the

[5] The Greek text has εἰς τὰ λεγόμενα Χαλκοπράτια, which Perdrizet explains as follows (p. 17): "Quartier de Constantinople, avec une église fameuse, où était conservée, entre autres reliques, la ceinture de la Vierge". While this identification of the place name seems valid, one wonders whether Khalkopratia does not contain a reminiscence of something like Χαλκοπράγματα=חרשין דינחשה, as in Bowl 12a.

[6] The number is not uniform in the different versions. Three is still the number used in the Greek story just quoted, although it is sometimes blurred, as in the case when Meletine addresses the helpers by the words "Sisinios, Sines and their party" (ὦ Σισίνιε, Σίνη καὶ συνοδία). Other Greek versions (e.g. those given by Leo Allatius, cf. Gaster 1900 and Winkler 1931, pp. 109 f.) speak of only two helpers: Sisinios and Sisynodoros. In some versions there is talk only of a single helper, who is the woman's husband or brother (e.g. the Arabic version given below). In a similar way there is a single helper in the late Jewish and Christian sources, where the function is relegated to Elijah, Michael, or Gabriel.

[7] A certain zoological association may nevertheless exist: Meletine may be connected with the Greek word for a bee (μέλιττα). The fiend has a strong association with a fly (Greek μυῖα), which is both the form it assumed when it entered with the brothers' horses and one of its names. *Smamit*, as noted above, is a spider or a lizard.

[8] Gyllou (or Gellō, Gelō) is considered by some to be the origin for Arabic Ghūl. Cf. Sophocles, *Greek Lexicon*, s.v. γελλώ etc.; Perdrizet 1922, p. 25; M. Gaster 1900, p. 148. On the Babylonian origin of this demon cf. Frank 1910, pp. 161 ff.

fiend, as well as its identity ("iron");[9] the number of offspring killed by the fiend (12+1 in the bowls, 6+1 in Greek);[10] the helpers are designated in Greek as the mother's brothers,[11] while in the Aramaic there is no relationship mentioned. Other points of divergence may seem to be mere enlargements or embellishments of an original version.

Apart from the great similarity of structure and plot, the Greek versions present a striking similarity to the Aramaic text in the names of the helpers. Sisinios, Sinēs and Sēnodōros bear great resemblance to **swny, swswny** and **snygly** in their sound pattern. All three names, in the Greek as well as in the Aramaic, play about with the phonemes *s* and *n*.

The identity of the fiend, Sideros=Iron, was lost in the Greek version. It survives, however, in a group of stories which are current in Ethiopic amulets and which probably derived from Coptic. They were summarized in Worrell 1909, pp. 165 f.; the interesting feature of that story for our purpose is that the attacking fiend is called *Werzelya*, while the helper, who is the woman's husband, is called in the Ethiopic stories *Susneyos*, a form resembling the Aramaic and Greek versions. Werzelya is not an Ethiopic word, and several suggestions have been put forward by scholars to explain it; it was compared to Ursula, Epilepsia, Basileia, as well as the Hebrew *Barzel*.[12] In light of the Aramaic text we are now discussing, there can be no doubt that Werzelya is actually a reflection of Aramaic Parzĕlā or Hebrew Barzel "iron". It is curious to note that the Aramaic name is preserved in Ethiopic, while the Aramaic texts present a Greek form. The surviving Greek versions, on the other hand, have lost all memory of Sideros.

[9] The name Sideros may well lie behind the sixth name of Gyllou, Bardellous, which is reminiscent of Ethiopic Werzelya, cf. below. See also Perdrizet 1922, p. 21.

[10] The theory that interprets the Sisinnius story as an astrological allegory can of course make better use of the number 12 than 6. Cf. Peterson 1926a, pp. 125 f. and the discussion by Winkler 1931, esp. pp. 126 f. The mother indeed has 12 servants and 12½ names (the additional half-name is perhaps analogous to the thirteenth baby just born).

[11] Some versions make the helper the brother of the fiend and the husband of the bereaved mother. Cf. Fries 1893, pp. 62 ff., quoted in Winkler 1931, p. 96, and see also pp. 127 ff. See also note 6 above.

[12] For a summary of views and references cf. Worrell 1914/15, p. 137. See further Aešcoly 1932, pp. 39 ff., 126; Winkler 1931, pp. 175, 186. The latter connects it with the Babylonian Labartu.

A much contracted version of this story occurs in an Arabic synaxary, based on the Coptic rite, which gives under the date Barmūda 26 the martyrdom of St. Sūsniyūs, who is said to have been the son of Sūspatros, of the retinue of King Diocletian. The relevant portion says:

> He returned to Antioch where he found a sister of his who had given birth to a hideous-looking son. Before him she had given birth to a daughter whom she had killed and whose blood she had sucked. Satan dwelled in her, and she assumed by witchcraft the shapes of birds and snakes. Whenever a child was born to the inhabitants of the town she would descend on it, kill it and suck its blood. When the holy man saw this, he took a lance in his hand and killed his sister and her son, for he was Satan's son, as well as her husband and his father, for they were sorcerers.[13]

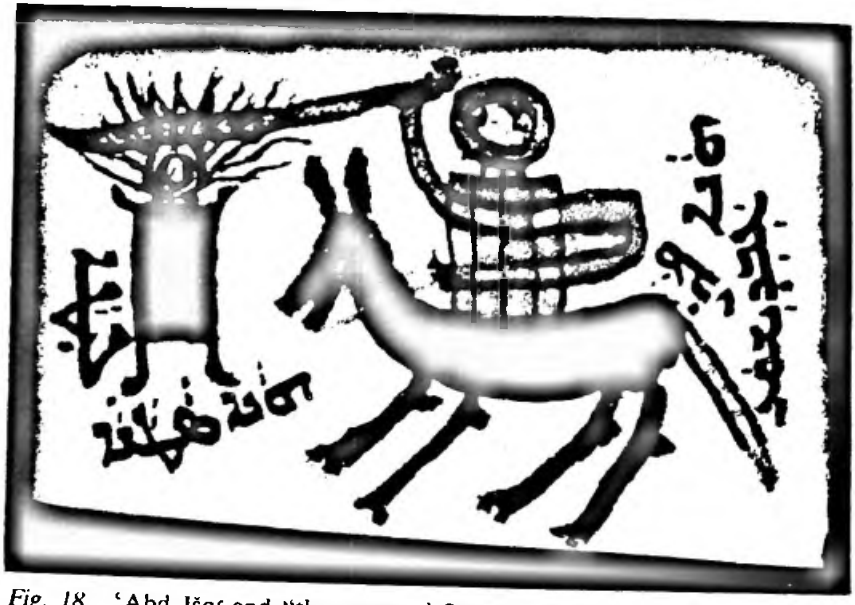

Fig. 18. ʿAbd-Išoʿ and "the accursed Satan", who wears the "likeness of a hateful woman of dark appearance". From a Syriac book of magic (Gollancz 1912)

[13] Cf. Basset 1922, pp. 336 ff., particularly p. 337. Quoted in Winkler 1931, pp. 129 f., where further references are given for the Ethiopian version based on the Coptic.

It is clear that a modified version of our story is given as part of the biography of this martyr; it has indeed become a standard element in the hagiography connected with St. Sisinnius.[14] Other reflections of the same motif are found in the various Arabic Islamic charms connected with the figure of Qarīna al-Tābʿia, Umm al-Ṣibyān,[15] and discussed at length by Winkler 1931; as well as in the late Syriac figure of *emmā ḥanoqṭā d-ṭalyē* "the mother who is a strangler of children" (Gollancz 1912, pp. 60–65), represented in the manuscripts as being killed by ʿAbd-Išōʿ: she is "the evil spirit in the likeness of a hateful woman of dark appearance" (see Fig. 18).

It may be remarked that we seem to have a late Jewish echo of this motif in the trio of magical names which are used to protect a woman at childbirth and a new-born baby: instead of סוני וסוסוני וסניגלי we have in late Jewish magic סנוי וסנסנוי וסמנגלף. The suggestion that these names are connected with Sisinnius has already been made by Moses Gaster;[16] the story in which these names occur in *Alphabetum Siracidis*,[17] is close enough to our own so as to suggest literary dependence. A typical late Jewish amulet in which the same story is used may be given in its outline as an indication for the survival of this motif in Jewish magic (see Shachar 1971, No. 3;[18] reproduced here in Fig. 19): Elijah,

[14] Cf. e.g. *Bibliotheca sanctorum*, XI, col. 1246 f.

[15] The corresponding Hebrew term אם התינוקות occurs in the Geniza fragment ENA 3381, f. 8.

[16] Gaster 1900, pp. 155 ff. (=1928, pp. 1031 ff.). Cf. also Trachtenberg 1961, pp. 101 f., where an amulet for the protection of mother and child during childbirth using these names is given in the frontispiece; also in Schrire 1966, p. 118.

[17] Fol. 23a, quoted in English by Gaster, ibid. Lilith in this story is depicted as a witch whose task is to destroy little babies; she is chased into the sea, and promises to desist from harming children if the names of the three angels are used on an amulet. Other elements in *Alphabetum Siriacidis* diverge from our base story.

[18] See also Shachar 1971, Nos. 2 and 4. The same story occurs also in Montgomery 1913, pp. 258 ff., from notes made earlier by Richard Gottheil. The provenance of that amulet is uncertain, but there can be no doubt that it is not part of the Nippur excavation material, despite Montgomery's wavering on this point. The language and style are clearly late medieval or modern (Scholem 1948, p. 166, n. 25). Montgomery's text seems to come from an area where Spanish was used. The name of the young mother to whose house Lilith goes may be read as Mercada who is known as (ד״מ is probably for דמחקריא) Vida (?), daughter of Donna. The first line should be read סנוי סנסנוי סמנגלף אדם וחוה קדמונה חוץ לילית as in other amulets of this kind. A very similar text is in M. Gaster 1900, p. 149 (=1928, p. 1025).

walking on the road, met Lilith and her companions and said to her: "You and your companions are impure, where are you going?" She said: "I am going to the house of X daughter of Y, the woman in childbirth, to kill her and take away her son, to drink his blood, to suck the marrow of his bones and to eat his flesh". Elijah put a ban on Lilith, but she asked him to release her and in exchange she promised not to harm that woman and her son wherever the names of Lilith which are enumerated[19] are mentioned. This amulet as usual carries the names of the three angels סינוי וסנסנוי וסנמנגלוף, after the regular heading אדם וחוה חוץ לילית חוה ראשונה.[20]

Fig. 19. A Jewish amulet printed in Germany in the 18th century. From Shachar 1971, No. 3

[19] Some of the names of Lilith in this text and in Montgomery 1913, pp. 285 ff. can be identified with the names in the Greek and other versions: אמורפו is evidently Morphous, שטריחה may be Striga. It may be noted that among the names of the demoness in the Greek text of Allatius (see Winkler 1931, p. 109) we have Pelagia, reminiscent of our "Pelagos, the great sea".

[20] For a psychoanalytical discussion of these stories see Hurwitz 1980.

The general outline of the probable development of the versions we have discussed may be set forth as follows. An early Palestinian Aramaic version of the story of Smamit, Sideros (=iron) and the three helpers of the childbearing woman survives in Amulet 15. This version of the story is marked by the presence of the Greek term *sideros*. This may suggest the existence of a Greek story on which the Aramaic formulation was based, but such a conclusion is not strictly obligatory. A similar Palestinian Aramaic text found its way to Mesopotamia and was copied in Bowls 12a and 12b (possibly also in Gordon 1941, p. 346), where a number of corruptions and perhaps some Babylonian linguistic features were introduced into the text. The Palestinian Aramaic story gave rise to several Christian Oriental versions, the common feature of which is the fact that the helpers assume the shape of Christian saints. The bereaved mother in these versions is a woman related to the helpers. At least one of the Christian versions (the Ethiopian one) used an

Fig. 20. A fresco at Bawit, Egypt. From Perdrizet 1922

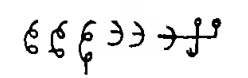
Aramaic or Hebrew text, where the Greek name Sideros was replaced by its Semitic equivalent. A parallel Jewish and Christian legend existed, in which the role of the helper is essentially fulfilled by the Prophet Elijah or by the Archangel Michael,[21] who are secondarily identified with the phonetic equivalents of **swny**: Sanoy (etc.) on the Jewish side, Sisinios (etc.) in the Greek tradition. There seems to be a tendency in the Christian tradition to conflate this helper figure with St. George.[22] The evil agent is Iron in the early Greek-Aramaic form of the story, but this was largely forgotten in the later versions, where the evil power is a female figure, Gyllou in Greek and the dependent versions, Lilith in the Jewish tradition. Iron only stays on as a reminiscence, in the name *Barzelya/Werzelya, and in the various practices using iron in connection with child birth.[23] Many versions retain the sea as the place where the demon is vanquished. A constant feature of most forms of the story is the promise made by the evil power that wherever the name of the helpers (later coupled with those of the evil figure) should be invoked, no harm would befall the woman in child-birth and her new-born baby, on whose behalf the amulet is being prepared.

Perdrizet 1922, pp. 13 ff. tried to develop the thesis that the origin of the Coptic and Greek legend is Parthian, adducing the name Sisinnius, which was also the name of Mani's famous disciple, and the Parthian costume of this figure in the Fresco at Bawit in Egypt (Fig. 20). The

[21] See Reitzenstein 1904, pp. 298 f. (Winkler 1931, p. 112), where the Archangel Michael, who is the helper, is also identified with Sisinios and Sinodoros. In Winkler 1931, p. 111, the helper is Gabriel.

[22] Cf. Viaud 1928, p. 112, who uses Perdrizet 1922.

[23] The use of iron for the protection of a woman at child-birth is very widespread. The earliest attestation in Jewish literature seems to be in Tosefta Shabbat 7:4 והקושר ברזל בכרעי המיטה של חיה ... הרי זה מדרכי האמרי; see Lieberman 1961/2, p. 84. See further Blau 1898, pp. 159 f. For ethnological data on the Jews of Afghanistan Brauer 1944, p. 337; on Jewish practice in Karlsruhe, Scheftelowitz 1920, p. 77. In nineteenth-century Poland iron was used for the protection of women at child-birth with the explanation that Heb. *barzel* represented the initial letters of Bilha, Rachel, Zilpa and Lea (*Jahrbuch für jüd. Volkskunde*, I, 1923, p. 217; Trachtenberg 1939, p. 313, n. 14). We have information about the magic use of iron in child-birth, e.g. among Armenians (Hambroer 1962, pp. 32 ff., 105 ff.) and among Arabs in Morocco (Westermarck 1926, index s.v. iron, steel). On the efficacy of iron against demons in general see Abt 1908, pp. 159 f., where further literature is given; Doutté 1908, pp. 41 ff.; Goldziher 1907; and Trachtenberg 1939, p. 160.



name Sisinnius, as can be seen from our Aramaic material, is not original, and the Parthian costume in a pictorial representation may indicate nothing more than that an Oriental figure is intended. The theory of the Manichaean affiliation of the story (see M. Gaster 1928, pp. 1252 ff.; Winkler 1931, p. 123) can also be safely disposed of. Even without the evidence of the Aramaic text the Manichaean connection might have seemed too tenuous, but it is now clear that Sisinnius has nothing to do with the original form of the story, and that this name is merely a transformation of the mysterious names **swny**, **swswny** and **snygly**.

II. Incantation Bowls from Mesopotamia

Bowl 1

Syriac

Bowl 1

Translation

(1–2) [Appointed is this bowl for the sealing and guarding] of the house, dwelling [and body of Ḥuna son of Kupitay, that there should go out from him the tormentors, evil dreams, [curses,] vows, spells, (3) [magic practices, devils,] demons, liliths, encroachments and terrors. The secret of heaven is buried in heaven, and the secret of the e[arth] is (4) b[uried in the ear]th. I say the secret of this house against all that there is in it: against devils, demons, spells, (5) magic practices, all the messengers of idolatry, all troops, charms, goddesses, all the mighty devils, (6) all the mighty Satans, all the mighty liliths. I tell you this word. He who accepts it, finds goodness, and he who is bad (and) does not accept (7) the mystery words, angels of wrath come against him, and sabres and swords stand before him and kill him. Fire surrounds him, and flame comes against him. (8) Whoever listens to the word sits in the house, eats and feeds, drinks and pours drink, rejoices and causes joy, he is a brother to brethren and a friend to the dwellers of the house, he is a companion of children (9) and is called educator, he is an associate of cattle and is called good fortune. Accept peace from your Father who is in heaven and sevenfold peace from male gods and from female (10) goddesses. He who makes peace wins the suit. He who causes destruction is burnt in fire *(magic characters).*

Seal[ed and guar]ded shall be the house, dwelling, and body of Ḥuna son of Kupitay, (11) and there shall go out from him the tormentors, evil dreams, curses, vows, spells, magic practices, devils, demons, liliths, encroachments and terrors. His sickness shall be pressed down, and a wall (12) of pure steel shall surround Ḥuna son of Kupitay. The sickness, devil and demon of Ḥuna son of Kupitay shall be pressed down (13) and he will be guarded by night and by day. Amen.

The interest of this new find is in the fact that it constitutes a welcome addition to a small group of bowls in Syriac which carry basically the same text. Since none of the bowls gives an unequivocally clear reading of the whole incantation, and since the text contains several problems, a new version helps to elucidate and sometimes to confirm earlier hypotheses. The texts parallel to our new bowl are the following:

1 A text read by T. Ellis in Layard 1853, pp. 443 f., No. 6. The bowl is now in the British Museum, B.M. 91712 (cf. Hamilton 1971, No. 10).

2 A bowl from Nippur at the University Museum of the University of Pennsylvania, published by Montgomery 1913, pp. 242 ff., No. 37 (cf. Hamilton 1971, No. 9).
These two texts benefited from the insights and comments of Epstein 1922, pp. 56 ff., who discovered their similarity, and managed, by comparing them to each other, to restore much of the mutilated text and to elucidate the meaning of the fragmentary formulae.

3 A bowl at the Iraq Museum (No. 44107), first published by Teixidor 1962. Teixidor did not notice the connection between this text and the previously published ones, and his reading was therefore somewhat fragmentary. The identification of the similarity is due to Hamilton 1971, No. 14, who offered some improvements to Teixidor's readings.

We have re-checked the British Museum bowl by the aid of a photograph, and having at our disposal our new text, we believe it is possible in some points to complete and correct Epstein's readings and reconstructions, which are on the whole confirmed by this text. The state of preservation of our bowl is good enough to make an almost continuous reading possible, apart from the opening words, which are illegible. Whereas our new text and Montgomery No. 37 are written in proto-Manichean characters,[1] Ellis 6 and Teixidor's bowl (as well as our Bowl 10) are written in Estrangelo.

The text begins in the centre and goes, by spirals, towards the circumference. This is, with some exceptions, the normal practice in the

[1] See Lidzbarski 1916; Teixidor 1962, pp. 61f.

magic bowls. On our bowl the two opening lines are so faint as to be largely illegible. They can, however, be reconstructed by comparing the similar formula in lines 10–11, and the opening phrases of such other Syriac texts as Montgomery 1913, Nos. 31, 32 and 35. The three parallel texts, Ellis 6, Montgomery 37, and Iraq Museum 44107, are all too defective at the beginning to be of any help.

3 The two words, **qrwby' wsrwdt'**, obviously denoting evil spirits, are also attested in line 11. The Syriac word *qrūḇyā* means "approach, attack, accusation", a cognate of *qrāḇā* "war", and could possibly serve as the proper name of a demon. No form corresponding to **srwdt'** is attested in Syriac, but Jewish Aramaic provides it in Gaster 1896, p. XII:35. The verb **SRD** "to fear" and the noun *sūrādā* "terror" are, however, familiar in Syriac, and occur in a magic text published by Hamilton 1971 (20:8): **nytsrwd bswrd' dl'lm** "may he be struck by eternal terror". **swrd'** occurs more than once in the charms published from Syriac manuscripts by Gollancz 1898. Thus we have, for example, the sequence ...**wdḥlt' wzw't' wrtyt' wtwht' wswrd' wrny'**...(p. 79) "...fear and trembling, terror and surprise, dread and anxiety..." (a similar sequence on p. 86). Derivatives of the same verb occur also in Mandaic, although the verb "to fear" in Mandaic, affected by both a metathesis and an enlargement by **-n-**, is **SNDR** (Drower and Macuch, p. 334a, where however the etymological references to Jewish Aramaic and Modern Syriac words meaning "sieve" seem out of place). The causative verb in Mandaic has the form **SRWD** (like the reflexive verb in the Syriac text of Hamilton 1971, quoted above; cf. Drower and Macuch, p. 337a, where the reference to **SRD** as an "inversion of **SDR** II" is not clear, since **SRD** is the basic form of the verb, as it is indeed presented on p. 334a). A Mandaic noun which is very close to our own is **saruadta**, translated by Drower and Macuch as "(a) fright, alarm (esp. nightmare), terror, (b) loneliness" (p. 315). The examples given there support a somewhat different translation. The phrase **saruadta ḏ-'umama** indicates "terror of the day time", perhaps personified, as opposed to **sahria ḏ-lilia** "night-demons", and the phrase **bsibuth usaruadth timut** need not compel us to introduce a new meaning "loneliness" for the word. It can perfectly well be rendered "she will die in her old age and in her fright". The plural feminine form **saruata** indicates a class of demons associated with ruins and destruction (cf. Drower and Macuch, p. 315b). Cf. also Bowl 13:13.

3–4 The phrase רז שמיא בשמיא קביר ורז ארעא בארעא קביר was reconstructed by Epstein 1922 for Montgomery No. 37, and it is gratifying to have it fully confirmed by our bowl.

4 From this point Epstein managed, by comparing the two bowls with each other, to make an almost complete reconstruction of their text. Our bowl is very close to Montgomery's text, offering only minor variations, which will be noted below. For **ʾʾmr** Montgomery has **ʾymr**.

5 On the basis of our text it is possible to suggest in Montgomery, line 5, to complete **[wʿl kl ʾzgndʾ]** (6) **dptkrwtʾ**.

6 **ptgmʾ hdyn**: Epstein conjectured in Montgomery 37:7 **pytgʾmʾ syt[rʾ]**, which Hamilton read **pytgʾmʾ hnʾ**. The correct reading of Montgomery 37:7 seems to be, like here (though in *plene* spelling), **pytgʾmʾ hydy[n]**, with the demonstrative written exactly as in Montgomery 37:5 **[r]ʾzh dbytʾ hydyn**.[2] It may be noted that the demonstrative **hdyn** is not usually recorded in Syriac texts; it is a form which is normal in Jewish-Aramaic (cf. Epstein 1960, p. 23; Rossell 1953, p. 27).[3] This may suggest that our present text is based on a Jewish-Aramaic version; see also **ytwh**.

mḥwʾ has a mark above the word to indicate the participle. In Montgomery 37:7 and in Iraq Mus. 44107:2 the form is **mḥwynʾ**.

dmqbyl yʾtwh: For the first word Montgomery has **dmqbl**. For **yʾtwh** both Ellis 6 and Montgomery 37 have **yʾth**. The accusative particle is quite unusual in Syriac, and is characteristic rather of the Jewish Aramaic texts. For the particle with pronominal suffixes, one can note a wavering in Jewish Aramaic between a singular-type declension and a plural one. For the singular cf. e.g. **yʾtky** (Gordon 1934a, p. 141, line 6); **ytyh** (Montgomery 3:7, 9); **ytkwn** (Montgomery 15:7); for the plural-type declension cf. **ytyky** (Gordon 1934c, p. 469, G:5; Montgomery 17:3). The variation **yʾth** as against **yʾtwh** demonstrates the two forms of treatment of the particle. It seems strange, though, to see a plural mark (*seyāmē*) over **yʾtwh**.

[2] There is an error in Hamilton's edition and translation of this line. **hdyn** occurs in Bowl 10:13, cf. Commentary to Bowl 10:7.

[3] In Babylonian Jewish Aramaic **hydyn** is used only for the interrogative "which one"; see Epstein 1960, pp. 29 f.

dmqbyl y'twh ṭbt' mškḥ wdbyš l' mqbyl: The B.M. text, Ellis 6, provides the clue to the puzzling sentence. Ellis 6:5 should read: **[d]mqbyl y'th ṭbt' mškḥ wdbyš wl' m(q)[byl]**. The phrase **l' mqbyl** is thus an apposition to **wdbyš**.

7 **mÏ' rž'**: This is also the obvious reconstruction of the text in Montgomery 37: **[m]l' r'z'** (or **r'zy**), rather than **'r'zy**. *Mellē rāzē* is used here in the sense of incantations.

wsyp' wḥrb': The correct reading in Montgomery 37 seems to be the same as here. Montgomery read the first word **wdsyp'**; Epstein preferred to read **[b]syp'**. The two nouns are best taken as standing in juxtaposition to **wml'k' rwgz'**.

wqdmwhy: See Epstein 1922, p. 56, where it may be seen that Montgomery's text has **qdmwh**, while Ellis has **wqd[m]why**.

nwr' ḥdrh lh "fire surrounds him": **ḤDR** is used with other prepositions, **ḥdr b-** "to retract" and **ḥdr 'l** "to return" (cf. Levine 1970, p. 350). In our text, line 11, the same verb occurs with a direct object in the sense of "to encircle".

8 **šm'** is written here, corresponding to Montgomery **šm'**, which is equally wrong. The Iraq Museum text has the correct form, **šm'**. The correspondence between our new text and Montgomery No. 37, here and elsewhere, shows that they both were copied from the same source.

wytyb bbyt': The initial *waw*, which does not exist in Montgomery and Ellis, is our scribe's mistake.

'ḥ' l'ḧ' nhw': Ellis 6 and the Iraq Museum text have here **'ḥ' l'nš' hw'**. One other case in which Ellis and the Iraq Museum text join together against the reading of Montgomery and of our new text is in the preceding line, where they have **wšlhbyt' npl' 'lwhy** (according to Iraq Mus.; Ellis has minor variations and a dittography), against **wšlhbyt' 'tyh 'lwh** (according to our text; Montgomery has minor variations). **nhw'** has a diacritic sign which marks it as a participle, perhaps to indicate that it is used for the present tense.

9 **wmrwby'**: This seems to be a copyist's error for **wmrwbyn'** attested in Montgomery 37. Ellis and Iraq Mus. spell the word **wmrbyn'** (cf. Hamilton 1971, p. 55). The correct identification of this word was made by Epstein.

ṣwt' lbyr' hw': This phrase is still puzzling. It is written in this manner in Montgomery 37 and in Iraq Mus. 44107, where it would have the sense of "he is an associate of cattle" (**byr'** for *bʿīrā*), which seems

curious. In Ellis the text shows in effect **lgld**³ (or **lglr**³), which Epstein, followed by Hamilton, read **lgʿr**³, assuming a corruption **bʿr**³ > **gʿr**³. It is possible to consider a variant form of *būrā* "uncultivated, simple, stupid", which might correspond to *gʿīrā* "hateful, hideous", although one can hardly account for the sense obtained "he is an associate of the hateful, ignorant". An argument in favour of this interpretation, however, is the fact that it comes parallel to the preceding phrase, which states that he is "a friend of children and is called an educator". Here he may be termed "a companion of the simple-minded (or of those excluded), and is called good luck", possibly some kind of auspicious magical situation.

wgd³ **ṭb**³ **mtqr**³: The scribe of Montgomery 37 omitted the word **ṭb**³.

šlm³ **qbylw mn** ³**bwkwn dbšmy**³: Epstein's reconstruction of Montgomery's text is unacceptable. He read it **šlm[**³ **mn] bl** ³**bwkwn**. It would seem more plausible to reconstruct there too **šlm[**³ **q]b[y]l[w]**, and to assume that **mn** was omitted by a scribal error. The same text may underlie the letters preserved in the Iraq Museum bowl. Ellis 6 has a completely different version at this point.

wšb³ **[š]lm**³: Epstein followed the word **dbšmy**³ by a reconstructed **[w**³**r](**ʿ**)**³. However, it seems more reasonable to reconstruct for Montgomery 37 the same phrase which occurs in our text. Indeed, the traces visible allow very well to reconstruct **[wš](b)**³. The same applies to the text of the Iraq Museum. It reads **wšb**ʿ³ **w[. . .]šlm**³.

dmšw³ **šlm**³ **zk**³ **bdyn**³: Epstein's correct reading is re-confirmed by our text, in addition to the support brought by the Iraq Museum bowl. The initial letter is undoubtedly **d-**, as in Teixidor 1962.

wdmšw³ **ḥbyl**³ **mtql**³ **bnwr**³: As the verb was not visible in Montgomery's text, Epstein had to invent one, and he chose **mtyqyd**. The Iraq Museum bowl and the new Jerusalem text concur in using the verb **QLY**, which should of course also be reconstructed in Montgomery 37. Teixidor's reading (followed by Hamilton) of the Iraq Museum text should be corrected as follows: **wdmšw**³ **ḥbl**³ **mytql**³ **bnwr**³.

10–12 The closing formula does not occur in the parallel texts, just as the Iraq Museum bowl closes with a formula which does not occur elsewhere. The formula of our text has corresponding texts in other magical bowls, such as Montgomery Nos. 31–35.

The client of this bowl is Ḥuna bar Kupitay. The name Kupitay occurs also in some other texts, cf. Montgomery Nos. 2, 4, 12, 16.

11 The spelling **mb'd'** for **m'bd'** is another instance for the weakening of the *'ayin*; cf. above **šm'** in line 8 and **šb'** in line 9.

kwrḥn': This word is written here twice with a *ḥet*, though it occurs with a *he* in Montgomery 7:11 (in Jewish Aramaic). Syriac has normally only the spelling with a *he*.

11–12 **wnḥdrh šwr' d'dms' dky'**: The reading is quite clear and unequivocal. **'dms'** is a loanword from the Greek ἀδάμας which consists of a privative α- with a derivative of the verb δαμάω "to conquer". The Greek word thus means "unconquerable" and designates the hardest substances: steel or diamond.[4] The word occurs also in Syriac (cf. Brockelmann, *Lex. Syr.*, s.v. **'d'mws**), and in Mandaic, where the phrase **šura ḏ-dmasa** is attested several times (Drower and Macuch, p. 111b). The word is also found in Persian and Arabic *almās* in the sense of "diamond", and in Manichean Middle Persian under the form **'rm's** for "steel" (cf. Nöldeke 1892, p. 44; Bailey 1943, p. 134).[5] It can be shown that **'dms'**, **'rms'** does indeed refer to some metal by comparing the parallel phrase in Montgomery No. 4:6 (in Jewish Aramaic): **wšwr' rb' dnḥš' 'ḥdryt lh** "and I have surrounded it with a great wall of bronze".

The same word, **'dms'**, occurs, we believe, in three other Jewish incantations, where it has not been recognized. The texts in question are Montgomery 2 and 27, and Gordon 1941, p. 273 (11:3). Montgomery 2 and 27 were re-studied by Epstein 1921, pp. 30 f.; his reading and translation are quoted and amplified by Levine 1971, pp. 361 f. as follows:

> תוב אזלנא אנא פ' בר פ' בחילי דנפשי בקומתי גציצא דפרזלא קרקפתי דפרזלא קומת דנורא דכיא ולבישנא לבושא דארמסא דכיא וממללא
>
> "Again I come, I, X. son of Y., with my own might. On my body are arms (or hands) of iron, a head of iron, a body of pure fire. I don the pure-white and simmering robe of Hermes".[6]

[4] For the occurrence of *Adama* and its derivative in Greek magic cf. Peterson 1926b, p. 393.

[5] A striking parallel is found in a Manichean magic text in Middle Persian, where we have: **'wm šfšyr 'wd [cy]l'n 'y hswd 'y 'rm's [ʔ]y p'k pyr'mwn 'wb'yyd** (Henning 1947, p. 40, lines 32–34) "I am girt with a whetted sword and a dagger of pure adamant".

[6] Epstein did not commit himself on the word which was read by Montgomery as **'rms'**. The warlike character of such magical operations recalls the similar motif in the Chaldaean Oracles; cf. Lewy 1978, pp. 194 f.

The text of Gordon 1941, p. 273 (No. 11) is basically the same, though somewhat shorter.[7] However, although the name Hermes does occur on incantation bowls,[8] it is most unlikely that it occurs here. **ʾdmsʾ** "steel" is clearly the preferable reading, giving the translation "a robe of pure steel", which goes along with other indications of iron and fire. In Gordon 1941, p. 273, we might read not **lbwšʾ dʾrmys wddbyh**, but rather **lbwšʾ dʾdmwsʾ dkyh**.[9]

Another point worth examining is the adjective **mmllʾ**. Levine suggested the translation "simmering", as of coals, but this seems doubtful. One might rather seek the explanation in the Mandaic phrase **parzla nimalil ʿlḥ**, probably to be translated "iron will crush him" (cf. Drower and Macuch p. 273b, s.v. MLL III). Hebrew MLL also has the sense "to crush, squeeze" (cf. Jastrow s.v.). **ʾdmsʾ dkyʾ wmmllʾ** could therefore very well mean "pure, crushed (=forged) steel".[10]

Montgomery 19:7 was corrected by Epstein 1921, p. 49, to read **wbšwm mryʾ mlylʾ wmʾmlʾ dʾrmsʾ**. However, an examination of two unpublished parallel texts (University Museum of the University of Pennsylvania, both bearing the number 18059), shows that the correct reading is **mryʾ klylʾ wmgdlʾ dʾrmsʾ**.

[*Addendum*: When the book was in the press we noticed the article by Harviainen 1978, which had escaped our attention before. It contains in Estrangelo script another parallel text to our Bowl 1. The parallel to our text goes as far as our line 10, with no significant deviations, and it confirms the restorations proposed above.]

[7] We must recall that Gordon was probably unaware of Epstein's insights on this text.

[8] The one safe example is Montgomery 7:8, which is the equivalent of Myhrman 1909, p. 346, line 4. The correspondence established by Montgomery is: **ʾyrmys=hrmys**. On Hermes in Jewish writings cf. also Lieberman 1947, pp. 53 f.; Milik 1976, p. 336, follows Montgomery's wrong interpretation.

[9] In Montgomery 25:4 [**ʾr**]**msh myṯṯrwn** is not entirely certain.

[10] It seems possible that **mmlln**ʾ occurs also in the sense of "pure", at least in the phrase **pwrdysʾ mmlln**ʾ, Black 1954, fol. 72b (cf. p. 61: "Paradise of the Word", which seems inadequate). The interpretation of **mmll**ʾ as meaning "crushed, forged" does not exclude the much more common usage of the word in the sense of "speaking, talking", as in Jeruzalmi 1963, p. 115; Isbell 1976, p. 23, where we have **mlkh mmll brʾzy pryšt**ʾ; **mlk mmlyl brzy pryšt**ʾ; cf. our Amulet 3:3.

Fig. 21. A Jewish amulet printed in Warsaw in 1867

Bowl 2

The Hebrew University of Jerusalem, Institute of Archaeology, No. 1401

Plates 16–17

Inside the bowl:

(1) (ליט ....) הפיכי (הפיכא הפיכא) (2) הפיכא הפיכא הפיכא הפיכא ארעא (3) וי(שמ)יא הפיכי כוכבי ומזלי הפיכא שעתא דכול בני אינשא (4) הפיכא לוטתא דימא ויברתה דכלתא ויחמתה הפיכא לוטתא דגברי וינשי (5) דקימין בדברא ויבמתא ויבטורא ובית אילהי ובית כנישתא אסירא ויחתימא לוט(6)תא דלטת בישום ביתיאל ויקותיאל ובישמיה דיי רבא מלאכה דיחליה חדעסר שמין ססכבא (7) ככבא כנברא[1] סדיא סודאריא מדיריא אנקפא אנס[2] פספס כביבי בנורא כול מן דעבר על הלין שמהתא (8) מלאבי אילין אסירין ויחתימין כול שידין ושופטין וכול דלרעא קריא וכול דלישמיא מציתא שמעית קל ארעה שמיה (9) דימקבלא כול נישמתא מין הדין עלמא שמעית קלה דיתתא דלטת ושדרית עלה מלאכין נכיר נכיר יי נקום ניקמת יי נגיל ונגיל יי כיסס צצץ טימא יתיחתא דלטת ושדרו וחבילו יתה מין ענין דבר(ת)א[3] דלא תיקום ולא תילוט

Outside:

(10) דכיא בר קיימתא וימחלפא בר (דויד) ושרכה (בר) אלי(ש)תא[4]

(10a) (א) דכיא בק[5]

(11) מרים בת חורן

[1] An alternative reading could be kkbr'.

[2] An alternative reading could be 'ks.

[3] This word is seemingly written dbrd'.

[4] Another possible reading is ḫlypt'.

[5] This looks like being the first attempt to write the name, abandoned because of a mistake, and re-done subsequently above.

Bowl 2

Translation

Inside:
(1) (Cursed [?] ...) Overturned, (overturned, overturned,) (2) overturned, overturned, overturned, overturned is the earth (3) and heaven, overturned are the stars and the planets, overturned is the talk of all the people, (4) overturned is the curse of the mother and of the daughter, of the daughter-in-law and of the mother-in-law, overturned is the curse of men and women (5) who stand in the open field and in the village, and on the mountain and the temple(s) and the synagogue(s). Bound and sealed is the cur(6)se which she made. In the name of Betiel and Yequtiel, and in the name of yyy the Great, the angel,[6] who has eleven names: **sskbʾ**, (7) **kbbʾ**, **knbrʾ**, **sdyʾ**, **swdʾryʾ**, **mryryʾ**, **ʾnqpʾ**, **ʾns**, **psps**, **kbyby**, **bnwrʾ**. Whoever transgresses against those names, (8) these angels, bound and sealed are all demons and evil spirits. All that is of the earth calls, and all that is of the heaven obeys.

I heard the voice of the earth, [and of] the heaven (9) which receives all soul(s) from this world. I heard the voice of the woman who cursed, and sent against her the angels **nkyr nkyr**, yy take vengeance, yy let us rejoice and rejoice, yy **kyss ṣṣṣ ṭymʾ** the woman who cursed. And they sent and injured her (away) from the eyes of the daughter, that she may not avenge nor curse.

Outside:
(10) Dakyā son of Qayyamtā and Maḥlepā son of (David?) and Šarkā daughter of Ališţā (?)
(11) Miriam, daughter of Ḥoran

[6] Or possibly "his angel".

The text starts at the centre, where a circle is drawn, and runs in spirals towards the circumference. Near the rim of the bowl a large circle surrounds the text. No client's name is contained in the text of the incantation, but such names occur, quite unusually, on the outer surface of the bowl.

The text has a number of parallels, both complete and partial. These are as follows:

1 B.M. 91720 = Layard 1853, pp. 438-440 (Ellis 2). Layard does not contain a drawing, but we have been able to use a photograph kindly provided by the British Museum authorities to check the readings. The portion of this text which provides a parallel to the Jerusalem bowl begins at the fifth line.

2 B.M. 91727 = Layard 1853, pp. 440-441 (Ellis 3). This text has been re-edited by Schwab 1890, pp. 306-310 (Text B), and by Jeruzalmi 1963, pp. 52–63, and it has been incorporated into Isbell 1975, pp. 131-133 (Text 58). Again we have been able to consult a photograph of this bowl. The text which corresponds to the Jerusalem bowl begins at line 5.

3 B.M. 91745. Portions of this text were published by Gordon 1941, pp. 339-341, without photograph or drawing. The same text had been published without indication of its present location by Schwab 1892, pp. 139-142 (Bowl G), but Gordon did not notice that Schwab's text was the same as B.M. 91745, which he re-edited. A reader would not notice this identity by comparing the two editions, which are quite divergent, unless he had the benefit of a photograph, as we did. Only by collating the two editions with the photograph of B.M. 91745 can one conclude, with a high degree of certainty, that both scholars worked on the same original. Yamauchi 1965, when he studied parallels to his text (cf. No. 5 below), treated the versions provided by Schwab and Gordon as if they constituted two different texts. It may be noted that in several cases Schwab's readings are better than Gordon's, a tribute to that pioneer in the research of magic bowls.

4 Iraq Museum 9726, studied by Gordon 1941, pp. 348-349. Only a partial reading and translation is given, and no photograph or hand-copy.

5 A private bowl in the possession of Mr. E. Safani, published by Yamauchi 1965. From line 3 we have parallels to our Jerusalem bowl, but the second half of Yamauchi's text is again divergent.

The bowls enumerated 3 and 4 begin, like the Jerusalem text, with the word *hafīḳā* repeated several times, while the other parallels have a longer introductory text.

The text contains a number of formulaic elements which recur in other bowls. It may be convenient to list them:
(a) The formula: **hpyk' hpyk'** ... with a list of (negative) objects to be reversed, especially the curses of relatives and other men and women.
(b) An invocation of angels, in particular a group of eleven names which constitute the person of **yyy** the Great.
(c) The formula which asserts the efficacy of the invocation: "All that is of the earth calls, and all that is of the heaven obeys".

All three elements recur in the parallel texts (=PT) 2, 3 and possibly also 5, where element (c) is not visible. The same may be true of PT 1, where the third element is missing, and of PT 4, of which only a portion is given by Gordon.

Some particular features of our bowl may be indicated. The spelling **wy-** for the conjunction, **by-** and **ly-** for the prepositions, and **dy-** for the relative particle are frequent in this text. Rossell 1953, p. 21, refers to the spelling **wy-** indicating that it occurs before a vowelless consonant. This is not true either of the Jerusalem bowl (cf. **wybrth, wyḥmth, wynšy,** etc.), or of Montgomery No. 1 (see Epstein 1921, p. 29). The same is to be said of **by-** for the preposition **b-**, cf. **byšwm**. Similarly in Montgomery 2:7 we have **byptkry** (assuming that the first syllable is *pat-*).

The elision of an initial *alef* following a prefixed element also characterizes this text: cf. **dym'** (=*d-'immā*), **dytlyh** (=*d-'īṯ lēh*), etc.

There is a seemingly careless alternation of *alef* and *he* in final position for the *status emphaticus,* but it may be, at least in some of the cases, a conscious use of the possessive suffix of the third person singular feminine: **lwṭt' dym' wbrth dklt' wyḥmth** (line 4) "the curse of the mother and her daughter, of the daughter-in-law and her mother-in-law", although in the parallel versions all these nouns end with *alef.* At the same time we also have the interchange of **dlr'', dlyšmy'**, as against **'r'h, šmyh,** with no apparent difference in function.

The spelling of the plural **gbry, nšy** seems an East Aramaic feature, while the use of the preposition **yt** for the accusative is more typical of West Aramaic; cf. Rossell 1953, pp. 11, 37; Tal 1975, pp. 28–30 (see also above, Commentary to Bowl 1:6).

2–3 In PT 4 the formula, as read by Gordon, is: **'wpykh {'r'} 'r'h**

hwpyk› šyd›, where in view of all the parallel versions, the last word is likely to be a wrong reading for **šmy›**.

3 The word **š‹t›** in our text corresponds to **š‹wt›** in PT 3 (B.M. 91745, correctly read by Schwab, but wrongly read by Gordon as **bw‹wt›**),[7] and to **š‹whwn** (for **š‹w‹t›hwn**) in PT 2 (B.M. 91727). The translation as given by Schwab "que la [mauvaise] heure soit renversée" was followed by subsequent scholars, but it seems wrong. This is most probably a form of the noun derived from the verb Š‹Y, cf. Bab. Aramaic and Syriac **›št‹y** "to tell, talk". We thus have Syriac *taš‹īṯā* "story", as well as *še‹yā, šu‹āyā* "play, joke", *šū‹īṯā* "story", etc., Mandaic **šuta** (from **š‹wt›**) "talk, speech, conversation".[8] In all the parallel versions of this text we have the sequence **hpyk› š‹(w)t›/š‹w(t)hwn dkl bny ›ynš›** "that the discourse of all the pepole be overturned". This corresponds in PT 4, according to Gordon's copy, to **hwpykh lwṭt› dkl bny ›ynšh.** Nothing like this occurs in PT 5 (Yamauchi's bowl), though the phrase **hpyk› kl myly** can be regarded as conveying the same idea (if it is not to be read **mzly**).[9]

4 **lwṭt› dym› wybrth:** PT 2 has here **lwṭt› d›b› wdym› wdbrt›**, while PT 1, 4 and 5 have a version similar to the one on our bowl, without the father being mentioned.[10] Our version is unique in the distinction it makes between the suffix of *immā* and of *bartāh*, if it is intentional (see above). A similar formula with the possessive suffixes is found in the printed amulet (Warsaw 1867), where we have משביע אני עליכם כל מין עינא בישא ... עינא דאיש ואשתו עינא דאשה ובתה עינא דאשה ואחותה עינא דאשה וקרובתה ...; for the same incantation with minor variants see Hanauer 1907, pp. 318 ff. (see Fig. 21 on p. 133).

5 **dqymyn bdbr› wybmt› wybṭwr›:** A similar sequence occurs in each one of parallel versions, but none is identical. **ṭwr›** and the two following

[7] The correct reading was already suggested by Jeruzalmi 1963, p. 59.

[8] Cf. Drower and Macuch, p. 458. For the Mandaic verb cf. Yamauchi 1967, p. 360 s.v. Š‹.

[9] In a note on the word *millā* as a magic term in Hebrew, Sperber 1966 commented on PT 3 as published by Gordon 1941. The word does not exist there; Schwab read it correctly as **mzly**, the same word that we have in the Jerusalem bowl.

[10] PT 3 reads according to Schwab **hpyk› lyṭt› d›b› wdym›**, and according to Gordon **hpykh lwṭt› d(›b)› wdymh**, while the bowl clearly has **hpykh lwṭt› hd› d›ymh.**

terms are unique to our bowl. On the other hand, we lack here a reference to "near" and "far", which occurs in other versions.

wbyt ʾylhy wbyt knyštʾ: These terms are also unique to our bowl in this formula. Both terms seem to present plural nouns, although the main part of the genitive construction is in the singular. For a similar phenomenon in Syriac one may quote from the Julian Romance: **wpqd dntpṯḥwn byt ptkrʾ wntbnyn ʿlwthwn... wnttqnn byt knwšt**ʾ **dyẅlpn**ʾ **ṯʿy**ʾ **dʿqyr̈n ḥwy wsḥypn** "He ordered that the idol temples be opened and that their altars be constructed ... and that the schools for erroneous doctrines, which had been overthrown and destroyed, be repaired" (Gottheil 1969, pp. 1 f.). The Syriac phenomenon is treated in Nöldeke 1898, pp. 83 f., § 141.

6 **lwṭtʾ dlṭt**: The absence of an explicit subject for the verb may suggest a passive form. What goes against such an assumption is the observation that in PT 2 the form which occurs is a masculine active form: **dlṭ** (line 6), and further **wbpwmh lṭ**ʾ (line 7), apparently in the feminine. Another argument against taking this form as a passive participle is the phrase further down in our bowl: **ṭym**ʾ **ytytt**ʾ **dlṭt** (line 9), where *ītā* seems to be the subject of the verb. The subject, when it is not specified in the texts, could well be a demon, which can of course be either masculine or feminine.

bytyʾ**l wyqwty**ʾ**l**: PT 3 has here **by**ʾ**yty**ʾ**l wyqwty**ʾ**l** though the two names were quite erroneously read by both Schwab (who read **by**ʾ**why**ʾ**l mmnḥyl**) and Gordon (who read ʿ**z**ʾ **wḥy**ʾ**l ḥqyty**ʾ**l**). Yamauchi's text PT 5 seems to have **šdyḥy**ʾ**l wyqty**ʾ**l** (the first word was read by Yamauchi as **ṭšḥy**ʾ**l**). PT 1 has (as correctly read by Ellis) **bty**ʾ**yl wyqtw**ʾ**yl**. There is nothing corresponding to it in PT 2, and Gordon does not quote a similar formula from PT 4 (Iraq Museum).

wbyšmyh dyyy rbʾ **mlʾkh dytlyh ḥdʿsr šmyn**: The corresponding expression in the other bowls has caused considerable trouble to previous editors, and the contribution of our bowl may be said to be chiefly in clarifying this phrase. In PT 2 Ellis read **bšmrwt k**ʾ **mlʾkh**, while Schwab, in a completely different conception of the letters, read here (beginning from the preceeding word) **mn kwl mdynt**ʾ **mlʾkh**. Jeruzalmi greatly improved on his predecessors, but this particular expression was read by him **bšmrytk**ʾ **mlʾkh**. He cannot be blamed for his reading, because the error is obviously the magician's own, who miscopied from his original, where the formula must have been correctly written. The ancient scribe wrote **bšmk ytb**ʾ **mlʾkh**, for the obviously correct **bšmk yy**

rb' ml'kh. Paleographically the mistake is easy to understand. The same mistake was done by the scribe of PT 3: **wbšwm ytb' ml'k' d'yt lyh ḥd 'šr šmht'.**[11] Both scribes may have used a similar original, although PT 2 has the indefinite plural form **šmhn** for PT 3 **šmht'** (our **šmyn**, which has the indefinite masculine plural ending).

One may remark in passing that the process of transmission of the magical formulae was not apparently one of careful copying from a bowl or a notebook, but something like a free adaptation from existing written (or oral) formulae. Hence the great variations even when we deal with a text which is basically the same. In a sense the process of transmission is more like one of oral tradition than in almost any other form of written tradition. At the same time, **ytb'** from **yy rb'** could only come about by erroneous interpretation of written signs.

Once the correct formula is established, it is easy to see that in Yamauchi's bowl (PT 5) we should read **byšmk yy rb' ml'kh,**[12] where Yamauchi read, with hesitation, **ywrb'**. Similarly one recognizes without undue difficulty in PT 1 (Ellis 2) the phrase **wbšmk yrb' rb' ml'k(y)h d'yt lyh ḥd 'šr šmhn,** where the original formula **yyy rb'** "the Great yyy", having given way to a pseudo-word **yrb'**, is reinforced with the epithet **rb'**.[13] Not having the benefit that we possess by our comparison, Ellis read here **wbšmry dk' dk' ml'kh.**

The partial transcriptions which Gordon gives of the Iraq Museum bowl (PT 4) do not contain any correspondence to the phrase under discussion.

6–7 The eleven names of **yyy** *rabbā* have been compared by Yamauchi in the different versions which he possessed. As stated above, he was not aware of the fact that Schwab G is the same text as Gordon's rendering of B.M. 91745, and so the two lines C and D in Yamauchi's table constitute but two transcriptions from the same bowl. On the other

[11] This is the correct reading of the word (with Gordon), against Schwab's **šmwt'**.

[12] Yamauchi transcribes by mistake **ml'k'**.

[13] The recurring Mandaic form of the name is **adunai iurba,** where the first element is sometimes omitted. Cf. Pognon 1898, p. 17 = Yamauchi 1967, p. 154; Pognon, p. 22 = Yamauchi, p. 156 (where the text is **aduna rba**); Pognon, p. 23 = Yamauchi p. 158; Pognon, p. 25; Pognon, p. 73 (**bit iurba**), etc. The name is also quite familiar from literary texts in Mandaic. Cf. Lidzbarski, *Ginza*, p. 258 note 1; Drower and Macuch, p. 191. In Gordon 1934a, p. 141, we have **ywdg' ywdb'**, and the second word may well be identical with **ywrb'**.

hand, there is room to add PT 2 (Ellis 3), which also has a similar list, competently edited by Jeruzalmi, as well as our own new text. The Iraq Museum bowl (PT 4) obviously has also a list of eleven names, but this was not copied by Gordon.

If we take the Jerusalem text as basis for comparison, we may make the following table:

1 **sskbʾ**=PT 2: **ssbbʾ**, PT 5: **ssbʾ**, PT 1: **ssbbh**, PT 3: **qsrbʾ**.
2 **kbbʾ**=PT 2: **kkbʾ** (the third in that list), PT 5: **krbʾ**, PT 1: **kkkʾ** (third in that list), PT 3: **kbkʾ** (third in that list).
3 **knbrʾ**=PT 5: **kbkʾ**, while the other corresponding forms are quoted above, under number 2. In PT 2 No. 4, **bpbbʾ** may be compared here.
4 **sdyʾ**=PT 2: **sryh** (second in that list), PT 5: **mrwh**, PT 1: **sryh** (second in that list), PT 3: **srtyh** (second in that list).
5 **swdʾryʾ**=PT 2: **sydryh**, PT 5: **sw** (?), PT 1: **sydryh**, PT 3: **ʿnyny** (?).
6 **mryryʾ** = PT 2: **hydryʾ**, PT 5: **hʿpnyʾ**, PT 1: **ḥryḥ**, PT 3: **ktyš** (?).[14]
7 **ʾnqpʾ**=PT 2: **ʾnqpʾ** (number 9 in that list, read **ʾrqpʾ** by Jeruzalmi), PT 5: **ktypʾ**, PT 1: **ʾnqpʾ** (number 9 in that list).
8 and 9 **ʾns psps** = PT 2: **ʾlsps** (number 10 in that list), PT5: **hls sš pb**, PT1: **ʾnsps** (number 10 in that list?), PT 3: **nttnt pkrps** (?).[15]
10 and 11 **kbyby bnwrʾ** = PT 2: **bmmr nwryʾ** (read differently by Jeruzalmi), PT 5: **kbybn blwrʾ**, PT 1: **kbyby...**, PT 3: **kbybn bnwr.**

We are left with PT 2 **ʿzryh**[16] (No. 7 in the list) and **btwqpʾ** (No. 8) in PT 3.

Even though this is a somewhat cursory comparison, without a proper textual edition of the different texts involved, one sees that with a fairly small movement of items one comes to a grasp of a list which is more or less identical, though it contains the fluidity of an orally transmitted tradition, as noted above.

7 **kwl mn dʿbr ʿl hlyn šmhtʾ**: The expression occurs in PT 1, and was correctly transliterated and translated by Ellis. The same is true of PT 2, where Ellis read and translated correctly, though Schwab made a wrong

[14] Thus read by Jeruzalmi 1963, p. 62.

[15] These names recall the very frequent **ʾnqtm pstm pspsym** in late Jewish amulets; cf. Shachar 1971, p. 227, and above, Fig. 21 (p. 133).

[16] Jeruzalmi reads this name as **ʿzzyh**.

translation and Jeruzalmi made a mistake both in copying the text, which should read **wlkl dʿbr ʿl hlyn šmhtʾ**, and in its translation, and was followed in this by Isbell. PT 3 has the same phrase, again translated wrongly by Schwab ("à tous ceux qui passent près ces noms") and Gordon ("and each that works [**dʿbd**] by these names"). PT 5 no doubt contains the same phrase, though this was not legible to the editor. PT 4 is not quoted at this point.

As for the expression **ʿbr ʿl** "to transgress", the usage is quite well attested in Mishnaic Hebrew. Cf. B. B. Meṣiʿa 111a: כל הכובש שכר שכיר ועובר על כל שם ושם שיש בו: Tosefta Bava Meṣiʿa 10:8. עובר בה׳ שמות הללו. These contexts demonstrate the meaning of the phrase: "to transgress, to hurt, to injure sacred names", which is somewhat transformed in the rabbinical usage to "to transgress against commandments".

8 **kwl šydyn wšwptyn**: Of the other versions, PT 3 has a more extensive list of demons. It contains the following elements, some of which were not quite accurately read by Schwab, but which Gordon rendered very well: **kl šydyn wšwbṭyn wdywyn wlyṭyn wlylyn wsṭnyn wšqwpyn.** The first two elements are identical in the two versions, despite the variation in the spelling of the second. The spelling with a *pe* occurs in Hyvernat's text.[17] A discussion of the term occurs in Montgomery 1913, p. 92. The parallel versions have different sets of names, or no names at all.

wkwl dlrʿ qryʾ wkwl dlyšmyʾ mṣytʾ: An analogous phrase is found in the various parallel versions. PT 2: **wkl dlʾrʿ qryʾ wkl dlšmyh mṣytʾ** (lines 11 f.); PT 3: **wkl dylʾy dylʾrʿh qry wlyšmyh myṣyt;**[18] PT 1 is too effaced at this point, at least in the photograph, but Ellis managed to read it very nicely (without being able to give an accurate translation): **wkl dlʾrʿ [qry] kl dlšmyh mʿyt**, where only the final word should obviously be read **mṣyt.** PT 5 can easily be restituted at this point. The editor read **kl dlʾw...**, which is apparently the beginning of our formula: **kl dlʾrʿh qry (wk)l [dlšmyh] (mṣy)[t].** The passages copied by Gordon from the Iraq Museum bowl (PT 4) do not contain our phrase. A similar phrase seems to occur in Geller 1980, p. 54, lines 8–9 **wbtqlʾ dqryh wrwḥ mlʾkh rbty dmytwtʾ**: the last word should probably be emended to **dmṣytʾ**

[17] Some other examples for the alternation of **-b-** and **-p-** are given by Rossell 1953, p. 16.

[18] Schwab: **wkl dwlʾy dwlʾ dmw[t] qry wlšmw ḥmwṣyt.** Gordon: **wkl dylʾy dylʾrʿh qdw wlšmyh,** with the translation: "and all...of the earth's...and heaven's".

As to the sense , we have here clearly a formula which asserts that the incantation is effective: "Everything which is in (or on) the earth calls, everything which is in heaven obeys". Similar formulae occur in other bowls. Cf., e.g., Istanbul 5363 in Jeruzalmi 1963, p. 128: **ʾnʾ ktbyt wʾlhʾ mʾry kwlʾ ysy yt**..."I have written (the incantation), and God, the Lord of all, shall heal...", and our Amulet 1:12–13: **ʾnh ktbt yy[yy y]ʾsy** "I have written, God will heal."

8–9 **šmʿyt ql ʾrʿh šmyh dymqblʾ kwl nyšmtʾ mn hdyn ʿlmʾ**: Here again our bowl can provide us with an aid for clarifying parallel passages, and at the same time also instruct us in the ways of textual transmission of such magical bowls. PT 1, according to Ellis's transliteration (since the photograph is unclear at this point) has the following text: **šmr[h] ql ʾrʿ dqdḥ wšmyh d[ʾtkl]tny š[mhtʾ] mn hdyn ʿlmʾ**. The first three words can without doubt be reconstructed as identical with our text: **šmʿyt ql ʾrʿ**. The fourth word seems to be missing from our text. The rest of the sentence can be imagined to be the same text as ours. The contribution of this text is in the addition of a word **dqdḥ** as the verb for the action of the earth.

PT 3 can be read in the following manner: **šmʿyt kl ʾrʿh dʾwqwḥ** (?) **šmh dym(q)b(y)l**[19] **kl nyšmtʾ mn hdyn ʿlmʾ**. The text is quite definitely corrupt, but, like PT 2, it contains what looks like a verb after **ʾrʿh**, and this is an element which the scribe of our bowl must have omitted by mistake. The interesting point here is the error which the scribe of PT 3 committed when he wrote **kl** for **ql**. The reading itself is clear and unambiguous. The second half of the text in PT 3 is basically the same as the one in our bowl, and it seems to have been badly written because the scribe did not understand the meaning of the words. The verb which should be supplemented in our bowl after **ʾrʿ** may be the one which occurs in PT 1 **dqdḥ** : "which flees, which escapes".[20] The form **dʾwqwḥ** in PT 3 is somewhat similar in appearance, and may be assumed to be a corruption of the same verb. The full reconstructed sentence should then read: "I have heard the voice of the earth *fleeing, and that of the sky receiving all the souls from this world". The earth "fleeing" may be an allusion, in this context, to the unwillingness of the souls to die.

[19] Gordon reads the last three words: **rḥyqyh šmh dymḥbyl**.

[20] For the verb QDḤ cf. below Commentary to Bowl 5:11.

PT 2 does not have our sentence, but it has some remnants of it. It reads: **šmʿt mn hdyn ʿlmʾ ql ʿyttʾ dš...** This text can be explained as a haplography: **mn hdyn ʿlmʾ** is the termination of the phrase just quoted, while **šmʿyt ql ʾyttʾ...** would be the beginning of the next sentence. In PT 2 the two sentences were conflated.

9 **šmʿyt qlh dytth dlṭt wšdryt ʿlh mlʾkyn:** This phrase too has close parallels. PT 1, according to Ellis's transcription, reads: **ql ʾytʾ [šm]ʿyt dlw[ṭtʾ] wšdrʾ**[21] **ʿlh mlkyn.** PT 2: **šmʿt ...**[22] **ql ʾyttʾ (ks...**[23] **wlṭyʾ wšdrt) ʿlh mlkn (wtqypyn).** PT 3: **qlh šmʿyt šmʿyt ql gbrʾ mšršyʾ br pwrtw dlyṭ wšdryt ʿlhw mlʾky.** No comparable phrase is quoted by Gordon from PT 4, and the final part of PT 5 is not well preserved, but seems not to contain such a phrase. The only significant difference here is that PT 3 refers to a man, while the other texts where the formula appears deal with women.

nkyr nkyr: This name does not occur in Aramaic, as far as we know, outside our text, where it occurs in some of the parallel versions. PT 1 has **nkyr** (once only). PT 3 has **nkr nkr.** The other versions do not have this name, as far as can now be verified. The context suggests that this is the name of an angel sent against the man or woman who curses. The Islamic figure of *nakīr* (usually associated with *munkar*) comes to mind: this pair of Islamic angels are the ones in charge of the *post mortem* trial of people, and their punishment. The origin of the Islamic name has been unknown. We may have here an antecedent to it.[24]

yy nqwm yy ngyl wngyl yy kyss: PT 1 has **wnqwm**[25] **nqmʾ wngl**[26] **nglʾ ww**[27] **ss.** PT 3: **ynqm nyqmt nglh nglh ss ṭwy ss.**[28] The other versions do not contribute parallels, though Ellis reads in PT 2: **ydrk wtqym nqmʾ wngyl nyglʾn wssw mʾ,** which does not seem visible in the photograph.

[21] The passage is not visible in the photograph, but we may conjecture ***wšdryt.**

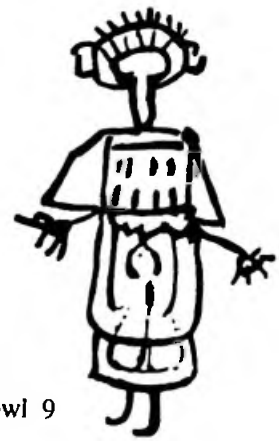
[22] As explained above, the group of words **mn hdyn ʿlmʾ** probably belongs to the preceding sentence, which was omitted by haplography.

[23] Our reading here differs from Jeruzalmi's.

[24] Cf. *Shorter Encyclopaedia of Islam*, pp. 411 f., s.v. *Munkar*.

[25] Possibly to be emended to **ynqwm.**

[26] Possibly to be emended to **yngl.**



[27] Possibly **yy.**

[28] Schwab's transcription is here wide of the mark.

ṣṣṣ ṭym' ytytt' dlṭt wšdrw wḥbylw yth myn 'nyn dbr(t)': PT 1: **wss ṭy mn wssṭ mn wd'ytt' dlyṭ' wš[r]y'**[29] ... **ksy 'ytt' ... mn['']nn dbryk**. PT 2 (Ellis's reading): **wssym yd'ytt' dlwṭ' wšry' lwṭt' '''**. PT 3: **ṭymw yt mšršy' br pwrtw dlṭ wšdr lwṭtyh lḥwpy dy(?) my' wlyṭwr mdnḥ'** ... The word **ytytt'** is clearly a combination of the accusative participle **yt** with **'ytt'**. It seems that this was corrupted in PT 1 and 2 into **yd'ytt'**. All versions apart from our own become muddled and incomprehensible here. **ṣṣṣ** has a parallel sequence of letters in Isbell 1975, No. 65:4 and in Amulet 2:4–5,14.

dl' tyqwm wl' tylwṭ: PT 1: **dl' tyqwm wl' tylṭ**. PT 3: **dl' mwlyṭ.**

10–11 The names, written on the outside, are an unusual feature of incantation texts, where they are usually incorporated into the text. Here the text is entirely impersonal. The mother's name may well be read Qayyamtā. The masculine name **qywm'** occurs in a Nabataean inscription published by Milik and Starcky 1975, pp. 121 f.

From Bowl 9

[29] Perhaps one should read here ***yd'ytt' ... *wšdrw.**

Bowl 3

The Hebrew University of Jerusalem, Institute of Archaeology, No. 1399

Plate 20

(1) אסותא מן שמיא למאדאראפרי בת (2) אנושאי ידמכון בעפרא חבילי נידרא דכוליה דוכא (3) וכל טלא וכל מידיעם דביש ומעיק לה למאדאראפרי בת מאנושי (4) חרשות ועבדין דמיתעבדין יתכבשון ויטמרון בארעה מן קדומיה (5) בעוז גדודהו וחיחי בין נסוע הארון וימר מושה קומא יהוה ויפוצו איבאך וינסו מ[vacat] מיפנך אקדד ואברא אמן אמן סלה

This is a plain bowl, with a crude square in the centre, and a fairly short inscription. Much of the inscription is taken up by a quotation from Numbers 10:35, in a peculiar spelling. No parallels are known to us from other magic bowls for any part of this inscription. The reading begins, as in most cases, in the centre.

1 The name of the client is Madar-Afri. The second element of this name seems at first sight to be similar to the name quite frequently attested in Aramaic incantations **ʾprʾ**, **ʾprh**, and which is likely to be the same as the name of Shapur's mother in the Babylonian Talmud, **ʾypryʾ-hwrmyz**.[1] The several attempts made at explaining this name may

[1] For the name **ʾprʾ**, **ʾprh** cf. Montgomery 1913, p. 118, where a Jewish or a Persian origin for the name are both mentioned as equally possible. The Jewish derivation would be from Ephraim as a hypocoristic, the Persian being a reduction from a name beginning with *fra-*. Both suggestions seem equally unlikely. Nöldeke 1879, p. 52, footnote, refers to the name of Shapur's mother by saying: "die erste Hälfte dieses Namens ist mir unklar". B. Geiger in Krauss 1955, pp. 58 f. explains **ʾyprʾ hwrmyz** as Farrah-Hormizd. The name suggested by Geiger actually occurs in Sasanian seals as **plxwʾwxrmzd**, Farrox-Ohrmazd, cf. Gignoux 1978, p. 147.

Bowl 3

Translation

(1) Healing from heaven to Mādar-Āfri daughter of (2) Anušay. May there lie in the dust the injuries of vows of every place (3) and every shaded place. And every evil thing, and whatever oppresses Mādar-Āfri daughter of Manušay, (4) the sorcery and the charms which are cast, (all) will be pressed and hidden in the earth before her (5) by the power of his army. "And it came to pass, when the ark set forward, that Moses said, Rise up, Lord, and let thine enemies be scattered, and let them ‹that hate thee› flee before thee" (Num. 10:35). **ʾqdd wʾbrʾ.** Amen Amen Selah.

be summarized as follows: some derivation from *frēh* "more"; some element connected with the preverb *fra-; āfrīn* "blessing"; or *farr(ah)* "fortune".[2] However, it seems likely that the name **ʾprʾ / ʾyprʾ** is connected with the name of the well-known Sasanian jurist and commentator, which is spelt **ʾplg / ʾplk,** and which has been commonly read Aparak.[3] This reading is not convincing, since it suggests a name derived from the noun for "robber" *(appar)*, though Abarag "superior" is also a possible interpretation. One would rather be inclined to think of a name *Āfar(r)ag* "Fortunate", with the preverb *ā* used in an auspicious sense.[4] Another possibility is the word *Āfurāg,* which could conceivably be attested also with a short *a* in the final vowel, for

[2] A summary of most opinions is given by Geiger in Krauss 1955, pp. 58 f. Cf. also the discussion in Goodblatt 1976, where the derivation from *frēh* is accepted.

[3] He is mentioned, for example, in *Mādigān ī hazār dādestān,* in Avesta commentaries, and in *Šāyast ne šāyast.* Cf. Perikhanian 1973, p. 562, s.v. Aparak. West 1892, p. 472, note 1, reads Afarg. Cf. also Tavadia 1930, p. 29, note 8 on 1.3b.

[4] One thinks of words like *āfrīn, āzād(ag), ābādān,* though they are all derivatives of verbal forms, which is not the case here.

"creator". This could of course be a reference to Ohrmazd, and we know that Ohrmazd is also a name of frequent occurrence. The latter explanation, even if it is not accepted as a solution for the name of the jurist, seems the most likely explanation for the name of Shapur's mother: Āf(u)rā-Hormiz, as well as the name on several magical bowls which may be read Āfrā, with an omission of the final consonant *-k/g*, just as we have the alternation Pāpak, Bābak with Pāpā, Bābā, etc.[5]

The name Mādar-'pry is however unlikely to be connected with any of the above names. The second element seems to represent either *āfriya* "beloved"; or *āfrī* as a variant on the nominal Middle Persian form *āfrīn* (Parthian *āfrīwan*) from the verb *ā-frī-*, the noun meaning "blessing"; or as a form of the present stem of the verb, in which latter case the compound *mādar-āfrī(n)* would mean "blessing (his) mother". The first alternative, reading Mādar-āfriy(a) "beloved to his mother" seems the more plausible one.[6] As a proper name, or as an element in proper names, *mādar* is not known so far either directly in Iranian or in other languages under Iranian influence. The more familiar forms Mama, Mamay etc. are quite widely attested.[7]

2 Anošay alternates, in line 3, with Manošay, an alternation which is not easy to explain, unless we regard the latter spelling as a contracted

[5] Cf. the names in the index to Montgomery 1913, p. 278. Nöldeke 1892, pp. 309 f., hesitated whether Pāpā is Iranian or Semitic. This hesitation is perhaps no longer justified, since we have it attested already in the Persepolis chert bowls in Aramaic and Elamite; cf. Bowman 1970, p. 130. One may also refer to Benveniste 1966, p. 17, who deduced the existence of Pāp as a variant Iranian name besides Pāpāk; cf. the remarks by Gershevitch 1969, p. 218, and the listing in Mayrhofer 1973, p. 133.

[6] For a final element *-friyā-* in Iranian names cf. Mayrhofer 1973, p. 202, No. 8.1116 Mišbapirriya, and Justi 1895, p. 371 Vispān-friyā. Both are feminine names meaning "beloved to all".

[7] Cf. Bowls 4:7 and 6:3 and the references in Montgomery 1913, p. 278 and Justi 1895, p. 189. Naveh, 1979b, pp. 21 f., has discussed the Semitic names denoting "mother", suggesting that they may be taken to be appellatives rather than proper names. One may refer in particular to Hermopolis **mmh** (cf. Naveh, art. cit., note 21). The ambiguity of this usage may be seen in Bowl 6:6. Nöldeke 1892, pp. 309 f. judged such names to be proper names. A seal published by Layard carries the inscription **lmmh**, cf. Lidzbarski 1902, pp. 137 f. and 97, note 3. It may be noted that the Armenian proper name Mam is derived from Persian *mām* "mother", cf. Hübschmann 1897, p. 50.

form of **mh'nwš(y)**, a name which is also attested without the final *-ay*.[8] We may then take both forms to be basically variants of the same name, freely interchangeable. The name **'nwš'y** and what seems to be its equivalent **mh'nwš(')y** is a feminine name of Iranian origin. It is possible to regard the final element, apparently *-ay*, as the very common ending of many Iranian names in the Aramaic tradition, an ending which is attested in both masculine and feminine names, and is thus similar in function to the ending *-oy*.[9]

The base element of Anušay is almost certainly *anōš*,[10] attested in New Persian *nōš, nōšīn* "sweet, pleasant", as well as in loan-words and loan forms of proper-names in Armenian *(anoiš)*,[11] in Syriac,[12] and in Arabic.[13] In the Aramaic magic texts we have the proper names **dwkt'nwš, bbnwš** (with variants **b'bnwš, bb'nwš**), **z'd'nwš**,[14] **kw'r'nwš** and **mh'nwš**.[15] Most or all of these names can be explained as compounds denoting "beloved by, sweet to —", with the first term referring in most cases to some close family relationship; daughter (perhaps meaning "the other daughter", i.e., the sister), father, son (cf. New Persian *zāda*),

[8] Cf. **'nš, 'nwšy** in Montgomery 1913, p. 274, and **mhnwš, mh'nwš** op. cit. p. 278. All occurrences are in Mandaic, partly from Pognon 1898, where, on pp. 101 f., Barthélémy's explanations are quoted. Montgomery 1913, p. 254, offers an impossible explanation of **mh'nwš** as containing the name Mithra. The names are also discussed in Nöldeke 1898b, p. 144. Cf. also Hamilton 1971, text 19, for the name **m'h'nw[š]** in Syriac.

[9] For this ending cf. Nöldeke 1888, pp. 413 ff. and 1898b, p. 145. Salemann 1930, p. 49, derives *-ōy, -ōya* from **-avya-ka-*.

[10] For a possible occurrence of this word in Pahlavi cf. Shaked 1979, pp. 254 f

[11] Cf. Hübschmann 1897, pp. 99 and 18 f. Earlier the word was identified with the term for "immortal", cf. Fr. Müller 1891, pp. 264 f., 356; Horn 1893, p. 30, No. 128.

[12] Cf. Gōšaqanōš, Hoffmann 1880, pp. 25 f.; Rādanōš, Hoffmann 1880, p. 68.

[13] Duxtnōš, cf. Nöldeke 1898b, p. 144. The name Anōšagzād is explained by Nöldeke 1879, p. 467 as "von Unsterblichem geboren"; he was actually the son of Xusrau Anōšag-ruwān.

[14] Cf. **'nwšz't'** in a Sasanian clay sealing, Gignoux 1978, p. 114, No. 10.30b. See also the preceding note.

[15] In Montgomery 1913, p. 218 (No. 29:5) we propose to read **mh'nwš** for Montgomery's **mt'nyš**. The same applies to Geller 1980, p. 49. In Jeruzalmi 1963, p. 160, there seems to be a name **mh'nš**.

sister (**kwʾr** may well be a contraction of Middle Persian *xwāhar*),[16] perhaps parents (*meh* "elder"). A similar impression is formed by some of the compound proper names containing *anoiš* in Armenian: Aršanoiš, Sahakanoiš, Smbatanoiš. In all of these cases the first element alludes to the name of the father of the dynasty. For the Mandaic names, Nöldeke 1898b, p. 144, suggests a conflation of the Iranian word with the biblical name Enosh, which became the name of a Mandaean genius. Against this theory one may note that the names containing this element are definitely Iranian, not Semitic, and that they are commonly attested also outside Mandaean texts.

ydmkwn: The verb **DMK** is attested in the Berlin bowl No. 2417; cf. Wohlstein 1894, p. 34, where the meaning is not pejorative as it is here, although the text is not quite clear. In the absence of a photograph or a drawing in Wohlstein, one can only guess what the text might read: **myty dbytʾ d[šky]byn bʾrʿh *wdmkyn bʾprʾ *qdḥw lkwn** "the dead of the house, who lie in the earth and sleep in the dust (or 'in the ashes'). Go away...". The whole of this unusual incantation is addressed at the dead who are asked to abandon the house of *Bābay son of **bydwn** (?) and resort to the house of Asmēn daughter of Iday. In Amulet 7:21–22 there is an opposition **DMK: NWM**, in which the latter means "to doze off", while the former means "to sleep properly".

ḥbyly nydrʾ: This combination could also possibly mean "bundles of oaths", though it has been the custom to translate the first term as "injury, harm" in the magic texts. Cf. also Mandaic **giṭria ḏhbila** (Lidzbarski 1909, p. 354, lines 32 f.; Yamauchi 1967, No. 22) "die Knoten des Verderbens".

3 **ṭlʾ:** The context suggests that we have here a contrast between **dwkh** "(open) place" and **ṭlʾ** "shade, shaded place", although this expression is so far unique in the magic texts. Montgomery 1913, No. 29:9, has the phrse **šydy bny ṭyly,** which he translated: "ghostly shades"; but this may rather mean "ghosts of shaded areas". By a different interpretation one may, however, connect **ṭlʾ** to the well-known term for a species of demons, usually called **ṭlnytʾ, ṭwlnytʾ.** In this case the sentence may be

[16] Nöldeke 1898b, p. 144 denies this explanation and regards the first element as *xwarrah*.

translated: "and every shade-spirit (**tl**ᵓ) and every evil thing which afflicts her..." (J.C. Greenfield's suggestion).

mydyᶜm dbyš wmᶜyq lh: A fairly close parallel for the usage is found in Gordon 1937, p. 87 (H:13) **wkl zyqyn wmzyqyn byšyn dymᶜyqyn lh l...**

4 **ḥršwt wᶜbdyn:** Cf. the sequence in Gordon 1941, p. 123 (5:4 f.) **kl ḥršy byšy wkl mᶜbd[y] tqypy dᶜbydyn bh wdmytᶜbdyn bh.** Cf. also our Bowl 12:III **wᶜbdt lḥršyn dy nḥšᵓ wᶜbdyn dprzlᵓ.**

wyṭmrwn: The verb has not been attested so far in the magic texts.

5 **bᶜwz gdwdhw:** A puzzling phrase, appearing in Hebrew in the midst of the Aramaic text and looking like a quotation from a sacred source, though no source has been identified.

whyhy byn...: A quotation from Num. 10:35, badly written. This verse is yet unattested in the magic bowls, though it is familiar from late Jewish and Samaritan magic.[17]

ᵓqdd wᵓbrᵓ: The second word looks like the name of an angel, cf. *Sefer ha-razim* 1966, p. 88, line 118. The two words could also be taken to be verbal forms in *afᶜel* from the roots **QDD** and **BRY,** meaning respectively "to penetrate" and "to soak through" (J.C. Greenfield's suggestion).

From Bowl 12a

[17] T-S AS 142.13; Schrire 1966, p. 131, No. 36. The words **qwmh yhwh,** deriving from the same verse, are quoted in Samaritan bronze amulets and other inscriptions; cf. Ben-Zvi 1970, pp. 179, 187 f., 193, 200; Kaplan 1967, pp. 158 f.

Bowl 4

The Hebrew University of Jerusalem, Institute of Archaeology, No. 1402

Plates 18–19: Figure 22

Inside the circle in the centre:

(1) חוב הדין א(א)א א (2) איסרא דקברא (3) אמן אמן סלא

Around the central design:

(4) פעיח פעויח מלכנא קלקלא מלכנא קלקלא מלא משמלא קליה די מצמדנא די סכת פדנא היך מג<ל>א (5) מחת ליה כליביה דפומיה לא יאימר וליביה {לא יאדע} לא יאידע אמי פת לילי הי לילי לילי יצב יצב בנן בנן (6) אף על פרטדוך ליטא לתהפכי חרשיא ולוטתא ומשקיפותא מין מחדד בר (7) ממא ומין {בת} ברזוך בת ממא ומין מחזידוך בר ברזדוך ומין קיימתא בת ק(בנ)י ומין נני (8) בר קימתא ומין ביתא בת ברזדוך ומין בחי חיא וקינין חיא למעבד חי פו(גריה)

In the centre is a drawing of a human face, perhaps with the body of an insect. Two ribbons are shown on the left side of the face, and what looks like three insect-like legs are at the bottom. Encircling this design are a number of figures, which include a serpent and two reptiles as well as a cross which ends at its four corners with circles.

We should like to acknowledge the intelligent help of Mrs. Ada Yardeni, who drew the script shown in Figure 22 and who made a number of important suggestions for the reading.

The text of the incantation contains a number of obscure expressions, and is not easy to make out. It may have been intended for protecting a tomb, if we take the expressions **ʾysrʾ dqbrʾ** and **lmʿbd ḥy pw(gryh)**, which open and close the incantation, in a literal sense. But the expression is

Bowl 4

(1–3) Again. This is »»»» the spell of the tomb. Amen Amen Selah.

(4) **pʿyḥ pʿzyḥ** I advise (?). A voice I advise (?). A voice fulfils (and) completes. The burnt (thing) which I attach, which (is) the coulter of the plough, like a sickle, (5) shall introduce into his heart, that his mouth shall not speak and his heart shall not know.

Immi the daughter of Lili who is Lili Lili. **yṣb yṣb bnn bnn.**

(6) She also curses Fratadukh, that you may turn away spells and curses and afflictions from Māhdād son of (7) Mama, from Barazdukh daughter of Mama, from Māh-ized-dukh son (!) of Barazdukh, from Qayyamta daughter of Kabnay, from Nanay (8) son (!) of Qayyamta, from Bita daughter of Barazdukh, from the houses of life and the livestock of life, to make his body alive.

common in incantations, cf. Commentary to line 2. **pwgrʾ** can of course refer either to a living body or to a corpse.

1 **twb** is a common opening word in Aramaic. It occurs, for example, in the opening of the text in Montgomery 1913, p. 121 (2:1): **twb ʾzlnʾ ʾnh**... Cf. also Rossell 1953, pp. 61 f.

»»»»: The second *alef* looks like yt, but ʾytʾʾ would not give any meaningful reading.

2 **ʾysrʾ dqbrʾ**: The idea of an incantation connected with a cemetery or a tomb is quite common; cf. Pognon 1898, p. 3. ʾysrʾ is a regular term for a magical spell.

4 The text begins with a series of magical combinations which cannot be precisely translated. It is not clear where this sequence ends, and the translation given of this line is largely hypothetical.

For **pʿzyḥ** one may compare **pʿzyʾl**, one of the names given to Meṭaṭron in the Hebrew Book of Enoch, cf. Odeberg 1973, Hebrew section p. 71 (48D: 1).

mlknʾ: We have translated the word as derived from **MLK** "to advise"; it could equally well be analysed as *malkā anā* "I am king", or *mālek anā* "I rule". See further in the Introduction, p. 27.

qlqlʾ: This formula occurs in Montgomery 1913, p. 178 (13:9), cf. also p. 181, and Epstein 1921, pp. 45f.; Levine 1970, p. 352. In Mandaic, cf. Pognon 1898, p.59 **qal qal**...; Drower 1945, p.173 **qal arqa dbakia uqal šumia.** In Ginza Left, Petermann 1867, I, 2, p. 117:7 f. we have **qal qala qala qala ḏtrin qalia šumit qala ḏtrin qalia ḏiatbia ubanin qal ruha uqal nišimta**...In T-S AS 143.12 we have **wmh qlh bšmyʾ ql ʾrʿ dgʿyt wql ʿmwdy šmyʾ ʾtprqw ʾlʾ qlh dkwnnwt kwnnwt kd nḥtyt mn šmy mrwmʾ lqlqlh lstmh wlṭmṭmh lbhy wʿyynyhy**..; Rettig 1934, p. 48 **qlh qlh drbw rbh.** There is a manifest tendency to play on the similarity of the word for "voice" and that for "corruption, spoiling". Cf. on this the note by E.S. Rosenthal in Lieberman 1974, p. 139, addendum to p. 51, where Hebrew **qwl** is shown to be used in the sense of **qlqwl** "disapproval, condemnation, abuse".

mlʾ mšmlʾ: A reading *mellē mašma<ʿ> lēh* "words he utters" might also be considered. Cf. Levine 1970, pp. 355 f. One wonders whether *ma-li-e mi-il-in-ni*, presumably *mālē milīn*, in the cuneiform Aramaic tablet from Warka, has any relevance. Cf. Dupont-Sommer 1942/44, p. 44, and Epstein's suggestion that the Talmudic idiom **mmly myly** "adversaries" be adduced. Cf. Epstein 1960, p. 11, n. 4; Gordon 1937/39, p. 106, n. 4. In Gordon 1934b, p. 324 (B:9) we have **ql myly myly.** It seems, however, best to read the two verbal forms as derivatives of **MLʾ**, i.e. *mālē mšamlē*, with the second verb taken as a *šafʿel* participle (cf. Brockelmann 1928, pp. 389 f.).

qlyh, as rendered here, refers to the following **skt pdnʾ** as a burnished iron. Other possibilities of interpretation exist. **qlyh** could be "his voice". The word **qly** (Kali) is attested as the name of an angel. Cf. Montgomery 1913, pp. 258, 262; Gaster 1900, p. 149 (=Gaster 1928, II, p. 1025); Schrire 1966, p. 130; **qlyʾ** in Gordon 1934b, p. 324 (B:1). The formula **ʾpypʾ qly qlylʾ** (T-S K 1.120) may belong here. In Montgomery 1913, p. 141 (6:11 f.) we have a similar word in a somewhat obscure

Fig. 22. The text on Bowl 4

context: **wnyzym bmyzm nḥšh nyzyl qlyh bgygly šmy' wnyhwy *dwryh *bsbb** [read so!] **š'wl *rymh** "and may he be bound by a muzzle of brass; may his **ql(y)** go in the spheres of heaven, and may his habitation be in the vicinity of the grave (and) of worms". Cf. also on this passage Epstein 1921, p. 34. The word **qlyh** is unlikely to be "his voice", as the context requires a pejorative sense. It is possible to think of the word **ql** "voice" in the sense explained by Rosenthal (cf. above, comment on **qlql'**), viz. "abuse, state of abjectness".

It is of course possible to divide the sentence in our bowl differently from the way done here. One other possibility is to read: **mlkn' qlql', mlkn' qlql', ml' mšml' qlyh**, which may be translated: "(His) wisdom (or counsel) is corruption, (his) wisdom is corruption, he fulfils and completes his abuse".

mṣmdn' could possibly be a word meaning "yoke" or the like.

skt pdn': For this expression cf. Jastrow 1950, p. 988, s.v. **sk'**. A similar expression was read by Cross 1973, pp. 126 f. in an ostracon from Heshbon.

hyk mg<l>': This seems the best solution to a puzzling sequence of letters. An earlier reading which was considered was ***ḥwkmt'**, regarding the *gimel* as a badly written *taw* (or as a scribe's error). This earlier reading would give the translation "shall introduce wisdom into his heart". However, the following phrase, "that his heart shall not know", does not go well with such an interpretation.

5 **mḥt**: The active participle of NḤT in *af'el*.

dpwmyh l' y'ymr wlybyh l' y'yd': The words **l' y'd'** were first written and then re-written under the spelling **l' y'yd'**, presumably because the first spelling might have sugggested a participle form, while the corrected one shows a *ṣere* in the first syllable, and denotes the imperfect. Babylonian Aramaic has numerous expressions in which the pair **lyb'**—**pwm'** go together, cf. e.g. Jastrow 1950, p. 686.

'my: This is the name of what seems to be a female demon, **'ymy bt rbq'**, associated with **lyly** and **mr**, the sons of **'ymy**, in the Berlin bowl No. 2416, cf. Wohlstein 1894, p. 11; Stübe 1895, p. 22; cf. Wohlstein 1894, pp. 20 f., who quotes Bavli Pesaḥim 112a, where Immi may well be the name of a female spirit. Here Immi is the daughter of Lili, the latter being perhaps a variant on the name Lilith. Immi is of course also mentioned as a regular human proper name. Cf. Gordon 1941, p. 12 (4:2) reproduced in Isbell 1975, p. 97; Gordon 1937, p. 93 (L:11), reproduced in Isbell 1975, p. 127.

6 **prṭdwk** is an Iranian name which occurs here for the first time. The name may be explained as Frāta-, cf. Old Persian Frāda (cf. lately Mayrhofer 1979, II, 20), though the spelling with **-ṭ-** is problematic. It may alternatively be connected to Av. Parāta-, cf. Bartholomae 1904, p. 856, or to *Frahāta-, cf. Justi 1895, pp. 101 f.

lthpky: The form is unclear. One would have expected a **d-** at the beginning, instead of the **l-**; the latter may be merely a scribal error for **d-**.

mšqypwt': An unusual form for **šyqwpt'**, **'yštqwpt'**.

Māhdād occurs also in B.M. 91710, cf. Layard 1853, pp. 437 f. (Ellis 1); Schwab 1890, pp. 299 f.; Montgomery 1913, pp. 168 f.; Jeruzalmi 1963, pp. 65 ff., in line 3, where it was wrongly read by previous editors.

For Sasanian seals, cf. Bivar 1969, p. 70, No. DB2; Gignoux 1978, p. 27, No. 3.11; p. 88, No. 4.11b. Other attestations are listed in Justi 1895, pp. 185 f. Cf. also Hinz 1975, p. 156 s.v. *māhīdātā-; Gignoux 1979, p. 69.

7 For Mama, cf. above, note 7 to Bowl 3.

myn bt brzdwk bt mm³: The first **bt** is surely a scribal error.

brzdwk: This reading was suggested by Mrs. Yardeni. The name is probably to be vocalized Barāz-dukh, associating it to the common Iranian proper name Warāz/Barāz, for which one may refer to Justi 1895, pp. 348 f.; Mayrhofer 1973, p. 190, Nos. 8.965, 967 ff.; Hinz 1975, p. 255; and to **wl³cdwxty** in ŠKZ, cf. Gignoux 1979, p. 87. The alternative reading **brwdwk** seems less likely both palaeographically and as an Iranian name, though it could be compared to the name **brd³kt** in the Syriac bowl published by Hamilton 1971, pp. 121, 159 ff. and Geller 1976, pp. 422 f. A proper name Bāra seems to be attested at a very early time. Cf. Grantovskij 1970, pp. 216 f.; Hinz 1975, p. 63. It is to be noted that on the Syriac bowl the suffix *-duxt* is spelled **-d³kt**, cf. also **šhd³kt**, and possibly also **mhgwšnyd³(k)t**, though this latter name is read by Geller **mhgwšnwd³yt**. The spelling **-d³kt** betrays an *-o-* pronunciation for long Syriac *-ā-*, as in Western Neo-Syriac, for which one may refer to Nöldeke 1898, p. 5, §4. Hence it may be deduced that the spelling **-d³kt** indicates a pronunciation *-doxt* for the ending of these Persian names, not unlike the usage of Standard New Persian for original short *u* vowels.

mḥzydwk: This name is unattested so far. It might seem possible to explain it by referring to the suffix *-čya-* in Old Iranian, which may give a form *Māhī-čyă-, perhaps a form of endearment from the word for Moon, which is also the name of a deity. The Elamite proper name Bakizza (etc.), which is reconstructed as Iranian *Bagaiča- (cf. Mayrhofer 1973, p. 138, No. 8.229; Hinz 1975, p. 56) may be compared, as well as the place name Bagiziš from hypothetical *Bagaičya- (Hinz 1975, p. 56), which are assumed to be "Koseformen" derivatives from the divine name Baga. A similar explanation has been proposed for Elamite Takaziya from Iranian **taxmačya-* (Hinz 1975, p. 232); cf. also **tigračya-* in Hinz, p. 236; **kafačya-*, op. cit. p. 144; *maryaičya-*, op. cit. p. 174.

However, a simpler solution offers itself and seems preferable. One could read the name as Māh-ized-dukh, assuming the omission of a *yod* after the second letter, and the quite common haplography of *dalet*. The deity Māh-izad or Māh-yazad is quite well known in the Manichaean

texts. Cf., e.g. Andreas and Henning 1932, p. 220, s.v. **mʾhyzd.** The spelling **yzyd** for the second part of this compound name is not surprising. In Mandaean we have both **yʾzyd** and **yzyd** as a name, cf. Pognon 1898, p. 99, taken by this scholar to be the similar-looking Arabic name Yazīd, cf. pp. 14, 103, and claimed by Montgomery 1913, p. 277, to be an unexplained Aramaic name. What proves **yzyd** to be the Iranian name Yazed is the compound form **yzydʾd** "Created by Ized", Montgomery 1913, p. 150; Justi 1895, pp. 147, 149. In Arabic, Ṭabari III, p. 371, we have the spelling **ʾzdʾd;** in Syriac (Assemani III, 226; cf. Justi, p. 149), **yzydʾd,** both for Yazed-dād. The spelling **yzyd** for Ized occurs also in early Judaeo-Persian, cf. in the Dandan-uiliq letter, Utas 1968.

For the haplography of the *dalet* one may refer also to the name **ʾyzdwk**=Izad-dukh in our Bowl 11. It is quite likely that **myrdwk** in Montgomery 1913, p. 152, is not Mithra-dukh, as stated there, but

[1] **mn:** written **bn.**

rather Merd-dukh, from the Iranian word *mard/merd* "man".

mḥzydwk br brzdwk, like **nny br qymt'**, share the peculiarity that the name of a woman is followed by **br**, and not by **bt**. The same confusion of genders occurs in Geniza 3:6,10.

qbny: The reading is uncertain. The name obtained could be compared to the widely attested name **kpny, kpn'y**. Both our **qbny** and **kpn(')y** might be variant forms derived from a noun meaning "small, little", like the Aramaic name Zuṭra and similar names. Kabnay could be derived from Old Iranian *kamna-*, cf. Bartholomae 1904, col. 440. This old Iranian element has been used by Benveniste 1966, pp. 85 f. for explaining the Elamite forms Kamnakka, Kampiya, though the explanation has not been widely accepted (cf. Gershevitch 1969, p. 198, and Mayrhofer 1973, pp. 174 f.). A Middle Persian name which may belong here occurs on the Paris seal 3.31, where the reading is uncertain. Cf. Gignoux 1978, p. 30.

Bowl 5

Translation

(1) [By] your name I make this amulet that it may be a healing to this one, for the threshold (of the house... (2) and any possession which) he has. I bind the rocks of the earth, and tie down the mysteries of heaven, I suppress them... (3) I rope, tie and suppress all demons and harmful spirits, all those which are in the world, whether masculine or feminine, from their big ones to (4) their young ones, from their children to their old ones, whether I know his name or I do not know it. In case I do not know the name, it has already been explained to me at the time of the seven days of (5) creation. What has not been disclosed to me at the time of the seven days of creation was disclosed to me in the deed of divorce that came here from across the sea, which was written and sent to Rabbi Yehoshua' bar (6) Peraḥya. Just as there was a lilith who strangled human beings, and Rabbi Yehoshua' bar Peraḥya sent a ban against her, but she did not accept it because he did not know her name; and her

This is one of a group of three bowls donated recently to the Israel Museum by members of the family of the late Mr. Alqanayan, a collector and businessman in Iran, executed by the revolutionary regime of Khomeini on the charge of supporting the State of Israel. Bowls 5–7 in the present publication are from the Alqanayan collection. Bowl No. 5 contains eight lines of inscription written spirally from the centre. The text is quite close to that of Montgomery 1913, Nos. 8 and 17, where the sage Yehoshuaʿ bar Peraḥya is also mentioned as having issued a letter of divorce to the demons.

1 For the reading of the opening formula compare for example Wohlstein 1894, p. 27 (No. 2426, line 1): **mšmk ʾny ʿwš ʾ hdyn ʾswtʾ nṭrtʾ *wqywmtʾ**,[2] "By your name I do this healing, protection and preservation". Wohlstein's formula may be compared in its turn to a Syriac incantation first published by Montgomery 1917/18, and again by Hamilton 1971, p. 99a: **mzmn hnʾ qmtyh** (for ***qywmth?**) **kbšʾ wʾswrʾ wḥtmtʾ wnṭrtʾ dbytʾ dyly** ... "Designated is this preservation (or 'oath'), spell and bond and sealing and protection of my house ..."

For our opening formula compare also Wohlstein 1893, p. 328 (No. 2422, line 1): **byšmk ʾny ʿwšh ʾswtʾ mn šmyh** l..., and Gordon 1941, p. 119 (2:1): **lyšmwk ʾny ʿwšh ʾswtʾ mn šmyʾ tyhwy** l..."By your name I do (this amulet). May there be healing from heaven for ...". In

[2] Wohlstein read this **whyy mtʾ**. Our emendation is conjectural without seeing the original. **qywmtʾ**, like **ʾswtʾ** and **nṭrtʾ**, may refer to the amulet or incantation itself. In that case we may translate it by 'oath', cf. Jastrow, p. 1356. For **qaiamta** "Festigung" in Mandaic cf. Lidzbarski 1920, p. XXIV.

name was written (7) in the deed of divorce and an announcement was made against her in heaven by a deed of divorce that came here from across the sea; so you too are roped, tied and suppressed, all of you under the feet of this Marnaqa son of Qala. In the name of (8) Gabriel, the mighty hero, who kills all heroes who are victorious in battle, and in the name of Yeho'el who shuts the mouth of all [heroes]. In the name of Yah, Yah, Yah, Sabaoth. Amen, Amen, Selah.

Montgomery 1913, p. 183 (14:1) we have the enlarged formula: **byšmk ʾny ʿwšh yhwh ʾylhʾ rbʾ hdyn ksʾ nyhwy lḥtmtʾ l...**"By your name, YHWH the great God, I do this bowl. May it may be for the sealing of..."[3]

The absolute form **ʾsw** is rare, though not unattested. Cf. Jeruzalmi 1963, p. 128 (5363:1–2): **dyn qmyʿ dyhwy lʾsw l...**; and p. 141 (5366:1–3): **lyšmk ʾny ʿwšh hdyn ktbh yhwy lʾsw lbyth dkwrkšyd[4] lh wlʾtth[5] wbnh...**"By your name I do this writing . May it be for healing to the house of Xwarxšēd, to him and to his wife and son...".

2 The phrase **kptynwn lkypy ʾrʿh** corresponds to an incantation text on a printed amulet (Warsaw 1867; Fig. 21 on p. 133), where we have עינא דכל עיינין בישין אתכפיין ואתטמרין מן קדמוהי גו כיפין. A similar text occurs in Hanauer 1907, pp. 318 ff. Cf. also in a Mandaean magic text **arbikuk uširiuk ʿl kipia ḏprat udiglat** (Drower 1937, p. 593, after line 190) "They have made you kneel and set you on the banks of the Euphrates and the Tigris". It is doubtful whether the phrase **kypy hqšt** (Odeberg 1928, Hebrew text, p. 36, ch. 22c:4, 6, 7) has anything to do with our text. The most likely interpretation for our **kypy** is that it is connected

[3] Isbell 1975, p. 39, is right in saying that there is no need to supplement **hdyn ksʾ** before the first word of the formula, as is done by Montgomery.

[4] This proper name should be read thus, viz. Xwarxšēd, meaning in Middle Persian "Sun" (cf. NPers. *xuršīd*), with the preservation of the cluster -xš- in the compound. The same name occurs also, unrecognized, in Gordon 1941, p. 342 (British Museum 91776): **ʾnʾ hw *kwrkšyd gwšns br dwstʾy...** The name was transliteated by the editor **kwrbšyd.**

[5] The last two words were not read correctly by Jeruzalmi and Isbell 1975, No. 70:3.

with the Aramaic word for "rock, stone". A play on the similarity of the sounds of the verb **KPT** and the noun **kypy** may have been intended. The difficulty of the translation is caused mainly by the fact that "the stones of the earth" does not give a very good parallel in sense to "the secrets of heaven ". In line 7 **kypy rglh** is apparently a different word.

4 **dʿrdqyhwn** has a parasitic *ʿayin*, which is of quite frequent occurrence in Babylonian Aramaic. Cf. e.g. **kʿkʾ** from Persian *kāk*, for which cf. Fraenkel 1886, p. 35. This phenomenon may well be the reverse counterpart of the frequent loss of *ʿayin* in Babylonian Aramaic, for which cf. Rossell 1953, p. 17; Epstein 1960, p. 18. The particular form of **dʿrdq** is however better explained as a contamination of two attested forms of the word, **drdq** and **dʿdq**, both connected with an original form **dqdq**, cf. Syriac *daqdqā*.

For the formula **byn...byn** cf. in Gordon 1941, p. 125: **bn dmyštdryn wbn dlʾ mštdryn.**

5 **mšbʿt ywmy brʾšyt:** A frequent Hebrew idiom, though usually the formula is **mššt ymy brʾšyt** "from the six days of creation ", e.g. Bavli Ketubbot 8b, and so it is in Montgomery 1913, p. 170 (11:9): **mn ywmy ʿlmʾ wmyššt** (!) **ymy brʾšyt.** The Mandaean parallel adduced by Montgomery, ibid. from Lidzbarski 1902, p. 104, has: **mršʿšat šit iumia brišit** "vom Uranfange an, seit den sechs Tagen des Uranfanges".

On the *geṭ* formula in incantation texts cf. Montgomery 1913, pp. 159, 179; Gordon 1934, p. 469; Levine 1970, pp. 348 f. The deed of divorce which comes "from across the sea" (**mʿbr ymʾ**, or **mn ʿybr ymʾ**) occurs in Montgomery 1913, Nos. 8 and 17, in both cases associated with Joshua b. Peraḥya.

For Joshua b. Peraḥya cf. Montgomery 1913, pp. 226 ff. Joshua b. Peraḥya occurs in fragments of the Jesus story published by Krauss 1911a (correcting Adler 1911), and further in the fragment recently published by Falk 1978; cf. also Boyarin 1978. A late Kabbala fragment also refers to the role of Joshua b. Peraḥya in the Jesus story; cf. Krauss 1911b.

6 **hhyʾ lylytʾ dḥnqʾ lbny ʾynšh:** Cf. the Mandaean text in Lidzbarski 1902, p. 102: **lilita...diatba bbaitḫ ubʿsqupta dbaitḫ ḏ...uma[hi]a ugaṭla ušaqpa uhanqa dardqia udardqata.** Parallels to this are conveniently given in Gordon 1934, p. 468. Amulet 15 and Bowl 12 provide further examples for the demon who kills children.

The feature which occurs in this incantation for the first time is that the ban imposed by Joshua b. Peraḥya was at first invalid because he did not know the name of that lilith, and only afterwards her name was written in the *geṭ*. In Montgomery 1913, Nos. 8, 11 and 17, the full parentage of the lilith is specified, as is legally appropriate.

mḥmt dlʾ hwʾ dydʿ šmh: In **dydʿ** the first letter seems to be superfluous. The phrase may alternatively be translated "because there was no one (read: **dlʾ hwʾ** ‹**mn**›) who knew her name".

7 **kypytwn** stands for **kpytytwn**, passive participle plural masculine of *peʿal* + the subject suffix of the second person plural masc: **kpytyn** + **ʾtwn. kbyštwn** is written for **kbyšytwn.**

8 **bšwm gbryʾl gbr tqyp dqṭl kl gybry kwlhwn:** This phrase is reminiscent of Montgomery 1913, p. 127 (3:2–3) **wytrḥq mynyh dywʾ byšʾ wstnʾ byšʾ dmytqry ṣpʿsq ʾbdh gbrʾ dqṭyl gbrʾ mylwt ʾyttyh wʾytt ʾ mylwt bʿlh**..."And may there depart from him the evil demon who is called **ṣpʿsq ʾbdh**, the hero who kills a man from the side of his wife and a wife from the side of her husband..." Montgomery reads *abbādā gabbārā* "the Mighty Destroyer", though the first word is nowhere attested in Aramaic. It seems possible that **ṣpʿsq ʾbdh**‹**g**› are two names which follow the same principle: in both cases we have a sequence of letters from the alphabet, the first one in a reversed order, and with *qof* coming at the end and out of order. In the second case the *gimel* seems to have been omitted (perhaps by haplography with the following **gbr**). Thus we may reconstruct the two names as badly written for **qṣpʿs ʾbgdh.** Cf. Gaster 1896, p. IX, line 25 **ʾbgdh**ʾ.

The play on the element *geber* in the name Gabriel occurs already in Daniel 8:15–16. The epithet *gĕbar taqqīf* (or *gibbār taqqīf*) may well be an etymological *midrash* on Gabriel, the two words rendering its two parts.

yhwʾl: The alternative reading of this name, **yḥyʾl**=Yeḥiʾel, proves upon inspection to give a non-existent name of an angel. Cf. Greenfield 1973, p. 156, n. 40 for a correction to Montgomery 1913, p. 207 (25:4). Cf. also Yo'el in Amulet 11:8 and in Shachar 1971, p. 289, No. 974 (a late amulet).

For the provenance of this bowl see Bowl 5.

1 **lštwqy wlskwry** are regular Babylonian Aramaic infinitive *pa"el* forms. In line 5, however, we have **lštqʾ** in the same function.

2 For the name **bryk yhbyh br mmʾ** cf. the nearly identical name **bryk yhbyh br mʾmy** in Montgomery 1913, p. 209 (26:4). We have transcribed the first name as a composite: Bĕrik-Yehabyah. An alternative reading

Bowl 6

Translation

(1) Mystery. This mystery is for silencing and shutting the mouth (2) of all evil and violent people who stand against Bĕrik-Yehabya son of (3) Mama. Peace be on thee, a city whose population is very numerous, whom I have not created, and whom I love, (4) and whom I call the mighty of the earth. In the same way as you have eyes but do not see, as you have ears but do not hear, so shall you give me (5) a stone from you to silence from me, I, Bĕrik-Yehabya son of Mama, the mouth of all people who stand against me, as well as the mouth of (6) Dād-gušnasp son of his mother. And the men and women, boys and girls, who stand against me, I, Bĕrik-Yehabya son of Mama, may they be (7) mute in their mouths, blind in their eyes, deaf in their ears, mournful in their hearts, sick and corrupt, for the fifty years of the jubilee, for the seven years of the *šemiṭa*, for (8) the thirty days of the month, for the seven days of the week, on the Sabbath, the full moon, and the day of the new month.

In the name of Ḥadriel, *Šakniel*, the well, the stone, and the pit, I adjure you, I adjure (9) you, in the name of he who is great and frightful, that you may silence from Bĕrik-Yehabya son of Mama the mouth of all people who write books, who sit in forts(?), who sit in market places and in streets, (10) and who go out on the roads, so that their tongues should cleave to their mouths and that they should not speak evil words against me. In the name of He who commanded and it came into being. Amen, Amen, Selah.

may be to regard this name as analogous to the Syriac name Bĕrik-ṣebyānēh, who is attested as the father of Mar Abbā (cf. Chabot 1898, p. 313, note 1): "His will be blessed". In this case we may read Bĕrik-yĕhabēh and translate "His share/load be blessed".

Montgomery (op. cit.) conjectured that **yhbyh** is a way of writing the divine name **yhwh**, an appealing suggestion which lacks proof. It is true that there is a whole series of divine names such as **yhbyh** (Amulet

4:33; Stübe 1895, p. 22, line 15; Gaster 1896, p. IX line 16), **yhwbyhw** (Montgomery 1913, p. 146, No. 7:8), **yhwh byh** (Montgomery 1913, p. 178, 13:7), **byh byhy** (T–S K 23.3, line 5), **ʾl bʾl** (Amulet 11:9), but Montgomery himself makes the more acceptable suggestion that they reflect a phrase such as Yah-in-Yah. Our name could indeed be rendered "Blessed is Yah-in-Yah". It may be recalled that Psalms 68:5 gives God's name as **byh,** and this verse is quoted e.g. in the Geniza text T–S K 1.68, line 10; Montgomery 1913, p. 154 (8:12), if the reading in Isbell 1975, p. 44, is correct. The divine name **byh** is apparently also attested in Stübe 1895, p. 22 line 6: **mlʾkh dbyh.**

One may incidentally observe that Yah-b-yah is also associated with Bahaot, Abaho. which Scholem 1974, p. 421, has adduced in his attempt at explaining the gnostic name Ialdabaot as composed of Yaled-Abaot "Begetter of [S]abaoth"/"of Abaoth". We thus have **wbyšmyh dyhbyh bʾ(ḥʾwt) yhw yhw ʾlhy** (Stübe 1895, p. 22, lines 15 f.), paralleled by Montgomery 1913, p. 146 (7:8 f.): **bšwm yhw byhw wʾbhw rbh.** It is possible similarly to reconstruct in Gaster 1896, p. IX, line 16 **yh byh *byʾwṭ yh hwh,** by simply dividing the words differently. That this name was indeed the functional equivalent of Sabaot in Aramaic incantations can perhaps be shown by a quotation from a Geniza text: **ʾdwn byh byhy yh yw yhw bh ṣbʾ** ʾwt ... (T–S K 23.3, line 5). The conglomeration of names here also presents a sequence Yah-b-Yah(i)...**bh *ṣbʾwt.** Whatever the explanation which prevails for the first part of the compound Ialdabaot, Abaot or Baot can thus be shown to be attested in Semitic, and more explicitly in Jewish magical practice as well.

3 For the name Mammā "mother" cf. above, Commentary to Bowl 3, note 7.

The formula **šlm lyky mdyntʾ dʿmyh sgy sgy** is interesting and quite unusual. The idea is vaguely reminiscent of Jonah and the story of the gourd, where God says to Jonah (4:9): "Are you so angry over the gourd?" Jonah answers positively and God says: "You are sorry for the gourd, though you did not have the trouble of growing it.... And should not I be sorry for the great city of Nineveh, with its hundred and twenty thousand persons who cannot tell their right hand from their left, and cattle without number?" The statement that this is a city with many inhabitants and the further motif that the speaker did not create them are shared in both sources.

4 The term **gybryh d'r'h**, though reminiscent of Nimrod's epithet *gibbor bā-āreṣ* (Gen. 10:8), is quite curious. The epithet *gibbār(ā)* is sometimes used in the magic bowls for negative beings. We thus have **dyw' byš' wstn' byš' dmytqry ... gbr' dqtyl gbr' mylwt 'yttyh ...** (Montgomery 1913, p. 127, No. 3:2f.), and the rather ambiguous **dtmḥyn bṭwpry lybky wbmrnyth... dqtrys *gybr'...** (Gordon 1934c, p. 468, G:4), where the parallel texts describe this personage as having power over the demons (cf. the parallels printed by Gordon, loc. cit.). A series of "good" angels are described as **gbr' ml'kh** (Gordon 1934b, p. 331, where Gordon's texts E and F are printed in juxtaposition with the bowl published by Hyvernat).

In our text the status of the beings addressed as *gibbārayyā d-ar'ā* or with the pronominal suffix: *gibbārah d-ar'ā*, is also quite ambiguous, though their support is sought.

The phrase "you have eyes but do not see, ears but do not hear" is reminiscent of Ps. 115:4–6.

6 **'ymh** is written with a different stylus, and was probably added later. If our translation "Dād-Gušnasp son of his mother" is correct, it may be surmised that the writer's first intention was to adhere to the formula of quoting the mother's name in an incantation; but since Dād-Gušnasp is an adversary who is being cursed, it was not possible to enquire his mother's name of him, and so the vague formula "his mother" was subsequently added. An alternative reading would be to regard **'ymh** as a proper name Imma; see above Commentary to Bowl 3:1 and note 7 there.

hwn is act. part. m. pl.; cf. Morag 1973, pp. 68–70.

6–7 **yhwwn 'ylmyn bpwmyhwn smn b'ynyhwn** etc.: Cf. **skyryn pwmhwn ... w'wryn 'ynyhwn wmtršn 'wdnyhwn** (Gordon 1941, p. 124, No. 6:1; also Isbell 1975, p. 102; earlier published in Schwab 1886, and in Schwab 1890, pp. 331 ff.).

7–8 The sequence of time designations has a number of parallels in the magic texts. Cf. Gaster 1896, p. XXVI, lines 15f.; Montgomery 1913, p. 141 (6:5–6).

ks' wryš yrḥ': The present context makes it clear, by the contrast of **ks'** with **ryš yrḥ'**, that the first term means "full moon", as it indeed does in the Bible and in Syriac. On the other hand, the Rabbinic explanation of the term, in connection with its use for the New Year, associates it with

the new moon; cf. *Encyclopaedia Biblica,* IV, col. 216, s.v. *kese;* III, col. 35–41, s.v. *ḥodeš*. It may be remarked that *šabbĕta* could also be argued to belong to the same category as *kese* and *reš yarḥā* as its original Babylonian meaning was "the full moon" (cf. *Encyclopaedia Biblica,* VII, col. 511, s.v. *šabbāt*). At this historical stage, and in the present context, this explanation would seem to be very far-fetched.

Ḥadriel seems to be attested once in the bowls, in Stübe 1895, p. 22, line 6. The name is also mentioned in *Sefer ha-razim,* p. 81 (2:12). For further references cf. Schwab 1897, p. 109; Margaliot 1945, pp. 50 f.

Šakniel is not hitherto attested in the bowls. His name occurs in *Sefer ha-razim,* p. 75 (1:152), and in Kabbalistic literature (cf. Margaliot 1945, p. 194).

wbyr w'bn wbwr: This sequence of words, with evident magic meaning, is not clear. The second word could possibly be read **w'kn,** perhaps for Jewish Aramaic **'kn, ḥk(y)n'** "snake". If this is correct, the phrase could have something to do with the famous theme of the *ḥuldā*

Bowl 7

Israel Museum, No. 80.1.3

Plate 23

(1) מזמנא הדא מילתא על שמיה <ד>מארוי בר (2) באתאי דמיתקרי אבאבאי בר {ר}

כמיפל חיסיא מן טורא כמיפל חיסיא מן טור טורא ויכמבסק גובתא מן דיחלא

and the *bōr*, the two objects certain people believe in (cf. Bavli Taʿanit 8a). The elaboration on this theme, according to which they are to constitute two mute witnesses to a betrothal, is set forth in commentaries on the text. Cf. *Oṣar ha-Geʾonim*, Taʿanit, Perušim, p. 57 (reference kindly supplied by Prof. M.D. Herr).

9 **rbʾ wdḥylʾ**: Cf. Commentary to Amulet 1:8.

dtyštqwn: The verb, to be vocalized *d-tĕšattĕqūn*, is evidently in the *paʿʿel* form.

ʾqry is taken here to be the plural of **ʾqrʾ** "fortress", with the omission of the preposition **b-**. Otherwise it could be connected to **qryt'** "town, village".

ytby šwqy qrntʾ is reminiscent of the expression *yošḇē qrānōt;* in our bowl we may have two separate expressions: **ytby šwqy** and **ytby qrntʾ**, which have merged. Cf also Harviainen 1981, p. 5, line 7: **lyḥš dqrntʾ**.

10 **ydbwq** Cf. Ps. 137:6 תדבק לשוני לחכי

Bowl 7

Translation

(1) Appointed is this incantation against (?) the name [of] Maroy son of (2) Batay, who is called Ababay son of Abdimi and all (other) names (3) that he possesses. There has happened, has happened, in the world an evil accident and a perdition(?). There has happened to him that the fire (4) has happened in the ditch and the fire came out of the bitterness of tombs and from the darkness.

(5) **šḥwṭyn wšgryn ʿymw šyr ḥṣwṣr pʿl bn lʾ**

I have brought you, I have led you and I have sent you and I have dispatched you (6) and I have conveyed you [against] Maroy son of Batay [and] against every unnamed Belti.

Do not be afraid to shout. Fall upon him (7) as rocks fall from the mountain, as rocks fall from a high mountain, and as the hill rises from that which is sand (?), and as the sun shines (down) unto (8) the earth.

Bowl 7

ויכמדנח שימשא עד (8) {אר} ארעה פולי עלוהי איכולי מן בישריה ואישתאי מן דמיה
דחלי ומררי בשום דיליד ומידחלא עיש אליון (9) כד עבד אישתא וינרג לא שמיה אמן
אמן עלחר

For the provenance of this bowl see Bowl 5.

1 **ʿl šmyh** has been translated as "against the name of", taking Maroy bar Batay to be the adversary. This assumption entails the hypothesis that **ʿl** was inadvertently omitted by the scribe before the name Maroy in line 6, but this is quite uncertain, as are many other points in this rather obscure text. It must be emphasized that we regard certain portions in the translation of this text as mere guesswork. A case could also be made for taking Maroy bar Batay as the client, for whose protection the bowl was wrtiten.

2 Abdimi is known as the name of several Palestinian Amoraim. The *resh* which is written before the name is pure dittography for the final letter of *bar*. The abbreviation *resh* for *rabbi* is never attested in this period.

šmn is a short form for the regular **šmhn**, the absolute plural form.

3 The translation "perdition" for **ʾkly** assumes that it is related to Hebrew *kĕlāyā*. The phrase **qry qry** etc. contains several ambiguities, which may have possibly been intended as puns. An alternative translation could be: "There has been called, called, in the world an evil call and cry". **ʾkly** may be associated with **ʾklywt**, which in the Targum of Psalms 104:7 renders *raʿam*, and in the Targum of Job 4:10 stands for *šaʾăgā*. Cf. Tal 1975, p. 91, s.v. **ʾkly**.

qyryt is probably the orthography for *qeryat*. Cf. Epstein 1960, p. 95 and note 254, where the Mandaean form **myṭyʾt** is quoted.

4 **kyryt** could mean, following the meanings of Jewish Babylonian Aramaic **kyrh** or **kryʾ**, either "digging, ditch"; "heap, pile"; or "circle, banquet". The most likely translation may, however, be "a stove", which is only attested in Hebrew.

ʾmyt seems to stand for **ʾmyṭṭ** or **ʿmyṭṭ**; cf. Syriac ʿMṬ. The image of fire coming out of darkness is quite unusual.

Fall upon him, eat from his flesh, drink from his blood, frighten and afflict.

In the name of he who gives birth and frightens, **ʿyš ʾlywn,** (9) while he makes fire, and the unnamed Nereg. Amen, Amen. Immediately.

5 **šḥwṭyn wšgryn** etc. constitutes a strange sequence of words, which we are unable to translate. The first two could be from the verbs **ŠḤṬ** "to stretch; corrupt (as in Syriac); slay an animal", and **ŠGR** "to flow; run; heat, kindle; send".

ʾytky is evidently for **ʾytytyky.** The accusative in this and the following verbs refers to a feminine object, apparently the fire.

6 "The unnamed Belti" is an unusual appellation, but it corresponds in this text to "the unnamed Nereg" in line 9. In both cases, although the combination **lʾ šmyh** is not usual for this kind of expression, there seems to exist hardly a different alternative for translation. On Belti one may refer to Lidzbarski 1916, p. 1217; Février 1931, pp. 64 f.; Du Mesnil du Buisson 1962, pp. 359 f., where (p. 360) it is stated that Belti is not a genuine name: "Le 'vrai nom' de la *Bēltī* à Palmyre est Atargatis ou Astarté". Since Belti is not the "real name", it is possible to understand how an "unnamed Belti" could be alluded to. In a Jewish context of magic we have Belti Adonay in Gaster 1896, p. VIII, line 20.

wlʾ tydḥly mṣwḥ: The last word is the absolute infinitive of *peʿal.*

7 **kmypl ḥysyʾ mn ṭwrʾ:** A parallel expression in Gaster 1896, p. XVIII, lines 27 f., clarifies the phrase. It says: **wʾm npl ʿlk ḥysyʾ ʾw mplh wʾt tḥwtyh.** Gaster's translation (op. cit., p. 188), "If any burden or weight falls upon thee", is inaccurate. The term *mappālā* is certainly to be connected with Hebrew *mappolet* "falling in, debris" (cf. Jastrow, p. 820). **ḥysyʾ,** as can be seen from the bowl text published here, must mean stones or rocks. Gaster's text might be translated: "If rocks or debris fall on you and you are buried underneath".

ṭwr ṭwrʾ is an expression which imitates *hor hahār* in Hebrew.

wykmbsq may be an error for **mnsq,** or **mysq,** the infinitive of **SLQ.**

For **gwbtʾ** cf. Jewish Babylonian Aramaic **gwbbtʾ, gwpptʾ** etc. The word **gwbtʾ** could also possibly mean "pit", like **gwbʾ,** but its connection in the sentence would then be obscure.

mn dyḥlʾ: On the face of it, one would be tempted to translate here "out of fear", but this would make little sense in the context. We have read **dyḥlʾ** as containing the relative **d-+ḥlʾ** ("sand"). By a slight emendation one may suggest reading **by ḥl(t)ʾ** as in B. Shabbat 110a. The phrase would then mean "as the dunes arise from among the sand(s)".

wykmdnḥ šymšʾ ʿdʾrʿh: One would have expected **ʿl** instead of **ʿd**.

8 "Eat from his flesh" etc.: The idea is not uncommon in incantation

Bowl 8

texts, cf. Naveh 1975, pp. 48 (lines 18–22), 51.

ylyd is apparently active participle of *pe'al* and **wmydḥl'** is presumably active participle *pa''el*.

'yš 'lywn looks like a corrupted spelling of Hebrew *'īš 'elyōn*.

9 **'ltr** presents a form closer to *'al-atar* than the usual Jewish Babylonian Aramaic *l-altar*. Compare Geniza 2, p. 2:13, **bpry'**, which also occurs at the end of a magic text, after "Amen, Amen".

Bowl 8

Translation

I
Bound are the demons, sealed are the dēvs, bound are the idol-spirits, sealed are the evil liliths, male and female, bound

II
bound is the evil eye away from the house of Khwadāy son of Pālī from this day to eternity. Bound is the evil eye

III
Bound is the evil eye from the house of Khwadāy son of Pālī, from his house and from his..., (and) from

IV
...and from Ādur-dukh and from her sons from this day to eternity. Amen, Amen, Selah.

This bowl was first published by Narqis 1935, with some notes added by the editor of *Tarbiz* at the time, J.N. Epstein. It is here published again so as to complete the collection of magic bowls in Jerusalem, and because the first publication, done in Hebrew, is not easily available to all interested scholars. The present reading contains a number of improvements on the *editio princeps.* It is noteworthy that this text, together with several others (e.g. those published in Stübe 1895), are not included in Isbell 1975, which purports to be "a collection of all the published Aramaic bowls" (p. ix).

The present bowl is remarkable for its arrangement. Instead of circular lines running spirally from the inside or from the rim, as is the usual practice of the magic bowls , this one is divided into four quarters or sections by two lines which go through the centre and form a cross. The incantation goes from top to bottom in each quarter, and from right to left, quarter by quarter. Each quarter contains seven lines. The bottom of each quarter, except the last one, contains the beginning of the next. This principle was partly recognized by Narqis, but he did not

Bowl 9

Formerly in the possession of V. Barakat, Jerusalem

Plate 25

Within the central circle:

(1) אחיד פכר צמר ואקים ג(ב)יה וסריח וכוכבי ומזלי

Outside the circle:

(2) וכל (קיה) ורירה דיהודה בר נני דנ(י)בש לישנה בפומיה ויתמסי רוקיה (3) בגרגרתיה ויבשון שקיה וגופריתא ואישתא תידלק ביה וילקו גופיה ב(כו)י(א) ויסח(כר) ויתנכיר (4) ויתעכר לעיני כל חזוהי וישתמח ויתבר וי(בד) וישתצי וימגר וימות ותיתי עליה שלהוביתא מן שמיא (5) וזיעא יחוד יתיה ותברא ידבקיה ומזופיתא

notice that it applies also to the connection between III and IV. At the beginning of IV two failed attempts were made to write the continuation of the inscription, and only line 3 contains the proper text.

II,1 ʾsryʾ: This spelling for ʾsyrʾ is repeated in III,1.

II,4 The Persian name Khwadāy "Lord" is quite well attested. Cf. Gignoux 1979, p. 59.

II,5 Pālī is not so far attested to our knowledge in this form, but it could be assumed to belong to the Iranian name Pahray (cf. Gignoux 1979, p. 65); or perhaps to Pālīz "Paradise" (cf. Justi 1895, p. 240, s.v. Pālīzbān).

IV, 3 As noted above, this line continues line III,7, while the lines IV,1–2 may be disregarded as containing unsuccessful attempts. The final letter is almost without doubt *kaf*. The name Ādurdukh, which is quite well attested, is explained by Gignoux 1979, p. 76, as "Daughter of Ādur".

may die, and that a flame may come upon him from heaven, (5) and shiver seize him, and a fracture catch him, and a rebuke burn in him. May the following verse apply to him: they shall fall and not arise, and there will be no power for them to stand up (6) after their defeat, and there will be no healing to their affliction. "Their eyes will darken, so that they see not, and their loins will be made by you continually to shake" (Ps. 69:24). "Let their habitation be desolate, and let none dwell in their tents" (Ps. 69:26). May the following verse (7) apply to him: "And my wrath shall wax hot, and I will kill you with the sword, and your wives shall be widows and your children fatherless" (Ex. 22:23). And the following may apply to Judah son of Nanay: "The Lord shall smite you with a consumption and with a fever (8) and with an inflammation and with an extreme burning and with the sword and with blasting and with [mildew] and they shall pursue you [until you per]ish" (Deut. 28:22). "The Lord shall smite you in the knees and in the legs with a fes[tering eruption] that cannot be healed from the sole of your foot on to (9) the top of your head" (Deut. 28:35). "The Lord shall smite you with madness and blindness and astonishment of heart" (Deut. 28:28). "And you shall eat the fl[esh of your s]ons and the fl[esh of your d]aughters" (Lev. 26:29). The throat of Judah son of Nanay shall not swallow and his gullet shall not eat, choking (10) shall fall on his palate, and paralysis shall fall on [his mouth and tongue...]. The following verse will apply to him: "The nations shall see and be confounded at all their might. They shall lay their h[and on (11) their mou]th, their ears shall be deaf, they shall lick [the dust] like a serpent, [they shall move] out of their holes like worms of the earth" (Micah 7:16–17). "The Lord will not spare him but then the anger of the Lord and his jealousy shall smoke against that man and [all the curses that are written in this] book [shall lie upon him] (12) and the Lord shall blot out his name from under heaven" (Deut. 29:19). So shall the name of Judah son of Nanay be blotted out and [his memory] shall be uprooted from the world, just as was blotted out the name of [Amalek(?)]...(13) may his members be pressed down and may there be done to him (?), judgement will come, omen and misfortune swiftly, with an inflammation, a purulence, an itch, a vermin, a blackening, a shiver, a vermin...(14)...a pirate and a satan. And in the name of šš'rb the angel, and in the name of Mot and Yarod and Anahid and Istar Tura and ... and the spirit which resides in the cemetery, all should lean on Jud[ah son of Nanay...]

This bowl is remarkable for the fact that it contains a text which is totally dedicated to cursing a specifically named individual. In this it would join Bowl 7, if our interpretation of that ambiguous text is correct. It is also unusually rich in biblical allusions and direct quotations, and in various terms for diseases and ailments. In the centre is the drawing of a full human figure, surrounded by a circle within which is a short inscription, which for the most part is unintelligible, though it can be quite easily transcribed.

This bowl, like Bowl 1, was at the time of writing in the possession of Victor Barakat. Mr. Barakat could only say of this bowl that it came from a private collection, and that the unnamed collector had told him that it derived from the Bethany area, in the vicinity of Jerusalem. We regard this attribution with scepticism, as the bowl strikes us as belonging basically with the other Mesopotamian bowls.

1 The first words seem to be a corruption of **ʾsyr pkyr ṣmyd**; cf. e.g. the sequence in Harviainen 1981, p. 5:4 **gzyryn ḫrymyn wmšmtyn ʾsyryn pkyryn wṣmydyn.**

2 **qyh:** If the reading is correct, this would be the first attestation of the noun for "vomit" in any form of Aramaic. It is of course well attested in Hebrew and Arabic.

dnybš is in the third person imperfect masculine *peʿal.* Inconsistency as to gender is very common in these texts.

The series of curses here can be compared to Geniza T-S AS 142.214, lines 18f.: ...וחהי נא עורון בעיניהם וסתום וחתום פיהם קצץ רגליהם...

3–4 **wystkr wytnkyr wytʿkr:** A rhyming sequence of verbs.

5 **qrʾh dktyb:** The following is an inacccurate reference to Jer. 8:4 and Amos 8:14.

wʾl thh tqwmʾ: A paraphrase of Lev. 26:37.

6 **lmḥtm** (like **ʾswtʾ**) is an Aramaic word used in the Hebrew phrase with a Hebrew suffix. The writer may have identified the Aramaic word **mḥtʾ** with the Hebrew *mákkā*, as in Jer. 30:17 וממכותיך ארפאך. The same connection of **mḥtʾ** with **ʾswtʾ** occurs in Montgomery 1913, No. 16:6, **mḥtʾ tḥwt ʾswtʾ.**

hmʿṭ is an error for *hamʿad.*

9 **blwʿyh,** which parallels **grgrtyh,** evidently means "his throat",

though **blwʿ** is so far unattested in this sense in Aramaic. It seems hardly likely that we have here **b+lwʿ** "jaw".

ʾskr also occurs as a name for a demon in late Jewish sources; cf. R. Margaliot 1945, p. 208. As a term for a situation of distress, together with **nkph**, the equivalent of our **ʾkpy**, we have it in a late Jewish amulet published by Casanowicz 1917, p. 53: ומכל מראים (!) בישין ומנכפה ... ומאסכרה.... Similarly Nash 1906: ממחה משונה ומחולה הנפל בר מינן ... ומחלה הנכפה ... Cf. also Gaster 1896, p. XII, line 35 **lʾskrtʾ** (written **lʾsbrtʾ**); Shachar 1971, p. 286, No. 966.

For **ʾkpy** cf. the Commentary on **ʾskr**.

11 ***wqnʾtw** written in the bowl **zqnʾtw.**

12 **ytmyḥ** error for **ytmḥy.**

13 **hdmʾyhwʾ** is seemingly written in the bowl **qdmʾyhwʾ.**

bʿglh: The sequence would have favoured here a word designating some disease or misfortune.

bšyḥnh: Cf. Gaster 1896, p. XIII, line 16 **lšyḥnh**; Gollancz 1912, p. 3, § 5 **ʾsyryn šḥnʾ wmwtnʾ wqws...**

For **šyḥlh** cf. Gen. Apocryphon **rwḥ šḥlny** and the commentary by Fitzmyer 1971, p. 136.

qlmtʾ: This is the word used by Onqelos to translate Hebrew *kinnim* in Ex. 8:12.

šḥrtʾ: In the same amulet, quoted above (Casanowicz 1917, p. 53), we also have ... ומחולי שחורה ...

rwytʾ: This may be a syncopated form of **ʿrwytʾ**; cf. Commentary to Amulet 2:2.

klmth: This seems to be a mere orthographic variant of **qlmtʾ.**

14 **wbšwm šš(ʿrb) mlʾkh:** One is reminded of various names made up with **šš...** as the first element. Cf. Montgomery 1913, p. 223 (31:17), where one should correct to read as follows: **mrmrʾwt ššqpwt ʾstr mwth.** Cf. also Amulet 7:9–10 **ššqwpwt...swsgwn brprwngs ʾstr...**

wrwḥʾ dšryʾ byt qbry: Cf. *Sefer ha-razim*, p. 76 (I:178): רוח קריפורייא החונה בין הקברות. **byt** could possibly mean "among", as in Syriac.

Bowls 10 and 11 are at the Jewish Historical Museum in Belgrade. Dr. L.Y. Rahmani of the Israel Department of Antiquities received photographs of the two bowls from Dr. Vidosava-Neda Nedomački, curator of the Jewish Historical Museum in Belgrade, and referred them to us for study. The information supplied by Dr. Nedomački was that

Bowl 10

Translation

(3)...demons and dēws...(4)...dreams of night and visions of day from...(5)...the cattle and the house of Bar-Immā son of Izdān-dukh. In the name of **ṣbʾwty ṣbʾwty** the living and the existent, in the name... In the name of **yh yhw**, in the name of **hʾ hyhn hʾ**...that you may come (6) and make healing for the body of Bar-Immā [son of Izdān-dukh] and his sons and d[aughters], which he has and which [he will have]. May (7) this Bar-Shapta son of Aḥat-Abū be protected, may that Naṭ[roy...] be protected; ... son of Rĕbītā, and this Maṭriya son of Qayyamtā, to his house and the members of his house, to his property and to his cattle (8) and to the body of Bar-Immā son of [Izdān-dukh]. In the name of the great and holy Lord, flee away, go out, you sorcerers of witchcraft, (who are) dēws and new and sealed (9) curses and spells. Go and put(?) ... sends ... As you go out in the form of birds who fly and go out and move (10) from one place to another, so will you move and go out of the body of [Bar-Immā son of Izdān-dukh, and of] his sons and daughters, which he has and which he will have. May Bar-Shapta son of Aḥat-Abū be protected; (11) and this Rĕbītā daughter of Ḥawwa... May Panāhakdukh, Naṭroy and Gushn[asp] be protected... and like wax which melts in the fire — run away!... flee away! (12) be annulled! be killed! be terminated! go away! go away from the body of Bar-Immā [son of Izdān-dukh!...against...] and against him who sent him, from that which he speaks by his mouth, and from the works that he does by hand. In the name of Qadḥiel, (13) Mappeqiel, Kabshiel, Parḥiel. [May there be] remedy ...that she may not be pressed down. And may this Bar-Shabta son of Aḥat-Abū be protected, and this Rĕbītā...

the two bowls were found in 1912 by a Jugoslav engineer, Janko Milošević, who was working on the building of a railway at a place specified as being 700 metres north of Kadhimain, which lies 6 km. north of Baghdad. The finder, who supplied this information, took the bowls with him to Belgrade. We should like to thank both the Jewish

Historical Museum in Belgrade and Dr. Rahmani for their cooperation.

Bowl 10 is broken, and what survives of it consists of two large fragments joined together in Belgrade. The writing of the lines in the centre, where the inscription begins, is largely effaced. For the reading we used an enlarged photograph of the joined fragments of the bowl (Plate 26), as well as small photographs of each fragment separately, obviously taken before the joining of the two fragments was made.

The language of Bowl 10 is Syriac written in the Estrangelo script (with some cursive modifications), in contrast to Bowl 1, which is written in the Proto-Manichaean script (cf. Commentary to Bowl 1).

4 **ḥlm' dlyly' whyzwn' d'mm'**: The same phrase is found elsewhere, cf. in Mandaic, Montgomery 1913, p. 248 (39:10); Epstein 1922, p. 60.

5 Bar-Immā bar Izdāndukh: The Aramaic name of the client is not yet attested in magic bowls. The mother's name, which is Iranian, occurs on Jewish Aramaic bowls with the spelling **'yzdndwk**; cf. Montgomery 1913, pp. 145 (No. 7), 212 (No. 27). The name is attested also in Syriac literature, cf. Justi 1895, p. 146. Justi's explanation "(von den) Ized (geschenktes) Mädchen" should probably be revised. The great number of names with *-dukh* seems to suggest that this is a mere suffix denoting "daughter of". The name Yazdān indeed exists as a masculine proper name; references are given by Justi, ibid.

ṣb'wty: It is not entirely certain whether the final sign in this word, which is repeated twice, is indeed a *yod*, as read here, or merely a final embellishment belonging to the *taw*. For **ḥy' wqym'** cf. Amulet 9:5.

6 **wtybdwn**: Quite curiously, the radical *'ayin* is here spelled by a *yod*. The vacillation between *yod*, *'ayin* and *alef* is evident in the forms **brym'/br'm'**, **'zdndwk**, **d'yt lyh**, **'rwqw**, **'tbṭylw**, **'dyh** etc. (cf. in Mandaic, Yamauchi 1967, pp. 75 f.).

wlbnh wlbnyh: The first word was apparently written by mistake and corrected by writing the word again. In **bnyh** for **bnwhy** our bowl follows the form known from the Jewish Babylonian bowls; cf. Introduction, p. 32.

7 **ḥd'**: The text uses the demonstrative pronoun *hādā*, which is properly feminine, indiscriminately, and with the curious spelling with initial *het*. One might think of the numeral *ḥdā* (which is feminine), used irregularly for masculine persons, but the occurrence of **ḥdyn rbyt'** in line 13 decides the issue. *Hādēn* is certainly the masculine demonstrative

pronoun, and it is again remarkable that it is used in line 13 for what is a feminine name; cf. **rbyt' bt ḥw'** in line 11.

bršpt' alternates (line 13) with the spelling **bršbt'**. As a name it belongs to the category of names referring to a day of the week, presumably the infant's birthday.

mṭry' is a name of unclear origin. One thinks of the name of a *dihqān* in Ispahan in the early Islamic period, **mṭy'r**, cf. Ṭabāri, IV, p. 295.

8 **prḥw wpwqw**: Further down, in lines 11–12, a longer list of similar imperatives of verbs signifying going away and being annulled is given. A similar list of imperatives occurs in the Iraq Museum bowl 44107, cf. Teixidor 1962, p. 55; Hamilton 1971, p. 117: **zḥw 'trw w'tkrzw prḥw *wpwqw** (read thus!).

mb'd': The metathesis of **m'bd'** is attested elsewhere too. Cf. our Syriac Bowl 1:11.

9 It seems that **ḥdtt' wḥtymt'** are attributes of **lwṭt' w'šlmt'**.

smw may perhaps be the imperative *pa"el* of SM' "to blind".

ḥbwq' is not clear.

bt dmw k- is the expression used for "like", "in the form of", corresponding to the regular Syriac **bdmwt**. Compare the Biblical Hebrew **dmwt k-** in Ez. 1:26 etc. Cf. Geller 1980, p. 51, line 4 **wmydmn lhwn bydmw dmw** (thus to be read!) "and they appeared to them in various forms".

dprḥn wnpqn wmšnyn: Cf. Montgomery 1913, p. 238 (36:2) **pwq pwq wšny mn qdm**...(Montgomery read **qdmy**, but only **qdm** is visible in his drawing).

10 **d'yt lyh wdnywn lyh**: Compare [**wkl d'y**]**t lh wdhwyn lh**, Montgomery 1913, p. 242 (37:3). See also Bowl 12:IX

11 **pnhqdwk** is an Iranian name not yet attested. The main part of the name, Panāhak, is obviously derived from *panāh* "protection". Naṭroy seems to be a Semitic proper name (it looks like the Semitic equivalent of Panāhak). The third name could be completed as Gušnay or Gušnasp.

'yk š'yt' dpšr' bnwr': Cf. Peshitta to Ps. 88:2 **'yk dmtpšr' š'wt' mn qdm nwr'** and similarly Ps. 97:5.

qdḥw: Montgomery 1913, p. 194 argued in favour of reading this fairly common magic verb as **qrḥ** in order to connect it to the formula in Bavli Pesaḥim 110a **qrḥ qrḥyyky**. Jeruzalmi 1963, p. 74, taking up this

idea, translated **wqrḥw wʿyryqw** by "soyez chauves (perdez votre efficacité en tant que magiciens) et éloignez-vous". Isbell 1975, No. 19:7; 20:9; 22:7 read the verb **QDḤ**, though in the glossary, p. 180, Isbell quotes inexplicably **QRḤ** for text 20:9. Our text, which has a clear distinction between *daleth* and *resh*, settles the ambiguity in a decisive manner in favour of the root **QDḤ**. Even without this evidence it would be fairly clear that a verb with the meaning "to flee" and not "be bald" is required. Mandaic has **uqda upuq uʿruq** (Yamauchi 1967, p. 230, line 12) in the same context. See already Epstein 1921, pp. 41 f., who establishes the basic meaning of the word " to pierce, rise". For the other meaning of **QDḤ** "to wail, moan" see Bowl 13:20.

[ ] אמן אמן סלה

ʿrwsw is not clear, and seems to be a mistake for **ʿrwqw**, which is indeed written immediately afterwards, but with a new modification, substituting *alef* for *ʿayin*.

12 **mšdrnyh** could mean "they who sent him".

mmll pwmyh: This seems to be a verbal noun, **mmllʾ**.

qdḥyʾyl, mpqyʾyl, kbšyʾyl, prḥyʾyl: A series of names derived from verbs denoting the chasing out or the subordination of the demons.

13 **lkbyšwh:** The first letter looks like a *lamed*, although in Syriac one should have expected a *nun*.

Bowl 11

Translation

(1)... to the threshold of Khusrau, to Bar[-Ida son of] Izdān-dukh ... (2) ... and to Bar-Ida son of Izdān-dukh and to ...wrote names ... (3)... from pains and illnesses and evil sicknesses and from jealousy and from mighty spells and from evil speech (?) ... and from all the words which the frightening enemies (4) are hiding and from... sorcerers and mighty ones and from curses and from spells and from submission (?) and from ...and from... which the enemies curse and from (5) all evil things. Amen, Amen, Selah. "And the Lord said unto Satan, The Lord rebuke thee, O Satan: even the Lord that hath chosen (6) Jerusalem rebuke thee: is not this a brand plucked out of the fire?" (Zach. 3:2). "Hear, O Israel, the Lord our God is one Lord" (Deut. 6:4). "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty" (Ps. 91:1). Amen, Amen, Selah.

Again, may there be healing from heaven to the threshold of Khusrau son of (8) Izdān-dukh, so that he may be healed by the mercy of heaven, and any name that is in him [...(9)...should be removed from] the threshold of Khusrau son of Izdān-dukh... Amen, Amen, Amen, Selah.

Bowl 11

For the provenance of this bowl cf. Commentary to Bowl 10.

Although the bowl itself is intact, the inscription written on its inner surface is badly effaced. Having only the photographs at our disposal, we avoided readings which seemed speculative, and have concentrated on those which have seemed relatively certain. The writing begins in the outer rim and ends in the centre, going around an illustration which is not clearly discernible. It may be a human figure with two smaller drawings to its left.

1 **šlhpt'** seems to be an unusual spelling for **šlhwbt'** "flame", cf. Montgomery 1913, p. 183: **lgw nwr' yqydt' wylšlhwbt 'yšt'**. In Bowl 1:7 we have **šlhbyt'** and in Bowl 9:4—**šlhwbyt'**.

šḥmt' may mean "blackening" or "heat". It also occurs in Geniza 6, p. 3:6–7, where it seems to indicate the blackness caused by fire. If **šlhpt'** means "fever", it is possible to take **šḥmt'** as indicating some other symptom of disease, perhaps like **šḥrt'** in Bowl 9:13.

Khusrau son of Izdān-dukh and Bar-Ida son of Izdān-dukh may be brothers. It is interesting to note that the client of Bowl 10 is Bar-Imma son of Izdān-dukh. The two bowls, though written in two different scripts, may stem from the same family. If this is so, we have here another indication for the hypothesis that the script (and language) of a bowl does not represent the language used by the client, but only that which was used by the sorcerer. The sorcerer may have belonged to a different religion or nationality. Cf. Introduction, p. 18.

2 **š(mn)** cf. Bowl 7:2.

3 **(kwrhny')**: See above Commentary to Bowl 1:11.

mhryn: This is the first occurrence of this word in Aramaic to our knowledge (the reading might also be **mhdyn**). Our reading is based on the assumption that this is a loan-word from Iranian; cf. Middle Persian *mahr*, Avestan *manthra-* "(sacred) word".

mml' perhaps an error for **mmll'**.

pydg(my): If the reading is correct, this is a form of **ptgm/pytgm** on the way to becoming **pugdama**, as in Mandaic.

dksyy snyy: The first word is active participle *pe'al* plural masculine, while the second is plural of *san'ā/sanyā*.

4 **ʾryswtʾ**: If it is not a graphic variant of **ʾsyr**, would be connected to the notion of the submission of an *aris* "tenant".

lyty is the active participle *peʿal* of **LWṬ**.

6–7 The two verses, Deut. 6:4 and Ps. 91:1, are joined together into a single text by taking one word from one verse followed by one word from the other text. The same procedure is also used in Schwab 1891, p. 592 (Bowl O); Gordon 1978, p. 233; and T-S K 1.95.

8 **wkl šwm dʾyt byh**: The usual formula is with the preposition **lyh**, cf. Bowl 7:3. The use of **byh** may be influenced by another formula such as we have in Bowl 5:3 **kl šydy...dʾyt bh bʿlmʾ**.

Translation

They stood up and chased him and found him *in pelagos, the great sea, [*Jer. adds:* and they sought of them] to kill him and strangle him.

He said to them: Let go of me, and I swear to you in the name of He "who has measured the water in the hollow of his hand [*N.Y. adds:* and meted out heaven with the span, and comprehended the dust of the earth in a measure, and weighed <the mountains> in scales and the hills in a balance]" (Is. 40:12),

that wherever the name of **s'wny wss'wny wsngrw w'rtyqw** is mentioned I shall [*N.Y. adds:* have pity and shall] not kill or strangle [*Jer. adds:* or injure]

the house of Agbalta son of Qarqoy and any children whom they —Qaqay daughter of Poziqtoy and Agbalta son of Qarqoy—have and will have.

the children of Zabinu son of Zuni and his wife daughter of Gusi, those whom they have and those whom they will have from this day to eternity, Amen, Amen, Selah, Hallelujah.

The Jerusalem bowl (12a) has been recently received by the Jewish National and University Library. It is unusual in that it contains a story which occupies the best part of its text, and in certain other features. The bowl was donated to the Library by the late Professor Gershom Scholem. Professor Scholem had received it as a gift from Dr. Wladimir Rosenbaum, an antique dealer in Ascona (Switzerland).

The most striking feature of this text, as already pointed out, is the fact that it is built around a story with a magic effect, a *historiola*, to use the term applied to it by Heim 1892, p. 495 (cf. also Maas 1942, pp. 37 f.). Such stories are practically unknown in other Aramaic magic bowls, although certain bowls contain brief allusions to story situations. Such is the allusion to Yĕhoshuaʿ bar Pĕraḥya and his deed of divorce to the female demons in certain bowls, e.g. in our Bowl 5 and Montgomery

Bowl 12b

ברוך אתה יהוה אלהינו מלך העולם

Translation

Blessed art Thou **yhwh** our God, King of the world, who smites and cures Zabinu son of Zuni and Duti daughter of Gusi and Zuna son of Duti, Amen, Amen, Selah. True and sound.

Bound is Lilith, bound is Mevakkalta, bound is št' ... bound is ... bound is ... bound is the idol, bound are all the evil harmers who are in the house of Agbalta son of Qarqoy ... "Sixty valiant men are around about it, of the mighty men of Israel, all girt with swords, and expert in war, every man has his sword upon his thigh, because of the fear by night"(Cant. 3:7–8).

1913, No. 32 (see also Gordon 1978, pp. 233 f., and our Amulet 7). Incantations with fairly elaborate *historiolae* are, however, quite common in Greek and in Syriac magic literature (cf. Heim 1892, pp. 495 ff.; Gollancz 1912, pp. 14f., 85, 87, 89).

Another interesting feature of this bowl is the fact that it contains a number of Greek words. This is a feature which is totally unknown in other Mesopotamian bowls, and one which has raised initial doubts as to the authenticity and original provenance of the bowl, as most Aramaic incantation bowls whose provenance can be ascertained derive from the area of Mesopotamia and Iran, where the number of Greek elements is rather limited. Although the provenance of our new bowl is unknown, it can be established by parallel material that it is Babylonian. The Metropolitan Museum in New York possesses an unpublished bowl

(our Bowl 12b) whose text closely resembles that of our Jerusalem bowl, although the names of the clients are different, and the opening formulae are also cast differently. The Museum records note that the bowl in question, No. 86.11.259, was acquired in 1886 by Mr. Ward, a curator of the Metropolitan , while he was on a journey in Mesopotamia. Another bowl which undoubtedly has the same story was published in Gordon 1941, pp. 346 f., from the Hilprecht Collection, and it "presumably comes from Hilprecht's excavations at Nippur". Gordon could only read a few detached phrases in that bowl, and we have not seen the bowl itself, but the extracts given by Gordon leave no room for doubt that it is in fact the same basic text as in 12a (with the same orthographic peculiarities), although, like the New York bowl, it has a dedication to a different client preceding and following the story.

The *historiola* which forms the basis of the incantations contained in these bowls has numerous parallels in Greek, Ethiopian, Coptic, Hebrew, Rumanian and other texts (see Appendix to Amulet 15). A striking parallel to the texts of these bowls has reached us when the book was ready for publication. Amulet 15, which is in the Israel Museum, turned out to have the same story in a shorter version, but with some details which are certaily more original than their counterparts in the Babylonian bowls. For further details see the commentaries and the Appendix to Amulet 15, as well as the text of Amulet 15 printed above in a parallel column to the texts of Bowls 12a and 12b.

In contrast to the phrasing of Amulet 15, it may be noted that although Bowls 12a and 12b have borrowed certain key expressions from a Palestinian source (the Greek name Sideros, the hybrid Greek Aramaic expression **plgws[d]ymh rbh,** the verb **ʾrtq**), the language of the bowls has nevertheless come under the influence of Babylonian Aramaic (e.g. **ʿly – ʿlwhy; btryh – btrwhy;** the use of *waw* for original *qamaṣ* in Bowl 12a, and other orthographic features). The most important aspect which emerges from the comparison of Bowls 12a and 12b with Amulet 15 is a certain number of textual misunderstandings in the bowls (e.g. **wʾrtyqw** was taken to be a proper name; **wʾdrykw...lgw** for **bgw,** in section VII). For further discussion see the Commentary below.

Some general differences of style and language can be noticed between the Jerusalem bowl and its New York counterpart:

(1) The orthography of the Jerusalem bowl has several peculiarities

which the New York one does not share. The *qamaṣ* vowel is frequently spelled in the Jerusalem (and in the Hilprecht) text with a *waw* indicating presumably that it tended to be pronounced *o*. Thus **smwmyt** (N.Y. **smmyt**ʾ), **qdwmwhy** (N.Y. **qwdmwhy**), **wʿwl** (N.Y.: **wʿl**), **ywtyh** (N.Y.: **ytyh**), **qwmw** (N.Y.: **qmw**). This way of spelling is not unusual in the Aramaic magic texts, and it has been claimed to be a feature of Babylonian Aramaic in general (cf. Rossell 1953, pp. 20 f., § 3.15 and the literature adduced in Morag 1979, p. 115, n. 21 and p. 116, n. 25). See further Introduction on p. 32.

(2) Although both texts tend towards a *plene* spelling with *yod* in words which are not commonly so spelled in Babylonian Aramaic, e.g. **lybrh, ʾyqṭwl, ʾyḥnwq, ʾyḥbwl, myštbʿnʾ**, as well as in the relative **dy-** (e.g. **dymyḥd, dynḥšh**), the New York bowl has such a spelling sometimes with the conjunction **w-** (**wyṣwḥt, wyrdpw, wygbʿwt** [Hebrew], **wydhwn**), a feature which is again found also in other texts (see Commentary to Bowl 2).

(3) The Jerusalem bowl is more explicit in several cases in the use of pronouns, while the New York bowl is more elliptic: In section IV Jer. **wʾmrt lhwn**, N.Y. **wʾmrt**; Jer. **lyt ʾnʾ pṭḥʾ lkwn**, N.Y. **lyt ʾnh pṭḥʾ**; in section VIII Jer. (and Hilprecht) **wʾmr lhwn**, N.Y. **wʾmr**.

(4) The New York bowl, on the other hand, is more expansive in some quotations and set phrases. Cf. the quotation in section VIII, where the full biblical quotation as well as the addition of **ʾytrḥ(m)** "I shall have mercy" occur only in the New York bowl; similarly in section IX we have in N.Y. the addition of the phrase **mn ywmʾ dnn wlʿlm ʾmn ʾmn slh hllwyh.**

(5) Some differences of detail indicate that the text of N.Y. is inferior to that of Jer.: Jer. has the name **sdrws** as against **srgys** in N.Y. (cf. Appendix to Amulet 15); Jer. **lḥd ṭwrʾ dymyḥd bʿlmʾ šmyh** seems the original version as against N.Y. **lṭwrʾ ḥd mʾḥyd šmyh**; Jer. **dwktʾ dnʿbr wnyʿwl ʿlh** seems better than **(d)rkyh nʿbwr wnʿwl ʿlyh**; the same may apply to the omission in N.Y. section VII of the words **wbʿw (mynhwn)** which occur in Jer.

In addition to the following textual comments the reader is advised to consult the Commentary to the approriate lines in Amulet 15. The following comments are arranged by the sections as given in the transcription of the text.

I New York and Hilprecht have an introductory section mentioning the client while Amulet 15 and Jerusalem start with the *historiola*.

II Jer. **sdrws** supported by the traces in Amulet 15; N.Y. gives **srgys**, which is evidently a corruption. Cf. also Ethiopian Werzelya (see Appendix to Amulet 15).

III **dymyḥd bʿlmʾ šmyh:** There seems to be no room in Amulet 15 for such an epithet, although a reference to a mountain may be reconstructed there.

For the phrase Jer. **lḥršyn dynḥšh** N.Y. gives **mqdšh dynḥš**. The whole phrase seems to be a corruption from an original text where instead of **ḥršyn** the similar-looking word **trʿyn** was written, as in Amulet 15.

wʿbdyn dprzlʾ: In Hilprecht we may read **wʿbdy dprzlʾ wʾtʾ** (Gordon 1941, p. 346).

IV **sʾwny wssʾwny wsngrw wʾrtyqw:** The division of words here is ascertained from a comparison of all the places in which the names occur in the two bowls, in the amulet and in the later traditions.

ʾrtyqw, which is the verb meaning "and they knocked (on the door)", as in Amulet 15, was misunderstood by the writers of our bowls and they took it to be a part of the series of names. It is likely that they regarded **sngrw** as a word with the same shape.

Our two bowls seem to waver between taking these three characters as a singular entity or as a plural. Thus we have **wʾtʾ... wʾmrw lh.. wpṭḥt lhwn... wṣwḥt ʿlwhy**, etc. The Greek version of the Gyllou story (see Appendix to Amulet 15) treats Sisinios, Sinēs and Sēnodōros as a singular (ὁ ἅγιος); this point occurs in the story more than once. These three names are seemingly phonetic variations on a single form, a point which is strengthened by the observation that the names are once given in the Greek text in the vocative ὦ Σισίνιε, Σίνη καὶ συνοδία (Sisinios, Sines and company). In Amulet 15, which seems closest to the original version, the three names consistently attract plural form.

dwktʾ dnʿbr wnyʿwl ʿlh: This may be a corruption of a phrase in the original version; Amulet 15 does not provide us with the possibility of a satisfactory reconstruction. The N.Y. version presents us with another unusual phrasing.

V This paragraph implies that a new son was born to Smamit in the meantime. This is said explicitly in the Greek version (see Appendix to Amulet 15). The sequence "to kill and to strangle", which may strike

one as illogical, occurs twice at least (cf. sections VII and VIII), although in N.Y. line 12 the sequence is "strangle", "kill". Amulet 15 uses the verb "to kill" exclusively.

V–VI In Hilprecht we may reconstruct (cf. Gordon 1941, p. 346): **[w]ḥnq ywtyh wqmt wṣwḥt *ʿlhy ʾsʾwny wssʾwny wsngrw wʾrtyqw.**

VI The spelling **ʾsʾwny** in the Jer. and Hilprecht bowls suggests the Greek vocative participle attached to the name in the appropriate syntactic situation, which makes it possible that there existed a Greek *Vorlage* from which the Aramaic version derived. The Greek text of Perdrizet 1922 indeed has a vocative form of address at this point (see Appendix to Amulet 15).

VII Jer. **btryh**, N.Y. **btrwhy**: Both forms are attested; cf. Rossel 1953, pp. 21 f., 58.

wʾdrykw ywtyh, "they found him", was misunderstood by the writer of the bowls as meaning "they led him"; see Commentary to Amulet 15:15–16.

lgw: Mistake for **bgw**.

plgws ymʾ rbh: See Commentary to Amulet 15:16.

wbʿw mynhwn: This phrase is not given in N.Y. **mynhwn** seems to be a mistake.

VIII The short quotation from Is. 40:12, as given in Jer., occurs also in *Sefer ha-razim*, 1:226. In Hilprecht we reconstruct **[bšʿ]wlw mym dkl ʾtr**...(cf. Gordon 1941, p. 347), where we also have the short quotation. Amulet 15 gives an Aramaic version of the short quotation.

kl ʾtr d-: See Commentary to Amulet 15:19.

IX The feminine name Qarqoy occurs also in Isbell 1975, p. 110 (No. 48) and Qaqay (fem. pr. n.) in Isbell 1975, Nos. 47 and 32 (spelled **qʾqy**). The name Qaqay is Iranian from *Kaka* "uncle, brother-in-law".

The N.Y. names give more the impression of being Semitic than Iranian.

X For the phrase **mk(h) wrwph** cf. Gordon 1941, p. 352 ברוך מכה ורופא and Amulet 1:20.

XI The verse Cant. 3:7 occurs also in Isbell 1975, No. 66:3–4.

are idle (?) (10) and those women who give birth, sons of lust and prostitution, sons of abortions, sons of virgins, sons of destroyed houses, sons of broken jars, sons of mighty ones who were weak, sons of a land which kills its inhabitants. Your food is the flesh of each other, your drink is black water; you bark like dogs, you grunt (11) like pigs, you hiss like snakes, you are called by Shamish(?).

You make yourselves visible to Yawitai d. of Ḥatai in bad dreams, in a hateful shape. You make yourselves visible to her in (the shape of) gold and silver, plumb, brass and lead. You make yourselves visible to her in the shape (12) of cedar (?) and tree, in the shape of myrtle, tree of chastity and pines. You make yourselves visible to Yawitai d. of Ḥatai in (the shape of) camels, oxen, donkeys, lions, wolves, tigres, cats and monkeys. (Your) forms will be like the forms of the dead. (You make yourselves visible in the shape of) father and mother, grandfather and grandmother, a lad and a lass, a pregnant woman (13) and a child-bearing woman, tombs of fright, midwives of diviners and soothsayers, burning ovens, unmended looms. You make yourselves visible to Yawitai d. of Ḥatai (in the shape of) winged animals of the earth and birds of the sky.

There came to you the lord Bagdana. They gathered you, they suppressed you, they brought you down underneath the big mountain of iron. (14) There came attendants (?), they cast you, dēws, they struck against your hearts arrows of iron, he brought down upon you a large flint rock of unhewn stone, he caused the sea and its cliffs to flow over you.

Peace without peace shall be upon you, dēws, for the great day of judgement. That which is on the right hand and that which is not on the right hand shall be upon you, evil spirits and the evil fates of the sky, troops, goddesses, (15) sons of destroyed houses, sons of broken jars.

That which you say, "Let us go and shoot(?) the pride(?) of the mighty one, the protectors on the earth, like the goddess Deliwat (who) comes at your head, mounting a lion, holding a lance in her hand, handing over a *zargona* to the gods and a *zargona* to the goddesses, they all covered the gods of the sorcerers" — you do not know, dēws, (16) that a man come against you from the outside, whose name is Kantioel. He holds in his hand a cutting knife, and (he holds) between his fingers a Satan's sword; he came to wreck the houses of the gods, and he wrecked all the goddesses, they wrecked their table, they cast away their chalice, they sprinkled fat in the four corners, they trampled upon their horns, they broke their trumpets, (17) they turned their joy into grief.

When you recall the great dēw, as there was a battle in old times, you go out and make yourselves slaves of **ʾwrws** the violent dēw, the evil amulet-spirits, the impure amulet-spirits, the impious amulet-spirits; place three aloes ‹and› myrtle on your heads from the prostitute(?) vine ‹of› Deliwat (?) – you do not know, dēws, that a man from the outside came against you, (18) Nuriel, the great Nuriel is his name. He is clad with fire and is covered with fire (and) a flame of fire comes out of his mouth.

When you recall the great dēw, as there was a battle in old times, you go out and make yourselves slaves of Zarne, the violent dēw, you blow horns, you sound trumpets, you set tables, you mix (drink in) chalices, you dress up wreaths, (19) and throw about perfume.

That which you say, "Let us go and (make ourselves visible) to them in the shape of a human being and we shall not spare a living creature in their dwellings; let us kill the old in their granaries, and the dumb in their wagons; let us sweep away the children in the market places, let us chase them in their bodies, let us chase them in their roads" — you do not know, dēws, that a man from the outside came against you, whose name is Dahba; (20) the whole earth is aglow with his splendour, and all the mountains are resplendent with his shape. The men of darkness were lowered, the evil fates of the sky (and) the troops were annulled, the sick rose, the [evil i]llness was healed, the dēw Nana(?) lifted (?) the mountain, the mountain moaned and wailed; the evil spirits...

Woe, woe upon you, dēws, that you make yourselves visible to Yawitai d. of Ḥatai and to Zorigai (21) s. of Imma, that there was sent and there came upon you, dēws, Shamish for battle. Ten of their angels who came to the presence of Shamish, five mysteries from the demon house of Shamish, angels who came to the presence of Shamish, are clad with fire and covered with fire, and a flame of fire comes out of their mouths.

Commotion(?) upon you, demon and dēw, and Danahiš (22) and judges and an acquitted person, and idol, and male and female Lilith, who dwells with Yawitai. A bloody destiny is killing all, as in inundations of blood and wrath. The battle against the demons is approaching, the slaughter of impure and evil amulet-spirits is killing.

Bowl 13

This bowl, from the Victor Klagsbald Collection, was put together from fragments by Mr. Rafi Brown. Almost the whole bowl was restored, with only a small fragment missing near the rim.

This is the largest bowl of its kind seen by us, and may be the largest recorded so far. The most common size of Aramaic incantation bowls "is of about 16 cm. diameter at top, by 5 cm. full depth" (Montgomery 1913, p. 13), and the size of "one large bowl" is 28x16 cm. (ibid.; cf. also Montgomery 1913, pp. 321–326). The present bowl, in contrast, measures 30–34 cm. in outer diameter (the measurement varies because the rim of the bowl is not a perfect circle), and the height, measured from the outside, is 14–15 cm. (again there are variations in the height of the bowl around the rim). Apart from the physical size of the bowl, it is also remarkable for its inordinately long text, as well as for the fact that it contains several phrases and expressions that are found here for the first time. For this reason some points in the text remain obscure. The structure of the text is unique, with its detailed description of the magical force appealed to, which is called Marya Bagdana.

The drawing in the centre of the bowl depicts a standing human figure with arms which touch each other as if meant to be crossed. A circle seems to be drawn round the feet of the figure. Around the whole figure a serpent is drawn as a *uroboros*, and another serpent is shown inside the circle formed by the first one, surrounding the figure on three sides, but not at the bottom. The inscription inside the circle identifies the figure as Lilith, although it has no features which would identify it as feminine.

1 The reading **(ly)lyt'** is not absolutely certain, but the comparison of the phrase with what occurs in lines 7 and 22 shows that it must be Lilith, for this is the demonic being that is consistently said to be "dwelling" (**šry'**) with the client.

The name Yawitai/Yoitai may be a variant of Ya'ita (see Amulet 2), with the characteristic Babylonian ending *-ay* (as in Zorigai), which seems akin to the ending *-oy*, also attested widely in Babylonian names. These endings may be of Persian origin; see Commentary to Bowl 3:2.

Ḥatai, a name which is attested under the form Ḥatoi (e.g. Isbell 11:3, 9 and other places; see index to Isbell, p. 90), is almost certainly a derivative of *'aḥat* "sister", with the proper-name ending *-ay/oy*.

2 The spelling of the verse shows the interesting rendering of the *qamaṣ* with *waw* in **qwmk**. The third word in the original verse is **thrs**, and it was replaced apparently by a different verb, of which the last

letter is *ṣade*; the verb may thus possibly be **trʿṣ**, which occurs in verse 6, or **ttṣ. yklmw** stands for the biblical **yʾklmw.**

3 The opening formula is vaguely reminiscent of the formula in Montgomery 1913, No. 2, where, however, the expressions used are in the first person singular. The combination **ḥylyh ... mymrʾ** occurs also in a Mandaic incantation text, where we have **bhilak umimrak utušbhtak** (Yamauchi 1967, No. 22:187–188).

rbh is used as a name of the deity, as in Bowl 6:9 **byšmyh ʿdʾrbʾ wdḥylʾ.** A similar usage can be detected in Amulet 1:8 **rbʾ gybrʾ wdḥylʾ**; Amulet 7:15 ... **krsyh dʾlh rbh ḥsynh wdḥylh.** In the first of these cases **rbʾ** may still be a noun, qualified by **gybrʾ wdḥylʾ**, although it reflects the Jewish liturgical sequence האל הגדול הגבור והנורא, while in the last case **rbh ḥsynh wdḥylh** are evidently all epithets of **ʾlh.** However, in the Syriac Amulet 6:1–2, the sequence **br tʾwn, rbʾ ḥsynʾ, qdyš ʾylʾ** gives us the names of three deities, the second of which is "the mighty Rabbā", with *Rabbā* serving as proper name. It is doubtful whether **rbh dʾylhy,** which we may have been tempted to translate "Lord of the gods" belongs here, as it has a clear parallel in Montgomery 1913, No. 19:5 **mryʾ rbʾ dʾylhy** (according to the reading of Epstein 1921, p. 49), which in its turn corresponds to **mlktʾ rbtʾ dʾystrʾtʾ** (No. 19:6). In Montgomery No. 19 **rbʾ, rbtʾ** are adjectives qualifying **mryʾ, mlktʾ.**

bgdnʾ: The term is quite familiar. It is used both generically for deities or demons, and as a proper name of the king of the demons (cf. Montgomery 1913, No. 11:5, and No. 19:6, with commentary on p. 198). The original meaning of the Persian word is evidently *bag-dāna* "a temple" (see Shaked, forthcoming). The name is attested apparently also as a proper name of a person in official Aramaic, see Cowley 1923, No. 17:1. The deity Bagdana, although he is described as the chief of the demons, occurs as a divine figure which is addressed in magic texts in supplication for help, as is the case here.

ʾzyzʾ: The spelling of this word with an *alef* suggests that it is not the adjective "strong, powerful", but perhaps a proper name (possibly derived from the adjective; cf. **ʾzzyʾl**, Montgomery 1913, No. 19:18), which may have been used in apposition to Bagdana. An analogical usage of the epithet **ʿzyz** can be seen in Montgomery 1913, No. 28:5 **bšmh ddlybt ʿzyztʾ.** For a deity **ʿzyzʾ** one may compare Nabataean **ʾlʿzʾ**, Arabic *al-ʿUzzá*, see Cantineau 1930–1932, vol. 2, pp. 128–129; *Encyclopaedia of Islam*, s.v. *al-ʿUzzā.*

r'yšh dšyty mlkwt' seems to be in apposition to **mlkh**. This is hardly a case of **r'yšh** being used as an adjective for **mlkh**, as in Biblical Hebrew **hkhn hr'š** (II Chron. 31:10; Ezra 7:5), a usage which is unattested in a later period either in Hebrew or in Aramaic (in Jer. 52:24 **khn hr'š** is rendered in the Targum **khn' rb'**). The phrase **r'yšh dšyty mlkwt'** does not mean "his head is of sixty kingdoms"; we have a description of the head further on in line 4 **r'yšyh r'yš' d'ry'**.

šyty is the form for "sixty", besides **šytyn**, cf. Epstein 1960, p. 127. The number "sixty" is fairly widespread in magic texts, sometimes together with "eighty". Cf. Montgomery 1913, No. 19:8–9; Yamauchi 1967, Nos. 20:16f.; 27:13. Like **šyty/šytyn** there is also **tmny** (Montgomery 1913, No. 19:9)/**tmnyn** (as well as **tmnn**), although the form **tmny** is not recorded in Epstein 1960 or in Rossell 1953. (The latter, p. 34, quotes Montgomery 1913, No. 19:9 as reading **tmnn**, which is an error. Rossell himself, on p. 110, gives the same text with the correct reading **tmny**).

hyl' (dzyq'): Cf. Montgomery 1913, No. 12:8 **nšpyn kyzyq' brqyn kybrq'** "blowing like the blast, lightening like the lightning".

4 **swgy'** could also be translated "walking".

kkyh: For this ending of the plural noun with 3rd per. sg. m. possessive pronoun see Epstein 1960, p. 123; Rossell 1953, p. 38, and our Introduction, p. 32.

dybth might be read **dwbth** "a she-bear", but this is less likely. **dibia** "wolves" occurs as a killing agent in the Mandaic text published in Yamauchi 1967, No. 33:11. Wolves are commonly associated with demons in Iranian texts. On the confusion between "bear" and "wolf" in Jewish sources see Kook 1943/44.

5 **syrpy pwmyh**: We have assumed that **syrpy** is derived from the root **SRP** "to swallow, gulp down" (cf. **ŚRP** in Jastrow for Jewish Aramaic, **SRP** in Drower and Macuch for Mandaic, and in Brockelmann for Syriac); the alternative senses of the root **SRP** may also give suitable meanings: "burning" or "resin". A similar expression is found in Montgomery 1912, line 4: **dsrpyhwn brq'** (= Hamilton 1971, No. 1:4).

'dwgy dnwr': For **'dwg'** cf. Brockelmann, p. 5b; Drower and Macuch, p. 7. In Mandaic both forms, **adugia** and **dugia**, occur. The expression in Bavli Ḥullin 111b **by dwgy** is said to designate a receptacle for fat drippings, but one wonders whether it does not mean literally "(that which is) in the oven".

(k)pydyh is a compound of **kp-yd**, with the first element remaining unchanged in the plural. The literal translation is of course "the palm of the hand", but the combination **kp' dyd'** is used in Bavli Ḥullin 54a in the sense of "shoulder" (see Rashi). The writer of this bowl may have been particularly well-versed in Talmudic expressions; cf. Commentary on **gygly b'nn'** and on **gb' dygyl'** below.

gygly b'nn' seems to recall the expression **'nny bglgl'** in Bavli Berakhot 59a, which comes as an explanation of "thunders" (based on Ps. 77:19).

ṣydyh stands for **ṣyd'yh**.

sdn' dprzl': The same expression occurs also in a Mandaic magic text, cf. Drower 1938, p. 3:22.

6 **gb' dygyl'**: This combination of words occurs in Bavli Shabbat 110a and Menahot 42b: **gby' gyl'**, meaning "alum". It may contain the Persian element *gil* "clay". The back **(gb')** is compared to alum **(gb' dygyl')** possibly because of the pun element involved.

šqyh šqy nḥšh wprzl' is reminiscent of Dan. 2:33 **šqwhy dy przl.** Much of this passage is constructed like the description in Dan. 2.

pryḥy: The root **PRḤ** means "to bloom", "to fly", as well as "to shine, spark". On the semantic relationship of "to bloom" with "to shine" see Morag 1972, pp. 4 f., and below Commentary to line 20, **ṣmḥy**. For our translation "sandals of sparks" cf. the Mandaic expressions **sandlia ḏ-ziua** (e.g. *Ginza S.* 97:19); **sandlia ḏ-kima; sandlia iaqdana** (*Johannesbuch* 100:7), quoted in Drower and Macuch, p. 313.

mrkbtyh mrkbt' lṭby: Cf. the Syriac bowl in Hamilton 1971, No. 1:56 **mrkbthwn mrkbt lṭ'b'**. Our text is irregular; it should have read either **mrkb' <d>lṭby** or, as in the Syriac, **mrkbt lṭby.**

tyty: The feminine form, written by mistake, may have been caused by the word **mrkbt'**.

gys: We should normally have a final *alef* here, for which there is space on the surface of the bowl, but it does not seeem to have been written. An analogy for such an unexpected *status absolutus* in the same position is found in line 14 **'t' prgwd**. Gaster 1896, p. XVIII:31 has **'m npl 'lk gys'**.

7 **qryb** is perf. in the *pe'al* form.

'l šydy w'l dywy etc.: This has a parallel in lines 21–22.

dnḥyš: Probably of Persian derivation, cf. Shaked (forthcoming).

mlwyt': Cf. the expression in Montgomery 6:3 **dlwyn 'mhwn wdšryn bgw btyhwn.**

zwryg'y contains probably *zōrīg* from Persian *zōr* "power", though it could be read as *zīrīg*, from Persian *zīr* "wise".

8 **pwlqt'** seems to be a form related to *pelqā*, attested in Syriac, and Mandaic **pilqa** with the meaning "axe, hatchet", and in Jewish Aramaic **plq** "fissure, wound". The Jewish Aramaic verb PLQ is only attested once in the variants to Bavli Gittin 69a, and thus may be regarded as a denominative. The ultimate origin of the word seems to be Greek πελεκύς, cf. Brockelmann 1928, p. 576a; Jeffery 1938, p. 229 (on Arabic *falaqa*); Kaufman 1974, pp. 82f. (where the alleged Semitic root is relied upon with no good reason).

mwqrh, mwqdh: Aramaic seems to possess two words which look similar, and which have caused some confusion because of the similarity of *dalet* and *resh* in the Hebrew script. The one word, **mwqr'**, has the sense of (1) "brain, marrow", (2) "yolk of an egg". This word is attested in Jewish Aramaic (where only the first sense is known, cf. Targum Job 21:24. Targ. Jonathan Deut. 28:28 has for *šiggā'ōn:* **šwwyywt' dmtpš' mwqd'**, where **mwqd'** is evidently miswritten for **mwqr'**); Syriac (where two forms, *mūqrā* and *mūqlā*, are attested, both having the sense of "yolk"); and Mandaic (where both senses are known). The Arabic *muqla* "pupil of the eye" has been pointed out as a cognate. The other word, which exists only in Jewish Aramaic, is **mwqd'**, and is the equivalent of Hebrew *qodqod* in the Targum (Ps. 7:17, Targ. Jonathan Deut. 28:35), meaning obviously "top of the head".

In our text we seem to have for the first time in Aramaic literature the two words attested side by side. Although the difference between *dalet* and *resh* in our bowl is not always very pronounced, the two letters can be differentiated in most cases. In this particular case a distinction between *resh* in the first word and *dalet* in the second is clearly present.

't'...qryb...rmy...tbr...špyd...mḥwnh...ḥbyl...bṭylw: This sequence of verbs presents a confusing picture. Some of the verbs are in the singular, others (**mḥwnh, bṭylw**) are in the plural. A similar problem exists below, lines 13 f., where we have **'t'...knšwnkw kbšwnkw w'ḥytwnkw ... 't' ... rmnkw ... nqš lkw...'ḥyt 'lykwn...'ṭp 'lykwn.** Another series occurs in line 16: **'t' ... shwp ... shpwnhw ... šdwnhw ... zlḥ lhw ... bsy' ... tbrw ... šwy'**; in the last series the forms of the verbs include not only singular m. and plural m., but also two forms of what looks like singular feminine (**bsy', šwy'**). One may try to explain the divergence of number by assuming that the text uses without distinction a reference either to

mry' or to **gys/prgwd** (the latter nouns being considered as plural), but the last sequence (line 16) has no plural noun which one may refer to. The alternative explanation could be that the distinction between singular and plural in the perfect 3rd. person was weak, because, perhaps like in Syriac, the final vowel of the third pl. m. was not pronounced. The forms with object suffixes where the plural forms are fully pronounced indicate that all the forms of the verbs (except the initial **'t'**) may have been intended as plural 3rd. m., referring perhaps to the host of agents helping the main figure. **shwp** may be compared to the Jewish Babylonian Aramaic like **'mwr** "they said" etc., cf. Epstein 1960, pp. 34 ff. The forms **'yštpl, 'ybṭl** etc., line 20, belong to the same category. The two forms **bsy'** and **šwy'** remain unexplained.

qwmh: The spelling with *waw* indicates that the first vowel was pronounced *o*, i.e. *ḥolam* for *qamaṣ*. On this phenomenon see above, Commentary to Bowl 12, and Introduction, p. 32. Earlier the same word is spelled **qmh**. Another instance of the same phenomenon may exist in the proper name **ywyt'y**: perhaps Yo'itay for Ya'ita.

9 **'zh:** The meaning is uncertain. It may indicate some disease, perhaps to be associated with the root **'ZY, 'Z'** (cf. Jastrow, s.v.). Montgomery 1913, 24:2, reads **'zyt'**, but the correct reading is **'ryt'**, cf. Commentary to Amulet 9:1–2. **'zh** could hardly be connected to **'zyz'** in line 3.

***(d')yštgr:** The bowl has clearly **ṭyštgr**. It should be emended according to line 21.

'ysywy: The combination **mia siauia** "black water" occurs in Mandaic, cf. Drower and Macuch, p. 265b, where many passages are quoted. The combination **my' syw'** occurs also in Gaster 1896, p. XXVI:7 (miswritten **pyw'y** in line 4). The word is of Iranian origin, from Parthian *siyāw* (cf. Widengren 1960, p. 100).

pgrt': This is perhaps from **PGR** "to be lax, faint", possibly referring to women who do not bear children, in opposition to **yldt'**. If we read **pgdt'** (though *resh* seems the better reading) we may have the sense of "women who hold back, who restrain" (as from **PGD** in Syriac) or, as a noun, "disaster" (as **pagadta** in Mandaic).

10 **psysy** cf. Jewish Aramaic **PYS**, Mandaic **PSS**, "to destroy, break, wreck". For the sense cf. Bereshit Rabba (quoted in three versions in Sokoloff 1982, p. 201) where "broken jars" **(qnqnym mrw'r'ym)** are compared to wicked people.

ʾrʿh mqṭlʾ dyrh: Cf. Num. 13:32, where the Targum Onqelos has **ʾrʿʾ mqṭlt ytbhʾ**; Targum Jonathan has **ʾrʿʾ mqṭlʾ ytbhʾ**.

10–11 The noises made by the demons are compared to those of various animals; a similar theme occurs in an Arabic text given by Winkler 1931, p. 5.

11 **dhbʾ, kspʾ, ʾnkʾ, nḥšʾ, ʾbrʾ:** Daniel 2:32 has the sequence **dhb, ksp, nḥš, przl, ḥsp.**

12 **ʾzrʾ** is perhaps a metathesis or mistake for **ʾrzʾ**.

šwnyʾ is attested in Syriac.

bšwrny: The word had two dialect forms in Jewish Aramaic: **šwrnʾ** and **šwnrʾ**, as can be seen from Bavli Berakhot 56b, according to Ms. Munich, where the text reads: "If one sees a cat in one's dream — where it is called *šunnara,* it means that a change for the bad (*šinnuy raʿ*) will come upon him; where it is called *šurana* it means that he will have a nice song (*šira naʾa*)", cf. Jastrow, p. 1537b. Old Aramaic has **šrn,** Sefire I, A33, cf. Fitzmyer 1971, p. 50.

wsbty: For this plural form cf. Epstein 1960, p. 119, where this form is conceded for pl. fem. in adjectives only. Here it is clearly used for a noun.

13 **srwdtʾ** cf. Commentary to Bowl 1:3.

dkṣwmy wkldʾy: Cf. the same combination in Mandaic: **kaṣumia ukaldaiia,** frequently (v. Drower and Macuch, p. 200b).

bḥywt gpʾ wbprḥwtʾ: The Targum for Prov. 1:7 has for *baʿal kanaf:* **prḥtʾ dgpʾ.**

knšwnkw etc.: For the verbs cf. above, Commentary to line 8.

ṭwrʾ...dprzlʾ: The recurring Mandaic phrase is **šura ḏparzla,** cf. Drower and Macuch, p. 364a.

14 **ʿʾ(t)ʾ(?) prgwd:** The reading of the first word is doubtful. The supposed *taw* is uncertain, but no better reading has presented itself. **prgwd** basically means "curtain", but it may have developed to mean "attendants, guardians"; this is based on the occurrence in Hebrew of the phrase לא דומה שומע מפי פרגוד לשומע מפי המלך (cf. Jastrow, p. 1214a). In Mandaic the equivalent term **br guda** (Drower and Macuch, p. 69a), acquired the meaning of "member of a group", perhaps because of the popular etymology of the word, which was deemed to be constructed of **br+guda** the final element meaning "band". In Syriac

similarly we encounter the phrase **bny gwd'** "adherent of a party". It is doubtful whether in Jewish Aramaic **prgwd'** could undergo the same development of meaning, although if our reading is correct, **prgwd** seems to be used of a group of people, as it stands in parallel to the term **gys** (above, line 6), a term which also stands in juxtaposition to **mry'**.

A possible alternative reading could be {'} **'prgwd rmnkw** "they cast you against the curtain". This would entail regarding the first letter as a badly executed *alef*, which was then repeated and drawn in a proper manner. The difficulty here lies in the fact that this may be the only occurrence of the use of the preposition **'-** for **'l** in Jewish Aramaic of the bowls. The usage is very common in the Talmud, but for some reason it seems so far to be completely absent from the magic bowls.

rmnkw: Probably a mistake for **rmwnkw**.

'smwmy: Cf. Mandaic **stmuma** with variants, in Drower and Macuch, p. 324a, derived from Greek στόμωμα.

wkypyh: See Commentary to Bowl 5:2.

ywm' rbh ddyn': Cf. Montgomery 1913, No. 4:4–5; Isbell 1975, No. 62:6.

dymyn' wdl' ymyn': The translation is based on the assumption that the right hand indicates winning a trial. Alternatively, **ymyn'** could mean "I swear, I adjure". The translation would then be: "that which I swear and that which I do not swear be upon you".

hylwwt': Montgomery, No. 7:14 has **hylwnyn byšyn** according to Epstein 1921, p. 35, where **hylwt'** is also discussed.

15 From here onwards we have a series of stereotype phrases:

(1) lines 15–16	**d'mrytw ... l' yd'ytwn**
(2) line 17	**kd mydkrytwn ... l' yd'ytwn**
(3) line 18	**kd mydkrytwn ...** [something missing?]
(4) line 19	**d'mrytw ... l' yd'ytwn**

After **d'mrytw** the verb **nyzy** occurs. After **l' yd'ytwn** the constant phrase is: **dywy dgbr' mylbr 't' 'lykwn w-X šmyh.** The name of this **gbr'** is **qntyw'l, nwry'l** or **dhbh.** The phrases beginning with **kd mydkrytwn** go on in a uniform manner: **dyw' rbh kmynqdm hwhw' qrbh npqytwn myšt'bdytwn lyh l-X dyw' tqyp'**. The name of the mighty demon is in one case **'wrws**, and in the other **zrny.**

The stereotype phrases are evidently built in the form of an argument, with an assumption made by one party: **d'mrytw ...**, or **kd mydkrytwn ...**; and this assumption is refuted by the phrase **l' yd'ytwn**, which identifies

the persons addressed by the vocative **dywy**. The text seems lacunary at one point, when in lines 18–19 there is no response to **kd mydkrytwn.**

nwry gʾwny gbrʾ: The reading is uncertain. Another possible division of words is **nyrwg ʾwny gbrʾ** "we shall desire the dwellings of the mighty one".

mygyny bʾrʿ: Cf. the Hebrew phrase **mgny ʾrṣ** (Ps. 47:10). The initial **my-** is peculiar (as if the word had an initial preposition **mn**), though the *yod* may represent a *shva.*

dlywt: An unusual spelling for this name, which is commonly spelled **dlybt, dlbt,** cf. Montgomery 1913, p. 217. Reading **dlwwt** "who is together" seems less satisfactory.

{rkyby}, {gwnʾ lʾylhy} in both cases the scribe seems to have corrected himself without crossing out the wrong words.

ʾryʾ rkybʾ: Cf. Gollancz 1898, p. 88: **ʾryʾ rkybnʾ wbrtnynʾ.**

mwrnytʾ bydh nqyṭʾ: Cf. line 16 **skyn gwddʾ bydyh nqyṭ lyʿhʾ**, said of **qnṭywʾl.**

zrgwnʾ is a word of Iranian origin, meaning "yellow, gold coloured". In the Avesta *zairi gaona* (Bartholomae 1904, col. 1680) describes the *haoma* plant. It seems very close in origin to **zrny.** In Jewish Aramaic it designates a certain plant (beet or vine, cf. Kohut 1955, III, p. 319b; Löw 1924-34, I, p. 69; III, p. 449). Arabic *zarajūn* means both "vine" and "wine" (v. Ibn Qutayba 1900, p. 526, and Geiger *apud* Krauss 1955, pp. 169b f.). Talmudic Aramaic *zaryon,* a derivative of the same word, may mean "grape-wine" or "gold-coloured (wine)", cf. Geiger, loc. cit.

ḥp klhw: The verb seems to refer in the perfect to the two *zargona*-s (unless we refer **klhw** to the **ʾylhy dḥršy** which follows, and translate "covering all the gods of the sorcerers"). It is noteworthy that *zargona* occurs in Yerushalmi, Sukka III, p. 53c, where we have the same verb used: עץ שענפיו חופין את רובו ועולה כמין קליעה ... אין תימר זרגונה ענפיו חופות את רובו ואינו עולה כמין קליעה ואיזה זה הדס

16 **wḥrbʾ stnʾ:** We have **ḥrbʾ dqṭlʾ** in line 6.

bsyʾ...šwyʾ: See above, Commentary to line 8.

17 **hwhwʾ:** This should probably be read *hāwe (h)wā*, "there was", a typical Syriac expression (cf. Nöldeke 1898, § 277). It occurs in the group of texts Montgomery 1913, Nos. 32:3; 33:2; 9:2, which should be read with the comments and corrections offered by Epstein 1921, pp. 37 f.

ʾwrws is probably the god Horus. Montgomery 1913, No. 19:11 may have the same name (spelled **ʾwrs**?). **ʾwrws** is here parallel to **zrny** in line

18. A reading **ʾyrws**=Eros should also be considered, although it seems less likely. A third possibility is Ares, which occurs in Arabic magical literature (cf. Ps.-Majrīṭī 1933, p. 212).

tlt ʾlwʾ ʾsʾ: The text is difficult, and may be corrupt. A possible hypothetical reconstruction could be **tlt**<**ʾ**> <**ʾylny**> **ʾlwʾ ʾsʾ** <**w**...> **šww lkw bryšykw** "place on your heads three trees: aloe, myrtle and ..." On **ʾlwh, ʾlwws,** etc. see Löw 1924–34, III, pp. 342, 411 ff.

gwpnʾ is apparently used as a general term for a plant.

znyʾ is probably used in the botanical sense of "creeping, spreading in all directions", for a plant. A similar metaphor seems to be present in Jer. 2:20–21, where the expression סורי הגפן נכריה symbolizes a prostitute woman.

18 **nwrʾ lbyš wnwrʾ mksy:** Cf. Geniza 6, p. 3:6 for a similar expression. The same phrase occurs also in T-S AS 143.113.

zrny has an obvious Iranian etymology: *zarana-, zaranya-* "golden". The demon occurs in Montgomery 1913, No. 11:6, where we have a female genealogy: **zrny lylyth** is the grandmother of **ḥlbs** or **ḥldʾs lylytʾ**. The text is attested in two Judaeo-Aramaic versions and in one Mandaic text. This Lilith is apparently part of the retinue of Bagdana. In our text **zrny** is evidently a masculine figure. As a personal name Zarniya seems to be present in an Elamite text (cf. Mayrhofer 1973, p. 231, No. 8.1505), and Zarina, Zarinaia in Greek transmission (cf. Justi 1895, p. 382). The Pahlavi name Zarr-mihr (cf. Gignoux 179, p. 78) may be a *dvandva* compound of Zarniya and Mihr, both divine names (?).

qrny qrytwn, šypwry mybbytwn: These are unusual expressions, where the indirect object is given without an instrumental preposition **b-**.

mkšṭytwn: KŠṬ and **QŠṬ** in the sense of "to dress, set, adorn" seem to be interchangeable in Aramaic.

19 **ʾ(d)m:** The reading is uncertain, and so is the translation. The second letter could be a *kaf.*

sby...ʾlymny...drdqy: Three groups of helpless people.

dhbh: This name seems to be the Aramaic equivalent of Iranian **zrny** (line 18).

20 **ṣmḥy:** This verb like **PRḤ** has the double meaning of "blooming, growing" and "shining". Cf. above, line 6, to **pryḥy.**

ʾyštpl...ʾybṭl...ʾytzḥ: These verbs belong to subjects in the plural: **gbry, ʾydy šmyh, qṣyry.** Their singular forms confirm the supposition

that the plural endings of verbs in the perfect were unpronounced (unless followed by a suffix). See above, Commentary to line 8 on **ʾt** etc.

ʾytzḥ: The phrase corresponds closely to Bavli Bava Batra 16b **ʾydly ywmʾ ʾydly qṣyr** "the day has risen, the sick man has risen", which is quoted there as a popular proverb.

ʾgbyh: This verb is seemingly derived from **GBY** "to seize (for taxes)", or, as in Syriac, "to choose". As none of these senses goes well with our context, we prefer to see this verb as belonging to **GBH** (which should have given **ʾgbhyh**) "to raise, lift".

qdḥ is a magic verb, as evidenced by Montgomery 1913, No. 10:11. See Epstein 1921, pp. 41 f., who overemphasizes, it seems, the sense of "to rise, pierce", while several passages make it plain that the verb has also the sense of "to wail, moan", as noted by Epstein himself, ibid., p. 42, notes 1–2. Cf. especially Yamauchi 1967, No. 22:162 f. (=Lidzbarski 1909) **ašlit illit uqhdit uṣinpit uamrit** "I shrieked, wailed, howled, screamed and said". For **QDḤ** in the sense of "to flee" see Bowl 10:11.

21 **šmyš**: For a similar role of this deity cf. Montgomery 1913, No. 36:2–3.

mlʾkyhwn: The possessive suffix is somewhat unexpected. One might think of an error for **ʿšrʾ mlʾky hʿynʾwn** "they are ten angels", or the like.

dʾytw: It seems that this is a *peʿal* form in the perfect tense, spelled with a *yod* for traditional Jewish Aramaic *ḥataf patah*.

mybyt šydyh: This expression seems to correspond to the original meaning of Iranian **baga-dāna-*, Old Persian *daiva-dāna-* "house of deities, temple". Cf. Shaked (forthcoming).

trʿ[mtʾ] or **trʿ[mʾ]** "quarrel, complaint"; an alternative reading could be **trʿ[tʾ]** "break, breach" (which the Targum uses for Hebrew פרץ).

III. Amulets and Fragments of Magic Books from the Cairo Geniza

Geniza 1

Amulet on cl[illegible]
T-S A.S. 142.17
Plate 32

1 [illegible] או או ה ה ה
2 ה ה [ייות] אתון כל קטיריה קדישיא וכל אתיה משבחיה אלהכו
3 ואבערו לביה דטרשכין בן אמה אללה בחר גדב בת תפאחה
4 אמן

For the writing of an amulet on a piece of cloth, see below, Geniza 6, p. 1:15, **kyrqh gdydh** "a new cloth".

2 **kl qṭyryh**: The writer divided the word wrongly, assuming that these are two words meaning "all the knots", which he followed by **kl ʾṭyh** "all the letters". **klqṭyryh** corresponds to **klqṭyrym, krqṭyrym** (Greek

4 Amen.

χαρακτῆρες); see Margalioth 1966, pp. 4, 83–87. The phenomenon is already attested in Talmudic literature, cf. Kohut 1955, IV, p. 243a.

3 The magic aim of making someone's heart burn in longing after someone else occurs frequently in the love amulets from the Geniza. In our texts it occurs in Amulet 10.

1 Fast on Thursday and Friday eve night and write
2 early on Friday morning on an unbaked sherd in
3 an empty house, and throw it into (the furnace of)
the bathhouse: In the name of
4 Gabriel, Raphael, Ṣuriel, Dalqiel,
5 ʿUziel, Michael, Sarafiel and Aqbiel.
6 In the name of El El El El El El El **nnnnnnnnn.**
7 In the name of ‹‹‹‹‹‹‹. In the name of
8 **hhhhhhh.** You holy and
9 mighty names, heroes,
10 kindle and inflame the heart, fortune (!)
11 and kidney of X b. Y (in longing) after A b. B,
12 just as this sherd burns!
13 Amen, Amen. Immediately. (*magic*
14 *characters*) Do, skip ...,
15 hurry, make easy and do not deter.

1:2 The term *zagta bar baṭinta* is evidently based on the Talmudic phrase זגתא אוכמתא בי בטניתא (Bavli Bava Meṣi'a 86b), the meaning of which is not unequivocal. Rashi, followed by J. Levy (*Chaldäisches Wörterbuch,* s.v.), interpret it in the meaning of "a fattened black brooding hen", while Jastrow, s.v. בטניתא, tends to regard the phrase *Be baṭnita* as a geographic term. In Targum Jud. 15:15 **bṭynt'** stands for **ṭryh** "fresh" (cf. Tal 1975, p. 200, n. 25); see also Geniza 6, p. 4:10 **bydh ṭryh,** and Scholem 1965, p. 112.

1:3 **škbt zr'**: The second word in this Biblical Hebrew term is written in Arabic letters, with the possible aim of making the phrase difficult to decipher, perhaps because of its sexual connotation.

1:8 **rwz** is a Persian word.

1:11 **hnk** is here used for the singular, although it is otherwise consistently attested for the plural, both in the Talmudic literature and in the magic bowls (Montgomery 1913, No. 4:3), the latter under the form **'hnyk.** Cf. Epstein 1960, p. 26.

1:12 **drn'**: The reading is certain. The word is not Aramaic, unless we assume a corruption from **drk'** "road". **drn** is attested in Judaeo-Persian Bible translations for rendering Hebrew *'emeq* "valley" (cf. e.g. Paper

Geniza 3

Amulet
T–S A.S. 143.403
Plate 34

1 כשם אומר ועושה
2 מזמן הדין שמא לדלאל בת ציא
3 באהבת עשיר כן וצאיך שימני
4 כחותם על לבה ד"ד"לאל בת ציא וכחותם
5 על זרועך את דלאל כת ציא כי
6 עזה כמות אהבת דלאל בן(?) ציא

1972, Gen. 14:3,7,8; the editor read incorrectly **ddn**). The occurrence of two Persian words in this text, **rwz** and (presumably) **drn**, shows that the text derives from a Judaeo-Persian *milieu*.

2:2 *bākir* is evidently an Arabic word.

kzph nyh: Cf. also Geniza 5, p. 3:12 **šqph nyh**; Geniza 6, p. 1:3 and p. 4:4 **pkr ny**, all referring to an unbaked potsherd, and in all cases (with the possible exception of Geniza 6, p. 4:4) love charms are involved. For an example of an actual love amulet written on "unbaked clay" see Amulet 10, and the Commentary *ad loc.*

2:10 **lybh wmzlh wkwlyth:** The word **wmzlh** stands for **whwnh**, cf. Geniza 6, p. 1:13 **kn thpkwn lbh whwnh wkwlyth** ...The word **hwn**ʾ *(=hawnā)* means "mind, intelligence", but the writer associated this word with the Biblical Hebrew *hōn* "wealth, fortune"; the latter is translated in the Targum of Psalms (e.g. 112:3) and Proverbs (8:18; 19:4; 24:4; 29:3) by **mzl**ʾ, where in some manuscripts it is written **mwdl**ʾ.

2:13 **bpry**ʿ corrseponds to Greek ταχύ, cf. Reitzenstein 1904, p. 292, notes. For Aramaic **pry**ʿ cf. Kutscher 1976, p. 82. A similar expression in Aramaic is **b**ʿ**glh wl**ʾ **tt**ʿ**kb**; cf. Scholem 1965, p. 111.

2:15 **t**ʿ**kbwn** cf. Amulet 3:15.

Geniza 3

Translation

1 In the name of He who says and creates.
2 This spell (*lit.* name) is designated for Dallāl daughter of Ḍiyāʾ
3 for the love of ʿAšīr son of Waṣāʾif. Set me
4 as a seal upon the heart of Dallāl d. of Ḍiyāʾ and as a seal
5 on your arm, you, Dallāl d. of Ḍiyāʾ. For
6 the love of Dallāl d. of Ḍiyāʾ

7 לעשיר בן וצאיף קשה כשאול קנאה
8 רשפיה רשפי אש שלהבחיה מים
9 רבים לא יוכלו לכבות את אהבת דלאל
10 בן(!) ציא לעשיר בן וצאיף ונהרות לא
11 ישטפוה אם יתן איש א כל הון ביתו
12 בא בוז יבוזו לו ויהי יי את עשיר בן
13 [וצ]איף ויט [אליו חסד ויתן חנו בעיני]
14 [דלאל בת ציא ...]

3–12 The text is based on Cant. 8:6–7.

6 The writer uses here and in line 10 *ben* for *bat* after Dallāl. See above, Commentary to Bowl 4:7.

Geniza 4

Amulet
T-S K 1.68
Plate 34

....
1 סלה סלה סלה הללו[יה] בשם יי אל(הי) ישר(א)[ל]
2 על חסדך ועל אמת[ך] יה אלהים א אלהים א א[להי]
3 מערכות ישראל געור כל רוחין בישין [ויסורין]
4 וכל פגעין וכל מזיקין וכל שטן וכל צער וכל
5 מכאוב וכל מיני רוחין ושדין בשם אהיה
6 אשר אהיה שאמר והיה העולם בשם ששמע
7 הים ונבקע שמע האש ונבבה ושמעו הסלעים
8 ונשברו ושמע האבן ויתפוצץ השבעתי א[חכם]

7 to ʿAšīr s. of Waṣāʾif is strong as death. Jealousy is cruel as Sheʾol.
8 The coals thereof are coals of fire which have a most vehement flame. Many
9 waters cannot quench the love of Dallāl
10 d. of Ḍiyāʾ to ʿAšīr s. of Waṣāʾif, nor can the floods
11 drown it. If a man would give all the substance of his house
12 for love, it would be utterly scorned. And God was with ʿAšīr s. of
13 Waṣāʾif and showed [him mercy and gave him favour in the sight of Dallāl]
14 [daughter of Diya...]

12–13 Based on Genesis 39:21.

Geniza 4

Translation

1 Selah Selah Selah Hallelujah. In the name of yy the God of Israel,
2 for thy loving-kindness and for thy truth (Ps. 138:2). Yah God, ʾ, God, ʾ, the God of
3 the armies of Israel (I Sam. 17:45), drive out all evil spirits [and afflictions]
4 and all blows and all harmful spirits and every Satan and all grief and all
5 pain and all kinds of spirits and demons. In the name of
6 I-am-who-I-am, who spoke and the world came into being. In the name of He who, (when) the sea
7 heard (his voice) it split, (when) the fire heard it was extinguished, (when) the rocks heard
8 they broke, (when) the stone heard it exploded. I adjure you,

9 רוחא ושידא בשם המפורש היושב על כנ(פי) [רוח]
10 היושב על ערבות ביה שמו היושב בעבי
11 שחקים היושב בשמי שמים ועוד השבעתי
12 אתכם כל רוחין וכל שדין וכל [מ]זיקין וכל סטנין
13 וכל צער וכל מכאוב וכל מיני פורעני[ות בשם]
14 מיכאל וגבריאל ו(ר)[פאל] וצוריאל ו(נו)ריאל וברקיאל
15 [ושר]פיאל ועוד [השבעתי אתכם]
16 כל רוחין ושדין ו[מז]יקין בשם [ ]
17 שלמה [ ]
18 ותתע(ר) [ ]

In the margin:

[אהו יהא יהו] חח אאא ה בב או מ אב אמן אמן סלה

6 ff. "In the name of He who, (when) the sea heard (his voice) it split" etc: This sequence of adjurations is strongly reminiscent of the Hadrumetum love charm in Greek, quoted in Blau 1898, pp. 97 ff., especially lines 19 ff. Cf. also Geniza 7:8 ff.

This is a fragment from a book of magical recipes. The individual sections are marked by Arabic numerals (27–32) on the outside margin.

1:1 For the medical terms which occur here cf. the Commentary to Amulet 2. **rqyqtʾ** is an error for **dqyqtʾ**; other corruptions of these terms see in Geniza 6, p. 3:12 and p. 4:1–2.

1:3 **ḥy hʾl:** Cf. Amulet 1:23.

1:12 **ṣynym:** The reading is somewhat doubtful, but this seems to be the only possible interpretation of the letters. The word is probably connected with one of the group of words attested in Biblical Hebrew: *ṣinna, ṣinnim, ṣinnot, ṣninim,* the meanings of which cover the following range: (1) shield; (2) prick, thorn; (3) fishing hook or spear; (4) chill, cold (cf. Gesenius-Robinson-Browne, *Hebrew and English Lexicon of the Old Testament,* Oxford 1975, s. vv.), or, less likely, with Talmudic *ṣinna* "basket". The association of this word with **šyš,** which apparently means "marble, alabaster", is unclear. An alternative reading might be

page 4

1 the fire. In the name of Azriel, Puriel,
2 for X b. Y, Amen Amen Selah... On Wednesday.
3 [xxxii] [...]
4 It will be written on leather with *sukk* (?) and saffron, on
5 Tuesday, and will be hidden in the door of the house. And this is
6 the writing on it: This is designated to cause X b. Y
7 to chase after A b. B. I adjure you,
8 Nuriel, who sits on the gates of fire, and
9 Shamshiel, who sits on the sun-globes.
10 And write as follows: I adjure you in the name of
11 **šmqḥ hlwk pqḥ ʿnbym dʾwpʿ**
12 that you should kindle and move the heart of X b. Y

šeyyēš, which would give an ungrammatical construction, unless some error is assumed in the writing.

2:1 In **lgwym**, as afterwards in **lp. b. p.**, the initial *lamed* seems to be used in the unusual sense of "against", or possibly "for (fighting against)".

3:4–5 Our text is based on Targum to Gen. 2:21.

3:7–10 The headache referred to in this amulet seems to be a toothache.

3:12 For **nyh** cf. Geniza 2, p. 2:2.

4:4 For **sk** cf. also Geniza 6, p. 2:8 **swk**. The word signifies a certain combination of elements, which make up a well known medical preparation; cf. e.g. Garbers 1948, pp. 329–331; Ps. Majrīṭī 1933, pp. 220:1, 275:7.

1:1–2 **ʿd mn** for **ʿd mʾ**. The phrase **ʿd mn dyʿbd ṣbywny npšh** can be compared with the formula **ʿd dnṣby** below p. 3:7, 13 etc.

1:3 **pkr ny**: See Commentary to Geniza 2, p. 2:2 and to Amulet 10.

1:9 **dmny** for **dmmny**.

wʾ whnh is an error for **wʿl ḥnh**.

1:13 **whwnh**: The word **hwnʾ** may be connected to the Targumic and Syriac word *hawnā* "mind, intelligence", rather than to the Hebrew *hōn* "wealth". For **lbh whwnh wkwlyth**, Geniza 2, p. 2:10–11 has **lbh wmzlh wkwlyth**; see Commentary there and to Amulet 10.

1:16 **ʾlklm** for *al-kalām* (usually spelled in Jewish Arabic **ʾlklʾm**).

1:17 The expression **špt nhr gry** is somewhat incongruous, if the reading is correct. One might expect the Arabic *ḍaffa* rather than the Hebrew *śafa* or the Aramaic *siftā*.

page 4

(1) You holy letters, cause there to fall on X b. Y fire (2) and fever and groaning and may he be cast away on a sick-bed (3) and may he have no healing as long as I desire. A(men) A(men) S(elah) H(allelujah)."

(4) Another (charm). There should be written on an unbaked potsherd and buried in a furnace (as follows): (5) "The fire shall ever be burning upon X b. Y, it shall never go out. For fire (6) is kindled by my anger against X b. Y, it burns to the depths of (7) Sheol; it devours earth and its harvest and it glows at X b. Y. (8) Day and night shall the fire keep (burning) unextinguished at X b. Y. Behold, (9) the hand of the Lord is upon X b.Y. A(men) A(men) S(elah) H(allelujah)."

Another (charm). For hatred. There should be written (10) on a fresh egg, which will be buried on Friday (11) in a tomb (as follows): "This writing is designated for X b.Y, that he may hate (12) A b. B in the name of God. Then X b. Y hated A b. B (13) exceedingly, so that the hatred (14) with which X b. Y hated A b. B (15) was greater than the love with which he had loved him. In the name of Akatriel, (16) Hafkiel and Dfuniel, so should the heart (17) and mind of X b. Y change to hate A b. B like the way (18) a dog hates a pig and a pig hates a dog. (19) Amen Amen Selah Ha(llelujah)."

2:1 **gry** should be **gʾry** (Arabic *jārī*).
2:5 **ʾlhbw wlqṭpʾ wdlqw** seems to be an error for **ʾlhbw wʾdlqw**.
2:7 **gzl** should be **gzʾl**.
2:8 **swk**: Cf. above, Geniza 5, p. 4:4.
2:10 **lšprʾṭʾ** may be a corruption from **lšpr bʿynh** "finding grace" (?).
2:15 *lilmaraḍ*, as also *bayḍa*, *maḍira*, are spelled with *dalet*; cf. Blau 1980, pp. 35 f., § 2:15; pp. 38 f., § 2:21; Blau 1981, p. 76, note 1. "For sickness" means obviously "in order to inflict sickness on your enemy". Many of the recipes in this fragment deal with malicious effects which the magician tries to direct towards his enemy.
2:16 **mdrh** probably Arab *maḍira* "fresh". Professor Blau has suggested the reading *maḍira* "rotten (egg)", but the recipes usually call for fresh objects; cf. also p. 4:10 **bydh ṭryh**, as well as Geniza 2, p. 1:1–2.

2:18 **šyyḥ** from ŠWḤ "to melt, be consumed, waste away by fire".

3:1–2 The phrase here recalls Lev. 6:6.
3:5 **twrd** should be perhaps **twqd**?
3:7 **npp** or **npq**?
dnṣby may be either first person singular or plural; cf. Dalman 1905, p. 265; Kutscher 1971, col. 272. The singular seems preferable in this context; cf. T—S K 1. 95: **bḥtm' dḥtymyn ... wl' 'yštryn 'd d'nh 'yṣby.**
3:8 **dlp** may represent Arabic ظلف.
3:12 **'št' w'ryt' wz'qh**, cf. p. 4:1–2 **'š[th] z'ryth wdnwqh**, and Amulet 2:12 **'šth w'ryth wdqyqth**. The latter is the correct version meaning "fever, shivering and hectic fever".
3:16 **dyyb** from DWB (Hebrew ZWB) "to drip, to flow".
3:17 **'rs mr'h** is not known to us from other sources. It obviously means "a sick-bed", as Hebrew **'rś dwy** in Ps. 41:4.

4:1–2 See above Commentary to p. 3:12 as well as Commentary to Amulet 2:2, 12.
4:5 After Lev. 6:6.
4:5–7 After Deut. 32:22.
4:8–9 After Ex. 9:3.
4:12–15 After 2 Sam. 13:15.
4:18 **d'klbh** should be **dklbh**.

Geniza 7

Amulet

36 פספסים ושמו את שמי על בני
37 ישראל ואני אברכם ודיוניסים
38 והפשיט את העלה ונרצה לו לכפר עליו

It has seemed unnecessary to give a translation of this text, which is largely based on biblical verses and contains parallels to other Geniza charms.

2–3 For **mwḥṣ wrwpʾ** cf. Dt. 32:39; Is. 30:26; Job 5:18.
3 The name of the client seems to be Bunayna daughter of Yaman (or Yumn).
5 Cf. Ps. 20:2.
8 For these formulae see Geniza 4:6 ff.
22 Gen. 49:22.
23–24 Ps. 55:9. The verse is repeated backwards.
26 ff. Is. 30:19.
28 **šr** seems to be the Arabic equivalent of Heb. *raʿ*, introduced as a gloss. The Hebrew phrase is a paraphrase of Ps. 91:10.
33 ff. Num. 6:24.
38 Lev. 1:6; 1:4.

In the margin:

לברו יתיה תסגוגא רפא ותיאו ותיאו ותי(נ)או וי(ר)גיה

At the top, inverted:

והוא נעורה אה אה סלה
לעולם ועד אמן (אמן)

This fragment too does not seem to require translation. In the following some comments on points of interest will be made.

3 **wyz'**: We should have expected a verb meaning "to save", like **ṭwlw wšyzbw** in line 11. It is possible that **wyz'** is a corruption of **šyzb**. On the other hand it could belong to the verb attested in similar contexts under the forms: **wtyzh mnh mbklt'** (Bowl 1:11 and Montgomery 1913, No. 32:2); **dyzh wytrḥq mynyh dyw' byš' wsṭn' byš'** (Montgomery 1913, No. 3:2). Montgomery 1913, p. 130, explains this verb as derived from **ZḤḤ** or **ZW'**, but it is also possible to regard it as deriving from **'ZL**, with the *lamed* dropped, as frequently in Eastern Aramaic (see Epstein 1960, pp. 58 f.). In that case the phrase would mean: "May the bearer of this writing go away from all illness...". The difficulty about this interpretation is that it does not form a good parallel with lines 11–12 and that it is not built around any otherwise attested formula, for the bowl-texts use this verb in relation to the evil things which should depart from the person. In addition it would be strange to find here an East Aramaic form. Our suggestion that **wyz'** is a corruption of something like **wyštzyb** seems therefore preferable.

7 **yḥyšh**: Cf. Commentary to Amulet 3:2.

11–13 The syntax here is confused. Read טולו ושיזבו נושא הכתב הזה מן חרשין בישין ומכל לווטין.

17 **wšhry'**: This is a Hebraism in Aramaic.

21 **mwḥṣ wrwp'**: See Commentary to Amulet 1:20 and Geniza 7:2–3.

GLOSSARY*

In the following, all the words and names occurring in the Amulets and Bowls published in this book are indexed. The Geniza texts have not been included in this Glossary. The main Glossary is followed by an index of divine names, names of angels and *nomina barbara*, and by an index of personal names. Biblical quotations are listed in a separate index. The individual words in such quotations are not included in the glossary.

Numbers in italics indicate that the reference is to a text in Syriac (this applies to A*6*, B*1*, and B*10*).

Verbs are placed under their root forms. Nouns are arranged in principle according to their spelling, usually in the definite form. *Matres lectionis* are ignored in the alphabetical arrangement, unless they form part of the root or of the basic nominal form. This rule has not been strictly observed in foreign words.

Restored words have not been listed. Words partly restored are indicated by parenthesis around the line number.

אבא father B 13:12. אבוכון B *1:9*
אבד to be lost. יבד B 9:4
אבל to mourn. אבילין B 6:7
אבנא stone. אבן B 6: 5,8
אברא limb. אברין A 9:3. אבריה (H) A 4:17. איבריה B 13:5

INDICES

As the Glossary gives all the words occurring in the Amulets and Bowls published in this volume, the Indices are in principle restricted to the Introduction and Commentary. Two exceptions have been made: the General Index includes divine names occurring in our Geniza texts, and the Index of Quotations incorporates references to the Amulets and Bowls as well.

The alphabetical order follows that of the roman alphabet, the two signs for *alef* (ʾ) and *ʿayin* (ʿ) coming first when used in consonantal transliterations. Greek is here given in transcription.

ADDITIONS AND CORRECTIONS

The following notes incorporate suggestions made by several scholars: Benjamin Elizur, Simon Hopkins, Charles Meehan and Mordecai Mishor. They were kindly communicated to us in a note written by Mr Benjamin Elizur, where individual authorship was not indicated; references to "Elizur" in the following should therefore be understood to refer to the whole group. These notes also contain a selection from the suggestions made in a number of reviews and publications, as indicated, but other important notes that were given in some of the reviews should not be ignored. The main substantial reviews of which we are aware are the following: Gordon 1987a; 1987b; Morony 1988; Oelsner 1989; Puech 1988; Segal 1986.

Beyer 1984 contains editions of the following amulet texts: A 2 (p. 397), 4 (374), 5 (383), 7 (371), 8 (395). Beyer 1994, contains editions of A 1 (p. 258), 3 (260), 4 (249), 5 (253), 7 (248), 8 (258), 10 (238), 11 (235 f.), 12 (236), 13 (237), 15 (263).

Page 8, Plates 5 and 6. Amulets 6 and 7 were published by courtesy of the Archives de l'Académie des Inscriptions et Belles-lettres, from the bequest of Dupont-Sommer. Their shelf-mark is G 6.

Page 22, n. 23. This amulet was edited in our *Magic Spells and Formulae* (*MSF*) as A 27.

Page 32, last paragraph. Read: Besides the older form of the possessive suffix of the third person singular masculine attached to a plural noun, **-why**, which is attested in forms like **ḥzwhy** (Bowl 9:4), we have the younger form **-yh**, e.g., **gybryh d'r'h** (Bowl 6:4), **šqyh** (Bowl 9:3), etc.

A 1:1–3. Similar formulae, enumerating an angel for each side of the person to be protected, occur also in Coptic. Cf. Kropp 1931, p. 71, n. 1; Polotsky 1937a, pp. 236 ff. The Jewish formula occurs also in *Seder Rav Amram Gaon*, p. 55a (a prayer for the safety of a journey).

A 1:11. For יומא read: יומה (Elizur).

A 1:14. Read: רקיעה דהוא מ(קב)ל (ת)מידה בכל יום [ ] (based on Elizur).

A 3:4–5. Read: דלה תיחטין "that you should not sin" (Wesselius 1991, p. 711).

A 2:2. Further discussion of the terminology for fevers in the Aramaic magic texts, and its relation to the relevant Greek terminology, is to be found in our second volume, *MSF*, pp. 36f., and in the commentary to A 19 (p. 64).

A 3:8. For the figure of Ṣuriel cf. Polotsky 1937a. The Coptic tradition renders this name (also in Arabic) by a simple s, but it seems possible to assume that it is the same angel as Ṣuriel. If it is, it may be interesting to check on the relationship of this name of angel, who is said in the Christian tradition to be "the trumpet blower", with the Arabic word for "trumpet" in the Koran, *ṣūr*, for which Duchesne-Guillemin 1979 has suggested an Iranian derivation.

A 5:3. In the translation, correct Samriel to Šamriel.

A 6. The figures of the three deities (?) that stand in the water and direct the water and the world are reminiscent of the midrashic passage: אמר ר׳ לוי יש מן הדרשות שהן דורשין כגון בן עזי ובן זומא קולו שלהקב״ה נעשה מיטטרון על המים הדה היא קול י״י על המים (*Bereshit Rabba* 5:4; the spelling according to the Geniza fragment in Sokoloff 1982, p. 89), "Rabbi Levi said: There are certain (types of) exegesis that they make, like Ben ᶜAzzai and Ben Zoma, (viz.), The voice of God became a leader over the water, that is (the meaning of the verse), 'The voice of Lord is upon the water' (Ps. 29:3)".

A 6:1. We suggested that Rabbā may be the name of a deity. This idea may get some support from an inscription from Taymāʾ, where it is said: **[h]qym krsʾʾ znh qdm ṣlm zy rb** (see Aggoula 1985, pp. 66 [No. 8:6], 75; Cross 1986). Aggoula translates this phrase, "il a érigé ce podium devant le Maître de l'édifice"; but it seems more natural to translate, "has erected this stool in front of this statue (or idol) of Rab". One should recall in this connection that in the Islamic usage, Arabic *rabb* is one of the prominent epithets of God. On the other hand we have the formula בישמיה דיהוה קדיש אילאה רבא דישראל (Isbell 1975, No. 66:2–3), where *rabbā* seems to occur as a mere adjective. Puech 1988, p. 586, regards A 6 as a good Christian text, and interprets **rbʾ ḥsynʾ qdyš ʾylʾ** as three epithets of Bar-Theon "the Son of God".

A 6:8. **rbw**: Segal 1986, p. 97, refers to the unpublished bowl BM 91771, where he quotes **rbwty wšylṭny**.

A 7:15 ff and A 7b:1. Note the correction to the reading and translation on p. 76.

A 7:22. For דאן cf. Schäfer 1984, p. 75: על האופנים שלח לי דרך דאן ברעד אן (T-S K 21.95 I). The text there is far from clear, but it seems to bear witness to the use of דאן as a magic word.

A 9:8. Perhaps read, following Qimron 1993, p. 270: קו[ו]מוי טוריה וקלמתה [מזד(ע)וע(ין].

A 10. For a new reconstructed reading based on a Geniza recipe (G 22) see *MSF*, p. 219. For the commentary on pp. 88 f. it may be noted that there are several other occurrences of injunctions in magic recipes to use a new vessel, or an unburnt piece of pottery. *Sefer ha-razim* provides us with two good examples: צלוחית חדשה (I:96, p. 72), בשבע נבלי חרש שלא נכנסו באור (I:53, p. 69).

A 11:3. For Barqiel cf. Henning 1935/7, p. 583. Also 3Enoch 14:4; 17:1.

A 11:5. For an angel appointed over headache cf. the Geniza fragment CUL Or. 1080.6.19 קורא אני למלא[ך] (שהו) ממונה על מחוש ראש (for this fragment see *MSF*, G 29, p. 2:14–15). A demon *di'u*, a name that denotes some head ailment, exists in Akkadian; cf. von Soden 1959–1981, *Akkadisches Handwörterbuch*, s.v. As a parallel expresssion, Segal 1986, p. 97, quotes **kybr'šh** 'headache' from the unpublished bowl BM 91771.

A 11. Read, following Beyer 1994, pp. 235 f., in line 5: ועלא בכורכורי אדניא; in line 10: תעקרו מן כורכורי אדניה[ו](א). The word כורכור should signify, as Beyer suggests, the auditory passage in the ear.

A 11:6. It may be noted that כביש could equally well be an active participle.

A 14:8. Further references for this formula are given above, in the Addendum to A 1:1–3. Cf. also Gollancz 1898, p. 88: גבריל מן ימינה ומיכאיל מן סמלה אשרה (=אהיה אשר אהיה) אלשדי אדוני לעל מן רשה וכוֹבא מן קדמוהי וסוֹפא מן בסתרה. The theme of the angels on all sides is discussed in Krämer 1928/9, pp. 119 f.

A 15. Further references for the Semamit story are: Barb 1966; Spier 1993; Greenfield 1989, where the variants of the Greek Gylou story are studied in great detail (no reference is given to *Amulets and Magic Bowls*). Cf.

also the long and detailed study (from an ethnographic point of view) by Sorlin 1991. Other versions of the Semamit story were published by Oelsner 1989; and by Müller-Kessler 1994.
For the lizard in magic, cf. Nock 1972, pp. 271–276.
To p. 121, note 23, on the use of iron in magic, add also Canaan 1914, p. 51.

A 15:8. Read: וני[ס].

A 15:24. For קים (אל) read: אלהים (Elizur).

B 1:11–12. For the Greek *adamas* and its Iranian counterpart, cf. further Schaeder 1926, pp. 228f.

B 2. Segal 1986, p. 97, mentions three other unpublished BM bowls with similar texts, more specifically BM 91713.

B 2:5. **wbyt ʾylhy wbyt knyšt**ʾ: According to Segal 1986, p. 97, the same basic formula occurs in two unpublished BM texts, 91713 and 91758.

B 2:8. **wkwl dlrʿ qryʾ wkwl dlšmyʾ mṣytʾ**: According to Segal 1986, p. 98, this could be translated "all that calls to earth and hearkens to heaven".

B 10:11. In the commentary, p. 183, the reference to the Peshitta to Ps. 88:2 should be emended to read 68:3.

B 12:VII. אדריכו = "they overtook". For a comparable Hebrew usage see Judges 20:43 כתרו את בנימן הרדיפֻהו מנוחה הדריכֻהו עד נכח הגבעה ממזרח שמש

B 13:4 ff. The physical description of the demon has several further parallels. In Coptic magic such a description occurs in the British Library text, Ms. Or 5987, published by Kropp 1931, I, p. 25; II, p. 152, for which cf. Polotsky 1937b, pp. 123 f. Kropp's text reads in Polotsky's translation: "Dessen Vorderteil löwengesichtig ist, dessen Hinterteil bärengesichtig ist, der mit der Falkengestalt, der mit dem Drachengesicht". A Manichaean source contains a description of Satan in physical terms somewhat reminiscent of the description given here: "His head is like that of a lion, his body is like that of a serpent, his wing is like that of a bird, his tail is like that of a fish, his legs are like those of beasts of burden" (Ibn al-Nadīm, *Fihrist*, p. 329, lines 12 f.). For this cf. Polotsky 1935, col. 250. An old model for this kind of description occurs in Akkadian: cf. Köcher 1953, pp. 64 ff. On various figures of demons which are composed of different animals see further Ebeling 1938, pp. 110a, 111a; Unger 1938, pp. 114a ff.

B 13:10. Correct the printing error: בני ריגותא וזינותא.

B 13:12. In the commentary to this line (p. 210) cross out the words "plural", "pl.".

B 13:15. **zrgwn**ʾ: Cf. the Pahlavi word *zargōn*, in *Dēnkard* VII, 2:28, where it seems to mean "green, fresh".

G 2, p. 1:0. Read (in Arabic characters): בסם אללה אלרחמן אלרחים אלחמד ללה חק חמדה (Elizur).

G 2, p. 1:12. דרנא: This word may be interpreted as the Aramaic word for some kind of worm, or as the Arabic word **drn** "dirt" (Elizur), though these interpretations do not seem likely.

G 3:6. צ״א: This is written over וצאיף (Elizur).

G 4:3. Read at the end of the line perhaps: כל רוחין בישין (וכל) [שדין?] (Elizur).

G 4:6. שאמר והיה העולם. Compare the formula in the Jewish morning prayer, ברוך שאמר והיה העולם.

G 4:8. Read at the end of the line: השבעתי (אתך) (Elizur).

G 4:15. Read: פיאל[אל ושר]לו כרוביו[ ](ו) (Elizur).

G 4:17. Read: [ ] שלמה על (כ)ל (רוח)ין ושדין (Elizur).

G 5, p. 2:2–4. The phrase from Gen. 32:3 occurs also in the prayer for the safety of a journey.

G 6, p. 1:1–2. Read: עד [ז]מן דיעבד צביוני (Elizur).

G 6, p. 4:19. Read: o אמן אמן סלה ה.

G 7:34. Correct the printing error: יארי יי פניו אליך ויחנך פסתם.

G 8:9. Read: ושמתיה אינון (Elizur).

G 8:21–22. והסיר יי ממך כל חולי. This is a quotation from Dt. 7:15.

G 8:25. Read: thbuiכל חוקיו כל המחלה אשר שמתי (Elizur).

G 8:at the top, inverted. Read: לעולם ועד אמן אמן סלה (Elizur).

Page 265. אזה. Correct the reference: B 13:9.

Page 291a. K 1.95, read the references : 47, 187.

Page 291a. K 1.195, this should be deleted.

PREFACE

It was a widespread practice in the area of Palestine, Syria and Asia Minor during the fourth to the seventh centuries of the current era to use talismans written on metal sheets in order to ward off the powers of evil, to heal people, or to gain the love of a person. The common Babylonian practice of the same period was to write incantation texts on earthenware bowls. The number of Mesopotamian texts written in Jewish Aramaic, Syriac and Mandaic on clay bowls published to date reaches about one hundred and fifty, whereas less than ten Aramaic amulets from Palestine and its vicinity have been published so far.

This book developed from the desire of the two authors to do a modest work on a number of Aramaic magic bowls which at that time (almost ten years ago) were in Jerusalem in the hands of dealers and in the collection of the Institute of Archaeology of the Hebrew University. It has developed to its present dimensions as more texts have turned up. Work on some newly found metal amulets has made it necessary to study and revise the readings of the whole corpus of Aramaic amulets from the area of the Holy Land. Thus fifteen amulets have been edited in this volume — all those which can be deciphered with some confidence — and twelve new bowl texts written in Babylonian Jewish Aramaic and Syriac.

In order to understand the terminology and praxis of the texts discussed in this volume, it is essential to refer to contemporary and later texts from other sources: the Greek magic papyri, the early magic literature in Hebrew, and the magic fragments in the Cairo Geniza. Of the last group, so far almost completely neglected, a few selected texts are included in this work: five amulets, and three fragments from books of magic recipes.

The texts are provided with translations and commentaries, and a detailed glossary of all words is given. All newly published texts are accompanied by photographs. It has been our wish to make available to

scholars material for the study of popular religious life of Jews and pagans in the crucial period which corresponds to that of the Talmud. Our primary aim has been to provide philologically reliable material, and not to offer a detailed study of the religious implications of these texts.

It is out pleasant task to acknowledge the help received from various institutions and persons in the course of preparing the present study.

The following institutions provided us with photographs and allowed us to publish these texts and we should like to extend our thanks to their directors and staff: the Institute of Archaeology and the National University Library of the Hebrew University; the Israel Department of Antiquities; the Israel Museum; Museum of the Flagellation Convent, Jerusalem; the Jewish Historical Museum of Belgrade; the Metropolitan Museum; the New York Public Library; the Geniza Research Unit, Cambridge University Library.

The persons who made it possible for us to publish texts from their collections are Mr. Victor Barakat, Dr. Reuven Hecht, Mr. Victor Klagsbald, Dr. Wladimir Rosenbaum and Mr. Joseph Sammel.

Dr. Amos Kloner and Mr. Zvi Maoz of the Israel Department of Antiquities, the excavators of Ḥorvat Rimmon and Ḥorvat Kanaf, placed at our disposal their finds and their notes.

Mme. Hélène Lozachmeur has found and put at our disposal the original photos of Amulets 7a and 7b which were used by the late Professor A. Dupont-Sommer. We are very grateful for this help, which came when the book was nearly ready in the press.

Several friends and colleagues have given valuable advice. We should like to mention in particular the late Professor G.G. Scholem, as well as J.C. Greenfield, M. Sokoloff, G. Stroumsa and Y. Sussman.

Mrs. Ada Yardeni has contributed to this volume much more than drawings and layout; in several places she has improved the readings of the text. Mrs. Tamar Naveh has typed the manuscript and has rendered great assistance in the preparation of the book. Mrs. Miriam Shaked has done the editing of the typescript and prepared it for the press.

The staff of the Magnes Press, and in particular its director, Mr. B. Yehoshua, who has taken personal interest in this book, have done their utmost to produce an attractive-looking volume.

Jerusalem, February 1984 *J.N., S.S.*

PREFACE TO THE THIRD EDITION

Since the publication of the first edition of this book in 1985 the authors have continued to work on new materials of the same genre. The result was the publication in 1993 of the book *Magic Spells and Formulae*, where further texts were edited and further comments made on a number of topics touched upon in the present book. Each one of the present authors has dealt in a number of articles with further texts. A large collection of Geniza texts have been brought to light by Peter Schäfer and Shaul Shaked, in collaboration with a team of young scholars, under the title *Magische Texte aus der Kairoer Geniza*, I–II, Tübingen 1994–1997. Further texts are planned for publication in the subsequent volumes of the same series. The authors of the present volume are thinking of preparing a new corpus of Aramaic amulets, but this may take some time to complete.

The "Additions and Corrections" at the end of the volume (pp. 295 ff.) incorporate those printed in the second edition of the book (1987), together with further addenda and corrigenda that have been detected since then by discerning colleagues and by ourselves. The reader is urged to consult the Additions and Corrections while using the book.

Jerusalem, June 1998 *J.N., S.S.*

INTRODUCTION

1. Aramaic Magic Texts: General Description

The Aramaic texts published and discussed in this book are part of a long-standing tradition of magic in the Near East. Aramaic magic literature continues Assyrian, Babylonian and Egytian magic, and is closely related to the rich literature of magic and incantations in Greek, known to us chiefly from Egytian papyri. These texts, taken together, supplement our knowledge of society, religion and culture during the early centuries of the Christian era. The Aramaic magic texts, of which a a group of hitherto unpublished specimens is given here, form a distinct body of material within the corpus of magic in late antiquity, and we shall try to elucidate them mostly within their own terms.

The inscribed magic artifacts in Aramaic, which are usually supposed to date from the fourth to the sixth or seventh centuries C.E., are known to exist in two basic material forms: (a) earthenware bowls, inscribed with ink, usually on the concave side in spiral concentric circles,[1] all of them found, as far as it is possible to tell from controlled excavations,[2] in the area of Mesopotamia and Iran; and (b) metal sheets, of gold,

[1] Exceptions to this method are not rare. Some other techniques of writing are: The inscription, or part of it, is written on the outside surface of the bowl; the inside area is divided into sections, in which the writing is done in columns (e.g. our Bowl 8); some bowls have their writing arranged in circular lines without a spiral connection between the lines. The usual spiral arrangement can begin either in the centre or on the rim.

[2] In some cases (e.g. our Bowl 9) the provenance as given by the dealer is Palestine, but this statement, which cannot be verified, lacks credibility. For a similar claim made with regard to a Mandaic amulet cf. Naveh 1975, p. 47, note 1.

silver, copper or lead,[3] with the inscription incised into the surface of the metal with the aid of a sharp instrument. These latter amulets were designed to be folded, rolled into a narrow strip, and inserted into a container (reminiscent of a *mezuza* in shape), also made of metal, which could be worn as a phylactery on the body of the owner, or placed in a private house or a synagogue, possibly by suspension (see Commentary to Amulet 11). Amulet 10, which was written on a potsherd, and which served not for protection but for arousing love, was presumably designed to achieve its effect by being placed in fire (see Commentary *ad loc.*). Amulets written on a metal sheet are mostly typical of the area of Syria, Palestine and Asia Minor, although they are not entirely absent from the eastern regions, i.e. Mesopotamia and Iran.[4] It may be taken for granted that besides such solid materials as earthenware and metal, soft materials, such as parchment, papyrus or cloth, were also often used for writing amulets, but have not survived. Amulets on papyrus are in fact known from Egypt, written in Greek and Coptic,[5] and incantations on paper, parchment and cloth have been found in the Cairo Geniza (dating to the 10th century and later); some specimens of these latter texts are given in this book. Metal bowls were used for incantations in the Muslim world (Spoer 1935; Reich 1937-38), but this practice is unknown from the earlier period. We come across medallions and gems inscribed as amulets in the Hellenistic and Iranian cultures,[6] but no such objects inscribed in Aramaic have yet come to light.[7]

[3] At least one Nabataean incantation (Naveh 1979a) is written on a large pebble. One Aramaic amulet is done on a potsherd (our Amulet 10).

[4] Metal amulets written in Syriac have been found in the area of Luristan (a photograph, without decipherment or identification, published in Vanden Berghe 1970). Several Mandaic amulets on sheets of lead have been found; cf. Lidzbarski 1909; Macuch 1967, 1968; Caquot 1972; Naveh 1975.

[5] The most comprehensive collection of the Greek material is in Preisendanz 1928, 1931, 1941.

[6] For the Hellenistic material, cf. chiefly Mouterde 1930; Bonner 1950 and 1951. The rare Pahlavi amulets are discussed in Pope 1938, among the Sasanian seals. Bivar 1967 discusses a Parthian amulet while adducing other Iranian material.

[7] There are some Samaritan amulets written on metal pendants and rings, cf. Ben-Zvi 1976; Kaplan 1967.

Among Semitic amulets from Palestine and its environs we have texts written in three languages, Jewish Aramaic (Amulet 1–3, 5, 7–15), Hebrew (Amulet 4), and Syriac (Amulet 6). The first two varieties, Jewish Aramaic and Hebrew, were presumably written by Jews; they use the regular Hebrew script of the period, whereas the Syriac amulet, which seems to have been composed by a Christian, is written in Estrangelo.

As to the magic practice which accompanied the use of the bowls, different opinions have been expressed. Many bowls were found placed in their original position upside down, a fact which has led scholars to assume that they may have served as traps for demons, being meant to keep the evil spirits imprisoned inside them. This view may gain some support from the fact that in some cases two bowls were found placed facing each other forming between them a closed sphere.[8] Such an enclosed ball-shaped area might be an ideal prison for evil spirits. This theory was rejected by Gordon,[9] who argued that it would be absurd to assume that any house-owner would want to have demons permanently locked in his house. It seems, according to Gordon, much more likely that they would want to get rid of the maleficent spirits and to have them removed from the house. He therefore suggests that the shape of the bowls resembles that of a skull, which may have been regarded as magically effective. We must confess that this argument fails to convince us. The idea of keeping demon-traps in the house need not strike us as more ridiculous than that of placing mouse-traps. In both cases the hated victim, once caught, is incapacitated and is made powerless to cause harm. A harmless demon caught by the bowl constitutes no menace to the safety of the house. The text of the bowls very often talks of chaining and pressing the evil entities; at the same time it may also bid them go away, leave the house and desist from bothering the house-owner. The bowl thus serves both to entrap the evil powers and to reject them; there is no real contradiction between these two propositions.

It may be noted that many bowls, especially in Mandaic, are designed

[8] Pognon 1898, pp. 3 ff.; Hilprecht 1903, pp. 447 f.; Montgomery 1913, pp. 40 ff.

[9] Gordon 1957, pp. 161 f.; Isbell 1975, pp. 13 ff., represents the same view.

as "of the cemetery".[10] This may possibly indicate that some bowls were placed in a cemetery, and this association with the Other World added to their mysterious power. This was by no means the only location which was used in order to increase the efficacy of amulets. The amulets from Nirim (Amulets 11–13) were found in the apse of the synagogue, where the ark of the holy scrolls was presumably placed. It may be assumed that the amulet was put there in order for it to be as close as possible to the spot which served as a gate for communication (through prayer) with heaven. In this connection one may recall that a favourite modern spot for placing appeals to divine help is in the Wailing Wall.

Another theory for the use of the bowls is based on the current modern practice of bowl magic in the Middle East, according to which the bowl is often filled with some liquid and the person who seeks protection or healing is made to drink the water which has absorbed the contents of the formula and has thus been made potent.[11] There is, however, no evidence for such a practice with our Mesopotamian bowls, and it seems rather unlikely that they were used in such a way, which might have effaced the letters or left some other mark on the bowl.

Apart from bowls designed to protect the house and the person of the inhabitants of the house from harm or disease — the most common type — or to arouse love,[12] there are bowls which aim at inflicting evil on an enemy specifically named (e.g. Bowl 9). We have no information as to how these latter bowls were used. One can only try to speculate that they were buried or hidden in the vicinity of the enemy's house, or attached to some personal effect of the victim to be, probably obtained furtively.[13]

[10] Pognon 1898, p. 3, and our Bowl 4:2, which carries the phrase "the spell of the tomb". Some metal amulets were found in tombs; see our Amulet 4 (from Aleppo) and Montgomery 1911, p. 272 (Irbid). See also Montgomery 1913, pp. 40, 43 f.

[11] Canaan 1914, p. 102; similar injunctions in Winkler 1930, pp. 75, 76. Montgomery 1913, p. 45 gives the text of an Arabic brass bowl which also contains a reference to drinking. An early reference to this practice is in the Geniza text T.-S. K1.132: פתיחת לב. קח קערה חדשה וחכתוב ג ימים בכל יום אלו השימות ותרחוץ אותו במים ותשחה...

[12] Montgomery 1913, Nos. 13, 28. Our Amulet 10 and Geniza 1 and 3 constitute further examples.

[13] We have a recipe for hatred in a late Judaeo-Persian manuscript of magic (JTS 1714,

Three basic Semitic modes of writing are presented by the Babylonian incantation bowls. These are Judaeo-Aramaic, Syriac and Mandaic. A fourth type of writing found on some bowls is Pahlavi, but its interpretation is, unfortunately, extremely difficult. A single bowl which has been seen (at the Yale Babylonian Collection) contains a script looking like Parthian, but its authenticity is questionable and it is likely to be a modern forgery. The different scripts correspond not so much to linguistic or ethnic differences (although such differences also existed), but rather more to distinctions among religious communities; it is therefore interesting to raise the question whether the religious differences are also reflected in the magic texts, or whether one can establish a correspondence between each community's magic and its religious perceptions.

On the plane of language and phraseology we have significant and obvious differences between the various groups. The bowls in Judaeo-Aramaic contain a high degree of material which is derived from the Hebrew scriptures (see the index of scriptural quotations of this volume and Isbell 1975, p. 195). They also contain a small number of peculiarly Jewish concepts of the post-biblical period. The most noteworthy among these is the figure of Yehoshuaʿ bar (or ben) Peraḥya and the idea, associated often with his name, of giving a *geṭ*, a letter of divorce, to the female demons. This is further elaborated on in some of the texts by the idea of a *geṭ* which is sent across the sea (see below, p. 27). It is remarkable that the figure of Yehoshuaʿ bar Peraḥya occurs also in two Syriac bowls (Montgomery 1913, Nos. 32–33), where the Jewish term *geṭ* is rendered by the Persian word *dastabīra*.[14] A similar concept which may be of Jewish origin (although it may equally well be a pagan magical concept introduced into the Talmud) occurs in our Bowl 6 (see Commentary to Bowl 6:7–8 **wbyr**...). Several Talmudic associations seem to be present in Bowl 13.

Such elements are specifically Jewish; it is hard to imagine that they could have been composed by non-Jews. One must come to the conclu-

ENA 2326, fol. 1b): ... לשנאה יכתוב על חרס חדש לפּבּפּ עם פּבּפּ בשם... בשם אלו שמות תתנו
The practice accompanying the writing of an incantation for hatred is to bury the inscribed new potsherd in a new tomb. The same instruction with regard to a "new egg" is given in Geniza 6, p. 4:9–11.

[14] On this term cf. Shaked (forthcoming).

sion that the writers of these Jewish-Aramaic bowls were in all probability practitioners of magic who belonged to the Jewish community. This conclusion does not necessarily apply to the clients, who ordered the bowls written for healing, protection or other purposes. There is, in fact, a combination of two factors which makes it likely that not a few of these customers were indeed non-Jews: First, there is the fact that Jewish bowls constitute the great majority of inscribed earthenware bowls from Mesopotamia and Iran, while Jews certainly did not form more than a minority of the population; and secondly, there is the fact that the names of most of the clients were not Jewish, and some of them are theophoric names of Zoroastrian significance. The second fact would not be particulatly significant on its own, since there can be no doubt that many Jews carried Persian and other non-Jewish names. However, when it is combined with the first consideration, it adds some weight to the supposition that magic may have been considered to some extent a Jewish specialization and that pagans and Zoroastrians often turned to Jewish practitioners when they sought an effective remedy, protection or curse.[15]

It may be noted that the amount of Zoroastrian religious influence which may be detected in the Babylonian bowls is very limited; it concerns mostly some names of demons (see Shaked, forthcoming). This observation stands in contrast to the strong presence of Iranian linguistic elements in Babylonian Jewish Aramaic, and to the Iranian influence which may be detected in other spheres of Jewish life.[16] The same may be said of the Syriac bowls, which seem to have been written by pagans (or even by Zoroastrians). Mandaic bowls tend to have some specifically Mandaic terminology (e.g. the divine names **abatur, iurba**), but the same divine and demonic names and concepts are sometimes found also in Jewish bowls.[17] In general, the Mandaic texts follow the same magical conventions as found in Jewish Aramaic and Syriac bowls. In one or two cases Syriac and Mandaic bowls seem to reflect

[15] See further on this in Greenfield 1973a, p.150, and Shaked 1983, pp. 16 f.

[16] This field of study has not yet been treated in a comprehensive study. Sketchy references may be found in Neusner 1968 and 1975.

[17] See Pognon 1898, pp. 93 ff.; Montgomery 1913, p. 96; Yamauchi 1967, pp. 40 ff.

specific Jewish texts.[18] At least one Jewish Aramaic text seems to show clear dependence on a Mandaic *Vorlage* (cf. Greenfield and Naveh's forthcoming article on a Mandaic lead amulet containing four incantations).

2. History of Research : Bowls

The study of the Aramaic magic texts was first begun in the middle of the nineteenth century, when Thomas Ellis translated for Layard six incantation texts in Jewish Aramaic and one in Syriac, inscribed on earthenware bowls which were brought from Mesopotamia to England and deposited in the British Museum (Layard 1853; Levy 1855). Several other texts on bowls, inscribed in Jewish Aramaic and in Syriac, were published afterwards by Rodwell 1873 (for which cf. Halévy 1877); Chwolson 1882; Hyvernat 1885 (with Nöldeke 1885 and Grünbaum 1885); Schwab 1886 and Schwab's later publications; Harkavy 1889; Wohlstein 1893, 1894; Stübe 1895; Lacau 1896. These early attempts at interpretation are often quite faulty, though they paved the way to subsequent research. Towards the end of the century Pognon (1894, 1898) published more than thirty Mandaic incantation bowls found at Khuabir on the Euphrates, west of Baghdad.

The most important single scholarly contribution to the study of the bowls was done by Montgomery 1913, a monumental book containing an edition and translation, with notes and indices, of forty bowls (thirty of them in Jewish Aramaic, seven in Syriac, and three in Mandaic). All of these bowls were found *in situ* in the archaeological excavations conducted by the University of Pennsylvania at Nippur. This fact

[18] See the observations in Greenfield 1973a, as well as the comments above on Yehoshua' bar Peraḥya in Syriac bowls.

enables us to have a unified corpus of inscriptions written (or at least used) in a single town, presumably within a relatively short period of time, often by or for members of the same family. We thus gain an insight into the range of languages and scripts used in Nippur, as well as into the variety and limitations of the magic formulae which were current among the various communities in that town.

Montgomery's work (1913, pp. 16 ff.) has the added benefit of presenting the most comprehensive and solid introduction to the study of the bowls. It gives a detailed survey of earlier publications, thus rendering further discussion of the early studies of the magic bowls unnecessary, and analyzes the most important aspects of the texts and their contents. No attempt will be made in the following to duplicate or supersede Montgomery's treatment of the subject. Only certain points on which new material is available, or on which new suggestions may be offered, will be touched upon in the following pages.

Although Montgomery's readings are on the whole solid and reliable, the book contains a number of textual errors, both with regard to the reading of the bowls and with regard to points of interpretation. Many of these were corrected and clarified in an important review article by J.N. Epstein (1921-1922), which, unfortunately, was not taken into account by many of the scholars who have worked in this field since, with the result that several of Montgomery's patent errors have been perpetuated in the literature.[19]

The next most important name in this field of study is C.H. Gordon, who has in a series of articles,[20] published a great many new bowls from various collections in the U.S.A., Europe and the Middle East. The study of the magic bowls further benefited from the fact that a number of students of Professor Gordon felt inspired to work on this material; as a result there were published several dissertations containing corpora of bowls in Mandaic (Yamauchi 1967), Syriac (Hamilton 1971) and Jewish Aramaic (Isbell 1975), as well as a Handbook of the latter

[19] This observation applies to the work of C.H. Gordon, whose readings are generally reliable, as well as to that of his students Rossell 1953; Yamauchi 1967; and Isbell 1975. In Hamilton 1971 the Syriac texts of Montgomery are corrected in the light of Epstein's comments.

[20] See Bibliography under Gordon. The only work done on the subject in the intervening period between Montgomery's and Gordon's is by Fuÿe 1925.

language, in which a grammatical sketch is included (Rossell 1953). The texts collected in these corpora make up the following total numbers: 72 in Jewish Aramaic, 33 in Mandaic and 21 in Syriac. It may be remarked that not all the published bowls were incorporated into these collections.[21]

The more recent publications of texts in this field include Oberman 1940; Teixidor 1962; Jeruzalmi 1963; Yamauchi 1965; McCullough 1967; [22] Borisov 1969; Kaufman 1973, 1975; Geller 1976, 1980; Harviainen 1981.

3. Amulets Published So Far

The state of study of the Palestinian incantation texts is much less satisfactory than that of the Mesopotamian bowls. One part of the problem is that the small number of Palestinian texts makes their comparative study difficult. Another problem is that these texts were inscribed on small metal plaques (mainly silver, copper and lead), which were rolled up. The unrolling of the generally corroded fragile material and then the reading of the preserved tiny letters, which often consist of shallow scratches on the surface of the material, is by no means an easy task. Among the few generally fragmentary Palestinian amulets five were published at the beginning of this century: one, Amulet 4, is from Aleppo (Schwab 1906); one, Amulet 5, from Emmaus (Vincent 1908) and three from Irbid (Montgomery 1911). Two other amulets, Amulets 7a–b, were found at Ağabeyli in Turkey, near the Syrian border (Dupont-Sommer 1950/51). Still another, of unknown provenance,

[21] Missing from Isbell 1975 are, for example, the texts published in Hyvernat 1885; Harkavy 1889; Wohlstein 1893 and 1894; Stübe 1895; Fuÿe 1925; Borisov 1969. Not all of these were published without facsimiles.

[22] Cf. the reviews by Segal 1970; Yamauchi 1970.

Amulet 8, was published in Testa 1967. The latest publication of an amulet, Amulet 9, is by Klein-Franke 1971. The amulet is in Cologne, Germany, and may have come from Oxyrrhynchus in Egypt.

The amulets preserved in the New York Public Library, of which three were published by Montgomery in 1911, are part of a group of six metal amulets which were donated by Mrs. Henry Draper. Their state of preservation is such that it is very difficult to improve much on Montgomery's readings (which in some cases are evidently wrong).[23] We have therefore decided to leave them out of the present publication, which otherwise aims at giving a complete corpus of the known Aramaic amulets. Apart from Aramaic amulets we have included here one amulet in Syriac, published by Dupont-Sommer 1946, where we believe we can offer an improved reading and interpretation. Otherwise, because of the geographical definition which we have found useful to adopt with regard to amulets, namely those coming from the region of Palestine and adjoining countries, we have excluded from this corpus metal amulets from Iran and Mesopotamia in Mandaic and Syriac (see above, note 4).

The first amulet of this kind to be published, found near Aleppo (Schwab 1906; our Amulet 4), is one of the longest Palestinian amulets known. It contains some manifestly Jewish elements (e.g. the figure of 248 limbs, some biblical allusions, and many Hebrew phrases), together with the usual magic terminology (e.g. Ablanathanalba, Marmaraot, **ʾwgryt**). A prominent symbol which occurs in the text is strongly reminiscent of the Christian monogram XP. It has led scholars to believe that we are faced here with a Judaeo-Christian monument, though this does not seem proven, as the symbol may have been widely used outside Christian circles and may have preceded Christianity.

Vincent published in 1908 a fragmentary amulet of some five lines

[23] As an example for lines where the readings of Montgomery 1911 may be improved upon with some confidence, cf. the beginning of New York Public Library, Hebrew amulet No. 3 (Montgomery's amulet A) where one may read:

1. ובחטרה דמשה ובציצה דאהרן[]
2. כהנה רבה ובעזקתה דשלמה ו(ב)[מג]
3. נה דדויד ובקרנתה דמדבחא ובשמ(ה)
4. [ד]אלהא חיה וקימה ד(תי)גע[רון]

The combination **bḥwṭrʾ dmšh nbyyʾ... wbʿzqtyh dšlmh br dwd mlkʾ dyś[rʾl]** occurs in the Geniza fragment ENA 3513.11a.

found in Emmaus (our Amulet 5). Vincent's readings, which have been followed by subsequent scholars, have proved upon inspection to be in need of emendations, which are included in the edition presented here. We encounter in this amulet some divine names (Masagiel, Shamriel) and the magic term **krqtyry'** "magic characters, magic signs".

It has been the bad luck of this material, perhaps because of its rarity and the difficulties inherent in its decipherment, that it suffered in some cases from fanciful interpretations and unreasonable speculations. Thus, one amulet (our Amulet 6) was heralded upon its first publication as containing a gnostic doctrine relating to the letter *waw* (Dupont-Sommer 1946); subsequently it has been shown (by Gordon 1949, 1953) that not even once does the name of this letter occur in the text. Another text (our Amulet 7) was understood to allude to the Great God, who would be different from the God of Israel (Dupont-Sommer 1950/51, p. 208 on lines 15–16), but this was shown to be inexact (Scholem 1965, pp. 84 ff.). In both these cases the new reading offered here tends to confirm the revised interpretations, and in some measure it adds new details which improve our understanding of the amulets. Thus, the Syriac amulet (our Amulet 6) is now shown to contain an allusion to three deities, who are named Bar-Theon, Rabbā Ḥasīnā and Qaddiš Īlā "who stand in the great ford of the sea". It talks of a demon, called apparently Tarpas-dukh. In the Aramaic amulet (our Amulet 7) we may eliminate the speculation as to the "womb to be blessed" as well as to Metatron, as we can recognize the name of the client Shalluna bar Demetrion in lines 7–8. On the other hand there is a possibility of reading (in lines 14–15) a reference to words which rise "beside (or behind?) the throne", an allusion which brings to mind the notion of the angel whose name, Metatron, indicates that he is "beside or behind the throne".

A similar scholarly controversy has arisen with regard to an amulet which was apparently found near Jerusalem (our Amulet 8). The scholar who first published it regarded it as a blessing of the "oil of faith" (Testa 1967), but this interpretation was rightly rejected by Milik 1967 in favour of the more likely reading of the plaque as an incantation. We can see from the new reading that a demon by the name of Marten daughter of Qoriel is adjured in the name of the angel Agirat.

Finally, an amulet here reprinted with some corrections (our Amulet 9) adjures a spirit called "Fever and Shivering", evidently with the aim of healing the client, a certain Marian daughter of Esther.

4. The Newly Found Amulets

The corpus of amulets presented here is enriched by nine newly discovered texts, all, except three (Amulets 1,14,15) coming from controlled excavations in Israel, two from Ḥorvat Kanaf, near the Sea of Galilee (Amulets 2–3), one from Ḥorvat Rimmon, north of Beer-Sheba (Amulet 10) and three from Nirim in South Western Israel (Amulets 11–13). The last six amulets (Amulets 10–15) reached us at a stage when the corpus was ready for the press, and the numbers assigned had to follow at the end of the group.

As to the dating of the amulets, the archaeological data converge around the fifth-sixth centuries C.E. This dating is provided very clearly in the case of Nirim (Amulets 11–13), where the late Roman and Byzantine coins help in defining the period from which the amulets stem. The conclusion reached by L.Y. Rahmani as to the period of the small finds places them in the sixth century C.E. A similar conclusion was reached by the excavators of Ḥorvat Rimmon (fifth-sixth century C.E.) and Ḥorvat Kanaf (same period).

Amulet 1 is designated for healing the client. It contains several Jewish formulae, such as are encountered in the prayer before sleep *(Qeri'at shema' 'al ham-miṭṭa)*, as well as biblical quotations. It also has a series of magic names, and an interesting sequence of nouns, each one preceded by the word **m'yn**, which may mean either "from the eye of..." or "in the form of...".

Amulet 2, more specifically formulated for healing, commands "the fever and the shiver, the female demon and the spirits" to be driven out from the body of its owner.

Amulet 3 is for the protection of "Rabbi Eleazar..., the servant of the God of Heaven". This title is quite unusual in our amulets. Some of the text seems to suggest that the amulet is designed for protecting the owner on the road: "In every place where this amulet will be seen, you (the evil spirit) should not detain Eleazar, son of Esther. And if you detain him , you will be cast immediately into a burning furnace". Other parts seem to beg for the healing of the owner: "Send healing and cure to Eleazar". This amulet also contains verbal allusions to the Bible.

Amulet 10 is a love charm. It is written on an unbaked potsherd, which must have been meant to be thrown into the fire after the writing

of the amulet, and was probably used in this way, as far as we can tell from the black areas caused by fire on the surface of the sherd. The evidence for writing amulets on unbaked clay comes from the Judaeo-Arabic texts of the Geniza, where the term *nayy* "uncooked" occurs. The subsequent burning in fire was alluded to in the text of this amulet (and in Geniza amulets of similar nature) by the words: "Just as this sherd burns, so shall burn the heart of..."

Amulet 11 is for curing its owner from headache, which is called here by the Greek term κεφαλαργία, written **qplrgy'**. The pain is considered to go into the bones (?) of the chest.

Amulet 12 is designated for the protection of a woman and her child. Here too Jewish formulae are quite conspicuous. The female customer is called Shlamṣu, a hypocoristic form of Shlomṣiyyon.

Amulet 13 is for a woman called Esther daughter of Tatis. Esther is the most widely attested feminine name in these amulets. The amulet is designated to save her from evil spirits, and much of the text is taken by a quotation from Exodus 15:26.

Amulet 14, which is very fragmentary, is remarkable for its combination of Hebrew-Aramaic with Greek.

Amulet 15 is based on an interesting *historiola*, or magic story, which is also available to us in a Babylonian version in Bowls 12a and 12b. This story enjoyed widespread popularity in Christian magic literature of the East, where the name of the helper was identified with Saint Sisinnius. The names of the helpers in this amulet were perpetuated in late Jewish magic under the form Sanoy, Sansanoy and Samangalof, in amulets which are used for the protection of a new-born baby and its mother. The names of the main actors in our amulet are partly metaphorical: The woman is called Smamit (= spider or lizard), the attacking fiend Sideros (=iron), while the names of the helpers, **swny, swswny** and **snygly**, have not yet received satisfactory explanation. It may be significant that all names begin with the letter *s*.

5. Magic Bowls in the Present Volume

The present volume contains most of the legible bowls available in Jerusalem. These are bowls which form part of the collection of the Institute of Archaeology of the Hebrew Universty (Nos. 2–4), as well as those of the Israel Museum (Nos. 5–8). In addition we have included a bowl recently presented to the Jewish National and University Library in Jerusalem (No. 12a), together with a parallel text which occurs in a bowl at the New York Metropolitan Museum (12b). We are also publishing two bowls seen in the hands of an antique dealer in Jerusalem, Mr. Victor Barakat (Nos. 1 and 9), although the present whereabouts of these latter bowls is unknown. The texts of two unpublished bowls at the Jewish Historical Museum in Belgrade, Yugoslavia, photographs of which have been sent to Jerusalem for study and publication, have also been included (Bowls 10, 11). A last addition to this group of bowls comes from the Klagsbald Collection, Jerusalem (Bowl 13).

Several points of interest are brought out by the new bowl texts which are published in this volume. Two bowls contained in this collection are in Syriac, 1 and 10. Bowl 1 contains basically a well-known text, occurring on three Syriac bowls so far published (see Commentary to Bowl 1). The parallel text presented in this new bowl allows us to complement and improve certain readings in the previously published texts, and it confirms some of J.N. Epstein's conjectural readings (cf. Commentary to lines 3–4). A point which can be made on the basis of this text and which clarifies a formula in Aramaic bowls is the possibility of eliminating the figure of Hermes where it does not belong. It is clear that in Montgomery Nos. 2 and 27 what was regarded as an allusion to the Greek god is actually a reference to steel (cf. Commentary to line 12). It is a recurrent phrase in the bowls that the sorcerer is surrounded by a wall of pure steel, or clothed with a garment of pure steel.

Bowl 10 uses some interesting metaphors for the demons who are to be abjured. They are to be like birds who fly and change places (which is why they should leave the body and person of the client), and they should be like wax which melts in fire. It is not unlikely that such formulae were accompanied by suitable magic practices of the sympathetic kind.

Our Bowl 2 (in Jewish Aramaic) has five parallel texts already published. The new text again helps establish the correct readings of the formulae. From the study of Bowls 1 and 2 we may learn something of the mechanism of the transmission of magic formulae, which is not entirely that of a scribal tradition, but is akin in some respects to oral transmission. The combination of the two modes of transmission is clearly visible in the list of eleven names of angels (see Commentary to lines 6–7), where we can see certain modifications which may be attributed to copying, while others are only comprehensible in terms of free oral tradition.

Bowl 2 also affords a possibility of establishing the original form of the divine (or angel) name which occurs in Mandaic as **iurba**, identified with Adonai. The element **yw** in **ywrbʾ** is certainly a development of the divine name Yah, Yahu etc. (which occurs here as **yyy**), with the epithet *rabbā*. Although this figure is apparently defined here as an angel, there are eleven names of other angels who assist him against the demons, a fact which establishes his lofty position as a deity.

The international character of this magic is apparent in the expression **byt ʾylhy wbyt knyšt**ʾ (line 5), which seems to refer to pagan temple(s) and to Jewish synagogue(s).

Bowl 3 has a glaring example of Hebrew spelled from hearing, without acquaintance with the traditional spelling, when Num. 10:35 is given as ...וחיחי בין נסוע הארון וימר מושה קומה יהוה ויפוצו איבאך וינסו מ מיפנך

Bowl 4 has a curious illustration of an undefinable human figure. The ribbons waving to the left of the figure may be associated with the ribbons which constitute a symbol of royalty in Sasanian iconography; cf. Göbl 1971, pp. 11f. If this was intended in the picture, it may be possible to regard **mlkn**ʾ (in line 4) as signifying "I am king" or "I rule", rather than "I advise", as preferred in our translation.

Yehoshuaʿ bar Perahya is a well-known figure in the Aramaic incantation bowls. He occurs in Bowl 5, where he is associated, as is usual, with the practice of giving a deed of divorce (*geṭ*) to a female demon, named Lilit; the legal complication which arises in this situation is similar to that of a *geṭ* sent across the sea, which is valid. However, the *geṭ* lacks force because the man who writes it does not know the name of the woman. This is rectified by the divine powers, who add the name in the blank space. The situation is used to make the exorcism valid in all cases, "both when I know the name, and when I do not know the name"

(line 4). The point about the name of the demoness being unknown is so far only attested in this text, but it may explain the particular difficulty of the *get* which comes from across the sea, with an incomplete name.

Bowl 6 presents a curious introductory text which seems to be moulded partly on the Book of Jonah, but also uses other biblical allusions (e.g. Ps. 115:4–6), as well as what looks like an association with a phrase in the Babylonian Talmud (Ta'anit 8a; see Commentary to 6:7–8). A sequence of chronological designations, which has parallels in other magic texts, is included, and also a reference to groups of people "who sit in market places and streets, and who go out on the roads". This kind of enumeration is reminiscent of the various lists of nationalities which occur on some bowls; see e.g. Kaufman 1975, where the spirits of different nationalities are mentioned.

Bowl 7 is so unusually formulated that it partly defies translation. The translation provided is to a large extent conjectural. It provides us, nevertheless, with some interesting parallels to late Jewish magical literature. The phrase **kmypl ḥysy' mn ṭwr'** etc. can be understood in the light of *The Sword of Moses* (Gaster 1898), which in its turn also gains in clarity by this comparison.

Bowl 8 has an unusual arrangement in columns radiating from the centre cross-like. This is the only text in our collection which has already been published (it was first printed in a Hebrew article by Narqis 1935), and it is re-edited in order to complete the collection of the Jerusalem bowls, as well as for rectifying some minor points in the reading.

Bowl 9 is particularly interesting in that it provides a rare example of a text devoted to imprecations addressed by name against an enemy, Judah bar Nanai. The language of the curses is based on biblical verses, and in some cases it invents non-existent biblical phrases; **wl' th' 'swth lmḥtm** betrays the intention of the writer, since he fell into the trap of using Aramaic words where he obviously thought he was writing in good Biblical Hebrew. A list of diseases, not all of them understood by us, is an interesting feature of this bowl.

Bowl 11 provides us with some new features. A seemingly Iranian term for a magic formula, **mhryn**, occurs here for the first time, as well as such unusual forms as **pydgmy** and **'ryswt'** (the latter denoting a magic bane). Two biblical verses are intertwined for magical purposes in lines 6–7 by giving a word of each successively.

Under number 12 two bowls which have a similar text are given in parallel columns, together with the text of Amulet 15, which contains

the same story. For some comments on the story of Smamit and her helpers see above in the description of Amulet 15 (p. 25).

The main interest of Bowl 13 is in its large size and very long text as well as in some features of its contents. It contains a unique description of the physical appearance of the demon addressed in the incantation, apparently the demon Bagdana, "head of sixty kingdoms, whose power is the power of a blast, whose heat is the heat of fire" and so on. Besides these attributes of power and of the terror which he arouses, we have such concrete details as "his head is that of a lion, his molar teeth are those of a she-wolf, his teeth are those of a tiger, the draughts of his mouth are furnaces of fire" and so on. The text of this bowl is also remarkable by the fact that it has a well defined structure of parallel passages, which begin with similar formulae, although the precise significance of the dialogue formed by these passages is not entirely clear. All in all, the text of this bowl presents a unique incantation formula, which has no parallel in other magic texts as far as we know.

6. Other Texts of Magic and the Geniza Material

The objective of this study was to publish the texts of our amulets and bowls with readings and intepretations which would be as exact and thorough as possible. While doing this work we checked previously published incantation texts (as far as possible from photographs or facsimile drawings) without relying too much on previous editions. Thus we could suggest revised readings not only for the amulets which we have re-edited (Amulets 4–9), but also for several phrases in the previously published Mesopotamian bowl texts.

In order to get acquainted with the whole magical literature in antiquity, major publications of Greek magic papyri and various magic books which have survived, such as the Christian Syriac *Book of Protection* (Gollancz 1912) or the Jewish *Sword of Moses* (Gaster 1898) and *Sefer ha-razim*, which was found among the Geniza materials, were checked. However, among the fragments which survived in the Cairo

Geniza there are many amulets and pages of magic books which have not yet been treated by scholars. We have found it necessary to go through some of this material and compare it with other Jewish magical texts, although we have not aimed at completeness in this field.

The Geniza amulets and magic books were written in the Middle Ages, generally in Egypt itself, but some presumably in the neighbouring countries, as e.g. Palestine. The writers of these texts spoke Arabic (in certain cases Persian, and in one case a Persian dialect), but their magic texts were written in an interesting mixture of Hebrew, Aramaic and Arabic (including some Greek terms and words). As for the contents, it is obvious that the magic of the Geniza follows in general the Palestinian tradition. Thus it is possible in some cases to understand phrases in the Palestinian amulets and restore the fragmentary love charm from Ḥorvat Rimmon only by comparing them with the formulae used in the Geniza magic texts. A selection of five Geniza amulets (Geniza 1, 3–4, 7–8) and three fragments of magic books (Geniza 2, 5–6) is given here. Apart from these texts, some occasional phrases from further unpublished Geniza fragments are quoted in the Commentary. The use of the Geniza texts is designed to help in elucidating certain obscurities and to add paralled material to the formulae discussed in the main parts of the book (mainly in connection with the amulets).

7. Notes on the Language of the Texts

Short sketches of the three main dialects of the bowls are provided in the following publications: Rossell 1953 (Jewish Aramaic); Yamauchi 1967 (Mandaic); and Hamilton 1971 (Syriac). Useful remarks on some expressions will be found in Epstein 1960, p. 14; Levine 1970; Greenfield 1973a and 1973b. On some formulae there are also remarks in Niggemeyer 1975 (which is mainly concerned with those in *Sefer harazim*); Gruenwald 1980; and Niditch 1979. Mention should also be made of the observations by F. Rosenthal 1939, pp. 218 ff., 233 ff. Some

points of detail have been dealt with by Schiffman 1973 and Sperber 1966.

In discussing the language of the bowls and the amulets published in this volume, we have to distinguish three groups of texts: Syriac (Bowls 1 and 10 and Amulet 6); Babylonian Jewish Aramaic (Bowls 2–9, 11–13); Palestinian Jewish Aramaic (Amulets 1–3, 5, 7–15). In Amulet 4 the Hebrew element is predominant.

a. The Syriac Bowls

The three Syriac texts are not written in the same script: the script of Bowl 1 is Proto-Manichaean, more akin to Palmyrene cursive (cf. Montgomery 1913, Nos. 31–37), while Bowl 10 and Amulet 6 are in Estrangelo. All three Syriac texts share some common features: the determined state is always written with a final *alef* and the masculine plural det. st., *-ē*, is expressed by *alef* (generally marked by a *seyāme*). *Alef* as a medial *mater lectionis* occurs in Bowl 1, cf. **yʾtẅh** (in line 6), **ymʾmʾ** (line 13). *ʿAyin* and *ḥet* are weak , cf. **šmʾ** (for **šmʿ** in 1:8); **mbʿdʾ** (for **mʿbdʾ** in Bowls 1:11; 10:8); **bwtk** (for **bʿwtk** in Amulet 6:10); **ḥdyn** and **ḥdʾ** (for **hdyn** and **hdʾ** in Bowl 10:7, 11, 13); *he* is sometimes omitted, cf. **nywn** (10:10). Moreover, in Bowl 10 *ʿayin* is used as an initial *mater lectionis* for the designation of the vowel *e/i*, cf. **ʿmmʾ** (line 4) **br-ʿmʾ** (line 6), **ʿtqṭlw** (line 12), etc. This trait is characteristic also of Mandaic (cf. Yamauchi 1967, pp. 75f.).

Further features of the orthography of the Syriac in Bowl 1 are: a line over the final part of words usually marks the participle (e.g. **mḥwʾ** line 6, **mtqrʾ** line 9). The *seyāme* is sometimes used for marking forms which are only reminiscent of the plural (e.g. **yʾtẅh**, Bowl 1:6). The third person singular in both bowls has the typical Syriac **n-** prefix, e.g. **nhwʾ** (1:8), **nḥdrh** (1:11); **nytnṭr** (10:6) etc. If the reading **lkbyšwh** (10:13) is correct, *lamed* occurs for the *nun* prefix in this case.

b. The Bowls in Babylonian Jewish Aramaic

The language of the bowls written in the Jewish script has the clear features of Babylonian Jewish Aramaic. The plural masculine, for example, has quite often the *-ē* ending, as in Syriac, but here it is expressed by a final *yod*: cf. **kwkby wmzly** (Bowl 2:3); **byšy wtqypy** (Bowl 6:2), etc. The final *-ā* designating the determined state (in singular masculine and in singular and plural feminine) is generally marked by an *alef*, but there are quite a number of words ending with a final *he* (as

in Palestinian Jewish Aramaic), cf. mainly the word **ʾrʿh** in Bowls 2:8; 3:4; 5:2; 7:8; but also **bny ʾynšh** (6:2,5); **ywblh** (6:7); **byryʾth** (6:9); **ʾswth** (11:7); **ršyʿh** (12a:3); **nḥšh** (12b:3); **rbh** (12a:6); **mqdšh** (12b:6). For this phenomenon, cf. Rossell 1953, p. 36.

Bowl 6 has the characteristic Babylonian Jewish Aramaic *paʿʿel* infinitive **lštwqy wlskwry** (line 1), but in line 5 there occurs **lštqʾ**. Rossell 1953, p. 53 has already remarked on this: "the infinitive may be *qaṭṭālā*, or more commonly, *qaṭṭōlē*".

It has been pointed out that in Babylonian Jewish Aramaic the *qamaṣ* was quite often pronounced *o*. In the bowl-texts there is sometimes a *waw*, where an *ā* is expected (cf. Rossell 1953, p. 20). This trait is quite prominent in Bowl 12a, cf. **smwmyt** (line 1), **wʿwl** (line 5), **ywtyh** (lines 5, 6, 7), **qwmw** (line 6), and in Bowl 13, cf. **qwmk** (line 2), **qwmh** (line 8) and perhaps **ywyty** (line 1). Since this phenomenon occurs in a limited number of bowls only, it may justify the assumption of Sharvit 1974, p. 555, according to which Babylonian Jewish Aramaic possessed two contemporary pronunciations of the *qamaṣ*, probably distributed by areas, one where we may observe the development *ā* > *ō*, while in another area the *qamaṣ* was pronounced *ā*. A similar division had been suggested for Palestine. On this problem cf. also the study by Boyarin 1978b.

The *shwa* was sometimes written with a *yod*. This is attested not only with regard to the conjunction **wy-**, the prepositions **by-**, **ly-**, and the relative pronoun **dy-** (cf. Rossell 1953, p. 21 and our Commentary to Bowl 2), but also within the words themselves as **pyryšw** (Bowl 5:4–5); **tyštqwn** (*paʿʿel* imperfect, Bowl 6:9). This trait occurs also in Amulet 3:4, **tyḥšyn** (*paʿʿel* imp.).

Alef is often elided in the bowls; examples are **dytt**ʾ (2:9), **ytytt**ʾ (2:9), **dym**ʾ (2:4).

Besides the older form of the possessive suffix of the third person singular masculine attached to a plural noun, **-why**, which is attested in forms like **ḥzwhy** (Bowl 9:13), we have the younger form with **-yh**, e.g. **šqyh** (Bowl 9:3) and **kkyh, šynyh** (Bowl 13:4), **ʿynyh** (Bowl 13:5) and similar forms in Bowl 13. In Syriac we have such a form in **bnyh** "his sons" (Bowl 10:6). For this phenomenon cf. Epstein 1960, p. 123; Rossell 1953, p. 38. In addition we have the interesting hybrid form **(h)dmyhw**ʾ (Bowl 9:13). With regard to the preposition **ʿl**, again, both suffixes for the third person singular masculine are used, sometimes in one and the same bowl; cf. **ʿlyh** (Bowl 9:7), **ʿlwhy** (Bowl 9:14). In

contrast, the Palestinian forms attested in the amulets tend to show this ending as **-wy** (Amulet 3:15, 16; 5:5,7; 15:16). Amulet 1:22 has the full form **bgydwhy wbgrmwhy.**

c. The Amulets

Since Amulets 2, 3 and 10–13 were found in excavations carried out in Palestinian sites, they may be considered — together with the synagogue inscriptions (Naveh 1978) — as a reliable witnesses for the description of Palestinian Jewish Aramaic. Similar traits can be found in Amulets 7 and 9, although they stem from Ağabeyli (in southern Turkey) and Oxyrrhynchus (in Egypt). The other amulets (with the obvious exception of 6, which is in Syriac), may be presumed to derive from Palestine or its immediate vicinity.

In most Palestinian texts the determined state is generally marked by *he*, but the Nirim amulets display a preponderance of *alef*.

The negative *lā* is spelled **lh** in two amulets: Amulet 3:4 and 9:6.

A typical Galilean Aramaic trait is the absence of initial *lamed* in the infinitives, cf. **mʾsyh** and **mgʿwr** in Amulet 2:1,11. This can be compared to **dʿtyd mʿbd mṣwth** in the inscription of the synagogue at Tiberias (Naveh 1978, No. 26). The above-mentioned form **mʾsyh**, i.e. the *paʿʿel* infinitive with an initial *mem*, is also characteristic of Galilean Aramaic. For **plṭʾ**, where the existence of a prefix is uncertain, see Commentary to Amulet 13:4.

The form **šwmyh** in Amulets 3:6 and 9:5 is well-known in Palestinian Christian Aramaic (Schulthess 1903, p. 209), and it occurs in two synagogue inscriptions (Naveh 1978, Nos. 20, 70).

As in the synagogue inscriptions, there are here signs for the weakening of the gutturals, cf. **ʾwryth** in Amulet 9:1 (for **ʿryth**, occurring in Amulet 2:2,12 and **hʿryh** in the Hebrew text of Amulet 4:29; but see Commentary to Amulet 9:1. A case of *ʿayin* for *alef* occurs in **mrʿšy** (Amulet 14:8), as part of the same phenomenon. The *alef* was left out by the writer of Amulet 9: cf. **mryn brth dstr** (9:2), as against **rby ʾlʿzr brh dʾstr** (Amulet 3:5).

Incidentally, the Palestinian form **rby** (cf. Naveh 1978, p. 58) occurs in Amulet 3, whereas the Babylonian form **rb** occurs in a bowl text (cf. Harviainen 1981, p. 5:8,9). For the title of the well-known authority on magic , R. Joshua bar Peraḥya, the form attested on Babylonian bowls seems to be invariably *rabbi*, as in the Palestinian tradition, presumably because this is a name borrowed into Babylonia from Palestine. This is

also the case in our Bowl 5. (Montgomery 1913, Nos. 32, 33, reads in the Syriac text **rb yyšwʿ**, but an examination of the facsimiles suggests that the correct reading should be **rby**, followed by **yšwʿ**; in Montgomery No. 17 Yehoshuaʿ ben Perahya is not given a title). Cohen 1981, p. 78, collected forms of the title **rby**. In about five cases the "Babylonian" form occurs in Palestine.

The expression **ythzh yt** in Amulet 3:14, i.e. the accusative particle **yt** after a passive verb, has some parallels in the Targum.

A typical Palestinian form is the plural imperative **ʾswn** (Amulet 3:22), whereas the third person plural feminine perfect **slqh** (Amulet 7:14) occurs in *qeri* Biblical Aramaic and the language of Onqelos.

d. Contacts Between Palestine and Babylonia

There were, no doubt, strong connections between the magical tradition of Jewish Palestine and that current among the Jews of Babylonia. This is demonstrated by various phrases and expressions which are common to both the amulets and the bowls. The opening formula of Amulet 3 occurs in three of the magic bowls (Isbell 1975, Nos. 67 and 69; Isbell 1976, p. 23). The use of the phrase from Zach. 3:2, which is quite common in the bowls (cf. our Bowl 11:5–6), occurs in Amulet 1:5–6. The story told in Amulet 7:16–22 has close parallels in two bowls dealt with by Gordon 1971, pp. 233 f. and 236 f.

This connection between the two traditions is also visible in the orthography. It has already been noted that in the bowls there are some *he* endings for marking the determined state. On the other hand, in the amulets there are several *alef* endings.

The overlapping between the Babylonian and the Palestinian traditions may occasionally be noticed in some points of vocabulary. Thus the verb **ḤMʾ** occurs in the Babylonian Bowl 6:4, although it is generally considered to belong to western Aramaic (cf. Kutscher 1971, cols. 270, 274). This is, however, a verb which is known to occur outside the area of western Aramaic (cf. Tal 1975, p. 199 and note 24).

Amulet 15, with Bowls 12a and 12b, present a concrete case of a Palestinian-Babylonian contact. The formula contained in these magic texts certainly travelled from west to east. Along with the formula and the names of the heroes of the story some typical Palestinian expressions were adopted by the writers of the Babylonian bowls: cf. **ʾrtq** (for which see Kutscher 1971, col. 274). In other cases, the writers of the bowls made the necessary linguistic adjustments to translate the

language of the formula into Babylonian Aramaic: e.g. Palestinian **kl hn d-** "everywhere" (Amulet 15:19) corresponds to **kl ʾtr d-** in Bowl 12:VIIIb.

8. Magic in the Palestinian Amulets and their Religious World

While this book aims to give, for the first time, a full and accurate reading and interpretation of all the legible amulets from Palestine and the neighbouring areas, it seems proper to try and attempt an interpretation of the world of religion and of the occult as it emerges from these texts. Of the period in which these amulets were written we do not have too many direct epigraphical traces in Palestine, especially not in Aramaic.[24] And yet this is a period of great importance in Jewish history: it is the period in which post-exilic Judaism crystallized, the Jerusalem Talmud emerged, and to a very large extent the final shape of late Judaism was determined. The study of these texts, however short they are, and however fragmentary, should therefore prove to be of considerable interest.

The Jewish influence in the magic of the period is conspicuous. This can be seen both in the Greek and Coptic papyri from Egypt and in the Mesopotamian bowls which use non-Jewish scripts (see above, p. 18). For its own part, however, "Jewish" magic, i.e. magic written by Jews and using the Hebrew script, is also cosmopolitan, containing as it does religious elements borrowed from other cults and cultures, as do other types of magic written in other scripts. It partakes with other forms of neighbouring contemporary magic the use and address of such prominent magical figures as Abrasax, Marmaraot, Ablanatanalba, Sesengen

[24] The most important epigraphical material is the collection of synagogue inscriptions, some of them extremely short; see Naveh 1978. Apart from these, there are a number of funerary inscriptions; See Frey 1952, though the latest finds have not yet been collected.

Bar Ferenges. It contains allusions to such concepts and *topoi* of magic as the great importance of iron and copper, the careful inclusion in the incantation of a reference to all possible directions: right, left, front, behind, and above (with the deliberate omission of the world underneath; see Amulet 1). It makes use of magic letters and magic figures, of a comprehensive number for the limbs of the body (usually 248, but there are other figures), and sometimes of a list of specific limbs, of careful references to divisions of time (day, week, month, year), and of other themes of a similar nature.

Within this general web of magical elements, there are elements which may strike us as Jewish. Some of these have become part of the general non-Jewish magic tradition, e.g. names such as Yah, Yahu, Sabaoth, El, I-am-who-I-am, as well as formulae such as Amen, Selah, etc. More to the point are the direct biblical quotations and the biblical allusions, and sometimes the made-up biblical verses, which underline the fact that the amulets were composed in a *milieu* where the Bible was the sacred scripture, and quoting it, or at least pretending to quote it, was deemed to be of special magic power. It is of course important to bear in mind that we have to do here in most cases with a popular type of practice, and with a level of learning that does not go very deep.

Can any doubt be raised as to the orthodoxy, in terms of Jewish religion, of the people who wrote and used these amulets? Contemporary Jewish sources, notably the Talmudic and Midrashic literatures, are notoriously ambiguous about magic.[25] It must be recalled that we should not take the utterances of the sages in the matter of magic at face value. Magic is officially condemned, but many people who practised what we call "magic" would deny that they indulged in a practice which was against Jewish law. They would say that they practised healing, protection, etc., and that they relied not on magical powers, but on the power of God and His angels. The argument about the legitimacy of magic, among Jews just as in other cultures, sometimes revolves around the definition of terms.

Of more fundamental importance is the question as to what powers are invoked in the Jewish amulets, and what position they are deemed to occupy. In the Jewish bowl texts from Mesopotamia, the divine names

[25] See L. Blau 1898, pp. 19 ff.; Urbach 1975, pp. 97 ff.

appealed to include, besides Yahweh and his epithets, and the Jewish angels Gabriel, Yehoel, Yequtiel, Michael, Nuriel, etc., also names of pagan gods such as the Greek Hermes (see Montgomery 1913, p. 99); the Mesopotamian and Syrian Belti, Nereg, Nanai, Shamish, Dlibat and Mot (see Index here and in Montgomery 1913); the Iranian Anahid, Danahish, Bagdana, and others.

The Palestinian amulets in Jewish script do not contain references to such pagan deities. In the amulets, as far as we can make out, the various powers invoked are apparently conceived as being magic agents dependent on or subordinate to Yah the God of Israel. This seems to be the case in most amulets, though in some of them (Nos. 5, 8 and 10) the God of Israel is not mentioned at all. Amulet 3:11 speaks of "Yahu **krmsys**, the great God"; whatever the actual identity of this **krmsys**, it seems to figure here as an epithet of Yahu, and not as an independent power.

Abrasax is very frequently invoked in the Palestinian charms (see Amulets 1:9; 2:3; 12:2). According to *Sefer ha-razim* IV:3 Abrasax is the first among some thirty angels directing the sun during the day. In the same chapter of *Sefer ha-razim*, a Greek prayer addressed to Helios, the sun god, is given in Hebrew transcription. The text says: "Holy, eastern Helios, good sailor, highest governor, most exalted, who of old regulate the heavenly wheel, holy umpire, controller of the poles, Lord, glorious guide, master, soldier".[26] It may be mentioned in this connection that in the mosaic pavement of three synagogues of the fourth to the sixth centuries, those of Bet Alpha, Hamat-Tiberias and Naʿaran, Helios is shown in the centre of the mosaic, riding his chariot in the middle of the zodiac. The reason for this prominent display of Helios in Palestinian synagogues has been the subject of extensive scholarly discussion.[27] The basic question is whether it may be assumed that Helios was worshipped alongside, or independently, of God in these synagogues. The evidence of our amulets, while not decisive in itself, tends to strengthen the position that Helios, like so many other supernatural powers who were treated with great respect, did not seriously encroach upon the supreme position of God. Amulets 11–13 were found in

[26] *Sefer ha-razim* IV:61–63; translation by M. Smith 1982, p. 210*.

[27] See some references in Smith 1982.

another synagogue of the same period, in Nirim, and they were placed in or close to the holy ark. The syncretistic mixture which they display, while perhaps not universally approved of in rabbinic circles, was nevertheless part of the everyday piety of the age, and the angels mentioned in them are all subservient to God.

We know from the Talmudic sources that the use of this magic was not confined exclusively to the ignorant classes of society, but may have been shared partly by people who belonged to the circles of the learned. It is interesting, nevertheless, to have this confirmed by one of the amulets of Ḥorvat Kanaf, which was made for the benefit of a certain "Rabbi Eleazar son of Esther, the servant of the God of Heaven" (Amulet 3:6–7). Specialists in Talmudic literature may try to identify the person in question, but it is sufficient to note that this title, which is not too common in magic texts, occurs here for the client of an amulet. S. Cohen 1981 discussed all the evidence for people called Rabbi in epigraphical sources. Cohen makes a distinction between two senses of the title "Rabbi": It may be used either as a general honorific title, or for a tradent of Talmudic tradition. It is obviously impossible to decide here which usage is relevant, but the pious formula "the servant of the God of Heaven" no doubt indicates that "Rabbi" is here used in a religious sense.

The one amulet in our collection which is clearly not Jewish, the Syriac amulet No. 6, displays a spirit which stands in sharp contrast to that of the Jewish amulets from Palestine. It talks of three deities, and these are given high epithets. If this contrast is anything to go by, the distinction between Jewish and non-Jewish magic in Palestine and its environs is strongly pronounced. However, since we possess no more than a few specimens of what must have been a very extensive literature of magic in that area, it would be rash to base far-reaching conclusions on so little material.

TEXTS AND COMMENTARY

I. Amulets from Palestine, Syria, Asia Minor and Egypt

Amulet 1

Provenance unknown

Amulet 1

Translation

1 On your right are very many, on your left is Uzziel,
2 in front of you is Susiel, behind you is Repose.
3 Above these is God's Divine Presence. Save
4 [Quzm]a son of Salminu from affliction, from (bad) fate (?), from plague.
5 "And God said unto Satan: May God rebuke you Satan
6 and may God who has chosen Jerusalem rebuke you" (Zach. 3:2). Amen.
7 King **ywnwn nymws** and all **mswsyn** ...
8 Ishmael the great, mighty and terrifying. ...
9 **wlydpt wlwzpt wmrhptys ʾbrsqws**
10 Ruḥa, Ruba, Rabia, Yah, Yah. Be healed,
11 Bar Salminu, from all pain from this day
12 to eternity. Amen, Amen, Selah. I have written, God
13 will heal. In the name of Satriel, Azriel, ...
14 ... heaven, who ... wine in vessels (?), h[e]
15 will send forth the healing of Quzma son of Salminu ...
16 ... from the eye of cataract (?), from the eye of a spell, [and from the eye of]
17 a talk, from the eye of the house, and from the eye of the open space (?), and from the eye of ...
18 in his cure on behalf of the Lord of heaven. Amen, Amen, Selah.
19 ... one and on top of that one, then there are two. Amen, Amen, Selah.
20 [Blessed be] He who afflicts and heals the spirit of the bones. A [good] amulet.
21 I adjure you, the spirit of the bones, that walks
22 within the tendons and the bones of Quzma son of Salminu.
23 (I adjure) you by the God who lives, God of Israel, from the beginning ...
24 ... [of Hos]ts, king of the kings of kings ...

This amulet was incised with a sharp instrument on a narrow silver sheet, rolled from the upper part to the bottom; it was placed in a container, which has been preserved with the amulet. Nothing is known of its provenance. Its surviving height is 4.5 cm., width 3.3 cm.

1–3 The first phrase is reminiscent of Geniza 5, p. 2, lines 9–10 and that of the prayer "*Qeri'at shema'* on the bed": מימיני מיכאל ומשמאלי גבריאל ומלפני אוריאל ומאחורי רפאל ועל ראשי שכינת אל "On my right Michael, on my left Gabriel, in front of me Uriel, behind me Raphael and above my head the Shekina of El". See also Amulet 14:8. This formula found its way into Christian Syriac (Gollancz 1912, p. 5, § 7; p. 6, § 8) and Muslim Arabic (Goldziher 1894, pp. 359 f.) sources. See also Winkler 1930, pp. 20ff.

4 The name of the client Quzma — Cosmas is well known among the Syriac Christians (Payne-Smith, col. 3515). The name of the client's mother **slmynw** is unknown; can it be a variant of Σαλώμη? Cf. also Frey 1952, Nos. 1236–1237, 1459.

mpg' mrg' mng' is a pun. Only **pg'** and **ng'** have the sense of "affliction" and "plague". **rg'** means generally "moment"; it may mean here "a sudden calamity".

5–6 This verse from Zach. 3:2–3 is common in magic bowls and occurs in "*Qeri'at shema'* on the bed"

7–10 The names in the frames are of angels: **nymws** is Greek νόμος "law"; **mswsyn** means perhaps "healers", a *saf'el* form of the root **'SY**. Cf. Brockelmann 1928, p. 464b.

lwzpt: See Isbell 1975, 69:7 and Isbell 1976, p. 23 **llyzpt.**

mrhptys: This may be an inversion of a Greek compound word such as ἑπτῆμαρ or ἑπτημέρος.

'brsqws is generally written **'brsks**; see Amulet 2:3 as well as the Geniza amulet 7:29 and a fragment from the magic book, Geniza 6, p. 1:11–12: **'brsks ml'kh rbh** "Abrasax the great angel". This angel is well known in the Greek magic papyri from Egypt, where it is listed with Yau the God Sabaoth, Adonai, Michael, Suriel, Gabriel and Raphael (Preisendanz 1928, I, p. 36; pp. 10, 158). See also in the bowls Isbell 1975, Nos. 3:8–9; 4:3–4 and in the Syriac bowl Montgomery 1913, 34:9 as well as *Sefer ha-razim,* pp. 8 and 96 (IV, 13).

8 **rb' gybr' wdḥyl'**: The reading of the last word is dubious. One seems

Fig. 1. Amulet 1

to see **drwqyl**ʾ, but this may be considered to be a corruption of **wdḥyl**ʾ. The whole formula brings to mind the expression in the ʿAmida prayer: האל הגדול הגבור והנורא. For the phrase **rb**ʾ **gybr**ʾ **wdḥyl**ʾ, which seemingly uses *rabbā* as the substantive epithet for the deity, followed by two attributes, cf. Amulet 6:1–2 **rb**ʾ **ḥsyn**ʾ (one of a trinity of deities); Bowl 6:9 **mšbʿn**ʾ **ytkwn byšmyh** ʿ**d**ʾ**rb**ʾ **wdḥyl**ʾ; and Amulet 7:15 **bsṭr krsyh d**ʾ**lh rbh ḥsynh wdḥylh,** where the sequence **rbh ḥsynh wdḥylh** may possibly be taken as an apposition to ʾ**lh.**

12–13 **ʾnh ktbt yyyy yʾsy**: See Isbell 1975, 1:14–15 **ʾnḥnʾ ktbnʾ wšmyh ysyk** "we have written, and his name will heal you", or Isbell 69:8 **ʾnʾ ktbyt wʾlhʾ mʾry kwlʾ ysy yt**[...] "I have written, and God the Lord of All, will heal [...].

14 If one may reconstruct [**t**]**rʿ rqyʿh** we may compare it with **trʿy šmyʾ** in 4QLevi, I:18 (Fitzmyer and Harrington 1978, p. 90) and Hebrew **šʿry šmym**.

14, 16–17 The readings and the interpretations in these lines are uncertain. **brwqh** may mean "lightning", but it may also mean "cataract" as **brwqtʾ** in Gaster 1896, p. XIII:3; *Sefer ha-razim* II:182 (p. 91) **rwḥ hbrqt**; see **brqyt** in Jastrow, p. 197a and **bruqta** in Drower and Macuch, p. 70a: **aina bruqtia** "eye with cataract". In Syriac there occurs the phrase **wbrq brwqʾ bḥṣh wpqʿt mtnh** (Gollancz 1912, p. 8,§10), which the editor translated "he hurt (?) his back, his loin ruptured" (p. XXXI). **mʿyn** could conceivably also be translated "in the form of", but the formula in the printed amulet (Warsaw 1867), where

Amulet 2

Provenance: Ḥorvat Kanaf

15 קקקקקקק בשם מיכאל]
16 עזריאל]

Amulets 2 and 3 were found in the excavations at Ḥorvat Kanaf by Mr. Zvi Maoz of the Israel Department of Antiquities, who kindly entrusted us with the publication of these texts. The essential details about the archaeological context of these amulets, as communicated by Z. Maoz, can be summed up as follows:

> Ḥorvat Kanaf is situated on a lofty spur, descending from the basalt plateau of the Golan, 3.5 km. off the north-eastern shore of the Sea of Galilee. In 1885 Lawrence Oliphant found here a fragmentary Aramaic inscription with Hebrew characters, which was part of an inscribed lintel of the ancient synagogue (Naveh 1978, No. 19). Systematic excavations began at the site in 1977 by Zvi Maoz. During four seasons two areas were unearthed: (A) The synagogue and the adjacent area on the top of the hill; (B) Building 300 on the lowest terrace of the southern slope below the synagogue.
>
> The two amulets were found in two rooms in Building 300. Amulet 2, that of Yaitha, was unearthed in a shallow pit in the north-western corner of Locus 301, together with an iron ring and a bronze ring that lost its inlay. Amulet 3, that of Eleazar, was found in the earth fill in the centre of Locus 308, 1.35 m. above the floor level. It probably had fallen from somewhere above.

According to the stratigraphy provided by Z. Maoz, Building 300 was erected in the early Byzantine period (350–500 C.E.), while the synagogue was erected in the middle Byzantine period (c. 500–551 C.E.). In the late Byzantine period (c. 551–630 C.E.) there took place the restoration of the synagogue and the division of Building 300. It seems likely to us that the two amulets belong to the later part of the occupation of Building 300, i.e. late 6th or early 7th century C.E.

11 Amen Amen Selah. An amulet proper to exorcise
12 the fever and the shiver and the hectic (fever) from
13 Ya'itha the daughter of Marian. In the name of Kariel,
14 Kasiel, Zariel ssssssss; in the name of
15 qqqqqqq; in the name of Michael [ ]
16 ʿEzriel [ ]

Amulet 2 is written on a copper sheet, incised with a pointed instrument. Only the first 18 lines are preserved. The surviving portion measures *c.* 6×6 cm. Fuller commentary on Amulet 2 will be found in Naveh 1983.

1 **qmyʿ ṭb** "a proper amulet". These two words, which are repeated here in line 11, appear also at the beginning of the Aleppo amulet (No. 4), and they occur in the Geniza fragment of a magic book, Geniza 5, p. 1:7 as **qmyʿ ṭwb**.

mʾsyh "to heal", infinitive of the root ʾSY (*paʿʿel*). The lack of the *lamed* (see also **mgʿwr**, line 11) and the initial *mem* in the *paʿʿel* infinitive are characteristic of Galilean Aramaic (Dalman 1905, p. 281).

yʾyth is a feminine personal name meaning "the nice/beautiful (girl)"; cf. **špyrh**, a well known name in the first two centuries C.E., in Amulet 14:1.

2 **mryn** is a quite common Palestinian feminine personal name; see Amulet 9 and Montgomery 1911, p. 273 f. lines 15, 22. **mryn** is a by-form of **mrym**. See Kutscher 1976, pp. 61–62.

ʾšth wʿryth: These nouns seem to be synonymous. Whereas **ʾšth** is well known in all Aramaic dialects as "the fire" or "the fever", **ʿryth** is rare. In Syriac, however, the root ʿRY means *inter alia* "to be seized with illness, to swoon"; in *paʿʿel* "to become numb with cold"; ʿryʾ "cold, frost, chill"; and ʿrwytʾ "the shivering fit of an ague". The latter meaning fits **ʿryth** in our text. **ʾyšth wʿryth** occur in the British Museum incantation bowl No. 91745 (cf. Gordon 1941, p. 341). Cf. also **hʾš whʿryh** in Amulet 4:28–29. In Amulet 9:1 the word **ʾwryth** seems to be a misspelling of **ʿryth** (but see also Commentary *ad loc.*). The sequence ʾ(y)š(ʾ)tʾ and ʿrwytʾ occurs also in the Geniza fragment T-S K 1.95 as

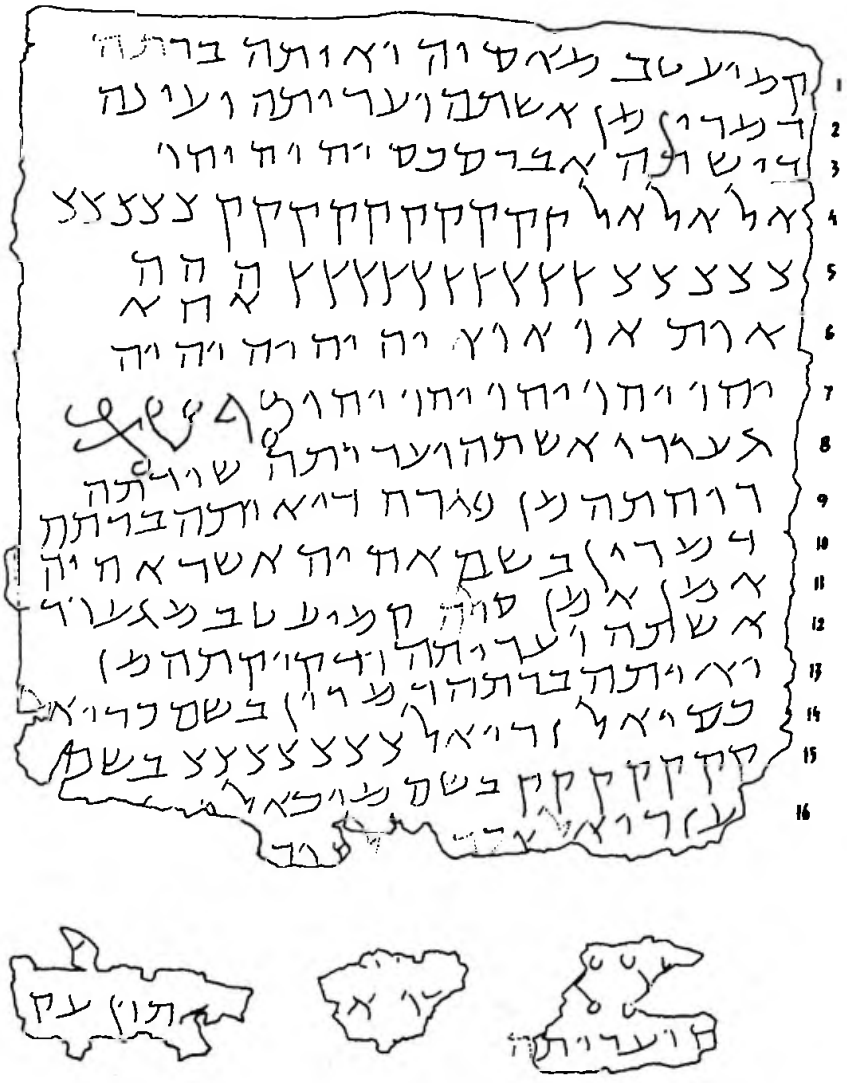

Fig. 2. Amulet 2

well as in Geniza 7:16. The combination **ʾšt ʿrwyt** together with other diseases occurs in a late Syriac magic book, Gollancz 1912, p. 8 f., § 11. The Samaritan Targum of Lev. 26:16 and Deut. 28:22 renders **qdḥt** by **ʿrbyth** (Tal 1980–81).

3 Abrasax is followed by a series of divine names and letters. It seems likely that in a prototype of this incantation these names were followed by a phrase like אתון אתייה קדישייה "You holy letters"; אתון שמהתה קדישייה "You holy names", which appear quite frequently, as in Geniza 6; or אתון כלקטיריה קדישיא "You holy characters", as in Geniza 1. For a similar phrase see Amulets 7:4 and 10:3. The plural imperative verb **gʿwrw** (line 8) implies such an address. For Abrasax see Commentary to Amulet 12:2.

4–5 The letters *qof* and *ṣade* may represent Is. 6:3. On the other hand, *qof*, medial *ṣade* and final *ṣade*, each repeated ten times in succession, may represent the root QṢṢ "to cut, break, fell, scrape, mutilate" (possibly addressed against the evil spirits of disease?).

8 For the verb **GʿR** in the sense of "to drive away, to exorcise" cf. Greenfield 1980, pp. XXXVIII f., as well as Geniza 4:3. Further discussion in Naveh 1983.

10 For the phrase אהיה אשר אהיה cf. e.g. Amulets 3:2–3; 11:1; 12:6, 40; Isbell 1975, Nos. 67:2, 69:3–4 and Geniza 4:5–6; 7:7.

11 **mgʿwr** instead of **lmgʿwr**; see above, Commentary to line 1, **mʾsyh**.

12 **dqyqth** is the rendering of the Samaritan Targum to Deut. 28:22 **ḥrḥr**; the Arabic equivalent given in *Ha-Meliṣ* is **ʾldq** (see Ben-Ḥayyim 1957, p. 473b). Bar-Hebraeus, pp. 13, 28, translates the phrase **ʾštʾ dqyqtʾ** in the Peshiṭta version of Ben Sira 26:26 as Greek ἑκτικός. In the Geniza fragments we have various corruptions of this word: **rqyqtʾ** (Geniza 5, p. 1:1), **zʿqh** (Geniza 6, p. 3:12) and **dnwqh** (Geniza 6, p. 4:2).

Amulet 3

Provenance: Ḥorvat Kanaf
Golan Archaeological Museum, Qasrin, No. 3163
Plate 3; Figure 3

1 שיר חשבחות למלך עלמ[יה]
2 [י]ה יה יחיש עולמים אהיה
3 אשר אהיה מלך ממל<ל> ברוז פרוש
4 אל כל רוח בישה ומבאשה דלה
5 תיחשין לרבי אלעזר ברה דאסתיר

17 בה בשעתה תתרמין לאתון
18 נורא יקדחה ברוך אתה אדוננו
19 הרופא כל הא־רץ שלח רפוי
20 אסו לאלעזר בובריית תבריט
21 [ו]בשתארות מלאכיה דמ[מנין]
22 [ע]ל אשתה ועריתה אסון אל[עזר]
23 [ב]מאמר קדיש

This amulet is written on a copper sheet, incised with a pointed instrument. The sheet measures *c.* 7.5×5 cm. The writing seems to have been preserved almost intact. It was found by Mr. Zvi Maoz in the excavation of Ḥorvat Kanaf. For a description of the Ḥ. Kanaf amulets see Commentary to Amulet 2.

Amulet 3

Translation

1 A song of praise to the King of the Worlds
2 Yah, Yah, Yah, Yaḥish of the Worlds, I-am-
3 who-I-am, the King who speaks with distinct mystery
4 to every bad and evil-doing spirit, that you should not
5 cause pain to Rabbi Eleazar the son of Esther,
6 the servant of the God of Heaven. **ḥzq** and **gʿr**,
7 **šrd** and **prt**, **ṭrgyn**, **ʾstd** and **bqth**,
8 **sislyrhʾ**, **qllqm**, **yqyps**, Suriel,
9 Raphael, Abiel, Anael, Nahariel
10 Nagdiel, Aphaphel and Ananel **ms**
11 **ps yqrndrys** Yahu **krmsys**
12 the great god **ṯḥth gḥgh ṭḥṭh**
13 **mrmr psps** Yahweh, sanctity. In every
14 place where this amulet will be seen,
15 you (the evil spirit) should not detain Eleazar
16 the son of Esther. And if you detain him,
17 you will be cast immediately into a burning
18 fiery furnace (Dan. 3:6). Blessed are you our Lord,
19 the Healer of all (people on) earth, send healing
20 (and) cure to Eleazar. **bwbryt, tbryṭ**,
21 **bštʾrwt**, the angels that are [appointed]
22 over fever and shivering, cure Ele[azar]
23 by a holy command!

1–3 The opening phrase, which consists of a mixture of Hebrew and Aramaic words, is very similar to that which occurs in the magic bowls published by Jeruzalmi 1963 (see Isbell 1975, Nos. 67 and 69) and by Isbell 1976, p. 23, where the correct reading is שיר תשבחות למלך עלמיה יהוה צבאות צור עולמים אהיה אשר אהיה מלך ממליל ברזי (בראזי) פרישתא. This

similarity constitutes a further indication to the existence of contacts between Babylonian and Palestinian Jewish magic formulae.

2 **yḥyš** (or **yḥwš**): Probably connected to the "name" **yḥwš**, which developed from an appeal to speed, so common in magical invocations; cf. Scholem 1980/81, p. 266, notes 84–85. Our Geniza material illustrates the transition from the verb **ʾḥyšh** in Ps. 55:9 to the divine name. The verse is prominently used in Geniza 5, p. 2:6–7; 7:23–25 (where the verse occurs twice, straight and backwards). The divine name occurs in Geniza 8 in the formula **yh ʾhh ḥsyn yh yḥyšh**, repeated several times with slight variations (lines 6f.; 8f.; 10f.; 13f.).

4 **ʾl** is Hebrew, for Aramaic **ʿl**; **dlh** is sometimes written for **dlʾ**, cf. Amulet 9:6.

5 **tyḥšyn** is probably a causative form of ḤWŠ/ḤŠŠ "to feel (pain), to suffer"; the *yod* after the *taw* shows that it cannot be an *afʿel*, but rather a *paʿʿel*, the *yod* standing for a *shwa mobile*. At any rate it is a second person feminine imperfect meaning "you will cause pain".

5–6 The client is called Rabbi Eleazar son of Esther (note the *plene* spelling **ʾstyr**), the servant of the God of Heaven. This is one of the rare examples in which the client of a magic text bears the title Rabbi. Cf. also Harviainen 1981, p. 5:8,9 **rb ywsp br ʾymʾ dʾymh**.

6–10 **ḥzq wgʿr šrd** ... can be a series of verbs: "strengthen and drive out, cause to remain...", but this sequence does not make much sense. Therefore, it may perhaps be assumed that **ḥzq wgʿr šrd** is a sequence of corrupt words based on a formula such as we have in Isbell 1975, 67:3 **byʾl ḥzq wgybwr šlḥ byd** "By God, strong and mighty, send by the hand...", where it is followed by a series of angels: Shlomiel, Michael, Raphael etc. Here we may reconstruct something like **ʾlh šwmyh ḥzq *wgbwr *šdr** "...God of Heaven, strong and mighty, send..." The words **prt ṭrgyn ʾstd**...until **yqyps** may be names of angels (or *nomina barbara*); they are followed by Suriel, Raphael etc.

10–13 **msps** is an Atbash reversal of **yḥwḥ** and **psps** for **wḥwḥ** i.e. Yahweh; Cf. Montgomery 1913, p. 60.

krmsys has been explained by Jeruzalmi 1963, pp. 25,40 as Hermes. The text there says: **[bšmyh] dkrmsys yh šmh rbh mpršh.**

mrmr is reminiscent of Marmaraoth.

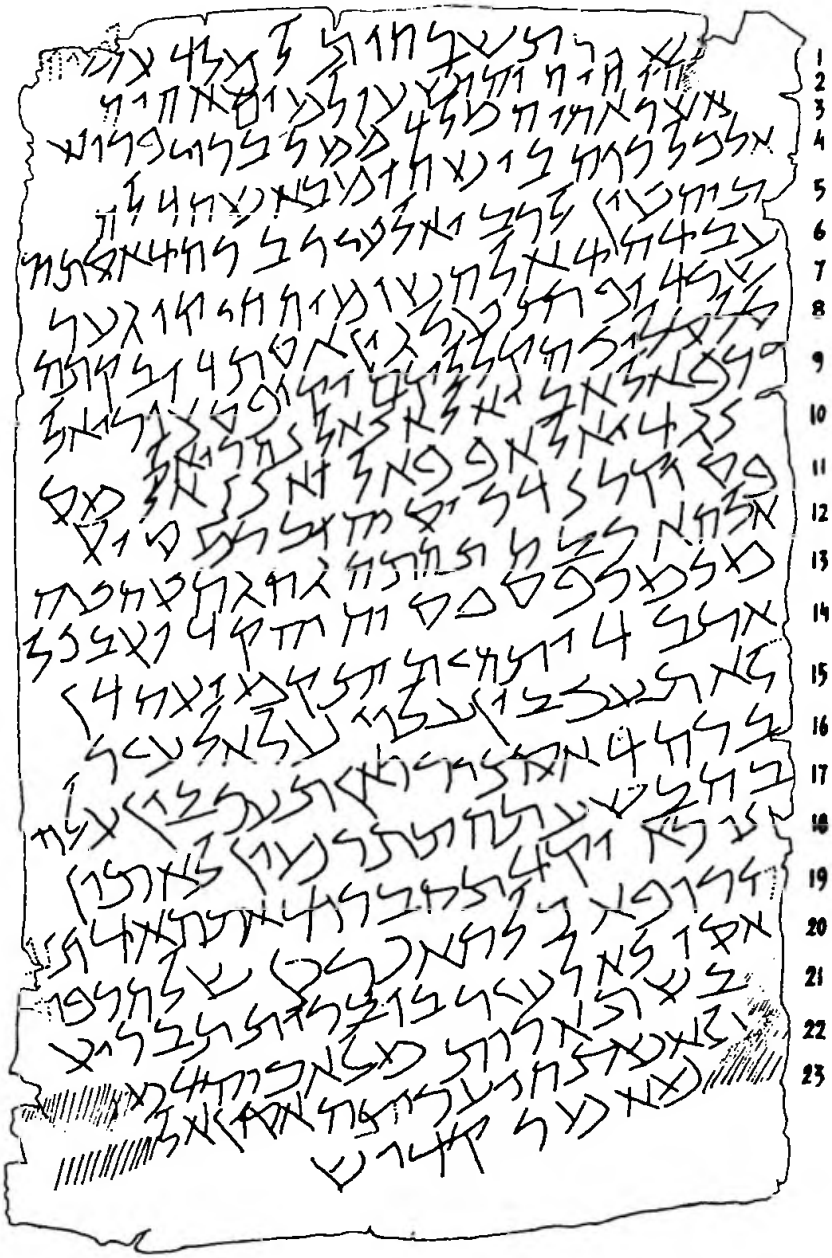

Fig. 3. **Amulet 3**

14–18 For a similar warning phrase see Gaster 1896, pp. I:25–28; III:13–21, and XXV:4–7, where both the word **tʿkb** and the punishment of burning in fire are mentioned. The construction **dyṯhzh yt**, where the accusative particle **yt** occurs after the passive *itpeʿel* form, appears extraordinary, but it is not unknown in Biblical and Mishnaic Hebrew (Ben-David 1971, p. 489; Bar-Asher 1983). One recalls the biblical verses Ex. 34:23; Deut. 16:16 יראה את פני ה׳. In the Targums to Ex. 16:12 the Hebrew...שמעתי את תלונות is rendered...שמיע קדמי ית תרעמת, where the passive construction is followed by the accusative; apparently the accusative **yt** is inserted as an equivalent of the Hebrew ʾt. Kutscher 1969, p. 151, mentions this verse as an instance of the passive construction. A problematic instance is a Targum of Genesis 38:25 **wlʾ ʾštkḥt ythwn** (Klein 1980, p. 61), where Targum Jonathan has **wlʾ ʾškḥt ythwn**. We have taken **dyṯhzh** as **d+yṯhzh**, the relative pronoun **d-** followed by an imperfect 3rd person masc. *itpeʿel*. However, it can also be divided **dy+thzh**, the relative pronoun **dy-** followed by the 2nd person masc. *peʿal*. While this is possible, we must bear in mind that the following verbs, **tʿkbyn** and **ttrmyn**, are both 2nd person feminine singular. The readings **tʿkbwn** and **ttṛmwn** are implausible, since the letters seem to be clear *yod*s.

The expression **ʾtwn nwrʾ yqydth** (following Dan. 3:6) occurs in Borisov 1969, p. 11.

Amulet 4

Hebrew–Aramaic
Provenance: Aleppo
Museum of the Flagellation Convent, Jerusalem
Plate 4; Figure 4

1 קמיע טב כתום פי פתגמא הד[ן]
2 קדישא ברבר<ב>ן ובקדישיא שמו (נכ)[בד]
3 רמיאל מפאר יה עזרי אהיה א
4 אחמה אהיה אחמה יה שדי ח
5 אל (ת)י הוא אתו מאשו (מ)כרעי
6 טלמי ו(כ)מא במנא (כ)ל נדרך ה

19 **hrwpʾ kl hʾrṣ**: This blessing formula is unknown; but it can be compared with רפא חולי כל בשר (in Isbell 1975, 42:12) and רופא חולי עמו ישראל (in the ʿAmida prayer). In Gen. 18:25 we have, somewhat differently, השפט כל הארץ. There is a curved line (possibly the beginning of a *ṣade*) between the *alef* and *resh* in the word הא־רץ.

20 The first word in this line can be read either **ʾsy**, *paʿʿel* imperative, or **ʾsw**, the absolute state of the noun meaning health, healing, cure. The latter may serve as a gloss on the Hebrew word **rpwy**.

21–22 The reconstruction **dmmnyn ʿl** is based on the phrase which occurs in several magic texts; cf. Amulet 12:2; the Geniza fragment T-S K 1.160 ואלן מלאכיה דממנין על לילותא; *Sefer ha-razim* V:13–14 ואלה הם הממונים על שנים עשר חודשי השנה; Gaster 1896, Sword of Moses XX:4 שם סרא דממנא על מלאכי רוגזא.

22 **ʾšth wʿryth**: See above, Amulet 2.

ʾswn = pl. imperative; the final *nun* is typical of Galilean Aramaic, see Dalman 1905, the paradigms on pp. 402 ff. This word seems to be followed by a *lamed* somewhat ligatured with the following *alef*, but it is perhaps only a highly drawn right bar of the *alef*; whether we read with or without *lamed* the meaning is the same.

23 **bmʾmr qdyš**: In Isbell 1975, No. 42:6 we read **bdbr ʾylwh wbmʾmr qwdwš** "by the Word of God and by the holy commandment".

Amulet 4

Translation

1 A proper amulet. Write (?) this phrase,
2 the holy one. His name is venerated through great ones and through the holy ones.
3 Ramiel adorns Yah. My help is I-am,
4 I-see, I-am, I-see. Yah, Shaddai,
5-6 living God. (*An incomprehensible sequence of words; in the following such words are indicated by dots*)

25 marma'ot **yp'** and by the kingdom of *Ablanatanalba
26 ... **qṭb nrqy**.
27 Visions of splendour.
(*three suns and seven stars*)
28 I adjure you, affliction and ...
29 and fever and shiver, whether it is from day to day,
30 or from week to week, or from year
31 to year, or from month to month, — I adjure
32 you, by His right hand and the might of [His holiness].
33 His vigour, **byh yh byh yh by**[**h** Lord of]
34 Hosts, the God of Israel ...
35 ...

Amulet 4

This text was incised on a silver sheet, folded and placed in a bronze tube. It was found in a tomb near Aleppo.

The text was first published by Schwab 1906, and again 1916/17, p. 624. It was reproduced by Frey 1952, No. 819, and discussed in Testa 1962, pp. 52 ff.

The translation is given here with great reservation, as the text is largely obscure. We have examined the original at the Museum, and have had the benefit of a fresh photograph, kindly supplied to us by Father Michele Piccirillo O.F.

1 **ktwm py** seems a better reading than Schwab's **ktwm (htwm) bw. py** may be a dittography on the following **ptgm'. ktwm** may be a corruption of **ktwb.**

2 **brbr<b>n**: Schwab read **brbwn.**

6 **bmn' kl**: Cf. Schwab **kmw 'pl.**

8 This line contains the so-called "monogram of Christ". Deissmann 1927, p. 255 n. 4, remarks that it was in use long before the time of Christ. Testa 1962, p.55, regards it as an evident Christian symbol, following Avi-Yonah 1940, p. 112. See also Budge 1930, p. 347 f.

10 Schwab reads *waws* where the amulet seems to have vertical strokes.

11 **zmrw ldwyd** seems to be written. One might expect **l<y>hwh** as occurs frequently in the Psalms.

12 **pnym** signifies "east", cf. Kimron 1980, p. 41 f.

13 **śm'wl** is written with a *waw* following the *alef*, as in Amulet 1. For **śm'wl** in the sense of "north"cf.Kutscher 1957, p.32, and Kimron 1980.

15 **ṭlnyt**: This species of demons is quite widely attested. In our texts they occur in Amulets 7:6; 11:8; 13:8. For other occurrences in bowl texts see Gordon 1941, p. 279; Borisov 1969, p. 7:4, and the discussion in Scholem 1965, pp. 85, 88. The Targum of Cant. 4:6 has **ṭlny** as a species of demons (reference kindly supplied by Dr. E. Kimron). The same sense occurs in Mandaic **ṭulaniata** (pl.), cf. Drower 1946, p. 332, line 2. The transition from the sense of "shadows" to that of "demons" is illustrated by a passage in the *Schatzhöhle*, where a number of natural

Fig. 4. Amulet 4.
After Testa 1962

elements worshipped are listed: **wmnhwn byd ṭʿywthwn lšmšʾ sgdyn hww wmnhwn lshrʾ wlkẅkbʾ wmnhwn lʾrʿ wlḥyẅtʾ wlpr̈ḥtʾ wlr̈ḥšʾ wlʾẏlnʾ wlk̈pʾ wlṭlnẏtʾ wlmẏ wlr̈wḥʾ** (Bezold 1888, II, p. 130).

16 **ʾmrbn** is probably to be read Em-Rabban.

17–18 While 248 is רמ"ח, the traditional Jewish figure for the number of limbs, 400 followed by **ʿm** is incomprehensible.

20 **mwʿṭ lbnh** may be connected with Heb. **mʿwṭ** "diminution, waning". The juxtaposition *ḥammā-levānā* occurs in Is. 24:23; 30:26; Cant. 6:10. The whole expression is reminiscent of the phrases in the Qiddush Levana prayer.

wkmzlwtyh was not read correctly by Schwab.

24 **ʾlwhy mʿrkwt**: Cf. Geniza 4:2–3.

ʾwgryt, which occurs in Bavli Pesaḥim 111a (see Margaliot 1945, p. 204), is also attested in Amulet 8:6.

Amulet 5

This amulet was found in 1896 in a tomb in Emmaus and was acquired by Herbert Clark for his collection. It is written on a thin silver sheet. It was first published (with a facsimile drawing only) by Vincent 1908; and then again in Frey 1952, No. 1185; cf. also Testa 1962, pp. 64–66. Our

25 We have here the familiar Marmaraot, and afterwards the formula Ablanatanalba (lines 25–26), Scholem 1965, p. 94. Cf. also *Sefer harazim*, p. 8.

26 For **qṭb nrqy** cf. **qṭb mryry** in Deut. 32:24. For the use of the biblical formula in magic, cf. *Midrash Tehillim* (*Shoḥer Ṭov*), ed. S. Buber, Vilna 1891, p. 397 (on Ps. 91:3); *Midrash Rabba*, *Bammidbar*, Jerusalem 1965, fol. 87b (Parasha 12:3).

28 Cf. **mpgʿ mrgʿ mngʿ** in Amulet 1:4.

29 **hʾš whʿryh**: Cf. **ʾštʾ wʿrytʾ** in Amulet 2.

29–31 On the time divisions in this magic usage cf. Commentary to Bowl 6:7–8.

32 Cf. הושיעה לו ימינו וזרוע קדשו (Ps. 98:1).

33 For **yh byh** cf. Commentary to Bowl 6:2.

Amulet 5

Translation

1–2 *(magic characters)*

3 ...Masagiel, Samriel, the God [... You]

4 holy [charac]ters, annul all [the...]

5 [from] his eyes, from his nostril, from his head, from his tendon[s,]

6 [from the eye-]lids. In the name of (*magic figures*)

7 ... and from ... and from her sons...

reading is based on the drawing in Vincent; we have no information about the present whereabouts of the object, and have seen no photograph of it. It does not appear to be in the Clark collection, which is kept at the Y.M.C.A. in Jerusalem.

3 **mšgʾl**: See *Sefer ha-razim*, VI:14 **msgyʾl**. In Greek amulets we have Μυσαγαω[ϑ], Preisendanz 1928, p. 34 (III:56); Μυσαγωϑ, Preisendanz 1930, p. 51 (IX:2). For **šmrʾl** see the late Jewish amulet in Shachar 1971, No. 2.

3–4 The reading is based on Geniza 1:2 and similar texts.

4 **bṭlwn**: A *he* is written above the line; hardly to be read **bṭlhwn**.

5 Vincent followed by Frey read **nwhrh** "son intelligence".

7 Vincent read unconvincingly, **wmn ʾwznwy bṣyh** "et de ses oreilles et de ses testicules".

Translation

1 O Bar-Theon, mighty
2 Lord, the holy one of God!
3 These three are standing in the
4 great ford of the ocean
5 and directing the water and the
6 world in the ford of the
7 world. I adjure you,
8 Greatness, Aqem Zabaoth.
9 Loosen Ṭarpas-dukh
10 the demon. Illuminate your desire,
11 O Bar Theon the God!
12 I invoke (?) you, the Lord
13 Aqem Zabaoth. Loosen Ṭarpas-
14 dukh the demon from the sea (?) and from
15–19 (undecipherable)

Amulet 6

This amulet is inscribed on a silver sheet in Syriac in Estrangelo characters. It was acquired in 1925 in Beirut by Charles Virolleaud. The object was lost in 1926 when it was sent to A. Cowley in Oxford for examination, and the first editor, A. Dupont-Sommer, and all subsequent scholars who have worked on it, have had to rely on photographs only.

The inscription was first published with an extensive commentary by Dupont-Sommer 1946, who sought to understand it as an expression of a gnostic adoration of the letter *waw*. This theory was contested by Gordon 1949, who suggested a new reading of the inscription. Dupont-Sommer 1951 defended his original interpretation, and a further article by Gordon 1953 concludes this debate. See further Del Medico 1949; Testa 1962, pp. 59–64.

One problem in the interpretation of the text is the use of word-dividers. There are two devices used for this purpose in this amulet: a dot and a circle. It should be noted that in the first part of the inscription, viz. lines 1–7, only a dot is regularly used, while the circle is consistently used from line 7 on. After the first word in line 7 the transition from the one system to the other is marked by the fact that a dot followed by a circle are both used to divide **bʿlmʾ** from **mwmmnʾ**. It may be remarked that at this point the introductory invocation is concluded, and the main text of the adjuration begins. It follows from these remarks that the first word in the inscription, after the cross, is probably to be read **wʾw** (as read by Dupont-Sommer), though this does not imply that Dupont-Sommer's interpretation of the word as meaning the letter *waw*, personified or otherwise, is acceptable. **wʾw br tʾwn** corresponds to **ʾw br tʾwn** in line 11 (where **ʾw** follows a clear word-divider in the shape of a circle) and both must be forms of interjection (as seen by Gordon 1953, p. 116). It may be possible to interpret the **wʾw** in line 1 as either a variant form of the vocative particle, otherwise unattested, or, more likely, as the conjunction **w-** followed by the vocative **ʾw**. In the latter case, the initial **w-** begins the text in the same way as does **twb**, e.g. in Bowl 4, and may be translated "again" or similarly.

Resh has a dot over the letter (cf. Dupont-Sommer 1946, pp. 83f.). In **dywʾ** (lines 10,14) the *dalet* has a dot to its right.

1 The cross at the beginning of the inscription may indicate that this is a Christian amulet.

br tʾwn is here written without an internal divider, while in line 11 **br** is

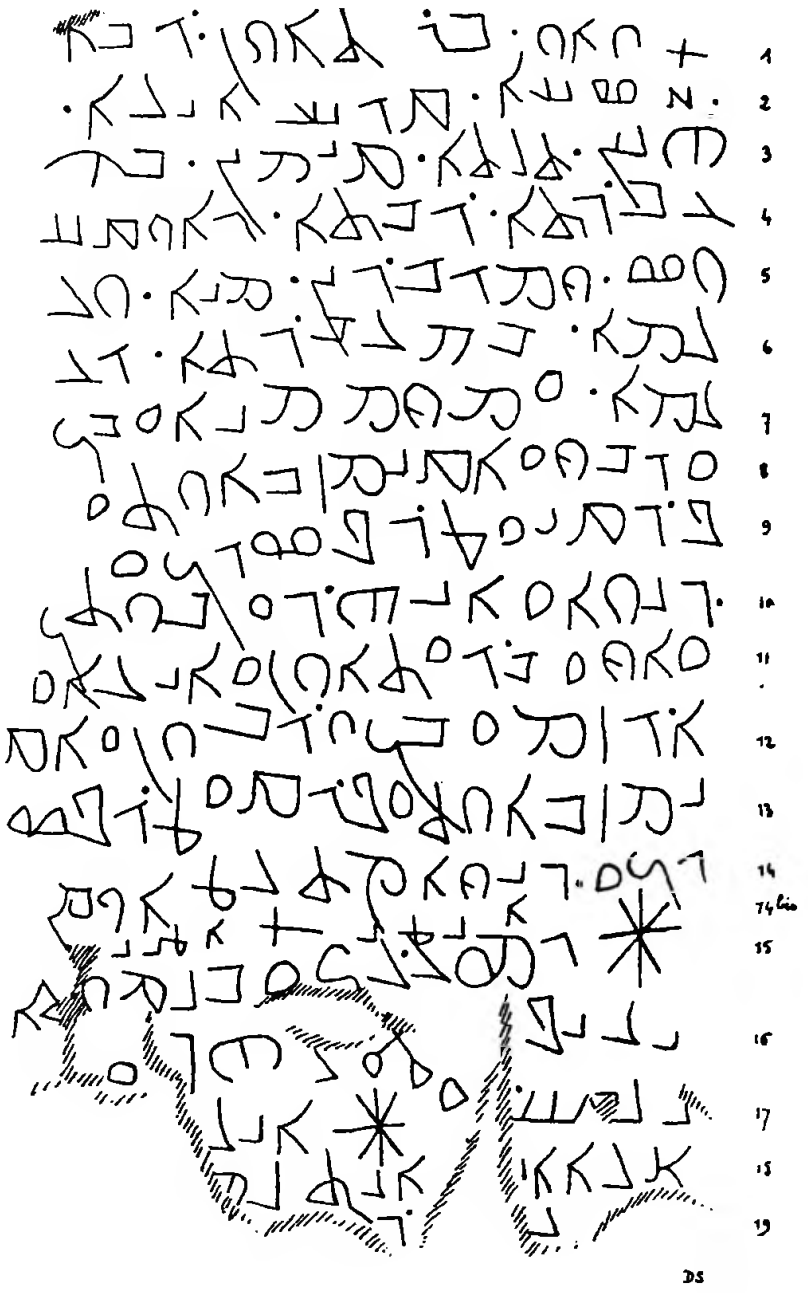

Fig. 6. Amulet 6. From Dupont-Sommer 1946

separated from **t'wn** by a circle. For the name Bar-Theon cf. Βεραδωνάι quoted in Winkler 1930, p. 141 from an amulet published by Froehner, "Sur une amulette basilidienne inédite du Musée Napoléon III", *Bull. de la Société des Antiquaires de Normandie*, 4 (1866), p. 272 (which we have not seen).

1–2 Line 3 speaks of three divine beings, the names of which must be sought in these two lines. That is why we prefer to take **rb' ḥsyn'** as one name, rather than regarding **rb'** as an epithet of Bar-Theon.

rb' ḥsyn': If our interpretation is correct, Rabbā is the name of the deity and **ḥsyn'** is the adjective; see Commentary to Bowl 13:3. and to Amulet 1:8. For **qdyš 'yl'** (written without a divider) cf. **qdšy'l**, *Sefer ha-razim*, II:119; **qwdšy'l** op. cit., IV:15. In line 11 the formula is abbreviated and only **br t'wn 'yl'** is invoked.

3 For three angels in a framework of a magic situation cf. Gordon 1934b, p. 326 (C:4 f.) **tlt'hwn ml'k'... tly bsykth dmyšply dmydly** "three angels... hung on a peg which is lowered and raised". A somewhat similar formula occurs in Gollancz 1912, p. 96, where an incantation begins **hlyn šb' 'ḥyn**. Three mysterious figures also occur as part of the incantation in Amulet 7:16–17 **hmwn tlthyn**...

3–4 Dupont-Sommer, followed by the other scholars, read **bh / gbrt'**. A comparison of the letter which comes after the *bet* with other forms in this inscription shows that it is closer to *mem* than to *he*. The fact that there is no divider either at the end of line 3 or at the beginning of line 4 shows that we have here a single word. The first letter of line 4 is quite clearly an *'ayin*.

5 **mdbryn**: This verb seems to correspond to Hebrew **mnhygym** in *Sefer ha-razim*, IV:9,11,18, which refers to angels directing or ruling over the fourth firmament.

7 **mwmmn'**: Cf. the spelling of this verb in the bowl published by Kaufman 1975, p. 151, where one should probably read **mwmymny** (for **mwmymn'**).

8 **rbw** lacks a dot over the *resh*, hence a reading **dkw** should be considered. However, in line 12 we have **rbwn** clearly written in the same combination. **rbw** and **rbwn** are both nouns derived from the same root as **rb'** in line 1, a fact which may strengthen our interpretation of **rb'** as an independent divine appellation. For **rbw** cf. Gollancz 1898, p. 95:

b'ynn mnk wmtkšpynn lrbwtk "we beg you and implore your greatness".

'qym zb'wt: The first word may be a form of the verb QWM in *af'el*, which recalls the frequent personal names mainly in Palmyrene: **'qmt** (Stark 1971, p. 72), **mqym, mqymw, mqymy, mqymt, mqmw** (Stark 1971, p. 96). What appears to be the same name occurs in Amulet 4:16, **'qmw brth d'mrbn**.

The reading **zb'wt** (see already Gordon 1949, pp. 340f.) is based on the assumption that this form can be a reflection of Hebrew **ṣb'wt**, as Syriac **zdyq** corresponds to Hebrew **ṣdyq**. This goes against the fact that **ṣb'wt** is the usual Syriac spelling of this word; cf. e.g. Macler 1908, p. 20. In Bowl 10:5 **bšwm ṣb'wty ṣb'wty ḥy' wqym'**, we have in the same phrase both **ṣb'wty** and **qym'**, which are reminiscent of **'qym zb'wt**. Arabic magic texts also have **ṣb'wt**; cf. Goldziher 1894, p. 358.

The presumed spelling of a *ṣade* with a *zayin* may gain some force from the Greek form Ζεβυθ which occurs in the formula Ιαβεζεβυθ (the Paris magical papyrus, lines 1798 and 2000, quoted by Blau 1898, p. 134 and footnote 4), if indeed this compound name means **yhwh ṣb'wt**. The phenomenon of Greek *zeta* corresponding to *sigma* in such names may similarly be attested in the two names Σουτιήλ and Ζωτιήλ as suggested by Peterson 1926b, p. 419, No. 114; cf. also there p. 402. J.C. Greenfield would regard the expression **'qym zb'wt** as equivalent to **'lhym ṣb'wt** (Ps. 59:6; 80:5 etc.), but this seems problematic.

However, a different reading of our word is possible: **zk'wt**. This word would be the equivalent of classical Syriac **zkywt'**, which renders Hebrew **ṣdqh**; see Brockelmann 1928, p. 196. This reading may be supported by the divine name Ἰαω Ζούχα which occurs in the Paris magic papyrus, line 1983, cf. Peterson 1926b, p. 402, No. 41. The whole epithet **'qym zk'wt** may then mean "establish justice", or with an initial vocative *alef*, "he who stands (in) justice".

9 **prqy** is a feminine singular imperative, perhaps addressed at **rbw** which is a feminine noun; its emphatic state would be **rbwt'**.

ṭrpsdk: The first element of this word was explained by Dupont-Sommer 1946, p. 21 as Greek τρόπος "façon, manière". Gordon connects it with **ṭrps lyb'** "pericardium" and adduces the meaning "(metal) sheet". It seems to us that **ṭrpsdk** is a Persian form, Tarpas-dukh, with the typical Persian suffix for "daughter". A similar formation is e.g. **zrdwk dyw'** (Gollancz 1912, p. 89, §25). The first part of the compound may be interpreted as **ṭrps** in Judaeo-Persian, which

means "backwards". For a different interpretation of **ṭrps** one may try to connect it with the Greek form θραφιαρι (Preisendanz 1928, p. 94, VI:652; cf. variants in Preisendanz 1941, Register XII, p. 257). A demon **ṭarpis** is attested in Mandaic, see Drower 1943, pp. 2 f.; **dwrps** occurs on a bowl: Jeruzalmi 1963, p. 128: 4 (Isbell 1976, No. 69).

10 **ʾnhr**: The same verb occurs in Myhrman 1909, p. 146 (=Montgomery 1913, p. 151) **wmnṭrnʾ lkwn wmnhrnʾ lkwn wmḥṭymnʾ lkwn.**
bwtk seems to be a defective writing of **bʿwtk.**

11 There seems to us no reason to assume an omission of **rbʾ ḥsynʾ qdyš**, as does Gordon 1949.

12 **ʾrzm bk** corresponds to **mwmmnʾ bk** in line 7 (cf. Gordon 1949, p. 341), thus establishing the meaning of the verb **RZM** (a variant of **RMZ**, cf. Job 15:12 and for Targumic Aramaic cf. Jastrow, p. 1482, s.v. **RMZ**). The verb **RMZ/RZM** has a magic connotation, e.g. in Mandaic **kup raza urimza uraza** "bow thyself, mystery and winking and mystery!" (Drower 1937, p. 596; translation on p. 610). A discussion of words derived from **RMZ** in a magic connotation is in Pognon 1898, pp. 91 f. In Montgomery 1913, No. 19:8 we have the phrase **wbšm srpyʾl mry dynʾ**

Amulet 7

Provenance: Ağabeyli, Turkey
Present location unknown
Plate 6; Figures 7–8

7a

1 vacat שויו רחמין מן שמיה
2 לשלונה בשם מיכאל רפאל
3 עזאל עזריאל אריאל ס(רר)ו
4 רבה אחון מלאכיה קדשיה דקימי[ן]
5 קדם כרסיה דאלה רבה דיתכלון
6 רוחה בישחה וטלגיתה ושידה
7 אן דכר ואן נקבה מן שלונה
8 בר דמיטרין בשם ...

(emended by Epstein 1921, pp. 49 f. to **rwz**ʾ, though doubtful) **wrymz**ʾ, where the last word is obviously a magical technical term.

rbwn: This is evidently a variant of the form **rbw** in line 8, although **rbw** seems to be the absolute form of the feminine abstract "greatness", while **rbwn** appears to be an absolute form of a word meaning "master". On this latter word see Kutscher 1963, pp. 268–271; Ben-Ḥayyim 1967, pp. 37 ff.; Kutscher 1968, pp. 403 f. This may be the reason why the imperative following **rbwn** (in line 13) is in the masculine singular form **prq**, as opposed to **prqy** in line 9 following **rbw**.

14 **tlṭ**ʾ: Del Medico 1949, p. 182, recognized here the Greek word for sea θάλαττα, which makes sense as it corresponds to "ocean" and "water" in lines 4–5.

15 The reading is difficult. It is possible that the star at the beginning of the line is a pictogram representing the noun which should follow **wmn** in line 14. Del Medico 1949, p. 180, in fact translated it as "le Soleil".

dmwlik may be a defective writing for **dnmwlik** "may he crush you". The following word might possibly also be **bnqmt**ʾ "with vengeance".

Amulet 7

Translation

7a

1 Put mercy from heaven
2 on **šlwnh**. In the name of Michael, Raphael,
3 Azzael, Azriel, Ariel, the great
4 dominion (?), you, the holy angels who stand

Amulets 7a and 7b are two silver sheets inscribed in Jewish Aramaic. They were found by peasants in the market village Ağabeyli in the valley of Bertiz not far from Maraş, placed in a cylindrical bronze container. The circumstances of the discovery are described by Anstock-Darga 1950/51. The larger sheet (our Amulet 7a) measures approximately 50×58 mm. Amulet 7b, of which only a fragment is preserved, measures about 43×12 mm. The *editio princeps* was by Dupont-Sommer 1950/51. A new interpretation was offered by Scholem in 1960 (see Scholem 1965, pp. 85 ff.) Further elucidation was given by Levine 1970, pp. 360 f. A comment on a part of the text is in Sperber 1966. We have tried to present in the following a better text, but in view of the fact that the

9 **ššqwpwt wsmrwṭwš ʿqrmkmry**
10 **swsgwn brprwngs ʾstr** and...
11 under **yhwh**. In your name, sacred God,
12 may there be extinguished the evil spirit and the demon
13 and the shadow-spirit and the tormentor and the destroyer. In your name
14 God of Israel, may the words rise up to heaven
15 at the side of the throne of the great, powerful, aweful,
16 sacred, magnified, praised and exalted God. Those
17 three: one who is hungry, but does not eat, one who
18 is thirsty, but does not drink, and one who is drowsy,
19 but does not sleep. I said to the hungry one: Why are you
20 hungry, but you do not eat? (I said) to the thirsty one: Why are you thirsty,
21 but you do not drink? (I said) to the drowsy one: Why are you drowsy, but you do not
22 sleep? The three vanished and said: **dʾn**.

7b

1 For mercy in front of the throne [of the great God.]
2 [May] there be extinguished the tormentor, the destroyer and ...
3 [and] the demon and the shadow-spirit, whether male or female,
4 from **šlwnh** son of Demetrion. In [the name of]
5 ...

photographs reproduced in Dupont-Sommer 1950/51 are not sufficiently legible, we have had to rely largely on Dupont-Sommer's drawings (Fig. 7), which seem to be accurate. [But see *Addendum* at the end of this Commentary, on p. 76.]

1 It is noteworthy that in both amulets there is a space left on the right hand side of the first line. It seems therefore unjustified to assume that something is missing at the beginning of Amulet 7b.

Dupont-Sommer read **šwy wrḥmyn**, which he translated "prix (?) et amour". Scholem suggested an emended reading **šyyl rḥmyn** "begging mercy", which is unlikely as an Aramaic phrase and is contradicted by

Amulet 7b which starts with **lrḥmyn**. Levine suggests that **šwy wrḥmyn** be interpreted "accord and mercy", the first word connected with **šwyt²**, which occurs in Montgomery 1913, No. 16:6. While Levine's interpretation may be correct, it seems at least equally possible and perhaps better to read the first two words **šwyw rḥmyn** from the verb **ŠWY** "to place, put", which was recently discussed in connection with Samaritan Aramaic by Margain 1979. The usage "put mercy" would be analogous to the Hebrew **śym šlwm** in the ʿAmida prayer, rendered into Aramaic **šwy lyšlm²** (Gaster 1928, III, p. 56), with its counterpart in Bowl 1:10 **dmšw² šlm² zk² bdyn²**. A similar expression is in Mandaic **šauia asuta** "one who makes a remedy" (Drower 1946, p. 326). For the form **šwyw** see Gen. Apocryphon 21:26. In 7b the shorter formula, **lrḥmyn**, is used. It is easier to explain **lrḥmyn** as an abbreviation from **šwyw rḥmyn** than from a formula such as **šwy wrḥmyn**. For the whole expression compare **wlrḥmn yśmnk qdm drywhwš mlk²** "and may He give you favour before Darius the king" (Cowley 1923, No. 30:2).

šwy, which corresponds to Hebrew **šwh**, could also mean "at once" (cf. Ben-Ḥayyim 1943, p. 119; Lieberman 1962, p. 135; Kutscher 1961, pp. 124 ff.; Ben-Ḥayyim 1967, p. 69, n. 23), though such an interpretation seems unlikely in the present context. Similarly, it is possible to interpret **šwyw** in the sense of "make haste", cf. Ben-Ḥayyim 1967, p. 69, n. 23, where we have in a Samaritan liturgical poem **nšwy khln wnpṯḥ pwmynn** "let us hasten all of us and open our mouths"; **²šww... m<bd** "they did at once". This construction hardly fits in here, as it seems normally to require another verb or infinitive which is qualified by the verb **šwy**.

2 **lšlwnh**: Dupont-Sommer, followed by Scholem, read **lšlw zh**, which is impossible because: (1) the text is purely Aramaic, (2) the Hebrew phrase suggested is nowhere attested and is quite unlikely in the sense of "he who possesses this (amulet)". The letter *nun* is not sharply distinguished from *zayin* and in this case it merges with the preceding *waw*. The name **šlwnh** may be compared to **šlwn**, Greek Σαλων, a feminine proper name (cf. Sukenik 1930). A name **slwn²**, in Syriac, is rendered by Chabot 1898, p. 303, line 183, "Sylvain"; see also Payne-Smith 1890, p. 2641, s.v. **slw²n²**. A name CHΛONO(C) appears in a tomb-stone inscription from Italy (Frey 1936, p. 433, No. 596). For the correspondence of Aramaic *shin* to Greek *sigma* cf. Krauss 1898, pp. 7 ff. The masculine name **šlwnh** may be a variant of the masculine Jewish name Shallum. On the variation of **m>n** in word-final position cf. Kutscher 1976, pp. 58 ff.

7a

7b

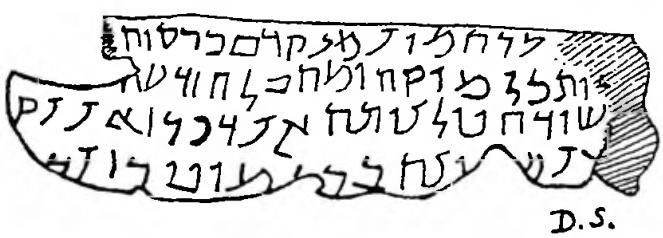

Fig. 7. Amulets 7a and 7b. From Dupont-Sommer 1950/51

Sokoloff 1982, p. 114 quotes an oral remark by Kutscher according to which the name in our amulet should be read as **šlw** (Shallu, an abbreviated form of Shallum). Kutscher accepted the reading **zh**, which follows the name as a demonstrative pronoun. It seems to us unlikely that the Hebrew demonstrative would be used in this Aramaic text.

4 **ʾtwn mlʾkyh qdšyh**: Here again the combination of *waw* and *nun* misled previous scholars. Dupont-Sommer read **ʾtt mlʾky hqdš wḥd**, which mixes Aramaic with Hebrew and makes an impossible sentence. For the phrase **ʾtwn mlʾkyh qdšyh** cf. Amulet 10:3 and the Commentary to Amulet 2:3.

dqymyn: Cf. Amulet 6:3, where the same word is used for angels.

5 **qdm krsyh dʾlh rbh**: We assume that **qdm krsyh** stands in contrast to **bsṭr krsyh** in line 15. A similar contrast is found in Stübe 1895, p. 26, lines 56 ff.; Lacau 1896, p. 50: ובשום גבריאל ומיכאל ורפאל ובשמיה דעניאל דקאים אחורי גלגלי שמשא ובשום דוקיאל ופרקיאל ודרקיאל וערכיאל דימשמשין קדם כורסיה דיקרא דאלהא

6 For **ṭlnyth** see Amulet 4:15.

7–8 **mn šlwnh br dmyṭryn:** Dupont-Sommer read in line 8 **brk myṭryn** "bénis une matrice". Scholem translated this "blessed be Meta[t?]ron". See also Niggemeyer 1975, p. 146, n. 28. The reading given here, which presents the full name of the owner of this amulet, is quite well established. The Greek name Δημήτριος, which seems to underlie here the parent's name, is generally attested for men, although we normally would expect the mother's name to be mentioned in an amulet. As a Jewish name, Demetrius is found in inscriptions; see Frey 1936, No. 682 and Lifshitz in Frey 1975, Prolegomenon, p. 85, No. 715 i.

9–10 For these magical names see Scholem 1965, pp. 89, 94 ff.

11 Dupont-Sommer read **bšm dʾlh**, while it is preferable to read as given here. It will be noticed that final *kaf* is not always carefully distinguished from *dalet*.

14 **slqh** is the correct form of the third person plural feminine perfect in Jewish Palestinian Aramaic. See Dalman 1905, paradigm on p. 402 (**slyqʾ**).

15 **bsṭr** has been explained as "at the side of". However, it is possible to take it as an equivalent of Syriac **bstr** "backwards, behind" (which

may be of Persian origin). "Behind the throne" would then be the perfect counterpart of μετὰ θρόνον. **bstr** stands in contrast to **qdm** in line 5.

A recent discussion of the etymology of Metatron by S. Lieberman is contained in Gruenwald 1980, pp. 235 ff. Lieberman argues that μετάθρονος, though unattested in Greek sources, is the equivalent of σύνθρονος and was preferred by Jews for the name of the angel. An earlier detailed discussion of the term is in Odeberg 1928, pp. 137 ff.

rbh ḥsynh wdḥylh: We have here the same sequence as in Amulet 1:8 (see Commentary there). A similar sequence **rbʾ ḥsynʾ qdyš ʾylʾ** occurs in Amulet 6:1–2.

16 This sequence of adjectives is reminiscent of the series of verbs in the Qaddish prayer, as noted by Scholem 1965, p. 90. See also T–S AS 143.143 ... מלך מפואר מרומם מלא כל הארץ כבודו נורא תהלות נשגב נפלא

hmwn: The form is not mentioned in the grammars of Palestinian Aramaic and Syriac (e.g. Dalman 1905, Kutscher 1976, Schulthess 1924), but it is attested in Biblical Aramaic for the masculine and once (Dan. 2:34) for the feminine.

16–22 For the theme of three mysterious figures we have numerous analogies in magic texts. We may refer, e.g. to Gollancz 1898, pp. 92 f., where three evil forms, a man, a wolf and lion, meet Moses when he tends his sheep.

A very close analogy to our story is found in the Iraq Museum bowl, No. 9731 (published in Gordon 1941, p. 349, and Gordon 1978, pp. 236 f.) and in a bowl in the Zion Research Library in Boston, No. 48 (published in Gordon 1978, pp. 233 f.). A recently published parallel version is in Scholem 1980/81, pp. 263 f. In these Jewish texts we have the story of the sorcerer (who speaks in the first person) going up to the roof at night and talking to some mysterious figures addressed as **ḥršyn byšyn wrʾzyn ʾpwkyn** "evil magicians and overturned mysteries". He says to them "If you are hungry, come eat! If you are thirsty, come drink! If you are dried up, come be oiled! But if you are not hungry, or thirsty, or dried up, go back the way you came, enter the house from which you went out, and the mouth from which you went out". The first to notice this parallel was Levine 1970, pp. 360 f., who suggested as an interpretation the observation "that providing hospitality for demons was a duty that could not be overlooked. Like many hosts the exorcist is saying, in fact, that unless there is more coming to the demons

by the way of official hospitality, they had better be on their way". Gordon 1957, pp. 171 f. (followed by Niggemeyer 1975, pp. 70 f.) also speaks of hospitality offered to demons. Our context, however, brings to mind that we have to do with a somewhat different situation. The demons come to the house probably masked as human beings, but they do not partake of food and drink as human guests normally do. They can be unmasked by putting to them the embarrassing question: why do you not eat, drink or sleep; when they are found out they must depart. There are Jewish discussions of the problem whether demons can eat and drink; according to Bavli Ḥagiga 16a they can. On this question see Shaked (forthcoming).

22 **gyzw**: Dupont-Sommer read **ḥzy** which does not conform to the signs visible. The form **gyzw** is difficult. We might have expected **gyzn**, the feminine plural of the active participle "they vanish", or **gzn**, the third person fem. plural perfect.

tltyhn is an error for **tlthyn**; see line 17.

ʾmrn: Active participle (or perfect?) plural feminine.

dʾn may be connected to the magic word mentioned in Tosefta Shabbat 7:3 and Bavli Shabbat 67b: **dny dny**, which is explained by Lieberman 1957/58, p. 188 as Greek δέννω, δέννω or δένο, δένο "I bind, I bind". **dʾn** could also be interpreted as **d-+ʾn** "(they say): yes!".

[*Addendum*: When the book was already set in the press we received from Mme. Hélène Lozachmeur the original photographs of the two amulets (7a and 7b) which the late Prof. Dupont-Sommer had used. On the basis of enlargements made from these photographs (Pl. 6), Mrs. A. Yardeni has made a fresh drawing (Fig. 8). A study of both the enlargements and the drawing brings out the following new readings:
Line 1 of 7b. Read at the beginning בעון רחמין "ask mercy".
Line 15. Read בסטר כרסיה דאלה רבה תקיפה ודחילה.
Line 22. For גיזו read ענו, which makes better sense and removes most of the difficulties. The translation is: "The three answered and said: **dʾn**".]

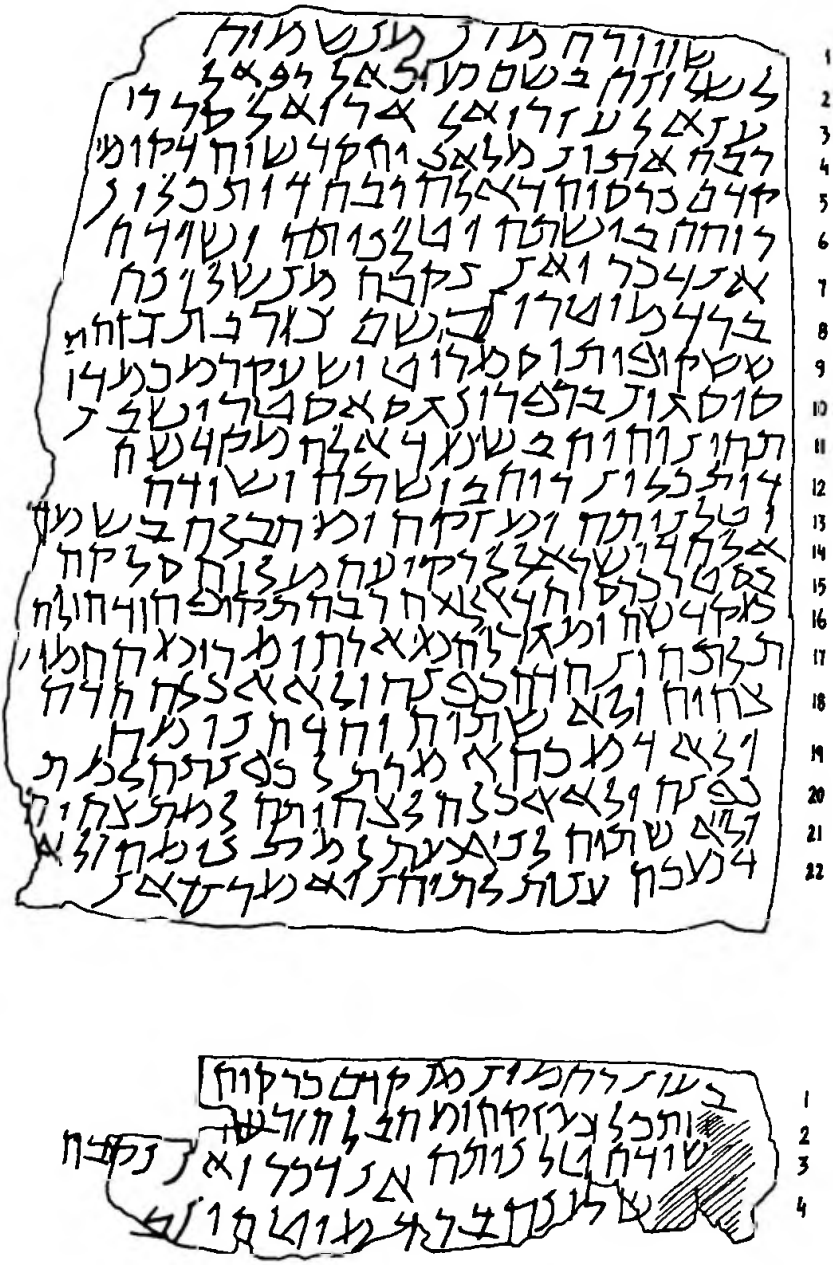

Fig. 8. Amulets 7a and 7b.

Amulet 8

Provenance: Teqoaʿ (?)
Museum of the Flagellation Convent, Jerusalem
Plate 7; Figures 9–10

1 לשם מרת(י)ן
2 ברתה דקוראל
3 משבע אנה
4 על מרת(י)ן ברתה
5 דקורלא בשם
6 אגירת מרתי פ
7 ללא ויכ(ך)
(magic characters)
8 (מ)חרב אנ<ה>
9 (סטרסוק שאפתי)
10 (נקימנס וסקאי)
11 (חטרב) אי(ת)ה
12 ניחה שלום

This amulet, written on a silver sheet, was bought in the antiquities market. According to the dealer who sold it, it was found at Teqoaʿ south of Bethlehem. It is now kept in the Museum of the Franciscan Convent of the Flagellation in Jerusalem. It measures 60×24 mm. The first publication of the text by Testa 1967 suggested that it refers to an unction of sick people. Milik 1967 recognized that the text is an amulet, and gave an emended reading and interpretation of it, which we regard as largely correct. Testa 1968 defended his original reading and attacked Milik's interpretation. The reading offered below is based on an examination of the original, aided by a new photograph, for which we should like to extend our thanks to Father Michele Piccirillo, O.P.M.

1 **lšm mrtyn.** The amulet is addressed at the name of the demon Marten ("our lady"?) daughter of Qoriel. For Marten one may compare Μαρθήνη Αστερία in Mouterde 1930, p. 124, line 15, where it occurs as a feminine proper name. The title Marten occurs also in Montgomery

Amulet 8

Translation

1 To the name of Marten
2 daughter of Qoriel
3 I adjure
4 against Marten daughter of
5 Qoriel. In the name of
6 Agirat, my lady,
7 **pll'**...
(*magic characters*)
8 I destroy
9 ...
10 ...
11 ...bring (?)
12 rest. Peace

1913, No. 19:5–6 **wbšmyk mrtyn 'ybwlyt mlkt' rbt' d'ystr't'**. The name is known from the triad of deities in Hatra (Marēn, Martēn and Bar-Marēn), for which cf. Drijvers 1980, pp. 176–179. Palaeographically Milik's reading, **mrtwn = mrt(h)wn** "their lady", is also possible. It seems, however, preferable to connect this word with a well-established divine name.

2 Qoriel is well-known as a name of an angel. It occurs in the Geniza fragment JTS ENA 1177, fol. 16:13 **qry'l**. In the unpublished Aramaic bowl Metropolitan Museum, New York, L. 66.6, line 8, we have **bšwm qwry'l glgly'**. In Greek there occur the forms Κουριήλ in Preisendanz 1928, IV:86; Καρα(α)ήλ, Καριήλ, cf. Peterson 1926b, p. 405, No. 59.

6–7 For **'gyrt** see above Amulet 4:24. Each of the names **'gyrt, mrty, pll'** and **ybk** seems to have a counterpart in the list of angels in *Sefer ha-razim* 4:13–16... **m'ryt**... **y'bwk**... **'gryt'l**... **pl'w'l**. If this correspondence is correct, **pll'** (for ***pl'l**) displays the same transposition of

Amulet 8

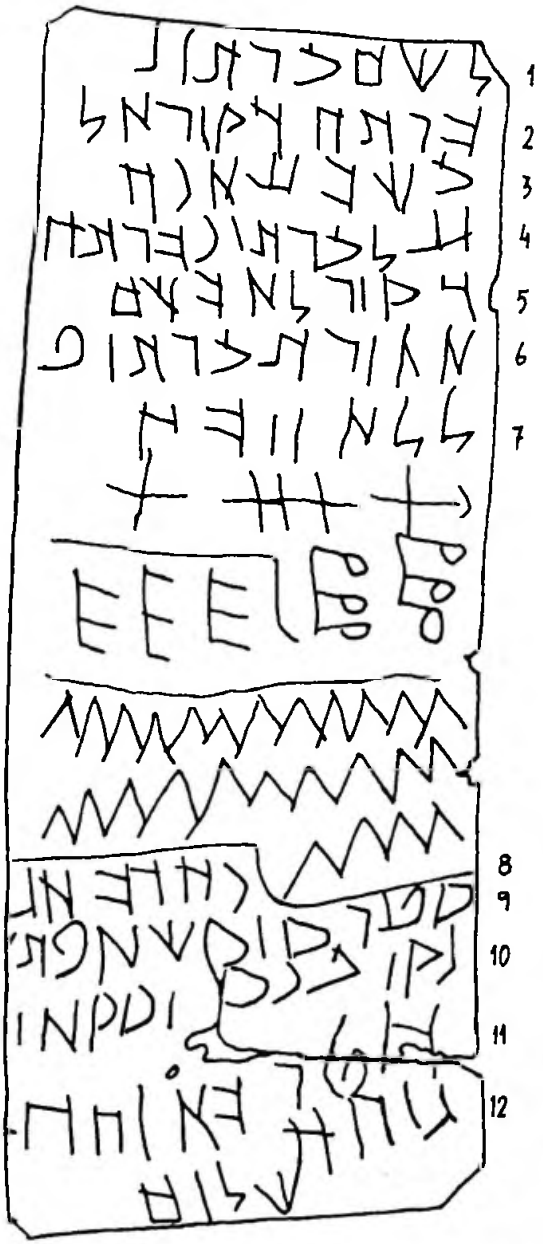

Fig. 9. Amulet 8

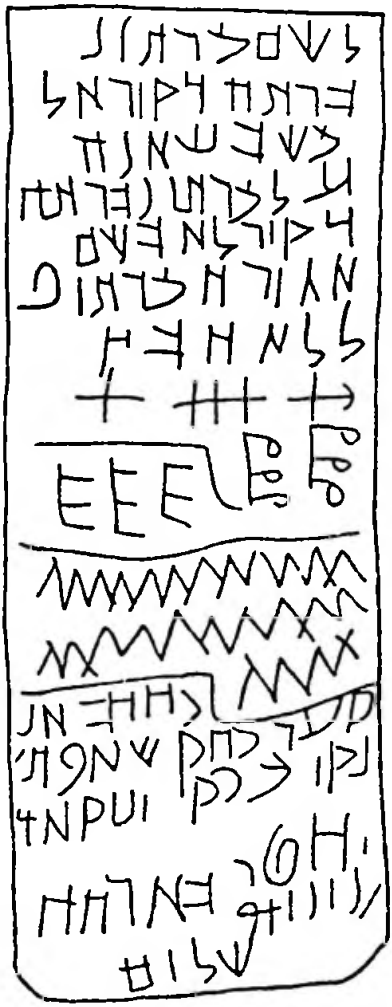

Fig. 10. Amulet 8.
From Milik 1967

letters as we have in **qwrl**ʾ for **qwrʾl**. For **mrty**=**mʾryt** cf. Peterson 1926, pp. 40 f., No. 75 Μοριάθ, etc. **mrty** may be at the base of the name **mrtyn**.

8 Our transcription follows that of Milik, though the traces do not give an unequivocal reading.

11–12 ʾ**yth** is doubtful, whereas **nyḥh** is quite safely established.

12 **šlwm** as a concluding formula, although it is frequent in epitaphs and dedicatory inscriptions, is quite unknown in amulets.

Amulet 9

Provenance: Oxyrrhynchus (?)
University of Cologne, Institut für Altertumskunde,

8 ק[ד]מוי וטוריה וגלמחה מזד(ע)[זעין]

This amulet, inscribed on a lead sheet and measuring 93×46 mm., is now in Cologne, Germany (T. Colon, Inv. No. 6). It was presumably found in the cemetery of Oxyrrhynchus, Egypt, from which the rest of the collection of Greek amulets in Cologne derives. The original text seems to have consisted of no more than the eight lines that are preserved. It was first published by Klein-Franke 1971 and was subsequently discussed by Greenfield 1979, pp. XXXVIII f. Our readings are in several points different from the *editio princeps*.

1–2 **ʿlyk**: This word was read **lyk** by Greenfield 1979, but Klein-Franke is certainly right in seeing an *ʿayin* at the beginning of the line. Although an invocation beginning with **ʿlyk** is not elsewhere attested, it seems clear that this is the actual beginning of the text. For a similar beginning compare Amulet 8:1 **lšm mrtyn**...The construction is elliptical, and one has to assume an implied **mšbʿ ʾnh**, as in line 4. According to Greenfield **lyk** is the direct object of **ʾgʿr**, which he understood as the first person singular imperfect of *peʿal*. However, it seems preferable to explain **ʾgʿr** as imperative singular masculine *itpeʿel* from **GʿR**, to be read as *iggĕʿar* (<**itgĕʿar*). The root **GʿR** occurs very

Amulet 9

Translation

1 Against you, the spirit which is called fever (and) shivering:
2 Be exorcised from the body of Marian the daughter of Esther,
3 from the two hundred and forty eight limbs
4 which are in her. I adjure you, be exorcised from her, in the name
5 of He who lives and exists, of He who suspended the sky
6 without chains, and set up the earth without
7 pillars, and the sea and the wilderness are terrified (?) from
8 His presence, and the mountains and the hills tre[mble].

often in the *itpeʿel* form; see the examples adduced in Greenfield 1979. For the assimilation of the *taw* to the *gimmel* cf. Dalman 1905, pp. 103 and 252 f. It is noteworthy that the form of the verb **ʾgʿr** is masculine, although **rwḥh** is described by the feminine participle **dmtqryh**. **rwḥʾ** of course can be either masc. or fem., cf. Geniza 4:3, **rwḥyn byšyn**, as against **rwḥʾ bʾyštʾ** in the Gen. Apocryphon (see Greenfield *loc. cit.*). For **GʿR** cf. Amulet 2:8.

ʾšth ʾwryth: The meaning of these two words is established by Amulet 2:2 (see Commentary there). Geniza 6, p. 4:2 displays another corruption of the formula. The spelling with *alef* for *ʿayin* is caused by the loss of the gutturals; cf. Kutscher 1976, pp. 67 ff. The peculiar spelling **ʾwryt**ʾ occurs possibly also in Hyvernat 1885, p. 116: ובעיזקתיה דמיכאיל גברא מלכא עיסרא דאוריתא ... ובעיזקתיה דגבריאיל גברא מלכא עיסרא דנורא ... The parallel **ʾwryt**ʾ//**nwr**ʾ recalls our **ʾšth ʾwryth**. It has been noted (Grünbaum 1885, p. 223; cf. also Margaliot 1945, p. 118) that Michael represents water and hail, while Gabriel is fire. Montgomery 1913, 24:2 should be read **dtytsy brḥmy šmyʾ mn ʾšytʾ wmn ʾrytʾ**, which gives us a third instance of the spelling with *alef*. Since Biblical Hebrew has **ʾwr** in the sense of "flame", one wonders whether the spellings

ʾwryth, ʾwryt, ʾryt do not represent a contamination of two words of different origin, the root **ʿRY** and the word *ʾūr* (?).

mryn: See above, Commentary to Amulet 2:2.

dstr: The reading seems certain. The initial *alef* of **ʾstr** was elided. The same name, spelled *plene* (**ʾstyr**), occurs in Amulet 3:5, 16.

3 **mtyn**: Here too the *alef* was omitted.

5 **dḥyh wqymh**: Cf. Bowl 10:5.

5–6 דחלה שומיה דלה בשלשלן ואקים ארעה דלה [על] עמודין: References to the earth and the firmament, which are said to be either supported or unsupported by pillars and chains, are frequent in magical and early mystical Jewish literature. Lieberman 1962, pp. 80 f. quotes from *Shir ha-shirim Rabba* 7:8 דברייתא משתבעין ואמרין במאן דאקים ארעא על תלתא עמודים. Niggemeyer 1975, p. 153, n. 32 quotes various sources, where the world is said to rely on the arm of the Lord. Wertheimer 1980, I, p. 28 ירושלים וביח המקדש עומדים p. 41; וכל העולם כולו עומד על עמוד אחד וחלויים בשלשלאות של אש בין שחקים לזבול (in *Seder Rabba di-Breshit*).

Arabic invocations have references to the same theme; cf. e.g. "und bei 'Allah, der die Himmel erhöht hat ohne Säulen' (Sura 13:2) und ohne ein Band" (Winkler 1930, p. 60, translation on p. 64; and a similar phrase in Winkler 1931, p. 9).

The idea is attested also in Zoroastrian Pahlavi: "I am thankful to the good, bounteous, beneficent and merciful Creator, who, when he created Asmān (the sky), which is well-formed, bright, of wondrous substance, wondrously adorned, fully ornamented, fashioned by the spirits, which stands in *mēnōg* without pillars (*a-stun*) and without being held from above (*an-abar-dāštār*)..." (*Zand-i khūrtak avistāk*, p. 256:5–10).

Amulet 10

Provenance: Ḥorvat Rimmon
Israel Department of Antiquities, No. 80.880
Plate 9; Figure 12

For the spelling **šwmyh** cf. the inscription in the Engedi synagogue (Naveh 1978, No. 70:15) and cf. **šwmy'** (op. cit., No. 20:5).

7 **wymh wmdbrh t(mhy)n**: The reading of the verb is uncertain. The root **TMH** is used in Biblical Hebrew, *inter alia*, for the terror and trembling of the earth or the pillars of heaven in the presence of God. In Job 26:11 עמודי שמים ירופפו ויתמהו מגערתו is rendered in the Jewish Targum עמודין דשמיא מזדעזעין ורחתין מן מזופיתיה. The Peshitta has עמודי שמיא רעלין ונחמהון מן כאחה. Syriac **TMH** is used to render Hebrew **HRD** "fear, tremble" in Gen. 42:28, where the Jewish Targums have **TWH** instead.

8 **glmt'**: The word seems to be typically Palestinian. It is attested in the Palestinian Targum, where it renders **gb'h** and **'mq**. It also occurs in Palestinian Syriac.

6 [Mar]ian after me, I ..[...and you should turn]
7 [his/her heart and mi]nd and kidney, so [that he/she will do]
8 my desire in this [ ]
9 (*magic characters*)

This amulet is inscribed on a potsherd. It was found in the excavations at Ḥorvat Rimmon (Kh. Umm er-Ramamin, Map Ref. 13721/08677), *c.* 1/2 km. south of Kibbutz Lahav and *c.* 13 km. north of Beer-Sheba, by Dr. Amos Kloner of the Israel Department of Antiquities, who kindly entrusted us with its publication. Dr. Kloner also communicated the following details about the archaeological context of the amulet:

> The potsherds under discussion were found in Locus 148, in the Ḥorvat Rimmon excavations in 1980 (cf. Kloner 1980, 1981). Locus 148 is in the north-eastern corner of the enclosure, which contains the synagogue and its adjoining area; this enclosure was created in the fifth century C.E. by the erection of a surrounding wall. The area of Locus 148 was excavated through a filling of debris down to the bed rock. Two different strata were distinguished within the debris: the upper stratum, 80 cm. in thickness, contained numerous fragments of jars, cooking pots and lids, oil-lamps, roof-tiles, glass objects, iron nails and animal bones, as well as an axe-like iron instrument and fragments of a chancel screen and a chancel post. All of these finds date back to the Byzantine period. The lower stratum (20 cm. in thickness) contained potsherds from the Second Temple period and later (1st century B.C.E. — 2nd century C.E.). The five fragments of the amulet (registered as 858/572; 858/559/1–2) were found scattered in different places in the upper stratum of the fill. It seems that the upper stratum of the debris accumulated at the end of the Byzantine period. The amulet under consideration is thus to be dated to the fifth-sixth centuries C.E.

Amulet 10

The amulet consists of five broken pieces, four of which can be attached to each other, forming line 1 and parts of lines 2–8. The fifth piece contains parts of the last two lines (lines 8–9), but it cannot be properly joined to the other fragments, as there seems to be a tiny piece missing. As a result we do not have a consecutive text of line 8. Mrs. Ada Yardeni, who suggested how the fifth fragment should be joined to the amulet, based her idea on an observation of the pattern of the thickness and of the wheelmarks.

In contrast to other potsherds, this is not an accidental fragment of a broken pot. It seems that the potter deliberately cut deep incisions on the surface of the jar before firing it, and that he broke the jar along the same incisions. Marks of the incisions are visible along the edges of the fragments, where about half the thickness of the clay is smooth and the rest is rough. The writing must have been executed when the clay was still soft, before it was baked.

This observation brings to mind the injunction which occurs in several magic recipe books, especially in connection with love charms, to use "a new sherd". Cf. e.g. the *Sword of Moses*, Gaster 1896, p. XV:17–18, where we read לגברא דייתי בתרך סב חספא חדתא וצבע במורא אוכם ואמר על שמיה מין אחומי עד פנכיר ואיזיל ולא תצפי לאחורך "If a man is to follow thee, take a new potsherd and dip it in black myrrh and pronounce over his name the words from **ʾtwmy** until **pnkyr** and walk without looking backwards" (Gaster 1896, p. 184; "black myrrh" is Greek *zmurnomelan*, cf. Margaliot in *Sefer ha-razim*, p. 2). The idea of a new piece of clay on which the charm is written occurs as a fixed formula in Mandaic incantation bowls, e.g. **ʿl glala dlbzʿia ʿtib wʿktubinin ʿl kasa hdta ḏphara uʿšadrinin lluṭata ḏlaṭu**... "on the rock that is not split I will sit and I will write them on a new bowl of clay and I will send the curses (back) to those who cursed..." (Yamauchi 1967, No. 18c:5–8; see also Nos. 7:24–26; 12:34–39; 19:16–18; 26:20–22). In the Mandaic instances the texts are not love charms. Similar injunctions occur with regard to using "a new piece of cloth" **kyrqh gdydh** (in Geniza 6, p. 1:15). An example for such an amulet on a piece of cloth exists in Geniza 1, another love charm.

In some Geniza fragments of magic books we have a more specific instruction, which relates to love or hate charms. The expression used is not "a new sherd", but **šqph nyh** (Geniza 5, p. 3:12), **pkr ny** (Geniza 6, p. 1:3, 4:4), or **kzph nyh** (Geniza 2, p. 2:). These expressions signify "an unbaked piece of pottery"; the Arabic *nayy* (like Hebrew *nāʾ*) means

"uncooked". For a charm against an enemy we have in Gaster 1896, p. XXII:29:30 the following instruction: "to break an enemy write the Sword (=amulet) upon a potsherd that has not yet been burned (**šlʾ nkns lʾwr**)..." (op. cit., p. 193). In a Geniza fragment, T-S K 1.153, p.1:11, we have: לאהבה סב חסף לא צלי וכתוב עלוי ... וכד את מטלק חספה בנורה אמור היך דאלין כתביה מתיקדין כן יתיקד לביה דפלנית ברת פלנית בחר פּבּפּ. Our amulet was apparently prepared according to such an instruction.

The amulet bears marks of black areas which were perhaps caused by exposure to fire. It was perhaps thrown into the fire as part of the sympathetic magic rite alluded to in the text: "Just as this sherd burns, so shall burn the heart of...". This is a frequent formula which occurs in love charms, such as our own amulet. On this point see further below, Commentary to lines 4–5.

1–2 These lines contain the names of six angels surrounded by a frame. **qwlhwn** and **sptwn** remind one of **qlhwn** and **swptyn** in T-S K 1.160, whereas for **swsgr** see **ssgn**, **ssngnys** in *Sword of Moses*, Gaster 1896,IX:21,**swsgwn** in Amulet 7:10. See further Scholem 1965, pp.94 ff.

3 **ʾtwn mlʾkyh qdyšyh**: See Amulet 7:4 and Commentary to Amulet 2:3.

4–5 The reconstruction is based on the Geniza fragments Nos. 2, 5–6, which are pages from magic books, as well as on the Geniza amulets Nos. 1 and 3, which are love charms. In all these texts the angels are invoked and asked to cause the heart of a certain person to burn in love for the client just as this potsherd burns in the fire. The words **yqwd lbh dr[** "the heart of R... should burn" are sufficient for the suggested reconstruction. Moreover, the word **kwlyth** "his/her kidney" (line 7) has also been preserved, and this word occurs in Geniza 6, p. 1:13–14 **lbh whwnh wkwlyth dp** "the heart, the mind (?) and the kidney of X".

6 It is possible to read **btr dʾnh** "after that I", but in this case the reconstruction suggested here is difficult. **btr dʾnh** would hardly be "after Dana", as we would expect a name to be followed by **br** or **brt** and the name of the parent (usually mother).

8 For the phrase **yʿbd/tʿbd ṣbywny** cf. Geniza 6, p. 1:2; Gaster 1896, p. VIII:5. If this reading is correct, **bhd[h]** might mean "in this matter". Alternatively, it is possible to supplement **[ytʿbd] ṣbywny bhd[yn]/bhd[h]** [personal name] "May my desire be accomplished with regard to this [person]".

Amulets 11–13 were discovered among the "small finds" in the apse of the ancient synagogue excavated in 1957–58 near kibbutz Nirim in the North Western Negev (see S. Levy and others 1960). This site has been identified as that of ancient Ma'on (Menois; cf. S. Levy 1960, p. 6). The group of 19 bronze amulets were deposited in the store-rooms of the Israel Department of Antiquities, where for many years they lay unopened. The three amulets given here have now been unrolled with relatively little damage in the chemical laboratories of the Israel Museum, thanks to the efforts and expertise of Dodo Shenhav and David Bigelajzen.

The synagogue is remarkable for its beautiful mosaic, covering the whole width of its nave (on which cf. Avi-Yonah in S. Levy and others 1960, pp. 25 ff.), in which an Aramaic inscription is inlaid, probably executed by a craftsman ignorant of the Hebrew alphabet (cf. S. Yeivin in S. Levy and others 1960, pp. 36 ff., and Naveh 1978, No. 57).

As for the dating of the amulets, since they were found in the apse of the synagogue, they are likely to belong to a late period in its use.

Amulet 11

Translation

1 ...I-am-who-I-am. In the name of... **š(n)rwn, ʾrskyʾl...**
2 ...] el, **mš(n)ydh, šmgrwn, sksk, dwqwn, dwqwn** and ...

9 ...Na]trun, daughter of Sarah. In the name of **ʾwh, hlwsʾ**, El, Bael...
10 ...remove from the bones (?) of her chest and from her head...
11 ...

Rahmani 1960, p. 18, summarizes his discussion in the following words:

> These finds show that the synagogue was built in an area settled in the fourth century; also that the floor, and probably the whole building as well, were not later than 538. This suggests an early date of construction in the reign of Justin I, or Justinian I, at any rate before A.D. 538. It is probable that the synagogue was still in use about A.D. 582.

S. Levy (in S. Levy and others 1960, p. 11) concludes from the ceramic finds that the synagogue was used in "the sixth century A.D. with a possible continuation into the early seventh century A.D."

As mentioned by Rahmani 1960, p. 15, the amulets were "rolled tightly into a little scroll", and "on some of the amulets fragments of an outer wrapping of some woven material can still be seen; one still has the remains of the thread by which it was suspended, tied round one end. This shows that it was worn on the body, most probably around the neck". Alternatively it may be supposed that some of the amulets were suspended from the wall near or behind the Ark of the Law, or even

from the Ark itself (see the description of the place of the find in S. Levy 1960, p. 7). See above, p. 16.

The maximum dimensions of Amulet 11 are 130×45 mm. It is clear that one or more lines are missing before the first preserved line.

3 Barqiel and Uriel occur in *Sefer ha-razim* (see index there).

4 **š'rh** seems to be a curious spelling of Sarah.

5 **qplrgy'**: This is obviously Greek κεφαλαργία "headache". The same word may be present in a quotation from the lost *Midrash Yelamdenu* to Ex. 4:10 (Kohut 1955, VII, p. 165a): אינו עשוי לקופלארגיא הזו הוי לא איש דבורים אנכי. Kohut explains **qwpl'rgy'** from Greek κουφολογία "light, empty talk". Jacobson 1980, p. 59, has suggested that the Greek derivation should be from καλοπραγία "noble, heroic acts". The word in ther *Arukh* is spelled practically in the same manner as the word in our amulet, and the sense obtained may be acceptable: "He is not made for this 'headache'", although such a usage is apparently otherwise unknown in Greek.

kwrkwry': There seem to be two possible ways to explain this word: (1) A word of Greek origin in Aramaic (κερκίς, κερκίδος = staff, rod, weaver's comb, shuttle") gives in Jewish Aramaic a variety of forms **krkr, krkd, kyrkwr** etc.; see Jastrow, p. 670b. This word acquired in Syriac the additional meaning of "the bone of the upper arm, or of the upper leg". (2) A word of Semitic origin attested in the Hebrew and Aramaic root **KRKR** "to go around in circles", from which one might hypothetically derive a word meaning "a circle, a disc". None of these explanations seems entirely satisfactory.

(n)y': The reading here gains from the comparison with the same expression in line 10. In contrast to Syriac **n'**, Jewish Aramaic has **ny'**, our form **ny'** may have developed from the latter.

6 **ngdy'l**: The reading of this word is based on Amulet 3:10.

dkbyš: This verb often comes in association with **KPT** and **'SR** (e.g. Bowl 5:3); hence its use here in a context which implies tying or binding.

6–7 **šwšln dl' d[n]ḥš... dl' dpwrzyl**: The designation of the suppressing object as being "of iron" is fairly frequent (e.g. Bowl 13:13–14), but the negation of metals is much rarer. Compare, however, the phrase in Mandaic **zariz napšaikun bzaina dla hwa mn parzla** (*Ginza Y.*, p. 25:20), "arm yourselves with a weapon which is not of iron". For the

Fig. 13. Amulet 11

expression **bšwšln dl> dnhš** one may compare **w>srwhw bšlšln dnḥš** in Targum Judges 16:21 translating ויאסרוהו בנחשתים , "and they bound him with (fetters of) brass".

7 **nḥšwr**: The connection of this word with **nḥšyr** "hunt, eschatological war" in the Scroll of the War from Qumran (1QWar I:9, 10, 13) is unlikely.

Amulet 12

For a general description of the Nirim amulets see Commentary to Amulet 11. The maximum dimensions of the extant fragment of Amulet 12 are 115×38 mm.

2 **ʾbrsks**: See Amulet 2:3, as well as Montgomery 1913, No. 7:9 (with parallel) **wʾbrks rbʾ mnṭrnʾ drwḥy ṭbʾtʾ wmḥbln drwḥy byšʾtʾ**. A discussion of Abrasax is in Dieterich 1891, p. 46; *Sefer ha-razim*, p. 8.

11 **šlmṣw** is attested as a hypocoristicon of Shlamṣiyyon, cf. Jastrow, p. 1587a; Frey 1952, No. 1253.

12 **bʾtʾ** seems to be the feminine singular active participle of BYT/BWT.

18 The reading yyyy for God's name is according to Amulet 1:5 etc., but another spelling is also possible.

Amulet 13

Translation

1 ...
2 An amulet proper for Esther,
3 daughter of ṭ'ṭys,
4 to save her from
5 evil tormentors,
6 from evil eye,
7 from spirit, from demon,
8 from shadow-spirit, from
9 [all] evil tormentors,
10 from evil eye, from
11 ... from imp[ure] spirit,
12 ..."If thou wilt diligently
13 hearken to the voice of the Lord
14 thy God, and wilt do that
15 which is right in his sight,
16 and wilt give ear
17 to his commandments,
18 and keep all his statutes,
19 I will put none of these
20 diseases upon thee, which
21 I have brought upon the Egyptians.
22 For I am the Lord that healeth thee" (Ex. 15:26).
23 ...

2 **qmy' ṭb**: See Amulet 2:1 and the Commentary there.

3 **ṭ'ṭys**: For this name cf. the feminine pr. n. Tation in a synagogue inscription from Ionia; Frey 1952, No. 738. A masculine proper name

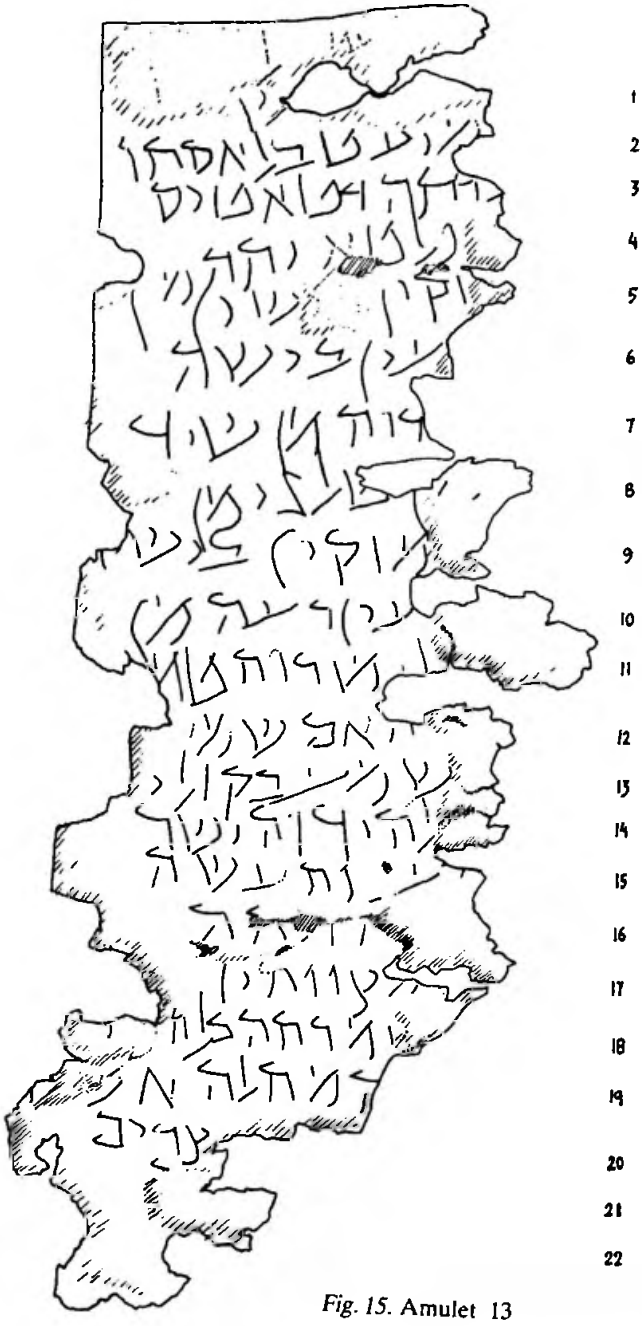

Fig. 15. Amulet 13

Tettius is attested on a Jewish tombstone in Rome (Frey 1936, No. 480).

4 [ḥ]**plṭ**ʾ: Infinitive of *paʿʿel*. The reconstructed letter could also be *mem*; **mplṭ**ʾ would then follow the pattern of Galilean Aramaic (see Commentary to Amulet 2:1). The root **PLṬ** corresponds to **ḥṣylh** in Amulet 1:3 and **ṭwlw wšyzbw** in Geniza 8:11.

5–11 The evil entities here have all indefinite forms, as in Amulet 14 and Geniza 8. The sequence **rwḥ wšyd wṭlny** occurs also in Scholem 1980/81, pp. 252 f. The same sequence occurs in Amulet 7 with the definite forms. For **ṭlny** see also above, Amulet 4:15.

The list of evil entities is partly repeated, given first in Aramaic and then in Hebrew (**mzqyn byšyn** serves both in Aramaic and in Hebrew). Geniza 7 displays a somewhat parallel phenomenon, giving a full incantation in Hebrew, which is then partly repeated in a similar text formulated in Aramaic.

12–22 The same biblical verse concludes also Geniza 8, which has other parallels with our amulet.

For the reconstruction yyyy see the Commentary to Amulet 12:18.

This amulet was brought to the Israel Museum for opening by its owner, Mr. Joseph Sammel, and we are indebted to Prof. Yaʿakov Meshorer for drawing our attention to it. It consists of a silver sheet which was rolled along its narrow side. The writing is in lines which run along the length of the sheet. Its general state of preservation is fairly good, though the right-hand side and the bottom are lost. The size of the extant fragment is *c.* 4×3 cm.

1 Both Shimʿon and Shappira are widely attested names since Second Temple times. Shappira is a feminine name, meaning the same as Yaʾita (Amulet 2). Cf. Naveh 1980, p. 57, note 12.

2 The list of nouns is given here, as often, in the absolute forms; see Amulet 13.

3 At the beginning of this line one might imagine that the natural word to follow ʾš ʿry, ʿrwy, the presumed absolute forms of ʿryt, ʿrwyt; see Amulet 2:2 and the commentary *ad loc.*, and the corresponding Hebrew form ʿryh in Amulet 4:29.

Amulet 14

Translation

10 [...God of] Hos[ts...] God
11 [of Israel...]

ʾl(wh)h dyśrʾl: The reading of the first word is not entirely clear. An alternative reading may be **ʾl(ʾ)h**.

4 We owe the reading of this Greek line to Professor Morton Smith, as well as most of the following comments on this line.

The first word may be read ZAIP or ΣAIP (if we assume that the upper stroke of the *sigma* merged with the leg of the *lamed* in the preceding line). Prof. Smith suggests that the word may be a reflection of the biblical toponym Śeʿir (Septuaginta Σηειρ) in Jud. 5:4. We wonder whether an association with biblical *śaʿir* "satyr, demon" (cf. e.g. Is. 34:14) is to be excluded.

ΦΘAΩ is explained by Prof. Smith as the name Ptah with an ending.

For ΦΩZAX(ΩT), Prof. Smith comments: "ΦΩZA is a word found in two spells: Preisendanz 1931, p.164 (XXXVI:44) and p.170 (XXXVI:228). In both it follows πεφθα/πεφνα and πεφρα is followed in Preisendaz 1931, p. 14 (VII:312) by ζαωθ. Both spells in XXXVI are for personal favour, that in VII:312 is for protection from dreams and demons".

8 We have here a sequence which is reminiscent of the text of *Qeri'at šema' 'al ham-miṭṭa*, as in Amulet 1:1–3, although what is left of the formula here conforms more closely to the traditional text. We should therefore expect the words which survive in our amulet to be preceded by an enumeration of four angels on each side of the person to be

This is an amulet on a thin silver sheet, measuring 35×82 mm. It was purchased by the Israel Museum in 1969 from an antique dealer in Jerusalem, but the provenance of the object was not transmitted. By its language, orthography, the material on which it is written and its place of purchase there can be little doubt that this is a Palestinian amulet.

The amulet, which forms a parallel to Bowls 12a and 12b, came to our attention at a late stage in the preparation of the book when it was going to press. The commentary to Bowls 12a and 12b has had to be somewhat modified in view of our better understanding of the text and of the history of the formulae which occur here. However, it was impossible to rewrite the whole commentary, and some inconsistency in the treatment of these texts may have remained.

At the same time, since the amulet is fragmentary and its decipherment has been very difficult, due to the fact that the letters are crowded together and the text is often elliptical, it might have been impossible to reach a clear understanding of the text of Amulet 15 without the benefit of previous acquaintance with the story from Bowls 12a and 12b (and the other parallels).

The text of Amulet 15, like that of Bowls 12a and 12b, is based on a story of Smamit (lizard or spider; see below, Commentary to line 1), whose sons were killed by an evil agent; the name of that demon may be reconstructed from Bowl 12a: Sideros. She flees to a place, which, if it conforms to the detail in Bowl 12, would be a mountain, and there three helpers, **swny**, **swswny** and **snygly**, enter her house, unwittingly admitting with them the fiend, who kills her (new-born) son. She cries at her helpers, but the fiend flees. They chase him and find him in the midst of the sea. When they wish to kill him he swears that wherever the names of **swny**, **swswny** and **snygly** are mentioned, he will not kill the client of this amulet and her new-born son. This story obviously serves for the protection of a woman giving birth and of her child. The details of the story and the comparison to other versions of the same story in

22 Antonina, daughter of...
23 ... and her son. Blessed art Thou y[yyy]
24 the living God, King of the world. [May He exorcise]
25 the spirits from your presence.

medieval and later times will be discussed in the Appendix to this amulet.

In order to facilitate the textual comparison, we have set the three Aramaic texts — Bowls 12a and 12b with Amulet 15 — in parallel columns, in the section which deals with Bowl 12 (p.188–193).

1 A word was probably lost before **smmyt**. Two possible reconstructions of the lost word have been considered: **ḥdh** ("one") and **hdh** ("this"). The first alternative would have required an indefinite form **smmy**; the second alternative seems to go along better with the form **smmyt**, although it lacks the determined ending, on the assumption that **smmyt** is already used as a proper name. For **hdh** before a proper name cf. e.g. **hdh rḥl**, *Berešit Rabba*, 70; ed. Theodor-Albeck, p. 817.

smmyt (Bowl 12a **smwmyt**, 12b **smmyt**ʾ) is related to Biblical Hebrew *śmāmīt* (Prov. 30:28), which is variously interpreted as a lizard or a spider; the Targum and the traditional Jewish commentaries favour the latter rendering, while the Septuagint has *kalabōtēs* "spotted lizard". In Lev. 11:30 *lĕṭāʾā* is rendered by the Jonathan version *śmāmītā*, which the medieval commentary on Jonathan says is a spider. In Talmudic Hebrew and Aramaic, **smmyt/śmmy** seem to mean uniformly "spider" (cf. Kohut 1955, VI, pp. 72b f.; Jastrow s. vv.). Our context could bear either interpretation, but the preponderance of the sense "spider" in Hebrew and Aramaic in the period corresponding to the writing of our texts seems to weigh in favour of this interpretation (see also Löw 1912, pp. 140 ff.). A late Jewish amulet from Tunis (cf. Casanowicz 1917, p. 50) mentions a negative figure called **zmzwmyt**, probably unrelated to our **smmyt**. One may also recall the grasshopper figure in Islamic wonder stories (cf. Goldziher 1872, p. 767).

bnyn [...]: It is possible that the number of sons followed, although it is not certain that there is room for a number. The number should have

normally preceded the designation **bnyn**. In the bowls the number of sons killed is twelve, while in the late Greek version given in the Appendix the number is six.

2 **[sd]**rws: The name is reconstructed on the basis of Bowl 12a. That the name Sideros ("iron") is original is demonstrated by the Ethiopian Werzelya (see Appendix).

3 **br²(š)[ ]**: One may be tempted to reconstruct here and at the end of line 4 **br²(š) [ṭwr²]** "at the top of a mountain", following the indication in Bowls 12a and 12b, section III.

4–6 The details about the construction of a house with gates and the shutting of the gate are not mentioned in Bowls 12a and 12b, though they are implied in the story given there. All of this is explicitly found in the late Greek version (see Appendix).

7 **lyd²**: This is a puzzling expression in this context. **yd²** might signify "handle", but would not make a meaningful translation. **lyd** normally means "at, near"; **mn yd** or **myd** means "immediately". One wonders whether **lyd²** could not mean "near there" or "at that time"?

swny etc.: The three names are clearly divided in lines 12–13 and 20–21. The same division seems to occur in Bowls 12a and 12b, and it is continued in the later tradition of this story; e.g. in the late Hebrew amulets **snwy, snsnwy wsmnglp**, and in the Greek stories (Perdrizet 1922, p. 16: Sisinios, Sinēs and Sēnodōros). For further discussion of these names see Appendix.

8 **²rtqw**: This verb has been identified as typical of Galilean Aramaic (Kutscher 1971, col. 274). In Bowls 12a and 12b this verb lost its meaning, and it seems to be used as part of the name of the helpers.

9 A portion of the story seems to have been contracted here. The parallel stories tell of the request of the helpers to enter, the initial refusal of Smamit, their insistence, and her final acquiescence. Here we only have the helpers' insistence.

13 The reading of the final part of the line is uncertain.

14 The verbs "[heard]...opened (the door), fled" are not found in Bowls 12a and 12b.

15 For the reconstruction **[mn] ḥzyn** (the verb is in the active participle pl. m.) see Kutscher 1976, pp. 51 ff.; the alternative construction, with

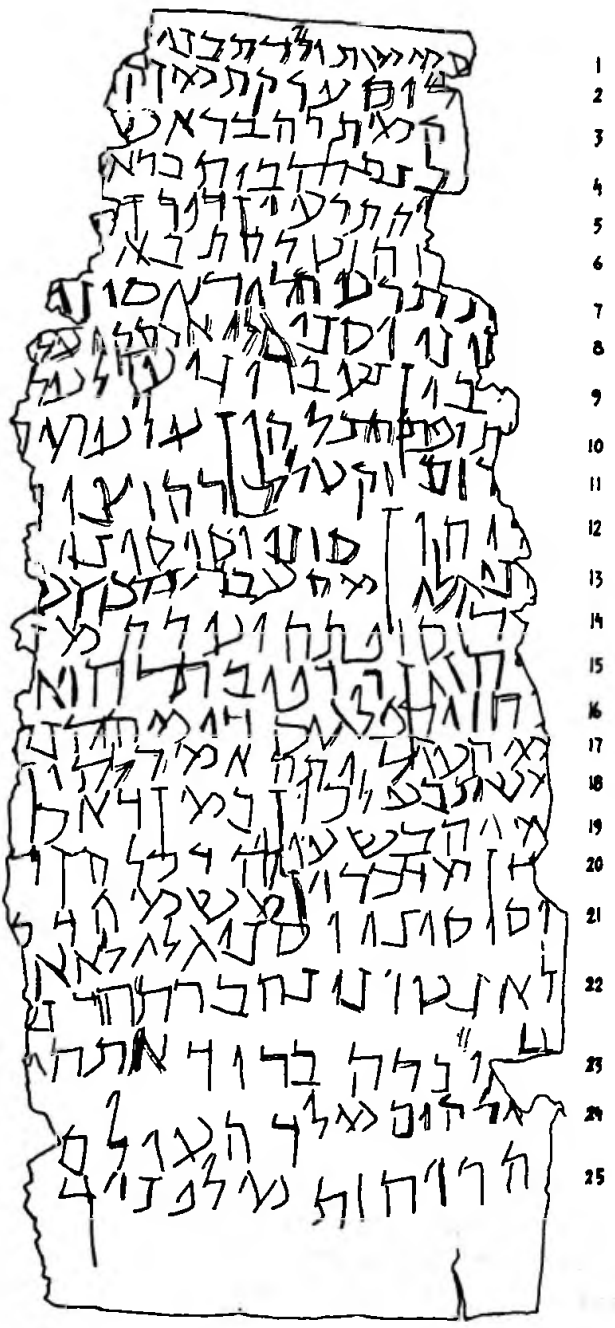

Fig. 17. Amulet 15

kd, is not attested in Galilean Aramaic (op. cit., p. 58). However, as we should have expected to see a trace of the *nun*, the reconstruction is doubtful.

15–16 **w'[šk]ḥwy**: The reconstruction is based on the parallel versions of 12a and 12b, where we have **w'drykw ytyh**. The verb **DRK** in *af'el* should mean there "to find", although the writers of the bowls probably understood it to mean "to lead", and used **lgw** "into (the Great Sea)", instead of **bgw** "in".

16 **bplgws dymh**: This double usage — Greek and Aramaic — seems to be a constant phrase in Jewish Aramaic (perhaps more particularly in the Palestinian dialect) to indicate "the midst of the sea". The Hebrew expression *bĕ-lev yām* (Ex. 15:8) is rendered by the Targum of Jonathan b. Uzziel **bgw pylgws dym' rb'**. A similar translation occurs in the Aramaic version of Ps. 46:3. The phrase is also attested in *Lev. Rabba*, section 12, beginning. In Bowls 12a and 12b the phrase is **lgw plgws ym' rb'**.

18–19 We have here a version of Is. 40:12 which is close to the Peshitta. The Targum to this verse diverges from the Hebrew text. Bowls 12a and 12b, in contrast, use the original Hebrew; in Bowl 12b the whole verse is quoted.

kl hn d- is apparently a Palestinian usage. Bowls 12a and 12b use **kl 'tr d-** instead.

20 The first word could be reconstructed as **['tw]n** on the basis of the phrase in parallel late Hebrew amulets; see Shachar 1971, p. 19, No. 4: כשמזכירים אתם את שמותינו

22 **l'nṭwnynh**: Antonina is attested as a feminine Jewish name in Rome; see Frey 1936, Nos. 236 and 416. Antoninos occurs as a masculine name on a Jewish tombstone from Palestine; see Frey 1952, No. 970.

23–24 The blessing here corresponds partly to the blessing in Bowl 12b, section X.

24–25 The reconstruction **[yg'r]** is based on the Qumran Scroll of the War X:31 ורוחי [גו]רלו גערתה מפנינו

In **mlpnyk** the suffixed pronoun refers probably to the client.

Appendix to Amulet 15

The story on which the texts in Amulet 15 and Bowls 12a and 12b are based is interesting because of its wide-ranging connections. It tells of a *smamit*, i.e. a lizard or a spider (see Commentary to Amulet 15:1), which gave birth to (twelve) children, who were killed by Sideros (the wicked).[1] Bowl 12b has the name **srgys** (Sergius?) instead. There is no clear explanation to the name Sergius in this connection, except by assuming that it is a corruption of Sideros. The latter name is clearly the Greek *sideros* "iron", a sense which gets a gratifying confirmation in the Ethiopian versions (see below).

The bereaved mother flees to a mountain "the name of which is unique in the world", to quote the phrasing of Bowl 12a. According to the two bowls she performs magic rites of copper and iron,[2] but this detail is absent from the amulet. Three new persons, **swny**, **swswny** and **snygly**, appear on the scene as friendly helpers; in the Christian version they are usually described as the woman's brothers. The meaning of these names is obscure. One might think of some Greek connection, e.g. σαύνιον "javelin"; σείσις "shaking, concussion", but such explanations lack proof.

swny, **swswny** and **snygly** knock on the door and ask the woman to open the door for them, but she refuses. At their insistence,[3] she opens, and then the wicked Sideros enters with them and kills the child which has evidently been born in the meantime. When she raises a cry, the helpers chase Sideros and reach him in the midst of the sea. They seek to kill him, but refrain when they are told by Sideros that if they spare him, he will undertake by oath to desist from killing the client and her son wherever the name of the helpers is mentioned.

The story told here has many parallels in medieval Christian literature, in Greek, Coptic, Ethiopian, Armenian, Rumanian, Slavonic

[1] The name Sideros is attested once as an angel name in the Geniza fragment T-S N.S. 329.972: אסידרוס רוחה רבה. It seems also to occur once in Mandaic, cf. Macuch 1967, p. 118:37 f., 43, but the context there is not entirely clear.

[2] The magic combination "iron and copper" occurs in Amulet 11:6–7 and in Montgomery 1913, No. 19:10.

[3] The argument which they use and which ultimately convinces her to open the door is not made explicit.

and late Syriac, as well as in Arabic and Hebrew. The various versions are discussed in detail by Peterson 1926a, pp. 109ff. and by Winkler 1931. A Greek version of it exists in a number of late medieval manuscripts. We are reproducing the Greek text given by Perdrizet 1922, pp. 16 ff.:[4]

Ἐπὶ τῆς βασιλείας Τραϊανοῦ τοῦ βασιλέως ἦν τις γυνὴ ὀνόματι Μελετινή, ἥτις ἐγέννησεν παιδία ἕξ, καὶ συνέλαβεν αὐτὰ ἡ μιαρὰ καὶ ἀκάθαρτος Γυλλοῦ· καὶ πάλιν ἐν γαστρὶ συνέλαβεν ἡ Μελετινή, καὶ εἰσῆλθεν εἰς τὰ λεγόμενα Χαλκοπράτια, καὶ κτήσας πύργον ὑψηλόν, καὶ καθηλώσας αὐτὸν καὶ μολυβδώσας, καὶ λαβὼν ιβ' θεραπαίνιδας διῆγεν μετ' αὐτῶν καὶ ἐμεῖς ἐν αὐτῷ, ἔτεκεν ἐκεῖ τὸ παιδίον.

Ἐν μιᾷ οὖν τῶν ἡμερῶν ὁ ἅγιος Σισίνιος, Σίνης καὶ Σηνέδωρος κατῆλθον τοῦ ἐπισκέψασθαι τὴν ἀδελφὴν αὐτῶν, καὶ γινόμενοι πλησίον τοῦ πύργου ἔκραξαν αὐτὴν λέγοντες· ἄνοιξον ἡμῖν, ἀδελφὴ Μελετινή. Ἡ δὲ εἶπεν· παιδίον ἐγέννησα καὶ φοβοῦμαι ἀνοῖξαι.

Ἐπὶ πολὺ δὲ αὐτῶν ἱσταμένων καὶ τῶν ἵππων χαλινοκτυπούντων, κατῆλθε τοῦ ἀνοῖξαι αὐτῶν. Ἡ δὲ μιαρὰ Γυλλοῦ συνεισῆλθε σὺν τοῖς ἵπποις ὥσπερ μυῖα· καὶ περὶ μέσης τῆς νυκτὸς ἀπέκτεινε τὸ παιδίον. Ἡ δὲ Μελετινὴ ὠλόλυζεν πικρῶς, λέγουσα· ὦ Σισίνιε, Σίνη, καὶ συνοδία, οὐκ εἶπον ὑμῖν ὅτι παιδίον ἐγέννησα καὶ φοβοῦμαι ἀνοῖξαι; ἦλθεν ἡ μιαρὰ καὶ ἀπέκτεινεν αὐτό. Τότε οἱ ἅγιοι προσευχὴν ποιήσαντες πρὸς Θεόν, κατῆλθεν ἄγγελος ἐξ οὐρανοῦ καὶ εἶπεν αὐτοῖς· εἰσηκούσθη ἡ δέησις ὑμῶν πρὸς Θεόν· καταδιώξατε αὐτὴν εἰς τὰ μέρη τοῦ Διβάνου.

Τότε λέγουσιν πρὸς τὴν ἀδελφὴν αὐτῶν· μὴ λυποῦ, ἀδελφὴ Μελετινή, ἡμεῖς γὰρ ἐν ὀνόματι τοῦ Θεοῦ γενόμεθα ὡς κυνηγοί, καὶ κρατήσωμεν αὐτήν. Τότε καθίσαντες ἐπὶ τοῖς ἵπποις αὐτῶν, ἔτρεχον αὐτήν. Ἡ δὲ μιαρά, ἰδοῦσα τοὺς ἁγίους ὄπισθεν αὐτῆς, ἔδραμεν πρὸς τὴν θάλασσαν, καὶ ἔλασαν οἱ ἅγιοι

[4] Another closely related Greek story was published in an English translation by M. Gaster 1900, pp. 142 ff., from the text in Leo Allatius, *De templis graecorum*, 1645 (not available to us). Perdrizet seems to have been unaware of this earlier publication. These Greek stories are probably the origin from which are derived the Slavonic and Rumanian versions discussed in M. Gaster 1900. Perdrizet 1922, p. 19, note 1, mentions a related Arabic text which occurs in a Vatican Ms. Arab. 118. Winkler 1931, pp. 97 ff., gives the text of Cod. Arab. 117 in the Vatican, which is a prayer by St. Sūsniyūs for the protection of small children. Some further bibliography is provided by T. Gaster 1971, pp. XXXIV f., and in his articles of 1942 and 1955.

τοὺς ἵππους αὐτῶν, καὶ ἔφθασαν αὐτήν. Καὶ ἀπέλαβεν αὐτὴν ὁ ἅγιος Σισίνιος ἐκ τοῦ πλευροῦ αἰτῆς, καὶ ἤρξατο βασανίζειν αὐτήν· ἐὰν μὴ μοῦ ὁμολογήσῃς ποῖον θεὸν σέβεις καὶ ποῦ τὴν δύναμιν ἔχεις, ἐκ τῶν χειρῶν ἡμῶν οὐκ ἀπόλυσαι, ἕως οὗ ἀποδώσεις ἡμῖν καὶ τὰ ζ' τέκνα Μελετινῆς ζῶντα, ὥσπερ ἔλαβες. Τότε ἡ μιαρὰ λέγει τοῖς ἁγίους· Ἅγιοι τοῦ Θεοῦ, ἀδύνατόν ἐστιν δοῦναι τὰ παιδία, ἐὰν μὴ πίω γάλα ἐκ τῶν μασθῶν Μελετινῆς. Καὶ στραφεὶς ὁ ἅγιος Σηνόδωρος πρὸς τὴν ἀδελφὴν αὐτῶν, ἀνήγγειλεν αὐτῇ τὸ γεγονός, καὶ ἔδωκεν γάλα τὸν ἅγιον. Καὶ ἐλθὼν αὐτὸς εἰς τὸν τόπον ὅπου ἐκράτησαν τὴν μιαράν, καὶ ποτίσαντες αὐτὴν τὸ γάλα, καὶ κατ' οἰκονομίᾳ Θεοῦ ἐξέρασεν τὰ παιδία ζῶντα. Τότε ἤρξαντο μαστίζειν αὐτὴν· ἡ δὲ μιαρὰ λέγει τοὺς ἁγίους· Ἅγιοι τοῦ Θεοῦ, μὴ μὲ πολυβασανίσετε, καὶ ὀμνύω σας εἰς τὸν κύκλον τοῦ ἡλίου καὶ εἰς τὸ κέρας τῆς σελήνης, ὅτι ἔπου γράφεται τὸ ὄνομά σας καὶ ἀναγινώσκεται ἡ πολιτεία σας, καὶ τὰ ιβ' ἥμισυ ὀνόματά μου, οὐ μὴ τολμήσω προσεγγίσω ἐν τῷ οἴκῳ ἐκείνῳ, ἀλλὰ ἀπὸ τριῶν μιλίων φεύξομαι ἐκ τοῦ οἴκου ἐκείνου. Τότε λέγουσιν αὐτήν· Ἀνάγγειλον ἡμῖν τὰ δώδεκα ἥμισύ σου ὀνόματα. Τότε ἡ μιαρὰ πυρὶ φλεγομένη ἔλεγεν· Τὸ μὲν πρῶτόν μου ὄνομα καὶ ἐξαίρετον καλεῖται Γυλλου, τὸ δεύτερον Αμορφους, τὸ τρίτον Αὔυζου, τὸ τέταρτον Καρχους, τὸ πέμπτον Βριανη, τὸ ἕκτον Βαρδελλους, τὸ ἕβδομον Αἰγυπτιανή, τὸ ὄγδοον Βαρνα, τὸ ἔνατον Χαρχανιστρέα, τὸ ι' Ἀδικία, [τὸ ια'...], τὸ ιβ' Μυῖα, τὸ ἥμισον Πετομένη (ι). Καὶ ἀκούσαντες ταῦτα τὰ ὀνόματα, οἱ ἅγιοι ἐθαύμασαν, καὶ ἀνέσπασαν τὸν δεξιὸν πλόκαμον τῆς κεφαλῆς αὐτῆς ποιήσαντες σχοινία τοῖς ἵπποις αὐτῶν, καὶ λαβόντες τὰ ἰδιόχερα αὐτῆς ὀνόματα, καὶ τὰ παιδία ζῶντα ὥσπερ ἔλαβεν, καὶ ἀπόλυσαν αὐτήν. Καὶ εἰσελθόντες εἰς τὴν Πόλιν, πᾶσα ἡ πόλις ἐδόξαζεν τὸν Θεὸν τὸν ποιοῦντα θαυμάσια διὰ τῶν ἁγίων αὐτοῦ.

Ὁ ἔχων τὴν ἀποστροφὴν αὐτῆς οὐ μὴ ἀδικηθῇ.

In the reign of Trajan the King there was a woman by the name of Meletinē. She gave birth to six children, and the abominable and impure Gyllou carried them off. Meletinē became once again pregnant, and went to those (places) called Khalkopratia, where she acquired a lofty tower; she bolted it (with nails) and sealed it with lead. Having taken twelve maids, she lived amongst them and entered into it, and she gave birth there to the child.

One day Saint Sisinios, Sinēs and Sēnodōros came down to visit their sister. Having drawn close to the tower, they called her saying,

"Open the door for us, our sister Meletinē". But she said, "I have given birth to a child and I am afraid to open the door".

But as they stood there for a long time, and as their horses stamped upon the wood, she descended to open the door for them. The abominable Gyllou came in together with the horses in the form of a fly, and toward midnight he killed the child. Meletinē cried bitterly, saying: "O Sisinios, Sinēs and company! Did I not tell you that I had given birth to a child and that I was afraid to open the door? The abominable one has come and killed him". The saints then addressed themselves to God in prayer, and an angel came down from heaven and said to them: "Your petition has been heard by God. Pursue her as far as the Lebanon".

They then told their sister: "Do not be distressed, Sister Meletinē, for we are going to be pursuers in the name of God and we shall seize her". Then, seated on their horses, they ran after her. The abominable one, however, seeing the saints behind her, ran into the sea. The saints drove their horses and overtook her. Saint Sisinios took her from her side and started to torture her: "If you do not promise to tell me which god you worship and where you derive your power, you will not escape from our hands until you give back to us the seven children of Meletinē, as much alive as they were when you snatched them". The abominable one then says to the saints: "Saints of God, it is impossible for me to give the children as long as I do not drink milk from the breasts of Meletinē". Saint Sēnodōros returned to their sister and recounted to her that which had happened, and she gave milk to the saint.

Having come to the place where they were holding the abominable one, they gave her the milk to drink, and, by God's disposition, she vomited the children alive. Then they started flogging her. The abominable one said to the saints: "Saints of God, do not torture me too much, and I swear to you by the disc of the sun and the horn of the moon that wherever your name is written and your association is known, and my twelve and a half names, I shall not dare approach that house, but shall keep away from that house to a distance of three miles". Then they said to her, "Disclose to us your twelve and a half names". The abominable one, burning in fire, said: "My first and special name is called Gyllou; the second Amorphous; the third Abyzou; the fourth Karkhous; the fifth Brianē; the sixth Bardellous; the seventh Aigyptianē; the eighth

Barna; the ninth Kharkhanistrea; the tenth Adikia; (...) the twelfth Myia; the half Petomene". Hearing these names, the saints were surprised. They tore off the right-hand braid of her head, making cords for their horses. Taking the names revealed by herself, and the children, alive just as they had been when she had snatched them, they let her go. Having entered the City, the whole city praised God who made wonders by the hand of His saints.

This device against her will not cause any harm to him who uses it.

Here we have nearly all the essential elements of our Aramaic story: Several children killed by the fiend; the flight of the mother to a fortified and lofty place;[5] the three helpers[6] coming and not being admitted; they insist; the tricky fiend sneaks in with them; the new-born baby is killed; the appeal to the helpers; the chase into the sea; and the promise of the fiend not to harm anyone who uses the helpers' names and those of the fiend. The differences are mostly of secondary character: the name (and proper identity) of the attacked mother;[7] the name[8] and gender of the

[5] The Greek text has εἰς τὰ λεγόμενα Χαλκοπράτια, which Perdrizet explains as follows (p. 17): "Quartier de Constantinople, avec une église fameuse, où était conservée, entre autres reliques, la ceinture de la Vierge". While this identification of the place name seems valid, one wonders whether Khalkopratia does not contain a reminiscence of something like Χαλκοπράγματα=חרשין דינחשה, as in Bowl 12a.

[6] The number is not uniform in the different versions. Three is still the number used in the Greek story just quoted, although it is sometimes blurred, as in the case when Meletine addresses the helpers by the words "Sisinios, Sines and their party" (ὦ Σισίνιε, Σίνη καὶ συνοδία). Other Greek versions (e.g. those given by Leo Allatius, cf. Gaster 1900 and Winkler 1931, pp. 109 f.) speak of only two helpers: Sisinios and Sisynodoros. In some versions there is talk only of a single helper, who is the woman's husband or brother (e.g. the Arabic version given below). In a similar way there is a single helper in the late Jewish and Christian sources, where the function is relegated to Elijah, Michael, or Gabriel.

[7] A certain zoological association may nevertheless exist: Meletine may be connected with the Greek word for a bee (μέλιττα). The fiend has a strong association with a fly (Greek μυῖα), which is both the form it assumed when it entered with the brothers' horses and one of its names. *Smamit*, as noted above, is a spider or a lizard.

[8] Gyllou (or Gellō, Gelō) is considered by some to be the origin for Arabic Ghūl. Cf. Sophocles, *Greek Lexicon*, s.v. γελλώ etc.; Perdrizet 1922, p. 25; M. Gaster 1900, p. 148. On the Babylonian origin of this demon cf. Frank 1910, pp. 161 ff.

fiend, as well as its identity ("iron");[9] the number of offspring killed by the fiend (12+1 in the bowls, 6+1 in Greek);[10] the helpers are designated in Greek as the mother's brothers,[11] while in the Aramaic there is no relationship mentioned. Other points of divergence may seem to be mere enlargements or embellishments of an original version.

Apart from the great similarity of structure and plot, the Greek versions present a striking similarity to the Aramaic text in the names of the helpers. Sisinios, Sinēs and Sēnodōros bear great resemblance to **swny, swswny** and **snygly** in their sound pattern. All three names, in the Greek as well as in the Aramaic, play about with the phonemes *s* and *n*.

The identity of the fiend, Sideros=Iron, was lost in the Greek version. It survives, however, in a group of stories which are current in Ethiopic amulets and which probably derived from Coptic. They were summarized in Worrell 1909, pp. 165 f.; the interesting feature of that story for our purpose is that the attacking fiend is called *Werzelya*, while the helper, who is the woman's husband, is called in the Ethiopic stories *Susneyos*, a form resembling the Aramaic and Greek versions. Werzelya is not an Ethiopic word, and several suggestions have been put forward by scholars to explain it; it was compared to Ursula, Epilepsia, Basileia, as well as the Hebrew *Barzel*.[12] In light of the Aramaic text we are now discussing, there can be no doubt that Werzelya is actually a reflection of Aramaic Parzĕlā or Hebrew Barzel "iron". It is curious to note that the Aramaic name is preserved in Ethiopic, while the Aramaic texts present a Greek form. The surviving Greek versions, on the other hand, have lost all memory of Sideros.

[9] The name Sideros may well lie behind the sixth name of Gyllou, Bardellous, which is reminiscent of Ethiopic Werzelya, cf. below. See also Perdrizet 1922, p. 21.

[10] The theory that interprets the Sisinnius story as an astrological allegory can of course make better use of the number 12 than 6. Cf. Peterson 1926a, pp. 125 f. and the discussion by Winkler 1931, esp. pp. 126 f. The mother indeed has 12 servants and 12½ names (the additional half-name is perhaps analogous to the thirteenth baby just born).

[11] Some versions make the helper the brother of the fiend and the husband of the bereaved mother. Cf. Fries 1893, pp. 62 ff., quoted in Winkler 1931, p. 96, and see also pp. 127 ff. See also note 6 above.

[12] For a summary of views and references cf. Worrell 1914/15, p. 137. See further Aešcoly 1932, pp. 39 ff., 126; Winkler 1931, pp. 175, 186. The latter connects it with the Babylonian Labartu.

A much contracted version of this story occurs in an Arabic synaxary, based on the Coptic rite, which gives under the date Barmūda 26 the martyrdom of St. Sūsniyūs, who is said to have been the son of Sūspatros, of the retinue of King Diocletian. The relevant portion says:

> He returned to Antioch where he found a sister of his who had given birth to a hideous-looking son. Before him she had given birth to a daughter whom she had killed and whose blood she had sucked. Satan dwelled in her, and she assumed by witchcraft the shapes of birds and snakes. Whenever a child was born to the inhabitants of the town she would descend on it, kill it and suck its blood. When the holy man saw this, he took a lance in his hand and killed his sister and her son, for he was Satan's son, as well as her husband and his father, for they were sorcerers.[13]

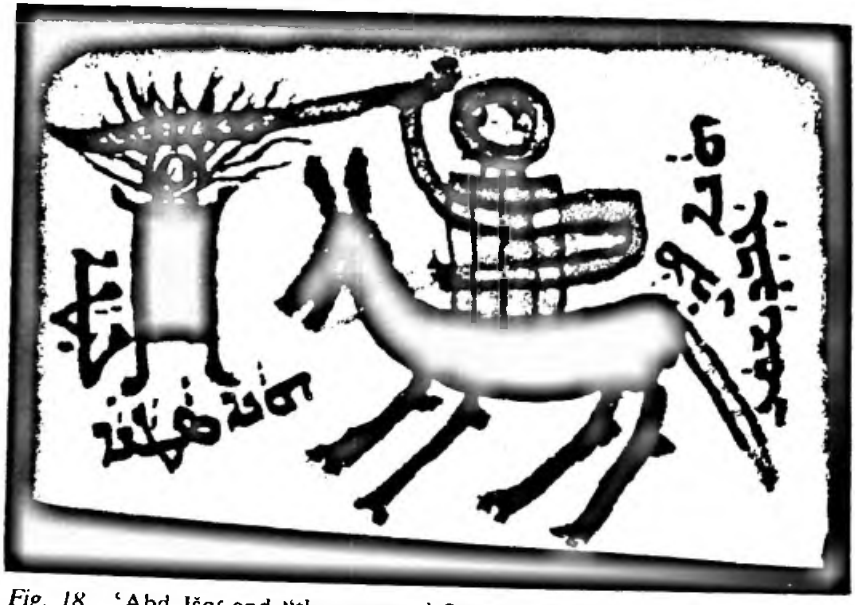

Fig. 18. ʿAbd-Išoʿ and "the accursed Satan", who wears the "likeness of a hateful woman of dark appearance". From a Syriac book of magic (Gollancz 1912)

[13] Cf. Basset 1922, pp. 336 ff., particularly p. 337. Quoted in Winkler 1931, pp. 129 f., where further references are given for the Ethiopian version based on the Coptic.

It is clear that a modified version of our story is given as part of the biography of this martyr; it has indeed become a standard element in the hagiography connected with St. Sisinnius.[14] Other reflections of the same motif are found in the various Arabic Islamic charms connected with the figure of Qarīna al-Tābʿia, Umm al-Ṣibyān,[15] and discussed at length by Winkler 1931; as well as in the late Syriac figure of *emmā ḥanoqṭā d-ṭalyē* "the mother who is a strangler of children" (Gollancz 1912, pp. 60–65), represented in the manuscripts as being killed by ʿAbd-Išōʿ: she is "the evil spirit in the likeness of a hateful woman of dark appearance" (see Fig. 18).

It may be remarked that we seem to have a late Jewish echo of this motif in the trio of magical names which are used to protect a woman at childbirth and a new-born baby: instead of סוני וסוסוני וסניגלי we have in late Jewish magic סנוי וסנסנוי וסמנגלף. The suggestion that these names are connected with Sisinnius has already been made by Moses Gaster;[16] the story in which these names occur in *Alphabetum Siracidis*,[17] is close enough to our own so as to suggest literary dependence. A typical late Jewish amulet in which the same story is used may be given in its outline as an indication for the survival of this motif in Jewish magic (see Shachar 1971, No. 3;[18] reproduced here in Fig. 19): Elijah,

[14] Cf. e.g. *Bibliotheca sanctorum*, XI, col. 1246 f.

[15] The corresponding Hebrew term אם התינוקות occurs in the Geniza fragment ENA 3381, f. 8.

[16] Gaster 1900, pp. 155 ff. (=1928, pp. 1031 ff.). Cf. also Trachtenberg 1961, pp. 101 f., where an amulet for the protection of mother and child during childbirth using these names is given in the frontispiece; also in Schrire 1966, p. 118.

[17] Fol. 23a, quoted in English by Gaster, ibid. Lilith in this story is depicted as a witch whose task is to destroy little babies; she is chased into the sea, and promises to desist from harming children if the names of the three angels are used on an amulet. Other elements in *Alphabetum Siriacidis* diverge from our base story.

[18] See also Shachar 1971, Nos. 2 and 4. The same story occurs also in Montgomery 1913, pp. 258 ff., from notes made earlier by Richard Gottheil. The provenance of that amulet is uncertain, but there can be no doubt that it is not part of the Nippur excavation material, despite Montgomery's wavering on this point. The language and style are clearly late medieval or modern (Scholem 1948, p. 166, n. 25). Montgomery's text seems to come from an area where Spanish was used. The name of the young mother to whose house Lilith goes may be read as Mercada who is known as (ד״מ is probably for דמחקריא) Vida (?), daughter of Donna. The first line should be read סנוי סנסנוי סמנגלף אדם וחוה קדמונה חוץ לילית as in other amulets of this kind. A very similar text is in M. Gaster 1900, p. 149 (=1928, p. 1025).

walking on the road, met Lilith and her companions and said to her: "You and your companions are impure, where are you going?" She said: "I am going to the house of X daughter of Y, the woman in childbirth, to kill her and take away her son, to drink his blood, to suck the marrow of his bones and to eat his flesh". Elijah put a ban on Lilith, but she asked him to release her and in exchange she promised not to harm that woman and her son wherever the names of Lilith which are enumerated[19] are mentioned. This amulet as usual carries the names of the three angels סינוי וסנסנוי וסנמנגלוף, after the regular heading אדם וחוה חוץ לילית חוה ראשונה.[20]

Fig. 19. A Jewish amulet printed in Germany in the 18th century. From Shachar 1971, No. 3

[19] Some of the names of Lilith in this text and in Montgomery 1913, pp. 285 ff. can be identified with the names in the Greek and other versions: אמורפו is evidently Morphous, שטריחה may be Striga. It may be noted that among the names of the demoness in the Greek text of Allatius (see Winkler 1931, p. 109) we have Pelagia, reminiscent of our "Pelagos, the great sea".

[20] For a psychoanalytical discussion of these stories see Hurwitz 1980.

The general outline of the probable development of the versions we have discussed may be set forth as follows. An early Palestinian Aramaic version of the story of Smamit, Sideros (=iron) and the three helpers of the childbearing woman survives in Amulet 15. This version of the story is marked by the presence of the Greek term *sideros*. This may suggest the existence of a Greek story on which the Aramaic formulation was based, but such a conclusion is not strictly obligatory. A similar Palestinian Aramaic text found its way to Mesopotamia and was copied in Bowls 12a and 12b (possibly also in Gordon 1941, p. 346), where a number of corruptions and perhaps some Babylonian linguistic features were introduced into the text. The Palestinian Aramaic story gave rise to several Christian Oriental versions, the common feature of which is the fact that the helpers assume the shape of Christian saints. The bereaved mother in these versions is a woman related to the helpers. At least one of the Christian versions (the Ethiopian one) used an

Fig. 20. A fresco at Bawit, Egypt. From Perdrizet 1922

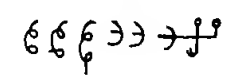
Aramaic or Hebrew text, where the Greek name Sideros was replaced by its Semitic equivalent. A parallel Jewish and Christian legend existed, in which the role of the helper is essentially fulfilled by the Prophet Elijah or by the Archangel Michael,[21] who are secondarily identified with the phonetic equivalents of **swny**: Sanoy (etc.) on the Jewish side, Sisinios (etc.) in the Greek tradition. There seems to be a tendency in the Christian tradition to conflate this helper figure with St. George.[22] The evil agent is Iron in the early Greek-Aramaic form of the story, but this was largely forgotten in the later versions, where the evil power is a female figure, Gyllou in Greek and the dependent versions, Lilith in the Jewish tradition. Iron only stays on as a reminiscence, in the name *Barzelya/Werzelya, and in the various practices using iron in connection with child birth.[23] Many versions retain the sea as the place where the demon is vanquished. A constant feature of most forms of the story is the promise made by the evil power that wherever the name of the helpers (later coupled with those of the evil figure) should be invoked, no harm would befall the woman in child-birth and her new-born baby, on whose behalf the amulet is being prepared.

Perdrizet 1922, pp. 13 ff. tried to develop the thesis that the origin of the Coptic and Greek legend is Parthian, adducing the name Sisinnius, which was also the name of Mani's famous disciple, and the Parthian costume of this figure in the Fresco at Bawit in Egypt (Fig. 20). The

[21] See Reitzenstein 1904, pp. 298 f. (Winkler 1931, p. 112), where the Archangel Michael, who is the helper, is also identified with Sisinios and Sinodoros. In Winkler 1931, p. 111, the helper is Gabriel.

[22] Cf. Viaud 1928, p. 112, who uses Perdrizet 1922.

[23] The use of iron for the protection of a woman at child-birth is very widespread. The earliest attestation in Jewish literature seems to be in Tosefta Shabbat 7:4 והקושר ברזל בכרעי המיטה של חיה ... הרי זה מדרכי האמרי; see Lieberman 1961/2, p. 84. See further Blau 1898, pp. 159 f. For ethnological data on the Jews of Afghanistan Brauer 1944, p. 337; on Jewish practice in Karlsruhe, Scheftelowitz 1920, p. 77. In nineteenth-century Poland iron was used for the protection of women at child-birth with the explanation that Heb. *barzel* represented the initial letters of Bilha, Rachel, Zilpa and Lea (*Jahrbuch für jüd. Volkskunde*, I, 1923, p. 217; Trachtenberg 1939, p. 313, n. 14). We have information about the magic use of iron in child-birth, e.g. among Armenians (Hambroer 1962, pp. 32 ff., 105 ff.) and among Arabs in Morocco (Westermarck 1926, index s.v. iron, steel). On the efficacy of iron against demons in general see Abt 1908, pp. 159 f., where further literature is given; Doutté 1908, pp. 41 ff.; Goldziher 1907; and Trachtenberg 1939, p. 160.



name Sisinnius, as can be seen from our Aramaic material, is not original, and the Parthian costume in a pictorial representation may indicate nothing more than that an Oriental figure is intended. The theory of the Manichaean affiliation of the story (see M. Gaster 1928, pp. 1252 ff.; Winkler 1931, p. 123) can also be safely disposed of. Even without the evidence of the Aramaic text the Manichaean connection might have seemed too tenuous, but it is now clear that Sisinnius has nothing to do with the original form of the story, and that this name is merely a transformation of the mysterious names **swny**, **swswny** and **snygly**.

II. Incantation Bowls from Mesopotamia

Bowl 1

Bowl 1

Translation

(1–2) [Appointed is this bowl for the sealing and guarding] of the house, dwelling [and body of Ḥuna son of Kupitay, that there should go out from him the tormentors, evil dreams, [curses,] vows, spells, (3) [magic practices, devils,] demons, liliths, encroachments and terrors. The secret of heaven is buried in heaven, and the secret of the e[arth] is (4) b[uried in the ear]th. I say the secret of this house against all that there is in it: against devils, demons, spells, (5) magic practices, all the messengers of idolatry, all troops, charms, goddesses, all the mighty devils, (6) all the mighty Satans, all the mighty liliths. I tell you this word. He who accepts it, finds goodness, and he who is bad (and) does not accept (7) the mystery words, angels of wrath come against him, and sabres and swords stand before him and kill him. Fire surrounds him, and flame comes against him. (8) Whoever listens to the word sits in the house, eats and feeds, drinks and pours drink, rejoices and causes joy, he is a brother to brethren and a friend to the dwellers of the house, he is a companion of children (9) and is called educator, he is an associate of cattle and is called good fortune. Accept peace from your Father who is in heaven and sevenfold peace from male gods and from female (10) goddesses. He who makes peace wins the suit. He who causes destruction is burnt in fire *(magic characters).*

Seal[ed and guar]ded shall be the house, dwelling, and body of Ḥuna son of Kupitay, (11) and there shall go out from him the tormentors, evil dreams, curses, vows, spells, magic practices, devils, demons, liliths, encroachments and terrors. His sickness shall be pressed down, and a wall (12) of pure steel shall surround Ḥuna son of Kupitay. The sickness, devil and demon of Ḥuna son of Kupitay shall be pressed down (13) and he will be guarded by night and by day. Amen.

The interest of this new find is in the fact that it constitutes a welcome addition to a small group of bowls in Syriac which carry basically the same text. Since none of the bowls gives an unequivocally clear reading of the whole incantation, and since the text contains several problems, a new version helps to elucidate and sometimes to confirm earlier hypotheses. The texts parallel to our new bowl are the following:

1 A text read by T. Ellis in Layard 1853, pp. 443 f., No. 6. The bowl is now in the British Museum, B.M. 91712 (cf. Hamilton 1971, No. 10).

2 A bowl from Nippur at the University Museum of the University of Pennsylvania, published by Montgomery 1913, pp. 242 ff., No. 37 (cf. Hamilton 1971, No. 9).
These two texts benefited from the insights and comments of Epstein 1922, pp. 56 ff., who discovered their similarity, and managed, by comparing them to each other, to restore much of the mutilated text and to elucidate the meaning of the fragmentary formulae.

3 A bowl at the Iraq Museum (No. 44107), first published by Teixidor 1962. Teixidor did not notice the connection between this text and the previously published ones, and his reading was therefore somewhat fragmentary. The identification of the similarity is due to Hamilton 1971, No. 14, who offered some improvements to Teixidor's readings.

We have re-checked the British Museum bowl by the aid of a photograph, and having at our disposal our new text, we believe it is possible in some points to complete and correct Epstein's readings and reconstructions, which are on the whole confirmed by this text. The state of preservation of our bowl is good enough to make an almost continuous reading possible, apart from the opening words, which are illegible. Whereas our new text and Montgomery No. 37 are written in proto-Manichean characters,[1] Ellis 6 and Teixidor's bowl (as well as our Bowl 10) are written in Estrangelo.

The text begins in the centre and goes, by spirals, towards the circumference. This is, with some exceptions, the normal practice in the

[1] See Lidzbarski 1916; Teixidor 1962, pp. 61f.

magic bowls. On our bowl the two opening lines are so faint as to be largely illegible. They can, however, be reconstructed by comparing the similar formula in lines 10–11, and the opening phrases of such other Syriac texts as Montgomery 1913, Nos. 31, 32 and 35. The three parallel texts, Ellis 6, Montgomery 37, and Iraq Museum 44107, are all too defective at the beginning to be of any help.

3 The two words, **qrwby' wsrwdt'**, obviously denoting evil spirits, are also attested in line 11. The Syriac word *qrūḇyā* means "approach, attack, accusation", a cognate of *qrāḇā* "war", and could possibly serve as the proper name of a demon. No form corresponding to **srwdt'** is attested in Syriac, but Jewish Aramaic provides it in Gaster 1896, p. XII:35. The verb **SRD** "to fear" and the noun *sūrādā* "terror" are, however, familiar in Syriac, and occur in a magic text published by Hamilton 1971 (20:8): **nytsrwd bswrd' dl'lm** "may he be struck by eternal terror". **swrd'** occurs more than once in the charms published from Syriac manuscripts by Gollancz 1898. Thus we have, for example, the sequence ...**wdḥlt' wzw't' wrtyt' wtwht' wswrd' wrny'**...(p. 79) "...fear and trembling, terror and surprise, dread and anxiety..." (a similar sequence on p. 86). Derivatives of the same verb occur also in Mandaic, although the verb "to fear" in Mandaic, affected by both a metathesis and an enlargement by **-n-**, is **SNDR** (Drower and Macuch, p. 334a, where however the etymological references to Jewish Aramaic and Modern Syriac words meaning "sieve" seem out of place). The causative verb in Mandaic has the form **SRWD** (like the reflexive verb in the Syriac text of Hamilton 1971, quoted above; cf. Drower and Macuch, p. 337a, where the reference to **SRD** as an "inversion of **SDR** II" is not clear, since **SRD** is the basic form of the verb, as it is indeed presented on p. 334a). A Mandaic noun which is very close to our own is **saruadta**, translated by Drower and Macuch as "(a) fright, alarm (esp. nightmare), terror, (b) loneliness" (p. 315). The examples given there support a somewhat different translation. The phrase **saruadta ḏ-'umama** indicates "terror of the day time", perhaps personified, as opposed to **sahria ḏ-lilia** "night-demons", and the phrase **bsibuth usaruadth timut** need not compel us to introduce a new meaning "loneliness" for the word. It can perfectly well be rendered "she will die in her old age and in her fright". The plural feminine form **saruata** indicates a class of demons associated with ruins and destruction (cf. Drower and Macuch, p. 315b). Cf. also Bowl 13:13.

3–4 The phrase רז שמיא בשמיא קביר ורז ארעא בארעא קביר was reconstructed by Epstein 1922 for Montgomery No. 37, and it is gratifying to have it fully confirmed by our bowl.

4 From this point Epstein managed, by comparing the two bowls with each other, to make an almost complete reconstruction of their text. Our bowl is very close to Montgomery's text, offering only minor variations, which will be noted below. For **ʾʾmr** Montgomery has **ʾymr**.

5 On the basis of our text it is possible to suggest in Montgomery, line 5, to complete **[wʿl kl ʾzgndʾ]** (6) **dptkrwtʾ**.

6 **ptgmʾ hdyn**: Epstein conjectured in Montgomery 37:7 **pytgʾmʾ syt[rʾ]**, which Hamilton read **pytgʾmʾ hnʾ**. The correct reading of Montgomery 37:7 seems to be, like here (though in *plene* spelling), **pytgʾmʾ hydy[n]**, with the demonstrative written exactly as in Montgomery 37:5 **[r]ʾzh dbytʾ hydyn**.[2] It may be noted that the demonstrative **hdyn** is not usually recorded in Syriac texts; it is a form which is normal in Jewish-Aramaic (cf. Epstein 1960, p. 23; Rossell 1953, p. 27).[3] This may suggest that our present text is based on a Jewish-Aramaic version; see also **ytwh**.

mḥwʾ has a mark above the word to indicate the participle. In Montgomery 37:7 and in Iraq Mus. 44107:2 the form is **mḥwynʾ**.

dmqbyl yʾtwh: For the first word Montgomery has **dmqbl**. For **yʾtwh** both Ellis 6 and Montgomery 37 have **yʾth**. The accusative particle is quite unusual in Syriac, and is characteristic rather of the Jewish Aramaic texts. For the particle with pronominal suffixes, one can note a wavering in Jewish Aramaic between a singular-type declension and a plural one. For the singular cf. e.g. **yʾtky** (Gordon 1934a, p. 141, line 6); **ytyh** (Montgomery 3:7, 9); **ytkwn** (Montgomery 15:7); for the plural-type declension cf. **ytyky** (Gordon 1934c, p. 469, G:5; Montgomery 17:3). The variation **yʾth** as against **yʾtwh** demonstrates the two forms of treatment of the particle. It seems strange, though, to see a plural mark (*seyāmē*) over **yʾtwh**.

[2] There is an error in Hamilton's edition and translation of this line. **hdyn** occurs in Bowl 10:13, cf. Commentary to Bowl 10:7.

[3] In Babylonian Jewish Aramaic **hydyn** is used only for the interrogative "which one"; see Epstein 1960, pp. 29 f.

dmqbyl y'twh ṭbt' mškḥ wdbyš l' mqbyl: The B.M. text, Ellis 6, provides the clue to the puzzling sentence. Ellis 6:5 should read: **[d]mqbyl y'th ṭbt' mškḥ wdbyš wl' m(q)[byl]**. The phrase **l' mqbyl** is thus an apposition to **wdbyš**.

7 **mÏ' rž'**: This is also the obvious reconstruction of the text in Montgomery 37: **[m]l' r'z'** (or **r'zy**), rather than **'r'zy**. *Mellē rāzē* is used here in the sense of incantations.

wsyp' wḥrb': The correct reading in Montgomery 37 seems to be the same as here. Montgomery read the first word **wdsyp'**; Epstein preferred to read **[b]syp'**. The two nouns are best taken as standing in juxtaposition to **wml'k' rwgz'**.

wqdmwhy: See Epstein 1922, p. 56, where it may be seen that Montgomery's text has **qdmwh**, while Ellis has **wqd[m]why**.

nwr' ḥdrh lh "fire surrounds him": **ḤDR** is used with other prepositions, **ḥdr b-** "to retract" and **ḥdr 'l** "to return" (cf. Levine 1970, p. 350). In our text, line 11, the same verb occurs with a direct object in the sense of "to encircle".

8 **šm'** is written here, corresponding to Montgomery **šm'**, which is equally wrong. The Iraq Museum text has the correct form, **šm'**. The correspondence between our new text and Montgomery No. 37, here and elsewhere, shows that they both were copied from the same source.

wytyb bbyt': The initial *waw*, which does not exist in Montgomery and Ellis, is our scribe's mistake.

'ḥ' l'ḧ' nhw': Ellis 6 and the Iraq Museum text have here **'ḥ' l'nš' hw'**. One other case in which Ellis and the Iraq Museum text join together against the reading of Montgomery and of our new text is in the preceding line, where they have **wšlhbyt' npl' 'lwhy** (according to Iraq Mus.; Ellis has minor variations and a dittography), against **wšlhbyt' 'tyh 'lwh** (according to our text; Montgomery has minor variations). **nhw'** has a diacritic sign which marks it as a participle, perhaps to indicate that it is used for the present tense.

9 **wmrwby'**: This seems to be a copyist's error for **wmrwbyn'** attested in Montgomery 37. Ellis and Iraq Mus. spell the word **wmrbyn'** (cf. Hamilton 1971, p. 55). The correct identification of this word was made by Epstein.

ṣwt' lbyr' hw': This phrase is still puzzling. It is written in this manner in Montgomery 37 and in Iraq Mus. 44107, where it would have the sense of "he is an associate of cattle" (**byr'** for *bʿīrā*), which seems

curious. In Ellis the text shows in effect **lgld**³ (or **lglr**³), which Epstein, followed by Hamilton, read **lgʿr**³, assuming a corruption **bʿr**³ > **gʿr**³. It is possible to consider a variant form of *būrā* "uncultivated, simple, stupid", which might correspond to *gʿīrā* "hateful, hideous", although one can hardly account for the sense obtained "he is an associate of the hateful, ignorant". An argument in favour of this interpretation, however, is the fact that it comes parallel to the preceding phrase, which states that he is "a friend of children and is called an educator". Here he may be termed "a companion of the simple-minded (or of those excluded), and is called good luck", possibly some kind of auspicious magical situation.

wgd³ **ṭb**³ **mtqr**³: The scribe of Montgomery 37 omitted the word **ṭb**³.

šlm³ **qbylw mn** ³**bwkwn dbšmy**³: Epstein's reconstruction of Montgomery's text is unacceptable. He read it **šlm[**³ **mn] bl** ³**bwkwn**. It would seem more plausible to reconstruct there too **šlm[**³ **q]b[y]l[w]**, and to assume that **mn** was omitted by a scribal error. The same text may underlie the letters preserved in the Iraq Museum bowl. Ellis 6 has a completely different version at this point.

wšb³ **[š]lm**³: Epstein followed the word **dbšmy**³ by a reconstructed **[w**³**r](**ʿ**)**³. However, it seems more reasonable to reconstruct for Montgomery 37 the same phrase which occurs in our text. Indeed, the traces visible allow very well to reconstruct **[wš](b)**³. The same applies to the text of the Iraq Museum. It reads **wšb**ʿ³ **w[. . .]šlm**³.

dmšw³ **šlm**³ **zk**³ **bdyn**³: Epstein's correct reading is re-confirmed by our text, in addition to the support brought by the Iraq Museum bowl. The initial letter is undoubtedly **d-**, as in Teixidor 1962.

wdmšw³ **ḥbyl**³ **mtql**³ **bnwr**³: As the verb was not visible in Montgomery's text, Epstein had to invent one, and he chose **mtyqyd**. The Iraq Museum bowl and the new Jerusalem text concur in using the verb **QLY**, which should of course also be reconstructed in Montgomery 37. Teixidor's reading (followed by Hamilton) of the Iraq Museum text should be corrected as follows: **wdmšw**³ **ḥbl**³ **mytql**³ **bnwr**³.

10–12 The closing formula does not occur in the parallel texts, just as the Iraq Museum bowl closes with a formula which does not occur elsewhere. The formula of our text has corresponding texts in other magical bowls, such as Montgomery Nos. 31–35.

The client of this bowl is Ḥuna bar Kupitay. The name Kupitay occurs also in some other texts, cf. Montgomery Nos. 2, 4, 12, 16.

11 The spelling **mb'd'** for **m'bd'** is another instance for the weakening of the *'ayin*; cf. above **šm'** in line 8 and **šb'** in line 9.

kwrḥn': This word is written here twice with a *ḥet*, though it occurs with a *he* in Montgomery 7:11 (in Jewish Aramaic). Syriac has normally only the spelling with a *he*.

11–12 **wnḥdrh šwr' d'dms' dky'**: The reading is quite clear and unequivocal. **'dms'** is a loanword from the Greek ἀδάμας which consists of a privative α- with a derivative of the verb δαμάω "to conquer". The Greek word thus means "unconquerable" and designates the hardest substances: steel or diamond.[4] The word occurs also in Syriac (cf. Brockelmann, *Lex. Syr.*, s.v. **'d'mws**), and in Mandaic, where the phrase **šura ḏ-dmasa** is attested several times (Drower and Macuch, p. 111b). The word is also found in Persian and Arabic *almās* in the sense of "diamond", and in Manichean Middle Persian under the form **'rm's** for "steel" (cf. Nöldeke 1892, p. 44; Bailey 1943, p. 134).[5] It can be shown that **'dms'**, **'rms'** does indeed refer to some metal by comparing the parallel phrase in Montgomery No. 4:6 (in Jewish Aramaic): **wšwr' rb' dnḥš' 'ḥdryt lh** "and I have surrounded it with a great wall of bronze".

The same word, **'dms'**, occurs, we believe, in three other Jewish incantations, where it has not been recognized. The texts in question are Montgomery 2 and 27, and Gordon 1941, p. 273 (11:3). Montgomery 2 and 27 were re-studied by Epstein 1921, pp. 30 f.; his reading and translation are quoted and amplified by Levine 1971, pp. 361 f. as follows:

> תוב אזלנא אנא פ' בר פ' בחילי דנפשי בקומתי גציצא דפרזלא קרקפתי דפרזלא קומת דנורא דכיא ולבישנא לבושא דארמסא דכיא וממללא
>
> "Again I come, I, X. son of Y., with my own might. On my body are arms (or hands) of iron, a head of iron, a body of pure fire. I don the pure-white and simmering robe of Hermes".[6]

[4] For the occurrence of *Adama* and its derivative in Greek magic cf. Peterson 1926b, p. 393.

[5] A striking parallel is found in a Manichean magic text in Middle Persian, where we have: **'wm šfšyr 'wd [cy]l'n 'y hswd 'y 'rm's [ʔ]y p'k pyr'mwn 'wb'yyd** (Henning 1947, p. 40, lines 32–34) "I am girt with a whetted sword and a dagger of pure adamant".

[6] Epstein did not commit himself on the word which was read by Montgomery as **'rms'**. The warlike character of such magical operations recalls the similar motif in the Chaldaean Oracles; cf. Lewy 1978, pp. 194 f.

The text of Gordon 1941, p. 273 (No. 11) is basically the same, though somewhat shorter.[7] However, although the name Hermes does occur on incantation bowls,[8] it is most unlikely that it occurs here. **ʾdmsʾ** "steel" is clearly the preferable reading, giving the translation "a robe of pure steel", which goes along with other indications of iron and fire. In Gordon 1941, p. 273, we might read not **lbwšʾ dʾrmys wddbyh**, but rather **lbwšʾ dʾdmwsʾ dkyh**.[9]

Another point worth examining is the adjective **mmllʾ**. Levine suggested the translation "simmering", as of coals, but this seems doubtful. One might rather seek the explanation in the Mandaic phrase **parzla nimalil ʿlḥ**, probably to be translated "iron will crush him" (cf. Drower and Macuch p. 273b, s.v. MLL III). Hebrew MLL also has the sense "to crush, squeeze" (cf. Jastrow s.v.). **ʾdmsʾ dkyʾ wmmllʾ** could therefore very well mean "pure, crushed (=forged) steel".[10]

Montgomery 19:7 was corrected by Epstein 1921, p. 49, to read **wbšwm mryʾ mlylʾ wmʾmlʾ dʾrmsʾ**. However, an examination of two unpublished parallel texts (University Museum of the University of Pennsylvania, both bearing the number 18059), shows that the correct reading is **mryʾ klylʾ wmgdlʾ dʾrmsʾ**.

[*Addendum*: When the book was in the press we noticed the article by Harviainen 1978, which had escaped our attention before. It contains in Estrangelo script another parallel text to our Bowl 1. The parallel to our text goes as far as our line 10, with no significant deviations, and it confirms the restorations proposed above.]

[7] We must recall that Gordon was probably unaware of Epstein's insights on this text.

[8] The one safe example is Montgomery 7:8, which is the equivalent of Myhrman 1909, p. 346, line 4. The correspondence established by Montgomery is: **ʾyrmys=hrmys**. On Hermes in Jewish writings cf. also Lieberman 1947, pp. 53 f.; Milik 1976, p. 336, follows Montgomery's wrong interpretation.

[9] In Montgomery 25:4 [**ʾr**]**msh myṯṯrwn** is not entirely certain.

[10] It seems possible that **mmlln**ʾ occurs also in the sense of "pure", at least in the phrase **pwrdysʾ mmlln**ʾ, Black 1954, fol. 72b (cf. p. 61: "Paradise of the Word", which seems inadequate). The interpretation of **mmll**ʾ as meaning "crushed, forged" does not exclude the much more common usage of the word in the sense of "speaking, talking", as in Jeruzalmi 1963, p. 115; Isbell 1976, p. 23, where we have **mlkh mmll brʾzy pryšt**ʾ; **mlk mmlyl brzy pryšt**ʾ; cf. our Amulet 3:3.

Fig. 21. A Jewish amulet printed in Warsaw in 1867

Bowl 2

The Hebrew University of Jerusalem, Institute of Archaeology, No. 1401

Plates 16–17

Inside the bowl:

(1) (ליט ....) הפיכי (הפיכא הפיכא) (2) הפיכא הפיכא הפיכא הפיכא ארעא (3) וי(שמ)יא הפיכי כוכבי ומזלי הפיכא שעתא דכול בני אינשא (4) הפיכא לוטתא דימא ויברתה דכלתא ויחמתה הפיכא לוטתא דגברי וינשי (5) דקימין בדברא ויבמתא ויבטורא ובית אילהי ובית כנישתא אסירא ויחתימא לוט(6)תא דלטת בישום ביתיאל ויקותיאל ובישמיה דיי רבא מלאכה דיחליה חדעסר שמין ססכבא (7) ככבא כנברא[1] סדיא סודאריא מדיריא אנקפא אנס[2] פספס כביבי בנורא כול מן דעבר על הלין שמהתא (8) מלאבי אילין אסירין ויחתימין כול שידין ושופטין וכול דלרעא קריא וכול דלישמיא מציתא שמעית קל ארעה שמיה (9) דימקבלא כול נישמתא מין הדין עלמא שמעית קלה דיתתא דלטת ושדרית עלה מלאכין נכיר נכיר יי נקום ניקמת יי נגיל ונגיל יי כיסס צצץ טימא יתיחתא דלטת ושדרו וחבילו יתה מין ענין דבר(ת)א[3] דלא תיקום ולא תילוט

Outside:

(10) דכיא בר קיימתא וימחלפא בר (דויד) ושרכה (בר) אלי(ש)תא[4]

(10a) (א) דכיא בק[5]

(11) מרים בת חורן

[1] An alternative reading could be kkbr'.

[2] An alternative reading could be 'ks.

[3] This word is seemingly written dbrd'.

[4] Another possible reading is ḫlypt'.

[5] This looks like being the first attempt to write the name, abandoned because of a mistake, and re-done subsequently above.

Bowl 2

Translation

Inside:
(1) (Cursed [?] ...) Overturned, (overturned, overturned,) (2) overturned, overturned, overturned, overturned is the earth (3) and heaven, overturned are the stars and the planets, overturned is the talk of all the people, (4) overturned is the curse of the mother and of the daughter, of the daughter-in-law and of the mother-in-law, overturned is the curse of men and women (5) who stand in the open field and in the village, and on the mountain and the temple(s) and the synagogue(s). Bound and sealed is the cur(6)se which she made. In the name of Betiel and Yequtiel, and in the name of yyy the Great, the angel,[6] who has eleven names: **sskbʾ**, (7) **kbbʾ**, **knbrʾ**, **sdyʾ**, **swdʾryʾ**, **mryryʾ**, **ʾnqpʾ**, **ʾns**, **psps**, **kbyby**, **bnwrʾ**. Whoever transgresses against those names, (8) these angels, bound and sealed are all demons and evil spirits. All that is of the earth calls, and all that is of the heaven obeys.

I heard the voice of the earth, [and of] the heaven (9) which receives all soul(s) from this world. I heard the voice of the woman who cursed, and sent against her the angels **nkyr nkyr**, yy take vengeance, yy let us rejoice and rejoice, yy **kyss ṣṣṣ ṭymʾ** the woman who cursed. And they sent and injured her (away) from the eyes of the daughter, that she may not avenge nor curse.

Outside:
(10) Dakyā son of Qayyamtā and Maḥlepā son of (David?) and Šarkā daughter of Ališţā (?)
(11) Miriam, daughter of Ḥoran

[6] Or possibly "his angel".

The text starts at the centre, where a circle is drawn, and runs in spirals towards the circumference. Near the rim of the bowl a large circle surrounds the text. No client's name is contained in the text of the incantation, but such names occur, quite unusually, on the outer surface of the bowl.

The text has a number of parallels, both complete and partial. These are as follows:

1 B.M. 91720 = Layard 1853, pp. 438-440 (Ellis 2). Layard does not contain a drawing, but we have been able to use a photograph kindly provided by the British Museum authorities to check the readings. The portion of this text which provides a parallel to the Jerusalem bowl begins at the fifth line.

2 B.M. 91727 = Layard 1853, pp. 440-441 (Ellis 3). This text has been re-edited by Schwab 1890, pp. 306-310 (Text B), and by Jeruzalmi 1963, pp. 52–63, and it has been incorporated into Isbell 1975, pp. 131-133 (Text 58). Again we have been able to consult a photograph of this bowl. The text which corresponds to the Jerusalem bowl begins at line 5.

3 B.M. 91745. Portions of this text were published by Gordon 1941, pp. 339-341, without photograph or drawing. The same text had been published without indication of its present location by Schwab 1892, pp. 139-142 (Bowl G), but Gordon did not notice that Schwab's text was the same as B.M. 91745, which he re-edited. A reader would not notice this identity by comparing the two editions, which are quite divergent, unless he had the benefit of a photograph, as we did. Only by collating the two editions with the photograph of B.M. 91745 can one conclude, with a high degree of certainty, that both scholars worked on the same original. Yamauchi 1965, when he studied parallels to his text (cf. No. 5 below), treated the versions provided by Schwab and Gordon as if they constituted two different texts. It may be noted that in several cases Schwab's readings are better than Gordon's, a tribute to that pioneer in the research of magic bowls.

4 Iraq Museum 9726, studied by Gordon 1941, pp. 348-349. Only a partial reading and translation is given, and no photograph or hand-copy.

5 A private bowl in the possession of Mr. E. Safani, published by Yamauchi 1965. From line 3 we have parallels to our Jerusalem bowl, but the second half of Yamauchi's text is again divergent.

The bowls enumerated 3 and 4 begin, like the Jerusalem text, with the word *hafīḳā* repeated several times, while the other parallels have a longer introductory text.

The text contains a number of formulaic elements which recur in other bowls. It may be convenient to list them:
(a) The formula: **hpyk' hpyk'** ... with a list of (negative) objects to be reversed, especially the curses of relatives and other men and women.
(b) An invocation of angels, in particular a group of eleven names which constitute the person of **yyy** the Great.
(c) The formula which asserts the efficacy of the invocation: "All that is of the earth calls, and all that is of the heaven obeys".

All three elements recur in the parallel texts (=PT) 2, 3 and possibly also 5, where element (c) is not visible. The same may be true of PT 1, where the third element is missing, and of PT 4, of which only a portion is given by Gordon.

Some particular features of our bowl may be indicated. The spelling **wy-** for the conjunction, **by-** and **ly-** for the prepositions, and **dy-** for the relative particle are frequent in this text. Rossell 1953, p. 21, refers to the spelling **wy-** indicating that it occurs before a vowelless consonant. This is not true either of the Jerusalem bowl (cf. **wybrth, wyḥmth, wynšy,** etc.), or of Montgomery No. 1 (see Epstein 1921, p. 29). The same is to be said of **by-** for the preposition **b-**, cf. **byšwm**. Similarly in Montgomery 2:7 we have **byptkry** (assuming that the first syllable is *pat-*).

The elision of an initial *alef* following a prefixed element also characterizes this text: cf. **dym'** (=*d-'immā*), **dytlyh** (=*d-'īṯ lēh*), etc.

There is a seemingly careless alternation of *alef* and *he* in final position for the *status emphaticus,* but it may be, at least in some of the cases, a conscious use of the possessive suffix of the third person singular feminine: **lwṭt' dym' wbrth dklt' wyḥmth** (line 4) "the curse of the mother and her daughter, of the daughter-in-law and her mother-in-law", although in the parallel versions all these nouns end with *alef.* At the same time we also have the interchange of **dlr'', dlyšmy'**, as against **'r'h, šmyh,** with no apparent difference in function.

The spelling of the plural **gbry, nšy** seems an East Aramaic feature, while the use of the preposition **yt** for the accusative is more typical of West Aramaic; cf. Rossell 1953, pp. 11, 37; Tal 1975, pp. 28–30 (see also above, Commentary to Bowl 1:6).

2–3 In PT 4 the formula, as read by Gordon, is: **'wpykh {'r'} 'r'h**

hwpyk› šyd›, where in view of all the parallel versions, the last word is likely to be a wrong reading for **šmy›**.

3 The word **š‹t›** in our text corresponds to **š‹wt›** in PT 3 (B.M. 91745, correctly read by Schwab, but wrongly read by Gordon as **bw‹wt›**),[7] and to **š‹whwn** (for **š‹w‹t›hwn**) in PT 2 (B.M. 91727). The translation as given by Schwab "que la [mauvaise] heure soit renversée" was followed by subsequent scholars, but it seems wrong. This is most probably a form of the noun derived from the verb Š‹Y, cf. Bab. Aramaic and Syriac **›št‹y** "to tell, talk". We thus have Syriac *taš‹īṯā* "story", as well as *še‹yā, šu‹āyā* "play, joke", *šū‹īṯā* "story", etc., Mandaic **šuta** (from **š‹wt›**) "talk, speech, conversation".[8] In all the parallel versions of this text we have the sequence **hpyk› š‹(w)t›/š‹w(t)hwn dkl bny ›ynš›** "that the discourse of all the pepole be overturned". This corresponds in PT 4, according to Gordon's copy, to **hwpykh lwṭt› dkl bny ›ynšh.** Nothing like this occurs in PT 5 (Yamauchi's bowl), though the phrase **hpyk› kl myly** can be regarded as conveying the same idea (if it is not to be read **mzly**).[9]

4 **lwṭt› dym› wybrth:** PT 2 has here **lwṭt› d›b› wdym› wdbrt›**, while PT 1, 4 and 5 have a version similar to the one on our bowl, without the father being mentioned.[10] Our version is unique in the distinction it makes between the suffix of *immā* and of *bartāh*, if it is intentional (see above). A similar formula with the possessive suffixes is found in the printed amulet (Warsaw 1867), where we have משביע אני עליכם כל מין עינא בישא ... עינא דאיש ואשתו עינא דאשה ובתה עינא דאשה ואחותה עינא דאשה וקרובתה ...; for the same incantation with minor variants see Hanauer 1907, pp. 318 ff. (see Fig. 21 on p. 133).

5 **dqymyn bdbr› wybmt› wybṭwr›:** A similar sequence occurs in each one of parallel versions, but none is identical. **ṭwr›** and the two following

[7] The correct reading was already suggested by Jeruzalmi 1963, p. 59.

[8] Cf. Drower and Macuch, p. 458. For the Mandaic verb cf. Yamauchi 1967, p. 360 s.v. Š‹.

[9] In a note on the word *millā* as a magic term in Hebrew, Sperber 1966 commented on PT 3 as published by Gordon 1941. The word does not exist there; Schwab read it correctly as **mzly**, the same word that we have in the Jerusalem bowl.

[10] PT 3 reads according to Schwab **hpyk› lyṭt› d›b› wdym›**, and according to Gordon **hpykh lwṭt› d(›b)› wdymh**, while the bowl clearly has **hpykh lwṭt› hd› d›ymh.**

terms are unique to our bowl. On the other hand, we lack here a reference to "near" and "far", which occurs in other versions.

wbyt ʾylhy wbyt knyštʾ: These terms are also unique to our bowl in this formula. Both terms seem to present plural nouns, although the main part of the genitive construction is in the singular. For a similar phenomenon in Syriac one may quote from the Julian Romance: **wpqd dntpṯḥwn byt ptkrʾ wntbnyn ʿlwthwn... wnttqnn byt knwšt**ʾ **dyẅlpn**ʾ **ṯʿy**ʾ **dʿqyr̈n ḥwy wsḥypn** "He ordered that the idol temples be opened and that their altars be constructed ... and that the schools for erroneous doctrines, which had been overthrown and destroyed, be repaired" (Gottheil 1969, pp. 1 f.). The Syriac phenomenon is treated in Nöldeke 1898, pp. 83 f., § 141.

6 **lwṭtʾ dlṭt**: The absence of an explicit subject for the verb may suggest a passive form. What goes against such an assumption is the observation that in PT 2 the form which occurs is a masculine active form: **dlṭ** (line 6), and further **wbpwmh lṭ**ʾ (line 7), apparently in the feminine. Another argument against taking this form as a passive participle is the phrase further down in our bowl: **ṭym**ʾ **ytytt**ʾ **dlṭt** (line 9), where *ītā* seems to be the subject of the verb. The subject, when it is not specified in the texts, could well be a demon, which can of course be either masculine or feminine.

bytyʾ**l wyqwty**ʾ**l**: PT 3 has here **by**ʾ**yty**ʾ**l wyqwty**ʾ**l** though the two names were quite erroneously read by both Schwab (who read **by**ʾ**why**ʾ**l mmnḥyl**) and Gordon (who read ʿ**z**ʾ **wḥy**ʾ**l ḥqyty**ʾ**l**). Yamauchi's text PT 5 seems to have **šdyḥy**ʾ**l wyqty**ʾ**l** (the first word was read by Yamauchi as **ṭšḥy**ʾ**l**). PT 1 has (as correctly read by Ellis) **bty**ʾ**yl wyqtw**ʾ**yl**. There is nothing corresponding to it in PT 2, and Gordon does not quote a similar formula from PT 4 (Iraq Museum).

wbyšmyh dyyy rbʾ **mlʾkh dytlyh ḥdʿsr šmyn**: The corresponding expression in the other bowls has caused considerable trouble to previous editors, and the contribution of our bowl may be said to be chiefly in clarifying this phrase. In PT 2 Ellis read **bšmrwt k**ʾ **mlʾkh**, while Schwab, in a completely different conception of the letters, read here (beginning from the preceeding word) **mn kwl mdynt**ʾ **mlʾkh**. Jeruzalmi greatly improved on his predecessors, but this particular expression was read by him **bšmrytk**ʾ **mlʾkh**. He cannot be blamed for his reading, because the error is obviously the magician's own, who miscopied from his original, where the formula must have been correctly written. The ancient scribe wrote **bšmk ytb**ʾ **mlʾkh**, for the obviously correct **bšmk yy**

rb' ml'kh. Paleographically the mistake is easy to understand. The same mistake was done by the scribe of PT 3: **wbšwm ytb' ml'k' d'yt lyh ḥd 'šr šmht'.**[11] Both scribes may have used a similar original, although PT 2 has the indefinite plural form **šmhn** for PT 3 **šmht'** (our **šmyn**, which has the indefinite masculine plural ending).

One may remark in passing that the process of transmission of the magical formulae was not apparently one of careful copying from a bowl or a notebook, but something like a free adaptation from existing written (or oral) formulae. Hence the great variations even when we deal with a text which is basically the same. In a sense the process of transmission is more like one of oral tradition than in almost any other form of written tradition. At the same time, **ytb'** from **yy rb'** could only come about by erroneous interpretation of written signs.

Once the correct formula is established, it is easy to see that in Yamauchi's bowl (PT 5) we should read **byšmk yy rb' ml'kh,**[12] where Yamauchi read, with hesitation, **ywrb'**. Similarly one recognizes without undue difficulty in PT 1 (Ellis 2) the phrase **wbšmk yrb' rb' ml'k(y)h d'yt lyh ḥd 'šr šmhn,** where the original formula **yyy rb'** "the Great yyy", having given way to a pseudo-word **yrb'**, is reinforced with the epithet **rb'**.[13] Not having the benefit that we possess by our comparison, Ellis read here **wbšmry dk' dk' ml'kh.**

The partial transcriptions which Gordon gives of the Iraq Museum bowl (PT 4) do not contain any correspondence to the phrase under discussion.

6–7 The eleven names of **yyy** *rabbā* have been compared by Yamauchi in the different versions which he possessed. As stated above, he was not aware of the fact that Schwab G is the same text as Gordon's rendering of B.M. 91745, and so the two lines C and D in Yamauchi's table constitute but two transcriptions from the same bowl. On the other

[11] This is the correct reading of the word (with Gordon), against Schwab's **šmwt'**.

[12] Yamauchi transcribes by mistake **ml'k'**.

[13] The recurring Mandaic form of the name is **adunai iurba,** where the first element is sometimes omitted. Cf. Pognon 1898, p. 17 = Yamauchi 1967, p. 154; Pognon, p. 22 = Yamauchi, p. 156 (where the text is **aduna rba**); Pognon, p. 23 = Yamauchi p. 158; Pognon, p. 25; Pognon, p. 73 (**bit iurba**), etc. The name is also quite familiar from literary texts in Mandaic. Cf. Lidzbarski, *Ginza*, p. 258 note 1; Drower and Macuch, p. 191. In Gordon 1934a, p. 141, we have **ywdg' ywdb'**, and the second word may well be identical with **ywrb'**.

hand, there is room to add PT 2 (Ellis 3), which also has a similar list, competently edited by Jeruzalmi, as well as our own new text. The Iraq Museum bowl (PT 4) obviously has also a list of eleven names, but this was not copied by Gordon.

If we take the Jerusalem text as basis for comparison, we may make the following table:

1 **sskbʾ**=PT 2: **ssbbʾ**, PT 5: **ssbʾ**, PT 1: **ssbbh**, PT 3: **qsrbʾ**.
2 **kbbʾ**=PT 2: **kkbʾ** (the third in that list), PT 5: **krbʾ**, PT 1: **kkkʾ** (third in that list), PT 3: **kbkʾ** (third in that list).
3 **knbrʾ**=PT 5: **kbkʾ**, while the other corresponding forms are quoted above, under number 2. In PT 2 No. 4, **bpbbʾ** may be compared here.
4 **sdyʾ**=PT 2: **sryh** (second in that list), PT 5: **mrwh**, PT 1: **sryh** (second in that list), PT 3: **srtyh** (second in that list).
5 **swdʾryʾ**=PT 2: **sydryh**, PT 5: **sw** (?), PT 1: **sydryh**, PT 3: **ʿnyny** (?).
6 **mryryʾ** = PT 2: **hydryʾ**, PT 5: **hʿpnyʾ**, PT 1: **ḥryḥ**, PT 3: **ktyš** (?).[14]
7 **ʾnqpʾ**=PT 2: **ʾnqpʾ** (number 9 in that list, read **ʾrqpʾ** by Jeruzalmi), PT 5: **ktypʾ**, PT 1: **ʾnqpʾ** (number 9 in that list).
8 and 9 **ʾns psps** = PT 2: **ʾlsps** (number 10 in that list), PT5: **hls sš pb**, PT1: **ʾnsps** (number 10 in that list?), PT 3: **nttnt pkrps** (?).[15]
10 and 11 **kbyby bnwrʾ** = PT 2: **bmmr nwryʾ** (read differently by Jeruzalmi), PT 5: **kbybn blwrʾ**, PT 1: **kbyby...**, PT 3: **kbybn bnwr.**

We are left with PT 2 **ʿzryh**[16] (No. 7 in the list) and **btwqpʾ** (No. 8) in PT 3.

Even though this is a somewhat cursory comparison, without a proper textual edition of the different texts involved, one sees that with a fairly small movement of items one comes to a grasp of a list which is more or less identical, though it contains the fluidity of an orally transmitted tradition, as noted above.

7 **kwl mn dʿbr ʿl hlyn šmhtʾ**: The expression occurs in PT 1, and was correctly transliterated and translated by Ellis. The same is true of PT 2, where Ellis read and translated correctly, though Schwab made a wrong

[14] Thus read by Jeruzalmi 1963, p. 62.

[15] These names recall the very frequent **ʾnqtm pstm pspsym** in late Jewish amulets; cf. Shachar 1971, p. 227, and above, Fig. 21 (p. 133).

[16] Jeruzalmi reads this name as **ʿzzyh**.

translation and Jeruzalmi made a mistake both in copying the text, which should read **wlkl dʿbr ʿl hlyn šmhtʾ**, and in its translation, and was followed in this by Isbell. PT 3 has the same phrase, again translated wrongly by Schwab ("à tous ceux qui passent près ces noms") and Gordon ("and each that works [**dʿbd**] by these names"). PT 5 no doubt contains the same phrase, though this was not legible to the editor. PT 4 is not quoted at this point.

As for the expression **ʿbr ʿl** "to transgress", the usage is quite well attested in Mishnaic Hebrew. Cf. B. B. Meṣiʿa 111a: כל הכובש שכר שכיר ועובר על כל שם ושם שיש בו: Tosefta Bava Meṣiʿa 10:8. עובר בה׳ שמות הללו. These contexts demonstrate the meaning of the phrase: "to transgress, to hurt, to injure sacred names", which is somewhat transformed in the rabbinical usage to "to transgress against commandments".

8 **kwl šydyn wšwptyn**: Of the other versions, PT 3 has a more extensive list of demons. It contains the following elements, some of which were not quite accurately read by Schwab, but which Gordon rendered very well: **kl šydyn wšwbṭyn wdywyn wlyṭyn wlylyn wsṭnyn wšqwpyn.** The first two elements are identical in the two versions, despite the variation in the spelling of the second. The spelling with a *pe* occurs in Hyvernat's text.[17] A discussion of the term occurs in Montgomery 1913, p. 92. The parallel versions have different sets of names, or no names at all.

wkwl dlrʿ qryʾ wkwl dlyšmyʾ mṣytʾ: An analogous phrase is found in the various parallel versions. PT 2: **wkl dlʾrʿ qryʾ wkl dlšmyh mṣytʾ** (lines 11 f.); PT 3: **wkl dylʾy dylʾrʿh qry wlyšmyh myṣyt;**[18] PT 1 is too effaced at this point, at least in the photograph, but Ellis managed to read it very nicely (without being able to give an accurate translation): **wkl dlʾrʿ [qry] kl dlšmyh mʿyt**, where only the final word should obviously be read **mṣyt.** PT 5 can easily be restituted at this point. The editor read **kl dlʾw...**, which is apparently the beginning of our formula: **kl dlʾrʿh qry (wk)l [dlšmyh] (mṣy)[t].** The passages copied by Gordon from the Iraq Museum bowl (PT 4) do not contain our phrase. A similar phrase seems to occur in Geller 1980, p. 54, lines 8–9 **wbtqlʾ dqryh wrwḥ mlʾkh rbty dmytwtʾ**: the last word should probably be emended to **dmṣytʾ**

[17] Some other examples for the alternation of **-b-** and **-p-** are given by Rossell 1953, p. 16.

[18] Schwab: **wkl dwlʾy dwlʾ dmw[t] qry wlšmw ḥmwṣyt.** Gordon: **wkl dylʾy dylʾrʿh qdw wlšmyh,** with the translation: "and all...of the earth's...and heaven's".

As to the sense , we have here clearly a formula which asserts that the incantation is effective: "Everything which is in (or on) the earth calls, everything which is in heaven obeys". Similar formulae occur in other bowls. Cf., e.g., Istanbul 5363 in Jeruzalmi 1963, p. 128: **ʾnʾ ktbyt wʾlhʾ mʾry kwlʾ ysy yt**..."I have written (the incantation), and God, the Lord of all, shall heal...", and our Amulet 1:12–13: **ʾnh ktbt yy[yy y]ʾsy** "I have written, God will heal."

8–9 **šmʿyt ql ʾrʿh šmyh dymqblʾ kwl nyšmtʾ mn hdyn ʿlmʾ**: Here again our bowl can provide us with an aid for clarifying parallel passages, and at the same time also instruct us in the ways of textual transmission of such magical bowls. PT 1, according to Ellis's transliteration (since the photograph is unclear at this point) has the following text: **šmr[h] ql ʾrʿ dqdḥ wšmyh d[ʾtkl]tny š[mhtʾ] mn hdyn ʿlmʾ**. The first three words can without doubt be reconstructed as identical with our text: **šmʿyt ql ʾrʿ**. The fourth word seems to be missing from our text. The rest of the sentence can be imagined to be the same text as ours. The contribution of this text is in the addition of a word **dqdḥ** as the verb for the action of the earth.

PT 3 can be read in the following manner: **šmʿyt kl ʾrʿh dʾwqwḥ** (?) **šmh dym(q)b(y)l**[19] **kl nyšmtʾ mn hdyn ʿlmʾ**. The text is quite definitely corrupt, but, like PT 2, it contains what looks like a verb after **ʾrʿh**, and this is an element which the scribe of our bowl must have omitted by mistake. The interesting point here is the error which the scribe of PT 3 committed when he wrote **kl** for **ql**. The reading itself is clear and unambiguous. The second half of the text in PT 3 is basically the same as the one in our bowl, and it seems to have been badly written because the scribe did not understand the meaning of the words. The verb which should be supplemented in our bowl after **ʾrʿ** may be the one which occurs in PT 1 **dqdḥ** : "which flees, which escapes".[20] The form **dʾwqwḥ** in PT 3 is somewhat similar in appearance, and may be assumed to be a corruption of the same verb. The full reconstructed sentence should then read: "I have heard the voice of the earth *fleeing, and that of the sky receiving all the souls from this world". The earth "fleeing" may be an allusion, in this context, to the unwillingness of the souls to die.

[19] Gordon reads the last three words: **rḥyqyh šmh dymḥbyl**.

[20] For the verb QDḤ cf. below Commentary to Bowl 5:11.

PT 2 does not have our sentence, but it has some remnants of it. It reads: **šmʿt mn hdyn ʿlmʾ ql ʿyttʾ dš...** This text can be explained as a haplography: **mn hdyn ʿlmʾ** is the termination of the phrase just quoted, while **šmʿyt ql ʾyttʾ...** would be the beginning of the next sentence. In PT 2 the two sentences were conflated.

9 **šmʿyt qlh dytth dlṭt wšdryt ʿlh mlʾkyn:** This phrase too has close parallels. PT 1, according to Ellis's transcription, reads: **ql ʾytʾ [šm]ʿyt dlw[ṭtʾ] wšdrʾ**[21] **ʿlh mlkyn.** PT 2: **šmʿt ...**[22] **ql ʾyttʾ (ks...**[23] **wlṭyʾ wšdrt) ʿlh mlkn (wtqypyn).** PT 3: **qlh šmʿyt šmʿyt ql gbrʾ mšršyʾ br pwrtw dlyṭ wšdryt ʿlhw mlʾky.** No comparable phrase is quoted by Gordon from PT 4, and the final part of PT 5 is not well preserved, but seems not to contain such a phrase. The only significant difference here is that PT 3 refers to a man, while the other texts where the formula appears deal with women.

nkyr nkyr: This name does not occur in Aramaic, as far as we know, outside our text, where it occurs in some of the parallel versions. PT 1 has **nkyr** (once only). PT 3 has **nkr nkr.** The other versions do not have this name, as far as can now be verified. The context suggests that this is the name of an angel sent against the man or woman who curses. The Islamic figure of *nakīr* (usually associated with *munkar*) comes to mind: this pair of Islamic angels are the ones in charge of the *post mortem* trial of people, and their punishment. The origin of the Islamic name has been unknown. We may have here an antecedent to it.[24]

yy nqwm yy ngyl wngyl yy kyss: PT 1 has **wnqwm**[25] **nqmʾ wngl**[26] **nglʾ ww**[27] **ss.** PT 3: **ynqm nyqmt nglh nglh ss ṭwy ss.**[28] The other versions do not contribute parallels, though Ellis reads in PT 2: **ydrk wtqym nqmʾ wngyl nyglʾn wssw mʾ,** which does not seem visible in the photograph.

[21] The passage is not visible in the photograph, but we may conjecture ***wšdryt.**

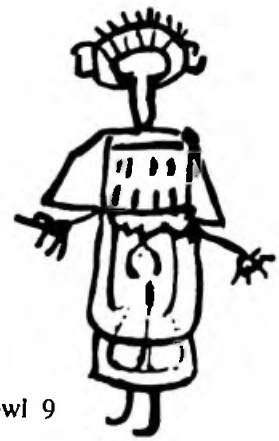
[22] As explained above, the group of words **mn hdyn ʿlmʾ** probably belongs to the preceding sentence, which was omitted by haplography.

[23] Our reading here differs from Jeruzalmi's.

[24] Cf. *Shorter Encyclopaedia of Islam*, pp. 411 f., s.v. *Munkar*.

[25] Possibly to be emended to **ynqwm.**

[26] Possibly to be emended to **yngl.**



[27] Possibly **yy.**

[28] Schwab's transcription is here wide of the mark.

ṣṣṣ ṭym' ytytt' dlṭt wšdrw wḥbylw yth myn 'nyn dbr(t)': PT 1: **wss ṭy mn wssṭ mn wd'ytt' dlyṭ' wš[r]y'**[29] ... **ksy 'ytt' ... mn['']nn dbryk**. PT 2 (Ellis's reading): **wssym yd'ytt' dlwṭ' wšry' lwṭt' '''**. PT 3: **ṭymw yt mšršy' br pwrtw dlṭ wšdr lwṭtyh lḥwpy dy(?) my' wlyṭwr mdnḥ'** ... The word **ytytt'** is clearly a combination of the accusative participle **yt** with **'ytt'**. It seems that this was corrupted in PT 1 and 2 into **yd'ytt'**. All versions apart from our own become muddled and incomprehensible here. **ṣṣṣ** has a parallel sequence of letters in Isbell 1975, No. 65:4 and in Amulet 2:4–5,14.

dl' tyqwm wl' tylwṭ: PT 1: **dl' tyqwm wl' tylṭ**. PT 3: **dl' mwlyṭ.**

10–11 The names, written on the outside, are an unusual feature of incantation texts, where they are usually incorporated into the text. Here the text is entirely impersonal. The mother's name may well be read Qayyamtā. The masculine name **qywm'** occurs in a Nabataean inscription published by Milik and Starcky 1975, pp. 121 f.

From Bowl 9

[29] Perhaps one should read here ***yd'ytt' ... *wšdrw.**

Bowl 3

The Hebrew University of Jerusalem, Institute of Archaeology, No. 1399

Plate 20

(1) אסותא מן שמיא למאדאראפרי בת (2) אנושאי ידמכון בעפרא חבילי נידרא דכוליה דוכא (3) וכל טלא וכל מידיעם דביש ומעיק לה למאדאראפרי בת מאנושי (4) חרשות ועבדין דמיתעבדין יתכבשון ויטמרון בארעה מן קדומיה (5) בעוז גדודהו וחיחי בין נסוע הארון וימר מושה קומא יהוה ויפוצו איבאך וינסו מ[vacat] מיפנך אקדד ואברא אמן אמן סלה

This is a plain bowl, with a crude square in the centre, and a fairly short inscription. Much of the inscription is taken up by a quotation from Numbers 10:35, in a peculiar spelling. No parallels are known to us from other magic bowls for any part of this inscription. The reading begins, as in most cases, in the centre.

1 The name of the client is Madar-Afri. The second element of this name seems at first sight to be similar to the name quite frequently attested in Aramaic incantations **ʾprʾ**, **ʾprh**, and which is likely to be the same as the name of Shapur's mother in the Babylonian Talmud, **ʾypryʾ-hwrmyz**.[1] The several attempts made at explaining this name may

[1] For the name **ʾprʾ**, **ʾprh** cf. Montgomery 1913, p. 118, where a Jewish or a Persian origin for the name are both mentioned as equally possible. The Jewish derivation would be from Ephraim as a hypocoristic, the Persian being a reduction from a name beginning with *fra-*. Both suggestions seem equally unlikely. Nöldeke 1879, p. 52, footnote, refers to the name of Shapur's mother by saying: "die erste Hälfte dieses Namens ist mir unklar". B. Geiger in Krauss 1955, pp. 58 f. explains **ʾyprʾ hwrmyz** as Farrah-Hormizd. The name suggested by Geiger actually occurs in Sasanian seals as **plxwʾwxrmzd**, Farrox-Ohrmazd, cf. Gignoux 1978, p. 147.

Bowl 3

Translation

(1) Healing from heaven to Mādar-Āfri daughter of (2) Anušay. May there lie in the dust the injuries of vows of every place (3) and every shaded place. And every evil thing, and whatever oppresses Mādar-Āfri daughter of Manušay, (4) the sorcery and the charms which are cast, (all) will be pressed and hidden in the earth before her (5) by the power of his army. "And it came to pass, when the ark set forward, that Moses said, Rise up, Lord, and let thine enemies be scattered, and let them ‹that hate thee› flee before thee" (Num. 10:35). **ʾqdd wʾbrʾ.** Amen Amen Selah.

be summarized as follows: some derivation from *frēh* "more"; some element connected with the preverb *fra-; āfrīn* "blessing"; or *farr(ah)* "fortune".[2] However, it seems likely that the name **ʾprʾ / ʾyprʾ** is connected with the name of the well-known Sasanian jurist and commentator, which is spelt **ʾplg / ʾplk,** and which has been commonly read Aparak.[3] This reading is not convincing, since it suggests a name derived from the noun for "robber" *(appar)*, though Abarag "superior" is also a possible interpretation. One would rather be inclined to think of a name *Āfar(r)ag* "Fortunate", with the preverb *ā* used in an auspicious sense.[4] Another possibility is the word *Āfurāg,* which could conceivably be attested also with a short *a* in the final vowel, for

[2] A summary of most opinions is given by Geiger in Krauss 1955, pp. 58 f. Cf. also the discussion in Goodblatt 1976, where the derivation from *frēh* is accepted.

[3] He is mentioned, for example, in *Mādigān ī hazār dādestān,* in Avesta commentaries, and in *Šāyast ne šāyast.* Cf. Perikhanian 1973, p. 562, s.v. Aparak. West 1892, p. 472, note 1, reads Afarg. Cf. also Tavadia 1930, p. 29, note 8 on 1.3b.

[4] One thinks of words like *āfrīn, āzād(ag), ābādān,* though they are all derivatives of verbal forms, which is not the case here.

"creator". This could of course be a reference to Ohrmazd, and we know that Ohrmazd is also a name of frequent occurrence. The latter explanation, even if it is not accepted as a solution for the name of the jurist, seems the most likely explanation for the name of Shapur's mother: Āf(u)rā-Hormiz, as well as the name on several magical bowls which may be read Āfrā, with an omission of the final consonant *-k/g*, just as we have the alternation Pāpak, Bābak with Pāpā, Bābā, etc.[5]

The name Mādar-'pry is however unlikely to be connected with any of the above names. The second element seems to represent either *āfriya* "beloved"; or *āfrī* as a variant on the nominal Middle Persian form *āfrīn* (Parthian *āfrīwan*) from the verb *ā-frī-*, the noun meaning "blessing"; or as a form of the present stem of the verb, in which latter case the compound *mādar-āfrī(n)* would mean "blessing (his) mother". The first alternative, reading Mādar-āfriy(a) "beloved to his mother" seems the more plausible one.[6] As a proper name, or as an element in proper names, *mādar* is not known so far either directly in Iranian or in other languages under Iranian influence. The more familiar forms Mama, Mamay etc. are quite widely attested.[7]

2 Anošay alternates, in line 3, with Manošay, an alternation which is not easy to explain, unless we regard the latter spelling as a contracted

[5] Cf. the names in the index to Montgomery 1913, p. 278. Nöldeke 1892, pp. 309 f., hesitated whether Pāpā is Iranian or Semitic. This hesitation is perhaps no longer justified, since we have it attested already in the Persepolis chert bowls in Aramaic and Elamite; cf. Bowman 1970, p. 130. One may also refer to Benveniste 1966, p. 17, who deduced the existence of Pāp as a variant Iranian name besides Pāpāk; cf. the remarks by Gershevitch 1969, p. 218, and the listing in Mayrhofer 1973, p. 133.

[6] For a final element *-friyā-* in Iranian names cf. Mayrhofer 1973, p. 202, No. 8.1116 Mišbapirriya, and Justi 1895, p. 371 Vispān-friyā. Both are feminine names meaning "beloved to all".

[7] Cf. Bowls 4:7 and 6:3 and the references in Montgomery 1913, p. 278 and Justi 1895, p. 189. Naveh, 1979b, pp. 21 f., has discussed the Semitic names denoting "mother", suggesting that they may be taken to be appellatives rather than proper names. One may refer in particular to Hermopolis **mmh** (cf. Naveh, art. cit., note 21). The ambiguity of this usage may be seen in Bowl 6:6. Nöldeke 1892, pp. 309 f. judged such names to be proper names. A seal published by Layard carries the inscription **lmmh**, cf. Lidzbarski 1902, pp. 137 f. and 97, note 3. It may be noted that the Armenian proper name Mam is derived from Persian *mām* "mother", cf. Hübschmann 1897, p. 50.

form of **mh'nwš(y)**, a name which is also attested without the final *-ay*.[8] We may then take both forms to be basically variants of the same name, freely interchangeable. The name **'nwš'y** and what seems to be its equivalent **mh'nwš(')y** is a feminine name of Iranian origin. It is possible to regard the final element, apparently *-ay*, as the very common ending of many Iranian names in the Aramaic tradition, an ending which is attested in both masculine and feminine names, and is thus similar in function to the ending *-oy*.[9]

The base element of Anušay is almost certainly *anōš*,[10] attested in New Persian *nōš, nōšīn* "sweet, pleasant", as well as in loan-words and loan forms of proper-names in Armenian *(anoiš)*,[11] in Syriac,[12] and in Arabic.[13] In the Aramaic magic texts we have the proper names **dwkt'nwš, bbnwš** (with variants **b'bnwš, bb'nwš**), **z'd'nwš**,[14] **kw'r'nwš** and **mh'nwš**.[15] Most or all of these names can be explained as compounds denoting "beloved by, sweet to —", with the first term referring in most cases to some close family relationship; daughter (perhaps meaning "the other daughter", i.e., the sister), father, son (cf. New Persian *zāda*),

[8] Cf. **'nš, 'nwšy** in Montgomery 1913, p. 274, and **mhnwš, mh'nwš** op. cit. p. 278. All occurrences are in Mandaic, partly from Pognon 1898, where, on pp. 101 f., Barthélémy's explanations are quoted. Montgomery 1913, p. 254, offers an impossible explanation of **mh'nwš** as containing the name Mithra. The names are also discussed in Nöldeke 1898b, p. 144. Cf. also Hamilton 1971, text 19, for the name **m'h'nw[š]** in Syriac.

[9] For this ending cf. Nöldeke 1888, pp. 413 ff. and 1898b, p. 145. Salemann 1930, p. 49, derives *-ōy, -ōya* from **-avya-ka-*.

[10] For a possible occurrence of this word in Pahlavi cf. Shaked 1979, pp. 254 f

[11] Cf. Hübschmann 1897, pp. 99 and 18 f. Earlier the word was identified with the term for "immortal", cf. Fr. Müller 1891, pp. 264 f., 356; Horn 1893, p. 30, No. 128.

[12] Cf. Gōšaqanōš, Hoffmann 1880, pp. 25 f.; Rādanōš, Hoffmann 1880, p. 68.

[13] Duxtnōš, cf. Nöldeke 1898b, p. 144. The name Anōšagzād is explained by Nöldeke 1879, p. 467 as "von Unsterblichem geboren"; he was actually the son of Xusrau Anōšag-ruwān.

[14] Cf. **'nwšz't'** in a Sasanian clay sealing, Gignoux 1978, p. 114, No. 10.30b. See also the preceding note.

[15] In Montgomery 1913, p. 218 (No. 29:5) we propose to read **mh'nwš** for Montgomery's **mt'nyš**. The same applies to Geller 1980, p. 49. In Jeruzalmi 1963, p. 160, there seems to be a name **mh'nš**.

sister (**kwʾr** may well be a contraction of Middle Persian *xwāhar*),[16] perhaps parents (*meh* "elder"). A similar impression is formed by some of the compound proper names containing *anoiš* in Armenian: Aršanoiš, Sahakanoiš, Smbatanoiš. In all of these cases the first element alludes to the name of the father of the dynasty. For the Mandaic names, Nöldeke 1898b, p. 144, suggests a conflation of the Iranian word with the biblical name Enosh, which became the name of a Mandaean genius. Against this theory one may note that the names containing this element are definitely Iranian, not Semitic, and that they are commonly attested also outside Mandaean texts.

ydmkwn: The verb **DMK** is attested in the Berlin bowl No. 2417; cf. Wohlstein 1894, p. 34, where the meaning is not pejorative as it is here, although the text is not quite clear. In the absence of a photograph or a drawing in Wohlstein, one can only guess what the text might read: **myty dbytʾ d[šky]byn bʾrʿh *wdmkyn bʾprʾ *qdḥw lkwn** "the dead of the house, who lie in the earth and sleep in the dust (or 'in the ashes'). Go away...". The whole of this unusual incantation is addressed at the dead who are asked to abandon the house of *Bābay son of **bydwn** (?) and resort to the house of Asmēn daughter of Iday. In Amulet 7:21–22 there is an opposition **DMK: NWM**, in which the latter means "to doze off", while the former means "to sleep properly".

ḥbyly nydrʾ: This combination could also possibly mean "bundles of oaths", though it has been the custom to translate the first term as "injury, harm" in the magic texts. Cf. also Mandaic **giṭria ḏhbila** (Lidzbarski 1909, p. 354, lines 32 f.; Yamauchi 1967, No. 22) "die Knoten des Verderbens".

3 **ṭlʾ:** The context suggests that we have here a contrast between **dwkh** "(open) place" and **ṭlʾ** "shade, shaded place", although this expression is so far unique in the magic texts. Montgomery 1913, No. 29:9, has the phrse **šydy bny ṭyly,** which he translated: "ghostly shades"; but this may rather mean "ghosts of shaded areas". By a different interpretation one may, however, connect **ṭlʾ** to the well-known term for a species of demons, usually called **ṭlnytʾ, ṭwlnytʾ.** In this case the sentence may be

[16] Nöldeke 1898b, p. 144 denies this explanation and regards the first element as *xwarrah*.

translated: "and every shade-spirit (**tl**ᵓ) and every evil thing which afflicts her..." (J.C. Greenfield's suggestion).

mydyᶜm dbyš wmᶜyq lh: A fairly close parallel for the usage is found in Gordon 1937, p. 87 (H:13) **wkl zyqyn wmzyqyn byšyn dymᶜyqyn lh l...**

4 **ḥršwt wᶜbdyn:** Cf. the sequence in Gordon 1941, p. 123 (5:4 f.) **kl ḥršy byšy wkl mᶜbd[y] tqypy dᶜbydyn bh wdmytᶜbdyn bh.** Cf. also our Bowl 12:III **wᶜbdt lḥršyn dy nḥšᵓ wᶜbdyn dprzlᵓ.**

wyṭmrwn: The verb has not been attested so far in the magic texts.

5 **bᶜwz gdwdhw:** A puzzling phrase, appearing in Hebrew in the midst of the Aramaic text and looking like a quotation from a sacred source, though no source has been identified.

whyhy byn...: A quotation from Num. 10:35, badly written. This verse is yet unattested in the magic bowls, though it is familiar from late Jewish and Samaritan magic.[17]

ᵓqdd wᵓbrᵓ: The second word looks like the name of an angel, cf. *Sefer ha-razim* 1966, p. 88, line 118. The two words could also be taken to be verbal forms in *afᶜel* from the roots **QDD** and **BRY,** meaning respectively "to penetrate" and "to soak through" (J.C. Greenfield's suggestion).

From Bowl 12a

[17] T-S AS 142.13; Schrire 1966, p. 131, No. 36. The words **qwmh yhwh,** deriving from the same verse, are quoted in Samaritan bronze amulets and other inscriptions; cf. Ben-Zvi 1970, pp. 179, 187 f., 193, 200; Kaplan 1967, pp. 158 f.

Bowl 4

The Hebrew University of Jerusalem, Institute of Archaeology, No. 1402

Plates 18–19: Figure 22

Inside the circle in the centre:

(1) חוב הדין א(א)א א (2) איסרא דקברא (3) אמן אמן סלא

Around the central design:

(4) פעיח פעויח מלכנא קלקלא מלכנא קלקלא מלא משמלא קליה די מצמדנא די סכת פדנא היך מג<ל>א (5) מחת ליה כליביה דפומיה לא יאימר וליביה {לא יאדע} לא יאידע אמי פת לילי הי לילי לילי יצב יצב בנן בנן (6) אף על פרטדוך ליטא לתהפכי חרשיא ולוטתא ומשקיפותא מין מחדד בר (7) ממא ומין {בת} ברזוך בת ממא ומין מחזידוך בר ברזדוך ומין קיימתא בת ק(בנ)י ומין נני (8) בר קימתא ומין ביתא בת ברזדוך ומין בחי חיא וקינין חיא למעבד חי פו(גריה)

In the centre is a drawing of a human face, perhaps with the body of an insect. Two ribbons are shown on the left side of the face, and what looks like three insect-like legs are at the bottom. Encircling this design are a number of figures, which include a serpent and two reptiles as well as a cross which ends at its four corners with circles.

We should like to acknowledge the intelligent help of Mrs. Ada Yardeni, who drew the script shown in Figure 22 and who made a number of important suggestions for the reading.

The text of the incantation contains a number of obscure expressions, and is not easy to make out. It may have been intended for protecting a tomb, if we take the expressions **ʾysrʾ dqbrʾ** and **lmʿbd ḥy pw(gryh)**, which open and close the incantation, in a literal sense. But the expression is

Bowl 4

Translation

(1–3) Again. This is »»»» the spell of the tomb. Amen Amen Selah.

(4) **pʿyḥ pʿzyḥ** I advise (?). A voice I advise (?). A voice fulfils (and) completes. The burnt (thing) which I attach, which (is) the coulter of the plough, like a sickle, (5) shall introduce into his heart, that his mouth shall not speak and his heart shall not know.

Immi the daughter of Lili who is Lili Lili. **yṣb yṣb bnn bnn.**

(6) She also curses Fratadukh, that you may turn away spells and curses and afflictions from Māhdād son of (7) Mama, from Barazdukh daughter of Mama, from Māh-ized-dukh son (!) of Barazdukh, from Qayyamta daughter of Kabnay, from Nanay (8) son (!) of Qayyamta, from Bita daughter of Barazdukh, from the houses of life and the livestock of life, to make his body alive.

common in incantations, cf. Commentary to line 2. **pwgrʾ** can of course refer either to a living body or to a corpse.

1 **twb** is a common opening word in Aramaic. It occurs, for example, in the opening of the text in Montgomery 1913, p. 121 (2:1): **twb ʾzlnʾ ʾnh**... Cf. also Rossell 1953, pp. 61 f.

»»»»: The second *alef* looks like yt, but ʾytʾʾ would not give any meaningful reading.

2 **ʾysrʾ dqbrʾ**: The idea of an incantation connected with a cemetery or a tomb is quite common; cf. Pognon 1898, p. 3. ʾysrʾ is a regular term for a magical spell.

4 The text begins with a series of magical combinations which cannot be precisely translated. It is not clear where this sequence ends, and the translation given of this line is largely hypothetical.

For **pʿzyḥ** one may compare **pʿzyʾl**, one of the names given to Meṭaṭron in the Hebrew Book of Enoch, cf. Odeberg 1973, Hebrew section p. 71 (48D: 1).

mlknʾ: We have translated the word as derived from **MLK** "to advise"; it could equally well be analysed as *malkā anā* "I am king", or *mālek anā* "I rule". See further in the Introduction, p. 27.

qlqlʾ: This formula occurs in Montgomery 1913, p. 178 (13:9), cf. also p. 181, and Epstein 1921, pp. 45f.; Levine 1970, p. 352. In Mandaic, cf. Pognon 1898, p.59 **qal qal**...; Drower 1945, p.173 **qal arqa dbakia uqal šumia.** In Ginza Left, Petermann 1867, I, 2, p. 117:7 f. we have **qal qala qala qala ḏtrin qalia šumit qala ḏtrin qalia ḏiatbia ubanin qal ruha uqal nišimta**...In T-S AS 143.12 we have **wmh qlh bšmyʾ ql ʾrʿ dgʿyt wql ʿmwdy šmyʾ ʾtprqw ʾlʾ qlh dkwnnwt kwnnwt kd nḥtyt mn šmy mrwmʾ lqlqlh lstmh wlṭmṭmh lbhy wʿyynyhy**..; Rettig 1934, p. 48 **qlh qlh drbw rbh.** There is a manifest tendency to play on the similarity of the word for "voice" and that for "corruption, spoiling". Cf. on this the note by E.S. Rosenthal in Lieberman 1974, p. 139, addendum to p. 51, where Hebrew **qwl** is shown to be used in the sense of **qlqwl** "disapproval, condemnation, abuse".

mlʾ mšmlʾ: A reading *mellē mašma<ʿ> lēh* "words he utters" might also be considered. Cf. Levine 1970, pp. 355 f. One wonders whether *ma-li-e mi-il-in-ni*, presumably *mālē milīn*, in the cuneiform Aramaic tablet from Warka, has any relevance. Cf. Dupont-Sommer 1942/44, p. 44, and Epstein's suggestion that the Talmudic idiom **mmly myly** "adversaries" be adduced. Cf. Epstein 1960, p. 11, n. 4; Gordon 1937/39, p. 106, n. 4. In Gordon 1934b, p. 324 (B:9) we have **ql myly myly.** It seems, however, best to read the two verbal forms as derivatives of **MLʾ**, i.e. *mālē mšamlē*, with the second verb taken as a *šafʿel* participle (cf. Brockelmann 1928, pp. 389 f.).

qlyh, as rendered here, refers to the following **skt pdnʾ** as a burnished iron. Other possibilities of interpretation exist. **qlyh** could be "his voice". The word **qly** (Kali) is attested as the name of an angel. Cf. Montgomery 1913, pp. 258, 262; Gaster 1900, p. 149 (=Gaster 1928, II, p. 1025); Schrire 1966, p. 130; **qlyʾ** in Gordon 1934b, p. 324 (B:1). The formula **ʾpypʾ qly qlylʾ** (T-S K 1.120) may belong here. In Montgomery 1913, p. 141 (6:11 f.) we have a similar word in a somewhat obscure

Fig. 22. The text on Bowl 4

context: **wnyzym bmyzm nḥšh nyzyl qlyh bgygly šmy' wnyhwy *dwryh *bsbb** [read so!] **š'wl *rymh** "and may he be bound by a muzzle of brass; may his **ql(y)** go in the spheres of heaven, and may his habitation be in the vicinity of the grave (and) of worms". Cf. also on this passage Epstein 1921, p. 34. The word **qlyh** is unlikely to be "his voice", as the context requires a pejorative sense. It is possible to think of the word **ql** "voice" in the sense explained by Rosenthal (cf. above, comment on **qlql'**), viz. "abuse, state of abjectness".

It is of course possible to divide the sentence in our bowl differently from the way done here. One other possibility is to read: **mlkn' qlql', mlkn' qlql', ml' mšml' qlyh**, which may be translated: "(His) wisdom (or counsel) is corruption, (his) wisdom is corruption, he fulfils and completes his abuse".

mṣmdn' could possibly be a word meaning "yoke" or the like.

skt pdn': For this expression cf. Jastrow 1950, p. 988, s.v. **sk'**. A similar expression was read by Cross 1973, pp. 126 f. in an ostracon from Heshbon.

hyk mg<l>': This seems the best solution to a puzzling sequence of letters. An earlier reading which was considered was ***ḥwkmt'**, regarding the *gimel* as a badly written *taw* (or as a scribe's error). This earlier reading would give the translation "shall introduce wisdom into his heart". However, the following phrase, "that his heart shall not know", does not go well with such an interpretation.

5 **mḥt**: The active participle of NḤT in *af'el*.

dpwmyh l' y'ymr wlybyh l' y'yd': The words **l' y'd'** were first written and then re-written under the spelling **l' y'yd'**, presumably because the first spelling might have sugggested a participle form, while the corrected one shows a *ṣere* in the first syllable, and denotes the imperfect. Babylonian Aramaic has numerous expressions in which the pair **lyb'**—**pwm'** go together, cf. e.g. Jastrow 1950, p. 686.

'my: This is the name of what seems to be a female demon, **'ymy bt rbq'**, associated with **lyly** and **mr**, the sons of **'ymy**, in the Berlin bowl No. 2416, cf. Wohlstein 1894, p. 11; Stübe 1895, p. 22; cf. Wohlstein 1894, pp. 20 f., who quotes Bavli Pesaḥim 112a, where Immi may well be the name of a female spirit. Here Immi is the daughter of Lili, the latter being perhaps a variant on the name Lilith. Immi is of course also mentioned as a regular human proper name. Cf. Gordon 1941, p. 12 (4:2) reproduced in Isbell 1975, p. 97; Gordon 1937, p. 93 (L:11), reproduced in Isbell 1975, p. 127.

6 **prṭdwk** is an Iranian name which occurs here for the first time. The name may be explained as Frāta-, cf. Old Persian Frāda (cf. lately Mayrhofer 1979, II, 20), though the spelling with **-ṭ-** is problematic. It may alternatively be connected to Av. Parāta-, cf. Bartholomae 1904, p. 856, or to *Frahāta-, cf. Justi 1895, pp. 101 f.

lthpky: The form is unclear. One would have expected a **d-** at the beginning, instead of the **l-**; the latter may be merely a scribal error for **d-**.

mšqypwt': An unusual form for **šyqwpt'**, **'yštqwpt'**.

Māhdād occurs also in B.M. 91710, cf. Layard 1853, pp. 437 f. (Ellis 1); Schwab 1890, pp. 299 f.; Montgomery 1913, pp. 168 f.; Jeruzalmi 1963, pp. 65 ff., in line 3, where it was wrongly read by previous editors.

For Sasanian seals, cf. Bivar 1969, p. 70, No. DB2; Gignoux 1978, p. 27, No. 3.11; p. 88, No. 4.11b. Other attestations are listed in Justi 1895, pp. 185 f. Cf. also Hinz 1975, p. 156 s.v. *māhīdātā-; Gignoux 1979, p. 69.

7 For Mama, cf. above, note 7 to Bowl 3.

myn bt brzdwk bt mm³: The first **bt** is surely a scribal error.

brzdwk: This reading was suggested by Mrs. Yardeni. The name is probably to be vocalized Barāz-dukh, associating it to the common Iranian proper name Warāz/Barāz, for which one may refer to Justi 1895, pp. 348 f.; Mayrhofer 1973, p. 190, Nos. 8.965, 967 ff.; Hinz 1975, p. 255; and to **wl³cdwxty** in ŠKZ, cf. Gignoux 1979, p. 87. The alternative reading **brwdwk** seems less likely both palaeographically and as an Iranian name, though it could be compared to the name **brd³kt** in the Syriac bowl published by Hamilton 1971, pp. 121, 159 ff. and Geller 1976, pp. 422 f. A proper name Bāra seems to be attested at a very early time. Cf. Grantovskij 1970, pp. 216 f.; Hinz 1975, p. 63. It is to be noted that on the Syriac bowl the suffix *-duxt* is spelled **-d³kt**, cf. also **šhd³kt**, and possibly also **mhgwšnyd³(k)t**, though this latter name is read by Geller **mhgwšnwd³yt**. The spelling **-d³kt** betrays an *-o-* pronunciation for long Syriac *-ā-*, as in Western Neo-Syriac, for which one may refer to Nöldeke 1898, p. 5, §4. Hence it may be deduced that the spelling **-d³kt** indicates a pronunciation *-doxt* for the ending of these Persian names, not unlike the usage of Standard New Persian for original short *u* vowels.

mḥzydwk: This name is unattested so far. It might seem possible to explain it by referring to the suffix *-čya-* in Old Iranian, which may give a form *Māhī-čyă-, perhaps a form of endearment from the word for Moon, which is also the name of a deity. The Elamite proper name Bakizza (etc.), which is reconstructed as Iranian *Bagaiča- (cf. Mayrhofer 1973, p. 138, No. 8.229; Hinz 1975, p. 56) may be compared, as well as the place name Bagiziš from hypothetical *Bagaičya- (Hinz 1975, p. 56), which are assumed to be "Koseformen" derivatives from the divine name Baga. A similar explanation has been proposed for Elamite Takaziya from Iranian **taxmačya-* (Hinz 1975, p. 232); cf. also **tigračya-* in Hinz, p. 236; **kafačya-*, op. cit. p. 144; *maryaičya-*, op. cit. p. 174.

However, a simpler solution offers itself and seems preferable. One could read the name as Māh-ized-dukh, assuming the omission of a *yod* after the second letter, and the quite common haplography of *dalet*. The deity Māh-izad or Māh-yazad is quite well known in the Manichaean

texts. Cf., e.g. Andreas and Henning 1932, p. 220, s.v. **mʾhyzd.** The spelling **yzyd** for the second part of this compound name is not surprising. In Mandaean we have both **yʾzyd** and **yzyd** as a name, cf. Pognon 1898, p. 99, taken by this scholar to be the similar-looking Arabic name Yazīd, cf. pp. 14, 103, and claimed by Montgomery 1913, p. 277, to be an unexplained Aramaic name. What proves **yzyd** to be the Iranian name Yazed is the compound form **yzydʾd** "Created by Ized", Montgomery 1913, p. 150; Justi 1895, pp. 147, 149. In Arabic, Ṭabari III, p. 371, we have the spelling **ʾzdʾd;** in Syriac (Assemani III, 226; cf. Justi, p. 149), **yzydʾd,** both for Yazed-dād. The spelling **yzyd** for Ized occurs also in early Judaeo-Persian, cf. in the Dandan-uiliq letter, Utas 1968.

For the haplography of the *dalet* one may refer also to the name **ʾyzdwk**=Izad-dukh in our Bowl 11. It is quite likely that **myrdwk** in Montgomery 1913, p. 152, is not Mithra-dukh, as stated there, but

Bowl 5

[1] **mn:** written **bn.**

rather Merd-dukh, from the Iranian word *mard/merd* "man".

mḥzydwk br brzdwk, like **nny br qymt'**, share the peculiarity that the name of a woman is followed by **br**, and not by **bt**. The same confusion of genders occurs in Geniza 3:6,10.

qbny: The reading is uncertain. The name obtained could be compared to the widely attested name **kpny, kpn'y**. Both our **qbny** and **kpn(')y** might be variant forms derived from a noun meaning "small, little", like the Aramaic name Zuṭra and similar names. Kabnay could be derived from Old Iranian *kamna-*, cf. Bartholomae 1904, col. 440. This old Iranian element has been used by Benveniste 1966, pp. 85 f. for explaining the Elamite forms Kamnakka, Kampiya, though the explanation has not been widely accepted (cf. Gershevitch 1969, p. 198, and Mayrhofer 1973, pp. 174 f.). A Middle Persian name which may belong here occurs on the Paris seal 3.31, where the reading is uncertain. Cf. Gignoux 1978, p. 30.

Bowl 5

Translation

(1) [By] your name I make this amulet that it may be a healing to this one, for the threshold (of the house... (2) and any possession which) he has. I bind the rocks of the earth, and tie down the mysteries of heaven, I suppress them... (3) I rope, tie and suppress all demons and harmful spirits, all those which are in the world, whether masculine or feminine, from their big ones to (4) their young ones, from their children to their old ones, whether I know his name or I do not know it. In case I do not know the name, it has already been explained to me at the time of the seven days of (5) creation. What has not been disclosed to me at the time of the seven days of creation was disclosed to me in the deed of divorce that came here from across the sea, which was written and sent to Rabbi Yehoshua' bar (6) Peraḥya. Just as there was a lilith who strangled human beings, and Rabbi Yehoshua' bar Peraḥya sent a ban against her, but she did not accept it because he did not know her name; and her

This is one of a group of three bowls donated recently to the Israel Museum by members of the family of the late Mr. Alqanayan, a collector and businessman in Iran, executed by the revolutionary regime of Khomeini on the charge of supporting the State of Israel. Bowls 5–7 in the present publication are from the Alqanayan collection. Bowl No. 5 contains eight lines of inscription written spirally from the centre. The text is quite close to that of Montgomery 1913, Nos. 8 and 17, where the sage Yehoshuaʿ bar Peraḥya is also mentioned as having issued a letter of divorce to the demons.

1 For the reading of the opening formula compare for example Wohlstein 1894, p. 27 (No. 2426, line 1): **mšmk ʾny ʿwš ʾ hdyn ʾswtʾ nṭrtʾ *wqywmtʾ**,[2] "By your name I do this healing, protection and preservation". Wohlstein's formula may be compared in its turn to a Syriac incantation first published by Montgomery 1917/18, and again by Hamilton 1971, p. 99a: **mzmn hnʾ qmtyh** (for ***qywmth?**) **kbšʾ wʾswrʾ wḥtmtʾ wnṭrtʾ dbytʾ dyly** ... "Designated is this preservation (or 'oath'), spell and bond and sealing and protection of my house ..."

For our opening formula compare also Wohlstein 1893, p. 328 (No. 2422, line 1): **byšmk ʾny ʿwšh ʾswtʾ mn šmyh** l..., and Gordon 1941, p. 119 (2:1): **lyšmwk ʾny ʿwšh ʾswtʾ mn šmyʾ tyhwy** l..."By your name I do (this amulet). May there be healing from heaven for ...". In

[2] Wohlstein read this **whyy mtʾ**. Our emendation is conjectural without seeing the original. **qywmtʾ**, like **ʾswtʾ** and **nṭrtʾ**, may refer to the amulet or incantation itself. In that case we may translate it by 'oath', cf. Jastrow, p. 1356. For **qaiamta** "Festigung" in Mandaic cf. Lidzbarski 1920, p. XXIV.

name was written (7) in the deed of divorce and an announcement was made against her in heaven by a deed of divorce that came here from across the sea; so you too are roped, tied and suppressed, all of you under the feet of this Marnaqa son of Qala. In the name of (8) Gabriel, the mighty hero, who kills all heroes who are victorious in battle, and in the name of Yeho'el who shuts the mouth of all [heroes]. In the name of Yah, Yah, Yah, Sabaoth. Amen, Amen, Selah.

Montgomery 1913, p. 183 (14:1) we have the enlarged formula: **byšmk ʾny ʿwšh yhwh ʾylhʾ rbʾ hdyn ksʾ nyhwy lḥtmtʾ l...**"By your name, YHWH the great God, I do this bowl. May it may be for the sealing of..."[3]

The absolute form **ʾsw** is rare, though not unattested. Cf. Jeruzalmi 1963, p. 128 (5363:1–2): **dyn qmyʿ dyhwy lʾsw l...**; and p. 141 (5366:1–3): **lyšmk ʾny ʿwšh hdyn ktbh yhwy lʾsw lbyth dkwrkšyd[4] lh wlʾtth[5] wbnh...**"By your name I do this writing . May it be for healing to the house of Xwarxšēd, to him and to his wife and son...".

2 The phrase **kptynwn lkypy ʾrʿh** corresponds to an incantation text on a printed amulet (Warsaw 1867; Fig. 21 on p. 133), where we have עינא דכל עיינין בישין אתכפיין ואתטמרין מן קדמוהי גו כיפין. A similar text occurs in Hanauer 1907, pp. 318 ff. Cf. also in a Mandaean magic text **arbikuk uširiuk ʿl kipia ḏprat udiglat** (Drower 1937, p. 593, after line 190) "They have made you kneel and set you on the banks of the Euphrates and the Tigris". It is doubtful whether the phrase **kypy hqšt** (Odeberg 1928, Hebrew text, p. 36, ch. 22c:4, 6, 7) has anything to do with our text. The most likely interpretation for our **kypy** is that it is connected

[3] Isbell 1975, p. 39, is right in saying that there is no need to supplement **hdyn ksʾ** before the first word of the formula, as is done by Montgomery.

[4] This proper name should be read thus, viz. Xwarxšēd, meaning in Middle Persian "Sun" (cf. NPers. *xuršīd*), with the preservation of the cluster -xš- in the compound. The same name occurs also, unrecognized, in Gordon 1941, p. 342 (British Museum 91776): **ʾnʾ hw *kwrkšyd gwšns br dwstʾy...** The name was transliteated by the editor **kwrbšyd.**

[5] The last two words were not read correctly by Jeruzalmi and Isbell 1975, No. 70:3.

with the Aramaic word for "rock, stone". A play on the similarity of the sounds of the verb **KPT** and the noun **kypy** may have been intended. The difficulty of the translation is caused mainly by the fact that "the stones of the earth" does not give a very good parallel in sense to "the secrets of heaven ". In line 7 **kypy rglh** is apparently a different word.

4 **dʿrdqyhwn** has a parasitic *ʿayin*, which is of quite frequent occurrence in Babylonian Aramaic. Cf. e.g. **kʿkʾ** from Persian *kāk*, for which cf. Fraenkel 1886, p. 35. This phenomenon may well be the reverse counterpart of the frequent loss of *ʿayin* in Babylonian Aramaic, for which cf. Rossell 1953, p. 17; Epstein 1960, p. 18. The particular form of **dʿrdq** is however better explained as a contamination of two attested forms of the word, **drdq** and **dʿdq**, both connected with an original form **dqdq**, cf. Syriac *daqdqā*.

For the formula **byn...byn** cf. in Gordon 1941, p. 125: **bn dmyštdryn wbn dlʾ mštdryn.**

5 **mšbʿt ywmy brʾšyt:** A frequent Hebrew idiom, though usually the formula is **mššt ymy brʾšyt** "from the six days of creation ", e.g. Bavli Ketubbot 8b, and so it is in Montgomery 1913, p. 170 (11:9): **mn ywmy ʿlmʾ wmyššt** (!) **ymy brʾšyt.** The Mandaean parallel adduced by Montgomery, ibid. from Lidzbarski 1902, p. 104, has: **mršʿšat šit iumia brišit** "vom Uranfange an, seit den sechs Tagen des Uranfanges".

On the *geṭ* formula in incantation texts cf. Montgomery 1913, pp. 159, 179; Gordon 1934, p. 469; Levine 1970, pp. 348 f. The deed of divorce which comes "from across the sea" (**mʿbr ymʾ**, or **mn ʿybr ymʾ**) occurs in Montgomery 1913, Nos. 8 and 17, in both cases associated with Joshua b. Peraḥya.

For Joshua b. Peraḥya cf. Montgomery 1913, pp. 226 ff. Joshua b. Peraḥya occurs in fragments of the Jesus story published by Krauss 1911a (correcting Adler 1911), and further in the fragment recently published by Falk 1978; cf. also Boyarin 1978. A late Kabbala fragment also refers to the role of Joshua b. Peraḥya in the Jesus story; cf. Krauss 1911b.

6 **hhyʾ lylytʾ dḥnqʾ lbny ʾynšh:** Cf. the Mandaean text in Lidzbarski 1902, p. 102: **lilita...diatba bbaitḫ ubʿsqupta dbaitḫ ḏ...uma[hi]a ugaṭla ušaqpa uhanqa dardqia udardqata.** Parallels to this are conveniently given in Gordon 1934, p. 468. Amulet 15 and Bowl 12 provide further examples for the demon who kills children.

The feature which occurs in this incantation for the first time is that the ban imposed by Joshua b. Peraḥya was at first invalid because he did not know the name of that lilith, and only afterwards her name was written in the *geṭ*. In Montgomery 1913, Nos. 8, 11 and 17, the full parentage of the lilith is specified, as is legally appropriate.

mḥmt dlʾ hwʾ dydʿ šmh: In **dydʿ** the first letter seems to be superfluous. The phrase may alternatively be translated "because there was no one (read: **dlʾ hwʾ** ‹**mn**›) who knew her name".

7 **kypytwn** stands for **kpytytwn**, passive participle plural masculine of *peʿal* + the subject suffix of the second person plural masc: **kpytyn** + **ʾtwn. kbyštwn** is written for **kbyšytwn.**

8 **bšwm gbryʾl gbr tqyp dqṭl kl gybry kwlhwn:** This phrase is reminiscent of Montgomery 1913, p. 127 (3:2–3) **wytrḥq mynyh dywʾ byšʾ wstnʾ byšʾ dmytqry ṣpʿsq ʾbdh gbrʾ dqṭyl gbrʾ mylwt ʾyttyh wʾytt ʾ mylwt bʿlh**..."And may there depart from him the evil demon who is called **ṣpʿsq ʾbdh**, the hero who kills a man from the side of his wife and a wife from the side of her husband..." Montgomery reads *abbādā gabbārā* "the Mighty Destroyer", though the first word is nowhere attested in Aramaic. It seems possible that **ṣpʿsq ʾbdh**‹**g**› are two names which follow the same principle: in both cases we have a sequence of letters from the alphabet, the first one in a reversed order, and with *qof* coming at the end and out of order. In the second case the *gimel* seems to have been omitted (perhaps by haplography with the following **gbr**). Thus we may reconstruct the two names as badly written for **qṣpʿs ʾbgdh.** Cf. Gaster 1896, p. IX, line 25 **ʾbgdh**ʾ.

The play on the element *geber* in the name Gabriel occurs already in Daniel 8:15–16. The epithet *gĕbar taqqīf* (or *gibbār taqqīf*) may well be an etymological *midrash* on Gabriel, the two words rendering its two parts.

yhwʾl: The alternative reading of this name, **yḥyʾl**=Yeḥiʾel, proves upon inspection to give a non-existent name of an angel. Cf. Greenfield 1973, p. 156, n. 40 for a correction to Montgomery 1913, p. 207 (25:4). Cf. also Yo'el in Amulet 11:8 and in Shachar 1971, p. 289, No. 974 (a late amulet).

For the provenance of this bowl see Bowl 5.

1 **lštwqy wlskwry** are regular Babylonian Aramaic infinitive *pa"el* forms. In line 5, however, we have **lštqʾ** in the same function.

2 For the name **bryk yhbyh br mmʾ** cf. the nearly identical name **bryk yhbyh br mʾmy** in Montgomery 1913, p. 209 (26:4). We have transcribed the first name as a composite: Bĕrik-Yehabyah. An alternative reading

Bowl 6

Translation

(1) Mystery. This mystery is for silencing and shutting the mouth (2) of all evil and violent people who stand against Bĕrik-Yehabya son of (3) Mama. Peace be on thee, a city whose population is very numerous, whom I have not created, and whom I love, (4) and whom I call the mighty of the earth. In the same way as you have eyes but do not see, as you have ears but do not hear, so shall you give me (5) a stone from you to silence from me, I, Bĕrik-Yehabya son of Mama, the mouth of all people who stand against me, as well as the mouth of (6) Dād-gušnasp son of his mother. And the men and women, boys and girls, who stand against me, I, Bĕrik-Yehabya son of Mama, may they be (7) mute in their mouths, blind in their eyes, deaf in their ears, mournful in their hearts, sick and corrupt, for the fifty years of the jubilee, for the seven years of the *šemiṭa*, for (8) the thirty days of the month, for the seven days of the week, on the Sabbath, the full moon, and the day of the new month.

In the name of Ḥadriel, *Šakniel*, the well, the stone, and the pit, I adjure you, I adjure (9) you, in the name of he who is great and frightful, that you may silence from Bĕrik-Yehabya son of Mama the mouth of all people who write books, who sit in forts(?), who sit in market places and in streets, (10) and who go out on the roads, so that their tongues should cleave to their mouths and that they should not speak evil words against me. In the name of He who commanded and it came into being. Amen, Amen, Selah.

may be to regard this name as analogous to the Syriac name Bĕrik-ṣebyānēh, who is attested as the father of Mar Abbā (cf. Chabot 1898, p. 313, note 1): "His will be blessed". In this case we may read Bĕrik-yĕhabēh and translate "His share/load be blessed".

Montgomery (op. cit.) conjectured that **yhbyh** is a way of writing the divine name **yhwh**, an appealing suggestion which lacks proof. It is true that there is a whole series of divine names such as **yhbyh** (Amulet

4:33; Stübe 1895, p. 22, line 15; Gaster 1896, p. IX line 16), **yhwbyhw** (Montgomery 1913, p. 146, No. 7:8), **yhwh byh** (Montgomery 1913, p. 178, 13:7), **byh byhy** (T–S K 23.3, line 5), **ʾl bʾl** (Amulet 11:9), but Montgomery himself makes the more acceptable suggestion that they reflect a phrase such as Yah-in-Yah. Our name could indeed be rendered "Blessed is Yah-in-Yah". It may be recalled that Psalms 68:5 gives God's name as **byh,** and this verse is quoted e.g. in the Geniza text T–S K 1.68, line 10; Montgomery 1913, p. 154 (8:12), if the reading in Isbell 1975, p. 44, is correct. The divine name **byh** is apparently also attested in Stübe 1895, p. 22 line 6: **mlʾkh dbyh.**

One may incidentally observe that Yah-b-yah is also associated with Bahaot, Abaho. which Scholem 1974, p. 421, has adduced in his attempt at explaining the gnostic name Ialdabaot as composed of Yaled-Abaot "Begetter of [S]abaoth"/"of Abaoth". We thus have **wbyšmyh dyhbyh bʾ(ḥʾwt) yhw yhw ʾlhy** (Stübe 1895, p. 22, lines 15 f.), paralleled by Montgomery 1913, p. 146 (7:8 f.): **bšwm yhw byhw wʾbhw rbh.** It is possible similarly to reconstruct in Gaster 1896, p. IX, line 16 **yh byh *byʾwṭ yh hwh,** by simply dividing the words differently. That this name was indeed the functional equivalent of Sabaot in Aramaic incantations can perhaps be shown by a quotation from a Geniza text: **ʾdwn byh byhy yh yw yhw bh ṣbʾ** ʾwt ... (T–S K 23.3, line 5). The conglomeration of names here also presents a sequence Yah-b-Yah(i)...**bh *ṣbʾwt.** Whatever the explanation which prevails for the first part of the compound Ialdabaot, Abaot or Baot can thus be shown to be attested in Semitic, and more explicitly in Jewish magical practice as well.

3 For the name Mammā "mother" cf. above, Commentary to Bowl 3, note 7.

The formula **šlm lyky mdyntʾ dʿmyh sgy sgy** is interesting and quite unusual. The idea is vaguely reminiscent of Jonah and the story of the gourd, where God says to Jonah (4:9): "Are you so angry over the gourd?" Jonah answers positively and God says: "You are sorry for the gourd, though you did not have the trouble of growing it.... And should not I be sorry for the great city of Nineveh, with its hundred and twenty thousand persons who cannot tell their right hand from their left, and cattle without number?" The statement that this is a city with many inhabitants and the further motif that the speaker did not create them are shared in both sources.

4 The term **gybryh d'r'h**, though reminiscent of Nimrod's epithet *gibbor bā-āreṣ* (Gen. 10:8), is quite curious. The epithet *gibbār(ā)* is sometimes used in the magic bowls for negative beings. We thus have **dyw' byš' wstn' byš' dmytqry ... gbr' dqtyl gbr' mylwt 'yttyh ...** (Montgomery 1913, p. 127, No. 3:2f.), and the rather ambiguous **dtmḥyn bṭwpry lybky wbmrnyth... dqtrys *gybr'...** (Gordon 1934c, p. 468, G:4), where the parallel texts describe this personage as having power over the demons (cf. the parallels printed by Gordon, loc. cit.). A series of "good" angels are described as **gbr' ml'kh** (Gordon 1934b, p. 331, where Gordon's texts E and F are printed in juxtaposition with the bowl published by Hyvernat).

In our text the status of the beings addressed as *gibbārayyā d-ar'ā* or with the pronominal suffix: *gibbārah d-ar'ā*, is also quite ambiguous, though their support is sought.

The phrase "you have eyes but do not see, ears but do not hear" is reminiscent of Ps. 115:4–6.

6 **'ymh** is written with a different stylus, and was probably added later. If our translation "Dād-Gušnasp son of his mother" is correct, it may be surmised that the writer's first intention was to adhere to the formula of quoting the mother's name in an incantation; but since Dād-Gušnasp is an adversary who is being cursed, it was not possible to enquire his mother's name of him, and so the vague formula "his mother" was subsequently added. An alternative reading would be to regard **'ymh** as a proper name Imma; see above Commentary to Bowl 3:1 and note 7 there.

hwn is act. part. m. pl.; cf. Morag 1973, pp. 68–70.

6–7 **yhwwn 'ylmyn bpwmyhwn smn b'ynyhwn** etc.: Cf. **skyryn pwmhwn ... w'wryn 'ynyhwn wmtršn 'wdnyhwn** (Gordon 1941, p. 124, No. 6:1; also Isbell 1975, p. 102; earlier published in Schwab 1886, and in Schwab 1890, pp. 331 ff.).

7–8 The sequence of time designations has a number of parallels in the magic texts. Cf. Gaster 1896, p. XXVI, lines 15f.; Montgomery 1913, p. 141 (6:5–6).

ks' wryš yrḥ': The present context makes it clear, by the contrast of **ks'** with **ryš yrḥ'**, that the first term means "full moon", as it indeed does in the Bible and in Syriac. On the other hand, the Rabbinic explanation of the term, in connection with its use for the New Year, associates it with

the new moon; cf. *Encyclopaedia Biblica,* IV, col. 216, s.v. *kese;* III, col. 35–41, s.v. *ḥodeš*. It may be remarked that *šabbĕta* could also be argued to belong to the same category as *kese* and *reš yarḥā* as its original Babylonian meaning was "the full moon" (cf. *Encyclopaedia Biblica,* VII, col. 511, s.v. *šabbāt*). At this historical stage, and in the present context, this explanation would seem to be very far-fetched.

Ḥadriel seems to be attested once in the bowls, in Stübe 1895, p. 22, line 6. The name is also mentioned in *Sefer ha-razim,* p. 81 (2:12). For further references cf. Schwab 1897, p. 109; Margaliot 1945, pp. 50 f.

Šakniel is not hitherto attested in the bowls. His name occurs in *Sefer ha-razim,* p. 75 (1:152), and in Kabbalistic literature (cf. Margaliot 1945, p. 194).

wbyr w'bn wbwr: This sequence of words, with evident magic meaning, is not clear. The second word could possibly be read **w'kn,** perhaps for Jewish Aramaic **'kn, ḥk(y)n'** "snake". If this is correct, the phrase could have something to do with the famous theme of the *ḥuldā*

Bowl 7

כמיפל חיסיא מן טורא כמיפל חיסיא מן טור טורא ויכמבסק גובתא מן דיחלא

and the *bōr*, the two objects certain people believe in (cf. Bavli Taʿanit 8a). The elaboration on this theme, according to which they are to constitute two mute witnesses to a betrothal, is set forth in commentaries on the text. Cf. *Oṣar ha-Geʾonim*, Taʿanit, Perušim, p. 57 (reference kindly supplied by Prof. M.D. Herr).

9 **rbʾ wdḥylʾ**: Cf. Commentary to Amulet 1:8.

dtyštqwn: The verb, to be vocalized *d-tĕšattĕqūn*, is evidently in the *paʿʿel* form.

ʾqry is taken here to be the plural of **ʾqrʾ** "fortress", with the omission of the preposition **b-**. Otherwise it could be connected to **qryt'** "town, village".

ytby šwqy qrntʾ is reminiscent of the expression *yošḇē qrānōt;* in our bowl we may have two separate expressions: **ytby šwqy** and **ytby qrntʾ**, which have merged. Cf also Harviainen 1981, p. 5, line 7: **lyḥš dqrntʾ**.

10 **ydbwq** Cf. Ps. 137:6 תדבק לשוני לחכי

Bowl 7

Translation

(1) Appointed is this incantation against (?) the name [of] Maroy son of (2) Batay, who is called Ababay son of Abdimi and all (other) names (3) that he possesses. There has happened, has happened, in the world an evil accident and a perdition(?). There has happened to him that the fire (4) has happened in the ditch and the fire came out of the bitterness of tombs and from the darkness.

(5) **šḥwṭyn wšgryn ʿymw šyr ḥṣwṣr pʿl bn lʾ**

I have brought you, I have led you and I have sent you and I have dispatched you (6) and I have conveyed you [against] Maroy son of Batay [and] against every unnamed Belti.

Do not be afraid to shout. Fall upon him (7) as rocks fall from the mountain, as rocks fall from a high mountain, and as the hill rises from that which is sand (?), and as the sun shines (down) unto (8) the earth.

Bowl 7

ויכמדנח שימשא עד (8) {אר} ארעה פולי עלוהי איכולי מן בישריה ואישתאי מן דמיה
דחלי ומררי בשום דיליד ומידחלא עיש אליון (9) כד עבד אישתא וינרג לא שמיה אמן
אמן עלחר

For the provenance of this bowl see Bowl 5.

1 **ʿl šmyh** has been translated as "against the name of", taking Maroy bar Batay to be the adversary. This assumption entails the hypothesis that **ʿl** was inadvertently omitted by the scribe before the name Maroy in line 6, but this is quite uncertain, as are many other points in this rather obscure text. It must be emphasized that we regard certain portions in the translation of this text as mere guesswork. A case could also be made for taking Maroy bar Batay as the client, for whose protection the bowl was wrtiten.

2 Abdimi is known as the name of several Palestinian Amoraim. The *resh* which is written before the name is pure dittography for the final letter of *bar*. The abbreviation *resh* for *rabbi* is never attested in this period.

šmn is a short form for the regular **šmhn**, the absolute plural form.

3 The translation "perdition" for **ʾkly** assumes that it is related to Hebrew *kĕlāyā*. The phrase **qry qry** etc. contains several ambiguities, which may have possibly been intended as puns. An alternative translation could be: "There has been called, called, in the world an evil call and cry". **ʾkly** may be associated with **ʾklywt**, which in the Targum of Psalms 104:7 renders *raʿam*, and in the Targum of Job 4:10 stands for *šaʾăgā*. Cf. Tal 1975, p. 91, s.v. **ʾkly**.

qyryt is probably the orthography for *qeryat*. Cf. Epstein 1960, p. 95 and note 254, where the Mandaean form **myṭyʾt** is quoted.

4 **kyryt** could mean, following the meanings of Jewish Babylonian Aramaic **kyrh** or **kryʾ**, either "digging, ditch"; "heap, pile"; or "circle, banquet". The most likely translation may, however, be "a stove", which is only attested in Hebrew.

ʾmyt seems to stand for **ʾmyṭṭ** or **ʿmyṭṭ**; cf. Syriac ʿMṬ. The image of fire coming out of darkness is quite unusual.

Fall upon him, eat from his flesh, drink from his blood, frighten and afflict.

In the name of he who gives birth and frightens, **ʿyš ʾlywn,** (9) while he makes fire, and the unnamed Nereg. Amen, Amen. Immediately.

5 **šḥwṭyn wšgryn** etc. constitutes a strange sequence of words, which we are unable to translate. The first two could be from the verbs **ŠḤṬ** "to stretch; corrupt (as in Syriac); slay an animal", and **ŠGR** "to flow; run; heat, kindle; send".

ʾytky is evidently for **ʾytytyky.** The accusative in this and the following verbs refers to a feminine object, apparently the fire.

6 "The unnamed Belti" is an unusual appellation, but it corresponds in this text to "the unnamed Nereg" in line 9. In both cases, although the combination **lʾ šmyh** is not usual for this kind of expression, there seems to exist hardly a different alternative for translation. On Belti one may refer to Lidzbarski 1916, p. 1217; Février 1931, pp. 64 f.; Du Mesnil du Buisson 1962, pp. 359 f., where (p. 360) it is stated that Belti is not a genuine name: "Le 'vrai nom' de la *Bēltī* à Palmyre est Atargatis ou Astarté". Since Belti is not the "real name", it is possible to understand how an "unnamed Belti" could be alluded to. In a Jewish context of magic we have Belti Adonay in Gaster 1896, p. VIII, line 20.

wlʾ tydḥly mṣwḥ: The last word is the absolute infinitive of *peʿal.*

7 **kmypl ḥysyʾ mn ṭwrʾ:** A parallel expression in Gaster 1896, p. XVIII, lines 27 f., clarifies the phrase. It says: **wʾm npl ʿlk ḥysyʾ ʾw mplh wʾt tḥwtyh.** Gaster's translation (op. cit., p. 188), "If any burden or weight falls upon thee", is inaccurate. The term *mappālā* is certainly to be connected with Hebrew *mappolet* "falling in, debris" (cf. Jastrow, p. 820). **ḥysyʾ,** as can be seen from the bowl text published here, must mean stones or rocks. Gaster's text might be translated: "If rocks or debris fall on you and you are buried underneath".

ṭwr ṭwrʾ is an expression which imitates *hor hahār* in Hebrew.

wykmbsq may be an error for **mnsq,** or **mysq,** the infinitive of **SLQ.**

For **gwbtʾ** cf. Jewish Babylonian Aramaic **gwbbtʾ, gwpptʾ** etc. The word **gwbtʾ** could also possibly mean "pit", like **gwbʾ,** but its connection in the sentence would then be obscure.

mn dyḥlʾ: On the face of it, one would be tempted to translate here "out of fear", but this would make little sense in the context. We have read **dyḥlʾ** as containing the relative **d-+ḥlʾ** ("sand"). By a slight emendation one may suggest reading **by ḥl(t)ʾ** as in B. Shabbat 110a. The phrase would then mean "as the dunes arise from among the sand(s)".

wykmdnḥ šymšʾ ʿdʾrʿh: One would have expected **ʿl** instead of **ʿd**.

8 "Eat from his flesh" etc.: The idea is not uncommon in incantation

	5	בר פאלי מן		5	יומא [ד]נן ועד
	6	יומא ד[נן ול]עלם		6	לעלם אמן אמן
	7	אס[ריא עינ]א		7	סלה

texts, cf. Naveh 1975, pp. 48 (lines 18–22), 51.

ylyd is apparently active participle of *pe'al* and **wmydḥl'** is presumably active participle *pa''el*.

'yš 'lywn looks like a corrupted spelling of Hebrew *'īš 'elyōn*.

9 **'ltr** presents a form closer to *'al-atar* than the usual Jewish Babylonian Aramaic *l-altar*. Compare Geniza 2, p. 2:13, **bpry'**, which also occurs at the end of a magic text, after "Amen, Amen".

Bowl 8

Translation

I
Bound are the demons, sealed are the dēvs, bound are the idol-spirits, sealed are the evil liliths, male and female, bound

II
bound is the evil eye away from the house of Khwadāy son of Pālī from this day to eternity. Bound is the evil eye

III
Bound is the evil eye from the house of Khwadāy son of Pālī, from his house and from his..., (and) from

IV
...and from Ādur-dukh and from her sons from this day to eternity. Amen, Amen, Selah.

This bowl was first published by Narqis 1935, with some notes added by the editor of *Tarbiz* at the time, J.N. Epstein. It is here published again so as to complete the collection of magic bowls in Jerusalem, and because the first publication, done in Hebrew, is not easily available to all interested scholars. The present reading contains a number of improvements on the *editio princeps.* It is noteworthy that this text, together with several others (e.g. those published in Stübe 1895), are not included in Isbell 1975, which purports to be "a collection of all the published Aramaic bowls" (p. ix).

The present bowl is remarkable for its arrangement. Instead of circular lines running spirally from the inside or from the rim, as is the usual practice of the magic bowls , this one is divided into four quarters or sections by two lines which go through the centre and form a cross. The incantation goes from top to bottom in each quarter, and from right to left, quarter by quarter. Each quarter contains seven lines. The bottom of each quarter, except the last one, contains the beginning of the next. This principle was partly recognized by Narqis, but he did not

Bowl 9

Formerly in the possession of V. Barakat, Jerusalem

Plate 25

Within the central circle:

(1) אחיד פכר צמר ואקים ג(ב)יה וסריח וכוכבי ומזלי

Outside the circle:

(2) וכל (קיה) ורירה דיהודה בר נני דנ(י)בש לישנה בפומיה ויתמסי רוקיה (3) בגרגרתיה ויבשון שקיה וגופריתא ואישתא תידלק ביה וילקו גופיה ב(כו)י(א) ויסח(כר) ויתנכיר (4) ויתעכר לעיני כל חזוהי וישתמח ויתבר וי(בד) וישתצי וימגר וימות ותיתי עליה שלהוביתא מן שמיא (5) וזיעא יחוד יתיה ותברא ידבקיה ומזופיתא

notice that it applies also to the connection between III and IV. At the beginning of IV two failed attempts were made to write the continuation of the inscription, and only line 3 contains the proper text.

II,1 ʾsryʾ: This spelling for ʾsyrʾ is repeated in III,1.

II,4 The Persian name Khwadāy "Lord" is quite well attested. Cf. Gignoux 1979, p. 59.

II,5 Pālī is not so far attested to our knowledge in this form, but it could be assumed to belong to the Iranian name Pahray (cf. Gignoux 1979, p. 65); or perhaps to Pālīz "Paradise" (cf. Justi 1895, p. 240, s.v. Pālīzbān).

IV, 3 As noted above, this line continues line III,7, while the lines IV,1–2 may be disregarded as containing unsuccessful attempts. The final letter is almost without doubt *kaf*. The name Ādurdukh, which is quite well attested, is explained by Gignoux 1979, p. 76, as "Daughter of Ādur".

may die, and that a flame may come upon him from heaven, (5) and shiver seize him, and a fracture catch him, and a rebuke burn in him. May the following verse apply to him: they shall fall and not arise, and there will be no power for them to stand up (6) after their defeat, and there will be no healing to their affliction. "Their eyes will darken, so that they see not, and their loins will be made by you continually to shake" (Ps. 69:24). "Let their habitation be desolate, and let none dwell in their tents" (Ps. 69:26). May the following verse (7) apply to him: "And my wrath shall wax hot, and I will kill you with the sword, and your wives shall be widows and your children fatherless" (Ex. 22:23). And the following may apply to Judah son of Nanay: "The Lord shall smite you with a consumption and with a fever (8) and with an inflammation and with an extreme burning and with the sword and with blasting and with [mildew] and they shall pursue you [until you per]ish" (Deut. 28:22). "The Lord shall smite you in the knees and in the legs with a fes[tering eruption] that cannot be healed from the sole of your foot on to (9) the top of your head" (Deut. 28:35). "The Lord shall smite you with madness and blindness and astonishment of heart" (Deut. 28:28). "And you shall eat the fl[esh of your s]ons and the fl[esh of your d]aughters" (Lev. 26:29). The throat of Judah son of Nanay shall not swallow and his gullet shall not eat, choking (10) shall fall on his palate, and paralysis shall fall on [his mouth and tongue...]. The following verse will apply to him: "The nations shall see and be confounded at all their might. They shall lay their h[and on (11) their mou]th, their ears shall be deaf, they shall lick [the dust] like a serpent, [they shall move] out of their holes like worms of the earth" (Micah 7:16–17). "The Lord will not spare him but then the anger of the Lord and his jealousy shall smoke against that man and [all the curses that are written in this] book [shall lie upon him] (12) and the Lord shall blot out his name from under heaven" (Deut. 29:19). So shall the name of Judah son of Nanay be blotted out and [his memory] shall be uprooted from the world, just as was blotted out the name of [Amalek(?)]...(13) may his members be pressed down and may there be done to him (?), judgement will come, omen and misfortune swiftly, with an inflammation, a purulence, an itch, a vermin, a blackening, a shiver, a vermin...(14)...a pirate and a satan. And in the name of šš'rb the angel, and in the name of Mot and Yarod and Anahid and Istar Tura and ... and the spirit which resides in the cemetery, all should lean on Jud[ah son of Nanay...]

This bowl is remarkable for the fact that it contains a text which is totally dedicated to cursing a specifically named individual. In this it would join Bowl 7, if our interpretation of that ambiguous text is correct. It is also unusually rich in biblical allusions and direct quotations, and in various terms for diseases and ailments. In the centre is the drawing of a full human figure, surrounded by a circle within which is a short inscription, which for the most part is unintelligible, though it can be quite easily transcribed.

This bowl, like Bowl 1, was at the time of writing in the possession of Victor Barakat. Mr. Barakat could only say of this bowl that it came from a private collection, and that the unnamed collector had told him that it derived from the Bethany area, in the vicinity of Jerusalem. We regard this attribution with scepticism, as the bowl strikes us as belonging basically with the other Mesopotamian bowls.

1 The first words seem to be a corruption of **ʾsyr pkyr ṣmyd**; cf. e.g. the sequence in Harviainen 1981, p. 5:4 **gzyryn ḫrymyn wmšmtyn ʾsyryn pkyryn wṣmydyn.**

2 **qyh:** If the reading is correct, this would be the first attestation of the noun for "vomit" in any form of Aramaic. It is of course well attested in Hebrew and Arabic.

dnybš is in the third person imperfect masculine *peʿal.* Inconsistency as to gender is very common in these texts.

The series of curses here can be compared to Geniza T-S AS 142.214, lines 18f.: ...וחהי נא עורון בעיניהם וסתום וחתום פיהם קצץ רגליהם...

3–4 **wystkr wytnkyr wytʿkr:** A rhyming sequence of verbs.

5 **qrʾh dktyb:** The following is an inacccurate reference to Jer. 8:4 and Amos 8:14.

wʾl thh tqwmʾ: A paraphrase of Lev. 26:37.

6 **lmḥtm** (like **ʾswtʾ**) is an Aramaic word used in the Hebrew phrase with a Hebrew suffix. The writer may have identified the Aramaic word **mḥtʾ** with the Hebrew *mákkā*, as in Jer. 30:17 וממכותיך ארפאך. The same connection of **mḥtʾ** with **ʾswtʾ** occurs in Montgomery 1913, No. 16:6, **mḥtʾ tḥwt ʾswtʾ.**

hmʿṭ is an error for *hamʿad.*

9 **blwʿyh,** which parallels **grgrtyh,** evidently means "his throat",

though **blwʿ** is so far unattested in this sense in Aramaic. It seems hardly likely that we have here **b+lwʿ** "jaw".

ʾskr also occurs as a name for a demon in late Jewish sources; cf. R. Margaliot 1945, p. 208. As a term for a situation of distress, together with **nkph**, the equivalent of our **ʾkpy**, we have it in a late Jewish amulet published by Casanowicz 1917, p. 53: ומכל מראים (!) בישין ומנכפה ... ומאסכרה.... Similarly Nash 1906: ממחה משונה ומחולה הנפל בר מינן ... ומחלה הנכפה ... Cf. also Gaster 1896, p. XII, line 35 **lʾskrtʾ** (written **lʾsbrtʾ**); Shachar 1971, p. 286, No. 966.

For **ʾkpy** cf. the Commentary on **ʾskr**.

11 ***wqnʾtw** written in the bowl **zqnʾtw.**

12 **ytmyḥ** error for **ytmḥy.**

13 **hdmʾyhwʾ** is seemingly written in the bowl **qdmʾyhwʾ.**

bʿglh: The sequence would have favoured here a word designating some disease or misfortune.

bšyḥnh: Cf. Gaster 1896, p. XIII, line 16 **lšyḥnh**; Gollancz 1912, p. 3, § 5 **ʾsyryn šḥnʾ wmwtnʾ wqws...**

For **šyḥlh** cf. Gen. Apocryphon **rwḥ šḥlny** and the commentary by Fitzmyer 1971, p. 136.

qlmtʾ: This is the word used by Onqelos to translate Hebrew *kinnim* in Ex. 8:12.

šḥrtʾ: In the same amulet, quoted above (Casanowicz 1917, p. 53), we also have ... ומחולי שחורה ...

rwytʾ: This may be a syncopated form of **ʿrwytʾ**; cf. Commentary to Amulet 2:2.

klmth: This seems to be a mere orthographic variant of **qlmtʾ.**

14 **wbšwm šš(ʿrb) mlʾkh:** One is reminded of various names made up with **šš...** as the first element. Cf. Montgomery 1913, p. 223 (31:17), where one should correct to read as follows: **mrmrʾwt ššqpwt ʾstr mwth.** Cf. also Amulet 7:9–10 **ššqwpwt...swsgwn brprwngs ʾstr...**

wrwḥʾ dšryʾ byt qbry: Cf. *Sefer ha-razim*, p. 76 (I:178): רוח קריפורייא החונה בין הקברות. **byt** could possibly mean "among", as in Syriac.

Bowls 10 and 11 are at the Jewish Historical Museum in Belgrade. Dr. L.Y. Rahmani of the Israel Department of Antiquities received photographs of the two bowls from Dr. Vidosava-Neda Nedomački, curator of the Jewish Historical Museum in Belgrade, and referred them to us for study. The information supplied by Dr. Nedomački was that

(3)...demons and dēws...(4)...dreams of night and visions of day from...(5)...the cattle and the house of Bar-Immā son of Izdān-dukh. In the name of **ṣbʾwty ṣbʾwty** the living and the existent, in the name... In the name of **yh yhw**, in the name of **hʾ hyhn hʾ**...that you may come (6) and make healing for the body of Bar-Immā [son of Izdān-dukh] and his sons and d[aughters], which he has and which [he will have]. May (7) this Bar-Shapta son of Aḥat-Abū be protected, may that Naṭ[roy...] be protected; ... son of Rĕbītā, and this Maṭriya son of Qayyamtā, to his house and the members of his house, to his property and to his cattle (8) and to the body of Bar-Immā son of [Izdān-dukh]. In the name of the great and holy Lord, flee away, go out, you sorcerers of witchcraft, (who are) dēws and new and sealed (9) curses and spells. Go and put(?) ... sends ... As you go out in the form of birds who fly and go out and move (10) from one place to another, so will you move and go out of the body of [Bar-Immā son of Izdān-dukh, and of] his sons and daughters, which he has and which he will have. May Bar-Shapta son of Aḥat-Abū be protected; (11) and this Rĕbītā daughter of Ḥawwa... May Panāhakdukh, Naṭroy and Gushn[asp] be protected... and like wax which melts in the fire — run away!... flee away! (12) be annulled! be killed! be terminated! go away! go away from the body of Bar-Immā [son of Izdān-dukh!...against...] and against him who sent him, from that which he speaks by his mouth, and from the works that he does by hand. In the name of Qadḥiel, (13) Mappeqiel, Kabshiel, Parḥiel. [May there be] remedy ...that she may not be pressed down. And may this Bar-Shabta son of Aḥat-Abū be protected, and this Rĕbītā...

the two bowls were found in 1912 by a Jugoslav engineer, Janko Milošević, who was working on the building of a railway at a place specified as being 700 metres north of Kadhimain, which lies 6 km. north of Baghdad. The finder, who supplied this information, took the bowls with him to Belgrade. We should like to thank both the Jewish

Historical Museum in Belgrade and Dr. Rahmani for their cooperation.

Bowl 10 is broken, and what survives of it consists of two large fragments joined together in Belgrade. The writing of the lines in the centre, where the inscription begins, is largely effaced. For the reading we used an enlarged photograph of the joined fragments of the bowl (Plate 26), as well as small photographs of each fragment separately, obviously taken before the joining of the two fragments was made.

The language of Bowl 10 is Syriac written in the Estrangelo script (with some cursive modifications), in contrast to Bowl 1, which is written in the Proto-Manichaean script (cf. Commentary to Bowl 1).

4 **ḥlm' dlyly' whyzwn' d'mm'**: The same phrase is found elsewhere, cf. in Mandaic, Montgomery 1913, p. 248 (39:10); Epstein 1922, p. 60.

5 Bar-Immā bar Izdāndukh: The Aramaic name of the client is not yet attested in magic bowls. The mother's name, which is Iranian, occurs on Jewish Aramaic bowls with the spelling **'yzdndwk**; cf. Montgomery 1913, pp. 145 (No. 7), 212 (No. 27). The name is attested also in Syriac literature, cf. Justi 1895, p. 146. Justi's explanation "(von den) Ized (geschenktes) Mädchen" should probably be revised. The great number of names with *-dukh* seems to suggest that this is a mere suffix denoting "daughter of". The name Yazdān indeed exists as a masculine proper name; references are given by Justi, ibid.

ṣb'wty: It is not entirely certain whether the final sign in this word, which is repeated twice, is indeed a *yod*, as read here, or merely a final embellishment belonging to the *taw*. For **ḥy' wqym'** cf. Amulet 9:5.

6 **wtybdwn**: Quite curiously, the radical *'ayin* is here spelled by a *yod*. The vacillation between *yod*, *'ayin* and *alef* is evident in the forms **brym'/br'm'**, **'zdndwk**, **d'yt lyh**, **'rwqw**, **'tbṭylw**, **'dyh** etc. (cf. in Mandaic, Yamauchi 1967, pp. 75 f.).

wlbnh wlbnyh: The first word was apparently written by mistake and corrected by writing the word again. In **bnyh** for **bnwhy** our bowl follows the form known from the Jewish Babylonian bowls; cf. Introduction, p. 32.

7 **ḥd'**: The text uses the demonstrative pronoun *hādā*, which is properly feminine, indiscriminately, and with the curious spelling with initial *het*. One might think of the numeral *ḥdā* (which is feminine), used irregularly for masculine persons, but the occurrence of **ḥdyn rbyt'** in line 13 decides the issue. *Hādēn* is certainly the masculine demonstrative

pronoun, and it is again remarkable that it is used in line 13 for what is a feminine name; cf. **rbyt' bt ḥw'** in line 11.

bršpt' alternates (line 13) with the spelling **bršbt'**. As a name it belongs to the category of names referring to a day of the week, presumably the infant's birthday.

mṭry' is a name of unclear origin. One thinks of the name of a *dihqān* in Ispahan in the early Islamic period, **mṭy'r**, cf. Ṭabāri, IV, p. 295.

8 **prḥw wpwqw**: Further down, in lines 11–12, a longer list of similar imperatives of verbs signifying going away and being annulled is given. A similar list of imperatives occurs in the Iraq Museum bowl 44107, cf. Teixidor 1962, p. 55; Hamilton 1971, p. 117: **zḥw 'trw w'tkrzw prḥw *wpwqw** (read thus!).

mb'd': The metathesis of **m'bd'** is attested elsewhere too. Cf. our Syriac Bowl 1:11.

9 It seems that **ḥdtt' wḥtymt'** are attributes of **lwṭt' w'šlmt'**.

smw may perhaps be the imperative *pa"el* of SM' "to blind".

ḥbwq' is not clear.

bt dmw k- is the expression used for "like", "in the form of", corresponding to the regular Syriac **bdmwt**. Compare the Biblical Hebrew **dmwt k-** in Ez. 1:26 etc. Cf. Geller 1980, p. 51, line 4 **wmydmn lhwn bydmw dmw** (thus to be read!) "and they appeared to them in various forms".

dprḥn wnpqn wmšnyn: Cf. Montgomery 1913, p. 238 (36:2) **pwq pwq wšny mn qdm**...(Montgomery read **qdmy**, but only **qdm** is visible in his drawing).

10 **d'yt lyh wdnywn lyh**: Compare [**wkl d'y**]**t lh wdhwyn lh**, Montgomery 1913, p. 242 (37:3). See also Bowl 12:IX

11 **pnhqdwk** is an Iranian name not yet attested. The main part of the name, Panāhak, is obviously derived from *panāh* "protection". Naṭroy seems to be a Semitic proper name (it looks like the Semitic equivalent of Panāhak). The third name could be completed as Gušnay or Gušnasp.

'yk š'yt' dpšr' bnwr': Cf. Peshitta to Ps. 88:2 **'yk dmtpšr' š'wt' mn qdm nwr'** and similarly Ps. 97:5.

qdḥw: Montgomery 1913, p. 194 argued in favour of reading this fairly common magic verb as **qrḥ** in order to connect it to the formula in Bavli Pesaḥim 110a **qrḥ qrḥyyky**. Jeruzalmi 1963, p. 74, taking up this

idea, translated **wqrḥw wʿyryqw** by "soyez chauves (perdez votre efficacité en tant que magiciens) et éloignez-vous". Isbell 1975, No. 19:7; 20:9; 22:7 read the verb **QDḤ**, though in the glossary, p. 180, Isbell quotes inexplicably **QRḤ** for text 20:9. Our text, which has a clear distinction between *daleth* and *resh*, settles the ambiguity in a decisive manner in favour of the root **QDḤ**. Even without this evidence it would be fairly clear that a verb with the meaning "to flee" and not "be bald" is required. Mandaic has **uqda upuq uʿruq** (Yamauchi 1967, p. 230, line 12) in the same context. See already Epstein 1921, pp. 41 f., who establishes the basic meaning of the word " to pierce, rise". For the other meaning of **QDḤ** "to wail, moan" see Bowl 13:20.

ʿrwsw is not clear, and seems to be a mistake for **ʿrwqw**, which is indeed written immediately afterwards, but with a new modification, substituting *alef* for *ʿayin*.

12 **mšdrnyh** could mean "they who sent him".

mmll pwmyh: This seems to be a verbal noun, **mmllʾ**.

qdḥyʾyl, mpqyʾyl, kbšyʾyl, prḥyʾyl: A series of names derived from verbs denoting the chasing out or the subordination of the demons.

13 **lkbyšwh:** The first letter looks like a *lamed*, although in Syriac one should have expected a *nun*.

Bowl 11

(1)... to the threshold of Khusrau, to Bar[-Ida son of] Izdān-dukh ... (2) ... and to Bar-Ida son of Izdān-dukh and to ...wrote names ... (3)... from pains and illnesses and evil sicknesses and from jealousy and from mighty spells and from evil speech (?) ... and from all the words which the frightening enemies (4) are hiding and from... sorcerers and mighty ones and from curses and from spells and from submission (?) and from ...and from... which the enemies curse and from (5) all evil things. Amen, Amen, Selah. "And the Lord said unto Satan, The Lord rebuke thee, O Satan: even the Lord that hath chosen (6) Jerusalem rebuke thee: is not this a brand plucked out of the fire?" (Zach. 3:2). "Hear, O Israel, the Lord our God is one Lord" (Deut. 6:4). "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty" (Ps. 91:1). Amen, Amen, Selah.

Again, may there be healing from heaven to the threshold of Khusrau son of (8) Izdān-dukh, so that he may be healed by the mercy of heaven, and any name that is in him [...(9)...should be removed from] the threshold of Khusrau son of Izdān-dukh... Amen, Amen, Amen, Selah.

Bowl 11

For the provenance of this bowl cf. Commentary to Bowl 10.

Although the bowl itself is intact, the inscription written on its inner surface is badly effaced. Having only the photographs at our disposal, we avoided readings which seemed speculative, and have concentrated on those which have seemed relatively certain. The writing begins in the outer rim and ends in the centre, going around an illustration which is not clearly discernible. It may be a human figure with two smaller drawings to its left.

1 **šlhpt'** seems to be an unusual spelling for **šlhwbt'** "flame", cf. Montgomery 1913, p. 183: **lgw nwr' yqydt' wylšlhwbt 'yšt'**. In Bowl 1:7 we have **šlhbyt'** and in Bowl 9:4—**šlhwbyt'**.

šḥmt' may mean "blackening" or "heat". It also occurs in Geniza 6, p. 3:6–7, where it seems to indicate the blackness caused by fire. If **šlhpt'** means "fever", it is possible to take **šḥmt'** as indicating some other symptom of disease, perhaps like **šḥrt'** in Bowl 9:13.

Khusrau son of Izdān-dukh and Bar-Ida son of Izdān-dukh may be brothers. It is interesting to note that the client of Bowl 10 is Bar-Imma son of Izdān-dukh. The two bowls, though written in two different scripts, may stem from the same family. If this is so, we have here another indication for the hypothesis that the script (and language) of a bowl does not represent the language used by the client, but only that which was used by the sorcerer. The sorcerer may have belonged to a different religion or nationality. Cf. Introduction, p. 18.

2 **š(mn)** cf. Bowl 7:2.

3 **(kwrhny')**: See above Commentary to Bowl 1:11.

mhryn: This is the first occurrence of this word in Aramaic to our knowledge (the reading might also be **mhdyn**). Our reading is based on the assumption that this is a loan-word from Iranian; cf. Middle Persian *mahr*, Avestan *manthra-* "(sacred) word".

mml' perhaps an error for **mmll'**.

pydg(my): If the reading is correct, this is a form of **ptgm/pytgm** on the way to becoming **pugdama**, as in Mandaic.

dksyy snyy: The first word is active participle *pe'al* plural masculine, while the second is plural of *san'ā/sanyā*.

4 **ʾryswtʾ**: If it is not a graphic variant of **ʾsyr**, would be connected to the notion of the submission of an *aris* "tenant".

lyty is the active participle *peʿal* of **LWṬ**.

6–7 The two verses, Deut. 6:4 and Ps. 91:1, are joined together into a single text by taking one word from one verse followed by one word from the other text. The same procedure is also used in Schwab 1891, p. 592 (Bowl O); Gordon 1978, p. 233; and T-S K 1.95.

8 **wkl šwm dʾyt byh**: The usual formula is with the preposition **lyh**, cf. Bowl 7:3. The use of **byh** may be influenced by another formula such as we have in Bowl 5:3 **kl šydy...dʾyt bh bʿlmʾ**.

The Jerusalem bowl (12a) has been recently received by the Jewish National and University Library. It is unusual in that it contains a story which occupies the best part of its text, and in certain other features. The bowl was donated to the Library by the late Professor Gershom Scholem. Professor Scholem had received it as a gift from Dr. Wladimir Rosenbaum, an antique dealer in Ascona (Switzerland).

The most striking feature of this text, as already pointed out, is the fact that it is built around a story with a magic effect, a *historiola*, to use the term applied to it by Heim 1892, p. 495 (cf. also Maas 1942, pp. 37 f.). Such stories are practically unknown in other Aramaic magic bowls, although certain bowls contain brief allusions to story situations. Such is the allusion to Yĕhoshuaʿ bar Pĕraḥya and his deed of divorce to the female demons in certain bowls, e.g. in our Bowl 5 and Montgomery

Translation

Blessed art Thou **yhwh** our God, King of the world, who smites and cures Zabinu son of Zuni and Duti daughter of Gusi and Zuna son of Duti, Amen, Amen, Selah. True and sound.

Bound is Lilith, bound is Mevakkalta, bound is št' ... bound is ... bound is ... bound is the idol, bound are all the evil harmers who are in the house of Agbalta son of Qarqoy ... "Sixty valiant men are around about it, of the mighty men of Israel, all girt with swords, and expert in war, every man has his sword upon his thigh, because of the fear by night"(Cant. 3:7–8).

1913, No. 32 (see also Gordon 1978, pp. 233 f., and our Amulet 7). Incantations with fairly elaborate *historiolae* are, however, quite common in Greek and in Syriac magic literature (cf. Heim 1892, pp. 495 ff.; Gollancz 1912, pp. 14f., 85, 87, 89).

Another interesting feature of this bowl is the fact that it contains a number of Greek words. This is a feature which is totally unknown in other Mesopotamian bowls, and one which has raised initial doubts as to the authenticity and original provenance of the bowl, as most Aramaic incantation bowls whose provenance can be ascertained derive from the area of Mesopotamia and Iran, where the number of Greek elements is rather limited. Although the provenance of our new bowl is unknown, it can be established by parallel material that it is Babylonian. The Metropolitan Museum in New York possesses an unpublished bowl

(our Bowl 12b) whose text closely resembles that of our Jerusalem bowl, although the names of the clients are different, and the opening formulae are also cast differently. The Museum records note that the bowl in question, No. 86.11.259, was acquired in 1886 by Mr. Ward, a curator of the Metropolitan , while he was on a journey in Mesopotamia. Another bowl which undoubtedly has the same story was published in Gordon 1941, pp. 346 f., from the Hilprecht Collection, and it "presumably comes from Hilprecht's excavations at Nippur". Gordon could only read a few detached phrases in that bowl, and we have not seen the bowl itself, but the extracts given by Gordon leave no room for doubt that it is in fact the same basic text as in 12a (with the same orthographic peculiarities), although, like the New York bowl, it has a dedication to a different client preceding and following the story.

The *historiola* which forms the basis of the incantations contained in these bowls has numerous parallels in Greek, Ethiopian, Coptic, Hebrew, Rumanian and other texts (see Appendix to Amulet 15). A striking parallel to the texts of these bowls has reached us when the book was ready for publication. Amulet 15, which is in the Israel Museum, turned out to have the same story in a shorter version, but with some details which are certaily more original than their counterparts in the Babylonian bowls. For further details see the commentaries and the Appendix to Amulet 15, as well as the text of Amulet 15 printed above in a parallel column to the texts of Bowls 12a and 12b.

In contrast to the phrasing of Amulet 15, it may be noted that although Bowls 12a and 12b have borrowed certain key expressions from a Palestinian source (the Greek name Sideros, the hybrid Greek Aramaic expression **plgws[d]ymh rbh,** the verb **ʾrtq**), the language of the bowls has nevertheless come under the influence of Babylonian Aramaic (e.g. **ʿly – ʿlwhy; btryh – btrwhy;** the use of *waw* for original *qamaṣ* in Bowl 12a, and other orthographic features). The most important aspect which emerges from the comparison of Bowls 12a and 12b with Amulet 15 is a certain number of textual misunderstandings in the bowls (e.g. **wʾrtyqw** was taken to be a proper name; **wʾdrykw...lgw** for **bgw,** in section VII). For further discussion see the Commentary below.

Some general differences of style and language can be noticed between the Jerusalem bowl and its New York counterpart:

(1) The orthography of the Jerusalem bowl has several peculiarities

which the New York one does not share. The *qamaṣ* vowel is frequently spelled in the Jerusalem (and in the Hilprecht) text with a *waw* indicating presumably that it tended to be pronounced *o*. Thus **smwmyt** (N.Y. **smmyt**ʾ), **qdwmwhy** (N.Y. **qwdmwhy**), **wʿwl** (N.Y.: **wʿl**), **ywtyh** (N.Y.: **ytyh**), **qwmw** (N.Y.: **qmw**). This way of spelling is not unusual in the Aramaic magic texts, and it has been claimed to be a feature of Babylonian Aramaic in general (cf. Rossell 1953, pp. 20 f., § 3.15 and the literature adduced in Morag 1979, p. 115, n. 21 and p. 116, n. 25). See further Introduction on p. 32.

(2) Although both texts tend towards a *plene* spelling with *yod* in words which are not commonly so spelled in Babylonian Aramaic, e.g. **lybrh, ʾyqṭwl, ʾyḥnwq, ʾyḥbwl, myštbʿnʾ**, as well as in the relative **dy-** (e.g. **dymyḥd, dynḥšh**), the New York bowl has such a spelling sometimes with the conjunction **w-** (**wyṣwḥt, wyrdpw, wygbʿwt** [Hebrew], **wydhwn**), a feature which is again found also in other texts (see Commentary to Bowl 2).

(3) The Jerusalem bowl is more explicit in several cases in the use of pronouns, while the New York bowl is more elliptic: In section IV Jer. **wʾmrt lhwn**, N.Y. **wʾmrt**; Jer. **lyt ʾnʾ pṭḥʾ lkwn**, N.Y. **lyt ʾnh pṭḥʾ**; in section VIII Jer. (and Hilprecht) **wʾmr lhwn**, N.Y. **wʾmr**.

(4) The New York bowl, on the other hand, is more expansive in some quotations and set phrases. Cf. the quotation in section VIII, where the full biblical quotation as well as the addition of **ʾytrḥ(m)** "I shall have mercy" occur only in the New York bowl; similarly in section IX we have in N.Y. the addition of the phrase **mn ywmʾ dnn wlʿlm ʾmn ʾmn slh hllwyh.**

(5) Some differences of detail indicate that the text of N.Y. is inferior to that of Jer.: Jer. has the name **sdrws** as against **srgys** in N.Y. (cf. Appendix to Amulet 15); Jer. **lḥd ṭwrʾ dymyḥd bʿlmʾ šmyh** seems the original version as against N.Y. **lṭwrʾ ḥd mʾḥyd šmyh**; Jer. **dwktʾ dnʿbr wnyʿwl ʿlh** seems better than **(d)rkyh nʿbwr wnʿwl ʿlyh**; the same may apply to the omission in N.Y. section VII of the words **wbʿw (mynhwn)** which occur in Jer.

In addition to the following textual comments the reader is advised to consult the Commentary to the approriate lines in Amulet 15. The following comments are arranged by the sections as given in the transcription of the text.

I New York and Hilprecht have an introductory section mentioning the client while Amulet 15 and Jerusalem start with the *historiola*.

II Jer. **sdrws** supported by the traces in Amulet 15; N.Y. gives **srgys**, which is evidently a corruption. Cf. also Ethiopian Werzelya (see Appendix to Amulet 15).

III **dymyḥd bʿlmʾ šmyh:** There seems to be no room in Amulet 15 for such an epithet, although a reference to a mountain may be reconstructed there.

For the phrase Jer. **lḥršyn dynḥšh** N.Y. gives **mqdšh dynḥš**. The whole phrase seems to be a corruption from an original text where instead of **ḥršyn** the similar-looking word **trʿyn** was written, as in Amulet 15.

wʿbdyn dprzlʾ: In Hilprecht we may read **wʿbdy dprzlʾ wʾtʾ** (Gordon 1941, p. 346).

IV **sʾwny wssʾwny wsngrw wʾrtyqw:** The division of words here is ascertained from a comparison of all the places in which the names occur in the two bowls, in the amulet and in the later traditions.

ʾrtyqw, which is the verb meaning "and they knocked (on the door)", as in Amulet 15, was misunderstood by the writers of our bowls and they took it to be a part of the series of names. It is likely that they regarded **sngrw** as a word with the same shape.

Our two bowls seem to waver between taking these three characters as a singular entity or as a plural. Thus we have **wʾtʾ... wʾmrw lh.. wpṭḥt lhwn... wṣwḥt ʿlwhy**, etc. The Greek version of the Gyllou story (see Appendix to Amulet 15) treats Sisinios, Sinēs and Sēnodōros as a singular (ὁ ἅγιος); this point occurs in the story more than once. These three names are seemingly phonetic variations on a single form, a point which is strengthened by the observation that the names are once given in the Greek text in the vocative ὦ Σισίνιε, Σίνη καὶ συνοδία (Sisinios, Sines and company). In Amulet 15, which seems closest to the original version, the three names consistently attract plural form.

dwktʾ dnʿbr wnyʿwl ʿlh: This may be a corruption of a phrase in the original version; Amulet 15 does not provide us with the possibility of a satisfactory reconstruction. The N.Y. version presents us with another unusual phrasing.

V This paragraph implies that a new son was born to Smamit in the meantime. This is said explicitly in the Greek version (see Appendix to Amulet 15). The sequence "to kill and to strangle", which may strike

one as illogical, occurs twice at least (cf. sections VII and VIII), although in N.Y. line 12 the sequence is "strangle", "kill". Amulet 15 uses the verb "to kill" exclusively.

V–VI In Hilprecht we may reconstruct (cf. Gordon 1941, p. 346): **[w]ḥnq ywtyh wqmt wṣwḥt *ʿlhy ʾsʾwny wssʾwny wsngrw wʾrtyqw.**

VI The spelling **ʾsʾwny** in the Jer. and Hilprecht bowls suggests the Greek vocative participle attached to the name in the appropriate syntactic situation, which makes it possible that there existed a Greek *Vorlage* from which the Aramaic version derived. The Greek text of Perdrizet 1922 indeed has a vocative form of address at this point (see Appendix to Amulet 15).

VII Jer. **btryh**, N.Y. **btrwhy**: Both forms are attested; cf. Rossel 1953, pp. 21 f., 58.

wʾdrykw ywtyh, "they found him", was misunderstood by the writer of the bowls as meaning "they led him"; see Commentary to Amulet 15:15–16.

lgw: Mistake for **bgw**.

plgws ymʾ rbh: See Commentary to Amulet 15:16.

wbʿw mynhwn: This phrase is not given in N.Y. **mynhwn** seems to be a mistake.

VIII The short quotation from Is. 40:12, as given in Jer., occurs also in *Sefer ha-razim*, 1:226. In Hilprecht we reconstruct **[bšʿ]wlw mym dkl ʾtr**...(cf. Gordon 1941, p. 347), where we also have the short quotation. Amulet 15 gives an Aramaic version of the short quotation.

kl ʾtr d-: See Commentary to Amulet 15:19.

IX The feminine name Qarqoy occurs also in Isbell 1975, p. 110 (No. 48) and Qaqay (fem. pr. n.) in Isbell 1975, Nos. 47 and 32 (spelled **qʾqy**). The name Qaqay is Iranian from *Kaka* "uncle, brother-in-law".

The N.Y. names give more the impression of being Semitic than Iranian.

X For the phrase **mk(h) wrwph** cf. Gordon 1941, p. 352 ברוך מכה ורופא and Amulet 1:20.

XI The verse Cant. 3:7 occurs also in Isbell 1975, No. 66:3–4.

are idle (?) (10) and those women who give birth, sons of lust and prostitution, sons of abortions, sons of virgins, sons of destroyed houses, sons of broken jars, sons of mighty ones who were weak, sons of a land which kills its inhabitants. Your food is the flesh of each other, your drink is black water; you bark like dogs, you grunt (11) like pigs, you hiss like snakes, you are called by Shamish(?).

You make yourselves visible to Yawitai d. of Ḥatai in bad dreams, in a hateful shape. You make yourselves visible to her in (the shape of) gold and silver, plumb, brass and lead. You make yourselves visible to her in the shape (12) of cedar (?) and tree, in the shape of myrtle, tree of chastity and pines. You make yourselves visible to Yawitai d. of Ḥatai in (the shape of) camels, oxen, donkeys, lions, wolves, tigres, cats and monkeys. (Your) forms will be like the forms of the dead. (You make yourselves visible in the shape of) father and mother, grandfather and grandmother, a lad and a lass, a pregnant woman (13) and a child-bearing woman, tombs of fright, midwives of diviners and soothsayers, burning ovens, unmended looms. You make yourselves visible to Yawitai d. of Ḥatai (in the shape of) winged animals of the earth and birds of the sky.

There came to you the lord Bagdana. They gathered you, they suppressed you, they brought you down underneath the big mountain of iron. (14) There came attendants (?), they cast you, dēws, they struck against your hearts arrows of iron, he brought down upon you a large flint rock of unhewn stone, he caused the sea and its cliffs to flow over you.

Peace without peace shall be upon you, dēws, for the great day of judgement. That which is on the right hand and that which is not on the right hand shall be upon you, evil spirits and the evil fates of the sky, troops, goddesses, (15) sons of destroyed houses, sons of broken jars.

That which you say, "Let us go and shoot(?) the pride(?) of the mighty one, the protectors on the earth, like the goddess Deliwat (who) comes at your head, mounting a lion, holding a lance in her hand, handing over a *zargona* to the gods and a *zargona* to the goddesses, they all covered the gods of the sorcerers" — you do not know, dēws, (16) that a man come against you from the outside, whose name is Kantioel. He holds in his hand a cutting knife, and (he holds) between his fingers a Satan's sword; he came to wreck the houses of the gods, and he wrecked all the goddesses, they wrecked their table, they cast away their chalice, they sprinkled fat in the four corners, they trampled upon their horns, they broke their trumpets, (17) they turned their joy into grief.

דיוא רבה כמינקדם הוהוא קרבה נפקיתון מישתעבדיתון ליה לאורוס דיוא תקיפא חומרי בישתא חומרי טמיתא חומרי זידניתא תלת אלוא אסא שוו לכו ברישיכו מיגופנא זניא דליות לא ידיעיתון דיוי דגברא מילבר אתא עליכון (18) נוריאל רבה נוריאל שמיה נורא לביש ונורא מכסי שלהביתא דנורא נפקא מיפומיה כד מידכריתון דיוא רבה כמינקדם הוהוא קרבא נפקיתון מישתעבדיתון ליה לזרני דיוא תקיפא קרני קריתון שיפורי מיבביתון פתורי מכשטיתון אגני מזגיתת כלילי גדליתון (19) וריחא רמיתון דאמריתו ניזי להו לידמות א(ד)ם ולא נישבוק להו חיה בדיריהו ניקטול סבי באסניהו ואלימני באישכריהו ני[סחו]פינהו לדר[ד]קי בשוקי נירדופינהו בפגריהו נירדופינהו בארחתהו לא ידעיתון דיוי דגברא מילבר אתא עליכון ודהבה שמיה (20) דארעא בולה נהרא בזיוה וטורי כולהון צמחי בידמותיה אישתפל גברי חשוכא איבטל אידי שמיה חילוותא איתזח קצירי אישתפי כורה[נא ביש]א דיוא (ננא) אגביה לטורא טורא קדח ויליל רוחי בי[שתא ...]אה וי וי עליכו דיוי דמיתחזתון לה ליויתאי בת חתאי ולזוריגאי (21) כר אימא דאישתגר ואתא עליכון דיוי שמיש ליקרבה עשרא מלאכיהון דאיתו קרם שמיש חמשה ראזי מיבית שידיה דשמיש מלאבי דאיתו קדם שמיש נורא לבישין ונורא מכסי של[הביתא ד]נודא נפקא מיפומיהון תרע[מה ע]ליך שידא ודיוא ודנחיש (22) ודיני וזביא ופתכרא וליליתא דיכרא וניקבתא דשריא עים יויתאי הרפתקא דדמא קטלא ית בולא כיכסחפי דדמא ורוגזא קריב קרבא בשידי קטיל קטלא בחומרי טמיתא וב[חומרי ב]ישתא

When you recall the great dēw, as there was a battle in old times, you go out and make yourselves slaves of **ʾwrws** the violent dēw, the evil amulet-spirits, the impure amulet-spirits, the impious amulet-spirits; place three aloes ‹and› myrtle on your heads from the prostitute(?) vine ‹of› Deliwat (?) – you do not know, dēws, that a man from the outside came against you, (18) Nuriel, the great Nuriel is his name. He is clad with fire and is covered with fire (and) a flame of fire comes out of his mouth.

When you recall the great dēw, as there was a battle in old times, you go out and make yourselves slaves of Zarne, the violent dēw, you blow horns, you sound trumpets, you set tables, you mix (drink in) chalices, you dress up wreaths, (19) and throw about perfume.

That which you say, "Let us go and (make ourselves visible) to them in the shape of a human being and we shall not spare a living creature in their dwellings; let us kill the old in their granaries, and the dumb in their wagons; let us sweep away the children in the market places, let us chase them in their bodies, let us chase them in their roads" — you do not know, dēws, that a man from the outside came against you, whose name is Dahba; (20) the whole earth is aglow with his splendour, and all the mountains are resplendent with his shape. The men of darkness were lowered, the evil fates of the sky (and) the troops were annulled, the sick rose, the [evil i]llness was healed, the dēw Nana(?) lifted (?) the mountain, the mountain moaned and wailed; the evil spirits...

Woe, woe upon you, dēws, that you make yourselves visible to Yawitai d. of Ḥatai and to Zorigai (21) s. of Imma, that there was sent and there came upon you, dēws, Shamish for battle. Ten of their angels who came to the presence of Shamish, five mysteries from the demon house of Shamish, angels who came to the presence of Shamish, are clad with fire and covered with fire, and a flame of fire comes out of their mouths.

Commotion(?) upon you, demon and dēw, and Danahiš (22) and judges and an acquitted person, and idol, and male and female Lilith, who dwells with Yawitai. A bloody destiny is killing all, as in inundations of blood and wrath. The battle against the demons is approaching, the slaughter of impure and evil amulet-spirits is killing.

Bowl 13

This bowl, from the Victor Klagsbald Collection, was put together from fragments by Mr. Rafi Brown. Almost the whole bowl was restored, with only a small fragment missing near the rim.

This is the largest bowl of its kind seen by us, and may be the largest recorded so far. The most common size of Aramaic incantation bowls "is of about 16 cm. diameter at top, by 5 cm. full depth" (Montgomery 1913, p. 13), and the size of "one large bowl" is 28x16 cm. (ibid.; cf. also Montgomery 1913, pp. 321–326). The present bowl, in contrast, measures 30–34 cm. in outer diameter (the measurement varies because the rim of the bowl is not a perfect circle), and the height, measured from the outside, is 14–15 cm. (again there are variations in the height of the bowl around the rim). Apart from the physical size of the bowl, it is also remarkable for its inordinately long text, as well as for the fact that it contains several phrases and expressions that are found here for the first time. For this reason some points in the text remain obscure. The structure of the text is unique, with its detailed description of the magical force appealed to, which is called Marya Bagdana.

The drawing in the centre of the bowl depicts a standing human figure with arms which touch each other as if meant to be crossed. A circle seems to be drawn round the feet of the figure. Around the whole figure a serpent is drawn as a *uroboros*, and another serpent is shown inside the circle formed by the first one, surrounding the figure on three sides, but not at the bottom. The inscription inside the circle identifies the figure as Lilith, although it has no features which would identify it as feminine.

1 The reading **(ly)lyt'** is not absolutely certain, but the comparison of the phrase with what occurs in lines 7 and 22 shows that it must be Lilith, for this is the demonic being that is consistently said to be "dwelling" (**šry'**) with the client.

The name Yawitai/Yoitai may be a variant of Ya'ita (see Amulet 2), with the characteristic Babylonian ending *-ay* (as in Zorigai), which seems akin to the ending *-oy*, also attested widely in Babylonian names. These endings may be of Persian origin; see Commentary to Bowl 3:2.

Ḥatai, a name which is attested under the form Ḥatoi (e.g. Isbell 11:3, 9 and other places; see index to Isbell, p. 90), is almost certainly a derivative of *'aḥat* "sister", with the proper-name ending *-ay/oy*.

2 The spelling of the verse shows the interesting rendering of the *qamaṣ* with *waw* in **qwmk**. The third word in the original verse is **thrs**, and it was replaced apparently by a different verb, of which the last

letter is *ṣade*; the verb may thus possibly be **trʿṣ**, which occurs in verse 6, or **ttṣ. yklmw** stands for the biblical **yʾklmw.**

3 The opening formula is vaguely reminiscent of the formula in Montgomery 1913, No. 2, where, however, the expressions used are in the first person singular. The combination **ḥylyh ... mymrʾ** occurs also in a Mandaic incantation text, where we have **bhilak umimrak utušbhtak** (Yamauchi 1967, No. 22:187–188).

rbh is used as a name of the deity, as in Bowl 6:9 **byšmyh ʿdʾrbʾ wdḥylʾ.** A similar usage can be detected in Amulet 1:8 **rbʾ gybrʾ wdḥylʾ**; Amulet 7:15 ... **krsyh dʾlh rbh ḥsynh wdḥylh.** In the first of these cases **rbʾ** may still be a noun, qualified by **gybrʾ wdḥylʾ**, although it reflects the Jewish liturgical sequence האל הגדול הגבור והנורא, while in the last case **rbh ḥsynh wdḥylh** are evidently all epithets of **ʾlh.** However, in the Syriac Amulet 6:1–2, the sequence **br tʾwn, rbʾ ḥsynʾ, qdyš ʾylʾ** gives us the names of three deities, the second of which is "the mighty Rabbā", with *Rabbā* serving as proper name. It is doubtful whether **rbh dʾylhy,** which we may have been tempted to translate "Lord of the gods" belongs here, as it has a clear parallel in Montgomery 1913, No. 19:5 **mryʾ rbʾ dʾylhy** (according to the reading of Epstein 1921, p. 49), which in its turn corresponds to **mlktʾ rbtʾ dʾystrʾtʾ** (No. 19:6). In Montgomery No. 19 **rbʾ, rbtʾ** are adjectives qualifying **mryʾ, mlktʾ.**

bgdnʾ: The term is quite familiar. It is used both generically for deities or demons, and as a proper name of the king of the demons (cf. Montgomery 1913, No. 11:5, and No. 19:6, with commentary on p. 198). The original meaning of the Persian word is evidently *bag-dāna* "a temple" (see Shaked, forthcoming). The name is attested apparently also as a proper name of a person in official Aramaic, see Cowley 1923, No. 17:1. The deity Bagdana, although he is described as the chief of the demons, occurs as a divine figure which is addressed in magic texts in supplication for help, as is the case here.

ʾzyzʾ: The spelling of this word with an *alef* suggests that it is not the adjective "strong, powerful", but perhaps a proper name (possibly derived from the adjective; cf. **ʾzzyʾl**, Montgomery 1913, No. 19:18), which may have been used in apposition to Bagdana. An analogical usage of the epithet **ʿzyz** can be seen in Montgomery 1913, No. 28:5 **bšmh ddlybt ʿzyztʾ.** For a deity **ʿzyzʾ** one may compare Nabataean **ʾlʿzʾ**, Arabic *al-ʿUzzá*, see Cantineau 1930–1932, vol. 2, pp. 128–129; *Encyclopaedia of Islam*, s.v. *al-ʿUzzā.*

r'yšh dšyty mlkwt' seems to be in apposition to **mlkh**. This is hardly a case of **r'yšh** being used as an adjective for **mlkh**, as in Biblical Hebrew **hkhn hr'š** (II Chron. 31:10; Ezra 7:5), a usage which is unattested in a later period either in Hebrew or in Aramaic (in Jer. 52:24 **khn hr'š** is rendered in the Targum **khn' rb'**). The phrase **r'yšh dšyty mlkwt'** does not mean "his head is of sixty kingdoms"; we have a description of the head further on in line 4 **r'yšyh r'yš' d'ry'**.

šyty is the form for "sixty", besides **šytyn**, cf. Epstein 1960, p. 127. The number "sixty" is fairly widespread in magic texts, sometimes together with "eighty". Cf. Montgomery 1913, No. 19:8–9; Yamauchi 1967, Nos. 20:16f.; 27:13. Like **šyty/šytyn** there is also **tmny** (Montgomery 1913, No. 19:9)/**tmnyn** (as well as **tmnn**), although the form **tmny** is not recorded in Epstein 1960 or in Rossell 1953. (The latter, p. 34, quotes Montgomery 1913, No. 19:9 as reading **tmnn**, which is an error. Rossell himself, on p. 110, gives the same text with the correct reading **tmny**).

hyl' (dzyq'): Cf. Montgomery 1913, No. 12:8 **nšpyn kyzyq' brqyn kybrq'** "blowing like the blast, lightening like the lightning".

4 **swgy'** could also be translated "walking".

kkyh: For this ending of the plural noun with 3rd per. sg. m. possessive pronoun see Epstein 1960, p. 123; Rossell 1953, p. 38, and our Introduction, p. 32.

dybth might be read **dwbth** "a she-bear", but this is less likely. **dibia** "wolves" occurs as a killing agent in the Mandaic text published in Yamauchi 1967, No. 33:11. Wolves are commonly associated with demons in Iranian texts. On the confusion between "bear" and "wolf" in Jewish sources see Kook 1943/44.

5 **syrpy pwmyh**: We have assumed that **syrpy** is derived from the root **SRP** "to swallow, gulp down" (cf. **ŚRP** in Jastrow for Jewish Aramaic, **SRP** in Drower and Macuch for Mandaic, and in Brockelmann for Syriac); the alternative senses of the root **SRP** may also give suitable meanings: "burning" or "resin". A similar expression is found in Montgomery 1912, line 4: **dsrpyhwn brq'** (= Hamilton 1971, No. 1:4).

'dwgy dnwr': For **'dwg'** cf. Brockelmann, p. 5b; Drower and Macuch, p. 7. In Mandaic both forms, **adugia** and **dugia**, occur. The expression in Bavli Ḥullin 111b **by dwgy** is said to designate a receptacle for fat drippings, but one wonders whether it does not mean literally "(that which is) in the oven".

(k)pydyh is a compound of **kp-yd**, with the first element remaining unchanged in the plural. The literal translation is of course "the palm of the hand", but the combination **kp' dyd'** is used in Bavli Ḥullin 54a in the sense of "shoulder" (see Rashi). The writer of this bowl may have been particularly well-versed in Talmudic expressions; cf. Commentary on **gygly b'nn'** and on **gb' dygyl'** below.

gygly b'nn' seems to recall the expression **'nny bglgl'** in Bavli Berakhot 59a, which comes as an explanation of "thunders" (based on Ps. 77:19).

ṣydyh stands for **ṣyd'yh**.

sdn' dprzl': The same expression occurs also in a Mandaic magic text, cf. Drower 1938, p. 3:22.

6 **gb' dygyl'**: This combination of words occurs in Bavli Shabbat 110a and Menahot 42b: **gby' gyl'**, meaning "alum". It may contain the Persian element *gil* "clay". The back **(gb')** is compared to alum **(gb' dygyl')** possibly because of the pun element involved.

šqyh šqy nḥšh wprzl' is reminiscent of Dan. 2:33 **šqwhy dy przl.** Much of this passage is constructed like the description in Dan. 2.

pryḥy: The root **PRḤ** means "to bloom", "to fly", as well as "to shine, spark". On the semantic relationship of "to bloom" with "to shine" see Morag 1972, pp. 4 f., and below Commentary to line 20, **ṣmḥy**. For our translation "sandals of sparks" cf. the Mandaic expressions **sandlia ḏ-ziua** (e.g. *Ginza S.* 97:19); **sandlia ḏ-kima; sandlia iaqdana** (*Johannesbuch* 100:7), quoted in Drower and Macuch, p. 313.

mrkbtyh mrkbt' lṭby: Cf. the Syriac bowl in Hamilton 1971, No. 1:56 **mrkbthwn mrkbt lṭ'b'**. Our text is irregular; it should have read either **mrkb' <d>lṭby** or, as in the Syriac, **mrkbt lṭby.**

tyty: The feminine form, written by mistake, may have been caused by the word **mrkbt'**.

gys: We should normally have a final *alef* here, for which there is space on the surface of the bowl, but it does not seeem to have been written. An analogy for such an unexpected *status absolutus* in the same position is found in line 14 **'t' prgwd**. Gaster 1896, p. XVIII:31 has **'m npl 'lk gys'**.

7 **qryb** is perf. in the *pe'al* form.

'l šydy w'l dywy etc.: This has a parallel in lines 21–22.

dnḥyš: Probably of Persian derivation, cf. Shaked (forthcoming).

mlwyt': Cf. the expression in Montgomery 6:3 **dlwyn 'mhwn wdšryn bgw btyhwn.**

zwryg'y contains probably *zōrīg* from Persian *zōr* "power", though it could be read as *zīrīg*, from Persian *zīr* "wise".

8 **pwlqt'** seems to be a form related to *pelqā*, attested in Syriac, and Mandaic **pilqa** with the meaning "axe, hatchet", and in Jewish Aramaic **plq** "fissure, wound". The Jewish Aramaic verb PLQ is only attested once in the variants to Bavli Gittin 69a, and thus may be regarded as a denominative. The ultimate origin of the word seems to be Greek πελεκύς, cf. Brockelmann 1928, p. 576a; Jeffery 1938, p. 229 (on Arabic *falaqa*); Kaufman 1974, pp. 82f. (where the alleged Semitic root is relied upon with no good reason).

mwqrh, mwqdh: Aramaic seems to possess two words which look similar, and which have caused some confusion because of the similarity of *dalet* and *resh* in the Hebrew script. The one word, **mwqr'**, has the sense of (1) "brain, marrow", (2) "yolk of an egg". This word is attested in Jewish Aramaic (where only the first sense is known, cf. Targum Job 21:24. Targ. Jonathan Deut. 28:28 has for *šiggā'ōn:* **šwwyywt' dmtpš' mwqd'**, where **mwqd'** is evidently miswritten for **mwqr'**); Syriac (where two forms, *mūqrā* and *mūqlā*, are attested, both having the sense of "yolk"); and Mandaic (where both senses are known). The Arabic *muqla* "pupil of the eye" has been pointed out as a cognate. The other word, which exists only in Jewish Aramaic, is **mwqd'**, and is the equivalent of Hebrew *qodqod* in the Targum (Ps. 7:17, Targ. Jonathan Deut. 28:35), meaning obviously "top of the head".

In our text we seem to have for the first time in Aramaic literature the two words attested side by side. Although the difference between *dalet* and *resh* in our bowl is not always very pronounced, the two letters can be differentiated in most cases. In this particular case a distinction between *resh* in the first word and *dalet* in the second is clearly present.

't'...qryb...rmy...tbr...špyd...mḥwnh...ḥbyl...bṭylw: This sequence of verbs presents a confusing picture. Some of the verbs are in the singular, others (**mḥwnh, bṭylw**) are in the plural. A similar problem exists below, lines 13 f., where we have **'t'...knšwnkw kbšwnkw w'ḥytwnkw ... 't' ... rmnkw ... nqš lkw...'ḥyt 'lykwn...'ṭp 'lykwn.** Another series occurs in line 16: **'t' ... shwp ... shpwnhw ... šdwnhw ... zlḥ lhw ... bsy' ... tbrw ... šwy'**; in the last series the forms of the verbs include not only singular m. and plural m., but also two forms of what looks like singular feminine (**bsy', šwy'**). One may try to explain the divergence of number by assuming that the text uses without distinction a reference either to

mry' or to **gys/prgwd** (the latter nouns being considered as plural), but the last sequence (line 16) has no plural noun which one may refer to. The alternative explanation could be that the distinction between singular and plural in the perfect 3rd. person was weak, because, perhaps like in Syriac, the final vowel of the third pl. m. was not pronounced. The forms with object suffixes where the plural forms are fully pronounced indicate that all the forms of the verbs (except the initial **'t'**) may have been intended as plural 3rd. m., referring perhaps to the host of agents helping the main figure. **shwp** may be compared to the Jewish Babylonian Aramaic like **'mwr** "they said" etc., cf. Epstein 1960, pp. 34 ff. The forms **'yštpl, 'ybṭl** etc., line 20, belong to the same category. The two forms **bsy'** and **šwy'** remain unexplained.

qwmh: The spelling with *waw* indicates that the first vowel was pronounced *o*, i.e. *ḥolam* for *qamaṣ*. On this phenomenon see above, Commentary to Bowl 12, and Introduction, p. 32. Earlier the same word is spelled **qmh**. Another instance of the same phenomenon may exist in the proper name **ywyt'y**: perhaps Yo'itay for Ya'ita.

9 **'zh:** The meaning is uncertain. It may indicate some disease, perhaps to be associated with the root **'ZY, 'Z'** (cf. Jastrow, s.v.). Montgomery 1913, 24:2, reads **'zyt'**, but the correct reading is **'ryt'**, cf. Commentary to Amulet 9:1–2. **'zh** could hardly be connected to **'zyz'** in line 3.

***(d')yštgr:** The bowl has clearly **ṭyštgr**. It should be emended according to line 21.

'ysywy: The combination **mia siauia** "black water" occurs in Mandaic, cf. Drower and Macuch, p. 265b, where many passages are quoted. The combination **my' syw'** occurs also in Gaster 1896, p. XXVI:7 (miswritten **pyw'y** in line 4). The word is of Iranian origin, from Parthian *siyāw* (cf. Widengren 1960, p. 100).

pgrt': This is perhaps from **PGR** "to be lax, faint", possibly referring to women who do not bear children, in opposition to **yldt'**. If we read **pgdt'** (though *resh* seems the better reading) we may have the sense of "women who hold back, who restrain" (as from **PGD** in Syriac) or, as a noun, "disaster" (as **pagadta** in Mandaic).

10 **psysy** cf. Jewish Aramaic **PYS**, Mandaic **PSS**, "to destroy, break, wreck". For the sense cf. Bereshit Rabba (quoted in three versions in Sokoloff 1982, p. 201) where "broken jars" **(qnqnym mrw'r'ym)** are compared to wicked people.

ʾrʿh mqṭlʾ dyrh: Cf. Num. 13:32, where the Targum Onqelos has **ʾrʿʾ mqṭlt ytbhʾ**; Targum Jonathan has **ʾrʿʾ mqṭlʾ ytbhʾ**.

10–11 The noises made by the demons are compared to those of various animals; a similar theme occurs in an Arabic text given by Winkler 1931, p. 5.

11 **dhbʾ, kspʾ, ʾnkʾ, nḥšʾ, ʾbrʾ:** Daniel 2:32 has the sequence **dhb, ksp, nḥš, przl, ḥsp.**

12 **ʾzrʾ** is perhaps a metathesis or mistake for **ʾrzʾ**.

šwnyʾ is attested in Syriac.

bšwrny: The word had two dialect forms in Jewish Aramaic: **šwrnʾ** and **šwnrʾ**, as can be seen from Bavli Berakhot 56b, according to Ms. Munich, where the text reads: "If one sees a cat in one's dream — where it is called *šunnara,* it means that a change for the bad (*šinnuy raʿ*) will come upon him; where it is called *šurana* it means that he will have a nice song (*šira naʾa*)", cf. Jastrow, p. 1537b. Old Aramaic has **šrn,** Sefire I, A33, cf. Fitzmyer 1971, p. 50.

wsbty: For this plural form cf. Epstein 1960, p. 119, where this form is conceded for pl. fem. in adjectives only. Here it is clearly used for a noun.

13 **srwdtʾ** cf. Commentary to Bowl 1:3.

dkṣwmy wkldʾy: Cf. the same combination in Mandaic: **kaṣumia ukaldaiia,** frequently (v. Drower and Macuch, p. 200b).

bḥywt gpʾ wbprḥwtʾ: The Targum for Prov. 1:7 has for *baʿal kanaf:* **prḥtʾ dgpʾ.**

knšwnkw etc.: For the verbs cf. above, Commentary to line 8.

ṭwrʾ...dprzlʾ: The recurring Mandaic phrase is **šura ḏparzla,** cf. Drower and Macuch, p. 364a.

14 **ʿʾ(t)ʾ(?) prgwd:** The reading of the first word is doubtful. The supposed *taw* is uncertain, but no better reading has presented itself. **prgwd** basically means "curtain", but it may have developed to mean "attendants, guardians"; this is based on the occurrence in Hebrew of the phrase לא דומה שומע מפי פרגוד לשומע מפי המלך (cf. Jastrow, p. 1214a). In Mandaic the equivalent term **br guda** (Drower and Macuch, p. 69a), acquired the meaning of "member of a group", perhaps because of the popular etymology of the word, which was deemed to be constructed of **br+guda** the final element meaning "band". In Syriac

similarly we encounter the phrase **bny gwd'** "adherent of a party". It is doubtful whether in Jewish Aramaic **prgwd'** could undergo the same development of meaning, although if our reading is correct, **prgwd** seems to be used of a group of people, as it stands in parallel to the term **gys** (above, line 6), a term which also stands in juxtaposition to **mry'**.

A possible alternative reading could be {'} **'prgwd rmnkw** "they cast you against the curtain". This would entail regarding the first letter as a badly executed *alef*, which was then repeated and drawn in a proper manner. The difficulty here lies in the fact that this may be the only occurrence of the use of the preposition **'-** for **'l** in Jewish Aramaic of the bowls. The usage is very common in the Talmud, but for some reason it seems so far to be completely absent from the magic bowls.

rmnkw: Probably a mistake for **rmwnkw**.

'smwmy: Cf. Mandaic **stmuma** with variants, in Drower and Macuch, p. 324a, derived from Greek στόμωμα.

wkypyh: See Commentary to Bowl 5:2.

ywm' rbh ddyn': Cf. Montgomery 1913, No. 4:4–5; Isbell 1975, No. 62:6.

dymyn' wdl' ymyn': The translation is based on the assumption that the right hand indicates winning a trial. Alternatively, **ymyn'** could mean "I swear, I adjure". The translation would then be: "that which I swear and that which I do not swear be upon you".

hylwwt': Montgomery, No. 7:14 has **hylwnyn byšyn** according to Epstein 1921, p. 35, where **hylwt'** is also discussed.

15 From here onwards we have a series of stereotype phrases:

(1) lines 15–16	**d'mrytw ... l' yd'ytwn**
(2) line 17	**kd mydkrytwn ... l' yd'ytwn**
(3) line 18	**kd mydkrytwn ...** [something missing?]
(4) line 19	**d'mrytw ... l' yd'ytwn**

After **d'mrytw** the verb **nyzy** occurs. After **l' yd'ytwn** the constant phrase is: **dywy dgbr' mylbr 't' 'lykwn w-X šmyh.** The name of this **gbr'** is **qntyw'l, nwry'l** or **dhbh.** The phrases beginning with **kd mydkrytwn** go on in a uniform manner: **dyw' rbh kmynqdm hwhw' qrbh npqytwn myšt'bdytwn lyh l-X dyw' tqyp'**. The name of the mighty demon is in one case **'wrws**, and in the other **zrny.**

The stereotype phrases are evidently built in the form of an argument, with an assumption made by one party: **d'mrytw ...**, or **kd mydkrytwn ...**; and this assumption is refuted by the phrase **l' yd'ytwn**, which identifies

the persons addressed by the vocative **dywy**. The text seems lacunary at one point, when in lines 18–19 there is no response to **kd mydkrytwn.**

nwry gʾwny gbrʾ: The reading is uncertain. Another possible division of words is **nyrwg ʾwny gbrʾ** "we shall desire the dwellings of the mighty one".

mygyny bʾrʿ: Cf. the Hebrew phrase **mgny ʾrṣ** (Ps. 47:10). The initial **my-** is peculiar (as if the word had an initial preposition **mn**), though the *yod* may represent a *shva.*

dlywt: An unusual spelling for this name, which is commonly spelled **dlybt, dlbt,** cf. Montgomery 1913, p. 217. Reading **dlwwt** "who is together" seems less satisfactory.

{rkyby}, {gwnʾ lʾylhy} in both cases the scribe seems to have corrected himself without crossing out the wrong words.

ʾryʾ rkybʾ: Cf. Gollancz 1898, p. 88: **ʾryʾ rkybnʾ wbrtnynʾ.**

mwrnytʾ bydh nqyṭʾ: Cf. line 16 **skyn gwddʾ bydyh nqyṭ lyʿhʾ**, said of **qnṭywʾl.**

zrgwnʾ is a word of Iranian origin, meaning "yellow, gold coloured". In the Avesta *zairi gaona* (Bartholomae 1904, col. 1680) describes the *haoma* plant. It seems very close in origin to **zrny.** In Jewish Aramaic it designates a certain plant (beet or vine, cf. Kohut 1955, III, p. 319b; Löw 1924-34, I, p. 69; III, p. 449). Arabic *zarajūn* means both "vine" and "wine" (v. Ibn Qutayba 1900, p. 526, and Geiger *apud* Krauss 1955, pp. 169b f.). Talmudic Aramaic *zaryon,* a derivative of the same word, may mean "grape-wine" or "gold-coloured (wine)", cf. Geiger, loc. cit.

ḥp klhw: The verb seems to refer in the perfect to the two *zargona*-s (unless we refer **klhw** to the **ʾylhy dḥršy** which follows, and translate "covering all the gods of the sorcerers"). It is noteworthy that *zargona* occurs in Yerushalmi, Sukka III, p. 53c, where we have the same verb used: עץ שענפיו חופין את רובו ועולה כמין קליעה ... אין תימר זרגונה ענפיו חופות את רובו ואינו עולה כמין קליעה ואיזה זה הדס

16 **wḥrbʾ stnʾ:** We have **ḥrbʾ dqṭlʾ** in line 6.

bsyʾ...šwyʾ: See above, Commentary to line 8.

17 **hwhwʾ:** This should probably be read *hāwe (h)wā*, "there was", a typical Syriac expression (cf. Nöldeke 1898, § 277). It occurs in the group of texts Montgomery 1913, Nos. 32:3; 33:2; 9:2, which should be read with the comments and corrections offered by Epstein 1921, pp. 37 f.

ʾwrws is probably the god Horus. Montgomery 1913, No. 19:11 may have the same name (spelled **ʾwrs**?). **ʾwrws** is here parallel to **zrny** in line

18. A reading **ʾyrws**=Eros should also be considered, although it seems less likely. A third possibility is Ares, which occurs in Arabic magical literature (cf. Ps.-Majrīṭī 1933, p. 212).

tlt ʾlwʾ ʾsʾ: The text is difficult, and may be corrupt. A possible hypothetical reconstruction could be **tlt**<**ʾ**> <**ʾylny**> **ʾlwʾ ʾsʾ** <**w**...> **šww lkw bryšykw** "place on your heads three trees: aloe, myrtle and ..." On **ʾlwh, ʾlwws,** etc. see Löw 1924–34, III, pp. 342, 411 ff.

gwpnʾ is apparently used as a general term for a plant.

znyʾ is probably used in the botanical sense of "creeping, spreading in all directions", for a plant. A similar metaphor seems to be present in Jer. 2:20–21, where the expression סורי הגפן נכריה symbolizes a prostitute woman.

18 **nwrʾ lbyš wnwrʾ mksy:** Cf. Geniza 6, p. 3:6 for a similar expression. The same phrase occurs also in T-S AS 143.113.

zrny has an obvious Iranian etymology: *zarana-, zaranya-* "golden". The demon occurs in Montgomery 1913, No. 11:6, where we have a female genealogy: **zrny lylyth** is the grandmother of **ḥlbs** or **ḥldʾs lylytʾ**. The text is attested in two Judaeo-Aramaic versions and in one Mandaic text. This Lilith is apparently part of the retinue of Bagdana. In our text **zrny** is evidently a masculine figure. As a personal name Zarniya seems to be present in an Elamite text (cf. Mayrhofer 1973, p. 231, No. 8.1505), and Zarina, Zarinaia in Greek transmission (cf. Justi 1895, p. 382). The Pahlavi name Zarr-mihr (cf. Gignoux 179, p. 78) may be a *dvandva* compound of Zarniya and Mihr, both divine names (?).

qrny qrytwn, šypwry mybbytwn: These are unusual expressions, where the indirect object is given without an instrumental preposition **b-**.

mkšṭytwn: KŠṬ and **QŠṬ** in the sense of "to dress, set, adorn" seem to be interchangeable in Aramaic.

19 **ʾ(d)m:** The reading is uncertain, and so is the translation. The second letter could be a *kaf.*

sby...ʾlymny...drdqy: Three groups of helpless people.

dhbh: This name seems to be the Aramaic equivalent of Iranian **zrny** (line 18).

20 **ṣmḥy:** This verb like **PRḤ** has the double meaning of "blooming, growing" and "shining". Cf. above, line 6, to **pryḥy.**

ʾyštpl...ʾybṭl...ʾytzḥ: These verbs belong to subjects in the plural: **gbry, ʾydy šmyh, qṣyry.** Their singular forms confirm the supposition

that the plural endings of verbs in the perfect were unpronounced (unless followed by a suffix). See above, Commentary to line 8 on **ʾt** etc.

ʾytzḥ: The phrase corresponds closely to Bavli Bava Batra 16b **ʾydly ywmʾ ʾydly qṣyr** "the day has risen, the sick man has risen", which is quoted there as a popular proverb.

ʾgbyh: This verb is seemingly derived from **GBY** "to seize (for taxes)", or, as in Syriac, "to choose". As none of these senses goes well with our context, we prefer to see this verb as belonging to **GBH** (which should have given **ʾgbhyh**) "to raise, lift".

qdḥ is a magic verb, as evidenced by Montgomery 1913, No. 10:11. See Epstein 1921, pp. 41 f., who overemphasizes, it seems, the sense of "to rise, pierce", while several passages make it plain that the verb has also the sense of "to wail, moan", as noted by Epstein himself, ibid., p. 42, notes 1–2. Cf. especially Yamauchi 1967, No. 22:162 f. (=Lidzbarski 1909) **ašlit illit uqhdit uṣinpit uamrit** "I shrieked, wailed, howled, screamed and said". For **QDḤ** in the sense of "to flee" see Bowl 10:11.

21 **šmyš**: For a similar role of this deity cf. Montgomery 1913, No. 36:2–3.

mlʾkyhwn: The possessive suffix is somewhat unexpected. One might think of an error for **ʿšrʾ mlʾky hʿynʾwn** "they are ten angels", or the like.

dʾytw: It seems that this is a *peʿal* form in the perfect tense, spelled with a *yod* for traditional Jewish Aramaic *ḥataf patah*.

mybyt šydyh: This expression seems to correspond to the original meaning of Iranian **baga-dāna-*, Old Persian *daiva-dāna-* "house of deities, temple". Cf. Shaked (forthcoming).

trʿ[mtʾ] or **trʿ[mʾ]** "quarrel, complaint"; an alternative reading could be **trʿ[tʾ]** "break, breach" (which the Targum uses for Hebrew פרץ).

III. Amulets and Fragments of Magic Books from the Cairo Geniza

Geniza 1

Amulet on cl[illegible]
T-S A.S. 142.17
Plate 32

3 and burn the heart of **ṭrškyn** son of Amat-Allāh (in longing) after **gdb** daughter of Tuffāḥa.
4 Amen.

χαρακτῆρες); see Margalioth 1966, pp. 4, 83–87. The phenomenon is already attested in Talmudic literature, cf. Kohut 1955, IV, p. 243a.

3 The magic aim of making someone's heart burn in longing after someone else occurs frequently in the love amulets from the Geniza. In our texts it occurs in Amulet 10.

1 Fast on Thursday and Friday eve night and write
2 early on Friday morning on an unbaked sherd in
3 an empty house, and throw it into (the furnace of)
the bathhouse: In the name of
4 Gabriel, Raphael, Ṣuriel, Dalqiel,
5 ʿUziel, Michael, Sarafiel and Aqbiel.
6 In the name of El El El El El El El **nnnnnnnnn.**
7 In the name of ‹‹‹‹‹‹‹. In the name of
8 **hhhhhhh.** You holy and
9 mighty names, heroes,
10 kindle and inflame the heart, fortune (!)
11 and kidney of X b. Y (in longing) after A b. B,
12 just as this sherd burns!
13 Amen, Amen. Immediately. (*magic*
14 *characters*) Do, skip ...,
15 hurry, make easy and do not deter.

1:2 The term *zagta bar baṭinta* is evidently based on the Talmudic phrase זגתא אוכמתא בי בטניתא (Bavli Bava Meṣi'a 86b), the meaning of which is not unequivocal. Rashi, followed by J. Levy (*Chaldäisches Wörterbuch,* s.v.), interpret it in the meaning of "a fattened black brooding hen", while Jastrow, s.v. בטניתא, tends to regard the phrase *Be baṭnita* as a geographic term. In Targum Jud. 15:15 **bṭynt'** stands for **ṭryh** "fresh" (cf. Tal 1975, p. 200, n. 25); see also Geniza 6, p. 4:10 **bydh ṭryh,** and Scholem 1965, p. 112.

1:3 **škbt zr'**: The second word in this Biblical Hebrew term is written in Arabic letters, with the possible aim of making the phrase difficult to decipher, perhaps because of its sexual connotation.

1:8 **rwz** is a Persian word.

1:11 **hnk** is here used for the singular, although it is otherwise consistently attested for the plural, both in the Talmudic literature and in the magic bowls (Montgomery 1913, No. 4:3), the latter under the form **'hnyk.** Cf. Epstein 1960, p. 26.

1:12 **drn'**: The reading is certain. The word is not Aramaic, unless we assume a corruption from **drk'** "road". **drn** is attested in Judaeo-Persian Bible translations for rendering Hebrew *'emeq* "valley" (cf. e.g. Paper

Geniza 3

Amulet
T–S A.S. 143.403
Plate 34

1 כשם אומר ועושה
2 מזמן הדין שמא לדלאל בת ציא
3 באהבת עשיר כן וצאיך שימני
4 כחותם על לבה ד"ד"לאל בת ציא וכחותם
5 על זרועך את דלאל כת ציא כי
6 עזה כמות אהבת דלאל בן(?) ציא

1972, Gen. 14:3,7,8; the editor read incorrectly **ddn**). The occurrence of two Persian words in this text, **rwz** and (presumably) **drn**, shows that the text derives from a Judaeo-Persian *milieu*.

2:2 *bākir* is evidently an Arabic word.

kzph nyh: Cf. also Geniza 5, p. 3:12 **šqph nyh**; Geniza 6, p. 1:3 and p. 4:4 **pkr ny**, all referring to an unbaked potsherd, and in all cases (with the possible exception of Geniza 6, p. 4:4) love charms are involved. For an example of an actual love amulet written on "unbaked clay" see Amulet 10, and the Commentary *ad loc.*

2:10 **lybh wmzlh wkwlyth:** The word **wmzlh** stands for **whwnh**, cf. Geniza 6, p. 1:13 **kn thpkwn lbh whwnh wkwlyth** ...The word **hwn**ʾ *(=hawnā)* means "mind, intelligence", but the writer associated this word with the Biblical Hebrew *hōn* "wealth, fortune"; the latter is translated in the Targum of Psalms (e.g. 112:3) and Proverbs (8:18; 19:4; 24:4; 29:3) by **mzl**ʾ, where in some manuscripts it is written **mwdl**ʾ.

2:13 **bpry**ʿ corrseponds to Greek ταχύ, cf. Reitzenstein 1904, p. 292, notes. For Aramaic **pry**ʿ cf. Kutscher 1976, p. 82. A similar expression in Aramaic is **b**ʿ**glh wl**ʾ **tt**ʿ**kb**; cf. Scholem 1965, p. 111.

2:15 **t**ʿ**kbwn** cf. Amulet 3:15.

Geniza 3

Translation

1 In the name of He who says and creates.
2 This spell (*lit.* name) is designated for Dallāl daughter of Ḍiyāʾ
3 for the love of ʿAšīr son of Waṣāʾif. Set me
4 as a seal upon the heart of Dallāl d. of Ḍiyāʾ and as a seal
5 on your arm, you, Dallāl d. of Ḍiyāʾ. For
6 the love of Dallāl d. of Ḍiyāʾ

7 לעשיר בן וצאיף קשה כשאול קנאה
8 רשפיה רשפי אש שלהבחיה מים
9 רבים לא יוכלו לכבות את אהבת דלאל
10 בן(!) ציא לעשיר בן וצאיף ונהרות לא
11 ישטפוה אם יתן איש א כל הון ביתו
12 בא בוז יבוזו לו ויהי יי את עשיר בן
13 [וצ]איף ויט [אליו חסד ויתן חנו בעיני]
14 [דלאל בת ציא ...]

3–12 The text is based on Cant. 8:6–7.

6 The writer uses here and in line 10 *ben* for *bat* after Dallāl. See above, Commentary to Bowl 4:7.

Geniza 4

Amulet
T-S K 1.68
Plate 34

....
1 סלה סלה סלה הללו[יה] בשם יי אל(הי) ישר(א)[ל]
2 על חסדך ועל אמת[ך] יה אלהים א אלהים א א[להי]
3 מערכות ישראל געור כל רוחין בישין [ויסורין]
4 וכל פגעין וכל מזיקין וכל שטן וכל צער וכל
5 מכאוב וכל מיני רוחין ושדין בשם אהיה

This is a fragment from a book of magical recipes. The individual sections are marked by Arabic numerals (27–32) on the outside margin.

1:1 For the medical terms which occur here cf. the Commentary to Amulet 2. **rqyqtʾ** is an error for **dqyqtʾ**; other corruptions of these terms see in Geniza 6, p. 3:12 and p. 4:1–2.

1:3 **ḥy hʾl:** Cf. Amulet 1:23.

1:12 **ṣynym:** The reading is somewhat doubtful, but this seems to be the only possible interpretation of the letters. The word is probably connected with one of the group of words attested in Biblical Hebrew: *ṣinna, ṣinnim, ṣinnot, ṣninim,* the meanings of which cover the following range: (1) shield; (2) prick, thorn; (3) fishing hook or spear; (4) chill, cold (cf. Gesenius-Robinson-Browne, *Hebrew and English Lexicon of the Old Testament,* Oxford 1975, s. vv.), or, less likely, with Talmudic *ṣinna* "basket". The association of this word with **šyš,** which apparently means "marble, alabaster", is unclear. An alternative reading might be

page 4

1 the fire. In the name of Azriel, Puriel,
2 for X b. Y, Amen Amen Selah... On Wednesday.
3 [xxxii] [...]
4 It will be written on leather with *sukk* (?) and saffron, on
5 Tuesday, and will be hidden in the door of the house. And this is
6 the writing on it: This is designated to cause X b. Y
7 to chase after A b. B. I adjure you,
8 Nuriel, who sits on the gates of fire, and
9 Shamshiel, who sits on the sun-globes.
10 And write as follows: I adjure you in the name of
11 **šmqḥ hlwk pqḥ ʿnbym dʾwpʿ**
12 that you should kindle and move the heart of X b. Y

šeyyēš, which would give an ungrammatical construction, unless some error is assumed in the writing.

2:1 In **lgwym**, as afterwards in **lp. b. p.**, the initial *lamed* seems to be used in the unusual sense of "against", or possibly "for (fighting against)".

3:4–5 Our text is based on Targum to Gen. 2:21.

3:7–10 The headache referred to in this amulet seems to be a toothache.

3:12 For **nyh** cf. Geniza 2, p. 2:2.

4:4 For **sk** cf. also Geniza 6, p. 2:8 **swk**. The word signifies a certain combination of elements, which make up a well known medical preparation; cf. e.g. Garbers 1948, pp. 329–331; Ps. Majrīṭī 1933, pp. 220:1, 275:7.

19 אמן אמן ה ס

1:1–2 **ʿd mn** for **ʿd mʾ**. The phrase **ʿd mn dyʿbd ṣbywny npšh** can be compared with the formula **ʿd dnṣby** below p. 3:7, 13 etc.

1:3 **pkr ny**: See Commentary to Geniza 2, p. 2:2 and to Amulet 10.

1:9 **dmny** for **dmmny**.

wʾ whnh is an error for **wʿl ḥnh**.

1:13 **whwnh**: The word **hwnʾ** may be connected to the Targumic and Syriac word *hawnā* "mind, intelligence", rather than to the Hebrew *hōn* "wealth". For **lbh whwnh wkwlyth**, Geniza 2, p. 2:10–11 has **lbh wmzlh wkwlyth**; see Commentary there and to Amulet 10.

1:16 **ʾlklm** for *al-kalām* (usually spelled in Jewish Arabic **ʾlklʾm**).

1:17 The expression **špt nhr gry** is somewhat incongruous, if the reading is correct. One might expect the Arabic *ḍaffa* rather than the Hebrew *śafa* or the Aramaic *siftā*.

page 4

(1) You holy letters, cause there to fall on X b. Y fire (2) and fever and groaning and may he be cast away on a sick-bed (3) and may he have no healing as long as I desire. A(men) A(men) S(elah) H(allelujah)."

(4) Another (charm). There should be written on an unbaked potsherd and buried in a furnace (as follows): (5) "The fire shall ever be burning upon X b. Y, it shall never go out. For fire (6) is kindled by my anger against X b. Y, it burns to the depths of (7) Sheol; it devours earth and its harvest and it glows at X b. Y. (8) Day and night shall the fire keep (burning) unextinguished at X b. Y. Behold, (9) the hand of the Lord is upon X b.Y. A(men) A(men) S(elah) H(allelujah)."

Another (charm). For hatred. There should be written (10) on a fresh egg, which will be buried on Friday (11) in a tomb (as follows): "This writing is designated for X b.Y, that he may hate (12) A b. B in the name of God. Then X b. Y hated A b. B (13) exceedingly, so that the hatred (14) with which X b. Y hated A b. B (15) was greater than the love with which he had loved him. In the name of Akatriel, (16) Hafkiel and Dfuniel, so should the heart (17) and mind of X b. Y change to hate A b. B like the way (18) a dog hates a pig and a pig hates a dog. (19) Amen Amen Selah Ha(llelujah)."

2:1 **gry** should be **gʾry** (Arabic *jārī*).
2:5 **ʾlhbw wlqṭpʾ wdlqw** seems to be an error for **ʾlhbw wʾdlqw**.
2:7 **gzl** should be **gzʾl**.
2:8 **swk**: Cf. above, Geniza 5, p. 4:4.
2:10 **lšprʾṭʾ** may be a corruption from **lšpr bʿynh** "finding grace" (?).
2:15 *lilmaraḍ*, as also *bayḍa*, *maḍira*, are spelled with *dalet*; cf. Blau 1980, pp. 35 f., § 2:15; pp. 38 f., § 2:21; Blau 1981, p. 76, note 1. "For sickness" means obviously "in order to inflict sickness on your enemy". Many of the recipes in this fragment deal with malicious effects which the magician tries to direct towards his enemy.
2:16 **mdrh** probably Arab *maḍira* "fresh". Professor Blau has suggested the reading *maḍira* "rotten (egg)", but the recipes usually call for fresh objects; cf. also p. 4:10 **bydh ṭryh**, as well as Geniza 2, p. 1:1–2.

2:18 **šyyḥ** from ŠWḤ "to melt, be consumed, waste away by fire".

3:1–2 The phrase here recalls Lev. 6:6.
3:5 **twrd** should be perhaps **twqd**?
3:7 **npp** or **npq**?
dnṣby may be either first person singular or plural; cf. Dalman 1905, p. 265; Kutscher 1971, col. 272. The singular seems preferable in this context; cf. T—S K 1. 95: **bḥtm' dḥtymyn ... wl' 'yštryn 'd d'nh 'yṣby.**
3:8 **dlp** may represent Arabic ظلف.
3:12 **'št' w'ryt' wz'qh**, cf. p. 4:1–2 **'š[th] z'ryth wdnwqh**, and Amulet 2:12 **'šth w'ryth wdqyqth**. The latter is the correct version meaning "fever, shivering and hectic fever".
3:16 **dyyb** from DWB (Hebrew ZWB) "to drip, to flow".
3:17 **'rs mr'h** is not known to us from other sources. It obviously means "a sick-bed", as Hebrew **'rś dwy** in Ps. 41:4.

4:1–2 See above Commentary to p. 3:12 as well as Commentary to Amulet 2:2, 12.
4:5 After Lev. 6:6.
4:5–7 After Deut. 32:22.
4:8–9 After Ex. 9:3.
4:12–15 After 2 Sam. 13:15.
4:18 **d'klbh** should be **dklbh**.

38 והפשיט את העלה ונרצה לו לכפר עליו

It has seemed unnecessary to give a translation of this text, which is largely based on biblical verses and contains parallels to other Geniza charms.

2–3 For **mwḥṣ wrwpʾ** cf. Dt. 32:39; Is. 30:26; Job 5:18.
3 The name of the client seems to be Bunayna daughter of Yaman (or Yumn).
5 Cf. Ps. 20:2.
8 For these formulae see Geniza 4:6 ff.
22 Gen. 49:22.
23–24 Ps. 55:9. The verse is repeated backwards.
26 ff. Is. 30:19.
28 **šr** seems to be the Arabic equivalent of Heb. *raʿ*, introduced as a gloss. The Hebrew phrase is a paraphrase of Ps. 91:10.
33 ff. Num. 6:24.
38 Lev. 1:6; 1:4.
